| Address | <p>means:</p> <ol style="list-style-type: none">1 in relation to a non-compliance with the requirements of this Agreement, amend the relevant Design Documentation to resolve the non-compliance;2 in relation to a potential non-compliance with the requirements of this Agreement:<ol style="list-style-type: none">a amend the relevant Design Documentation to resolve the potential non-compliance; orb explain why Project Co does not consider that an amendment is required to the relevant Design Documentation to resolve the potential non-compliance; and3 in relation to a comment which is not a non-compliance or a potential non-compliance with the requirements of this Agreement:<ol style="list-style-type: none">a amend the relevant Design Documentation in response to the comment; orb explain why Project Co does not consider that an amendment should be made to the relevant Design Documentation in response to the comment,<p>noting that Project Co is not required to amend the relevant Design Documentation where the comment does not relate to a non-compliance or potential non-compliance with the requirements of this Agreement.</p> |

| Term | Meaning |
|---|--|
| Architectural Alignment Issues | has the meaning given in section 2.11(c). |
| Architectural Alignment Issue Notice | has the meaning given in section 2.11(c)(1). |
| Certified Design | means, for each Design Package, the stage during which Project Co prepares and submits to the Independent Reviewer the Certified Design Documentation. |
| Certified Design Documentation | means the Design Documentation described in section 7.5.3 of the Design Requirements Section. |
| Design Development Coordinator | means the person identified as such in item 5 of the Contract Particulars subject to replacement in accordance with clause 13.1 of the Agreement. |
| Design Development Presentations | means the presentations conducted by Project Co during the Design Development Process in accordance with the D&C Program and the Design Management Plan. |
| Design Management Plan | means the plan of that name setting out the process for managing the Design Development Process to be prepared by Project Co and containing the information and documentation required by the Agreement (including section 5 of this Schedule), as further developed, reviewed, amended and updated from time to time by Project Co in accordance with the terms of the Agreement. |
| Design Package | means a design package as set out in the Design Management Plan. |
| Design Requirements Section | means section 7 of Part C of the PS&TR. |
| Design Stage | means: <ol style="list-style-type: none">1 Interim Design;2 Certified Design; or3 IFC Design. |

| Term | Meaning |
|---|---|
| Discipline | means each of the following: <ol style="list-style-type: none">1 Underground, groundwater and geotechnical;2 Shafts and retention structures;3 Station planning and pedestrian modelling;4 Station structures;5 Mechanical systems and ventilation;6 Electrical systems and power;7 Land, planning and environment;8 Architecture and urban design;9 Traffic and transport;10 Digital engineering;11 Rail and rail systems; and12 Systems engineering, and any other discipline agreed by Project Co and the State to be a 'Discipline' for the purposes of the Agreement. |
| Discipline Limit | has the meaning given in Attachment 2 to this Schedule. |
| IFC Design Documentation | has the meaning given in the Agreement. |
| Interim Design | means, for each Design Package, the stage during which Project Co prepares and submits to the Independent Reviewer the Interim Design Documentation. |
| Interim Design Documentation | means the Design Documentation described in section 7.5.2 of the Design Requirements Section. |
| Issued For Construction (IFC) Design | means, for each Design Package, the stage during which Project Co prepares and submits to the Independent Reviewer the IFC Design Documentation. |
| Review Period | means: <ol style="list-style-type: none">1 in the case of Interim Design Documentation, 5 Business Days; and2 in the case of Certified Design Documentation, 10 Business Days. |

| Term | Meaning |
|---------------------------|--|
| Stakeholder Groups | means those groups established in accordance with section 6.1. |
| Weekly Limit | 15 Design Packages per week. |

2 Design Development Process

2.1 General

- (a) **(Design Development Process):** The Design Development Process is the process by which Project Co progressively develops the design of the Project Assets and includes all other tasks identified in this Schedule and the Agreement (including the Design Requirements Section) as forming part of the Design Development Process.
- (b) **(Design Packages):** To facilitate the conduct of the Design Development Process, the design work for the Project Assets has been divided into Design Packages as set out in the Design Management Plan.
- (c) **(Design Stages):** The Design Documentation for each Design Package is divided into three Design Stages consisting of:
- (1) Interim Design;
 - (2) Certified Design; and
 - (3) IFC Design.
- (d) Not used.
- (e) **(Copies to State and stakeholders):** At the same time Project Co submits:
- (1) any Design Documentation to the Independent Reviewer, a copy must also be provided to the State; and
 - (2) any IFC Design Documentation to the Independent Reviewer, a copy must also be provided to any relevant stakeholders.
- (f) **(Further information):** If required by the Independent Reviewer or the State, the appropriate design personnel (including the Proof Engineer), must be made available to:
- (1) explain any Design Documentation; and
 - (2) provide such information regarding any Design Documentation as the Independent Reviewer or the State reasonably requests.
- (g) **(Relevant stakeholders):** For the purpose of this Schedule a relevant stakeholder is a member of a Stakeholder Group (including any stakeholder nominated by the State under section 6.1(b) at any time).

2.2 Design Development Coordinator obligations

Project Co must ensure that the Design Development Coordinator:

- (a) convenes and manages meetings with the Independent Reviewer, the State and any relevant stakeholders in respect of the design of the Project Assets;
- (b) convenes and manages all Design Development Presentations;
- (c) manages the submission of the Design Documentation in accordance with this Schedule;
- (d) reviews all of the Design Documentation prior to submission to the Independent Reviewer and ensures that the Design Documentation:
 - (1) is complete, co-ordinated and of a high quality capable of review by the Independent Reviewer in accordance with this Schedule (including ensuring that all Stakeholder Groups' input in respect of the Project Assets is considered); and
 - (2) where required by this Schedule, is updated to reflect and incorporate Stakeholder Groups' input in respect of the Project Assets; and
- (e) otherwise consults with the Independent Reviewer, the State and all relevant stakeholders throughout the Design Development Process as required by the Agreement,

in accordance with this section 2.2, the Design Management Plan, the D&C Program and the remainder of this Schedule.

2.3 Sequence, concurrency and overlap of Design Packages

- (a) Project Co must complete and submit the Design Packages for review by the Independent Reviewer in accordance with the Design Management Plan, the D&C Program and this Schedule.
- (b) Project Co must not submit Design Documentation in respect of a Design Package to the Independent Reviewer for review unless:
 - (1) Project Co has prepared all the Design Documentation in respect of that Design Stage in accordance with the Agreement;
 - (2) without limiting section 2.3(b)(1), Project Co has conducted all design verification activities, risk assessments, risk workshops, stakeholder consultation and all other activities in respect of that Design Stage required by the Design Requirements Section, this Schedule and the Agreement, including the activities referred to in section 2.7; and
 - (3) for Design Stages other than Interim Design:
 - (A) Project Co has submitted all Design Documentation relating to the relevant Design Package and Design Stage for the previous Design Stage in accordance with this Schedule;
 - (B) the Review Period has expired for the previous Design Stage; and
 - (C) subject to section 2.9(b), if the Independent Reviewer has provided comments on the Design Documentation for a previous Design Stage, Project Co has complied with its obligations under this Schedule in connection with such comments (including, if necessary, to Address particular comments or to resubmit Design Documentation).

2.4 Project Co must not proceed with additional Design Packages

- (a) Project Co may divide the design work for the Project Assets into additional Design Packages beyond those specified in the Design Management Plan subject to receiving the State's prior written approval to do so (such approval not to be unreasonably withheld).
- (b) Project Co must submit the following information to the State as part of a request for approval to divide the design work for the Project Assets into additional Design Packages:
 - (1) details of the reasoning for additional Design Packages; and
 - (2) such other information concerning the proposed Design Package reasonably requested by the State.

2.5 Timing for submission of Design Documentation

Project Co:

- (a) must, for each Design Package, submit the complete set of Design Documentation for each Design Stage to the Independent Reviewer in accordance with:
 - (1) the Agreement, including this Schedule and the Design Requirements Section;
 - (2) the Design Management Plan; and
 - (3) the timing set out in the D&C Program;
- (b) must, for each Design Package, submit the Design Documentation for each Design Stage as one complete package of information and not as individual documents, except where:
 - (1) Project Co is required to revise one or more items of the Design Documentation to Address the Independent Reviewer's comments, in which case it may resubmit such documents individually and the submission limits in section 2.5(d) do not apply to a re-submitted document; or
 - (2) the State directs otherwise (acting reasonably) in respect of a Design Package, in which case Project Co must submit such documents as directed;
- (c) acknowledges that the Review Period commences upon receipt by the Independent Reviewer of all of the Design Documentation comprising a Design Package for the relevant Design Stage which complies with the requirements of the Agreement and which is submitted in accordance with section 2.8(a) or section 2.8(c) (as applicable);
- (d) must not, unless otherwise approved in writing by the State, or where to do so would be consistent with the timing for submitting the relevant Design Packages as set out in the D&C Program, submit to the Independent Reviewer for review:
 - (1) subject to section 2.5(d)(1), more than the Weekly Limit; and
 - (2) within the Weekly Limit, more than the Discipline Limit per week for each Discipline as specified in Attachment 2; and
- (e) must submit other additional information reasonably requested by the Independent Reviewer or the State to the Independent Reviewer for review in accordance with this Schedule (with a copy provided to the State).

2.6 Form of Design Documentation

- (a) Project Co must ensure that each of the items of Design Documentation contain or identify the following information (unless otherwise agreed by the State):
- (1) the Design Package to which the Design Documentation relates;
 - (2) the Design Stage to which the Design Documentation relates;
 - (3) details of any Modifications that have arisen during the Design Development Process (including any that have arisen from directions given by the State in accordance with clause 38 of the Agreement)); and
 - (4) any other information reasonably requested by the Independent Reviewer or the State.
- (b) Without limiting section 2.6(a), the Design Documentation must include:
- (1) in the case of the Interim Design Documentation, the information required by section 7.5.2 of the Design Requirements Section;
 - (2) in the case of the Certified Design Documentation, the information required by section 7.5.3 of the Design Requirements Section;
 - (3) in the case of the IFC Design Documentation, the information required by section 7.5.4 of the Design Requirements Section; and
 - (4) any certificates required by the Agreement (including the Design Requirements Section and the Schedule of Certificates and Notices).
- (c) Project Co must highlight all amendments to the Design Documentation and in doing so show all changes to the Design Documentation from those submitted for the previous Design Stage, or in respect of the first Design Stage, from the Technical Solution.

2.7 State and stakeholder review of Interim Design Documentation and Certified Design Documentation

- (a) **(Review of Interim Design):** In respect of the Interim Design Documentation for each Design Package, Project Co must, provided that it has first completed design verification in accordance with section 7.7 of the Design Requirements Section:
- (1) issue the Interim Design Documentation for that Design Package to the Independent Reviewer, the State and all relevant stakeholders (including the Rail Franchisee and the Rail Systems Alliance and Rail Infrastructure Alliance in accordance with the Coordination and Interface Deed Poll), provided that it must not, unless otherwise approved in writing by the State, issue:
 - (A) more than the Weekly Limit; and
 - (B) within the Weekly Limit, more than the Discipline Limit per week for each Discipline as specified in Attachment 2; and
 - (2) allow the Independent Reviewer, the State and the relevant stakeholders a period of 20 Business Days to provide any comments in respect of the Interim Design Documentation.
- (b) **(Review and consolidation of comments on Interim Design):** Project Co must:

- (1) review any comments in respect of the Interim Design Documentation received from the Independent Reviewer, the State or any relevant stakeholders within the 20 Business Day period referred to in section 2.7(a)(2);
 - (2) prepare a consolidated list of the comments; and
 - (3) include the consolidated list of comments in the design report required by section 7.5.2.1 of the Design Requirements Section to be included with the submission of the Interim Design Documentation pursuant to section 2.8(a), together with a description of how these comments have been Addressed.
- (c) **(Review of Certified Design):** In respect of the Certified Design Documentation for each Design Package, Project Co must, provided that it has first completed design verification in accordance with section 7.7 of the Design Requirements Section:
- (1) issue the Certified Design Documentation for that Design Package to the Independent Reviewer, the State and all relevant stakeholders (including the Rail Franchisee and the Rail Systems Alliance and Rail Infrastructure Alliance in accordance with the Coordination and Interface Deed Poll), provided that it must not, unless otherwise approved in writing by the State, issue:
 - (A) more than the Weekly Limit; and
 - (B) within the Weekly Limit, more than the Discipline Limit per week for each Discipline as specified in Attachment 2; and
 - (2) allow the Independent Reviewer, the State and the relevant stakeholders a period of 15 Business Days to provide any comments in respect of the Certified Design Documentation.
- (d) **(Review and consolidation of comments on Certified Design):** Project Co must:
- (1) review any comments in respect of the Certified Design Documentation received from the Independent Reviewer, the State or any relevant stakeholders within the relevant period referred to in section 2.7(c)(2);
 - (2) prepare a consolidated list of the comments; and
 - (3) include the consolidated list of comments in the design report required by section 7.5.3.1 of the Design Requirements Section to be included with the submission of the Certified Design Documentation pursuant to section 2.8(c), together with a description of how these comments have been Addressed.

2.8 Review of Interim Design Documentation and Certified Design Documentation by Independent Reviewer

- (a) **(Review of Interim Design Documentation):** Project Co must submit the Interim Design Documentation for a Design Package to the Independent Reviewer for review in accordance with section 2.5 and following completion of the activities referred to in sections 2.7(a) and 2.7(b) in relation to that Interim Design Documentation. The Independent Reviewer, within the Review Period for Interim Design Documentation, must:

- (1) review the Interim Design Documentation (taking into account any comments from the State and relevant stakeholders included in the design report submitted with the Design Documentation); and
 - (2) notify Project Co:
 - (A) that it may proceed to develop and submit Certified Design Documentation for review by the Independent Reviewer; or
 - (B) of any actual non-compliances and potential non-compliances with the requirements of the Agreement, together with detailed reasons, and whether:
 - (i) the actual non-compliances and, where the Interim Design Documentation relates to Temporary Works only, any potential non-compliances, must be Addressed by Project Co before Project Co may proceed to develop and submit Certified Design Documentation for review by the Independent Reviewer; or
 - (ii) the actual non-compliances and, where the Interim Design Documentation relates to Temporary Works only, any potential non-compliances, must be Addressed by Project Co as part of the submission of Design Documentation for Certified Design.
- (b) **(Response to Interim Design Documentation):** If, in respect of Interim Design Documentation, the Independent Reviewer does not within the Review Period notify Project Co of any actual or potential non-compliances with the requirements of the Agreement which must be Addressed by Project Co in accordance with section 2.8(a)(2)(B)(i), Project Co may proceed to develop and submit Certified Design Documentation for review by the Independent Reviewer.
- (c) **(Review of Certified Design Documentation):** Project Co must submit the Certified Design Documentation for a Design Package to the Independent Reviewer for review in accordance with section 2.5 and following completion of the activities referred to in sections 2.7(c) and 2.7(d) in relation to that Certified Design Documentation. The Independent Reviewer, within the Review Period for Certified Design Documentation, must review the Certified Design Documentation (taking into account any comments from the State and relevant stakeholders included in the design report submitted with the Design Documentation) and:
- (1) subject to section 2.8(c)(2)(B), to the extent the Independent Reviewer considers that all or part of the Design Documentation complies with the requirements of the Agreement, certify the complying parts of the Design Documentation by:
 - (A) including a notation on each document forming part of the complying Design Documentation; and
 - (B) providing to Project Co and the State a certificate in the form set out in the Schedule of Certificates and Notices; and
 - (2) to the extent the Independent Reviewer considers that all or part of the Design Documentation:
 - (A) contains actual non-compliances with the requirements of the Agreement; or

- (B) insofar as the Design Documentation relates to Temporary Works, contains potential non-compliances with the requirements of the Agreement,

notify Project Co of those actual non-compliances and potential non-compliances with the requirements of the Agreement, together with detailed reasons, which must be Addressed by Project Co before Project Co may proceed to develop and issue IFC Design Documentation for that part of the Design Package.

- (d) **(Response to Certified Design Documentation):** If, in respect of Certified Design Documentation, the Independent Reviewer does not within the Review Period either:

- (1) certify all or part of the Design Documentation; or
- (2) notify Project Co of any actual or potential non-compliances with the requirements of the Agreement which must be Addressed by Project Co in accordance with section 2.8(c)(2),

Project Co may, subject to section 2.9, proceed to develop and issue IFC Design Documentation.

- (e) **(Non-compliances):** If:

- (1) the Independent Reviewer notifies Project Co under section 2.8(a)(2)(B)(i) or section 2.8(c)(2) that any Design Documentation contains an actual or potential non-compliance with the requirements of the Agreement which must be Addressed by Project Co before Project Co may proceed to submit Certified Design Documentation or develop and issue IFC Design Documentation (as applicable); or
- (2) the Independent Reviewer notifies Project Co under section 2.8(a)(2)(B)(ii) of any actual non-compliances and potential non-compliances with the requirements of the Agreement which must be Addressed by Project Co as part of the submission of Design Documentation for Certified Design,

then:

- (3) the Independent Reviewer must:
 - (A) identify the relevant requirements or provisions of the Agreement with which it considers that the Design Documentation does not comply or potentially does not comply; and
 - (B) provide such detail as is reasonably necessary to substantiate why it considers that the Design Documentation does not comply or potentially does not comply with those requirements or provisions; and
- (4) Project Co must:
 - (A) where section 2.8(e)(1) applies:
 - (i) amend all relevant parts of the Design Documentation as necessary to Address the non-compliance notified by the Independent Reviewer and re-submit the amended elements in accordance with section 2.5; and

- (ii) the process in section 2.8(a) or section 2.8(c) (as applicable) will be reapplied to the amended parts of the Design Documentation; or
- (B) where section 2.8(e)(2) applies, amend all relevant parts of the Design Documentation as necessary to Address the non-compliance notified by the Independent Reviewer as part of submission of Design Documentation for Certified Design.

2.9 Issue of IFC Design

- (a) The IFC Design Documentation for each Design Package must be developed and issued to the State, the Independent Reviewer and the relevant stakeholders together with all information required by this Schedule to be included with the issue of the IFC Design Documentation and each drawing issued as part of IFC Design Documentation must be clearly marked as “Issued for Construction”.
- (b) Where:
 - (1) the Certified Design Documentation has been submitted for review in accordance with section 2.8;
 - (2) the Independent Reviewer has been given the required number of days to review the Certified Design Documentation; and
 - (3) the Independent Reviewer has not within the Review Period either:
 - (A) certified all or part of the Design Documentation; or
 - (B) notified Project Co of any non-compliances which must be Addressed by Project Co before Project Co may proceed to develop and issue IFC Design Documentation in accordance with section 2.8(c)(2),

Project Co may issue IFC Design Documentation for that Design Package and use the IFC Design Documentation for construction purposes at Project Co’s own risk, including risks associated with:

- (4) proceeding with such construction; and
 - (5) the risk that the relevant Design Documentation is subsequently not certified by the Independent Reviewer and the Independent Reviewer notifies Project Co of any actual or potential non-compliances with the requirements of the Agreement and section 2.9(c) applies.
- (c) If Project Co has used the IFC Design Documentation for construction purposes in accordance with section 2.9(b) and the Independent Reviewer subsequently notifies Project Co of any actual non-compliances or where the IFC Design Documentation relates to Temporary Works only, any potential non-compliances with the requirements of the Agreement:
 - (1) Project Co must immediately cease any construction work being carried out in accordance with the relevant non-compliant element of the IFC Design Documentation but Project Co may commence or continue construction in accordance with any element of the IFC Design Documentation that the Independent Reviewer has not identified as being non-compliant with the Agreement;
 - (2) section 2.8(c) will apply in relation to the non-compliant element of the Design Documentation; and

- (3) Project Co must rectify any construction work carried out in accordance with the relevant non-compliant element of the Design Documentation so that such construction work complies with the requirements of the Agreement.
- (d) Without limiting section 2.9(b), where all or any part of the Certified Design Documentation is certified, Project Co may proceed to develop and issue IFC Design Documentation for those certified parts of a Design Package.

2.10 Changes to the Technical Solution

- (a) The process of developing the design from the Technical Solution to the IFC Design Documentation may result in changes to the Technical Solution.
- (b) Subject to clause 8(b), changes to the Technical Solution must not be made unless:
 - (1) the change:
 - (A) is notified to the Independent Reviewer; and
 - (B) is necessary to comply with the Agreement; or
 - (2) it is demonstrated to the satisfaction of the Independent Reviewer that the change:
 - (A) is minor;
 - (B) is consistent with the design intent in the Technical Solution, otherwise complies with the Agreement and the PS&TR; and
 - (C) does not result in a lessening of any requirement, standard, level of service or scope for any work set out in the Technical Solution (including any reduction in capacity, durability, maintainability, Design Life, quality aesthetics of visual features, whole of life performance, functional performance, environmental protection, sustainability, safety, security, community amenity or benefits, or Customer benefits).
- (c) Any change to the Technical Solution which is not a change of the kind described in section 2.10(b)(2) may only be made if the change is agreed by the State.

2.11 Design Development resolution

- (a) Project Co acknowledges its obligations to consult with stakeholders as required under this Agreement. The following does not detract from or remove these obligations.
- (b) Prior to formal submission of a Design Package there will be presentations and workshops facilitated by Project Co. Following these, the State agrees that it will assist with managing all comments on architectural design development received from its internal Government stakeholders (other than any stakeholder who has carriage of planning or environmental issues) so that Project Co is only required to deal with a single set of consolidated comments from these stakeholders.
- (c) The parties acknowledge the importance of minimising delays in the Design Development Process to protect the overall delivery program of the Project. Accordingly, the parties agree the need for an expedited process to align comments from the aforementioned stakeholders prior to formal submission of

design packages with respect to architectural outcomes (**Architectural Alignment Issues**), as follows:

- (1) Where Project Co identifies that an Architectural Alignment Issue has arisen following feedback from the State as above, Project Co will notify the State in writing of the Architectural Alignment Issue including details as to the nature of the Architectural Alignment Issue and recommendations for options to manage the Architectural Alignment Issue (**Architectural Alignment Issue Notice**);
- (2) 2 Business Days following receipt of the Architectural Alignment Issue Notice the parties will meet to discuss and agree the way forward on the Architectural Alignment Issue; and
- (3) 5 Business Days following this meeting the State will advise Project Co of its required outcome in respect of the Architectural Alignment Issue.

3 Accelerated Design Packages

Other than to the extent set out in the Accelerated Design Review Process:

- (a) the requirements of this Schedule do not apply; and
- (b) the Accelerated Design Review Process continues to apply, to Design Documentation for the Accelerated Design Packages.

4 Initial Design Meeting

As soon as possible and no later than 10 Business Days after Financial Close, Project Co must coordinate and attend an initial design meeting with the Independent Reviewer and the State to:

- (a) commence planning of the Design Development Process; and
- (b) discuss the Design Management Plan.

5 Design Management Plan

5.1 Further updates to Design Management Plan

- (a) Project Co must:
 - (1) submit an updated Design Management Plan or a discrete component of the Design Management Plan (as applicable):
 - (A) if reasonably requested by the State or the Independent Reviewer to do so; and
 - (B) otherwise as it considers necessary to reflect any changes to the nature or the status of the Works; and

- (2) submit any revisions, modifications or updated versions of the Design Management Plan to the State and the Independent Reviewer for review in accordance with the Review Procedures.
- (b) In so far as there is any inconsistency between the Design Management Plan and the Agreement, the requirements of the Agreement will prevail.

5.2 Changes to Design Management Plan

- (a) Project Co must make changes to the Design Management Plan that are reasonably directed by the State.
- (b) Without limiting section 5.2(a), Project Co must make changes to the Design Management Plan that are reasonably directed by the State if the State reasonably forms the view that the approved Design Management Plan does not:
 - (1) adequately reflect or take into account the scope of the Design Development Process;
 - (2) adequately take into account the requirements of the Stakeholder Groups in respect of the Project Assets;
 - (3) effectively or reliably result in the production of Design Documentation that comply with the requirements of the Agreement; or
 - (4) allow the Independent Reviewer sufficient time in which to receive and review the Design Documentation in accordance with the Review Procedures.

6 Stakeholder Groups' involvement in the Design Development Process

6.1 Establishment of Stakeholder Groups

- (a) **(Nomination of members)**: Project Co must nominate members of the Stakeholder Groups in its Communications and Stakeholder Engagement Management Plan submitted to the Independent Reviewer for review in accordance with the Review Procedures.
- (b) **(State nomination)**: The State may nominate additional members of any Stakeholder Groups at any time and in its sole and absolute discretion.
- (c) **(Representatives)**: Stakeholder Groups may be formed for various Design Packages and must include representatives of the State and the Independent Reviewer and those stakeholders as nominated by Project Co in the Community and Stakeholder Engagement Management Plan and may include representatives of Returned Asset Owners and representatives from local government.

6.2 Management of the Stakeholder Group process

Project Co must manage and document the entire Stakeholder Group process, including by:

- (a) liaising with the State and the Independent Reviewer with respect to coordinating Stakeholder Group meetings so they may be conducted on days

and at times that typically enable the Stakeholder Group members to attend the meetings;

- (b) providing the State, the Independent Reviewer and any Stakeholder Group members with at least 10 Business Days' notice of the date, time and location of the meeting;
- (c) prior to each Stakeholder Group meeting, preparing and distributing an agenda and all relevant design documentation and notes to all invitees;
- (d) after each Stakeholder Group meeting, preparing minutes which at a minimum include details of:
 - (1) the date and time of the meeting;
 - (2) persons in attendance and absentee Stakeholder Group members;
 - (3) items discussed at the meeting (including details of any drawing numbers discussed); and
 - (4) proposed outcomes of the meetings;
- (e) providing copies of the proposed minutes of the Stakeholder Group meetings to the invitees, the Independent Reviewer and the State within 3 Business Days of the meeting;
- (f) incorporating any changes or amendments to the proposed minutes of the Stakeholder Group meetings (including with respect to the proposed outcome of the meetings) reasonably requested by the State; and
- (g) creating electronic files for the Stakeholder Group (including agendas, design documentation, minutes any marked up or annotated drawings) so as to facilitate easy access to such information.

6.3 Project Co acknowledgement

- (a) **(No Claim):** Project Co acknowledges and agrees that it is not entitled to make any Claim against the State for Liabilities incurred by Project Co arising out of or in connection with the conduct of the Stakeholder Group meetings, including the time taken to arrange each of the Stakeholder Group meetings and the number and duration of each of the Stakeholder Group meetings.
- (b) **(No Modification):** Project Co acknowledges and agrees that the Stakeholder Group meetings and process of themselves cannot constitute a Modification or be deemed to constitute a State direction to request a Modification Quote. Any Modification requested by the State will be undertaken in accordance with clause 38 of the Agreement.

7 Design Development Presentations

7.1 Purpose of Design Development Presentations

The purpose of the Design Development Presentations is to:

- (a) visually demonstrate the design of the Project Assets (including the progressive development of the design of the Project Assets);
- (b) if requested by the State or the Independent Reviewer, present and explain mock ups (including full scale or scale mock ups) of different components of the Project Assets;

- (c) identify key elevations and sections;
- (d) demonstrate how the design of the Project Assets complements and is otherwise consistent with the purposes of the Project;
- (e) provide updated animations of the Project Assets;
- (f) provide updated sample boards;
- (g) demonstrate that the design is such that the Project Assets are consistent with the design requirements set out in the PS&TR and will satisfy the FFP Warranty; and
- (h) address specific issues otherwise identified by the State or the Independent Reviewer (acting reasonably).

7.2 Frequency, notice and attendance at Design Development Presentations

Project Co must:

- (a) undertake the Design Development Presentations generally in accordance with the D&C Program and otherwise at the request of the Independent Reviewer or the State (acting reasonably) and must give the Independent Reviewer, the State and other proposed attendees approved by the State 10 Business Days' notice of the conduct of a Design Development Presentation;
- (b) ensure that, as a minimum, the relevant Key Subcontractors and the lead designers attend such Design Development Presentations to provide explanations concerning the design and any other relevant supporting information; and
- (c) provide any additional Design Development Presentations requested by the Independent Reviewer or the State (acting reasonably).

8 IFC Design Documentation

- (a) Project Co must only use the IFC Design Documentation for the purposes of construction of the Project Assets.
- (b) Project Co must not amend the IFC Design Documentation that has been reviewed by the Independent Reviewer in accordance with this Schedule unless Project Co has satisfied any requirements set out in the Agreement in relation to the proposed amendment and the proposed amendment has been submitted to the Independent Reviewer for review in accordance with this Schedule.

9 Mock ups and material samples

- (a) As part of the Design Development Process, Project Co must prepare and submit to the Independent Reviewer the project specific material samples and mock ups required by section 7.6 of the Design Requirements Section.
- (b) All material sample and mock up submissions must be accompanied by any information required by section 7.6 of the Design Requirements Section.
- (c) [Not used].

- (d) Project Co must provide the State and the Independent Reviewer with at least 4 weeks' prior notice of the submission of any material samples or mock ups.
- (e) The Independent Reviewer, within 6 weeks of the date of submission of any material sample or mock up, will:
 - (1) review the material sample or mock up; and
 - (2) either:
 - (A) certify the material sample or mock up, in which case Project Co may, subject to the Independent Reviewer certifying any Certified Design Documentation relevant to the material sample or mock up, proceed to construct the Works to which the material sample or mock up relates; or
 - (B) notify Project Co of any actual non-compliances with the requirements of the Agreement, together with detailed reasons, which must be Addressed by Project Co before Project Co may proceed to construction of the Works to which the material sample or mock up relates.

Attachment 1

Accelerated Design Packages

Attachment 2

Discipline Limit

| Discipline | Discipline Limit (number of Design Packages) |
|---|---|
| Underground, groundwater and geotechnical | 6 |
| Shafts and retention structures | 5 |
| Station planning and pedestrian modelling | 5 |
| Station structures | 6 |
| Mechanical systems and ventilation | 6 |
| Electrical systems and power | 5 |
| Land, planning and environment | 3 |
| Architecture and urban design | 5 |
| Traffic and transport | 5 |
| Digital engineering | 5 |
| Rail and rail systems | 5 |
| Systems engineering | 5 |

Schedule 26

Completion Schedule

1 Introduction

- (a) The overriding obligation of Project Co in respect of the Tests is that Project Co must demonstrate, to the extent applicable to achieve either Provisional Acceptance or Final Acceptance (as the case may be), that all of the Project Agreement requirements in respect of the Works have been met and that the Relevant Infrastructure is Fit for Purpose.
- (b) Attachment 1 to this Schedule sets out a non-exhaustive list of Tests that must be successfully completed in order for Project Co to achieve Provisional Acceptance.
- (c) Attachment 2 to this Schedule sets out a non-exhaustive list of Tests that must be successfully completed in order for Project Co to achieve Final Acceptance.
- (d) This Schedule is not an exhaustive list of the tests to be undertaken by Project Co as part of the Tests and does not in any way limit Project Co's overriding obligations as set out in paragraph (a).
- (e) Capitalised terms not defined in this schedule, or this Agreement have the meaning given to them in the PS&TR.

2 Integrated Testing

- (a) The Tests must include, as a minimum, testing which spans across all services disciplines and other inter-package disciplines, as required, to obtain satisfactory operation of an overall system, including 'Level 2 Systems Integration', 'Level 3 Systems Integration' and 'Level 4 Systems Integration' (each as defined in the Final Acceptance Works Schedule) (**Integrated Testing**).
- (b) Without limiting paragraph (a), situations where Integrated Testing is required include, as a minimum:
 - (1) critical operational tests of installations, system interfaces, operationally critical rooms, critical and essential power supply equipment, other plant, back-up system operation and alarming;
 - (2) essential services systems, including fire mode operation tests and reset after fire mode operation; and
 - (3) performance testing of systems or situations that cover more than a single discipline, including energy-metering, air tightness testing, failure simulation tests, security and information and communications technology interfaces.

- (c) Integrated Testing must demonstrate that all systems and interfaces between systems are operating correctly, ensuring that the operation of the system as a whole is successful.
- (d) Project Co and all relevant Subcontractors must:
 - (1) be available for each Integrated Test;
 - (2) provide the staff and resources necessary for each Integrated Test, and
 - (3) provide staff of suitable experience to deal with Defects or programming faults found during Integrated Testing.
- (e) Integrated Testing shall only be carried out on completed systems.

3 Provisional Acceptance

3.1 Conditions precedent

As a condition precedent to Provisional Acceptance, Project Co must:

- (a) deliver to the State and the Independent Reviewer the report described in clause 3.2 of this Completion Schedule;
- (b) assign to the State or its nominee full right, title and interest in and to any part of the Maintained Assets in respect of which property has not already passed to the State or its nominee;
- (c) remove all unused materials and equipment and the Temporary Works from the Site (other than to the extent that Project Co can demonstrate to the satisfaction of the State that unused materials and equipment and the Temporary Works are required to remain on the Site in order to progress the works to Final Acceptance);
- (d) complete and pass the Tests set out in Attachment 1 of this Completion Schedule;
- (e) complete and pass all 'Level 0 Systems Integration', 'Level 1 Systems Integration' and 'Level 2 Systems Integration' (each as defined in the Final Acceptance Works Schedule) in respect of the Works;
- (f) achieve each Progress Milestone;
- (g) in relation to each Returned Asset (other than the Returned Train Works and the Returned VicTrack Works):
 - (1) comply with its obligations under clause 24.4 (*Completion and Handback of Returned Works*) of this Agreement;
 - (2) transfer to the relevant Returned Asset Owner, the Project Co Material relating to the Returned Asset (including all rights, title and interest in them) free from any encumbrances and to the standards required by this Agreement;
 - (3) subject to the Intellectual Property Schedule, grant or procure the grant to each Returned Asset Owner of such Intellectual Property Rights as will enable the Returned Asset Owner or its nominee to operate, maintain and repair the relevant Returned Asset in accordance with Best Maintenance Practices and Best Operating Practices;

- (4) provide to the each Returned Asset Owner all software, hardware, equipment, materials and documentation necessary in order for the State or its nominee to operate, maintain and repair the relevant Returned Asset in accordance with Best Maintenance Practices and Best Operating Practices;
 - (5) subject to the Intellectual Property Schedule, procure for each Returned Asset Owner an assignment or sub-licence of all Third Party Intellectual Property Licences required to operate, maintain and repair the relevant Returned Asset in accordance with Best Maintenance Practices and Best Operating Practices; and
 - (6) do all acts and things reasonably necessary to enable each Returned Asset Owner (or its nominee) to have transferred or obtained all Approvals necessary to operate, maintain and repair the relevant Returned Asset in accordance with Best Maintenance Practices and Best Operating Practices; and
- (h) any other matters or conditions required by this Agreement in order to achieve Provisional Acceptance have been satisfied.

3.2 Provisional Acceptance report

Project Co must provide to the State and the Independent Reviewer a report consisting of the following documents and other information in relation to the Maintained Assets (excluding the Final Acceptance Works) and Returned Works (excluding the Returned Train Works and the Returned VicTrack Works) in a form acceptable to the State:

- (a) As-Built Records required under this Agreement;
- (b) the register of all records/documents required to be held by Project Co in accordance with this Agreement;
- (c) evidence of compliance with all requirements of relevant Authorities in relation to Provisional Acceptance;
- (d) quality reports and records demonstrating compliance with the requirements of this Agreement including evidence that the inspections, test results and audits are in accordance with this Agreement;
- (e) evidence that the Tests for Provisional Acceptance, including Tests undertaken to comply with the Integrated Testing requirements set out in section 2, have been passed in accordance with this Agreement;
- (f) evidence that all Health and Safety Incidents have been addressed in accordance with the relevant Management Plans;
- (g) documents and details proving that all waste materials have been removed from the part of the Site on which D&C Activities have been carried out and disposed of in accordance with this Agreement;
- (h) to the extent not already provided, all manufacturers' and trade warranties required by this Agreement;
- (i) copies of all Approvals (other than Key Approvals) required by this Agreement, including evidence of compliance with all Approvals;
- (j) any certificates of occupancy required under the *Building Act 1993* (Vic) or equivalent legislation;
- (k) evidence of compliance with all Project Co's obligations in connection with the Rail Safety National Law including those under clause 9 (*Rail Safety (Train)*) of this Agreement;

- (l) evidence of compliance with all Project Co's obligations in connection with the Tram Safety Act including those under clause 10 (*Rail Safety (Tram)*) of this Agreement;
- (m) the proposed program to correct any Minor Defects that are included in the list provided pursuant to clause 24.3(a)(3) (*Provisional Acceptance*) of this Agreement along with the details, including contact details, of Project Co's representative who will be responsible for correcting the Minor Defects;
- (n) to the extent not already provided, copies of all relevant pre-construction and post-construction ground and infrastructure survey reports required by this Agreement;
- (o) the LIDP Monitoring Table, a report detailing Project Co's compliance with the Local Content Requirements (Victorian) and the Victorian Jobs Requirements, and a statutory declaration in accordance with clause 60.3(b) (*Reporting*) of this Agreement;
- (p) the Major Projects Skills Guarantee Final Report and a statutory declaration in accordance with clause 61.2(d) (*Reports*) of this Agreement;
- (q) a certificate issued by the Independent Reviewer certifying the percentage of Local Content (ANZ) used and Priority Jobseekers employed by Project Co to the Date of Provisional Acceptance in undertaking the D&C Activities in accordance with clause 60.4(a) (*Adjustment of Quarterly Services Payment*) of this Agreement;
- (r) a certificate issued by the Independent Reviewer certifying the percentage of labour hours performed by Apprentices, Trainees and Engineering Cadets to the Date of Provisional Acceptance in accordance with clause 61.3(a) (*Adjustment of Quarterly Services Payment*) of this Agreement; and
- (s) all other documentation and information which, in the opinion of the Independent Reviewer, is reasonably necessary for the operation, use and maintenance of the Maintained Assets, and which is in a form acceptable to the Independent Reviewer, including lists of depreciable spare parts, warranties, guarantees and services agreements.

4 Final Acceptance

4.1 Final Acceptance

As a condition precedent to Final Acceptance, Project Co must:

- (a) deliver to the State and the Independent Reviewer the report described in clause 4.2 of this Completion Schedule;
- (b) remove all unused materials and equipment and the Temporary Works from the Site (other than to the extent that Project Co can demonstrate to the satisfaction of the State that unused materials and equipment and Temporary Works are required to remain on the Site);
- (c) complete and pass the Tests set out in Attachment 2 of this Completion Schedule;
- (d) complete and pass all 'Level 3 Systems Integration' and 'Level 4 Systems Integration' (each as defined in the Final Acceptance Works Schedule) in respect of the Works;

- (e) carry out all desktop and in-field training of all relevant Train Franchisee Interface Party personnel in the operation of the Maintained Assets, the Returned Train Works and the Returned VicTrack Works in accordance with the requirements of this Agreement;
- (f) obtain all Approvals required for the lawful occupation and use of the Maintained Assets;
- (g) handover the Maintained Assets to the Train Franchisee to the extent necessary to operate the Maintained Assets in accordance with Best Operating Practices;
- (h) to the extent that it has not already been transferred, transfer to the State or its nominee all rights, title and interest in Equipment required to operate the Maintained Assets in accordance with Best Operating Practices;
- (i) update and deliver to the State or its nominee all Project Co Material, records, plans and other information under the control of Project Co which are relevant to the operation of the Maintained Assets;
- (j) in accordance with the Intellectual Property Schedule grant or procure the grant to the State or its nominee of such Intellectual Property Rights necessary to operate the Maintained Assets in accordance with Best Operating Practices;
- (k) provide to the State or its nominee, software, hardware, equipment, materials and documentation necessary or desirable in order to operate the Maintained Assets in accordance with Best Operating Practices;
- (l) procure for the State or its nominee an assignment or sublicense of all licences relating to any software belonging to any third party to be used in connection with the operation of the Maintained Assets in accordance with the Intellectual Property Schedule;
- (m) do all acts and things necessary to enable the State or its nominee to have transferred or obtain all Approvals necessary to operate the Maintained Assets;
- (n) do all other acts and things to enable the State or its nominee to be in a position to deliver the Project to the standards specified in this Agreement, with minimum disruption;
- (o) in relation to the Returned Train Works and the Returned VicTrack Works:
 - (1) comply with its obligations under clause 24.4 (*Completion and Handback of Returned Works*) of this Agreement;
 - (2) transfer to the relevant Returned Asset Owner, the Project Co Material relating to the Returned Asset (including all rights, title and interest in them) free from any encumbrances and to the standards required by this Agreement;
 - (3) subject to the Intellectual Property Schedule, grant or procure the grant to each Returned Asset Owner of such Intellectual Property Rights as will enable the Returned Asset Owner or its nominee to operate, maintain and repair the relevant Returned Asset in accordance with Best Maintenance Practices and Best Operating Practices;
 - (4) provide to the each Returned Asset Owner all software, hardware, equipment, materials and documentation necessary in order for the State or its nominee to operate, maintain and repair the relevant Returned Asset in accordance with Best Maintenance Practices and Best Operating Practices;

- (5) subject to the Intellectual Property Schedule, procure for each Returned Asset Owner an assignment or sub-licence of all Third Party Intellectual Property Licences required to operate, maintain and repair the relevant Returned Asset in accordance with Best Maintenance Practices and Best Operating Practices; and
- (6) do all acts and things reasonably necessary to enable each Returned Asset Owner (or its nominee) to have transferred or obtained all Approvals necessary to operate, maintain and repair the relevant Returned Asset in accordance with Best Maintenance Practices and Best Operating Practices;
- (p) deliver to the State and the Independent Reviewer:
 - (1) a copy of all necessary Approvals from the Regulator required for the lawful occupation and use of the Returned Train Works and the Maintained Assets by the Train Franchisee;
 - (2) written notice of the date that any changes to the Train Franchisee's Accreditation that are required for the Returned Train Works and the Maintained Assets to be used or put into operation by the Train Franchisee, have been made and accepted by the Regulator; and
 - (3) a copy of all documentation provided to the Regulator in relation to the changes referred to in clause 4.1(p)(2);
- (q) demonstrate that all requirements of relevant Authorities have been satisfied;
- (r) in relation to the Maintained Assets and the Returned Train Works, provide documentation necessary to demonstrate compliance with the Rail Transport Operator's Train Safety Management System and the State Project Documents; and
- (s) demonstrate that any other matters, testing results or conditions required by this Agreement in order to achieve Final Acceptance have been satisfied.

4.2 Final Acceptance report

Project Co must provide to the State and the Independent Reviewer a report consisting of the following documents and other information in relation to the Maintained Assets, the Returned Train Works, and the Returned VicTrack Works in a form acceptable to the State:

- (a) As-Built Records required under this Agreement;
- (b) the register of all records/documents required to be held by Project Co in accordance with this Agreement;
- (c) evidence of satisfaction of all requirements of relevant Authorities in relation to Final Acceptance;
- (d) quality reports and records demonstrating compliance with the requirements of this Agreement including evidence that the inspections, test results and audits are in accordance with this Agreement;
- (e) evidence that the Tests for Final Acceptance, including Tests undertaken to satisfy the Integrated Testing requirements set out in section 2, have been passed in accordance with this Agreement;
- (f) evidence that all Health and Safety Incidents have been addressed in accordance with the relevant Management Plans;
- (g) records of all training performed pursuant to the Final Acceptance Schedule.

- (h) documents and details proving that all waste materials have been removed from the part of the Site on which D&C Activities have been carried out and disposed of in accordance with this Agreement;
- (i) updated and final Maintenance Phase Documentation and any other relevant operation and maintenance manuals in accordance with the Project Requirements;
- (j) to the extent not already provided, all manufacturers' and trade warranties required by this Agreement;
- (k) copies of all Approvals (other than Key Approvals) required by this Agreement, including evidence of compliance with all Approvals;
- (l) any certificates of occupancy required under the *Building Act 1993* (Vic) or equivalent legislation;
- (m) evidence of compliance with all Project Co's obligations in connection with the Rail Safety National Law including those under clause 9 (*Rail Safety (Train)*) of this Agreement;
- (n) evidence of compliance with all Project Co's obligations in connection with the Tram Safety Act including those under clause 10 (*Rail Safety (Tram)*) of this Agreement;
- (o) to the extent not already provided, copies of all relevant pre-construction and post-construction ground and infrastructure survey reports required by this Agreement;
- (p) the LIDP Monitoring Table, a report detailing Project Co's compliance with the Local Content Requirements (Victorian) and the Victorian Jobs Requirements, and a statutory declaration in accordance with clause 60.3(b) (*Reporting*) of this Agreement; and
- (q) all other documentation and information which, in the opinion of the Independent Reviewer, is reasonably necessary for the operation, use and maintenance of the Maintained Assets, the Returned Train Works, and the Returned VicTrack Works and which is in a form acceptable to the Independent Reviewer, including lists of depreciable spare parts, warranties, guarantees and services agreements.

5 Returned Existing Network Works

As a condition precedent to Handback of Returned Existing Network Works, Project Co must provide, in relation to the relevant Returned Existing Network Works documentation necessary to demonstrate compliance with the Rail Transport Operator's Train Safety Management System and the State Project Documents.

Provisional Acceptance Tests

In addition to the Project Requirements, Project Co must perform or procure the performance of, and pass (in accordance with clause 23 (*Testing and Commissioning*) of this Agreement) Tests in respect of:

| # | Description of Tests |
|---|--|
| 1 | Environmental Control, including: <ul style="list-style-type: none"> (a) pressure / system integrity tests; (b) flushing and cleaning of pipe and duct systems; (c) duct leakage and air flow balancing; (d) central chilled water control systems; (e) heating hot water control systems; (f) Mechanical Ventilation and Air Conditioning (MVAC) / Environmental Control System (ECS); (g) MVAC & ECS / fire integration tests; (h) stair pressurisation tests; (i) Station hot smoke clearance tests; (j) mechanical / Building Management System (BMS) integration tests; and (k) energy management and metering. |
| 2 | Tunnel Ventilation, including: <ul style="list-style-type: none"> (a) Tunnel Ventilation System (TVS) plant; (b) Tunnel Ventilation Control System (TVCS) integrity; (c) Tunnel air flow and pressurise tests in Tunnels; (d) Tunnel hot smoke clearance tests; (e) Pneumatic control system; (f) TVCS / fire detection integration tests; (g) TVCS / fire fan control panel integration tests; (h) TVCS / BMS integration tests; and (i) Energy management and metering. |
| 3 | Fire Detection and Alarm, including: <ul style="list-style-type: none"> (a) fire detection and alarm systems zoning; (b) mechanical / fire integration tests; (c) Emergency Warning and Intercommunications Systems (EWIS); (d) automatic notification to the Metropolitan Fire Brigade (MFB); and (e) Master Fire Integration Panel (MFIP) / BMS integration tests. |

| # | Description of Tests |
|---|--|
| 4 | <p>Fire Protection Systems, including:</p> <ul style="list-style-type: none"> (a) fire mains pressure and flow test; (b) fire hydrant systems and hose reels coverage; (c) Tunnel hydrant systems coverage; (d) clean gas agent flooding system – including post discharge gas purging; (e) automatic sprinkler system; (f) water tank and fire pump control and monitoring; (g) portable fire protection equipment; and (h) MFIP integration tests. |
| 5 | <p>Plumbing and Drainage, including:</p> <ul style="list-style-type: none"> (a) system integrity and pressure tests; (b) flushing and chemical cleaning of water mains; (c) flow and pressure tests; (d) drainage alignment tests (sanitary, storm and waste water); (e) water storage tanks; (f) waste water treatment plant; (g) pumping systems controls; (h) sump level and pump operation / BMS integration tests; and (i) energy monitoring and metering. |
| 6 | <p>Vertical Transportation (VT), including:</p> <ul style="list-style-type: none"> (a) lifts; (b) escalators; (c) vertical transport / fire integration tests; (d) vertical transport / BMS integration tests; and (e) energy monitoring and metering. |
| 7 | <p>Building and Energy Management and Control Systems, including:</p> <ul style="list-style-type: none"> (a) BMS graphical user interface testing and training; (b) fault monitoring and alarm systems; (c) metering and energy performance monitoring; and (d) metering and water consumption monitoring. |
| 8 | <p>Electrical Services (both AC and DC system), including:</p> <ul style="list-style-type: none"> (a) HV power systems, traction power and Overhead Line Equipment (OHLE) systems, LV power systems and Uninterruptible Power Supply (UPS) systems; (b) substations, switchgear and switchboards tests including insulation resistance, winding resistance, contact resistance, phasing and polarity; (c) protection system tests including overload, fault, discrimination and cascading; |

| # | Description of Tests |
|----|---|
| | <ul style="list-style-type: none"> (d) cable tests including termination, insulation resistance, HV withstands, phasing and continuity; (e) control and monitoring; (f) power quality and harmonics; (g) power failure and automatic change over functionality; (h) power SCADA systems; (i) BMS power monitoring; and (j) energy metering. |
| 9 | <p>Lighting, including:</p> <ul style="list-style-type: none"> (a) insulation resistance; (b) lighting levels, uniformity and glare; (c) emergency lighting and illuminated signage; (d) lighting control systems and BMS integration testing; (e) power failure response; (f) security, task, accent and environmental lighting; and (g) emergency lighting / signage and fire system integration tests. |
| 10 | <p>Earthing and Bonding, including:</p> <ul style="list-style-type: none"> (a) earth resistivity tests; (b) earthing system continuity testing; (c) insulation resistance tests; (d) earth fault loop impedance tests; (e) earth potential rise; (f) step and touch voltages (e.g. platform); (g) stray current; (h) electrolysis and corrosion protection; (i) lightning protection system; and (j) earthing current injection test. |
| 11 | <p>Electro Magnetic Compatibility, including:</p> <ul style="list-style-type: none"> (a) compatibility of electrical and other systems; and (b) electrical interference. |
| 12 | <p>Acoustics and Vibration, including:</p> <ul style="list-style-type: none"> (a) external (environmental) noise and vibration levels; (b) internal noise and vibration levels; (c) speech / communication systems intelligibility testing; and (d) structural sound transmission isolation performance. |
| 13 | <p>Returned Assets, including:</p> |

| # | Description of Tests |
|----|---|
| | (a) in accordance with the requirements of the relevant Returned Asset Owner. |
| 14 | PSO Assets, including: (a) standalone CCTV. |
| 15 | Platform Screen Door (PSD) system, including: (a) mechanical aspect; (b) physical installation; (c) electrical isolation of the PSD system in the tunnel from station earthing system, building services and station civil structures; (d) effectiveness of the PSD system in the tunnel in providing a sealed barrier between the platform and the tunnel; (e) integration of the PSDs with the track, platform and HCMT kinematic envelope; and (f) Integration and acceptance testing. |

Attachment 2

Final Acceptance Tests

In addition to the Project Requirements, Project Co must perform or procure the performance of, and pass (in accordance with clause 23 (*Testing and Commissioning*) of this Agreement) Tests in respect of:

| # | Description of Tests |
|---|---|
| 1 | High Voltage system, including: (a) control and monitoring; (b) emergency trip system test; (c) power quality and harmonics; (d) power failure and automatic change over functionality; (e) power SCADA systems; (f) BMS power monitoring; and (g) energy metering. |
| 2 | Traction power, track, rail and associated works, including: (a) control and monitoring; (b) emergency trip system test; (c) DC short circuit test; (d) load measuring test (HSCB); (e) traction substation failure mode test; (f) regeneration testing; and (g) load sharing test between rectifiers during train acceleration. |
| 3 | OHLE system, track, rails and associated system, including: (a) emergency trip system test; (b) continuity; (c) isolation/de-energised status indication test; (d) OHLE de-energisation test and tunnel lighting switching; and (e) control and monitoring. |
| 4 | Low Voltage system |
| 5 | UPS system |
| 6 | Emergency lighting system |

| # | Description of Tests |
|----|---|
| 7 | Earthing and Bonding system, including: <ul style="list-style-type: none"> (a) traction system and OHLE; (b) HV system; (c) LV system; and (d) rail track. |
| 8 | Tunnel Ventilation System including: <ul style="list-style-type: none"> (a) Tunnel fire tests and MFB requirements; (b) control and monitoring; (c) Tunnel Air flow and pressurise tests in tunnels; (d) inter-system integration with HCMT, CBTC; (e) Tunnel hot smoke clearance tests; and (f) energy management and metering. |
| 9 | VT system including control and monitoring |
| 10 | Fire detection/ fire protection/ fire alarm/ gas suppression including inter-system interfacing such as TVS, Station Smoke Management System (SSMS), VT system, MFB, security and rail systems, etc. |
| 11 | PSD system incorporation and integration with the Station Control Room (SCR), Network Control Centre (NCC), Fire Control Rooms (FCRs) and Incident Control Rooms (ICRs). |
| 12 | ICT/OCS systems integration including: <ul style="list-style-type: none"> (a) Passenger Information Displays (PIDs); (b) Public Address (PA); (c) Audio Frequency Induction Loop (AFIL); (d) Customer Help Points (CHP); (e) intranet; (f) Local Area Network (LAN); and (g) Metrol telephones. |
| 13 | Security system integration, including: <ul style="list-style-type: none"> (a) CCTV system; (b) access control system integration; (c) intruder detection system integration; (d) security / emergency management integration testing; and (e) security / BMS integration testing. |
| 14 | BMS including integration with NCC and SCR. |

| # | Description of Tests |
|----|---|
| 15 | Energy and Water Management System |
| 16 | Stray current and voltage level measurement |
| 17 | EMI/EMC requirements/compliance |
| 18 | Ticketing system integration |
| 19 | Track work systems |

Escrow Agreement (Financial Model)

Date ►

Between the parties

State **The Minister for Public Transport on behalf of the Crown
in right of the state of Victoria**

Project Co **Cross Yarra Partnership**
ABN 57 956 065 885 of Level 8, 136 Exhibition Street, Melbourne,
Victoria, 3000

Escrow Agent **Perpetual Corporate Trust Limited**
ACN 000 341 533 of Level 18, Angel Place, 123 Pitt Street, Sydney,
NSW 2000

Recitals
The background to this Project is set out in the Project Agreement.
The Escrow Agent has been appointed by the State and Project Co to
hold the Escrow Material in escrow.

This deed witnesses as follows:

1 Definitions and interpretation

1.1 Project Agreement definitions

Unless otherwise expressly defined, expressions used in this Agreement have the meaning given to them in or for the purpose of the Project Agreement.

1.2 Definitions

The meanings of the terms used in this agreement are set out below.

| Term | Meaning |
|--------------------------|---|
| Agreed Amount | has the meaning given in clause 12(b)(1). |
| Agreement | means this agreement and includes all schedules, exhibits, attachments and annexures to it. |
| Commencement Date | means the date of this Agreement. |
| Cost | has the meaning given in clause 12(g). |
| Disputing Parties | has the meaning given in clause 18.1(a). |
| Escrow Fee | means the fees described in Schedule 2. |
| Escrow Material | means: <ol style="list-style-type: none">1 the Financial Model; and2 any Other Material. |
| Other Material | means any data or material provided by Project Co or the State to the Escrow Agent in accordance with the terms of this Agreement (other than the Financial Model provided in accordance with clause 5.1(a)) as varied, added to or replaced from time to time. |
| Project Agreement | means the document entitled 'Project Agreement' between the State and Project Co dated on or around the date of this Agreement. |

| Term | Meaning |
|-----------------------|---|
| Recipient | has the meaning given in clause 12(b)(2). |
| Representative | has the meaning given in clause 18.2(a). |
| Revenue | has the meaning given in clause 12(f). |
| Supplier | has the meaning given in clause 12(b). |

1.3 Interpretation

In this Agreement:

- (a) **(headings)**: headings (including any heading at the beginning of any subclause) are for convenience only and do not affect interpretation;
- and unless the context otherwise requires:
- (b) **(count and gender)**: a word importing the singular includes the plural and vice versa and a word indicating a gender includes every other gender;
 - (c) **(agreement and schedule references)**: a reference to:
 - (1) a party, clause, Schedule, Exhibit, or Annexure is a reference to a party, clause, Schedule, Exhibit or Annexure of or to this Agreement; and
 - (2) a section is a reference to a section of a Schedule;
 - (d) **(agreement as amended)**: a reference to this Agreement or to any other deed, agreement, document or instrument includes a reference to this Agreement or such other deed, agreement, document or instrument as amended, novated, supplemented, varied or replaced from time to time;
 - (e) **(party)**: a reference to a party includes that party's legal representatives, trustees, executors, administrators, successors and permitted substitutes and assigns, including any persons taking part by way of novation;
 - (f) **(person)**: a reference to a person includes an individual, the estate of an individual, a corporation, an authority, an association or a joint venture (whether incorporated or unincorporated), a partnership and a trust;
 - (g) **(legislation)**: a reference to legislation includes its delegated legislation and a reference to such legislation or delegated legislation or a provision of either includes consolidations, amendments, re-enactments and replacements;
 - (h) **(definitions)**: if a word or phrase is given a defined meaning, any other part of speech or grammatical form of that word or phrase has a corresponding meaning;
 - (i) **(includes)**: 'includes' will be read as if followed by the phrase '(without limitation)';

- (j) **(or)**: the meaning of 'or' will be that of the inclusive, being one, some or all of a number of possibilities;
- (k) **(information)**: a reference to information includes information, representations, statements, data, samples, calculations, assumptions, deductions, determinations, drawings, design specifications, models, plans and other documents in all forms including the electronic form in which it was generated;
- (l) **(\$)**: a reference to '\$', AUD or dollar is to Australian currency;
- (m) **(time)**: a reference to time is a reference to time in Melbourne, Australia;
- (n) **(rights)**: a reference to a right includes any benefit, remedy, function, discretion, authority or power;
- (o) **(obligations and liabilities)**: a reference to an obligation or a liability assumed by, or a right conferred on, two or more persons binds or benefits them jointly and severally;
- (p) **(may)**: the term 'may', when used in the context of a power, right or remedy exercisable by the State, means that the State can exercise that power, right or remedy in its absolute and unfettered discretion and the State has no obligation to do so;
- (q) **(construction)**: where there is a reference to an Authority, institute or association or other body referred to in this Agreement which:
 - (1) is reconstituted, renamed or replaced or if its powers or functions are transferred to, or assumed by, another entity, this Agreement is deemed to refer to that other entity; or
 - (2) ceases to exist, this Agreement is deemed to refer to that new entity which serves substantially the same purpose or object as the former entity;
- (r) **(remedy)**: the use of the words 'remedy' or 'cure' or any form of such words in this Agreement means that the event to be remedied cured must be remedied or cured or its effects overcome; and
- (s) **(contra proferentem rule not to apply)**: each provision will be interpreted without disadvantage to the party who (or whose representative) drafted or proffered that provision.

1.4 Business Day

If the day on or by which anything is to be done in accordance with this Agreement is not a Business Day, that thing must be done no later than the next Business Day.

1.5 Approvals, directions and notices in writing

Unless otherwise expressly provided in this Agreement or agreed between the parties, all approvals, consents, directions, requirements, requests, claims, notices, agreements and demands must be given in writing.

1.6 Action without delay

Unless there is a provision in this Agreement which specifies a period of time in which something must be done by the parties, all things must be done without undue delay.

1.7 State's rights and obligations

- (a) **(Acknowledgement):** The parties acknowledge the substance, operation and potential effect and consequences of clause 2.13 (*State's executive rights and duties*) of the Project Agreement in relation to this Agreement.
- (b) **(No Claim):** Subject to clause 1.7(c), Project Co and the Escrow Agent will not be entitled to make any Claim against the State for any Liability relating to any exercise or failure of the State to exercise its executive or statutory rights or duties.
- (c) **(Liability for breach):** Clauses 1.7(a) and (b) do not limit any Liability which the State would have had to Project Co or the Escrow Agent under any State Project Document as a result of a breach by the State of a term of any State Project Document but for these clauses.

1.8 CY Trustee's limitation of liability

- (a) **(Capacity):** The parties acknowledge that the obligations of each CY Trustee under this Agreement are incurred by it solely in its capacity as trustee of the relevant CY Trust other than where expressly provided otherwise, including as contemplated by clause 1.8(c)(1) below.
- (b) **(Limited liability):** Subject to clause 1.8(c), each CY Trustee will:
 - (1) not be liable to pay or satisfy any of its obligations or liabilities under this Agreement in relation to the relevant CY Trust out of any assets held by it personally;
 - (2) only be liable to pay or satisfy any of its obligations or liabilities under this Agreement in relation to the relevant CY Trust out of the assets of that CY Trust out of which it is actually indemnified;
 - (3) not be liable to pay or satisfy any of its obligations or liabilities under this Agreement in its personal capacity out of any asset held by it personally (other than out of the property the subject of the State Securities); and
 - (4) only be liable to pay or satisfy any of its obligations or liabilities under the Project Documents in its personal capacity out of the property the subject of the State Securities held by it personally.
- (c) **(Circumstances where a CY Trustee is personally liable):**
 - (1) Each CY Trustee will be personally liable under this Agreement for any loss or damage which the Escrow Agent or the State (as applicable) may suffer as a result of a breach of this Agreement by that CY Trustee where such breach is caused by:
 - (A) fraud of that CY Trustee;
 - (B) wilful default of that CY Trustee;
 - (C) that CY Trustee having committed a breach of trust;
 - (D) that CY Trustee having been negligent in the performance of its duties as trustee of the relevant CY Trust;
 - (E) a representation or warranty given by that CY Trustee under this Agreement in respect of itself (in any capacity) or the relevant CY Trust being untrue, incorrect or misleading when made or repeated; or

- (F) a breach of any undertaking (other than an undertaking to pay) of that CY Trustee given under this Agreement.
- (2) The Escrow Agent or the State (as applicable) may:
 - (A) do anything necessary to enforce its rights in connection with any representation or warranty (with respect to the relevant CY Trustee or the relevant CY Trust) or undertaking (other than an undertaking to pay) given by any CY Trustee under this Agreement;
 - (B) do anything necessary to enforce its rights under each State Security;
 - (C) take proceedings to obtain an injunction or other order to restrain any breach of this Agreement by any CY Trustee or declaratory relief or other similar judgment or order as to the obligations of any CY Trustee under this Agreement; and
 - (D) prove in any insolvency proceedings in respect of any CY Trustee only in order to protect and enforce its rights in respect of the property of the relevant CY Trust and the Trustee's Indemnity.
- (3) Nothing in this clause 1.8 prevents the Escrow Agent or the State (as applicable) obtaining any injunctive relief, order for specific performance, declaration or similar relief against any CY Trustee.
- (d) **(Limited recourse):** The Escrow Agent and the State must not, except to the extent a CY Trustee is personally liable under clause 1.8(c)(1) and subject to clauses 1.8(c)(2) and 1.8(e):
 - (1) bring any proceeding for the winding up or liquidation of a CY Trustee;
 - (2) appoint, or seek the appointment of, a receiver or receiver and manager or other controller (as defined in the Corporations Act) to a CY Trustee or its assets or the assets of a CY Trust other than one appointed over any property secured by the State Securities;
 - (3) incur, or permit any receiver, receiver and manager appointed under a State Security, attorney appointed under a State Security or any other person to incur, any obligation binding on a CY Trustee unless the obligation is limited in accordance with this clause 1.8;
 - (4) take any action to obtain a judgment against a CY Trustee or to enforce a judgment against a CY Trustee other than:
 - (A) a judgment required to prove the amount of any Secured Moneys (as defined in the State Security);
 - (B) a counterclaim in any proceedings commenced by a CY Trustee; or
 - (C) as permitted by clause 1.8(c)(3); or
 - (5) levy or enforce a levy or distress or other execution upon or against any assets of a CY Trustee other than any property secured by the State Securities or the assets of the relevant CY Trustee or CY Trust.
- (e) **(No limitation on enforcement of security provided under the State Securities):** This clause 1.8 does not limit or affect in any way the enforcement of the State Securities and, for the avoidance of doubt, it is acknowledged and agreed by each CY Trustee (in its personal capacity and as trustee for the relevant CY Trust) that the security granted under the State Securities by it

constitutes a Security Interest over all of the Trust Property and all of its Trustee's Indemnity.

- (f) **(CY Trustee as Partner)**: A reference to a CY Trustee includes a reference to the relevant CY Trustee as a partner in the Cross Yarra Partnership.

2 Purpose of agreement

Subject to the terms and conditions of this Agreement, to secure the interests of the State and Project Co under the Project Agreement:

- (a) **(Deposit of Financial Model)**: Project Co must deposit the Financial Model in accordance with the Project Agreement and any Other Material in accordance with this Agreement, with the Escrow Agent in Melbourne; and
- (b) **(Escrow Material)**: the Escrow Agent must act as escrowee of the Escrow Material.

3 Term of agreement

- (a) **(Commencement)**: Subject to clause 3(b), this Agreement commences on the Commencement Date and will remain in force until this Agreement is terminated.
- (b) **(Conditions Precedent)**: The satisfaction or waiver of the Conditions Precedent in accordance with clause 3 of the Project Agreement is a condition precedent to the coming into operation of this Agreement (other than this clause 3(b)).

4 Conduct of Escrow Agent

Neither the State nor Project Co will be liable for any act or omission of the Escrow Agent.

5 Deposit of Financial Model

5.1 Deposit of Financial Model

- (a) **(At Financial Close)**: Project Co must deposit the Financial Model with the Escrow Agent promptly following Financial Close as required by the Project Agreement and the Escrow Agent must accept custody of the Financial Model.
- (b) **(When updated)**: Upon the occurrence of any of the events set out in clause 54.8 (*Custody of Financial Model*) of the Project Agreement, or when otherwise agreed by the State and Project Co, the State and Project Co may:
- (1) seek the release in accordance with clause 8 or 9 (as the case may be) of the then current version of the Financial Model held by the Escrow Agent; and

- (2) subsequently deposit that Financial Model, or a further updated version of the Financial Model as Other Material in accordance with clause 5.2, with the Escrow Agent.

5.2 Other Material

Project Co and the State may agree Other Material (which may be updated versions of the Financial Model amended in accordance with the Project Agreement or otherwise by agreement between the State and Project Co) to be deposited with the Escrow Agent and the Escrow Agent must accept custody of such Other Material deposited with it.

5.3 Confirmation of receipt

The Escrow Agent must give Project Co and the State confirmation of receipt of all Escrow Material referred to in clauses 5.1 and 5.2 immediately when it is received.

5.4 Storage of Escrow Material

The Escrow Agent must store the Escrow Material in a safe and secure place at the Escrow Agent's premises in Melbourne.

5.5 Escrow Material register

The Escrow Agent must maintain a register of Escrow Material deposited, stored and released under this Agreement in the form agreed by the State, Project Co and the Escrow Agent.

5.6 Information and inspection requests

- (a) **(Requests for inspection):** The Escrow Agent must promptly comply with a request of the State or Project Co to inspect and be furnished with a copy of the register referred to in clause 5.5 and to be furnished with information about storage, safety and security procedures relating to the Escrow Material.
- (b) **(Cost of Escrow Agent):** The reasonable costs of the Escrow Agent complying with a request in this clause 5.6 will be borne by Project Co.
- (c) **(State to reimburse for State requests):** The State will promptly reimburse Project Co for the costs of the Escrow Agent borne by Project Co arising from a request by the State under this clause 5.6.

6 Access to Escrow Material

Subject to this Agreement and unless required by Law, no other person will have access to the Escrow Material unless the Escrow Agent has been notified in advance by Project Co and the State.

7 Loss of Escrow Material

7.1 Loss of Escrow Material

If the Escrow Material or any medium containing the Escrow Material is lost, destroyed or damaged while in the possession, custody or control of the Escrow Agent:

- (a) **(notification)**: the Escrow Agent must promptly notify Project Co and the State; and
- (b) **(obligation to replace)**: Project Co must within 7 Business Days replace the lost, damaged or destroyed Escrow Material to the extent it is replaceable at:
 - (1) the Escrow Agent's cost if the loss, damage or destruction was caused by the Escrow Agent's fraud, negligence, recklessness, act or omission or breach of this Agreement; or
 - (2) Project Co's and the State's cost (shared equally in each case) in all other circumstances.

7.2 Specific performance

Without derogating from any other right to obtain specific performance, Project Co acknowledges that the State is entitled to specific performance of Project Co's obligations in clause 7.1.

8 Release of Escrow Material

The Escrow Agent will immediately release the Escrow Material to:

- (a) **(any nominated person)**: any person nominated by a notice signed by both the State and Project Co; and
- (b) **(State's auditor)**: upon the State's request, the State's auditor (appointed in accordance with clause 54.7 (*Auditing the Financial Model*) of the Project Agreement). The State's auditor will conduct the audit under that clause at the Escrow Agent's premises or, if the Escrow Agent does not have the required equipment or facilities, at Project Co's premises.

9 Release of Escrow Material to State on termination

The Escrow Agent must release the Escrow Material to the State immediately after notice from the State that:

- (a) **(unable or unwilling to perform functions)**: Project Co is unable or unwilling to perform its obligations under this Agreement;
- (b) **(Major Default or Default Termination Event)**: a Major Default or Default Termination Event has occurred under the Project Agreement;
- (c) **(termination)**: the Project Agreement has been terminated; or
- (d) **(expiration)**: the Term of the Project Agreement has expired.

10 Release of Escrow Material to new Escrow Agent

In the event that this Agreement terminates in accordance with clause 15, or the Escrow Agent:

- (a) **(unable to perform functions)**: refuses to or is unable to perform its obligations under this Agreement;
- (b) **(Insolvency Event)**: becomes, threatens to become or is in jeopardy of becoming subject to an Insolvency Event; or
- (c) **(breach)**: is otherwise in breach of this Agreement,

then the Escrow Agent will on instruction from the State and Project Co immediately release the Escrow Material to a new escrow agent agreed by the State and Project Co and notified to the Escrow Agent or, failing agreement, appointed, in accordance with clause 54.9 (*Replacement of Escrow Agent*) of the Project Agreement.

11 Escrow fees and charges

11.1 Payment

During the term of this Agreement, Project Co and the State will each pay 50% of the Escrow Fee to the Escrow Agent without demand in accordance with the payment terms of the Escrow Fee in Schedule 2.

11.2 Increases

The Escrow Agent may increase its fees in accordance with Schedule 2.

11.3 Late payments

- (a) **(Escrow Agent to notify)**: The Escrow Agent will notify the parties within a reasonable period if either of them fails to make any payment to the Escrow Agent by the due date. On receipt of such notice, the other party may pay to the Escrow Agent all amounts for which the defaulting party is in arrears.
- (b) **(Deduction of late payments)**: The State or Project Co may deduct amounts paid or incurred under clause 11.3(a) by the State or Project Co (as the case may be) from any moneys otherwise due from the State or Project Co (as the case may be) under the Project Agreement or otherwise or recover such amounts as a debt.

11.4 Other charges

The Escrow Fee is inclusive of all taxes, duties, fees or other government charges which may be imposed on the storage of the Escrow Material under this Agreement or otherwise.

12 Goods and Services Tax (GST)

- (a) **(GST exclusive amounts):** Unless otherwise expressly stated, all amounts referred to in this Agreement or any Project Document are exclusive of GST.
- (b) **(GST payable by Supplier):** If GST becomes payable on any Taxable Supply made by a party (**Supplier**) under or in connection with this Agreement:
- (1) any amount payable or consideration to be provided in accordance with any other provision of this Agreement for that supply (**Agreed Amount**) is exclusive of GST;
 - (2) an additional amount will be payable by the party which is the recipient of the Taxable Supply (**Recipient**), equal to the amount of GST payable on that Taxable Supply as calculated by the Supplier in accordance with the GST Law, which will be payable at the same time and in the same manner as for the Agreed Amount; and
 - (3) the Supplier will provide a Tax Invoice to the Recipient in connection with that supply, either at the time expressly set out in any other provision of this Agreement or no later than the time at which the Agreed Amount for that Taxable Supply is to be provided in accordance with this Agreement. The Recipient is not obliged to pay any amount in accordance with this clause 12 unless and until a Tax Invoice is received by the Recipient in connection with the Taxable Supply except where the Recipient is required to issue the Tax Invoice.
- (c) **(Variation in GST payable):** If, for any reason, the GST payable by the Supplier in connection with a supply it makes under or in connection with this Agreement (incorporating any increasing adjustments or decreasing adjustments relating to that supply) varies from the additional amount it received from the Recipient under clause 12(b) in connection with that supply, the Supplier will provide a refund or credit to, or will be entitled to receive from, the Recipient (as appropriate) the amount of this variation. Where an adjustment event occurs in relation to a supply and except where the Recipient is required to issue the Adjustment Note:
- (1) the Supplier will issue an Adjustment Note to the Recipient in connection with that supply within 14 days after becoming aware of that adjustment event occurring; and
 - (2) no additional amount will be payable by the Recipient unless and until an Adjustment Note is received by the Recipient.
- (d) **(GST ceasing to be payable):** No amount is payable by a party in accordance with clause 12(b) or 12(c) to the extent that the GST to which the amount relates has ceased to be payable by or refundable to the Supplier by the Commissioner of Taxation under the GST Law.
- (e) **(Expert Determination):** If the Recipient is dissatisfied with any calculation to be made by the Supplier in accordance with this clause 12 the recipient may, at its own expense and after notifying the Supplier accordingly, refer the matter to an independent expert nominated by the President of the Institute of Chartered Accountants for expert determination, which will be final and binding on all parties (except in the case of manifest error). The expert will act as an expert and not as an arbitrator and must take into account the terms of this Agreement, the matters required to be taken into account by the Supplier in accordance with this clause 12 and any other matter considered by the expert to be relevant to

the determination. The parties release the expert from any liability in acting as an expert, except in the case of fraud on the part of the expert.

- (f) **(Revenue net of GST):** Any reference in this Agreement to price, value, sales, revenue, profit or a similar amount (**Revenue**), will be a reference to the GST exclusive component of that Revenue unless the contrary intention is expressed.
- (g) **(Cost net of GST):** Any reference in this Agreement to cost, expense, liability or other similar amount (**Cost**), will be a reference to that Cost reduced by the Input Tax Credits in respect of such Cost to which the party is entitled in respect of such Cost, unless the contrary intention is expressed.
- (h) **(General obligation):** Each party agrees to do all things, including providing Tax Invoices and other documentation, that may be necessary or desirable to enable or assist the other party in determining its GST payable on any supply made by that other party in connection with this Agreement, or any Input Tax Credits, adjustments or refunds in relation to any amount of GST paid or payable in connection with any supply made in connection with this Agreement.
- (i) **(GST Groups):** For the purposes of this Agreement, a reference to GST payable on a Taxable Supply made by a party includes any corresponding GST payable by the representative member of any GST group of which that party is a member and a reference to an Input Tax Credit entitlement of a party includes any corresponding Input Tax Credit entitlement of the representative member of any GST group of which that party is a member, and if a party to this Agreement makes a Taxable Supply by virtue of entering into or performing this Agreement and the 'recipient' of that Taxable Supply (within the meaning of the GST Act) is an Associate of another party to this Agreement (which for this purpose includes, in relation to the State, the Secretary), that other party to this Agreement will be obliged either to pay the amount referred to in clause 12(b)(2) or procure that the actual recipient pays the relevant amount, and the payer of that amount shall be the 'Recipient' for the purposes of this clause 12 in relation to the relevant Taxable Supply.
- (j) **(Project Agreement to prevail):** If clause 59 (*Taxes*) of the Project Agreement would apply in respect of a Taxable Supply to which this clause 12 also applies, then clause 59 (*Taxes*) of the Project Agreement will apply in respect of that supply and the provisions of this clause 12 (but for this paragraph) will not apply.
- (k) **(Definitions):** In this clause 12 unless otherwise defined in this Agreement, terms used have the meanings given to them in the GST Law.

13 Confidentiality

13.1 Confidentiality of Escrow Material

The Escrow Agent acknowledges that the Escrow Material is the property of Project Co or the State and accordingly must treat the Escrow Material which comes into its possession, control or custody, under this Agreement as confidential.

13.2 Prohibited acts

Other than as set out in this Agreement, the Escrow Agent must not copy, reproduce, deal with or in any way use the Escrow Material or disclose it to any person without the permission of both Project Co and the State.

13.3 After termination

The obligations under this clause 13 survive the termination of this Agreement or the release of the Escrow Material.

14 Escrow Agent's further obligations

- (a) **(Obligations):** The Escrow Agent must:
 - (1) retain the Escrow Material in a safe and secure manner and in an environment that minimises degradation of the Escrow Material; and
 - (2) ensure the Escrow Material remains in the same condition it was in at the time of deposit with the Escrow Agent.
- (b) **(Limitations on obligations):** The Escrow Agent has no obligation to verify:
 - (1) the completeness or accuracy of Escrow Materials, or of electronic or other notations on such deposits; or
 - (2) that the Escrow Material is sufficient to enable the State to use the Escrow Material as contemplated by the Project Agreement.

15 Termination of Agreement

This Agreement will immediately terminate if both Project Co and the State give 10 Business Days' notice to the Escrow Agent of such termination or, where the Escrow Material has been released to the State under clause 9 upon termination or expiry of the Project Agreement, if the State gives 10 Business Days' notice to the Escrow Agent of such termination.

16 Assignment

16.1 Assignment by Escrow Agent

The benefit of this Agreement will not be dealt with in any way by the Escrow Agent (whether by assignment or otherwise) without the prior consent of both Project Co and the State.

16.2 Assignment by State and Project Co

The State and Project Co may at any time assign, novate or otherwise transfer all or any part of their rights or liabilities under this Agreement to any person to whom the State or Project Co assign their rights under the Project Agreement.

17 Subcontracting

The Escrow Agent must not subcontract or otherwise arrange for another person to perform any part of this Agreement or to discharge any of its obligations under this Agreement without the prior consent of the State and Project Co.

18 Dispute Resolution

18.1 Procedure for resolving disputes

- (a) **(Disputes to be resolved):** Any dispute arising under this Agreement must be resolved by the parties to that dispute (**Disputing Parties**) in accordance with this clause 18.
- (b) **(Procedure):** The procedure that is to be followed to resolve a dispute is as follows:
 - (1) firstly, the dispute must be the subject of negotiation as required by clause 18.2;
 - (2) secondly, if the dispute remains unresolved (in whole or in part) after the expiration of the period for negotiation referred to in clause 18.2(c)(1) the Disputing Parties may agree that the dispute will be referred to an expert for determination in accordance with clauses 18.4 to 18.8 (inclusive) or to arbitration under clause 19; and
 - (3) thirdly, if:
 - (A) the dispute remains unresolved (in whole or in part) and has not been referred to expert determination after the expiration of the period for negotiation referred to in clause 18.2(c)(1) and irrespective of whether the Disputing Parties failed to meet as required by that clause or whether having so met the parties fail to agree whether the Dispute should be referred to an expert or to arbitration within 20 Business Days after the expiration of the period for negotiation referred to in clause 18.2(c)(2);
 - (B) the dispute has been referred to expert determination and a determination is not made by the expert within 30 days after the expert's acceptance of appointment; or
 - (C) the dispute is referred to expert determination and a notice of dissatisfaction is given in accordance with clause 18.6(a),

then the dispute must be referred to arbitration in accordance with clause 19.

18.2 Negotiation

- (a) **(Notification):** If a dispute arises then a party may give notice to each other party requesting that the dispute be referred for resolution by negotiation between the Chief Executive Officers (or equivalent) of the Disputing Parties (**Representatives**).

- (b) **(Contents of Notice)**: A notice under clause 18.2(a) must:
 - (1) state that it is a notice under this clause 18; and
 - (2) include or be accompanied by particulars of the matters which are the subject of the dispute.
- (c) **(Attempt to resolve Dispute)**: If a dispute is referred for resolution by negotiation under clause 18.2(a), then:
 - (1) the Representatives must meet and attempt in good faith to resolve the dispute (in whole or in part) within 10 Business Days of the date on which the notice under clause 18.2(a) is received (or such later date as the Disputing Parties may agree); and
 - (2) any agreement reached between the Representatives will be reduced to writing, signed by or on behalf of each Disputing Party and will be contractually binding on the Disputing Parties.

18.3 Expert determination

If:

- (a) **(dispute unresolved by Representatives)**: a dispute which has been referred to the Representatives for negotiation in accordance with clause 18.2(a) remains unresolved (in whole or in part) after the expiration of the period for negotiation referred to in clause 18.2(c)(1); and
- (b) **(referral to expert)**: the Disputing Parties agree within 20 Business Days after the expiration of the period for negotiation referred to in clause 18.2(c)(1), that the dispute be referred to an expert for determination,

then those parts of the dispute which remain unresolved will be referred to an expert for determination under clauses 18.4 to 18.8. For the avoidance of doubt, a dispute may only be referred to an expert for determination by agreement of the Disputing Parties.

18.4 Selection of expert

- (a) **(Exchange of lists of 3 preferred experts)**: Within 7 Business Days after the date on which the Disputing Parties agree to refer a dispute to an expert for determination under clause 18.3, the Disputing Parties must exchange lists of 3 persons (in order of preference) who, if appointed, would satisfy the requirements of clause 18.4(d), from whom the expert is to be chosen.
- (b) **(Appointment of person who appears on both lists)**: Any person who appears on the list of all of the Disputing Parties exchanged under clause 18.4(a) will be appointed as the expert to determine a dispute and if more than one person appears on the list of all of the Disputing Parties, the person given the highest order of priority by the party who gave the notice under clause 18.2(a) will be appointed.
- (c) **(Appointment if no person appears on both lists)**: If no person appears on the list of all of the Disputing Parties and the Disputing Parties cannot otherwise agree an expert, the party which gave the notice under clause 18.2(a) must procure:
 - (1) the president (or the senior non-executive officer, howsoever described) of the institute or governing body for the technical or professional discipline the subject of the relevant dispute to nominate the expert, having regard to, but not being bound by, those persons proposed by the Disputing Parties under clause 18.3(a); or

- (2) if there is no governing body for the technical or professional discipline the subject of the relevant dispute or such governing body advises that it will not nominate an expert, the President of the Australian Centre for International Commercial Arbitration to nominate a person to act as the expert, having regard to, but not being bound by, those persons proposed by the Disputing Parties under clause 18.4(a).
- (d) **(Appropriate skills):** It is the intention of the parties that the expert appointed to determine a dispute will be an independent person with appropriate skills having regard to the nature of the matters in dispute.
- (e) **(No entitlement to challenge appointment):** No Disputing Party will be entitled to challenge the appointment of an expert under this clause 18.4 on the basis that the expert does not satisfy the requirements of clause 18.4(d).
- (f) **(Not an arbitration agreement):** Any agreement for expert determination under this Agreement will not constitute an arbitration agreement for the purposes of the *Commercial Arbitration Act 2011 (Vic)*.
- (g) **(Agreement):** Once an expert is appointed, the Disputing Parties must enter into an agreement with the expert on the terms of the Expert Determination Agreement or such other reasonable terms as the expert may require.

18.5 Rules of expert determination

The expert determination process will be administered, and the expert will be required to act, under the terms of the Expert Determination Agreement.

18.6 Expert finding

- (a) **(Notification):** The determination of the expert must be in writing and will be final and binding on the Disputing Parties unless, within 10 Business Days of receipt of the determination, a Disputing Party gives notice to each other Disputing Party of its dissatisfaction and intention to refer the matter to arbitration in accordance with clause 19.
- (b) **(Amendment to determination):** Upon submission by any Disputing Party, the expert may amend the determination to correct:
 - (1) a clerical mistake;
 - (2) an error from an accidental slip or omission;
 - (3) a material miscalculation of figures or a material mistake in the description of any person, thing or matter; or
 - (4) a defect in form.

18.7 Liability of expert

- (a) **(Liability of expert):** The Disputing Parties agree:
 - (1) that the expert will not be liable in connection with the expert determination, except in the case of fraud on the part of the expert; and
 - (2) to indemnify the expert against any Claim or Liability in connection with the expert determination, except in the case of fraud on the part of the expert, in which case a Claim may be made against him or her by any person who is party to the dispute.

- (b) **(Engagement):** The Disputing Parties will jointly engage the expert services in connection with the expert determination proceedings and each Disputing Party will seek a separate Tax Invoice equal to its share of the costs of the expert.

18.8 Costs

The Disputing Parties must:

- (a) bear their own costs in connection with the expert determination proceedings; and
- (b) pay an equal portion of the costs of the expert.

19 Arbitration

19.1 Reference to Arbitration

- (a) **(Dispute):** If:
 - (1) a dispute:
 - (A) which has been referred to the parties' Representatives for negotiation in accordance with clause 18.2(a) remains unresolved (in whole or in part) after the expiration of the period for negotiation referred to in clause 18.2(c)(1); and
 - (B) the Disputing Parties do not agree to refer the dispute to an expert for determination; or
 - (2) in the case of a dispute which the Disputing Parties agree to refer to expert determination under clause 18.3:
 - (A) a determination is not made within 30 days of the expert's acceptance of the appointment; or
 - (B) a notice of dissatisfaction is given in accordance with clause 18.6,then any Disputing Party may notify the other Disputing Parties that it requires the dispute to be referred to arbitration.
- (b) **(Referral):** Upon receipt by a Disputing Party of a notice under clause 19.1(a), the dispute will be referred to arbitration.

19.2 Arbitration

- (a) **(ACICA Rules):** Arbitration in accordance with this clause 19 will be conducted in accordance with the arbitration rules of the Australian Centre for International Commercial Arbitration (known as the ACICA Rules) as current at the date the Dispute is referred to arbitration and as otherwise set out in this clause 19 with this clause 19 having priority to the extent of any inconsistency.
- (b) **(Seat):** The seat of the arbitration will be Melbourne, Victoria.
- (c) **(Language):** The language of the arbitration will be English.

19.3 Appointment of arbitrator

The parties will endeavour to agree on the arbitrator or arbitrators (if the Disputing Parties agree to appoint three arbitrators), but if no such agreement is reached within 14 Business Days of the dispute being referred to arbitration in accordance with clause 19.1(b), the arbitrator or arbitrators will be appointed by the Australian Centre for International Commercial Arbitration.

19.4 General Principles for conduct of arbitration

- (a) **(Conduct of arbitration):** The Disputing Parties agree that:
 - (1) they have chosen arbitration for the purposes of achieving a just, quick and cost-effective resolution of any dispute;
 - (2) any arbitration conducted in accordance with this clause 19 will not necessarily mimic court proceedings of the seat of the arbitration or the place where hearings take place (if different), and the practices of those courts will not regulate the conduct of the proceedings before the arbitrator; and
 - (3) in conducting the arbitration, the arbitrator must take into account the matters set out in clauses 19.4(a)(1) and 19.4(a)(2).
- (b) **(Evidence in writing):** All evidence in chief must be in writing unless otherwise ordered by the arbitrator.
- (c) **(Evidence and discovery):** The rules for evidence and discovery will be the IBA Rules on the Taking of Evidence in International Arbitration current at the date of arbitration.
- (d) **(Oral hearing):** The oral hearing must be conducted as follows:
 - (1) any oral hearing must take place in Melbourne, Victoria and all outstanding issues must be addressed at the oral hearing;
 - (2) the date and duration of the oral hearing must be fixed by the arbitrator at the first preliminary conference. The arbitrator must have regard to the principles set out in clause 19.4(a) when determining the duration of the oral hearing;
 - (3) oral evidence in chief at the hearing will be permitted only with the permission of the arbitrator for good cause;
 - (4) the oral hearing must be conducted on a stop clock basis with the effect that the time available to the parties must be split equally between the parties so that each party has the same time to conduct its case unless, in the opinion of the arbitrator, such a split would breach the rules of natural justice or is otherwise unfair to one of the parties;
 - (5) not less than 28 days prior to the date fixed for oral hearing each of the Disputing Parties must give notice of those witnesses (both factual and expert) of each other Disputing Party that it wishes to attend the hearing for cross examination;
 - (6) in exceptional circumstances the arbitrator may amend the date of hearing and extend the time for the oral hearing set in accordance with clause 19.4(d)(2);

- (7) a Disputing Party will not be bound to accept the written evidence of a witness submitted on behalf of the opposing party which is not challenged in cross examination; and
 - (8) each Disputing Party is expected to put its case on significant issues in cross examination of a relevant witness called by the other Disputing Party or, where it seeks to challenge the evidence of a witness not called for cross-examination by reference to other evidence, to identify that evidence in its written opening submissions so that the other Disputing Party may know the nature of and basis for the challenge to the witness' written evidence.
- (e) **(Experts):** Unless otherwise ordered each Disputing Party may only rely upon one expert witness in connection with any recognised area of specialisation.

19.5 Proportional liability

To the extent permitted by Law, the arbitrator will have no power to apply or to have regard to the provisions of any proportional liability legislation which might, in the absence of this clause 19.5, have applied to any dispute referred to arbitration in accordance with this clause 19.

19.6 Extension of ambit of arbitration proceedings

- (a) **(Extending Disputes):** Where:
- (1) a dispute between the Disputing Parties to this Agreement is referred to arbitration in accordance with this clause 19; and
 - (2) there is some other dispute also between the Disputing Parties to and in accordance with this Agreement (whenever occurring),
- the arbitrator may, upon application being made to the arbitrator by one or more of the Disputing Parties at any time before a final award is made in relation to the first-mentioned dispute, make an order directing that the arbitration be extended so as to include the other dispute.
- (b) **(Arbitrator's order):** An arbitrator may make an order in accordance with clause 19.6(a) on such terms and conditions (if any) as the arbitrator thinks fit.

19.7 Award final and binding

- (a) **(Final and binding):** Subject to clause 19.7(b), any award will be final and binding on the Disputing Parties.
- (b) **(Appeal):** Each Disputing Party consents to any appeal to a court where that appeal is made under the *Commercial Arbitration Act 2011* (Vic) on a question of law arising in connection with an arbitral award made in accordance with this clause 19.

19.8 Continue to perform

Notwithstanding the existence of a dispute, each Disputing Party must continue to carry out its obligations in accordance with this Agreement.

19.9 Governing law of arbitration agreement

The Law governing this arbitration agreement is the law of Victoria, Australia.

19.10 Interlocutory relief

This clause 19 does not prevent a Disputing Party from seeking urgent interlocutory relief from a court of competent jurisdiction where, in that Disputing Party's reasonable opinion, that action is necessary to protect that Disputing Party's rights.

20 Notices

All communications (including approvals, consents, directions, requirements, requests, claims, notices, agreements and demands) in connection with this Agreement:

- (a) **(in writing)**: must be in writing;
- (b) **(addressed)**: must be addressed as set out below (or as otherwise notified by that party to each other party from time to time);

State

Attention: [not disclosed]
Address: [not disclosed]
Email: [not disclosed]

Project Co

Attention: [not disclosed]
Address: [not disclosed]
Email [not disclosed]

Escrow Agent

Attention: [not disclosed]
Address: [not disclosed]
Email: [not disclosed] [not disclosed]

- (c) **(signed)**: must be signed by the party making the communication or by the solicitor for, or any attorney, director, secretary or authorised agent of that party on its behalf;
- (d) **(form of delivery)**: must be delivered by hand or posted by prepaid post to the address or emailed (in the form agreed by both parties) to the email address of the addressee in accordance with clause 20(b); and
- (e) **(taken to be received)**: are taken to be received by the addressee:
 - (1) in the case of delivery by hand, on delivery at the address of the addressee, unless that delivery is outside Business Hours, in which case that communication is taken to be received at 9.00am on the next Business Day;
 - (2) in the case of prepaid post, on the third Business Day after the date of posting to an address within Australia and on the fifth Business Day after the date of posting by airmail to an address outside Australia;
 - (3) in the case of email, the first to occur of:

- (A) receipt by the sender of any email acknowledgement from the addressee's information system showing that the communication has been delivered to the email address of that addressee;
- (B) the time that the communication enters an information system which is under the control of the addressee; or
- (C) the time that the communication is first opened or read by the addressee,
- (D) unless the result is that the communication would be taken to be given or made at a time which is outside Business Hours at the local time in the place of receipt of the email, in which case that communication is taken to be received at 9.00am on the next Business Day.

21 Miscellaneous

21.1 Governing Law and jurisdiction

- (a) **(Governing Law):** This Agreement is governed by, and must be construed according to, the Laws of Victoria, Australia.
- (b) **(Jurisdiction):** Without limiting clauses 18 to 19, each party irrevocably submits to the non-exclusive jurisdiction of the courts of Victoria, and the courts competent to determine appeals from those aforementioned courts, with respect to any proceedings which may be brought in connection with this Agreement.

21.2 Entire agreement

To the extent permitted by Law and in relation to their subject matter, this Agreement:

- (a) **(entire understanding):** embodies the entire understanding of the parties and constitute the entire terms agreed by the parties; and
- (b) **(prior agreement):** supersedes any prior agreement of the parties.

21.3 Further acts and documents

Each party must promptly do all further acts and execute and deliver all further documents (in such form and content reasonably satisfactory to both parties) required by Law or reasonably requested by another party to give effect to this Agreement.

21.4 Survival of certain provisions

- (a) **(Surviving clauses):** All provisions of this Agreement which, expressly or by implication from their nature, are intended to survive the rescission, termination or expiration of this Agreement will survive the rescission, termination or expiration of this Agreement, including any provision in connection with:
 - (1) the State's rights to set-off and recover money;
 - (2) confidentiality or privacy;
 - (3) Intellectual Property Rights;
 - (4) any obligation to make any records available to the State;

- (5) any indemnity or financial security given in accordance with this Agreement; or
- (6) any right or obligation arising on termination of this Agreement.
- (b) **(Interpretation)**: No provision of this Agreement which is expressed to survive the termination of this Agreement will prevent any other provision of this Agreement, as a matter of interpretation, also surviving the termination of this Agreement.
- (c) **(Survival of rights and obligations)**: No right or obligation of any party will merge on completion of any transaction in accordance with this Agreement. All rights and obligations in accordance with this Agreement survive the execution and delivery of any transfer or other document which implements any transaction in accordance with this Agreement.

21.5 Waiver

- (a) **(Writing)**: A waiver given by a party in accordance with this Agreement is only effective and binding on that party if it is given or confirmed in writing by that party.
- (b) **(No waiver)**: A failure to, a delay in or the partial exercise or enforcement of a right provided by Law or in accordance with this Agreement by a party does not preclude, or operate as a waiver of, the exercise or enforcement, or further exercise or enforcement, of that or any other right provided by Law or in accordance with this Agreement.
- (c) **(No waiver of another breach)**: No waiver of a breach of a term of this Agreement operates as a waiver of another breach of that term or of a breach of any other term of this Agreement.

21.6 Consents, approvals and directions

A consent required in accordance with this Agreement from the State may be given or withheld, or may be given subject to any conditions, as the State thinks fit, unless this Agreement expressly provides otherwise.

21.7 Amendments

Except as otherwise expressly provided in this Agreement, this Agreement may only be varied by a deed executed by or on behalf of each party.

21.8 Expenses

Except as otherwise expressly provided in this Agreement, each party must pay its own costs and expenses in connection with negotiating, preparing, executing and performing this Agreement.

21.9 Severance

If, at any time, a provision of this Agreement is or becomes illegal, invalid or unenforceable in any respect under the Law of any jurisdiction, that will not affect or impair the legality, validity or enforceability of:

- (a) any other provision of this Agreement or any other relevant State Project Document; or

- (b) that provision under the Law of any other jurisdiction.

21.10 Counterparts

This Agreement may be executed in any number of counterparts and by the parties in separate counterparts. Each counterpart constitutes the deed of each party who has executed and delivered that counterpart. All such counterparts taken together will be deemed to constitute one and the same Agreement.

21.11 Moratorium legislation

Without limiting clause 5.3 of the Project Agreement, to the fullest extent permitted by Law, the provisions of all Laws which operate to lessen or affect in favour of a party other than the State any obligation under this Agreement, or to prejudicially affect the exercise by the State of any right, power or remedy under this Agreement or otherwise, are expressly waived.

21.12 Proportionate liability

- (a) **(Excluded operation of Wrongs Act):** The operation of Part IVAA of the *Wrongs Act 1958* (Vic) is excluded in relation to all and any rights, obligations or liabilities of either party under this Agreement whether such rights, obligations or liabilities are sought to be enforced in contract, tort or otherwise.
- (b) **(Rights, obligations and liabilities):** Without limiting clause 21.12(a), the rights, obligations and liabilities of the parties (including those relating to proportionate liability) are as specified in this Agreement and not otherwise, whether such rights, obligations or liabilities are sought to be enforced in contract, tort or otherwise.

Schedule 2

Fees and Charges

The Escrow Fee consists of the following:

Establishment and Annual Fee

- (a) Establishment Fee: [not disclosed] (payable at Financial Close). All applicable GST is payable in addition to the fee; and
- (b) Annual Fee: [not disclosed] per annum (payable annually in advance from Financial Close). The fee is indexed to CPI annually and all applicable GST is payable in addition to the fee.

CPI means the All Groups Consumer Price Index Weighted Average of Eight Capital Cities (IECC) (ABS Cat No. 6401.0 Series ID A2325846C) published quarterly by the Australian Bureau of Statistics or, if there is a change to that index, the index determined in accordance with section 3 of Schedule 22 of the Project Agreement.

Time in Attendance Fee

A time in attendance fee may be charged for:

- (a) amendments to this Agreement;
- (b) significant changes to the scope, nature or frequency of services undertaken by the Escrow Agent, including the restructure of the transaction; and
- (c) work that was not originally contemplated.

The fee will be charged at the Escrow Agent's time in attendance rate applicable at the time of incurring the fee. On request, the applicable time in attendance rate will be provided to the State and / or Project Co.

The Escrow Agent's current time in attendance hourly rates are:

| Simplified for across PCT (excluding GST) | | |
|--|-----------------|--|
| Team Assistant | [not disclosed] | Team Assistant |
| Client Service Officer | [not disclosed] | Client Service Officer Associate |

Schedule 28

Commercial Opportunities Schedule

1 Principles applicable to all Commercial Opportunities Subleases

Project Co must ensure that each Commercial Opportunities Sublease:

- (a) is for a Permitted Commercial Opportunity;
- (b) prohibits any further leasing or licensing and any assignment of rights or novation of any rights and obligations under that Commercial Opportunities Sublease, without the prior written consent of the State;
- (c) imposes a duty of confidentiality on the Commercial Opportunities Tenant in respect of Confidential Information;
- (d) expressly recognises and permits the exercise by State of its rights under this Agreement and in particular under clauses 16.3 (*State's right to enter, inspect and test*), 41 (*Step-in by the State*), 45 (*Termination*), 53 (*Assignment, amendments and change in ownership*) and 62 (*Probity Events and Probity Investigations*);
- (e) provides that each Commercial Opportunities Tenant must not do, or omit to do, anything that would cause or contribute to, or result in, Project Co being in breach of this Agreement;
- (f) provides that subject to the requirements of the *Retail Leases Act 2003* (Vic) (where applicable), Project Co may elect to terminate a Commercial Opportunities Sublease at any time after one or more of the following:
 - (1) the Commercial Opportunities Tenant commits a material default under the Commercial Opportunities Sublease (including causing Project Co to be in breach of clause 37 (*Commercial opportunities and revenue*) of this Agreement) that is not cured or remedied within the applicable cure period or, if it is not capable of being cured or remedied, the Commercial Opportunities Tenant fails to comply with Project Co's requirements;
 - (2) the Commercial Opportunities Tenant commits a material default under the Commercial Opportunities Sublease which is also a Major Default under this Agreement which is not cured or remedied prior to the expiry of the applicable cure period under this Agreement, or, if the Major Default is not capable of being so cured or remedied, the Commercial Opportunities Tenant fails to comply with Project Co's requirements;
 - (3) an Insolvency Event occurs with respect to the Commercial Opportunities Tenant;
 - (4) a prolonged Force Majeure Event; or
 - (5) a Probity Event occurs with respect to the Commercial Opportunities Tenant; and

- (g) provides that each Commercial Opportunities Tenant and any prospective Commercial Opportunities Tenant must:
 - (1) consent to being the subject of a Probity Investigation undertaken in accordance with this Agreement; and
 - (2) comply with all applicable probity obligations set out in clause 62 (*Probity Events and Probity Investigations*) of this Agreement.

2 Commercial Opportunities Guiding Principles

The '**Commercial Opportunities Guiding Principles**' means in relation to a commercial opportunity:

- (a) is consistent with Project Co's obligations under this Agreement;
- (b) contributes to the State achieving the Project vision and objectives (as set out in this Agreement, the PS&TR and the Services Specification);
- (c) enhances amenity for the public and Users;
- (d) does not cause disruption, inconvenience, or risk to Users;
- (e) maximises asset utilisation taking into account the delivery of Rail Services and the urban design outcomes of the Maintained Assets;
- (f) does not intentionally attract additional people into the Maintained Assets unless consistent with paragraph 2(b);
- (g) does not compromise or increase the risk of the Project, be financially sustainable and do not increase State risks or limit the State's flexibility with respect to the Project;
- (h) delivers a financial benefit to the State and demonstrably achieves value for money taking into account associated risks;
- (i) does not compromise or increase the risk of the core Project;
- (j) is financially sustainable, and does not increase State risks;
- (k) complies with any PTV policy in relation to advertising content and location including the Advertising Principles set out in section 3;
- (l) is not a betting agency, brothel or tattoo parlour;
- (m) is not an outlet offering:
 - (1) alcohol, tobacco products or, lottery tickets (except outside of the ticketed areas, in locations approved by the State); or
 - (2) guns, firearms, explosives or offensive weapons, sexually explicit or pornographic goods, or items of a similar nature;
- (n) in relation to the location of advertising, the location has been approved by the State;
- (o) contributes to providing for a variety of commercial opportunities within each Station; and
- (p) does not adversely affect:
 - (1) the performance of the Services;
 - (2) the performance of Train Operations;

- (3) the occupation and operation of any Returned Asset by the relevant Returned Asset Owner;
- (4) the ability of Project Co to obtain, maintain or comply with any Accreditation, Approvals or Standards; or
- (5) the ability of the Train Franchisee to obtain, maintain or comply with any Accreditation.

3 Advertising Principles

- (a) Any advertising must:
 - (1) comply with all applicable Law;
 - (2) comply with voluntary codes of conduct established by the advertising industry;
 - (3) not:
 - (A) depict any subject matter that is offensive;
 - (B) condone or provoke anti-social behaviour;
 - (C) promote or relate to alcohol or gambling;
 - (D) use sexualised images or gender objectification;
 - (E) portray images or events that may cause distress to children;
 - (F) be used to promote a political party, parties or a political cause;
 - (G) use offensive language;
 - (H) demean any person or group on the basis of ethnicity, nationality, race, gender, age, sexual preference, religion or mental or physical disability; or
 - (I) disparage or diminish the reputation of public transport or the public transport system in Victoria; and
 - (4) not resemble, be capable of confusion with, or obstruct directional or informational signs or otherwise compromise wayfinding in any way.
- (b) Any advertising must not:
 - (1) be audible to passengers on-board services or on platforms;
 - (2) be hung from or placed on the Station ceilings or any Station asset used to deliver passenger information (excluding poster cases and existing hoardings);
 - (3) be visible on digital applications which provide service information to passengers;
 - (4) in the case of digital media, pose a health and safety risk as a result of flickering or other visual imagery;
 - (5) impede pathways or passenger flows or create safety issues in the event of an emergency evacuation;

- (6) use a public announcement system and other audio to advertise products unrelated to the public transport network; or
 - (7) be hung from or placed on hand rails or platform screen doors.
- (c) Any question as to whether any advertising complies or does not comply with paragraph (a) or (b) is to be determined by the State or PTV in its discretion. If the Project Co considers that there may be any uncertainty as to whether advertising it proposes to apply in Stations or on any Relevant Infrastructure complies with paragraph (a) or (b), Project Co should submit the advertising to the State or PTV for approval prior to proceeding.
- (d) Any advertising material that the State or PTV considers (acting reasonably) does not comply with paragraph (a) or (b) must, at the direction of the State or PTV, be removed within the time frame set by the State or PTV and in a manner reasonably acceptable to the State or PTV, as applicable.
- (e) All costs associated with the removal of any advertising material pursuant to paragraph (d) must be paid by Project Co.

Schedule 30

Critical Interface Milestone Schedule

Capitalised terms used in this Schedule have the meanings given to them in this Agreement, the Design Review Schedule and the PS&TR.

The Step number refers to the IDS baseline established on 13 December 2017. IDS step which is already in use will not be repeated for a new step in the future, i.e. If a new step needs to be added between Step 9 and Step 10 then new Step number would be 9.5. Unless such IDS changes impact the dates or content of the CIMs, it is not intended to update this Schedule 30.

|----------------------------|---------------------------|------|---|-----------------------------------|--|--|
| 1.3.5-1 | DMN (CER) | 5 | RSA-PPP: Provide CER civil, building services & cable containment Interim Design & ITPs review feedback | [not disclosed] | Project Co | RSA |
| 1.3.5-1 | DMN (CER) | 11 | PPP-RSA: Advise CER (including power and comms for the CER and cabling to its associated devices) ready for installation | [not disclosed] | RSA | Project Co |
| 1.3.5-1 | PKV (CER) | 5 | RSA-PPP: Provide CER civil, building services & cable containment Interim Design & ITPs review feedback | [not disclosed] | Project Co | RSA |
| 1.3.5-1 | PKV (CER) | 11 | PPP-RSA: Advise CER (including power and comms for the CER and cabling to its associated devices) ready for installation | [not disclosed] | RSA | Project Co |
| 1.1.1.1.4-1 | EP (Cut and Cover Tunnel) | 1 | PPP-RIA: Provide RIA Interface Package (Interim design) | [not disclosed] | RIA | Project Co |
| 1.1.1.1.4-1 | EP (Cut and Cover Tunnel) | 3 | PPP-RIA: Provide RIA Interface Package (IFC design) | [not disclosed] | RIA | Project Co |
| 1.1.1.1.4-1 | EP (Cut and Cover Tunnel) | 4 | RIA-PPP: Review and provide comments on IFC design | [not disclosed] | Project Co | RIA |
| 1.1.1.1.4-1 | EP (Cut and Cover Tunnel) | 9 | RIA-PPP: Provide the C&C Tunnel draft Certified Design (temporary and permanent works) including cast-in items, and alignment provisions to PPP for review | [not disclosed] | Project Co | RIA |
| 1.1.1.1.4-1 | EP (Cut and Cover Tunnel) | 10 | PPP-RIA: Provide review feedback on C&C draft Certified Design (temporary and permanent works) & confirm that it meets PPP's spatial and technical requirements | [not disclosed] | RIA | Project Co |
| 1.1.1.1.4-1 | EP (Cut and Cover Tunnel) | 14 | PPP-RIA: Hand over C&C worksite to RIA | [not disclosed] | RIA | Project Co |

| Interface Definition Sheet | | Step | Critical Interface Milestone | Critical Interface Milestone Date | Dependent Party (Project Co / RSA / RIA) | Responsible Party (Project Co / RSA / RIA) |
|----------------------------|---------------------------|------|---|-----------------------------------|--|--|
| 1.1.1.1.4-1 | EP (Cut and Cover Tunnel) | 15 | RIA-PPP: Hand over C&C Tunnel to PPP including RTO provisional/stage acceptance documentation, QA documentation and As Built records. | [not disclosed] | Project Co | RIA |
| 1.1.1.1.4-1 | WP (Cut and Cover Tunnel) | 1 | PPP-RIA: Provide RIA Interface Package (Interim design) | [not disclosed] | RIA | Project Co |
| 1.1.1.1.4-1 | WP (Cut and Cover Tunnel) | 3 | PPP-RIA: Provide RIA Interface Package (IFC design) | [not disclosed] | RIA | Project Co |
| 1.1.1.1.4-1 | WP (Cut and Cover Tunnel) | 4 | RIA-PPP: Review and provide comments on IFC design | [not disclosed] | Project Co | RIA |
| 1.1.1.1.4-1 | WP (Cut and Cover Tunnel) | 9 | RIA-PPP: Provide the C&C Tunnel draft Certified Design (temporary and permanent works) including cast-in items, and alignment provisions to PPP for review | [not disclosed] | Project Co | RIA |
| 1.1.1.1.4-1 | WP (Cut and Cover Tunnel) | 10 | PPP-RIA: Provide review feedback on C&C draft Certified Design (temporary and permanent works) & confirm that it meets PPP's spatial and technical requirements | [not disclosed] | RIA | Project Co |
| 1.1.1.1.4-1 | WP (Cut and Cover Tunnel) | 14 | PPP-RIA: Hand over C&C and covered section of Decline work area | [not disclosed] | RIA | Project Co |
| 1.1.1.1.4-1 | WP (Cut and Cover Tunnel) | 15 | RIA-PPP: Hand over C&C Tunnel to PPP including RTO provisional/stage acceptance documentation, QA documentation and As Built records. | [not disclosed] | Project Co | RIA |
| 1.1.1.2 | EP (Decline Structure) | 7 | RIA-PPP: Provide the Decline Structure draft Certified Design (temporary and permanent works) to PPP for review | [not disclosed] | Project Co | RIA |

| Interface Definition Sheet | | Step | Critical Interface Milestone | Critical Interface Milestone Date | Dependent Party (Project Co / RSA / RIA) | Responsible Party (Project Co / RSA / RIA) |
|----------------------------|-------------------------|------|---|-----------------------------------|--|--|
| 1.1.1.2 | EP (Decline Structure) | 8 | PPP-RIA: Provide review feedback on C&C draft Certified Design (temporary and permanent works) & confirm that it meets PPP's spatial and technical requirements | [not disclosed] | RIA | Project Co |
| 1.1.1.2 | WP (Decline Structure) | 7 | RIA-PPP: Provide the Decline Structure draft Certified Design (temporary and permanent works) to PPP for review | [not disclosed] | Project Co | RIA |
| 1.1.1.2 | WP (Decline Structure) | 8 | PPP-RIA: Provide review feedback on C&C draft Certified Design (temporary and permanent works) & confirm that it meets PPP's spatial and technical requirements | [not disclosed] | RIA | Project Co |
| 1.1.9.2.2 | EP (OHLE - Underground) | 7 | PPP-RIA: Provide QA documentation, As Built records and RTO stage/provisional acceptance to RIA. | [not disclosed] | RIA | Project Co |
| 1.1.9.2.2 | EP (OHLE - Underground) | 8 | RIA-PPP: Provide QA documentation, As Built records and RTO stage/provisional acceptance to PPP after RIA's Overhead installation work. | [not disclosed] | Project Co | RIA |
| 1.1.9.2.2 | WP (OHLE - Underground) | 7 | PPP-RIA: Provide QA documentation, As Built records and RTO stage/provisional acceptance to RIA. | [not disclosed] | RIA | Project Co |
| 1.1.9.2.2 | WP (OHLE - Underground) | 8 | RIA-PPP: Provide QA documentation, As Built records and RTO stage/provisional acceptance to PPP after RIA's Overhead installation work. | [not disclosed] | Project Co | RIA |

Schedule 31

Final Acceptance Schedule

1 Definitions

Unless otherwise expressly defined, expressions used in this Schedule have the meanings given to them in this Agreement:

| Term | Meaning |
|---|---|
| FAW Performance Failure | means a 'FAW Failure Event' or a 'FAW Quality Failure' (each as defined in the Payment Schedule). |
| Help Desk | means the facility established and maintained by as described in paragraph 2.7(a). |
| Help Desk Services | means the services to be provided by the Help Desk as described in paragraph 2.7. |
| Integration and Operational Readiness Activities | means: <ol style="list-style-type: none">1 any Metro Tunnel Interface Works;2 the Ticketing Works; and3 any other activities required to be undertaken by the State, a State's Associate, a Metro Tunnel Package Contractor, the High Capacity Metro Train Project, the Train Franchisee Interface Party or other third parties such that the Metro Tunnel (including the Tunnel and all Stations) can be brought into service. |
| Level 0 Systems Integration | means all works and testing required to ensure the design of: <ol style="list-style-type: none">1 the Works; and2 the Metro Tunnel Interface Works, is compatible and Fit For Purpose. |
| Level 1 Systems Integration | means all works and testing required to ensure that each individual system and subsystem of the Works (and each component of them) is Fit For Purpose. |

| Term | Meaning |
|---|--|
| Level 2 Systems Integration | means all works and testing required to ensure that: <ol style="list-style-type: none">1 each individual system and subsystem forming part of the Works; and2 each other relevant system and subsystem forming part of the Works, are compatible and Fit For Purpose, including interface testing between those systems and subsystems. |
| Level 3 Systems Integration | means all works and testing required to ensure that: <ol style="list-style-type: none">1 each system and subsystem forming part of the Works; and2 each system and subsystem forming part of:<ul style="list-style-type: none">– the Metro Tunnel Interface Works;– the Ticketing Works;– the High Capacity Metro Train Project; and– each other third party system and subsystem necessary for the Metro Tunnel to be brought into service, are compatible and Fit For Purpose, including interface testing between those system and subsystems. |
| Level 4 Systems Integration | means all other works and testing necessary for the acceptance of the Metro Tunnel into service by the Train Franchisee. |
| Monthly FAW Performance Report | the report prepared in accordance with paragraph 3.1. |
| Quarterly FAW Performance Report | the report prepared in accordance with paragraph 3.2. |
| Rail Systems Assets | has the meaning given in the PS&TR. |
| Training | means the training to be delivered pursuant to section 2.6. |

2 Final Acceptance Works

2.1 Availability of Relevant Infrastructure

Project Co must:

- (a) maintain and repair the Relevant Infrastructure so that it continues to be Fit For Purpose;
- (b) maintain the Relevant Infrastructure in accordance with Best Maintenance Practices, all Laws and all Standards;
- (c) where it is required to replace or repair any part of the Relevant Infrastructure, ensure that the replacement or repair (as relevant) will be:
 - (1) performed using parts of at least equal quality to those parts being repaired or replaced;
 - (2) performed in accordance with Best Maintenance Practices and where applicable, Best D&C Practices and Best Operating Practices; and
 - (3) Fit For Purpose; and
- (d) keep the Relevant Infrastructure clean and reasonably free from waste and pests.

2.2 Acknowledgement

Project Co acknowledges and agrees that:

- (a) all Level 0 Systems Integration, Level 1 Systems Integration and Level 2 Systems Integration must be completed; and
- (b) the Relevant Infrastructure must ready for the commencement of Level 3 Systems Integration and Level 4 Systems Integration,

prior to Provisional Acceptance.

2.3 Relevant Infrastructure excluding Rail Systems Assets

For all Relevant Infrastructure other than the Rail Systems Assets, Project Co must perform and pass:

- (a) all Level 3 Systems Integration; and
- (b) all Level 4 Systems Integration,

which was not completed by the Date of Provisional Acceptance.

2.4 Rail Systems Assets

In respect of the Rail Systems Assets, Project Co must:

- (a) provide support to the Rail Systems Alliance in performing and passing:
 - (1) all Level 3 Systems Integration; and
 - (2) all Level 4 Systems Integration;
- (b) review and provide input into test documentation for Level 3 Systems Integration and Level 4 Systems Integration prepared by the Rail Systems Alliance (including test plans, test procedures and test results);
- (c) attend and witness all tests for Level 3 Systems Integration and Level 4 Systems Integration; and
- (d) review and provide input into material detailing the satisfaction or failure of each Level 3 Systems Integration and Level 4 Systems Integration.

2.5 Train Accreditation and management of change

Project Co must do all things necessary to provide information, documentation, advice and other support in relation to the Works and the Project Activities as required by the Train Franchisee Interface Party for the purpose of amending its Train Safety Management System or obtaining a variation to its Train Accreditation required in connection with the Metro Tunnel.

2.6 Training

- (a) Project Co must develop and provide a program of Training for relevant personnel of the State, the State's Associates, Project Co, Project Co's Associates and the Train Franchisee and provide it to the State and the Independent Reviewer for review in accordance with the Review Procedures.
- (b) The Training must:
 - (1) familiarise personnel with the Maintained Assets, the Returned Train Works and the Returned VicTrack Works (as appropriate);
 - (2) address the operation and maintenance of the Maintained Assets, the Returned Train Works and the Returned VicTrack Works (as appropriate);
 - (3) explain the respective roles of each of Project Co, the Train Franchisee, VicTrack, PTV and the State in relation to the operation and maintenance of the Maintained Assets, the Returned Train Works and the Returned VicTrack Works, including providing guidance in relation to the application of any operating protocols;
 - (4) address emergency management procedures to ensure:
 - (A) the Maintained Assets are able to be operated and maintained in accordance with the relevant Management Plans; and
 - (B) the Returned Train Works and the Returned VicTrack Works are able to be operated and maintained in accordance with the relevant Handback documentation;
 - (5) be conducted by people who are appropriately skilled, qualified, experienced and competent in the field involved, have sufficient knowledge and understanding of the assets and systems and who have completed formal training in instruction techniques;
 - (6) include 'train the trainer' courses and material; and
 - (7) include provision to the State and the Train Franchisee full sets of training aids and materials for use in future training.
- (c) Wherever possible, the Training must be provided at the relevant part of the Station, Tunnel or other part of the Relevant Infrastructure.
- (d) Where the Training is not provided in accordance with 2.6(c), the Training must:
 - (1) be provided:
 - (A) in the Melbourne metropolitan region at a venue to be agreed with the State and the Train Franchisee (acting reasonably);
 - (B) where appropriate, on equivalent or duplicate equipment or systems; and

- (2) be supplemented with visits to the Site including to view relevant installed equipment or systems.
- (e) Project Co must plan and coordinate all training activities with the training activities to be performed by other Metro Tunnel Package Contractors.
- (f) Project Co must keep a record of all training sessions and a register of attendance at training.

2.7 Help Desk Services

- (a) Project Co must establish a help desk (**Help Desk**) to support efficient delivery of:
 - (1) the Works; and
 - (2) the Integration and Operational Readiness Activities (by third parties).
- (b) The Help Desk must:
 - (1) be effective, flexible and efficient in coping with varying demands;
 - (2) facilitate responses to reported FAW Performance Failures as soon as reasonably practicable; and
 - (3) marshal resources to the maximum benefit of the State.
- (c) The Help Desk must form the day-to-day notification interface between the State, the Train Franchisee and other parties undertaking Integration and Operational Readiness Activities (on the one hand) and Project Co (on the other) in relation to the following matters:
 - (1) the reporting of all queries and requests relating to the Works;
 - (2) requests for additional Project Co support in accordance with the requirements of this Schedule;
 - (3) the notification of FAW Performance Failures and potential FAW Performance Failures;
 - (4) monitoring of alarms, security systems, the building management system and other systems; and
 - (5) providing progress update regarding any issue notified to the Help Desk.
- (d) Project Co must provide the Help Desk Services 24 hours a day, 365(6) days per calendar year in accordance with the requirements of this Section 2.7.
- (e) The Help Desk must comprise a staffed facility receiving, logging and responding appropriately to communications via (as a minimum) telephone, email and intranet/internet based requests (of a format to be agreed with the State), automatically notifying each user when a job is logged and liaising with users on the progress of work.
- (f) The Help Desk must effectively respond to all received issues and calls, including by ensuring that any issues or calls not related to the Works are communicated expediently to the most appropriate representative of the State or the Train Franchisee.
- (g) Project Co must log all communications and FAW Performance Failures reported to the Help Desk. The Help Desk must record all relevant details, including the following information:
 - (1) unique reference number;

- (2) name and location of the person logging the query or FAW Performance Failure;
 - (3) date and time the request was made or FAW Performance Failure was reported;
 - (4) location of the FAW Performance Failure;
 - (5) nature of the request or FAW Performance Failure;
 - (6) any assets or systems affected by the FAW Performance Failure;
 - (7) any scheduled Final Acceptance Works or Integration and Operational Readiness Activities affected by the FAW Performance Failure;
 - (8) the action required to address the FAW Performance Failure;
 - (9) action taken to address the FAW Performance Failure;
 - (10) details of any further action or monitoring required to ameliorate the risk of future or consequential FAW Performance Failures;
 - (11) the time taken to address or resolve the FAW Performance Failure (if applicable); and
 - (12) the name/names of the person/people acting on behalf of Project Co to address or resolve the FAW Performance Failure (if applicable).
- (h) Project Co's obligation to capture FAW Performance Failures described in paragraph 2.7(g) extends to all FAW Performance Failures to which Project Co becomes aware, including those observed by Project Co or its Associates either visually, by the building management system, or by an alarm.
- (i) Once information has been logged with the Help Desk, Project Co must ensure that entries cannot be amended unless there is a system in place to record the:
- (1) exact nature and impact of the amendment;
 - (2) reason for the amendment;
 - (3) name of the person who made the amendment; and
 - (4) name of the person who authorised the amendment.
- (j) Project Co must ensure that the Help Desk provides an appropriate and timely acknowledgment of each communication, having regard to the nature and importance of the request for assistance and including by ensuring that the Help Desk:
- (1) provides a personal, non-automated answer to each telephone call within 30 seconds for 75% of the calls in any month, and within a maximum of 45 seconds for all calls; and
 - (2) confirms receipt of email or other digital communications within five minutes.
- (k) Project Co must ensure that the State and the Train Franchisee are given full live electronic (read and print only) access to all Help Desk records at all times and are able to track the progress of all requests and FAW Performance Failures.
- (l) Project Co must ensure that all live Help Desk data will need to be available to 10 concurrent users (excluding Project Co and Project Co's Associates).
- (m) Project Co must ensure that an appropriate back-up system is in place to ensure that Help Desk data and records cannot be lost or destroyed as a result

- of software or systems failure or any other occurrence. The back-up system need not be maintained on a real-time basis but must be backed up daily.
- (n) At the end of each Month, Project Co must provide the State with a soft copy of the Help Desk data and records for that Month.

3 Performance assessment and reporting

3.1 Monthly FAW Performance Report

The Monthly FAW Performance Report must provide sufficient information to enable the State to calculate the Final Acceptance Works Payment for each Month of the relevant Quarter, including the following information (or as otherwise agreed with the State):

- (a) a management overview which summarises overall performance and discusses key issues experienced during the reporting period, in respect of the Final Acceptance Works;
- (b) a summary of all FAW Performance Failures and events reported to the Help Desk within the relevant Month;
- (c) with respect to each FAW Performance Failure:
- (1) the unique request reference (if relevant);
 - (2) the unique FAW Performance Failure number;
 - (3) a short description of the FAW Performance Failure;
 - (4) the date and time of the FAW Performance Failure;
 - (5) the specific location of the FAW Performance Failure;
 - (6) the consequences of the FAW Performance Failure;
 - (7) a short description of how the FAW Performance Failure was rectified;
 - (8) any additional works required;
 - (9) Project Co's estimate of the deduction to be made from the Quarterly Service Payments; and
 - (10) any mitigating circumstances Project Co wishes the State to consider;
- (d) progress against relevant plans and programs, including an outline of any departures and reasons for these, including actions required to ensure delivery in accordance with the requirements of this Agreement;
- (e) an occupational health and safety report summarising safety performance and initiatives;
- (f) the minutes of any meetings held with the State, other Metro Tunnel Package Contractors, the Ticketing Works Contractor or the Train Franchisee;
- (g) any other information required to be provided in accordance with this Project Agreement; and
- (h) other reasonable requirements of the State,
- during, for or in respect of, the relevant Month.

3.2 Quarterly FAW Performance Report

The Quarterly FAW Performance Report must summarise:

- (a) the information provided in each Monthly FAW Performance Report submitted in respect of the Months comprising that Quarter, required to substantiate the Payment Claim; and
- (b) any other information required to be provided in accordance with this Agreement.

Schedule 32

Returned Works Schedule

1 Returned Works

1.1 City Square Works

The City Square Works are the Works described in section 4.6.5 of Part A of the PS&TR.

1.2 Returned Tram Works

The Returned Tram Works are:

- (a) the new tram stop on Royal Parade (directly north of Grattan Street);
- (b) the new tram curves at the intersection of Flinders Street and Elizabeth Street;
- (c) any new track on Flinders Street directly east of the Elizabeth Street intersection;
- (d) the new train/ tram interchange at Domain;
- (e) the reinstated St Kilda Road track on the legacy alignment; and
- (f) all other necessary track tie ins, track reinstatement and ancillary works to facilitate Tram Operations.

1.3 Returned Train Works

The Returned Train Works are:

- (a) any tunnel drainage elements above the first stage concrete and any pipes (including associated fixings and brackets) that are fixed to the wall of the Tunnel or located in the portals;
- (b) the following elements of the trackwork:
 - (1) track slab (second stage concrete);
 - (2) rail; and
 - (3) fixings;
- (c) the following ICT/ OCS equipment:
 - (1) Passenger Information Displays (PIDs);
 - (2) public address equipment;
 - (3) audio frequency induction loops;
 - (4) customer help points;
 - (5) Metrol telephones;
 - (6) CCTV system;

- (7) access control systems including door alarms; and
 - (8) data cabling, excluding data cabling, connecting Maintained Assets to Maintained Assets.
- (d) Tunnel lighting, excluding controllers shared with Station lighting;
- (e) the following emergency management assets:
 - (1) hydrants;
 - (2) hose reels
 - (3) extinguishers;
 - (4) fire blankets;
 - (5) gaseous suppression system;
 - (6) automatic fire detection and alarm system;
 - (7) occupant warning systems;
 - (8) intercommunication systems; and
 - (9) emergency lighting and directional signage in the Tunnel and portals.
- (f) the following traction power assets:
 - (1) overhead line equipment (OHLE);
 - (2) traction substations;
 - (3) all DC cabling between traction substations and OHLE
 - (4) sectionalising switch Rooms;
 - (5) traction protection;
 - (6) traction earthing and bonding; and
 - (7) traction power control and monitoring.
- (g) Platform Screen Doors System;
- (h) the following signalling equipment:
 - (1) axle counters;
 - (2) balise;
 - (3) cabling; and
 - (4) signal power assets downstream of the 'Signalling Equipment Room' (as defined in the PS&TR); and
- (i) the following communications equipment:
 - (1) RF distributed antenna; and
 - (2) 'Combined Services Route' (as defined in the PS&TR) in the Tunnel.

1.4 Returned VicTrack Works

The Returned VicTrack Works are the backbone cabling in the Tunnel.

Attachment 1

Creative Response

[not disclosed]

Schedule 38

Steps Plan Schedule

1 Steps to support approval of Planning Scheme Amendment No 2

Project Co must:

- (a) By no later than [not disclosed], complete the design and proposed construction methodology for the Metro Tunnel Project to the extent required to identify land required for Planning Scheme Amendment No 2, including the location of rock anchors, soil nails and all other ground support structures and measures (Completed Design and Construction Method).
- (b) By no later than [not disclosed], use the Completed Design and Construction Method to identify which:
 - (1) land, including strata of land beneath the ground surface, will be temporarily and permanently occupied for the Metro Tunnel Project (**Project Land**); and
 - (2) Project Land falls outside the plans included in Appendix 1 of the May 2017 Incorporated Document for the Metro Tunnel Project (**Additional Land**).
- (c) By no later than [not disclosed], describe the Project Land in a list and depict the Project Land on three sets of draft plans that:
 - (1) differentiate between the existing approved Project Land as described in the Incorporated Document and the Additional Land, with the intention that these plans be included in the explanatory report for Planning Scheme Amendment No 2, to be provided by no later than [not disclosed];
 - (2) depict the updated Project Land and meet the requirements of the Department of Environment, Water, Land and Planning, so that they can be inserted into Appendix 1 of the updated Incorporated Document proposed to be incorporated into the relevant Planning Schemes through Planning Scheme Amendment No 2, to be provided by no later than [not disclosed]; and
 - (3) depict the updated Project Land and meet the requirements of the Office of the Surveyor-General Victoria's *Plan Requirements: Major Transport Project Area Designation* so that they can be signed by the Surveyor-General and form the basis of a decision to vary the designated project area under section 96 of the MTPF Act, to be provided by no later than [not disclosed].
- (d) On [not disclosed], provide the documents listed below prepared on the basis of the draft plans referred to in 1(c)(1) and 1(c)(2):
 - (1) the project description report required for Planning Scheme Amendment No 2;

- (2) the risk assessment of Project Co's proposed works on the Additional Land and for the Project;
 - (3) the impact assessment of proposed works on the Additional Land and for the Project, specifically historic cultural heritage, noise and vibration, social and business, and land use planning and any other issue arising from the risk assessment; and
 - (4) the State will prepare an approved Cultural Heritage Management Plan for the Additional Land in accordance with the requirements of the *Aboriginal Heritage Act 2006 (Vic)*.
- (e) Finalise the plans and documents referred to in paragraphs 1(c) and 1(d) above on the basis of feedback from the State. For the avoidance of doubt, any changes proposed to the Completed Design and Construction Method or to the Additional Land made after [not disclosed] will not form part of Planning Scheme Amendment No 2.

2 Steps to support Land Availability

- (a) Project Co must prepare the following plans (which meet any requirements of the Land Victoria for registration as relevant) in accordance with the time for delivery of the 'Plans' in clause 6.3(h) of the Project Agreement and the Land Availability Plan, as relevant:
- (1) **(Draft Plans)** At least 15 Business Days prior to the date for delivery of the final plans identified in the Land Availability Plans, a draft plan meeting the specific requirements in 2(a)(2), 2(a)(3) or 2(a)(4) (as relevant) of each part of a parcel identified in the Land Description for review and comment by the State;
 - (2) **(Final Survey Plans for Permanent Land)** On or before the date for delivery of the final 'Plans' for each parcel of Permanent Land as identified in the Land Availability Plans, an accurate survey plan of each part of a parcel that meet the requirements for issuing and publishing notices for the acquisition of interests in land under the *Major Transport Projects Facilitation Act 2009 (MTPF Act)* or *Land Acquisition and Compensation Act 1986 (LAC Act)*;
 - (3) **(Final Survey Plans for Temporary Land)** On or before the date for delivery of the final 'Plans' for each parcel of Temporary Land as identified in the Land Availability Plan, accurate plans of each part of a parcel that meet the requirements for issuing a notice to occupy land under section 75 of the LAC Act; and
 - (4) **(Final Plans for 'Tunnels', 'Adits' and 'Construction Ground Support Land' parcels)** On or before the date for delivery of the final 'Plans' for 'Tunnels', 'Adits' and 'Construction Ground Support Land' parcels as identified in the Land Availability Plans (being such parcels not otherwise separately listed in the Land Availability Plans) (which is 12 months prior to the Permanent Land Availability Date for 'Tunnels', 'Adits' and 'Construction Ground Support Land' parcels), a three-dimensional strata design shape in GIS which meets the requirements of the State (acting reasonably) to assist the preparation of the underground land plans that the State will prepare to satisfy the Surveyor General.

Note (a): In accordance with Clause 6.3 of the Project Agreement, delay in delivering a 'Plan' by the dates for delivery of a 'Plan in the Land Availability Plans will delay, by a corresponding period, the Land Availability Dates (as relevant).

3 Steps to support the State's exercise of Road Management Powers

Process for roads listed in the attached Road Management Power Request Schedule, in respect of which the State has agreed in principle to exercise road management powers under Division 8 of Part 6 of the MTPF Act:

- (a) At least ten (10) Business Days prior to the 'Approx Start Date' identified in the Road Management Power Request Schedule, Project Co must submit to the State's reasonable satisfaction the following information:
 - (1) traffic management plan outlining the changes to traffic conditions, road, lane and footpath closures and traffic detours which will arise from the proposed exercise of the State's road management power in accordance with Schedule 7, section 3 of the *Road Management Act 2004* and section 99A of the *Road Safety Act 1986*;
 - (2) evidence of satisfactory consultation with affected landowners, occupiers and the relevant road authority, and details of the alternative access available to each landowner or occupier affected by the exercise of the State's road management power;
 - (3) certification by Project Co that the documents and proposed exercise of the State's road management power comply with the Project Agreement, Environmental Performance Requirements and Project Co's Community and Stakeholder Engagement Management Plan;
 - (4) copy of the plan showing the dimensions of land over which the State's road management power is requested to be exercised; and
 - (5) draft notification of the State's intended exercise of the road management power to the coordinating road authority.
- (b) Project Co must give written notice to the State prior to the commencement of consultation with landowners, occupiers and the relevant road authority in respect of the proposed exercise of a State road management power for a road in the Road Management Power Request Schedule.
- (c) Where required to do so by the State, Project Co must provide reasonable assistance to the State in relation to the State's participation in the traffic and transport working group required under the EPR.
- (d) Where the exercise of the State road management power is to open a road, Project Co must provide the State a survey plan of sufficient quality to be published with the government gazette notice.
- (e) Where the State exercises a road management power in relation to all or part of a road identified in the Road Management Power Request Schedule, the State (acting reasonably) may impose conditions on the exercise of that power, having regard to any obligation owed by, or any potential liability of, the State to any relevant landowner, occupier or Council in respect of that road.

Note (a): In accordance with Clause 6.3 of the Project Agreement, delay in complying with the required actions by the dates set out above will delay, by a

corresponding period, the exercise of the relevant requested road management power.

Note (b): Prior to the commencement of Works on roads identified in the Road Management Power Request Schedule, Project Co must obtain any Approvals necessary to undertake the Works, including any consent to works or works agreement with the relevant road authority.

4 Reasonable endeavours to assist with VicRoads Road Management Act powers

- (a) Where Project Co is requesting from VicRoads the exercise of a Road Management Act road closure power in relation to the roads listed at 4(c) below, the State will use reasonable endeavours to assist Project Co with negotiations with VicRoads to achieve the required timeframes.
- (b) For the avoidance of doubt, the State's reasonable endeavours to assist Project Co does not require the use of any statutory process under the MTPF Act by the State.
- (c) The roads for which the State will use reasonable endeavours to assist Project Co with negotiations with VicRoads are:
 - (1) Royal Parade between Howard Florey Institute and Grattan Street ([not disclosed]);
 - (2) Royal Parade between Grattan Street and Story Street ([not disclosed]);
 - (3) Elizabeth Street between VCCC and Grattan Street ([not disclosed]);
 - (4) Elizabeth Street between Haymarket Roundabout and Grattan Street ([not disclosed]);
 - (5) St Kilda Road between Toorak Road and Government House Drive;
 - (6) Kings Way between Bowen Lane and Palmerston Crescent ([not disclosed]);
 - (7) Flemington Road at Grattan Street intersection ([not disclosed]); and
 - (8) Swanston Street between Little La Trobe Street and A'Beckett Street.

Schedule 1

1 General

1.1 Structure of the Project Scope and Technical Requirements (PS&TR)

1.1.1 The PS&TR comprises the following parts:

Table 1-1: Overview of the PS&TR Structure

| Part | Heading | Description |
|------|---------------------------------|---|
| A | Project Scope | <p>Part A sets out an overview of the State's minimum requirements for the Works and the Project Activities.</p> <p>Part A includes a non-exhaustive list of:</p> <ul style="list-style-type: none"> (a) the scope of the Works; (b) the D&C Activities; and (c) Reference Documents. |
| B | Technical Requirements | <p>Part B sets out the State's Technical Requirements for the Works. Notwithstanding that this Part is divided into chapters for ease of navigation and that those sections are aligned with Part A in relation to specific parts of the Works, the requirements listed in each section may have application across multiple parts of the Works.</p> |
| C | Project Management Requirements | <p>Part C describes:</p> <ul style="list-style-type: none"> (d) the requirements for the processes and systems to be developed and implemented by Project Co; (e) the requirements for how the Works should be undertaken; (f) the Management Plans to be prepared, finalised, implemented and updated by Project Co; and (g) the various other plans, manuals, reports, programs, documents and systems that must be prepared, finalised, implemented and updated by Project Co; <p>for the purposes of, and in order for Project Co to undertake, the D&C Activities.</p> |
| D | Glossary of Terms | <p>Part D sets out the meanings for the terms contained in the PS&TR. Terms used in this PS&TR have the meaning given to them in the Project Agreement unless otherwise expressly defined in Part D.</p> |

| | | |
|------------|---|--------------|
| 2 | Reference Documents | 83793 |
| 2.1 | General | 83794 |
| 2.1.1 | The Works and the Project Activities must comply with the requirements of the Reference Documents, unless the Project Requirements specify a different requirement, standard, quality, level of service, quantum or scope, in which case the higher requirement will prevail. | 83795 |
| 2.1.2 | An indicative, non-exhaustive list of Reference Documents is provided in Appendix A1: Reference Documents. Project Co must determine all Laws, standards and regulations which are applicable to the delivery of the Works and the Project Activities. | 83796 |
| 2.1.3 | In the event of any inconsistency, ambiguity or discrepancy between the Reference Documents, the hierarchy of Reference Documents will be in the following order: <ul style="list-style-type: none"> (a) in relation to the Tunnel, the Tunnel Reference Documents; (b) in relation to a Returned Asset, the relevant published standards of the relevant Returned Asset Owner; (c) the operating standards of the accredited Rail Transport Operator (RTO); (d) Public Transport Victoria (PTV) policies as referenced in this PS&TR; (e) VicRoads publications; (f) Austroads publications; (g) the relevant published standards of Victorian Government Authorities; (h) the relevant standards, codes and guides of Standards Australia; (i) the relevant standards, codes and guides published by Safe Work Australia; (j) the relevant Eurocode; (k) the relevant international standards or codes; and (l) all other publications, codes, references, guidelines, manuals and other technical documents which are relevant to the performance of the Project Activities. | 83797 |
| 2.1.4 | Project Co must: <ul style="list-style-type: none"> (a) comply with the PTV Systems Engineering Policy; (b) comply with the PTV Strategic Asset Management Policy and Guidance; (c) comply with the ONRSR Major Project Guidelines; (d) comply with the ONRSR SFAIRP Guidance; (e) obtain any and all waivers from the accredited RTOs operating standards needed in order to achieve compliance with Project Requirements; and (f) make its own determination as to whether the requirements of the Agreement are satisfied by the Reference Documents and if any additional or varied measures are required, in which case Project Co must incorporate such additional measures. | 83798 |
| 2.1.5 | Where an item, approach or option is referred to in a Reference Document and it is expressed in terms such as 'should', 'may be', 'recommended', 'suggested', 'desirable', 'advisable', the item, approach or option referred to is deemed to be a requirement and must not be varied unless otherwise agreed by the State. | 83805 |
| 2.1.6 | Where a Reference Document provides for: <ul style="list-style-type: none"> (a) a 'desirable' and an 'absolute' design limit, the desirable design limit is to apply unless other design limits are approved by the State; (b) the specification of material properties or mix designs for materials, such material properties or mix designs must be specified in the design report and on the drawings in the Certified Design Documentation; (c) the approval of construction procedures by a superintendent or representative, such procedures must be included in the Construction Documentation submitted in accordance with Part C of the PS&TR; (d) the release of Hold Points by a superintendent or representative, this responsibility must be exercised by the relevant Nominated Authority identified in the Quality Management Plan; | 83806 |

- (e) the acceptance of non-conforming works or materials by a superintendent or representative, such non-conforming works must be notified as Defects in accordance with clause 25.1(b) of the Agreement; 83811
 - (f) the approval of alternative construction methods or materials by a superintendent or representative, any such methods or materials must be notified to the State and the Independent Reviewer in the Design Documentation in accordance with the Project Agreement and the Design Review Schedule; 83812
 - (g) the determination of classification of earthworks materials or approval to reduce the frequency of testing of materials, such determinations and approvals must be authorised by a Nominated Authority with the necessary knowledge and experience to verify compliance with relevant standards and specification requirements; 83813
 - (h) any other determination, direction, or agreement by a superintendent, such determinations, directions, or agreements must be notified to the State and the Independent Reviewer in the Design Documentation in accordance with the Project Agreement and the Design Review Schedule; and 83814
 - (i) the approval for the adoption or variance to a particular standard, code, reference, guideline, manual or other technical document, the standard must not be adopted or varied without the prior written approval of the Independent Reviewer. 83815
- 2.1.7 If a requirement in a Reference Document: 83816
- (a) does not impose an obligation on any particular party, then it will be deemed to impose an obligation on Project Co; and 83817
 - (b) would or seeks to impose an obligation on the State or the Independent Reviewer, then that obligation will be deemed to be imposed on Project Co unless: 83818
 - (i) expressly stated otherwise in the Agreement; or 83819
 - (ii) only the State or the Independent Reviewer (as applicable) can perform the obligation. 83820

| | | |
|------------|---|--------------|
| 3 | Overview of the Works | 83821 |
| 3.1 | General | 83822 |
| 3.1.1 | Subject to section 3.1.3, Project Co must deliver the Works to facilitate Train Operations, which includes, for the avoidance of doubt, performing all activities necessary to manage, design, develop, construct, integrate, test, deliver, install and commission the Works in accordance with the Project Documents. | 83823 |
| 3.1.2 | The System Breakdown Structure (SBS) in Appendix A2: System Breakdown Structure provides a non-exhaustive breakdown of the Works to be delivered by Project Co. | 83824 |
| 3.1.3 | The Train Franchisee will procure that the Maintained Assets are operated in accordance with clause 14.2 of the Franchise Cooperation Agreement (Train). | 150527 |
| 3.2 | Summary of the Works | 83825 |
| 3.2.1 | The Works include: | 83826 |
| | (a) design and construction of: | 83827 |
| | (i) twin nine-kilometre rail tunnels from Kensington to South Yarra that facilitate connection of the Pakenham – Cranbourne line to the Sunbury line to form the Sunshine – Dandenong line; | 83828 |
| | (ii) five new underground stations at Arden, Parkville, CBD North, CBD South and Domain, including at-grade station entrances and ventilation shafts; | 83829 |
| | (iii) track within the Tunnel, Stations and Portals, including first stage concrete, track slab (second stage concrete), rail and fasteners; | 83830 |
| | (iv) substations for intake, Station and Tunnel power and traction power; | 83831 |
| | (v) the traction power system, including overhead line equipment, throughout the Tunnel, Stations and in the Portals to the end of the cut and cover structures and the connection of the contact wire to the overhead isolation point within the decline structure; | 83832 |
| | (vi) a range of mechanical and electrical systems within the Tunnel and Stations, and within the Portals including emergency egress structures, required to support Train Operations, including fire and life safety equipment, lighting, line-wide tunnel ventilation systems, vertical transportation, line-wide earthing and bonding, access and maintenance activities and a range of services, information and communications technology and management control systems; | 83833 |
| | (vii) surface transport works, including at-grade train / tram and train / bus interchanges and reinstatement of roads; | 83834 |
| | (viii) public realm areas adjacent to Station entrances or otherwise occupied by Project Co during the Works, including rehabilitation and reinstatement of those areas; | 83835 |
| | (ix) all Temporary Works; and | 83836 |
| | (x) all Utility Infrastructure Works; | 83837 |
| | (b) in respect of Rail Systems Assets within the Tunnel and Stations and in the Portals including emergency egress structures: | 83838 |
| | (i) design, supply and installation of: | 83839 |
| | (1) Combined Services Route (CSR); and | 83840 |
| | (2) civil supports, power and fixings for Rail Systems Assets. | 83841 |
| | (ii) supply and installation of: | 83842 |
| | (1) Information and Communications Technology (ICT) / Operational Control System (OCS) equipment; | 83843 |
| | (2) security equipment; | 83844 |
| | (3) communications equipment (excluding within the CER); and | 83845 |
| | (4) cables from termination to termination (to SER/ CER up to a 400m run length outside the Portals); | 150512 |
| | (iii) installation of: | 83846 |
| | (1) signalling equipment; and | 83847 |
| | (2) Platform Screen Doors (PSDs); and | 83848 |

- (c) all other requirements as set out in this PS&TR to be undertaken in order to facilitate Train Operations. 83849
- 3.2.2 Project Co must undertake all necessary testing and commissioning activities in relation to the Works. 83850
- 3.2.3 Project Co must handback those assets forming part of the Returned Works to the relevant Returned Asset Owner and must satisfy any Handback requirements, including provision of any necessary spares and training. 83851

| | | |
|------------|--|-------|
| 4 | Urban Design and Public Realm | 83852 |
| 4.1 | Design Excellence | 83853 |
| 4.1.1 | Melbourne is proud of its architectural and urban design history and is internationally recognised for design quality in the built environment. It is a city where elegant Victorian buildings sit comfortably alongside contemporary forms, creating a living example of the layered evolution of great design. | 83854 |
| 4.1.2 | It is also a city of outstanding public spaces. Its legacy of grand, tree lined boulevards, formal gardens and orderly central city grid provides an easily understood framework for navigating the city. | 83855 |
| 4.1.3 | This legacy is not an accident. Since the City of Melbourne won its first Australia Award for Urban Design in 1996 (for the CBD Revitalisation Project) there has been a sustained commitment from all levels of government to promote and deliver the highest quality in urban design and architecture. | 83856 |
| 4.1.4 | Understood in this context, the Metro Tunnel is more than an engineering and transport project; it is also a major urban design challenge that will enrich urban amenity and contribute to the culture of design excellence that is a hallmark of Melbourne. | 83857 |
| 4.1.5 | The Project will transform how people move through, use and perceive the city. Ensuring that the public experience of the journey is memorable and engaging will be a key design outcome. | 83858 |
| 4.1.6 | Beyond the experience of the new infrastructure, each new Station precinct will also be transformed as a result of the project: | 83859 |
| | (a) Arden will be one of Melbourne’s biggest and most ambitious urban renewal projects, with the new Station providing the catalyst for activating future development; | 83860 |
| | (b) a station at Parkville will provide the nucleus for Victoria’s Parkville Precinct, long recognised both within Australia and internationally as a hub of excellence in healthcare, research and education; | 83861 |
| | (c) CBD North will establish a new northern gateway for Melbourne’s CBD and will cater to the growing needs of the burgeoning resident and student population; | 83862 |
| | (d) a station at CBD South will connect in to Flinders Street Station, the State’s premier interchange, and allow for two of the city’s most important civic squares (City Square and Federation Square) to be reimagined and better connected; and | 83863 |
| | (e) Domain will become the network’s third busiest tram/train interchange providing direct access to several of Melbourne’s key tourist attractions - the Shrine and the city’s most significant parks and gardens, including the Royal Botanic Gardens. | 83864 |
| 4.1.7 | Meeting this challenge will require vision and a commitment to high quality and integrated design that contributes to and enhances Melbourne’s reputation for design excellence – it demands a collaborative and multi-disciplinary approach with a high level of expertise in urban design, architecture, landscape architecture, industrial design and integrated urban identity features. | 83865 |
| 4.2 | General | 83866 |
| 4.2.1 | The Works include all adjustments, reinstatement and reasonable improvements necessary to existing pavements and landscaping affected by the Works, including: | 83867 |
| | (a) street fixings and furniture; | 83868 |
| | (b) road kerbs and paving; | 83869 |
| | (c) installation of hard landscaping and passive irrigation to accommodate the placement of soil and planting of trees by a specialist contractor to be engaged by the State or local council; and | 83870 |
| | (d) precinct surface works as described throughout this section. | 83871 |
| 4.2.2 | All Works are to be delivered in accordance with the relevant local authority standards. | 83872 |
| 4.3 | Arden Precinct | 83873 |
| 4.3.1 | Arden represents the next frontier in Melbourne’s evolution as a world-class capital city. Built around a new underground railway station, the new Arden precinct will be a model for a future smart city — incorporating the latest in technology, sustainability and urban design. | 83874 |

| | | |
|------------|---|--------|
| 4.3.2 | The Metro Tunnel will catalyse transformation of the area around the proposed Arden Station. From 2026, when the Station opens, it will attract thousands of new workers and residents. | 83875 |
| 4.3.3 | The Station entrance must provide a sophisticated design response to ensure presence, ease of access, legibility and connectivity. | 83876 |
| 4.3.4 | The urban design at Arden must create an inviting, safe and comfortable public environment that sets the standard for future development and supports the use of the Station before (and during) the wider redevelopment of the site. | 83877 |
| 4.3.5 | The Works include the creation of a high quality, landscaped forecourt (that can integrate with future development and serves as a benchmark for subsequent development) and installation of hard landscaping to support fast-growing planting to provide shelter and amenity for public spaces. | 83878 |
| 4.3.6 | Public Realm works at Arden Station must include: | 83879 |
| | (a) a single Station entry and forecourt; | 83880 |
| | (b) landscaping; | 83881 |
| | (c) street furniture, paving and lighting; | 83882 |
| | (d) signage and wayfinding; | 83883 |
| | (e) cultural and community identity infrastructure; | 83884 |
| | (f) streetscape upgrades along Laurens Street from Arden Street to Queensberry Street in accordance with the road functional layout; | 83885 |
| | (g) reconstruction of Barwise Street; and | 83886 |
| | (h) removal of any buildings and structures following construction and application of dust suppression surface treatment for the balance of the construction staging site. | 83887 |
| 4.3.7 | All areas of the Site which are not part of the Station and public environment (outside of the infrastructure lease) must be reinstated according to the requirements of the licensing agreement. | 83888 |
| 4.4 | Parkville Precinct | 83889 |
| 4.4.1 | The urban design at Parkville must contribute to the creation on a new civic heart for the academic / biomedical precinct that includes an integrated transport interchange between the Metro Tunnel and tram and bus services, a superior public transport / cycle / pedestrian connection along Grattan Street and a seamless connection between the University of Melbourne and the soon to be upgraded University Square. | 83892 |
| 4.4.2 | In particular, Grattan Street must be reinvented as a transport spine for the city's north, university and biomedical precinct, with priority given to active transport modes and intermodal transfers, and to the creation of an activated and people oriented public realm. | 83893 |
| 4.4.3 | Public realm works at Parkville Station must be consistent with the Parkville Public Realm Concept Plan (refer to Appendix A4) and include: | 83894 |
| | (a) reinstatement of all areas affected by works in a manner consistent with the Parkville Public Realm Design Brief and the City of Melbourne University Square Master Plan; | 83895 |
| | (b) water sensitive urban design infrastructure, tree and landscaping plots, street furniture, bicycle infrastructure, bicycle hire infrastructure, paving and lighting (including replacing bus shelters); | 83896 |
| | (c) cultural and community identity infrastructure; | 83897 |
| | (d) signalised crossings across Grattan Street between Leicester Street and Flemington Road in locations to be agreed with stakeholders; | 83898 |
| | (e) appropriate way finding infrastructure; | 117988 |
| | (f) reconfiguration and reconstruction of footpaths, bike lanes, traffic lanes and parking bays along: | 117989 |
| | (i) both sides of Grattan Street between Flemington Road and Leicester Street; and | |
| | (ii) Royal Parade and Elizabeth Street: | |
| | (1) between Story and Pelham Streets on the eastern side; and | |
| | (2) between Story Street and Flemington Road on the western side; | |
| | including appropriate transition of traffic and bicycle lanes into the Haymarket roundabout/ intersection. | |
| (g) | chiller plant, access shaft and ventilation structures that are sensitively integrated into the overall precinct design and the City of Melbourne University Square Master Plan. | 83907 |

Ventilation and access structures will be coordinated with existing ventilation and access structures for the underground car park and with the layout of proposed features in Barry, Leicester and Grattan Streets.

| | | |
|------------|---|-------|
| 4.5 | CBD North Precinct | 83908 |
| 4.5.1 | CBD North must establish a new northern gateway for Melbourne’s CBD and must cater to the growing needs of the burgeoning resident and student population. While physically spread over a wide area, the design of physical improvements at CBD North must contribute to an integrated local identity. | 83909 |
| 4.5.2 | The Station entry at Swanston and La Trobe Streets must be integrated into an oversite development (OSD) that supports the animation and amenity of adjoining street spaces, and that makes a positive civic architectural contribution to the precinct. | 83910 |
| 4.5.3 | The Station entry at Franklin Street East must be designed to be integrated with the street. It must provide a central public realm area within the spine of Franklin Street and create a plaza on the southern side, with improved pedestrian movements and links to RMIT Building 14 and the New Academic Street (NAS). | 83911 |
| 4.5.4 | Existing and valued qualities and features must be maintained in the re-imagined plan for the precinct that: | 83912 |
| | (a) celebrates and enhances its role as the northern gateway to the CBD; | 83913 |
| | (b) enhances the regeneration of the precinct at a macro level; | 83914 |
| | (c) increases green open spaces; | 83915 |
| | (d) improves connectivity to key institutions, including RMIT and the University of Melbourne; | 83916 |
| | (e) improves pedestrianisation and safe cycling of Franklin and Swanston Streets; and | 83918 |
| | (f) activates Franklin Street. | 83919 |
| 4.5.5 | Public realm works at CBD North must be consistent with the CBD North Public Realm Concept Plan (refer to Appendix A4) and include: | 83920 |
| | (a) ventilation and emergency access structures in Franklin Street; | 83921 |
| | (b) design and reconstruction of Franklin Street from Victoria Street to Elizabeth Street; Street (refer to section 11.4.6); | 83922 |
| | (c) streetscape upgrades (including provision for landscaping and tree planting) for the extent of areas affected by the Works, including on: | 83926 |
| | (i) Franklin Street from Victoria Street to Elizabeth Street; | 83927 |
| | (ii) Swanston Street from Victoria Street to LaTrobe Street; | 83828 |
| | (iii) La Trobe Street (north side) between Elizabeth Street and Swanston Street; | 83929 |
| | (iv) Victoria Street (south side) between Franklin Street and Swanston Street; | 83930 |
| | (v) A’Beckett Street, from Swanston Street to Stewart Street; | 83931 |
| | (d) street furniture, paving and lighting; | 83923 |
| | (e) cultural and community identity infrastructure; and | 83924 |
| | (f) signage and wayfinding. | 83925 |
| 4.6 | CBD South Precinct | 83932 |
| 4.6.1 | Public realm designs for CBD South must contribute to the creation of a world class civic space that is built on a foundation of high quality urban design that reflects the identity of Melbourne. Designs must incorporate vibrant and lively streets that can accommodate a vast number of roles from gathering spaces, event and ceremony spaces and specialised food / retail precincts. Streets and public places must allow people to browse, linger and rest. | 83933 |
| 4.6.2 | Designs must respect and build upon the heritage of the city, the street, the buildings and civic events that take place and will welcome visitors. | 83934 |
| 4.6.3 | Surface works at CBD South Station must also link three of Melbourne’s most iconic places, Flinders Street Station, Federation Square and City Square, and the urban design must reflect the importance of this precinct as Melbourne’s civic heart. | 83935 |
| 4.6.4 | Flinders Street and Swanston Street | 83936 |
| | (a) The Station entry at Flinders and Swanston Streets must be integrated into an OSD that supports the animation and amenity of adjoining street spaces, and that makes a positive civic architectural contribution to the precinct. | 83937 |

| | | |
|-------|---|-------|
| | (b) Specifically, public realm works at CBD South will include, for the extent of areas affected by the Works: | 83938 |
| | (i) streetscape upgrades to new and existing laneways; | 83939 |
| | (ii) landscaping including provision for replanting of trees; | 83940 |
| | (iii) street furniture, paving and lighting; | 83941 |
| | (iv) cultural and community identity infrastructure; and | 83942 |
| | (v) signage and wayfinding. | 83943 |
| 4.6.5 | City Square | 83944 |
| | (a) Existing valued qualities and features of City Square must be designed in accordance with the City Square Background Paper (refer to Appendix A4) and include: | 83945 |
| | (i) a 24/7 public open space that celebrates informal and formal activities; | 83946 |
| | (ii) a civic centrepiece for the precinct between the Town Hall and St Paul's Cathedral; | 83947 |
| | (iii) a flexible event space in the central city; | 83948 |
| | (iv) wide footpath and provision for Swanston Street tree arbour; | 83949 |
| | (v) occupiable edges and seating opportunities; | 83950 |
| | (vi) greenery in the city; | 83951 |
| | (vii) activity fronting the square; | 83952 |
| | (viii) opportunities for unstructured play; | 83953 |
| | (ix) accessibility, permeability and visibility; and | 83954 |
| | (x) community identity infrastructure and civic markers. | 83955 |
| 4.6.6 | Federation Square | 83956 |
| | (a) St Paul's Court must be maintained and enhanced in accordance with the aims of the original design for Federation Square to build on relationships with the surrounding city and to create a variety of adaptable spaces for civic events. | 83957 |
| | (b) Specifically, surface works at Federation Square must include: | 83958 |
| | (i) reconstruction of the Western Shard to accommodate the Station entry; | 83959 |
| | (ii) paving and lighting to match existing; and | 83960 |
| | (iii) signage and wayfinding that is sensitively designed into the overall design of Federation Square. | 83961 |
| 4.7 | Domain Precinct | 83962 |
| 4.7.1 | Surface works at Domain must enhance St Kilda Road's status as one of Melbourne's iconic boulevards, a key transport interchange and the gateway to Melbourne's arts and culture precinct, and must facilitate the movement of millions of transport users and visitors as they pass through the formal landscaped setting on their way to work, schools, the Shrine of Remembrance and the Royal Botanic Gardens. The Station precinct must be improved as a high quality pedestrian environment with better connectivity and opportunities for casual recreational use, and as a green link between Albert Park and the Domain parklands. | 83963 |
| 4.7.2 | Public realm designs for the precinct must be consistent with the Domain Public Realm Concept Plan (refer to Appendix A4) and: | 83964 |
| | (a) provide a cohesive and unifying design response that knits together the two distinct characters of St Kilda Road that meet at the interchange; | 83965 |
| | (b) restore the grandness of St Kilda Road by consolidating access for all modes and strengthening the rhythm of mature canopy trees; | 83966 |
| | (c) enhance the crescent shape and strong forms of the Albert Road Reserve and reveal the South African Soldiers' Memorial; | 83967 |
| | (d) create a flexible and highly useable urban space in the Albert Road Reserve, one that caters to its many roles: reflection; respite and passive recreation; formal green space; | 83968 |
| | (e) coordinate engineering with landscape architecture so that new infrastructure contributes to the formality of the boulevard; and | 83969 |
| | (f) reduce east-west severance effect of St Kilda Road by shortening crossing times. | 83970 |
| 4.7.3 | Specifically, surface works at Domain must include: | 83971 |
| | (a) three Station entries and associated forecourts / paving; | 83972 |
| | (b) relocation of tram interchange and associated passenger facilities and trackwork; | 83973 |

- (c) the reinstatement of the South African Soldiers' Memorial and the Cockbill Fountain (each previously dismantled and stored by the Early Works Managing Contractor) to their permanent positions, noting the requirement to undertake conservation works as required by any heritage permits in respect of these monuments; 83974
- (d) landscaping including provision for replanting of trees along St Kilda Road (between Dorcas Street and Toorak Road) and reimagined public space at Albert Reserve that celebrates the formal heritage significance of the reserve and includes South African Soldiers' Memorial as a focal point; 83975
- (e) street furniture, paving and lighting; 83976
- (f) cultural and community identity infrastructure; 83977
- (g) signage and wayfinding; 83978
- (h) streetscape upgrades for the extent of areas affected by the Works, including: 83979
 - (i) on St Kilda Road (between Dorcas Street and Toorak Road); 83980
 - (ii) on Albert Road (between St Kilda Road and Kings Way); 83981
 - (iii) on Domain Road; and 83932
 - (iv) on Bowen Crescent and Bowen Lane; 83983
- (i) Unpaid pedestrian subway beneath St Kilda Road and signalised crossing above; and 83984
- (j) chiller plant and ventilation structures that are sensitively integrated into the overall precinct design, giving consideration to the maximum extent possible to any integrated solutions which could contain the structures within an existing or proposed development. 83985

5 Civil and structural works

| | | |
|------------|---|--------|
| 5.1 | Trackwork | 83987 |
| 5.1.1 | The Works include design and construction of trackwork and ancillary structures including provisions for permanent services in the Tunnel, Stations and Portals as follows: | 83988 |
| | (a) first stage concrete; | 83989 |
| | (b) track slab concrete (second stage concrete); and | 83990 |
| | (c) rail and fasteners; | 83991 |
| | but excludes track tie-ins to the existing lines which will be undertaken by the Rail Infrastructure Alliance (RIA). | 83992 |
| 5.2 | Tunnel | 83993 |
| 5.2.1 | The Works include design and construction of the Tunnel as follows: | 83994 |
| | (a) twin nine-kilometre long rail tunnels from Kensington to South Yarra that facilitate connection of the Pakenham – Cranbourne line to the Sunbury line to form the Sunshine – Dandenong line, including: | 83995 |
| | (i) cross passages; | 83996 |
| | (ii) intervention shafts; | 83997 |
| | (iii) ventilation shafts; | 83998 |
| | (iv) egress shafts; | 83999 |
| | (v) tunnel service walkways; | 84000 |
| | (vi) emergency egress pathways; | 84001 |
| | (vii) tunnel drainage system; | 84002 |
| | (viii) cable ducts; | 84003 |
| | (ix) integrated cabling and pipework; | 84004 |
| | (x) tunnel power and lighting; | 84005 |
| | (xi) civil supports and fixings for Rail Systems Assets in the Tunnel as set out in section 6; and | 84006 |
| | (xii) CSR (service containments) in the Tunnel and the Portals including emergency egress structures as set out in section 6.4.3; | 84007 |
| | (b) an alignment that passes below the existing CityLink road tunnels between CBD South and Domain Stations; | 114504 |
| | (c) containment routes for services through Tunnel and Station interfaces; | 84008 |
| | (d) cross-passage interfaces; | 84009 |
| | (e) provision of space in cross passages to house equipment required by the Rail Systems Alliance (RSA); | 84010 |
| | (f) all additional infrastructure necessary to facilitate safe and efficient Train Operations whilst maintaining continuity of the existing surface train lines; | 84011 |
| | (g) consideration of any plans for developing the Arden precinct where the development may have an impact on the Tunnel or Station infrastructure; and | 84012 |
| | (h) any Temporary Works to facilitate the above including: | 84013 |
| | (i) ground treatment, improvement or replacement; and | 84014 |
| | (ii) temporary intervention shafts. | 84015 |
| 5.3 | Stations | 84016 |
| 5.3.1 | The Works include design and construction of underground Stations and ancillary above ground structures including: | 84017 |
| | (a) appropriate rooms, areas and ancillary structures including all joinery and loose furniture in the Stations to support Train Operations including those rooms, areas and ancillary structures as set out in Appendix B3 to Part B of the PS&TR; | 84018 |
| | (b) underground and above ground CSR (service containments) in the Stations and ancillary structures as described in section 6.4.3; | 84019 |
| | (c) supports and fixings for Rail Systems Assets in the Stations as set out in section 6; | 84020 |

- (d) defined and coordinated delivery routes for all permanent plant, equipment, vertical transportation, tunnel fixtures and fittings (including cross-passages) and any temporary routes and / or provisions to facilitate the Works and ongoing operations and maintenance activities; 84021
- (e) Station fit out in accordance with principles of safe and efficient wayfinding (including urban design and human factors considerations); 84022
- (f) signage and wayfinding equipment; 84023
- (g) in-station commercial opportunities, including in-station retail, advertising and amenity offerings, and retail and hospitality to activate the Stations and street frontages around the new Station entrances; and 84024
- (h) any Temporary Works to facilitate the above. 84025

5.4 Portals 84026

- 5.4.1 Project Co must: 84027
 - (a) specify any spatial requirements and other technical requirements for the cut and cover tunnel sections and decline structures at both Portals to enable the RIA to design and construct the cut and cover tunnel sections and decline structures, which must consider both temporary and permanent Works requirements; 84028
 - (b) adopt 'Option B5' at the Western Portal; 84029
 - (c) design and construct service facilities / shafts at both Portals or other location(s) to be determined by Project Co; 84030
 - (d) provide any relevant specification or design information reasonably required to enable the RIA to design and construct its works; 84031
 - (e) achieve breakthrough between the shafts and the cut and cover structures;
 - (f) design, supply and install active flood protection (1:1000 year event); 150513
 - (g) within the Portals to the top of the decline structures, design and construct the trackwork; 84032
 - (h) within the Portals: 84033
 - (i) design, supply and install: 84034
 - (1) mechanical and electrical systems (including traction power); 84035
 - (2) CSR; 84036
 - (3) civil supports, power and fixings (excluding cast in supports in the cut and cover tunnel sections, which will be designed and constructed by the RIA, and for which Project Co must provide the relevant requirements to the RIA) for Rail Systems Assets; 84037
 - (ii) supply and install: 84038
 - (1) security equipment; 84039
 - (2) communications equipment excluding CSR (as designed by the RSA); and 84040
 - (iii) install signalling equipment (as designed and supplied by the RSA); and 84041
 - (i) complete connection of the contact wire to the overhead isolation point beyond the end of the cut and cover structures. 150514

6 PPP Support for Rail System Alliance 84042

6.1 General 84043

Project Co must: 84044

6.1.1 design, supply or install (as noted in the relevant sections) the Rail Systems Assets within the Tunnel, Stations (for ICT/OCS and security equipment this may include some above ground locations adjacent to Station entrances) and in the Portals including emergency egress structures; 84045

6.1.2 provide any relevant specification or design information (including as set out in sections 6.3.1, 6.4.1, 6.5.3 and 6.6.1) or operational requirements reasonably required to enable the RSA to specify, design or supply the Rail Systems Assets; 84046

6.1.3 provide access to equipment and Station rooms with associated building services (e.g. LV no break power, lighting, air conditioning, ventilation and cable containment systems) and furniture as required for complete or partial fit out with equipment by the RSA in accordance with Appendix B3 to Part B of the PS&TR; 84047

6.1.4 make provision for the RSA to install ICT/OCS complex equipment assemblies in equipment rooms, Station offices and cross passages as required; 84048

6.1.5 install the Rail Systems Assets in accordance with installation procedures and inspection test plans agreed with the RSA; 84049

6.1.6 make provision for the RSA to witness installation activities to the extent required for the RSA to accept the Rail Systems Assets as part of the total ICT/OCS, security, communications, signalling, PSD or rail control system; 84050

6.1.7 undertake installation checks and fulfil its testing obligations in relation to the Rail Systems Assets; 84051

6.1.8 provide all necessary support to allow the RSA to undertake its works, including testing, commissioning and integration obligations in relation to Rail Systems Assets; and 84052

6.1.9 provide installation records to the RSA as evidence of successful installation. 84053

6.2 Supporting Equipment 84054

6.2.1 Project Co must design, supply and install all equipment necessary to support the function of the Rail Systems Assets, including: 84055

(a) all mounting arrangements; 84056

(b) all cabling arrangements, including all associated conduit, brackets, trunking and inter-room cables; 84057

(c) local communication equipment including joints and tee offs from the fibre backbone, fibre termination cubicles, local fibre and power over Ethernet (**PoE**) network cabling and local active network devices; 84058

(d) power supply, backup and distribution; 84059

(e) locks (including during construction); 84060

(f) earthing and bonding; and 84061

(g) lighting for CCTV cameras and Passenger Information Displays (**PIDs**); 84062

as specified by the RSA. 84063

6.3 ICT/OCS and Security Equipment 84064

Project Co must: 84065

6.3.1 design Tunnel and Station layout and architectural details associated with the ICT/OCS and security assets and provide this design to the RSA to enable the RSA to determine the required locations of ICT/OCS and security assets; 84066

6.3.2 incorporate ICT/OCS and security asset locations determined by the RSA into the Tunnel and Station layout plans, noting that this must also include above ground locations at interconnecting tram stops adjacent to Station entrances; 84067

6.3.3 supply and install the following equipment: 84068

(a) intranet and office IT systems for Station rooms and associated cabling; 84069

- (b) ICT/OCS assets, including: 84070
 - (i) PIDs; 84071
 - (ii) Public Address (**PA**) equipment; 84072
 - (iii) customer help points; 84073
 - (iv) audio frequency induction loop; and 84074
 - (v) Metrol telephones; and 84075
 - (c) security assets, including: 84076
 - (i) distributed CCTV cameras (noting that [not disclosed]); and 84077
 - (ii) physical security equipment (such as doors and locks) to be interfaced to an access control system by RSA; 84078
- in accordance with the specification and design provided by the RSA. 84079

6.4 Communications Equipment 84080

Project Co must: 84081

- 6.4.1 specify its backbone cabling and managed services requirements to the RSA; 84082
 - 6.4.2 design and construct the Communication Equipment Rooms (**CER**) and telephone equipment rooms including building services installation and cable containment in accordance with specifications provided by the RSA; 84083
 - 6.4.3 design, supply and install the CSR in accordance with the specification provided by the RSA; 84084
 - 6.4.4 supply and install the following communications equipment: 84085
 - (a) fibre backbone cabling; 84086
 - (b) radio frequency (**RF**) distributed antenna cabling; 84087
 - (c) cable joints; and 84088
 - (d) cable termination panels; 84089
- in accordance with the specification and design provided by the RSA; and 84090

- 6.4.5 install the RF distributed antenna equipment as specified, designed and supplied by the RSA. 84091

6.5 Signalling Equipment 84092

Project Co must: 84093

- 6.5.1 specify to the RSA signalling elements that are affected by underground mechanical systems operations stated in section 9, including: 84094
 - (a) Tunnel ventilation constraints; and 84095
 - (b) platform stopping point. 84096
 - 6.5.2 design and construct the Signalling Equipment Room (**SER**) including building services installation (e.g. LV no-break power, power distribution, lighting, air conditioning, ventilation, cable containment/management and inter room cables) in accordance with specifications provided by the RSA; 84097
 - 6.5.3 design, supply and install the following elements associated with signalling equipment: 84098
 - (a) LV no-break signal power supply; and 84099
 - (b) power distribution; 84100
- in accordance with the specifications provided by the RSA; and 84101
- 6.5.4 supply and install common wayside cabling as specified and designed by the RSA; 84102
 - 6.5.5 install the following signalling wayside equipment: 84103
 - (a) balise; 84104
 - (b) axle counters; 84105
 - (c) LV signalling power subsystem; and 84106
 - (d) HCS radio subsystem (radio units, antennas, cabling and supporting / bracket system) as described in the section D3 Appendix 11 of the Technical Solution. 150515

to be specified, designed and supplied by the RSA. 84107

6.6 Platform Screen Doors (PSDs) 84108

| | |
|---|-------|
| Project Co must: | 84109 |
| 6.6.1 specify and design elements associated with PSD system and provide this design to the RSA as follows: | 84110 |
| (a) platform mounting arrangements for PSDs (including the distance from train and distance along platform) based on PSD fixing details to be provided by the RSA; | 84111 |
| (b) platform civil works (including dimensions); | 84112 |
| (c) earthing and bonding arrangement; | 84113 |
| (d) Station inter-room cables and cable mounts; | 84114 |
| (e) platform cables and cable routes; and | 84115 |
| (f) architectural and structural design to accommodate PSDs; | 84116 |
| 6.6.2 install all components of the PSD system, including the PSDs and local control panels designed and supplied by the RSA, in accordance with installation procedures and inspection test plans agreed with the RSA; | 84117 |
| 6.6.3 conduct its testing and integration obligations in relation to the PSD system, including: | 84118 |
| (a) electrical isolation of the PSD system in the Tunnel from Station earthing system, building services and Station civil structures; | 84119 |
| (b) effectiveness of the PSD system in the tunnel in providing a sealed barrier between the platform and the tunnel; and | 84120 |
| (c) integration of the PSDs with the track, platform and HCMT kinematic envelope. | 84121 |
| 6.7 Rail Control Systems | 84122 |
| Project Co must: | 84123 |
| 6.7.1 provide to the RSA for incorporation into the development of the Control and Monitoring System the design of mechanical systems and control described in section 9; and | 84124 |
| 6.7.2 collaborate and co-ordinate with the RSA for Control and Monitoring System testing and commissioning, system integration and acceptance which will be carried out by the RSA. | 84125 |

7 Stations 84126

7.1 General 84127

Project Co must ensure that the Stations: 84128

7.1.1 facilitate safe and efficient Train Operations; 84129

7.1.2 achieve the State's commitment to high quality integrated design outcomes; 84130

7.1.3 achieve a minimum 5 star GBCA Green Star certified rating; 84131

7.1.4 provide capacity to support the forecast patronage levels and pedestrian movements set out in Appendix B1 of Part B of the PS&TR; 84132

7.1.5 facilitate the efficient movement of passengers; 84133

7.1.6 provide a highly functional transport environment; 84134

7.1.7 provide bicycle parking as set out in Part B of the PS&TR, giving consideration where possible to provision of bicycle parking that is convenient to Station entries and in locations identified both within Station infrastructure and on-street; and 84135

7.1.8 integrate with the public realm designs to ensure a considered and complementary architectural design treatment between the platform and the precinct. 84136

7.2 Arden Station 84137

Arden Station must: 84138

7.2.1 be located west of Laurens Street; 84139

7.2.2 be located and designed to maximise redevelopment potential of the precinct and facilitate the scale of urban renewal anticipated in the Arden Vision and Framework; 84140

7.2.3 include an entrance at Laurens Street (eastern entrance); 84141

7.2.4 include future design provision for proposed entrances on the north and south sides of the Station (western entrances) to tie in with future north south extension of Fogarty Street; 84142

7.2.5 not have any above ground Station infrastructure which could constrain the future extension of Fogarty Street or Queensberry Street; 84143

7.2.6 confine all ancillary ground structures to the entrance/egress locations to minimise negative impacts on the public realm; 84144

7.2.7 locate Station infrastructure underground except where as a result of doing so, there are significant impacts to the efficiency of the infrastructure, maintainability or the footprint of the Station; 84145

7.2.8 be developed to not preclude an OSD (designed and constructed by others) of mixed used development up to 150 metres in height, sited over the Station and Station entrance; and 84146

7.2.9 be developed to support the PS&TR demand with exception of the supply and installation of a third escalator and three gates within the Laurens Street entrance. Future provision of space only for the third escalator and three gates is required to be provided.

7.3 Parkville Station 84147

Parkville Station must: 84148

7.3.1 be located beneath Grattan Street, east of Royal Parade; 84149

7.3.2 include an entrance at Victorian Comprehensive Cancer Centre (VCCC entrance); 84150

7.3.3 include an entrance on the northeast corner of the Royal Parade and Grattan Street intersection (Royal Parade entrance); 84151

7.3.4 include an entrance on the north Grattan Street frontage of the University of Melbourne between the Gate Keeper's Cottage and the Medical Faculty Building 181 (University entrance); 84152

7.3.5 configure the Royal Parade and University entrances to allow all access directly to Grattan Street and/or Royal Parade road reserves, without crossing University of Melbourne land; 84153

7.3.6 include an Unpaid pedestrian subway under Royal Parade; 84154

7.3.7 make design provision for a future 30 metre wide connection to the basement of the proposed re-development of the Medical Faculty Building 181 site; 84155

| | | |
|------------|---|--------|
| 7.3.8 | make design provision for a future entrance into Barry Street to the south of Grattan Street; | 84156 |
| 7.3.9 | make design provision for a platform to platform connection to the future station on the Clifton Hill Metro Tunnel; | 84157 |
| 7.3.10 | provide a design and construction solution at the Royal Parade entrance that does not preclude the construction of 60 metre high OSD and does not preclude OSD with a clearance of eight metres above the existing natural surface; | 84158 |
| 7.3.11 | provide a design and construction solution at the University entrance that does not preclude OSD with a clearance of eight metres above the existing natural surface; and | 84159 |
| 7.3.12 | if any part of the main Station box is located on land acquired from the University of Melbourne, provide a design and construction solution which does not preclude the construction of 60 metre high OSD over the portion of the Station box which is on acquired land. | 84160 |
| 7.4 | CBD North Station | 84161 |
| | CBD North Station must: | 84162 |
| 7.4.1 | be located beneath Swanston Street and north of La Trobe Street; | 84163 |
| 7.4.2 | include an entrance at Franklin Street east (northern entrance); | 84164 |
| 7.4.3 | not preclude a future entry directly into RMIT either through Building 14 or to Bowen Street; | 84165 |
| 7.4.4 | include an entrance at the west side of Swanston Street from corner of La Trobe Street (southern entrance), including Paid pedestrian subway connection to existing Melbourne Central Station concourse and platforms 3 and 4; and | 84166 |
| 7.4.5 | provide for OSD that is integrated with the southern entrance. | 84167 |
| 7.5 | CBD South Station | 84168 |
| | CBD South Station must: | 84168 |
| 7.5.1 | be beneath Swanston Street between Collins Street and Flinders Street; | 84170 |
| 7.5.2 | include an entrance at Federation Square; | 84171 |
| 7.5.3 | include an entrance at City Square – corner Swanston Street and Collins Street (north eastern entrance), and not preclude a future Unpaid pedestrian subway connection to the north-east side of the Collins Street / Swanston Street intersection; | 84172 |
| 7.5.4 | include an entrance at the west side Swanston / Flinders Street (southern entrance), including Paid pedestrian subway connection to existing Flinders Street Station as described in Appendix A5; | 84173 |
| 7.5.5 | make suitable design provision for a potential future station entrance on Collins Street, west of Swanston Street; and | 150516 |
| 7.5.6 | provide for OSD. | 84174 |
| 7.6 | Domain Station | 84175 |
| | Domain Station must: | 84176 |
| 7.6.1 | be located beneath St Kilda Road and south of Park Street; | 84177 |
| 7.6.2 | include an entrance at the Shrine; | 84178 |
| 7.6.3 | include new central island platform (CIP) tram stop on St Kilda Road with Station interchange; | 84179 |
| 7.6.4 | include an entrance at Albert Reserve; | 84180 |
| 7.6.5 | include an Unpaid pedestrian subway connecting east and west sides of St Kilda Road (including gate closure); and | 84181 |
| 7.6.6 | not preclude a future entrance at the southern end of the Station. | 114506 |
| 7.7 | Ticketing Works | 84182 |
| | Project Co must: | 84183 |
| 7.7.1 | specify any necessary spatial or other technical requirements, including requirements for ticketing gate arrangements and location of other ticketing assets such as card vending machines, to enable the Ticketing Works Contractor to design the Ticketing Works; | 84184 |
| 7.7.2 | provide access to and space within the CER to allow the Ticketing Works Contractor to install ticketing racks; | 84185 |

| | | |
|-------|--|-------|
| 7.7.3 | make all other necessary provisions to enable the Ticketing Works Contractor to install the Ticketing Works, including design and installation of: | 84186 |
| (a) | all mounting arrangements; | 84187 |
| (b) | all cabling arrangements, including all associated conduit, brackets, trunking and inter-room cables; | 84188 |
| (c) | power supply, backup and distribution; and | 84189 |
| (d) | earthing and bonding. | 84190 |

| | | |
|------------|---|-------|
| 8 | Fire and Life Safety | 84191 |
| 8.1 | General | 84192 |
| 8.1.1 | Project Co must: | 84193 |
| | (a) develop the fire engineering design in accordance with AS4825:2011, the International Fire Engineering Guidelines 2005 (IFEG) and L1-CHE-INS-056: Fire Engineering Design for Metropolitan Railway Stations; | 84194 |
| | (b) develop a Fire Engineering Brief (FEB) that defines the scope of work for the fire engineering analysis and the basis for analysis that has been agreed with the Metropolitan Fire Brigade (MFB) and all relevant stakeholders; | 84195 |
| | (c) develop a Fire Engineering Report (FER) specific to the Works, including a Trial Design; and | 84196 |
| | (d) certify that the FEB and the FER comply with the PS&TR; | 84197 |
| | in accordance with section 7.12 of Part C of the PS&TR. | 84198 |
| 8.1.2 | Project Co must deliver the Works to meet the objectives and performance requirements set out in section 8 of Part B of the PS&TR, including: | 84199 |
| | (a) fire and life safety systems and infrastructure to: | 84200 |
| | (i) support the emergency management system; | 84201 |
| | (ii) facilitate a safe environment for all people; | 84202 |
| | (iii) facilitate safe evacuation of all people in the event of emergency, including meeting emergency and firefighting access and operational requirements; | 84203 |
| | (iv) support operator safety systems and operating procedures; and | 84204 |
| | (v) minimise the impact of incidents on the existing and new infrastructure. | 84205 |
| | (b) emergency equipment in the Tunnel, Stations and Portals, which may include: | 84206 |
| | (i) wayfinding equipment; | 84207 |
| | (ii) fire detection and alarm system equipment; | 84208 |
| | (iii) occupancy warning and intercom system equipment; | 84209 |
| | (iv) fire hydrants, boosters and hose reel systems; | 84210 |
| | (v) sprinklers; and | 84211 |
| | (vi) fire suppression systems; and | 84212 |
| | (c) the emergency management system. | 84213 |

| | | |
|-------|---|-------|
| 9 | Mechanical systems and control | 84214 |
| 9.1 | General | 85807 |
| 9.1.1 | Project Co must provide appropriate mechanical systems within the Tunnel and Stations, and within the Portals and within any emergency egress structures, including: | 84215 |
| | (a) Station Environmental Control Systems (ECS); | 84216 |
| | (b) Mechanical Ventilation and Air Conditioning (MVAC) systems; | 84217 |
| | (c) Station Smoke Management System (SSMS); | 84218 |
| | (d) Tunnel Ventilation Systems (TVS); | 84219 |
| | (e) Tunnel Ventilation Control System (TVCS); | 84220 |
| | (f) Building Management and Control Systems (BMS); | 84221 |
| | (g) Energy and Water Management Systems (E&WMS); | 84222 |
| | (h) interface with central control and monitoring system; | 84223 |
| | (i) vertical transportation system, including lifts and escalators; | 84224 |
| | (j) plumbing and drainage systems, including drainage pumps (excluding installation of a 1:200 transverse drain within the decline structure and the drainage system downstream of the transverse drain); and | 84225 |
| | (k) Utilities. | 84226 |
| 9.1.2 | Mechanical systems must be integrated with RSA control systems as required. | 84227 |

| | | |
|-------------|--|--------------|
| 10 | Electrical power systems | 84228 |
| 10.1 | Low Voltage (LV) electrical systems | 84229 |
| 10.1.1 | Project Co must provide LV electrical systems, including: | 84230 |
| | (a) LV main switchboards; | 84231 |
| | (b) main distribution boards and distribution boards; | 84232 |
| | (c) mains, submains and sub circuits cabling system; | 84233 |
| | (d) lighting and general power requirements; | 84234 |
| | (e) emergency lighting and exit signage; | 84235 |
| | (f) lighting control systems; | 84236 |
| | (g) uninterrupted power supply (UPS) system; | 84237 |
| | (h) earthing, bonding and surge protection system; and | 84238 |
| | (i) RSA system power supply. | 84239 |
| 10.2 | High Voltage (HV) electrical systems | 84240 |
| 10.2.1 | Project Co must provide the HV system including: | 84241 |
| | (a) power supply related works within terminal stations; | 84242 |
| | (b) 66kV bulk power supply system; | 84243 |
| | (c) intake substation and associated works; | 84244 |
| | (d) 22kV distribution to Tunnel and Stations; | 84245 |
| | (e) 22kV Emergency Power Supply works; | 84246 |
| | (f) Station substations; | 84247 |
| | (g) control and monitoring system; | 84248 |
| | (h) earthing and bonding system; and | 84249 |
| | (i) EMC requirements. | 84250 |
| 10.3 | Traction power | 84251 |
| 10.3.1 | Project Co must provide the traction power system within the Tunnel, Stations and in the Portals to the end of the cut and cover tunnels, including: | 84252 |
| | (a) traction substations; | 84253 |
| | (b) overhead line system and equipment (including the connection of the contact wire to the overhead isolation point within the decline structure); | 84254 |
| | (c) traction power regeneration system; | 84255 |
| | (d) protection system; | 84256 |
| | (e) control and monitoring system; | 84257 |
| | (f) earthing and bonding system; and | 84258 |
| | (g) EMC requirements. | 84259 |

11 Road Works

84260

11.1 General

84261

The Works includes the delivery of all necessary road works, including:

84262

- 11.1.1 the location specific road works described in sections 11.2 to 11.6; 84263
- 11.1.2 all adjustments to any existing roads, footpaths, shared paths, cycleways, tramways, parks, or other publicly accessible areas or streets which are: 84264
 - (a) necessary as a consequence of the Works, the Temporary Works, the Utility Infrastructure Works and Project Activities; or 84265
 - (b) required by the Environmental Requirements; 84266
 - (c) including, as a minimum, reconstruction (to prior condition) or resurfacing of affected parts of streets and roads; 84267
- 11.1.3 all fencing, drainage including subsurface drainage, erosion and sediment control works, earthworks, all structures (including retaining walls and bridges), pavements and planting; 84268
- 11.1.4 all provisions to allow pedestrians, cyclists and disabled persons to use the surrounding transport networks, including footpaths, shared paths, cycleways, bus and road networks, affected by the Works and the Project Activities; 84269
- 11.1.5 all permanent arrangements to allow people and vehicles access to property affected by the Project; 84270
- 11.1.6 access and space, including loading bays, for staff and service vehicles within each Station precinct; 84271
- 11.1.7 adjustments to pavement markings, signs, sign support systems, traffic control signals and street lighting; 84272
- 11.1.8 re-sheeting (but not rebuilding) of all roads where pavement markings are altered; 84273
- 11.1.9 items of street furniture to improve safety (particularly safety barriers) and all fencing and other security measures necessary to prevent unlawful or accidental access to the Works; and 84274
- 11.1.10 all environmental safeguards necessary to mitigate environmental impacts which might arise as a consequence of the use of the roads, as identified in the Environmental Requirements. 84275
- 11.1.11 as a minimum, hardstand areas for parking emergency vehicles at: 137061
 - (a) the Western and Eastern Portals; and
 - (b) entrances to access shafts and Stations.

The location of on-street parking facilities shall be as defined unless otherwise agreed with the State.

150517

11.2 Arden

84276

The road works at Arden include:

84277

- 11.2.1 two Disability Discrimination Act (**DDA**) compliant parking spaces in the vicinity of the Station; 84278
- 11.2.2 provision of two car parking spaces for Train Franchisee staff; 84279
- 11.2.3 Laurens Street (Between Arden Street and Queensberry Street): 84280
 - (a) one general traffic lane each way; 84281
 - (b) on-road cycle lane in each direction; 84282
 - (c) bus zones for northbound and southbound buses within 100 metres of the Station entrance; 84283
 - (d) new signalised pedestrian crossing outside Station; 84284
 - (e) train / tram replacement bus zone for one standard 12.5 metre bus; 84285
 - (f) two taxi spaces / drop off areas; 84286
 - (g) two Kiss and Ride spaces; and 84287
 - (h) one dedicated loading zone. 84288
- 11.2.4 Barwise Street (between Laurens Street and Maintenance Vehicle Access Road): 84289

| | | |
|-------------|---|--------|
| (a) | one general traffic lane each way; | 84290 |
| (b) | emergency access between Barwise Street and the egress points of the Station; | 84291 |
| (c) | pedestrian footpath on the south side; and | 84292 |
| (d) | maintenance access from Barwise Street to the delivery points of the Station. | 150518 |
| 11.3 | Parkville | 84293 |
| | The road works at Parkville include: | 84294 |
| 11.3.1 | provision of two car parking spaces for Train Franchisee staff; | 84295 |
| 11.3.2 | Grattan Street (between Flemington Road and Leicester Street): | 84296 |
| (a) | one general traffic lane in each direction; | 84297 |
| (b) | on-road bicycle lane in each direction; and | 84298 |
| (c) | footpaths both sides. | 84299 |
| 11.3.3 | Grattan Street (between Flemington Road and Elizabeth Street): | 84300 |
| (a) | bus bays on north and south side for 12.5 metre buses; | 84301 |
| (b) | combined loading and drop off spaces for the VCCC; | 84302 |
| (c) | taxi spaces / drop off areas; | 84303 |
| (d) | space for at least four ambulances on north side; and | 84304 |
| (e) | 5-minute parking spaces. | 84305 |
| 11.3.4 | Grattan Street (between Elizabeth Street and Leicester Street): | 84306 |
| (a) | bus bays for 12.5 metre buses; | 84307 |
| (b) | train / tram replacement bus zone for one standard 12.5 metre bus; | 84308 |
| (c) | loading areas for emergency/maintenance vehicles; | 84309 |
| (d) | Barry Street to be closed to traffic between Grattan Street and Pelham Street; and | 84310 |
| (e) | new enhanced crossing between in a location to be agreed with stakeholders. | 84311 |
| 11.3.5 | Elizabeth Street (between Grattan Street and Haymarket Roundabout/ intersection): | 84312 |
| (a) | two general traffic lanes in each direction, transitioning to three lanes to ensure satisfactory operation of Haymarket Roundabout/ intersection; | 84313 |
| (b) | separate northbound motor vehicle right turn lane into Grattan St (not on tram tracks); | 84314 |
| (c) | on-road cycle lane in each direction; | 84315 |
| (d) | no parking on the west side; | 84316 |
| (e) | loading zone on the nearside kerb on the eastern side (as existing); | 84317 |
| (f) | pedestrian access to Haymarket Walk permitted on the eastern side; and | 84318 |
| (g) | VCCC access on western side of Royal Parade to be maintained. | 84319 |
| 11.3.6 | Royal Parade (between Grattan Street and Melbourne Private Hospital access): | 84320 |
| (a) | two general traffic lanes in each direction; | 84321 |
| (b) | on-road cycle lane in each direction (bluestone pitcher channel removed on both sides of the road); | 84322 |
| (c) | no parking on the east side; | 84323 |
| (d) | one bus stop on the eastern side; | 84324 |
| (e) | two bus stops on the western side (north of Melbourne Private access route); | 84325 |
| (f) | one pedestrian crossing removed and one added between Grattan Street and Story Street; | 84326 |
| (g) | access to Melbourne Private Hospital permitted on the western side; | 84327 |
| (h) | retained functionality of Royal Melbourne Hospital car park access; and | 84328 |
| (i) | ambulance entrance into Royal Melbourne Hospital emergency department. | 84329 |
| 11.4 | CBD North | 84330 |
| | The road works at CBD North, subject to public consultation, include: | 84332 |
| 11.4.1 | provision of three car parking spaces for Train Franchisee staff; | 84333 |
| 11.4.2 | train / tram replacement bus zone for one standard 12.5 metre bus; | 84334 |
| 11.4.3 | Swanston Street (between Victoria Street and Franklin Street): | 84335 |

| | | |
|--------|---|--------|
| | (a) one traffic lane in each direction; | 84336 |
| | (b) on-road cycle lane in each direction; and | 84337 |
| | (c) indented parking/loading zone on the east side outside City Baths as agreed with the City of Melbourne. | 84338 |
| 11.4.4 | Swanston Street (between Franklin Street and La Trobe Street): | 84339 |
| | (a) no motor vehicle access between Franklin Street and Little La Trobe Street; | 84340 |
| | (b) between Little La Trobe Street and La Trobe Street: | 84341 |
| | (i) one northbound traffic lane allowing one way left turn access into Little La Trobe Street from Swanston Street; | 84342 |
| | (ii) no motor vehicle access southbound between Little La Trobe Street and La Trobe Street; | 117984 |
| | (iii) indented loading zone on the west side; and | 84343 |
| | (iv) one DDA compliant parking space on the west side; | 84344 |
| | (c) sufficient loading bays to service businesses on Swanston Street; | 117985 |
| | (d) dedicated bicycle lanes in each direction; and | 84345 |
| | (e) tram stops extended closer to the new pedestrian crossing on Franklin Street. | 84346 |
| 11.4.5 | Franklin Street (between Victoria Street and Swanston Street): | 84347 |
| | (a) one dedicated eastbound bicycle lane and (subject to Station design) one westbound bicycle lane; | 84348 |
| | (b) one traffic lane in each direction (westbound lane shared use by motorists and cyclists); | 84349 |
| | (c) two indented DDA compliant parking spaces on the north side; | 84350 |
| | (d) indented parking on the north side as agreed with the City of Melbourne; and | 84351 |
| | (e) angled driveway into RMIT access at Building 14. | 84352 |
| 11.4.6 | Franklin Street (between Swanston Street and Elizabeth Street): | 84353 |
| | (a) one traffic lane in each direction; | 84354 |
| | (b) on-road dedicated bicycle lane in each direction; | 84355 |
| | (c) indented parking / loading on both sides of road as agreed with the City of Melbourne; and | 84356 |
| | (d) existing central parking removed. | 84357 |
| 11.4.7 | A'Beckett Street (between Swanston Street and Stewart Street): | 84358 |
| | (a) no vehicle access between Stewart Street and Swanston Street; | 84359 |
| | (b) existing on-street parking (3x north side and 2x south side) to be removed; | 84360 |
| | (c) appropriate access provided to RMIT and Citipower on south side; and | 117995 |
| | (d) vehicle access provided to the A'Beckett Towers carpark on south side. | 84361 |

11.5 CBD South

| | | |
|--------|---|-------|
| | The road works at CBD South include: | 84363 |
| 11.5.1 | train / tram replacement bus zone for one standard 12.5 metre bus; | 84364 |
| 11.5.2 | provision of four car parking spaces for Train Franchisee staff; | 84365 |
| 11.5.3 | Collins Street / Swanston Street intersection: | 84366 |
| | (a) wider pedestrian crossings at the intersection; and | 84367 |
| | (b) change method of control to a scramble crossing as agreed with PTV and the City of Melbourne. | 84368 |
| 11.5.4 | Flinders Street: | 84369 |
| | (a) Not used; | 84370 |
| | (b) provision for right turning trams into Elizabeth Street; and | 84371 |
| | (c) integration with proposed streetscape improvements in the immediate vicinity of the Works, including: | 84372 |
| | (i) the Elizabeth Street South Streetscape Improvement Plan (City of Melbourne); and | 84373 |
| | (ii) the Flinders Street Station upgrade project (PTV). | 84374 |

| | |
|---|--------|
| 11.6 Domain | 84375 |
| The road works at Domain include: | 84376 |
| 11.6.1 construction staging road works to facilitate construction of Domain Station, including multiple temporary configurations of St Kilda Road from Construction Stage 4 onwards; | 118080 |
| 11.6.2 provision of two car parking spaces for Train Franchisee staff; | 84377 |
| 11.6.3 St Kilda Road (between Dorcas Street and Park Street): | 84378 |
| (a) a road layout that provides an appropriate transition from the existing layout to the new configuration; | 84379 |
| (b) on-road cycle lane in each direction of a standard commensurate with St Kilda Road's status as a Bicycle Priority Route (BPR) and aligned with the St Kilda Road Safety Improvement Study; and | 84380 |
| (c) existing parking (all types) to be maintained where possible. | 84381 |
| 11.6.4 St Kilda Road (between Park Street and Toorak Road West / Kings Way): | 84882 |
| (a) a road functional layout that: | 84383 |
| (i) is in accordance with the modal priorities set out in Appendix B4 to Part B of the PS&TR; | 84384 |
| (ii) is to the satisfaction of relevant stakeholders including VicRoads, the City of Melbourne, the City of Port Phillip; the Tram Franchisee and PTV; | 84385 |
| (iii) provides an on-road cycle lane in each direction of a standard commensurate with St Kilda Road's status as a BPR and aligned with the St Kilda Road Safety Improvement Study; | 84386 |
| (iv) enhances the St Kilda Road boulevard; and | 84387 |
| (v) provides a maximum of three general traffic lanes in each direction (final lane configuration to be agreed with VicRoads); | 84388 |
| (b) pedestrian crossings at either end of the CIP tram stop; | 84389 |
| (c) removal of pedestrian crossings at Domain Interchange; | 84390 |
| (d) removal of redundant existing pedestrian crossings at the new CIP tram stop; | 84391 |
| (e) one emergency vehicle stopping area; | 84392 |
| (f) provision of off peak car parking; and | 84393 |
| (g) one bus stop in each direction south of Albert Road (south) intersection. | 84394 |
| 11.6.5 Albert Road (North and South Section of the Triangle): | 84395 |
| (a) North Section: | 84396 |
| (i) one traffic lane in each direction; | 84397 |
| (ii) one cycle lane in each direction; | 84398 |
| (iii) north side of the road as reconfigured; | 84399 |
| (iv) train/tram replacement bus zone for one standard 12.5 metre bus; | 84400 |
| (v) 30 metre taxi zone; | 84401 |
| (vi) two loading bays for Station service vehicles; and | 84402 |
| (vii) one DDA compliant drop off bay. | 150520 |
| (b) South Section: | 84403 |
| (i) no access to and from St Kilda Road, except as specified in (ii) below; | 84404 |
| (ii) allow for local access from Albert Road South to St Kilda Road, including from Domain Apartments (1 Albert Road); | 84405 |
| (iii) parking removed on both sides; and | 84406 |
| (iv) one traffic lane in each direction including as part of a shared zone between Albert Road North and 91 Albert Road. | 84408 |

| | | |
|-------------|---|--------------|
| 12 | Tram Works | 84409 |
| 12.1 | General | 84410 |
| 12.1.1 | All overhead power works will be undertaken by the Tram Franchisee. | 84411 |
| 12.2 | Parkville | 84412 |
| | The tram works at Parkville include: | 84413 |
| 12.2.1 | construction staging tram works at Royal Parade to facilitate construction of Parkville Station pedestrian underpass linking to the VCCC entry/exit, including: | 84414 |
| | (a) reconfiguration of the road layout to manage traffic flow around the Station; and | 84415 |
| | (b) removal of the existing tram stops directly north and directly south of Grattan Street along Royal Parade; and | 84416 |
| 12.2.2 | replacement of stop 10 on tram route 19 with a new DDA compliant platform stop serving trams in both directions on Royal Parade. | 84417 |
| 12.3 | CBD South | 84418 |
| | The tram works at CBD South include: | 84419 |
| 12.3.1 | new tram curves at the intersection of Flinders Street and Elizabeth Street to allow trams to move between Elizabeth Street and Flinders Street (East of Elizabeth Street) in both directions, with analysis to confirm pedestrian priority is maintained at the Elizabeth / Flinders Street intersection and that tram delays through the intersection are minimised as far as practicable, to the satisfaction of PTV. The Works are to maintain existing east-west tram movements along Flinders Street however no allowance should be made for an east and/ or west bound dedicated track at the intersection of Elizabeth and Flinders Street; | 84420 |
| 12.3.2 | Not used; and | 84421 |
| 12.3.3 | tram overhead works on Swanston Street to provide overhead wire support structures currently connected to buildings proposed to be acquired and demolished as part of the Works at the southern entrance. | 84422 |
| 12.4 | Domain | 84423 |
| | The tram works at Domain include: | 84424 |
| 12.4.1 | construction staging tram works on St Kilda Road to facilitate construction of Domain Station, including multiple temporary configurations of dual track (including a section of triple track south of Park Street suitable for two B class trams clear of the main line, including allowance for 2.0m clearance between trams); | 84425 |
| 12.4.2 | reinstatement of tram tracks along St Kilda Road to their legacy alignment following construction of Domain Station, including 770m of new dual track along St Kilda Road between Kings Way and Park Street; | 84426 |
| 12.4.3 | new CIP at-grade DDA compliant Domain Interchange tram stop south of St Kilda Rd/ Domain Road intersection to replace the existing interchange that will be removed as part of the construction staging works; and | 84427 |
| 12.4.4 | reinstatement of tram infrastructure along Domain Road once the relevant part of the Works is completed unless otherwise agreed with PTV. | 84428 |

13 Utility Infrastructure Works

84429

13.1.1 Project Co must design and construct all necessary Utility Infrastructure Works including:

84430

- (a) the protection, repair, relocation or adjustment of Utility Infrastructure and infrastructure related to Utility Infrastructure that is affected by the D&C Activities; 84431
- (b) the permanent reinstatement of Utility Infrastructure temporarily relocated by the Early Works Managing Contractor as set out in Appendix B5 to Part B of the PS&TR, noting in particular that all temporary utility diversions through the University of Melbourne and the Shrine of Remembrance grounds must be reinstated in the road reserve where possible; 84432
- (c) all environmental safeguards and measures necessary to mitigate environmental effects which may arise during the design and construction of the Utility Infrastructure Works; 84433
- (d) the preservation of Utility Infrastructure and infrastructure related to Utility Infrastructure throughout the construction of the Works and the Temporary Works; and 84434
- (e) the provision of all Utility Infrastructure connections required to undertake the Works. 84435

Appendix A2: System Breakdown Structure

1 The Metro Tunnel system

85760

The Metro Tunnel system delivered by the Metro Tunnel and the scope allocation between Work Packages is captured in a SBS, together with an associated Scope Allocation Matrix (**SAM**). The SBS represents a physical hierarchical breakdown of the Metro Tunnel to a sufficient level of detail to support the scope and requirements allocation between Work Packages. The SBS and SAM contain the same information; the SAM takes precedence in the event there is an inconsistency. They assign the scope for each system element to the responsible party or parties for each Lifecycle stage of the Metro Tunnel. The party responsible for Operating and Maintaining each system element is also captured. Due to the allocation of scope in some instances varying by geographic area, some system elements may be allocated to multiple parties for specific Lifecycle stages.

85762

The physical breakdown of the Metro Tunnel captured in the SBS is broken into significant system segments as follows:

85763

(a) Underground area

85764

This system segment is the new greenfield component of the Metro Tunnel, creating new Tunnel and Stations, and integrating a range of systems and civil works with the existing Sunbury line and the Pakenham / Cranbourne line, to form the new Sunshine – Dandenong Line. Project Co has scope in this system segment.

(b) Surface areas (Sunshine – Dandenong Line)

85765

This system segment comprises the brownfield environment along the rail corridor and integrates a range of upgrades and new works, supporting delivery of the overall Metro Tunnel. Project Co does not have scope in this system segment.

(c) Rail control systems

85766

This system segment integrates applicable rail network control systems. It includes the extension and upgrade of existing systems and operational support capabilities for the Sunshine – Dandenong Line. It also includes the establishment of new control systems including a High Capacity Signalling (**HCS**) system. Project Co has scope in this system segment.

(d) HCS initial implementation

85767

This system segment includes HCS works on the South Morang line, which contributes to the initial implementation of Communications Based Train Control (**CBTC**) on the Metropolitan Rail Network. Project Co does not have scope in this system segment.

(e) Other lines

85768

The general uplift of train services available as a result of Metro Tunnel includes scope on other rail corridors to realise service benefits. Project Co does not have scope in this system segment.

(f) Other modes

85769

Other transport modes such as bus, train, road and bicycle.

Each system segment is broken down into a lower set of systems/subsystems to facilitate scope definition. Project Co is responsible and must further develop the relevant parts of the SBS to a sufficient level of detail in order to identify individual configuration items. The individual items identified in the SBS are referred to as system elements. A system element may be a configuration item, a component, an assembly, subsystem or entire system.

85770

2 Lifecycle Phases

85771

The system Lifecycle phases are shown in Figure 1 below, and have the meaning given in Table 2 only for the purposes of this Appendix A2 (which includes the SBS and the SAM) and Appendix A3 (which includes the IDS).

85772

It is important to note that due to the iterative and incremental nature of testing and integration these stages may occur at different times and in different sequence dependent on the situation. Likewise, the system following the Acceptance stage enters the Operate and Maintain phases concurrently.

Figure 1: System Lifecycle stages

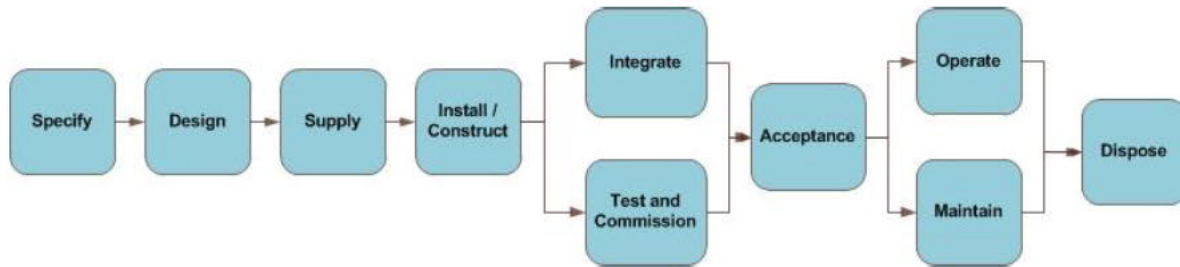

Table 2: Lifecycle phases

| Phase | Description |
|----------------------------|---|
| Specify | The Specify phase involves the development of detailed interface, safety, function, performance and operational requirements for a particular system element, as required to ensure the Design phase is fully informed and has all relevant inputs. In some cases, the Specify phase requires the provision of interface and operational information from one Work Package to another. In these cases, the level of information required needs to be resolved jointly between the parties. |
| Design | <p>The Design phase:</p> <ul style="list-style-type: none"> (a) is the process of taking the input specification through an engineering process of analysis, investigation of alternatives against selection criteria and evaluation of the requirements to develop an optimal solution; (b) may also include the design of interfaces with other Work Packages or external stakeholders, and this has to be coordinated between both interface parties; (c) output is captured typically as part of a design package delivering drawings, reports, installation, construction or product specifications to enable the design to be implemented/constructed; (d) must take into account all applicable Lifecycle stages of a system or subsystem from procurement, deployment or construction, testing, operation, maintenance, obsolescence, replacement and disposal; and (e) includes a number of stages each requiring delivery of Verified design artefacts that are subject to external Stakeholder and client review. The final stage of the Design phase is the acceptance of the design as ready to construct and delivery of Issued For Construction (IFC) design packages and applicable construction or installation specifications. |
| Supply | The Supply phase involves the process of procuring products and services based on specifications developed through the Design phase. It also includes delivery of procured items to required locations in a timely manner. |
| Install | The Install phase is the process of implementing an approved design or designs using design package information including specifications, drawings, processes and procedures. It includes installation, construction activities, equipment checks, and inspections as required. It also includes completion and Verification of installation works via associated Inspection and Test Plans. |
| Test and Commission | The Test and Commission phase involves setting the subsystem equipment to work, and conducting Verification and Validation of the requirements with either factory or site testing. Commissioning is the process of handing over the subsystem equipment over to the Rail Transport Operator (RTO) for use. The RTO may be able to use the asset for use in revenue services if all the Integration activities associated with the subsystem have been completed. |

| Phase | Description |
|---|---|
| Integrate/ Integration | The Integrate phase involves the process of interconnecting multiple internal and external subsystems through undertaking Verification and Validation of the system interfaces to establish higher level functionality. |
| Acceptance | The Acceptance phase includes the fulfilment of all relevant completion activities and formal acceptance of a system or parts thereof by the Asset Owner. This follows the completion of all required works and includes testing witnessed by the applicable Stakeholders. Acceptance generally follows the Test and Commission and Integrate phases and may be achieved in stages, incrementally and/or iteratively depending on how system functionality is delivered and integrated. |
| Maintain | The Maintain phase concerns the preventative and corrective maintenance of all installed assets to ensure the reliability and availability targets are achieved. |
| Operate | The Operate phase concerns the day to day operation of the assets. |
| Decommissioning and Disposal | As part of the Lifecycle, certain existing equipment is made redundant by the new systems and is not required to be retained. This equipment is decommissioned and removed from service. As part of the Decommission and Disposal phase, the decommissioned equipment is suitably disposed. This may involve the reuse of the equipment elsewhere (where this option is available) through to the environmentally friendly disposal of the equipment. |

85775

The legend for the party responsible for the system segments and system elements for each Lifecycle stage is illustrated in the SBS and in Figure 2 below:

| | Appendix B5: Temporary Utility Diversions | 105 |

| | | |
|-------|---|-------|
| 1 | Reference Datum | 85808 |
| 1.1 | Coordinates and Levels | 85809 |
| 1.1.1 | Co-ordinates | 85810 |
| | All co-ordinates must be related to Metro Tunnel Survey Control Network, MGA Zone 55, Map Grid of Australia 1994 (Universal Transverse Mercator (UTM) Zone 55 projection based on Geocentric Datum of Australia 1994 (GDA94)). | 85811 |
| 1.1.2 | Levels | 85812 |
| (a) | All levels for the Tunnels, Stations and Portals must be to the Melbourne Metro Height Datum (MMHD). | 85813 |
| (b) | The MMHD datum (i.e. origin) must be distinguished from the associated levels (i.e. height values) as follows: | 85814 |
| i. | Datum | 85815 |
| | MMHD must be 100m below Australian Height Datum (AHD) so that all level values are positive (i.e. MMHD = AHD - 100m). | |
| ii. | Reduced level | 85816 |
| | Where the MMHD is adopted all reduced levels must refer to the Melbourne Metro Reduced Level (MMRL) (i.e. MM RL = AHD RL + 100m). | |
| (c) | The datum (MMHD and AHD) and reduced level (MMRL and RL) must be clearly shown on the Design Documentation together with the correlations as described above. | 85817 |
| (d) | All design rail levels must be that of the low rail. | 85818 |
| (e) | All levels of the existing rail network that must be to AHD. | 85819 |
| | | 85820 |
| 1.2 | Kilometrage (Chainage) | |
| 1.2.1 | General | 85821 |
| | Kilometrage must be quoted in metres to three decimal places as measured along the control string located centrally between the gauge points at top of each rail in plan with no correction for differences in elevation. | 85822 |
| 1.2.2 | Datum | 85823 |
| (a) | A datum point for the new line section between South Kensington and South Yarra must be established at Maribyrnong River Bridge on the Main Suburban line based on the existing kilometrage value at the centre of the bridge as defined in PTV PASS Assets (Kilometrage: 4.240km, Easting: 316560.190, Northing: 5814536.713). | 85824 |
| (b) | The new line section between South Kensington and South Yarra must adopt a line prefix of "MDE" for the eastern track and "MDW" for the western track. | 85825 |
| (c) | In the absence of a track alignment between the datum point and the start of the Project Co track system, Project Co must assume a track alignment that runs parallel to the existing Main Suburban Line. | 85826 |
| (d) | New signalling, track and electrical assets must adopt the existing naming convention of line prefix plus asset kilometrage value in 100s of metres. | 85827 |
| (e) | Track, signalling, overhead and any other relevant assets must adopt the same kilometrage datum. | 85828 |
| (f) | The new line section between South Kensington and South Yarra must adopt track code for eastern track 745555 and for the western track 746666. | 85829 |

| | | |
|------------|--|-------|
| 2 | General Technical Requirements | 85830 |
| 2.1 | Passenger Demand | 85831 |
| 2.1.1 | Project Co must utilise the passenger demand forecasts and parameters provided in Appendix B1 for the purpose of Station planning and determining pedestrian Levels of Service. | 85832 |
| 2.1.2 | Project Co must demonstrate that Station designs satisfy the Level of Service requirements listed in section 7.4. | 85833 |
| 2.2 | Service and Operations | 85834 |
| 2.2.1 | General | 85835 |
| | (a) The Tunnels, Stations and Portals must support service levels of 24 trains per hour. | 85836 |
| | (b) The Tunnels, Stations and Portals must be capable of continuous 24-hour operation: | 85837 |
| | i. between the first timetabled service on Friday and the last timetabled service on Sunday; | 85838 |
| | ii. on five (5) single days of the year; | 85839 |
| | iii. over four (4) consecutive days; and | 85840 |
| | iv. at Peak Service levels. | 85841 |
| | (c) The design of the Tunnels, Stations and Portals must support the operation of, and be compatible with: | 85842 |
| | i. High Capacity Metro Trains (HCMTs); | 85843 |
| | ii. a progressive change to the future operation from HCMTs to Extended HCMTs without interruption to services; | 85844 |
| | iii. mixed HCMT and Extended HCMT operations; and | 85845 |
| | iv. Extended HCMTs. | 85846 |
| | (d) [Not disclosed] | 85847 |
| | (e) The traction power system must be designed based on the operation of Extended HCMTs. | 85848 |
| 2.2.2 | Transit times | 85849 |
| | The design of the Tunnels, Stations and Portals must support the achievement of the following start to stop transit times when measured from departure station to arrival station for HCMTs: | 85850 |
| | (a) West direction: | 85851 |
| | i. Hawksburn to Domain must not exceed 210 seconds; | 85852 |
| | ii. Domain to CBD South must not exceed 140 seconds; | 85853 |
| | iii. CBD South to CBD North must not exceed 80 seconds; | 85854 |
| | iv. CBD North to Parkville must not exceed 110 seconds; | 85855 |
| | v. Parkville to Arden must not exceed 110 seconds; and | 85856 |
| | vi. Arden to Footscray must not exceed 200 seconds. | 85857 |
| | (b) East direction: | 85858 |
| | i. Footscray to Arden must not exceed 200 seconds; | 85859 |
| | ii. Arden to Parkville must not exceed 110 seconds; | 85860 |
| | iii. Parkville to CBD North must not exceed 110 seconds; | 85861 |
| | iv. CBD North to CBD South must not exceed 80 seconds; | 85862 |
| | v. CBD South to Domain must not exceed 150 seconds; and | 85863 |
| | vi. Domain to Hawksburn must not exceed 200 seconds. | 85864 |
| | (c) The above start to stop transit times are modelled based on the following HCMT | 85865 |

| | | |
|-------|--|-------|
| | parameters: | |
| | i. average acceleration = 0.88m/s^2 ; and | 85866 |
| | ii. average braking = -0.88m/s^2 . | 85867 |
| 2.2.3 | Inherent Availability | 85868 |
| | The Tunnels, Stations and Portals must support Inherent Availability as follows: | 85869 |
| | (a) track system: [Not disclosed] %; | 85870 |
| | (b) traction system: [Not disclosed]%; and | 85871 |
| | (c) ventilation system: [Not disclosed]%. | 85872 |
| 2.2.4 | Operational Availability | 85873 |
| | (a) The Tunnels, Stations and Portals must be designed to achieve an aggregate Operational Availability of: | 85874 |
| | i. [Not disclosed]% or greater, where a service-affecting failure is defined as one or more Fitted revenue train trips individually accumulating a 3 to 5-minute delay beyond the timetabled runtime for duration of the asset outage causing the delays, in one or both traffic directions; | 85875 |
| | ii. [Not disclosed]% or greater, where a service-affecting failure is defined as one or more Fitted revenue train trips individually accumulating a greater than 5-minute delay beyond the timetabled runtime for duration of the asset outage causing the delays, in one or both traffic directions; | 85876 |
| | iii. [Not disclosed]% or greater, where a service-affecting failure is defined as one or more Fitted revenue trains being held continuously at stop for duration of the asset outage causing the stoppage, in one traffic direction; and | 85877 |
| | iv. [Not disclosed]% or greater, where a service-affecting failure is defined as one or more Fitted revenue trains being held continuously at stop for duration of the asset outage causing the stoppage, in both traffic directions. | 85878 |
| | (b) The Project Assets in each Station must achieve an aggregate Operational Availability of: | 85879 |
| | i. [Not disclosed]%, where a Station Operation failure is defined as any passengers using escalators within a station being delayed for greater than 1 minute, caused by an asset outage; | 85880 |
| | ii. [Not disclosed]%, where a Station Operation failure is defined as any mobility impaired passengers moving between levels using a lift within a station being delayed for greater than 3 minutes, caused by an asset outage; and | 85881 |
| | iii. [Not disclosed]%, where a Station Operation failure is defined as station closure for any period, caused by an asset outage. | 85882 |
| | (c) The Tunnels, Stations and Portals must be designed to support the Operational Control Systems for the Design Year services at Day-1. | 85883 |
| 2.2.5 | Resilience | 85884 |
| | (a) The design must incorporate resilience to allow for continued operation (either partial or complete services), and must consider operational interventions that mitigate the impact of incidents on customers and facilitate restoration of scheduled service so far as is reasonably practicable (SFAIRP). | 85885 |
| | (b) Systems automation in all operating modes must support the safe and efficient outcome with minimal human involvement and be informed by a human factors study. | 85886 |
| | | 85887 |
| 2.3 | Infrastructure and Systems | |
| 2.3.1 | New or modified infrastructure and systems forming part of the Works must: | 85888 |
| | (a) adopt solutions that are based on industry standards that are established and non-proprietary; | 85889 |
| | (b) integrate with the existing infrastructure and systems; | 85890 |
| | (c) be compatible with the existing infrastructure and systems; | 85891 |

| | | |
|------------|--|--------|
| | (d) not result in a degradation of service delivery performance of existing infrastructure, including during construction; | 85892 |
| | (e) not degrade the system performance of the existing infrastructure and systems; | 85893 |
| | (f) use common system architectures and components; | 85894 |
| | (g) be accessible for maintenance and renewals; and | 85895 |
| | (h) provide safe access for maintenance and renewals. | 85896 |
| 2.3.2 | The monitoring and control systems provided for the Tunnels, Stations and Portals must be compatible with existing systems. | 85897 |
| 2.3.3 | The design of the Tunnels, Stations and Portals must provide access to existing infrastructure and services at Melbourne Central Station (MCS) and Flinders Street Station (FSS). | 85898 |
| 2.3.4 | Existing infrastructure made redundant by the Works must be removed. | 85899 |
| 2.3.5 | [Not disclosed] | 85900 |
| 2.3.6 | The design of new systems must minimise, where reasonable to do so, the propagation of a failure of one system onto others. | 85901 |
| 2.3.7 | Any new assets (products) in the design that are: | 85902 |
| | (a) deemed safety or service critical must obtain Type Approval in accordance with MTM standard L1-CHE-PRO-004 - Type Approval Procedure and AS 7702 – Rail Equipment Type Approval; or | 85903 |
| | (b) not deemed safety or service critical must obtain Engineering Product Approval in accordance with MTM standard L1-CHE-PRO-004 - Type Approval Procedure. | 85904 |
| 2.3.8 | Project Co must actively liaise with the HCMT team to develop the design of the Works in accordance with High Capacity Metro Trains Project Interface Control Document and ensure that the Works support safe and reliable operation of HCMTs under all operating modes. | 118049 |
| 2.4 | Future Development | 85905 |
| 2.4.1 | Infrastructure and systems must be designed to support planned upgrades and improvements, including: | 85906 |
| | (a) the design of the Tunnels and Stations must make provision for the Clifton Hill Metro Tunnel, including future heavy rail interchange at Parkville Station; and | 85907 |
| | (b) the design of the Tunnels and Stations must not preclude a future underground rail tunnel from Domain to Caulfield connecting in the vicinity of St Kilda Road and Fawkner Park. | 85908 |
| 2.4.2 | The design of the Tunnel and Stations must not preclude a future South Yarra Station interchange. | 122795 |
| 2.4.3 | Future development options identified for the network must be facilitated and preserved, and the design must not preclude: | 85909 |
| | (a) a future grade separated connection to Rowville at Huntingdale; | 85910 |
| | (b) a future connection to Melbourne Airport at Albion; and | 85911 |
| | (c) a future connection to Clyde at Cranbourne. | 85912 |
| 2.5 | Access and Maintenance | 85913 |
| 2.5.1 | The design must support access, inspection, maintenance and renewal activities. | 85914 |
| 2.5.2 | The design must consider practical inspection methods within the operating constraints of the railway, and must be approved by the RTO. | 85915 |
| 2.5.3 | The design must ensure all equipment installed (as far as is reasonably practical): | 85916 |
| | (a) is accessible during operational hours; | 85917 |
| | (b) mitigates against adverse impacts in the event of replacement, including impacts on operations; and | 85918 |
| | (c) does not require access through third party land. | 85919 |
| 2.5.4 | Access to critical railway infrastructure must be provided for in the design of all | 85920 |

| | | |
|--------|---|-------|
| | infrastructure. | |
| 2.5.5 | [Not disclosed] | 85921 |
| 2.5.6 | [Not disclosed] | 85922 |
| 2.5.7 | The design must consider the requirements for replacement services in the event of planned works, including maintenance, planned cancellations or line closures, where appropriate. | 85923 |
| 2.5.8 | The design must ensure that the access arrangements in the temporary and permanent condition do not worsen the level of service for customers. | 85924 |
| 2.5.9 | Maintenance access to retained public transport infrastructure that existed prior to the Works must be the same, improved or as otherwise agreed with the State. | 85925 |
| 2.5.10 | [Not disclosed] | 85926 |

3 Design Life and Residual Life

85927

3.1 Design Life

85928

3.1.1 General

85929

- (a) Each Design Life Asset must have a minimum Design Life as set out in Table 3-1 unless a Reference Document specifies a higher Design Life, in which case the Reference Document will prevail. 85930
- (b) Notwithstanding the minimum Design Life requirements, the components listed in Table 3-2 may have a Design Life as detailed in Table 3-2.
- (c) If a Design Life Asset is not listed in Table 3-1 or 3-2 then its Design Life must be equal to the Design Life of the Asset of which it forms a part, as outlined in Table 3-1. 85931
- (d) If a Design Life Asset can be classified in more than one Design Life Asset description, then the higher Design Life must apply to that Design Life Asset. 85932
- (e) When a Design Life Asset or Design Life Asset component is replaced, the replacement Design Life Asset or Design Life Asset component must meet the Design Life requirement of the Design Life Asset or Design Life Asset component it has replaced. 85933
- (f) Where part of a Design Life Asset is not readily accessible, it must satisfy the Design Life requirements of the Asset of which it forms a part. 85934
- (g) All Returned Assets must have ongoing supplier support for mechanical, electrical and control Design Life Assets at Handback. 85935

3.2 Residual Life

85936

3.2.1 General

85937

- (a) Residual Life means, in respect of an Asset, the remaining Design Life at the end of the Term. 85938
- (b) Each Asset must have a Residual Life as follows: 85939
 - i. for Assets with a required Design Life greater than the duration of the Maintenance Phase, the greater of: 85940
 - (1) the required Design Life for that Asset less the duration of the Maintenance Phase; and 85841
 - (2) 5 years; and 85842
 - ii. for any other Assets, the greater of: 85843
 - (1) 50 percent of the Design Life requirement; and 85844
 - (2) 5 years. 85845
- (c) Tables 3-1 and 3-2 below outline indicative component Design Life. Where applicable, selected equipment Design Life will need to satisfy the RAMS requirements outlined in Volume 2, Part B, Section 2.2.3, 2.2.4 and 2.2.5. 150432

Table 3-1: Asset Minimum Design Life Requirements

| Asset Description | Design Life |
|---|-------------|
| Civil | |
| All underground structures and foundation elements in the Tunnels, Stations and Portals, including Station / Tunnel waterproofing systems, structural linings, portal structures, decline structures, retaining structures, shafts, cross passages and drainage elements. | 100 years |
| All above ground building structures | 50 years |
| Earthing and bonding system | 100 years |
| Architectural | |
| Architectural cladding | 40 years |
| Internal and external paint finishes | 10 years |
| Ceramic tiles, Quarry tiles, Terrazo, Marble Floor Finishes | 50 years |
| Mechanical Plant | |
| Tunnel ventilation fans | 30 years |
| Fire main pipework | 30 years |
| Sprinkler systems | 20 years |
| Drainage pumps | 15 years |
| Electrical Equipment | |
| Switchgear | 20 years |
| Transformers | 30 years |
| UPS sets | 15 years |
| Batteries | 5 years |
| Vertical Transportation | |
| Escalators | 20 years |
| Lifts | 20 years |
| Track | |
| Ballast-less track-form / track-bed, including floating slab track, resilient bearings and derailment containment | 100 years |
| First Stage Concrete | 100 years |
| Trackwork, including rail, fixings and fasteners (excluding resilient rail fasteners for high noise and vibration attenuation), concrete sleepers and bearers, ballast, turnouts and crossings | 50 years |
| Resilient rail fasteners for high noise and vibration attenuation | 30 years |
| Floating slab track bearings | 50 years |
| Communications | |
| Power SCADA (for traction power and HV power systems) | 20 years |
| Fire Alarm and Detection Systems | |
| Control equipment | 20 years |
| Detectors – in Tunnels | 5 years |
| Detectors – in Stations and elsewhere | 10 years |
| Sound absorption | |

| | |
|--------------------------|----------|
| Components and materials | 25 years |
|--------------------------|----------|

Table 3-2: Component Design Life Requirements

| Component | Sub-component | Design Life |
|---|-----------------------------------|------------------------|
| Ventilation System – Tunnel Ventilation | | |
| Ventilation Fans - Jet Fans and Axial Fans | | |
| | Support steel | 30 years |
| | Fan Motor | 20 years |
| | Bearings | L10 40000h or 10 years |
| | Impeller | 30 years |
| | Vibration Sensor | 10 years |
| | Winding temperature sensor | 10 years |
| | Bearing temperature sensor | 10 years |
| | Differential Pressure Transmitter | 10 years |
| Sound Attenuators | | |
| | Structure | 26 years |
| | Attenuator splitter | 26 years |
| | Attenuator fixings | 26 years |
| Dampers | | |
| | Damper | 30 years |
| | Actuator | 10 years |
| | Bearings | 10 years |
| | Limit switches | 10 years |
| Hydraulic Pumping – Pump Station | | |
| General | | |
| | Level Sensor | 10 years |
| | pH sensor | 10 years |
| | Pressure sensor | 10 years |
| | Hydrocarbon sensor | 10 years |
| Pump | | |
| | Bearings | 4 years |
| | Gasket | 4 years |
| | Motor | 15 years |
| Valves | | 20 years |
| Pipework | | 20 years |
| Building and Plant Equipment - Mechanical Ventilation Air Conditioning | | |
| Fan coil units | | 20 years |
| Air handling units | | 20 years |
| Air cooled chillers | | 20 years |
| Water cooled chillers | | 20 years |
| Filters | | up to 12 months |
| Cooling towers | | 15 years |
| Expansion tanks | | 20 years |
| Fans | | 26 years |
| Pumps | | 15 years |
| Water heaters | | 15 years |
| Dampers | | 20 years |
| Actuators | | 10 years |

| | | |
|---------------------------------------|-------------------------|-----------|
| Sensors | | 10 years |
| BMS | | 20 years |
| Fire Suppression System | | |
| General | | |
| | Pressure Gauges | 20 years |
| | Valves | 20 years |
| | Sprinkler Heads | 20 years |
| | Hose Reel System | 20 years |
| Gas Suppression | | |
| | Gauges | 20 years |
| | Pipework | 20 years |
| | Valves | 20 years |
| HV System | | |
| HV Switchboard | | |
| | Protection Relays | 10 years |
| | Current Transformers | 20 years |
| | Voltage Transformers | 20 years |
| Battery Charger | | |
| | Battery Charger | 10 years |
| Traction Power | | |
| | Rectifiers | 20 years |
| Cabling and Cables | | 30 years |
| LV System | | |
| LV Switchboard | | |
| | Protection Relays | 10 years |
| | Power Monitoring Device | 10 years |
| | Current Transformers | 20 years |
| | Voltage Transformers | 20 years |
| | Indication lamps | 10 years |
| VSD | VSD | 20 years |
| Cabling and Cables | | 30 years |
| Uninterruptable Power Supplies | | |
| | Inverter | 15 years |
| | Batteries | 5 years |
| | Static Bypass | 20 years |
| | Maintenance Bypass | 20 years |
| | Harmonic Filter | 15 years |
| | Ventilation Fans | 2 years |
| | Filters | 0.5 years |
| Lighting System | | |
| Tunnel Lighting - LED | | |
| | LED Lamp | 10 years |
| | Electric Ballast | 10 years |
| Station Lighting - LED | | |
| | LED Lamp | 10 years |
| | Electric Ballast | 10 years |
| Fire Detection System | | |

| | | |
|---|-----------------------|----------|
| Control Monitoring and detection | | |
| | Fire Panel | 20 years |
| Cabling | | |
| | System/Fibre | 20 years |
| Fire Doors | | |
| | Fire Door - Side Hung | 20 years |
| | Fire Door - Sliding | 20 years |

| | | |
|------------|--|-------|
| 4 | Urban Design and Public Realm | 85948 |
| 4.1 | Project Urban Design | 85949 |
| 4.1.1 | General | 85950 |
| (a) | The urban design must ensure a cohesive identity for all above ground elements along the project alignment while sensitively responding to the local context of each precinct (the public realm). | 85951 |
| (b) | The design must be consistent with the Urban Design Strategy (UDS). | 85952 |
| (c) | The urban design must: | 85953 |
| i. | maximise the city shaping potential of the project by providing enduring benefits to the people and urban structure of Melbourne; | 85954 |
| ii. | deliver a design response that affords the highest level of value for money for the community, particularly as it relates to travel experience, architecture, engineering and urban integration; | 85955 |
| iii. | have a consistent line-wide style but the design of each station precinct will maintain individuality that is derived from its local context; | 85956 |
| iv. | embrace the character of the places it connects; | 85957 |
| v. | facilitate safe and convenient interchange between modes with clear open spaces that maximise visual connectivity, legibility, safety and amenity; | 85958 |
| vi. | integrate signage, wayfinding, creative infrastructure, weather protection and other elements to avoid visual clutter; | 85959 |
| vii. | maximise useable public space; | 85960 |
| viii. | protect identified heritage structures, settings and view lines; and | 85961 |
| ix. | deliver an ecologically conscious design outcome that is adaptable to climate change and minimises resource use, and energy and potable water consumption. | 85962 |
| 4.1.2 | Arden Public Realm | 85963 |
| | The urban design of the Arden Precinct must: | 85964 |
| (a) | act as a catalyst for redevelopment of the overall precinct and facilitate and support a significant urban renewal project; | 85965 |
| (b) | address the short-term aim of providing an entry within an open space that provides access for the population working and living in surrounding neighbourhoods; | 85966 |
| (c) | address the long term vision of the Station incorporated in the overall masterplan that acts as a focal point of the intensive transit-oriented mixed-use development of the VicTrack site and the Arden-Macaulay Precinct as a whole; | 85967 |
| (d) | facilitate the future intensive redevelopment of the publicly owned (VicTrack) land; | 85968 |
| (e) | facilitate the integration of the station with future over-site development and redevelopment of surrounding areas; and | 85969 |
| (f) | provide a high standard of amenity at and near the station before any wider redevelopment of the publicly owned (VicTrack) land. | 85970 |
| 4.1.3 | Parkville Public Realm | 85971 |
| | The urban design of the Parkville Precinct must: | 85972 |
| (a) | be consistent with the Parkville Public Realm Concept Plan and the University Square Master Plan; | 85973 |
| (b) | create an integrated transport interchange between train, tram and bus services; | 85974 |
| (c) | protect and enhance the heritage structures, view lines and character of the Precinct, including the key vista from Gate 10 toward the CBD; | 85975 |
| (d) | maintain avenue tree planting for the length of Royal Parade, where practicable; | 85976 |
| (e) | in consultation with the relevant local government authority, make provision for new trees spaced in response to the existing rhythm of canopy tree planting; | 85977 |

| | | |
|-------|---|-------|
| | (f) ensure any infrastructure or landscaping maintains a simple and uncluttered eye-level appearance along street vistas to give a visual dominance to the tree canopy; | 85978 |
| | (g) consolidate infrastructure and breaks in the median to best protect the legibility of the avenue planting; | 85979 |
| | (h) ensure larger structures such as chiller plants and emergency access structures: | 85980 |
| | i. are sensitively designed to integrate with the heritage character of the precinct and respect important view lines; | 85981 |
| | ii. are optimised to minimise visual impact; | 85982 |
| | iii. do not interfere with pedestrian movements across or along Grattan Street or impact the access of University Square; | 85983 |
| | iv. are designed in accordance with Crime Prevention Through Environmental Design (CPTED) principles; and | 85984 |
| | v. are architecturally treated to encourage activation of the surrounding space; | 85985 |
| | (i) ensure that any infrastructure to be permanently located in Barry Street must maintain emergency vehicle access; | 85986 |
| | (j) consider integrating larger elements into existing or proposed structures, or collocating elements to reduce the visual impact; | 85987 |
| | (k) demonstrate regard for the future redevelopments options within the University of Melbourne land holdings to integrate with the project; | 85988 |
| | (l) create clearly visible and publicly accessible Station entries where they are located within University of Melbourne land in a manner that respects the existing character of the area; and | 85989 |
| | (m) create Station entries that are sympathetic to the surrounding historic context and minimise the impacts on the Vice Chancellor's Residence, the Gate Keeper's Cottage and their heritage curtilage. | 85990 |
| 4.1.4 | CBD North Public Realm | 85991 |
| | The urban design of the CBD North Precinct must: | 85992 |
| | (a) be consistent with the CBD North Public Realm Concept Plan and the Queen Victoria Master Plan; | 85993 |
| | (b) create a cohesive precinct design that treats all of the main elements (Franklin Street, A'Beckett Street, Little Latrobe Street, Swanston Street) as separate but integrated and complementary elements with their own character and identity; | 85994 |
| | (c) maximise public open space in the precinct; | 85995 |
| | (d) facilitate an integrated, transit oriented over site development; | 85996 |
| | (e) prioritise pedestrian flow, safety and amenity; | 85997 |
| | (f) integrate with existing open spaces, monuments and other public art works; | 85998 |
| | (g) include provision for a double row of avenue planting along Franklin Street; | 85999 |
| | (h) ensure larger structures such as chiller plants and emergency access structures are sensitively designed; | 86000 |
| | (i) consider integrating larger elements into existing or proposed structures, or collocating elements to reduce visual impact; | 86001 |
| | (j) demonstrate regard for options for future redevelopments within RMIT and other major land holdings to integrate with the project; and | 86002 |
| | (k) create clearly visible and publicly accessible station entries. | 86003 |
| 4.1.5 | CBD South Public Realm | 86004 |
| | The urban design of the CBD South Precinct must: | 86005 |
| | (a) support passenger interchange between train services at CBD South Station with FSS, the trams (Flinders Street, St Kilda Road, Swanston Street, Collins Street and Elizabeth Street) and other public transport services; | 86006 |
| | (b) create a station entry that is integrated with the precinct built form while clearly defining the Station entries; | 86007 |
| | (c) be integrated with any oversite development that supports the animation and amenity of adjoining street spaces, and that makes a positive civic architectural contribution | 86008 |

| | | |
|-------|--|-------|
| | to the precinct; | |
| (d) | protect and enhance the heritage significance of nearby heritage buildings, structures and vistas; | 86009 |
| (e) | facilitate the redevelopment of properties acquired for the project to improve land utilisation and urban amenity in the precinct; | 86010 |
| (f) | accommodate a mixture of uses that contribute to: | 86011 |
| | i. the accessibility and amenity of the station entries; | 86012 |
| | ii. retail activation of adjoining streetscapes; | 86013 |
| | iii. complementary civic and community purposes; and | 86014 |
| | iv. commercial returns from the properties; | 86015 |
| (g) | ensure an integrated public realm treatment for Federation Square that: | 86016 |
| | i. enhances St Paul's Court's role as the transition space from Flinders Street to Federation Square; | 86017 |
| | ii. respects the Western Shard's original design intent to hold the corner and perform an important visual and spatial function; | 86018 |
| | iii. respects the Eastern and Western Shards' original design intent as exposed, freestanding elements within the overall design of the square; | 86019 |
| | iv. ensures materials are of a similar vocabulary to the rest of the site; | 86020 |
| | v. adequately addresses the pedestrian congestion at Swanston and Flinders Street corner; and | 86021 |
| | vi. adequately addresses existing and future loading requirements to ensure the on-going operational efficiency of Federation Square; | 86022 |
| (h) | create a cohesive new design for the City Square that is consistent with the City Square Background Paper and that: | 86023 |
| | i. ensures stairs do not exceed the width of other civic stairs on Swanston Street – indicatively, Town Hall Portico 16m, State Library central stairs 12m, St Paul's Cathedral 10.5m; | 86024 |
| | ii. ensures pedestrian access, egress and dispersal from the station primarily occurs from a street and not through the body of the Square to maintain the integrity of the space in keeping with its status as a capital city open space (as described in the City of Melbourne Open Space Strategy); | 86025 |
| | iii. ensures above ground station elements are minimised and do not compromise the Square's useable open space at street level; | 86026 |
| | iv. provides a singular ground level open public space (City Square) of approximately 1500m ² area; | 86027 |
| | v. ensures skylights or other treatments to improve the internal quality of basement level must not result in any reduction of useable open space; | |
| | vi. ensures that structural slab design (e.g. loading capacity and setdown) must not restrict future works in the square. This includes no level changes or upturns at the slab which introduce additional grade differences at the ground level; | 86028 |
| | vii. ensures that event mode of City Square allows for everyday use of the Square as an intimate open space to continue; | 86029 |
| | viii. ensures large vehicle access is provided from either Collins Street or Flinders Lane for events bump in and out (Flinders Lane is preferred); and | 86030 |
| | ix. includes a re-imagined John Mockridge fountain (water wall). | 86031 |
| 4.1.6 | Domain Public Realm | 86032 |
| | The urban design of the Domain Precinct must: | 86033 |
| (a) | create a cohesive precinct design that treats the main elements (St Kilda Road, Shrine Station entry, Albert Road and the Albert Road Reserve) as separate, but complementary, elements each with its own character, context, materiality and identity; | 86034 |

| | | |
|-------|--|--------|
| (b) | create an integrated multi-modal transport interchange; | 86035 |
| (c) | enhance walking and cycling links through the area; | 86036 |
| (d) | enhance the extent and amenity of usable public open space; | 86037 |
| (e) | minimise the extent of Shrine of Remembrance Reserve land encroachment and visual impact; | 86038 |
| (f) | ensure that signage and wayfinding must be kept to a minimum, preferring intuitive design responses where signs are a last resort; | 86039 |
| (g) | respects and enhance the formal boulevard character of St Kilda Road by: | 86040 |
| | i. providing for four rows of trees for the extent of St Kilda Road that has been affected by the Works between Toorak Road and Dorcas Street; | 86041 |
| | ii. ensuring all new tree plots along St Kilda Road are spaced to respond to the existing rhythm of canopy tree planting; | 86042 |
| | iii. minimising loss of open space and heritage impacts in Albert Road and Shrine Reserves by consolidating all transport infrastructure toward St Kilda Road; | 86043 |
| | iv. designing all transport infrastructure located within the carriageway to maintain a simple and uncluttered eye-level appearance along the St Kilda Road vista giving visual dominance to the tree canopy; | 86044 |
| | v. designing all transport infrastructure located within the carriageway to respond to the existing horizontal rhythm established by the canopy trees; and | 86045 |
| | vi. consolidating infrastructure and breaks in the planted median to best protect the legibility of the avenue planting; | 86046 |
| (h) | ensure that the South African Soldiers' Memorial: | 86047 |
| | i. is the focal point of the Albert Road Reserve; | 86048 |
| | ii. maintains a visual relationship with St Kilda Road and Kings Way, but it is not a 'grand gesture'; | 86049 |
| | iii. is accessible from all sides; | 86050 |
| | iv. include a modest congregation space around the memorial; | 86051 |
| | v. maintains a landscaped setting in a manner that respects the heritage qualities of the precinct; | 86052 |
| | vi. as far as practicable, should be separated from the Station entry; and | 86053 |
| | vii. is sited to celebrate the solidity and strength of the memorial; | 86054 |
| (i) | ensure that the Albert Road Reserve public realm design: | 86055 |
| | i. incorporates the length of Albert Road from St Kilda Road to Kings Ways; | 86056 |
| | ii. maintains the formality of the Reserve's crescent shape and structure; | 86057 |
| | iii. minimises loss of car parking; | 86058 |
| | iv. maintains a visual connection between Kings Way and Albert Road Reserve that contributes to the landscape character of the precinct and incorporates transport infrastructure in a way that sensitively responds to the character of the precinct; | 86059 |
| | v. respects the Reserve's original intent as a 'tree reserve'; | 86060 |
| | vi. sensitively incorporates all heritage elements and monuments; | 86061 |
| | vii. incorporates a similar provision for current barbeques and seating areas; and | 86062 |
| | viii. consider larger structures such as chiller plants and emergency access structures so that they are sensitively designed to integrate with the heritage character and respect important view lines. | 86063 |
| (j) | The location of the emergency egress exit must avoid building access areas and disrupting the road and tram services at St Kilda Road. | 86064 |
| 4.1.7 | Portals Public Realm | 118088 |
| | The urban design of the Eastern and Western Portals must ensure all structures are sensitively designed to respond to the adjoining streetscape by: | 118089 |

| | | |
|------------|--|--------|
| (a) | minimising the visual impact of all structures particularly on adjoining residential areas and public spaces; | 118090 |
| (b) | avoiding fragmentation of open space; | 118091 |
| (c) | considering co-location/ integration of existing and/ or proposed structures or co-locating elements of the structures; and | 118092 |
| (d) | where possible, including screen plantings that are consistent in character with the site. | 118093 |
| 4.2 | Safety | 86065 |
| 4.2.1 | The Stations and public realm must: | 86066 |
| (a) | create safe environments using the principles of CPTED to facilitate activation; | 86067 |
| (b) | provide environments that are accessible, inclusive, support safe behaviour and are perceived as being safe at all times of the day through passive surveillance and maximising visual connectivity; | 86068 |
| (c) | provide CCTV coverage, lighting, security systems and CPTED review that is coordinated with adjacent land managers; | 86069 |
| (d) | provide an efficient and enjoyable passenger experience and a quality working environment for staff; | 86070 |
| (e) | not impede ground plane movement networks and not have negative impacts on the safety of the surrounding public realm functionality; | 86071 |
| (f) | demonstrate for all alterations to pedestrian and cyclist movements consideration of personal safety; and | 86072 |
| (g) | minimise the physical impact of services by integrating into the building form and public realm elements. All servicing is to be hidden from view both by the location and use of screening. | 86073 |
| 4.3 | Pedestrian and Intermodal Connectivity | 86074 |
| 4.3.1 | Pedestrian Focused | 86075 |
| | The public realm must: | 86076 |
| (a) | integrate and build upon the wider pedestrian network to enable all passengers to disperse with ease into the hierarchy of pedestrian linkages that exist in each precinct. This includes connectivity to laneways as well as major streets; and | 86077 |
| (b) | arrange station entrances to address the direction and quantum of pedestrian movements based on passenger modelling, particularly allowing for peak flows and major events in order to minimise the impact on the existing pedestrian network. | 86078 |
| 4.3.2 | Intermodal Connectivity | 86079 |
| | The public realm and Stations must support multi modal transport along the street space by providing: | 86080 |
| (a) | proximity of boarding / alighting points to the station entrances; | 86081 |
| (b) | safe pedestrian pathways and road crossings between tram and bus stops and station entrances; and | 86082 |
| (c) | clear lines of sight between tram and bus stops and the station entrance/s. | 86083 |
| 4.4 | Cultural and Community Identity Infrastructure | 86084 |
| 4.4.1 | Stations and public realm must incorporate cultural and community identity infrastructure and enhancements in the public realm that: | 86085 |
| (a) | are tailored to the needs of each local area; | 86086 |
| (b) | are coordinated with local public arts programmes; and | 86087 |
| (c) | offer meaningful additions to the precinct. | 86088 |
| 4.4.2 | All artwork, memorials or monuments impacted by the Project (including those that have been removed and stored as part of the scope of works of the Early Works Managing Contractor) must be retained, relocated or stored, and reinstated by Project Co to an appropriate location (subject to relevant asset owner approval). Project Co must ensure that an integrated approach is applied to the management of such artwork, memorials, or | 86089 |

| | | |
|------------|---|-------|
| | monuments (including in respect of the transition of care, custody or control of such artwork, memorials or monuments, from the Early Works Managing Contractor to Project Co), and provide relevant asset owners with reasonable access to inspect such artwork, memorials, or monuments, whilst under the care, custody or control of Project Co. | |
| 4.4.3 | Stations and the public realm must ensure all cultural and community identity enhancements: | 86090 |
| | (a) present the best of innovation and excellence; | 86091 |
| | (b) are located to ensure there is no conflict with future expansions; | 86092 |
| | (c) consider the potential impact on the Station precinct identities; | 86093 |
| | (d) consider the customer experience; and | 86094 |
| | (e) consider the use of local content. | 86095 |
| 4.4.4 | Stations and the public realm must incorporate cultural and community identity enhancements or installations that consider lighting, safety and security issues in compliance with CPTED principles. | 86096 |
| 4.4.5 | Cultural and community identity infrastructure is not static and must consider future changes over time. | 86097 |
| 4.5 | Oversite Development | 86098 |
| 4.5.1 | Where an oversite development (OSD) is proposed, a suitable platform must be provided between the OSD and the Tunnel and Stations to support construction and permanent OSD loads without having an adverse impact on the operation, safety and security of the Tunnel, Stations or any other rail infrastructure. | 86099 |
| 4.5.2 | Stations must provide a structural arrangement that facilitates the construction of a functional OSD to the maximum permissible building envelope of the relevant planning provisions. | 86100 |
| 4.5.3 | Ancillary OSD infrastructure must not impact station operations or emergency access and egress, including the operational capacity or arrangement of Station entrances, Station maintenance access points or emergency services requirements. | 86101 |
| 4.5.4 | The design arrangement and architectural treatments of an OSD: | 86102 |
| | (a) must not diminish the visibility of the station entrances; and | 86103 |
| | (b) must not compromise the identification of the Station entrances as being separate to the OSD. | 86104 |

| | | |
|------------|---|--------|
| 5 | Civil and Structural Works | 86105 |
| 5.1 | Trackwork | 86106 |
| 5.1.1 | General | 86107 |
| | (a) The Tunnels, Stations and Portals trackwork must be designed to support Day-1 and Design Year service levels in all Operating States. | 86108 |
| | (b) The track must maintain geometry and stability, line and level under all expected environmental and operational conditions. | 86109 |
| | (c) The trackwork must support a maximum defined operating speed of 80km/h. | 86110 |
| | (d) The trackwork must support an appropriate over-speed allowance that exceeds the defined operating speed in order to facilitate the maximum throughput of trains operating under CBTC. | 118095 |
| | (e) The trackwork design must maximise train speed and the consistency of the speed profile along the alignment. | 86111 |
| | (f) The trackwork must be “broad gauge” (1600mm (nominal)). | 86112 |
| | (g) All trackwork components must be of standard type, proven in a similar metro network for a period of at least 5 years and compatible with the existing line. | 86113 |
| | (h) All trackwork components must: | 86114 |
| | i. be currently Type Approved for use within the Metropolitan Rail Network; or | 86115 |
| | ii. obtain Type Approval in accordance with MTM standard L1-CHE-PRO-003 - Type Approval Process and AS 7701:2015 – Rail Equipment Type Approval. | 86116 |
| | (i) The trackwork must be compatible and integrated with other related systems including electrical and mechanical requirements of traction power and signalling systems (including earthing and bonding / stray current), cable paths (including telecommunications and signalling), fire hydrants and drainage. | 86117 |
| | (j) Where required to meet noise and vibration requirements, Project Co must review track stiffness to determine the appropriate track fastening system or track structure. | 86118 |
| | (k) The track must be able to resist all quasi-static, vertical, lateral and impact loads resulting from rail traffic at prescribed axle loads with no assembly, component or material failures. | 86119 |
| | (l) Curve compensated vertical gradients must be suitable for all HCMT, Extended HCMT, as well as maintenance vehicles and equipment certified in accordance with: | 86120 |
| | i. MTM STD L1-CHE-STD-007 Track Vehicle Standard; and | |
| | ii. AS 7510.4:2014 Railway Rolling Stock – Braking Systems Infrastructure. | |
| | (m) Any proposed changes to occupation limits should consider that new crossovers may be needed to be included as part of the works. | 86121 |
| 5.1.2 | Alignment Design | 86122 |
| | (a) General | 86123 |
| | i. The trackwork design speed must consider the proposed defined operating speed including changes as a result of train service frequency over the Design Life. | 86124 |
| | ii. The trackwork must ensure the safety and comfort of passengers and personnel while travelling on the train. | 86125 |
| | iii. The trackwork design must optimise the total life of expendable track materials and components. | 86126 |
| | (b) Horizontal Geometry | 86127 |
| | i. The trackwork through each Station platform must be tangent track for the entire platform length with sufficient length at each end to prevent train throw from affecting platform offset. | 86128 |
| | (c) Horizontal Curves | 86129 |

| | | |
|-------|--|-------|
| i. | Horizontal curves must be used between all changes of constant bearing. | 86130 |
| ii. | All horizontal curves must be circular type. | 86131 |
| iii. | The minimum horizontal curve radius is: | 86132 |
| (1) | 380 metres (desirable); and | |
| (2) | 300 metres (absolute). | |
| iv. | Compound curves comprising two or more horizontal curves of different radii (in the same direction) must be avoided where a single radius can be used. | 86133 |
| (d) | Transition Spirals | 86134 |
| | Transition spirals must: | 86135 |
| i. | be used at the start and end of each circular curve; | 86136 |
| ii. | be clothoid type; and | 86137 |
| iii. | have a minimum length of 20 metres. | 86138 |
| (e) | Cant | 86139 |
| i. | Equilibrium cant must be as follows: | 86140 |
| (1) | Calculated as $13.1354 \times (V^2/R)$ (where V = design speed, and R = horizontal curve radius); | 86141 |
| (2) | Equal to the applied cant plus cant deficiency. | 86142 |
| ii. | Cant must be applied at a uniform rate along the length of the transition spiral. | 86143 |
| iii. | The steepest allowable cant gradient / ramping rate for trackwork is 1:600. | 86144 |
| iv. | The applied cant must be applied in 5mm increments. | 86145 |
| v. | The maximum allowable rate of change of applied cant is: | 86146 |
| (1) | 37.5 mm/s (desirable); and | |
| (2) | 55 mm/s (absolute). | |
| vi. | The maximum allowable rate of change of cant deficiency is: | 86147 |
| (1) | 37.5 mm/s (desirable); and | |
| (2) | 55 mm/s (absolute). | |
| vii. | The maximum allowable non-compensated sustained lateral acceleration for plain track is: | 86148 |
| (1) | 0.52 m/s/s (normal limit); and | |
| (2) | 0.67 m/s/s (maximum limit). | |
| viii. | The maximum allowable jerk is: | 86149 |
| (1) | 0.20 m/s/s/s (normal limit); and | |
| (2) | 0.30 m/s/s/s (maximum limit). | |
| (f) | Vertical Curves | 86150 |
| i. | Vertical curves must be used between all changes of constant grade. | 86151 |
| ii. | Vertical curves must be of quadratic parabola type. | 86152 |
| iii. | A minimum distance of 25 metres at constant grade must be provided between vertical curves. | 86153 |
| iv. | Co-location or overlapping of horizontal transition spirals and vertical curve elements must be avoided where practical. | 86154 |
| (g) | Sag Curve | 86155 |
| i. | The minimum vertical curve radii for a sag curve is 26.50 minimum 'K' value, where 'K' = vertical radius/100 (i.e. approximately 2, 650 metres equivalent radius). | 86156 |
| (h) | Crest Curve | 86157 |
| i. | The minimum vertical curve radii for a crest curve is 17.00 minimum 'K' value, where 'K' = vertical radius/100 (i.e. approximately 1, 700 metres equivalent radius). | 86158 |
| (i) | Gradients | 86159 |

| | | | |
|-------|------|---|-------|
| | i. | The use and length of steep gradients must be minimised. | 86160 |
| | ii. | The maximum grade of the track through Station platforms is: | 86161 |
| | | (1) 0.00% (flat) (desirable); | |
| | | (2) 0.33% (1 in 300) (maximum); and | |
| | | (3) 0.67% (1 in 150) (absolute). | |
| | iii. | The maximum grade of the track elsewhere must not exceed 3.6% (curve compensated). | 86162 |
| | iv. | There must be a reduction in allowable maximum grade where a horizontal curve is coincident with a vertical grade. Reduction in the applicable maximum grade must be applied at a rate of (60.96%) / horizontal radius. | 86163 |
| | v. | Outside the Stations there must be longitudinal fall along the track to achieve positive fall of water towards drainage outlet (from any source) and prevent water pooling. | 86164 |
| 5.1.3 | | Gauging and Clearances | 86165 |
| | (a) | All infrastructure must ensure space provision for the maximum rolling stock kinematic envelope, services, emergency egress, maintenance requirements and minimum standard air gap between the maximum kinematic envelope and tunnel structure. | 86166 |
| | (b) | Appropriate standards and specifications must be established for the determination and management of gauging and clearances based on the dimensions and dynamics of the rolling stock based on: | 86167 |
| | | i. the static outline and rolling stock configuration in accordance with the Victorian Rail Industry Standard Drawing STD_R0008; | 86168 |
| | | ii. the rolling stock parameters including lateral translation, clearance (worn wheel to new rail) and lateral deflection of primary suspension as per Victorian Rail Industry Standard Drawing STD_R0009; | 86169 |
| | | iii. the infrastructure parameters including rail side wear, gauge tolerance of the track, cross level tolerance and track alignment tolerances as per Victorian Rail Industry Standard Drawing STD_R0009; | 86170 |
| | | iv. the maximum swept path parameters including centre throw of the rolling stock on curved track (inside curve) and end throw of the rolling stock on curved track (outside curve); | 86171 |
| | | v. an agreed safety clearance margin (or air gap) beyond the worst case kinematic outline; and | 86172 |
| | | vi. a maintained floor height at the passenger bodyside doors of 1170mm from the top of rail. | 86173 |
| | (c) | Track clearances must be maximised wherever practicable. | 86174 |
| 5.1.4 | | Rail Track Components | 86175 |
| | (a) | General | 86176 |
| | | i. All rail track components must be designed in accordance with 77% 300LA (nom. 23 t axles) loading as specified in AS5100.2 in both static, dynamic and 'fault condition' loadings. Where calculations are based on speed, 90 km/h should be adopted regardless of design or proposed operating speed except for determining noise and vibration effects which shall be based on 85 km/h. | 86177 |
| | | ii. Trackform components must retain their mechanical properties and Design Life in the presence of rail lubricants, grease, water or other contaminants. | 86178 |
| | (b) | Rail | 86179 |
| | | i. New rail must be head hardened rail of AS60 (60kg/m) size (as per AS1085.1), continuously welded and inclined at an angle of 1 in 20 (from vertical) towards the centre of the track. | 86180 |
| | | ii. Rail lengths formed by flashbutt welding in a controlled environment should be maximised. | 86181 |

| | | |
|-------|---|-------|
| iii. | The welding of rail must comply with AS1085.20 and MTIS 033000-Welded Track Management Manual. | 86182 |
| iv. | In-situ aluminothermic welds should be minimised. | 86183 |
| v. | A target rail profile must be jointly agreed and implemented with the HCMT contractor, PTV and the Train Franchisee. | 86184 |
| vi. | A wheel / rail interface study must be conducted in a timely manner, jointly with the contractor for the HCMT Project, PTV, Rail Systems Alliance (RSA), Rail Infrastructure Alliance (RIA) and the Train Franchisee. A Wheel / Rail Interface Management Sub-Plan is to be developed, implemented and updated by Project Co in accordance with Annexure 8, section 8.1.2 (p) (6) of Part C of the PS&TR. | 86185 |
| vii. | The optimal stress free temperature must be assessed and implemented considering the predicted maximum and minimum temperature of the rail over the life of the asset (including considerations of climate change impacts). | 86186 |
| viii. | An assessment of longitudinal rail movement must be conducted with the HCMT contractor and the Train Franchisee. | 86187 |
| ix. | The design must include an assessment on the need for broken rail detection, and all recommendations must be implemented. | 86188 |
| x. | Rail must be compatible with all equipment required (earthing loops, axle counters, track circuits, noise absorbing panels, maintenance crossing panels etc.) and their connection to the track as used by the RSA. | 86189 |
| xi. | Rails used for return current protective provisions in the ballastless track systems must be in accordance with EN 50122-2. | 86190 |
| (c) | Rail fasteners and baseplates | 89191 |
| i. | The rail fastening system must comply with AS1085.19 and be a resilient type appropriate for the operational conditions. | 86192 |
| ii. | Rail creep due to traction and braking forces on long, steep grades must be minimised. | 86193 |
| (d) | Trackform / Trackbed | 86194 |
| i. | The trackform / trackbed must be ballastless. | 86195 |
| ii. | The ballastless track systems must comply with the requirements of EN 16432. | 86196 |
| iii. | Preventative and typical maintenance including: | 86197 |
| | (1) replacement of rails; | 86198 |
| | (2) grinding of rails; and | 86199 |
| | (3) adjustment of track geometry, etc., | 86200 |
| | on the trackform/trackbed must be able to be conducted without significant modification to the trackform/trackbed. | 86201 |
| iv. | The trackform/trackbed and associated rail fasteners and baseplates must form the primary attenuation measure to meet the noise and vibration Environmental Performance Requirements (EPRs). | 86202 |
| v. | Operational ground borne noise must be at least 2dB(A) lower than the minimum ground borne/ structure borne noise requirements in the EPRs, and targeted to be at least 5dB(A) at the design stage. | |
| vi. | The trackform/trackbed and associated rail fasteners and baseplates must form part of the primary attenuation measures to ensure that average Inter-station in-car noise levels (Leq) inside the train do not exceed the acceptable limits set out in section 5.3.6. | 86203 |
| vii. | Continuous (to the extent practical) reinforced concrete derailment guard/s that are fully integral to the trackform/trackbed, must be provided for all ballastless track, which must: | 86206 |
| | (1) maintain the train in an upright position in the event of derailment; | 86207 |

- (2) limit lateral displacement in the event of derailment; 86208
- (3) minimise damage to track and supporting structures (including elevated walkway); and 86209
- (4) be designed for a 250 kN horizontal impact load applied uniformly over a length of 1 metre at the top of the kerb / upstand acting at any angle away from the track centerline. 86210
- viii. The trackform / trackbed must provide a gradual stiffness transition at each location where a change in track form is required including: 86211
 - (1) interface with ballasted track; 86212
 - (2) interface with Stations; and 86213
 - (3) interface between different track forms. 86214
- ix. Project Co must demonstrate through a wheel-rail interface study that the trackwork system stiffness will: 86215
 - (1) Be capable of delivering a Mean Comfort Level (Nmv) of between 1.5 and 2.5 in accordance with BS EN12299:2009; and
 - (2) not be the primary cause of failure or excessive deterioration of track or rolling stock assemblies, components or materials, rail corrugation, excessive noise or vibration under normal operational conditions.
- x. The track must be constructed to tolerances not exceeding the following: 86216
 - (1) gauge: -0mm, +2mm; 86217
 - (2) alignment: +/-2mm from true over any 10m chord length; 86218
 - (3) cross level: 86219
 - (i) straight track: +/-2mm from true over any 10m chord length; 86220
 - (ii) curved track: +/-2mm from true over any 10m chord length; and 86221
 - (4) top: +/-2mm from true over any 10m chord length. 86222
- xi. A track maintenance standard must be developed that minimises the train – platform interface (horizontal and vertical) to reduce the effective gap between train, platform, Platform Screen Door (**PSD**) and whole life costs SFAIRP. 86225
- (e) Track must be designed to minimise stray current leakage. 86226
- (f) The design must take into account access to key components and bearings for inspection and maintenance purposes. 86227
- (g) The trackform width beyond the outermost edge of the base plates on each side of the running rails must be maximised at the level of the slab under the rails. 86228
- (h) The track must be designed to ensure that cant transitions are not located on vertical curves. This is to reduce the likelihood of twist faults. 86229
- (i) Track Lubrication 118104
 - i. A linewide track lubrication strategy must be established in a timely manner, jointly with the HCMT Project, PTV, Rail Systems Alliance (RSA), Rail Infrastructure Alliance (RIA) and the Train Franchisee. A track lubrication strategy for gauge face and top of rail friction modifiers (**TORFM**), is to be developed, implemented (including design and construction) and updated by Project Co. The track lubrication strategy must: 118106
 - (1) include the tunnel, stations and portal approaches; 118107
 - (2) be integrated with the broader RTO network lubrication strategy (to be developed); 118108
 - (3) provide lubrication equipment at locations which can be accessed and maintained during operational hours without impact to train operations; 118109
 - (4) provide lubrication locations positioned as close to the running track SFAIRP; 118110

| | | | |
|------------|------|---|--------|
| | (5) | include both the lubrication locations which will be activated for Day 1 operations and those installed but not activated; | 118111 |
| | (6) | include a risk assessment, testing and commissioning plan, lubricator monitoring plan and technical maintenance plan; and | 118112 |
| | (7) | be reviewed and approved by a subject matter expert. | 118113 |
| | ii. | Gauge face lubrication must: | 118114 |
| | (1) | allow remote monitoring; | 118116 |
| | (2) | achieve a target gauge face coefficient of friction of <0.25 over the extent of the system; | 118117 |
| | (3) | recommend and implement design safeguards for lubrication migration to top of rail; and | 118118 |
| | (4) | include spatial and servicing allowance for TORFM lubrication equipment at all locations where gauge face lubrication equipment is installed. | 118119 |
| | iii. | In addition to the lubrication strategy, spatial and servicing allowance must be made for individual gauge face and TORFM lubrication equipment, which allows independent lubrication of both tracks, at the following locations: | 118120 |
| | (1) | both ends of each underground station; and | 118121 |
| | (2) | the eastern portal ventilation structure. | 118123 |
| 5.1.5 | | [Not disclosed] | 86230 |
| 5.1.6 | | Infrastructure track signage and monuments | 86236 |
| | (a) | Track signage and monuments must be provided (including signage in accordance with the general requirements of AS 1743): | 86237 |
| | i. | at every 50m chainage / kilometrage; | 86238 |
| | ii. | at permanent speed restriction signs on curves; and | 86239 |
| | iii. | at changes in track geometry (e.g. start of transition spiral, start of curve, end of curve, end of transition spiral). | 86240 |
| | (b) | Track signage and monuments must not hinder operations or maintenance activities. | 86241 |
| | | | 86242 |
| 5.2 | | Underground Structures | |
| 5.2.1 | | General | 86243 |
| | (a) | All underground structures must be designed in accordance with AS5100 (Set), unless otherwise noted. | 86244 |
| | (b) | Soil supporting structures must be designed to in accordance with AS5100.3, unless otherwise noted. | 86245 |
| | (c) | All structures beneath tramlines must be designed and constructed in accordance with VRIOGS Tram Track Standards (Set) in addition to the requirements of AS5100 (Set). | 86246 |
| | (d) | All structures associated with railway lines must be designed in accordance with the Standards of the RTO in addition to the requirements of AS5100 (Set). | 86247 |
| | (e) | All structures must consider construction tolerances as part of spaceproofing. | 86248 |
| | (f) | All permanent underground Works must be a minimum of 1.5m below finished ground level. Where this is not achievable, a corridor of minimum depth of 1.5m below finished ground level for future utilities must be identified in the design with the exception of the following locations, subject to agreement from the relevant authority: | 86249 |
| | i. | the CBD South Station connection below Flinders Street where it joins to the existing Degraeves Street tunnel; | |
| | ii. | the roof of the City Square building at CBD South which is located at ground level; and | |
| | iii. | the southern portion of Domain Station as agreed with the State. | |

| | | | |
|-------|------|---|--------|
| | (g) | Any beneficial long term contribution or load distribution from temporary works left in the ground must not be considered in the permanent Works design , unless the temporary works components are incorporated into the permanent Works and meet the design life performance requirements for the element and all other requirements of the PS&TR. | 86250 |
| | (h) | All temporary and permanent support systems for ground supporting structures must include redundancy. | 86251 |
| | (i) | All retaining walls adjacent to the railway track required to withstand collisions from derailed trains must met the requirements of MTM DPN - L1-CHE-INS-013: Soil retaining structures adjacent to rail. | 86252 |
| | (j) | Anchor bolts and similar structural fixings into concrete elements which are reliant on adhesion must not be used to resist tensile loads where the failure of the anchorage may result in a risk to life or a reduction in operational performance. | 86253 |
| | (k) | Where the Works alters, connects to, or is adjacent to an existing structure, Project Co must ensure that the structural capacity, stability, durability and watertightness of the existing structure is not adversely affected. The impacts to the existing structure must be analysed as part of the design. | 86254 |
| | (l) | Structural concrete linings for underground structures which could be exposed to fire must be designed to resist explosive and progressive spalling when exposed to fire. | 86255 |
| | (m) | All gaps must be effectively sealed to prevent debris from entering gaps between structural elements. | 86256 |
| | (n) | Unless otherwise noted, all loads in this PS&TR must be treated as unfactored. | 118050 |
| 5.2.2 | | Durability | 86257 |
| | (a) | Early age thermal cracking must be calculated in accordance with the methodology set out within EN 1992-3:2006 (Eurocode 2 Part 3 for Liquid Retaining Structures) and Guidance set out within CIRIA C660. The crack width must be calculated at a distance equal to the durability cover (referred to as Cdur) from the reinforcement within any concrete element. | 86258 |
| | (b) | Flexural crack widths must be calculated in accordance with Eurocode 2 Part 1 – BS EN 1992-1-1:2004. The flexural crack width must be calculated at a distance equal to the durability cover (referred to as Cdur in EC2 terminology) from the reinforcement preventing the crack in any element. | 86259 |
| | (c) | The maximum crack width in concrete elements (inclusive of tunnel linings), irrespective of whether additional protection is adopted must be as follows: | 86260 |
| | i. | concrete elements adjacent to or in contact with the ground which have water restricting or excluding functions, must have a maximum crack width of 0.25mm (wk = 0.25mm); | 86261 |
| | ii. | concrete elements adjacent to or wholly in contact with the ground which do not have water restricting or excluding functions, must have a maximum crack width of 0.3mm (wk = 0.3mm); | 86262 |
| | iii. | concrete elements exposed only to an internal environment, must have a maximum crack width of 0.3mm (wk = 0.3mm); | 86263 |
| | iv. | concrete elements exposed to external atmosphere and weather, must have a maximum crack width of 0.25mm (wk = 0.25mm); | 86264 |
| | v. | pre-cast elements containing pre-stressed tendons and exposed to weather must have a maximum crack width of 0.10mm (wk = 0.1mm). | 86265 |
| | (d) | There must be no adverse effects of groundwater chemistry on the overall integrity of structures and the reliability and performance of the drainage system, including the potential for the precipitation of insoluble salts to reduce the effectiveness of the drainage system, over the required Design Life. | 86266 |
| | (e) | Steel sheet piles must not be considered as permanent Works. | 86267 |
| | (f) | There must be no adverse effects on the overall integrity of structures and the reliability and performance of the drainage system, over the required Design Life, due to variation in groundwater levels in response to climate variability or change. | 86268 |
| | (g) | Concrete structures with a 100 year design life must account for the effects of | 86269 |

increased temperatures, temperature ranges and CO₂ concentrations on the rate of carbonation-induced corrosion.

| | | |
|-------|--|-------|
| 5.2.3 | Design Loads | 86270 |
| | (a) Seismic loads used for the design of all structures except bridges and earth retaining structures, must be earthquake design category 'Type III' in accordance with AS1170. | 86271 |
| | (b) All structures supporting roads and emergency vehicle access paths must be designed for SM1600 loads to AS5100. | 86272 |
| | (c) Aerodynamic forces from passing trains must be considered in accordance with BS EN 1991:2:2003. | 86273 |
| | (d) Air pressure acting on the structural elements resulting from the operation of trains and mechanical equipment must be applied. | 86274 |
| | (e) [Not disclosed] | 86275 |
| | (f) [Not disclosed] | 86276 |
| | (g) [Not disclosed] | 86277 |
| | (h) [Not disclosed] | 86278 |
| | (i) [Not disclosed] | 86279 |
| | (j) [Not disclosed] | 86280 |
| | (k) [Not disclosed] | 86281 |
| | (l) [Not disclosed] | 86282 |
| | (m) All handrailing and balustrades not located on bridges must be designed to resist the minimum live loads specified within AS 1170. | 86285 |
| | (n) Structural elements must be designed to support equipment loads at any reasonable position likely to be experienced during or after installation, including access routes for installation, maintenance or replacement. | 86286 |
| | (o) The dynamic effects due to the operation of equipment must be included when determining equipment loads. | 86287 |
| | (p) Partially and fully underground structures must be designed to resist buoyancy at all stages of construction and throughout the Design Life, including accounting for the effects of climate change and other influences. | 86288 |
| | (q) Groundwater levels used in design must be based on the most adverse high and low water levels both during construction and throughout the Design Life, including accounting for the effects of climate change and other influences. | 86289 |
| | (r) The structural weight resisting buoyancy must only include the minimum structural weight of that part of the underground structure that will remain in place for the time period under consideration. | 86290 |
| | (s) Any loads from oversite developments or from elements that could be altered or removed must not be considered in the buoyancy assessment. | 86291 |
| | (t) All components of underground structures must be proportioned to withstand the most onerous combination of the applied loads and actions. These must include railway loads in accordance with AS5100 and future infrastructure loads. | 86292 |
| 5.2.4 | Future Proofing | 86293 |
| | (a) The design must accommodate any impact from developments that have been approved by all relevant Authorities, current at the date of the Agreement. Where these loads differ from the allowances listed in the following sections, the more unfavourable loading cases must apply. | 86294 |
| | (b) An additional future vertical loading provision must be included for tunnels, caverns, cross passages, adits and pedestrian subways to accommodate developments not currently known, and future modifications of surface levels as follows: | 86295 |
| | i. [Not disclosed] | 86296 |
| | ii. [Not disclosed] | 86297 |
| | (c) An additional future excavation loading provision must be included for tunnels, caverns, cross passages, adits and pedestrian subways as follows: | 86298 |

| | | |
|-------|--|-------|
| i. | excavation up to 7 metres below natural surface to allow for future development, but limited to land that can be developed, and subject to maintaining a minimum of 7 metres residual ground cover above the tunnel/cavern/cross passage crown; and | 86299 |
| ii. | excavation of basements adjacent to the Tunnel and Stations, and to a depth below the invert line of the Tunnel and Station structure, with a horizontal deflection at the face of the excavation limited to 20 mm with horizontal separations as follows: | 86300 |
| (1) | TBM tunnels: 3 metres; | 86301 |
| (2) | mined tunnels: 4 metres; and | 86302 |
| (3) | caverns: 7 metres. | 86303 |
| (d) | While not applying unloading or loading above these cases, the design should facilitate individual footings being constructed to the following minimum clearances: | 86304 |
| i. | TBM tunnels: 2 metres; | 86305 |
| ii. | mined tunnels: 3 metres; and | 86306 |
| iii. | caverns: 7 metres. | 86307 |
| | The above offsets are defined on the assumption that the future developer can demonstrate acceptable measures if redundant rock bolts are encountered, both for the development and avoiding damage of the permanent tunnel/ adit/ cavern lining and waterproofing system. | 86308 |
| (e) | An additional future vertical loading provision must be included for cut and cover Stations and other entrance or access shafts as follows: | 86309 |
| i. | [Not disclosed]; | 86310 |
| ii. | all civil infrastructure structural elements must be designed to withstand vibrations induced by future works. | 86311 |
| 5.2.5 | Watertightness | 86312 |
| (a) | Detailed, regional and local scale, hydrogeological modelling and sensitivity analyses must be undertaken to determine potential impacts to groundwater flow regimes and levels and inform mitigation measures for groundwater control of all structures in the construction and operational phases. | 86313 |
| (b) | Models must consider and be calibrated to the results of the hydrogeological investigation completed during design and other hydrogeological information available to the Project. | 86314 |
| (c) | The detailed hydrogeological impact assessment must demonstrate that the potential impacts from construction and operation of the Tunnels, Stations and Portals complies with the EPRs. | 86315 |
| (d) | The permanent works must be Undrained, except for embankments and above ground retaining walls above the water table. | 86316 |
| (e) | Tunnels, caverns, adits and cross passages must achieve the following minimum degree of watertightness against the ingress of groundwater: | 86317 |
| i. | 0.1 litres per square metre of tunnel surface area per day for any 100 m length of tunnel, cavern, adit and cross passage; and | 86318 |
| ii. | 0.2 litres per square metre of tunnel surface area per day for any 10 m length of tunnel, cavern, adit and cross passage. | 86319 |
| (f) | As a minimum a waterproofing membrane must be installed with all insitu concrete or sprayed concrete linings in tunnels, over the full circumference of the opening. | 86320 |
| (g) | Where a cast in situ secondary tunnel lining is used, a sheet waterproofing system must be provided. Sheet waterproofing systems must incorporate compartmentalisation and a geotextile layer at regular spacing in longitudinal and circumferential directions. | 86321 |
| (h) | Cross passages must be provided with a water proofing membrane. | 86322 |
| (i) | Cut and cover underground structures must adopt a waterproofing system, in accordance with BS 8102, combining a minimum of two of the following types: | 86323 |

- i. barrier protection; 86324
- ii. structurally integral protection (crack width controlled); and 86325
- iii. internal drained seepage cavity protection (connected and channelled to the drainage system). 86326
- (j) Where Undrained structures are designed they must comply with 5.2.5(d). 86327
- (k) Permanent structures must achieve the minimum degree of watertightness against the ingress of groundwater listed in Table 5-1. 86328

Table 5-1: Watertightness Verification Requirements

| Structural Element | Interior in Service Condition | Water tightness verification requirements |
|---|--------------------------------------|--|
| <p>Any element to which finishes are to be adhered to an interior face, including but not limited to roof slabs for Stations, entrances and ancillary buildings.</p> <p>Suspended slabs over tracks, concourses, and any other similar sensitive zones, which are subject to wash down, train air conditioning condensate, leakage or rain water.</p> | Completely dry | <p>Free from all seepage, damp patches and visible leaks.</p> <p>Average leakage must be less than 0.01 l/m² per day for any 1000m² of surface area.</p> <p>Average leakage must be less than 0.02 l/m² per day for any 100m² of surface area.</p> |
| <p>Any elements which form the perimeter to an open habitable space upon which no finishes are to be adhered, including but not limited to in situ base slabs, in situ walls, submerged perimeter retaining walls and abutments.</p> | Substantially dry | <p>Leaks must be restricted to minor damp patches with no visible leaks and no trickling water.</p> <p>Average leakage must be less than 0.05 l/m² per day for any 1000m² of surface area.</p> <p>Average leakage must be less than 0.10 l/m² per day for any 100m² of surface area.</p> |
| <p>Any elements which form the perimeter to non-habitable space, including but not limited to diaphragm walls, secant or contiguous piled walls, bored soldier piles, shotcrete infill walls and sheet piles.</p> | Capillary penetration of moisture | <p>Leaks must be restricted to damp patches on the face of the concrete and at horizontal construction joints.</p> <p>Leaks must be restricted to minor weeping of vertical construction joints in walls.</p> <p>No trickling of water is acceptable.</p> <p>Average leakage must be less than 0.10 l/m² per day for any 1000m² of surface area.</p> <p>Average leakage must be less than 0.20 l/m² per day for any 100m² of surface area.</p> |
| <p>All Station water excluding structural elements in contaminated soil or groundwater</p> | As required by special investigation | <p>Water tightness must satisfy occupation, health and safety standards and the values stated above.</p> |

- (l) The watertightness requirement at joints between structures must be taken as the most onerous requirement of the individual structures. 86331
- (m) Access covers must be provided that achieve the specified watertightness requirement of structures in which they are installed. 86332

| | | |
|-------|--|--------|
| | (n) There must be no drips from structures onto areas that contain mechanical or electrical equipment and rail track. | 86333 |
| 5.2.6 | Groundwater Control | 86334 |
| | (a) The Works must not affect groundwater to the extent that it creates adverse impacts in terms of ground settlement or impacts on groundwater dependent ecosystems. | 86335 |
| | (b) Permanent dewatering and recharge systems must not be used. | 86336 |
| | (c) The Works must manage and mitigate contamination plume migration. | 150508 |
| 5.2.7 | Drainage and Flood Control | 86337 |
| | (a) The drainage system must collect and discharge all water that enters the Tunnels, Stations and Portals, including water from hydrological events, groundwater seepage, emergency fire hydrant water, tunnel wash-down water and incidental water. | 86338 |
| | (b) Discharge of the drainage system must be made in accordance with relevant environmental regulations and requirements of the statutory authorities. | 86339 |
| | (c) A pressure relief path, directed to the drainage system, must be provided between all Tunnel structural linings and the first stage concrete. | 86340 |
| | (d) All sumps and pumps must be located in readily maintainable and accessible locations. They must not be located beneath the trackwork. | 86341 |
| | (e) The Tunnels, Stations and Portals must be protected from flooding through the most effective, practicable means. Active flood control may be required to prevent flooding into the Portals and some Stations. Passive means must be used where appropriate. | 86342 |
| | (f) Protection from surface water flooding must be provided as follows: | |
| | i. A freeboard that is 300mm above the 1:200 year Average Recurrence Interval (ARI) rainfall event level (plus provision for climate change) must be provided at all openings into the Tunnels and Stations to protect against surface water or other non-river flooding event. | 86343 |
| | ii. At the Portals, transverse drainage must be placed across the entrance to the Tunnels to capture the 1:200 year ARI flood event (plus climate change considerations for rainfall) in the decline structures and discharge the storm water in a controlled fashion to the local drainage system in accordance with the requirements of the statutory authorities. | 86344 |
| | (g) Where the design reduces flood storage, compensatory flood storage must be provided within the local area of the flood zone. The compensatory flood storage must typically be provided upstream of the Works and be subject to approval by statutory authorities. | 86345 |
| | (h) To protect against a river flooding event, a freeboard that is 600mm above the 1:1000 year ARI flood event level (plus provision for climate change considerations for rainfall and sea level rise) must be provided at all openings into the Tunnels and Station. | 86346 |
| | (i) Any flood waters from the Yarra and Maribyrnong Rivers must be prevented from entering the Portals. The design must: | 86348 |
| | i. determine appropriate warning systems; | 86349 |
| | ii. determine likely warning times; | 86350 |
| | iii. determine active responses which may include a manual or automatic responses; and | 86351 |
| | iv. consider the ease of tunnel closure in the case of a large flood event. | 86352 |
| | (j) Subsurface drainage systems must be able to be readily maintained. | 86355 |
| 5.2.8 | Settlement | 86356 |
| | Settlement, as a result of the Works in the temporary and permanent condition, must not adversely impact the Tunnels, Stations and Portals, Rail Operations, existing infrastructure or buildings. Settlement includes but is not limited to differential settlement, vertical and horizontal ground displacement and consolidation settlement. | 86357 |

| | | |
|------------|---|--------|
| 5.3 | Tunnels | 86358 |
| 5.3.1 | General | 86359 |
| | All tunnels including primary lining, secondary lining, waterproofing, groundwater control and ground stabilisation must be designed in accordance with the "Specification for Tunnelling, Third Edition", British Tunnelling Society and The Institute of Civil Engineers. | 86360 |
| 5.3.2 | Tunnel Spaceproofing | 86361 |
| | (a) Underground structures must be of sufficient size to accommodate all infrastructure and space allowances to support Train Operations. | 86362 |
| | (b) Project Co must ensure the civil structures provide adequate space for mechanical / electrical elements and all rail systems forming part of the Rail Systems Alliance Works (refer to Section 6). | 86363 |
| 5.3.3 | Tunnel Walkway | 86364 |
| | (a) An elevated walkway must: | 86365 |
| | i. be designed in accordance with HB 197:1999; | 86366 |
| | ii. be provided throughout the entire length of each Tunnel; | 86367 |
| | iii. provide a minimum clear width of 850mm and minimum clear headroom of 2100 mm; | 86368 |
| | iv. [Not disclosed]; | 86369 |
| | v. provide clear and step free access to the cross passages; and | 86370 |
| | vi. provide clear and step less connection to/from the Station platforms and/or exit points from the tunnels at the portals as required. | 86371 |
| | (b) The vertical and horizontal stepping distance between the stationary HCMT rolling stock floor and the elevated walkway in an emergency egress situation must be minimised so far as is reasonably practicable. | 86372 |
| | (c) A handrail must be provided at the Tunnel side of the elevated walkway that: | 86373 |
| | i. is clear of Tunnel services; | 86374 |
| | ii. does not project into the emergency egress envelope; and | 86375 |
| | iii. is not less than 900mm or greater than 1100mm vertically above the walkway surface; | 86376 |
| | iv. does not provide access or foothold to any unsafe or secured areas; and | 86377 |
| | v. does not impact on access to fire services, including hydrants, communications and fire service equipment. | 137131 |
| | (d) A means for personnel to descend and ascend between the elevated walkway and the track level must be provided at the cross passages, Station ends and a minimum of one in between each cross passage or cross passage and a Station. The structure must not encroach into the structure gauge of the train or impact services. | 86378 |
| 5.3.4 | TBM Driven Tunnels | 86379 |
| | In segments with bar reinforcement, dimples must be formed on the intrados of the segments indicating where drilling may be carried out for the fixing of Tunnel furniture to maintain the design cover to the reinforcement. Anchor bolts and similar structural fixings which are reliant on adhesion must not be used to resist tensile loads where the failure of the anchorage may result in a risk to life or a reduction in operational performance. | 86380 |
| 5.3.5 | Mined Tunnels, Caverns, Adits and Cross Passages | 86381 |
| | (a) Rockbolts, where installed, must not be considered as part of permanent Works. | 86382 |
| | (b) Formed surfaces of secondary linings must be finished to Class 3 in accordance with AS 3610. | 86383 |
| | (c) Finishes to sprayed concrete secondary linings must be regular, even and free of: | 86384 |
| | i. sharp projections; and | 86385 |
| | ii. edges with a curvature radius of less than 200mm. | 86386 |
| | (d) In areas accessible by persons, permanent lining must not have protruding fibres. | 86387 |

| | | |
|-------|---|--------|
| | (e) The cross passages and shafts must provide space in accordance with section 6.5.1. | 86388 |
| | (f) The cross passages and shafts must not degrade the systems performance of new and existing infrastructure, including new and existing communication systems (especially wireless based). | 86389 |
| 5.3.6 | Noise and Vibration in Tunnel | 86390 |
| | Project Co must demonstrate through a wheel-rail interface study that the Works will be capable of achieving the requirements set out in 5.3.6(a) and (b). | 150433 |
| | (a) Noise and vibration in the Tunnel must be mitigated in accordance with the project statutory approvals, including: | 86391 |
| | i. the requirements of the Victorian Government Passenger Rail Infrastructure Noise Policy (April 2013) must be complied with; and | 86392 |
| | ii. EPRs developed as part of the Environmental Management Framework (EMF) approved by the Minister for Planning under the Incorporated Document must be complied with, including design criteria for addressing noise and vibration in Tunnels. | 86393 |
| | (b) Average Inter-station in-car noise levels (Leq) inside the train must not exceed: | 118128 |
| | i. 75dB(A) in the train interior, with all auxiliary systems operating normally. The noise levels must be measured at any point along the centre-line of the car at both 1200mm and 1600mm above the car floor and not less than 600mm from the end walls; and | 86396 |
| | ii. 72dB(A) in the driver's cab, with all auxiliary systems operating normally. The noise levels must be measured at any point 1000mm above the car floor and 200mm from any wall. | 86397 |
| | (c) All in-car noise level measurements must be made in accordance with BSEN ISO3381. Measurements will be undertaken as sequential periods of LAeq, 5 sec, with the specified levels not to be exceeded for more than 20% of the individual 5 second recordings. | 118129 |
| | (d) Project Co must actively collaborate with the HCMT team to manage in-car noise in accordance with the PS&TRs and the High Capacity Metro Trains Project Interface Control Document (Metro Infrastructure). | 118130 |
| 5.3.7 | Sound Absorption in Tunnel | 86394 |
| | If sound absorption is required to reduce reflected noise within the Tunnels: | 86398 |
| | (a) all sound absorbing materials, including dust membranes, must be inert, non-combustible, non-hygroscopic, rot and vermin proof. The material must not emit toxic nor hazardous fumes if ignited. The effect of any vapour barrier must be included in meeting the specified acoustic performance; and | 86399 |
| | (b) dust membranes must be fixed to the inside of the perforated metal facing. The dust membrane must prevent dust, airborne train brake material and other foreign matter from entering the absorptive panels. The acoustic performance of the absorptive panels must include the dust membrane. | 86400 |
| 5.4 | Cut and Cover (Stations, Shafts, Portals) | 86401 |
| 5.4.1 | Load combinations that include unbalanced lateral loadings by applying the most adverse loading combination of minimum and maximum loadings on opposite sides must be used. | 86402 |
| 5.4.2 | The resistance to uplift/buoyancy must be checked at all stages throughout the Design Life for the highest credible long term water levels, including accounting for the effects of climate change. | 86403 |
| 5.4.3 | Resistance to uplift/buoyancy must be checked for the structure overall and for each cross-section where applicable. Where the resistance to flotation is not coincident with the restraining force, the structure must be designed for the resulting internal forces. | 86404 |
| 5.4.4 | The resultant total restraining force must be at least 1.2 times greater than the calculated uplift/buoyancy force. The restraining force comprises: | 86405 |
| | (a) the weight of structural elements reduced by a factor calculated in accordance with | 86406 |

| | | |
|------------|--|-------|
| | AS 5100; | |
| | (b) backfill / soil over the structure below 2.0m below ground. Soil within 2.0m of the surface must be ignored to allow for future excavations; and | 86407 |
| | (c) Soil friction acting on the perimeter retention systems or foundations as appropriate, must be multiplied by the appropriate geotechnical strength reduction factor calculated in accordance with AS 2159 | 86408 |
| 5.4.5 | For extreme stage, in association with the highest credible water level, the combination of 0.9 times the structural weight resisting buoyancy plus the geotechnical strength reduction factor times the ultimate geotechnical strength resisting buoyancy must be greater than 1.05 times the uplift force due to buoyancy. | 86409 |
| 5.4.6 | Tension piles used to resist buoyancy must be cast insitu reinforced concrete piles. | 86410 |
| 5.4.7 | Cut and cover structures must be structurally continuous without movement joints. | 86411 |
| 5.4.8 | Interface points within Station walls to accommodate future connection to future infrastructure (refer to section 2.4) must be provided. The interface points must be covered by knockout panels that can be removed without compromising the structural integrity, serviceability and operational requirements of the affected Station. | 86412 |
| 5.5 | Earthwork and Embankments | 86413 |
| 5.5.1 | Earthworks must be protected from scour and erosion. | 86414 |
| 5.6 | Retaining Structures | 86415 |
| 5.6.1 | All soil supporting structures must be designed in accordance with the requirements of AS5100.3. | 86416 |
| 5.6.2 | All piles must be designed in accordance with the requirements of AS2159. | 86417 |
| 5.6.3 | Water pressure build-up as a result of blocked drainage must be considered in the design of all retaining structures and structural elements. | 86418 |
| 5.6.4 | All retaining structures, batters and embankments must be designed to support a minimum 25kPa superimposed dead load surcharge immediately behind their crest. | 86419 |
| 5.6.5 | Reinforced concrete walls must be maintenance free and must not contain any permanent pre-stressed elements that require restressing and servicing for the Design Life. | 86420 |
| 5.6.6 | Permanent structural elements, including ground anchors, soil nails and batters must not extend outside the Licenced Construction Area. | 86421 |
| 5.6.7 | The design of all retaining walls and earth batters must allow for future 1 m deep excavation in front of the retaining walls. | 86422 |
| 5.7 | Above Ground Structures (Excluding OSD and Bridges) | 86423 |
| 5.7.1 | Above ground structures that do not support earth loads or resist road, rail or tram loads or span over roads or railways or tram tracks, must be in accordance with AS3600 and AS4100. | 86424 |
| 5.7.2 | Above ground structures that support earth loads or resist road, rail or tram loads or span over roads or railways or tram tracks, must be in accordance with AS5100. | 86425 |
| 5.7.3 | Anchor bolts and similar structural fixings into concrete elements which are reliant on adhesion must not be used to resist tensile loads where the failure of the anchorage may result in a risk to life or a reduction in operational performance. | 86426 |
| 5.7.4 | Wind loads for above ground structures, excluding bridges, must be in accordance with AS 1170 with an average return interval of 1000 years for ultimate limit states and 25 years for serviceability limit states. | 86427 |
| 5.7.5 | Above ground structures and support elements that may be impacted by road traffic or railway traffic must comply with the provisions of collisions protection in section 11 of AS5100.1, and the relevant loading requirements in section 10 of AS5100.2. | 86428 |
| 5.8 | Particular Location Requirements | 86429 |
| 5.8.1 | Arden | 86430 |

- (a) Groundwater control measures and monitoring systems must be developed and implemented as part of the temporary works to mitigate against adverse impacts on groundwater in the influence zone of Arden Station. The design of these elements and the monitoring system must be based on a detailed hydrogeological impact assessment. 86431
- (b) At Arden Station, to provide levels consistent with surrounding properties designed in accordance with the “Melbourne Water Guidelines for Development in Flood Prone Areas”, entrances and all openings must be as a minimum 600mm above the Moonee Ponds Creek 1:100 year ARI river flooding event level (plus provision for climate change). 86347
- 5.8.2 CBD North 86432
 - (a) Temporary measures must be included to mitigate the migration of known pollution plume at the former Carlton and United Breweries (**CUB**) Site. 86433
 - (b) The design of temporary and permanent reinstatement Works at CBD North Station must maintain the existing overland flow capacity whilst protecting the Temporary Works and Permanent Works from inundation. 86434
 - (c) Floodwaters from the Yarra River must be prevented from entering the CBD North Station via the connection to Melbourne Underground Rail Loop (**MURL**) at platform level. 86353
- 5.8.3 CBD South 86435
 - (a) Temporary injection wells screened in the Moray Street Gravel and Holocene Sand aquifers must be included as part of the temporary works designs for the shaft, adit and cavern excavations for CBD South Station. 86436
 - (b) The temporary injection wells must be installed and commissioned prior to excavation below the groundwater table in order to mitigate against adverse impacts on groundwater. The design of these elements must be based on a detailed hydrogeological impact assessment. 86437
 - (c) The temporary injection well system must include redundancy for the failure of one or multiple injection wells. 86438
 - (d) The groundwater re-charge system described in (a), (b), and (c) above must be the primary mitigation measure against excessive groundwater drawdown and resulting consolidation settlement (as per EPR requirements GM1 to GM 6, GW1, GW3 and CH2). Appropriate additional controls, such as grouting, must be implemented as necessary to ensure compliance with EPR requirements, limit excessive groundwater drawdown and ensure safe progress of the Works. 86439
 - (e) A monitoring programme must be developed that: 86440
 - i. defines staged alert levels and the specified remedial actions that should be implemented if an alert level is reached or exceeded; 86441
 - ii. monitors the effective working of the temporary injection wells and any pre-grouting; and 86442
 - iii. monitors the effectiveness of the remedial measures in limiting any changes in the ground water systems to within the acceptable limits. 86443
 - (f) The connection to FSS must ensure that there is no degradation of service delivery performance of existing infrastructure, including during construction. 86444
 - (g) The design of temporary and permanent reinstatement Works at CBD South Station must maintain the existing overland flow capacity whilst protecting the Temporary Works and Permanent Works from inundation. 86445
- 5.8.4 Domain 86446
 - (a) The design of temporary and permanent reinstatement Works at Domain Station must maintain the existing overland flow capacity whilst protecting the Temporary Works and Permanent Works from inundation. 86447
 - (b) The design of Domain Station must accommodate and protect the re-routed South Yarra Main Sewer. 86448
 - (c) Project Co must liaise with Melbourne Water to agree mitigation measures to be adopted to reduce the risk of damaging the re-routed South Yarra Main Sewer. 86449

- (d) Project Co must liaise with the Early Works Managing Contractor to co-ordinate the design of Domain Station with the re-routed South Yarra Main Sewer. 86450
 - (e) The design of the Domain Station retaining wall termination depth above the extrados of the re-routed South Yarra Main Sewer must be agreed with Melbourne Water. 86451
 - (f) The Domain Station must be structurally independent of the re-routed South Yarra Main Sewer. 86452
 - (g) Groundwater control measures must be developed and implemented as part of the temporary works to mitigate against adverse impacts on groundwater in the influence zone of Domain Station. The design of these elements and the monitoring system must be based on a detailed hydrogeological impact assessment. 86453
- 5.8.5 Western Portal 86454
- (a) An additional future vertical loading provision must be included for Western Portal cut and cover structures as follows: 86455
 - i. 50 kPa (unfactored superimposed dead load) in uniform and patterned (including symmetric and unsymmetrical) arrangements applied at the surface on the northern side of Childers Street where future development could occur; and 86456
 - ii. Load combinations that include a general allowance for a build-up of surface level with a minimum of 20 kPa (unfactored load) in uniform and patterned (including symmetric and unsymmetrical) arrangements applied at ground level. 86457
 - (b) The design must restore equivalent or better access to South Kensington Station facilities. 86458
 - (c) Groundwater control measures must be developed and implemented as part of the temporary works to mitigate against adverse impacts on groundwater in the influence zone of the Western Portal. The design of these elements and the monitoring system must be based on a detailed hydrogeological impact assessment. 86459

| | | |
|-------|---|-------|
| 6 | PPP Support for Rail Systems Alliance Works | 86460 |
| 6.1 | [Not disclosed] | 86461 |
| 6.2 | Cable Containment | 86464 |
| 6.2.1 | Cable containment must be as a minimum in accordance with VRIOGS 012.2.1, VRIOGS 013.3 and TS-SP-013. | 86465 |
| 6.2.2 | Cable containment must be provided throughout the Tunnels and Stations for all RSA systems and equipment. | 86466 |
| 6.2.3 | Cable containment must be provided from the Platform Screen Door System (PSDS) to the track to facilitate bonding. | 86467 |
| 6.2.4 | Track crossing cable containment must provide a covered under track cable path at the following locations: | 86468 |
| | (a) both Station ends; and | 86469 |
| | (b) cross passages and at every 300m along the Tunnels, whichever is the lesser. | 86470 |
| 6.3 | Supports and Fixing | 86471 |
| 6.3.1 | All the supports and fixings must be provided throughout the Tunnel, Station and Portals for all RSA systems and equipment. | 86472 |
| 6.4 | Platform Screen Doors | 86473 |
| 6.4.1 | Project Co must provide the civil and architectural requirements for the PSDS and coordinate with RSA. Refer to the IDS for specific obligations. | 86474 |
| 6.4.2 | Project Co must install the PSDS as designed by the RSA. | 86475 |
| 6.4.3 | [Not disclosed]. | 86476 |
| 6.4.4 | [Not disclosed]. | 86477 |
| 6.4.5 | All the supports and fixings must be provided by Project Co for the PSD installation. | 86478 |
| 6.4.6 | Markings must be provided on the platforms in front of PSDs to delineate waiting/queuing locations to reduce alighting / loading conflicts, and improve dwell times must be provided in consultation with the Train Franchisee. | 86479 |
| 6.5 | Equipment Rooms | 86480 |
| 6.5.1 | Space must be provided in Stations and cross passages to house equipment required by RSA. | 86481 |
| 6.5.2 | Equipment rooms must support top or bottom cable entry into equipment, as required by RSA. | 86482 |
| 6.5.3 | Electrical power must be provided for RSA equipment to be terminated at an appropriately sized distribution board housed in equipment rooms. | 86483 |
| 6.5.4 | [Not disclosed]. | 86484 |
| 6.5.5 | Appropriate air conditioning, ventilation provisions, fire protection and detection systems, flooring, ceiling, fixed lighting, emergency lighting and emergency signage must be provided for RSA equipment rooms. | 86485 |
| 6.5.6 | Earthing and bonding connections must be provided for RSA equipment. Earthing and bonding connections to be terminated at common bonding terminal plates housed in equipment rooms. | 86486 |

| | | |
|------------|---|-------|
| 6.6 | ICT/OCS, Security and Communications | 86487 |
| 6.6.1 | The specifications and preliminary designs for the Tunnels, Stations and Portals information and communications technology (ICT) and Operational Control System (OCS) assets are provided by RSA. The ICT/OCS systems include the CCTV, passenger information display screens (PIDS), public address (PA) system, audio-frequency induction loop (AFIL) and customer help point (CHP) assets. | 86488 |
| 6.6.2 | Project Co must develop the preliminary design for Tunnels, Stations and Portals ICT/OCS in collaboration with RSA to provide the design. | 86489 |
| 6.6.3 | The design must be in accordance with RSA specifications and preliminary designs. | 86490 |
| 6.6.4 | The design must include: | 86491 |
| | (a) the mountings, mounting locations and all cable routes, conduits, pits, foundations, clearances, accesses; | 86492 |
| | (b) integration with the architectural arrangements; and | 86493 |
| | (c) the safe access and maintenance of the systems. | 86494 |
| 6.6.5 | [Not disclosed]. | 86495 |
| 6.6.6 | Communication systems must ensure compatibility with current licensing requirements, system design and interfaces. | 86496 |
| 6.6.7 | All new fibre infrastructure supporting telecommunications must be constructed in accordance with relevant VicTrack standards. | 86497 |
| 6.6.8 | All logging (voice and data) and management systems provided must integrate with existing systems. | 86498 |
| 6.6.9 | OCS cabling must be compliant with VicTrack and Australian cabling standards and the Generic ICT Communications Pathways Specification. | 86499 |
| 6.6.10 | Network Time Protocol (NTP) standard and Coordinated Universal Time (UTC) must be utilised for all equipment where practicable. | 86500 |
| 6.6.11 | [Not disclosed]. | 86501 |
| 6.6.12 | [Not disclosed]. | 86502 |
| 6.6.13 | The design of Station rooms, as specified by the RSA, must provide the Train Franchisee with adequate space for efficient operations, and must consider: | 86503 |
| | (a) control room layouts; | 86504 |
| | (b) locations of workstations; | 86505 |
| | (c) number of workstations; | 86506 |
| | (d) number of roles required to deliver the services; | 86507 |
| | (e) systems required by each role; and | 86508 |
| | (f) desk design and layouts. | 86509 |
| 6.6.14 | Project Co must collaborate with the RSA to ensure the design of the Station rooms and systems are compatible with RSA supplied systems and equipment. | 86510 |
| 6.6.15 | Project Co must address human factors engineering principles in the design of the rooms. | 86511 |
| 6.6.16 | Project Co must collaborate with RSA to enable integration of functions, systems and equipment used within the control centre(s), SCRs, ICRs and FCRs; and support the operator(s) to perform the tasks identified by RSA. | 86512 |
| 6.6.17 | The following telephone and data services are to be provided at the Stations: | 86513 |
| | (a) Station telephone and extension lines for voice and fax communications; | 86514 |
| | (b) [Not disclosed]; and | 86515 |
| | (c) Train Franchisee WAN. | 86516 |
| 6.6.18 | Space and data/power provision must be made for the future installation of PTV Network Status Boards. | 86517 |
| 6.6.19 | [Not disclosed]. | 86518 |
| 6.6.20 | The mobile phone system designed by the RSA must be installed within the Tunnels, Stations and Portals. | 86519 |

| | | |
|------------|--|-------|
| 6.6.21 | [Not disclosed] | 86520 |
| 6.7 | Platforms, Concourse and Tunnels | 86521 |
| 6.7.1 | Appropriate power supplies must be provided for RSA equipment installed in the Tunnel and Stations. | 86522 |
| 6.7.2 | Appropriate cable containment must be provided for RSA equipment and cabling to be installed in the Tunnel and Stations. | 86523 |

| | | |
|------------|--|-------|
| 7 | Stations | 86524 |
| 7.1 | Delivering Great Design | 86525 |
| 7.1.1 | Design Excellence | 86526 |
| | (a) The Station must provide a cohesive design for the public realm that: | 86527 |
| | i. facilitates a journey experience that is engaging and memorable; | 86528 |
| | ii. balances line wide consistency with site responsive design; | 86529 |
| | iii. provides a balance of function integrated landscape, architectural, urban design and precinct response; | 86530 |
| | iv. has an integrated palette for forms, treatments and responses across the project; and | 86531 |
| | v. includes an integrated and coordinated cultural and community identity response. | 86532 |
| | (b) Stations must embed design solutions that are adaptable to change through the lifecycle to ensure that introduced infrastructure and systems merge with the existing design in a cohesive manner. | 86533 |
| | (c) The design must: | 86534 |
| | i. comply with all requirements resulting from approvals including the EPRs; and | 86535 |
| | ii. provide a design balance of function, performance and personality; and | 86536 |
| | (d) Project Co must: | 86537 |
| | i. investigate and implement potential alternatives to potable municipal supplied water for the proposed stations and portals including options to use rainwater, stormwater, wastewater, groundwater and greywater; | 86538 |
| | ii. implement potential decentralised energy networks based on a cost-benefit analysis and investigate as a minimum, cogeneration and trigeneration alternative energy sources at a precinct level; | 86539 |
| | iii. review and investigate the opportunities to implement integrated waste management at precincts; and | 86540 |
| | iv. optimise the design such that environmental and social outcomes are achieved across stations the public realm and OSD. | 86541 |
| 7.1.2 | Project Identity and Legibility | 86542 |
| | The design strategy must: | 86543 |
| | (a) provide a distinctive system wide identity for the whole Project that strengthens the Project's identity in order to enhance the customer experience; | 86544 |
| | (b) incorporate signage that provides a consistent brand across the whole Project and wider rail network; | 86545 |
| | (c) demonstrate a clear distinction between the station and surrounding precincts; | 86546 |
| | (d) provide intuitive access and way finding around the Station precincts, at station entrances and to and from surrounding destinations; | 86547 |
| | (e) provide and strengthen valued view and sightlines to provide visual orientation to and from Station entrances and to landmarks or features; | 86548 |
| | (f) provide integrated way finding signage that assists people with intermodal transport connectivity. The signage must be clear without being visually dominant; | 86549 |
| | (g) be designed to function at all times with adequate lighting at night to promote the safe use of the area and contribute to a 24 hour city; and | 86550 |
| | (h) adopt lighting design in the urban environment with the local authorities that contributes positively to the character of the area, provides a safe environment, including for the visually impaired, incorporates feature lighting in the public realm, is sensitive to surrounding areas and minimises light spill into adjacent properties. | 86551 |

| | | |
|------------|--|-------|
| 7.2 | Architectural Principles | 86552 |
| 7.2.1 | The architecture of Stations must achieve high quality and integrated design outcomes that contribute to and enhance Melbourne’s reputation for design excellence. | 86553 |
| 7.2.2 | Stations must: | 86554 |
| | (a) contribute positively to the built and landscape environments through a well-considered design approach, design resolution and construction detail; | 86555 |
| | (b) provide a user friendly environment and be appropriately sized, both in area and volume to facilitate pleasant, safe and efficient flows of passengers and the general public through both Paid and Unpaid public areas; and | 86556 |
| | (c) provide design arrangements that address architectural themes at all times of the day (i.e. day and night). | 86557 |
| 7.2.3 | Designs must address the placement of displays, queuing space, customer circulation routes and viewing distances in order to maximise passive visibility throughout the Station and Station precincts. | 86558 |
| 7.2.4 | Station environments must provide appropriate and sufficiently sized access and circulation spaces for operational, maintenance and emergency staff to perform their tasks in a safe and effective manner. | 86559 |
| 7.2.5 | Stations must provide efficient and convenient organisational arrangements that address passenger and user dwell and circulation patterns. | 86560 |
| 7.2.6 | Stations must be designed with a lineal spatial arrangement, such that customers approaching the Stations can navigate their way through and around in a logical manner. The sequence is defined as follows: | 86561 |
| | (a) identifying the Station; | 86562 |
| | (b) entering the Station; | 86563 |
| | (c) gather information; | 86564 |
| | (d) purchase a ticket or add value to a travel card; | 86565 |
| | (e) validate a fare; | 86566 |
| | (f) proceed to waiting area(s); and | 86567 |
| | (g) board a service. | 86568 |
| 7.2.7 | Utility manhole covers must: | 86569 |
| | (a) not be located where they can impact the operation of the Stations; | 86570 |
| | (b) be recessed and have the same infill material as the surrounding pavement; | 86571 |
| | (c) use black tinted concrete infill material where they are located in asphalt; and | 86572 |
| | (d) have inspection openings and manholes of the same or a matching material to the surrounding cladding. | 86573 |
| 7.3 | Universal Design | 86574 |
| 7.3.1 | Stations must: | 86575 |
| | (a) provide Disability Discrimination Act (DDA) compliant general arrangements that: | 86576 |
| | i. cater for people with mobility, physical, sensory and cognitive restrictions; | 86577 |
| | ii. provide information on services and facilities for users from linguistically diverse backgrounds; | 86578 |
| | iii. provide continuous spatial navigation with visual and auditory augmentation and tactile aids; | 86579 |
| | iv. provide step-free access to all public areas and train boarding; | 86580 |
| | v. provide ticketing assets at accessible locations; and | 86581 |
| | vi. provide customers with accessibility and mobility needs to be able to board and alight the trains without operational staff support; | 86582 |
| | (b) include equitable routes for non-ambulant and others users requiring lifts from the platform to the street with redundancy provision that provides equitable access; | 86583 |

| | | |
|-----------------------------------|---|-------|
| (c) | provide tactile ground surface indicators (TGSIs) to all door thresholds for the PSDS in accordance with AS1428.4 at the station platforms; | 86584 |
| (d) | provide a minimum of two unisex accessible toilets (mirrored to suit both left and right handed operation) with child/baby facilities and compliant with AS1428.1:2009 located in the Paid areas and in close proximity to toilet facilities for users with ambulant disabilities; | 86585 |
| (e) | be compliant with the Disability Standards for Accessible Public Transport (DSAPT); and | 86586 |
| (f) | encourage customers with reduced mobility to board the train at the doors nearest to the driver's cabin. A visual indication at ground surface and on the PSD must advise customers of this boarding location. | 86587 |
| 7.4 | Passenger Circulation and Queuing | 86588 |
| 7.4.1 | General | 86589 |
| (a) | Stations must be designed to: | 86590 |
| | i. meet the passenger demand defined in Appendix B1; and | 86591 |
| | ii. [Not disclosed] | 86592 |
| (b) | Level of Service (LoS) designations of LoS A through to LoS F must be used to assess pedestrian density and circulation as prescribed in Appendix B2 for the following categories: | 86593 |
| | i. queueing; | 86594 |
| | ii. circulation – uni-directional; | 86595 |
| | iii. circulation – bi-directional; | 86596 |
| | iv. stairways – uni-directional up; | 86597 |
| | v. stairways – bi-directional up; | 86598 |
| | vi. stairways – uni-directional down; and | 86599 |
| | vii. stairways – bi-directional down. | 86600 |
| (c) | Static Calculations must be undertaken for all stations for the AM and PM peak hour periods using the passenger demand characteristics in Appendix B1 to determine preliminary requirements for circulation and queuing areas, ticket gates and vertical transport. | 86601 |
| (d) | Dynamic Modelling, using pedestrian simulation software acceptable to the State, must be undertaken for all stations for the AM and PM peak hour periods using the passenger demand characteristics defined in Appendix B1. The average LoS must be calculated for all publicly-accessible station areas (excluding toilets) for the peak 15-minute interval using dynamic modelling. | 86602 |
| (e) | The peak 15-minute flow in the AM and PM peaks must be calculated using the arrival and departure time profiles specified in Appendix B1. | 86603 |
| (f) | For the purposes of calculating Levels of Service, the following cases must be considered: | 86604 |
| | i. Normal Operations – where trains arrive at scheduled headways of 150 seconds; | 86605 |
| | ii. [Not disclosed] | 86606 |
| | iii. [Not disclosed]. | 86607 |
| | iv. [Not disclosed]. | 86608 |
| | v. [Not disclosed]. | 86609 |
| (g) | [Not disclosed] | 86610 |
| Table 7-1: [Not disclosed] | | |
| (h) | [Not disclosed] | 86611 |
| (i) | Dynamic modelling must take into account passengers waiting on platforms who may choose not to board the next arriving train if it does not travel directly to their desired destination, but instead wait for a later train that does travel directly to their | 86615 |

| | | |
|------------|--|--------|
| | destination. | |
| | (j) Ticket gate capacity for static calculations and dynamic modelling must be based on a throughput of 28 passengers per minute. | 86616 |
| | (k) Stations and the public realm must ensure that circulation areas and vertical transport elements have run-offs and queuing zones that: | 86617 |
| | i. accommodate the maximum number of expected customers using the elements; and | 86618 |
| | ii. do not impact on customer circulation paths. | 86619 |
| | (l) Connections between Station entry and exit points, transfer points and boarding points must be designed to be efficient, including minimising pedestrian travel times, number of vertical circulation elements, and directional changes. | 86620 |
| | (m) Stations must minimise the use of turns greater than 180 degrees for travel paths. | 86621 |
| | (n) [Not disclosed] | 86622 |
| | (o) Passenger movement must consider existing commercial facilities and spatial constraints within MCS and FSS. | 86623 |
| | (p) The Station design must assist with the distribution of passengers along platforms to encourage even usage of train doors and minimisation of alighting and boarding times. | 86624 |
| | (q) Stations must provide passenger circulation space surrounding or adjacent to the vertical transportation connecting the Station entrance to the Station concourse.[Not disclosed]. | 86625 |
| | (r) [Not disclosed]. | 150434 |
| | (s) [Not disclosed] | 150440 |
| | (t) [Not disclosed] | 150441 |
| 7.4.2 | Special Event Mode | 86626 |
| | (a) The design must allow for the delivery of 24-hour passenger services to support special events in the city on five (5) days of the year. | 86627 |
| | (b) [Not disclosed] | 86628 |
| | (c) [Not disclosed] | 86632 |
| | (d) [Not disclosed] | 86633 |
| | | 86634 |
| 7.5 | Vertical Transport | |
| 7.5.1 | General | 86635 |
| | (a) All lifts, escalators and moving walkways (if provided) must be procured from a single manufacturing entity with a minimum of 10 years manufacturing experience of heavy duty lifts, escalators and moving walkways in a metro, railway or similar environments. | 86636 |
| | (b) [Not disclosed]. | 86637 |
| | (c) [Not disclosed]. | 86638 |
| | (d) All station formed lift, escalator and moving walk pits are to be provided with drainage in accordance with Section 5.2.7. | 86639 |
| | (e) Vertical transport to platforms must be designed to optimise journey time and, where possible, encourage passengers to spread out along the platform subject to first ensuring that the requirements for equitable access are met. | 86640 |
| 7.5.2 | Station specific vertical transport requirements | 86641 |
| | (a) Domain Station | 86642 |
| | i. Vertical transport provision at Domain Station western entrance (Albert Road) from the concourse / underpass level to ground level must be provided by a minimum of two escalators and supplemented by a staircase/s that provides compliance with the nominated LoS for the passenger demand of the Design Case and the nominated headway for normal mode operation with all escalators available. | 86643 |
| | ii. A minimum of two escalators must be provided for Domain Station at the | 86644 |

| | | |
|-------|--|-------|
| | tram island platform entrance from concourse/underpass level to ground level and provision for an additional escalator to meet passenger demand of the Design Case. | |
| | (b) CBD South Station | 86645 |
| | Vertical transport provision for customers at the CBD South Station northern City Square entrance from Level B1 to Ground must be provided with a minimum of two escalators and supplemented by a staircase that provides compliance with the nominated LoS for the passenger demand of the Design Case and the nominated headway for normal mode operation with one escalator unavailable. | 86646 |
| | (c) Additional Provisions | 86647 |
| | [Not disclosed] | 86648 |
| 7.5.3 | Lifts | 86649 |
| | (a) Stations must include robust, and reliable lift systems to provide vertical transport services for the customers, staff and equipment, with particular emphasis on: | 86650 |
| | i. persons with restricted mobility and special needs; | 86651 |
| | ii. support for fire authority intervention; and | 86652 |
| | iii. maneuvering plant, equipment and material to support cleaning, maintenance and/or replacement of small plant and component parts. | 86653 |
| | (b) When determining the number and size of lifts Project Co must consider registered users, unregistered users, elderly, parents, and tourist projections. | 86654 |
| | (c) Stations must include two types of lift being: | 86655 |
| | i. Type 1 – public lift; or | 86656 |
| | ii. Type 2 – Back of House (BOH) / Goods. | 86657 |
| | (d) Through lift car operation must be provided between principle entering and departing stop levels unless the physical constraints of a through car arrangement significantly compromises operational arrangements or imposes significantly increased area requirements. | 86658 |
| | (e) All lifts must: | 86659 |
| | i. be gearless machine roomless lifts rated for a minimum 240 starts per hour; | 86660 |
| | ii. have a minimum capacity of 26 people and a minimum car load capacity of 1950kg; | 86661 |
| | iii. provide a minimum clear internal lift car dimension of 2400mm (L) x 1600mm (W) (taken from any handrail, skit rail, fixture or fitting) and have a minimum lift car ceiling height of 3000mm with the exception of the platform to adit-level lifts at CBD stations for which the minimum lift car ceiling height is 2400mm (subject to demonstrating that all plant and replacements can be undertaken); and | 86662 |
| | iv. have a minimum clear lift car and landing door opening of 1200mm(W) X 2400mm(H). | 86663 |
| | v. include appropriate treatments for corrosion protection systems, waterproof fittings and fixtures and slip resistant floor finishes. All primary construction must be IP65 rated. Secondary construction (for example, fixtures, fittings and lighting) must be IP rated in discussion with the Train Franchisee; | 86664 |
| | vi. have lift pits that are waterproof and have the ability to drain any water at the base. The drainage system must include an automatic pump system to extract out any ingress of water where gravity drainage cannot be achieved. Oil separators must be included within the pits; | |
| | vii. provide climate control systems for all glass lift shafts exposed to solar heat loads to ensure the environment is within acceptable design and code conditions; | 86665 |
| | viii. provide ICT/OCS provisions that comply with the requirements of MTM Standard MCST 031301-01 L1-CHE-STD-008 L; | 86666 |
| | ix. not contain proprietary parts so far as is practical; | 86667 |
| | x. be transparent or provide for an element of transparency (as a minimum | 86668 |

| | | |
|-------|---|--------|
| | 75% both doors) for safety and security reasons; | |
| | xi. be constructed of vandal proof material, and be provided with an anti-graffiti finish; | 86669 |
| | xii. be compliant with DSAPT; | 86670 |
| | xiii. where transparent lifts are provided located central to platform privacy manifestations must be provided around the lower 25% of the lift car to provide privacy from persons at a lower level; | 86671 |
| | xiv. where placed centrally on platforms, have doors on two sides that open central to the platform; | 86672 |
| | xv. provide lift car doors that open away from the track; | 86679 |
| | xvi. [Not disclosed] | 86673 |
| | xvii. [Not disclosed] | 86674 |
| | xviii. not consider the use of inclined lifts at CBD Stations; | 86675 |
| | xix. not be hydraulic lifts; and | 86676 |
| | xx. not allow maintenance lifts to be used whilst determining redundancy for passenger lifts. | 86677 |
| | (f) Service cabling must be provided in the lift shaft and must be run in enclosed, segregated, secure ducts or cable trays with 30% free space by volume. | 86678 |
| | (g) Non lift service cabling must not be installed in lift shafts. | 118560 |
| 7.5.4 | [Not disclosed] | 86680 |
| 7.5.5 | Escalators | 86686 |
| | (a) For the purpose of calculating escalator provision for normal operation with all escalators available an escalator carrying capacity of 100 persons per minute for a 1000 mm wide step at 0.5 m/s must be used (noting 7.5.5(e)iv). | 86687 |
| | (b) For the purpose of calculating escalator provision for normal operation with one escalator unavailable, an escalator carrying capacity of 121 persons per minute for a 1000 mm wide step at 0.65m/s must be used. | 86688 |
| | (c) Escalators must have an IP rating of all parts not less than IP 65. | 86689 |
| | (d) Stations must: | 86690 |
| | i. include escalators with capacity to allow customers to move between the different levels of the Station in a safe and efficient manner; | 86691 |
| | ii. include escalators capable of carrying a minimum of 100 passengers per minute; | 86692 |
| | iii. escalators must be manufactured of low flame, low smoke and toxicity and halogen free materials; and | 86693 |
| | iv. include fire suppression to escalator pits. | 86694 |
| | (e) Stations must include escalators with the following minimum operational and physical attributes: | 86695 |
| | i. heavy duty, transport system escalators capable of operating 24 hours a day 7 days a week; | 86696 |
| | ii. capable of achieving a minimum design life of 20 years; | 86697 |
| | iii. capable of achieving a 16% running time at 100% loading, 34% of running time at 50% loading, 50% of running time at 25% loading; | 86698 |
| | iv. minimum stair tread width of 1000 mm with the exception of the CBD South Station paid connection to FSS at the FSS eastern concourse; | 86699 |
| | v. four flat steps at the upper and lower landing levels; | 86700 |
| | vi. step chains external to the step rollers; | 86701 |
| | vii. stainless steel or glass balustrades; | 86702 |
| | viii. skirting material based on the following minimums: | 86703 |
| | (1) 316 grade stainless steel for externally rated escalator units; and | 86704 |

| | | | |
|-------|-------|---|--------|
| | (2) | 304 grade stainless steel for internally rated escalator units; | 86705 |
| | ix. | step demarcation consisting of the following minimum: | 86706 |
| | (1) | bright yellow lines on both the sides and the front edges of each step; and | 86707 |
| | (2) | lighting within the step band at each landing. | 86708 |
| | | Plastic demarcation step treads are not to be installed as part of the escalator step construction. | 118561 |
| 7.5.6 | | Moving Walks (if provided) | 86709 |
| | (a) | Where internal station pedestrian travel times benefit, Stations may include moving walks. Where provided, moving walks must: | 86710 |
| | i. | have an inclination less than 1 in 14; | 86711 |
| | ii. | be externally rated where the moving walk unit is subject to rainfall or wind driven rain; and | 86712 |
| | iii. | include fire suppression to moving walk pits. | 86713 |
| | (b) | Moving walks must include the following operational and physical attributes: | 86714 |
| | i. | be heavy duty, transport system moving walks capable of operating 24 hours a day 7 days a week; | 86715 |
| | ii. | be capable of achieving a 16% running time at 100% loading, 34% of running time at 50% loading, 50% of running time at 25% loading; | 86716 |
| | iii. | have a minimum pallet width of 1200 mm; | 86717 |
| | iv. | have pallet chains external to the pallet rollers; | 86718 |
| | v. | have stainless steel or glass balustrades; | 86719 |
| | vi. | be variable pallet speed moving walks with a minimum rated pallet speed of 0.75m/sec; | 86720 |
| | vii. | have variable voltage/ variable frequency regenerative drive systems; | 86721 |
| | viii. | automatic restart in compliance with clause 5.12.2.4.2 a) of EN115; | 86722 |
| | ix. | be high specification frequency drive units capable of undertaking a controlled stop and similarly a controlled acceleration under full load in emergency evacuation times; | 86723 |
| | x. | [Not disclosed]; and | 86724 |
| | xi. | include real time remote monitoring and control via the BMS. | 86725 |
| 7.5.7 | | Stairs – Publicly Accessible | 86726 |
| | (a) | Stairs must be weather protected, taking into account the effects of wind driven rain. | 86727 |
| | (b) | Stations must include stairs arrangements that enable sightlines over the full extent of the stair to assist with passive surveillance. | 86728 |
| | (c) | Stair tread materials must be in accordance with 'HB 198:2014 Guide to the Specification and Testing of Slip Resistance of Pedestrian Surfaces' as a minimum. | 86729 |
| | (d) | Stairs located above occupied areas must be provided with solid side protectors to prevent objects falling to the level/s below. | 86730 |
| | (e) | Contrast stair nosings must be set flush to the top face of the stair tread. | 86731 |
| | | | 86732 |
| 7.6 | | Station specific requirements | |
| 7.6.1 | | CBD North Station | 86733 |
| | (a) | CBD North Station must: | 86734 |
| | i. | include a Paid access connection between CBD North and MCS with capacity to support the passenger demand of 2031 and the Design Case; | 86735 |
| | ii. | include direct access between the Paid area of CBD North Station and the surface independent of the shared CBD North / MCS concourse area; | 86736 |
| | iii. | design the Northern station entrance not precluding the New Academic Street (NAS) development of RMIT, on the Swanston Street and Franklin | 86737 |

| | | |
|-------|--|--------|
| | Street frontages; | |
| iv. | not preclude a future entry directly into RMIT either through Building 14 or to Bowen Street; | 86738 |
| v. | consider the location of RMIT entry points into the NAS and Building 14 onto Franklin Street when determining the location of lifts, escalators and other above ground Station infrastructure; | 86739 |
| vi. | enable customers to move between CBD North and MCS without having to touch off and on through barriers as follows: | 86740 |
| | (1) passengers must be able to transfer between CBD North Station platforms and MCS without transiting a gate line; and | 86741 |
| | (2) a passenger barrier must be provided to use, if required, to prevent the transfer between CBD North Station and MCS and for the purposes of crowd management at the concourse and platform levels; and | 86742 |
| vii. | provide a connection between CBD North and MCS tunnels that can be closed to prevent water ingress in the case of flooding in MURL. | 86743 |
| (b) | The Paid access connection between CBD North and MCS must not degrade concourse circulation relative to the conditions prior to Day 1 without Melbourne Metro, including: | 86744 |
| i. | emergency egress capacity, as assessed accordance with MTM - L1-SQE-PRO-001 Management of Change Procedure and MTM – Structures and facilities standard – Metropolitan Railway Station Section 13 – Station Refurbishment; | 150444 |
| ii. | accessibility of existing vertical transport; | 86748 |
| iii. | existing revenue sources i.e. vending machines and advertising (unless otherwise agreed); and | 86749 |
| iv. | maintainability of existing services and infrastructure. | 86750 |
| | Assessment of the items above must be made prior to commencement of Works. | 86751 |
| (c) | [Not disclosed] | 86752 |
| 7.6.2 | CBD South Station | 86753 |
| (a) | CBD South Station must: | 86754 |
| i. | reinstate and make good: | 86755 |
| | (1) the areas affected by construction at Federation Square in a manner consistent with the requirements of section 4.1.5(g), including the Western Shard to an architectural form and finish and to meet servicing or other requirements approved by Federation Square Management; | 86756 |
| | (2) components of the Nicholas Building affected by demolition of the KFC Building at 27 Swanston Street, including at Level 3 and Basement level to form and finish approved by the owners of the Nicholas Building; | 86757 |
| | (3) the balcony to the Westin Hotel in accordance with Schedule 33; and | 86758 |
| ii. | provide an access connection between the Paid area of CBD South and the Paid area of FSS with capacity to support the passenger demand of 2031 and the Design Case, and, subject to land availability, provide lift access at the existing Degraeves Street entrance to Campbell Arcade; | 86760 |
| iii. | enable customers to move between CBD South and FSS without having to touch off and on through barriers: | 86761 |
| | (1) passengers must be able to transfer between stations without transiting a gateline; and | 86762 |
| | (2) a passenger barrier must be incorporated for use to prevent the transfer between stations for the purposes of crowd management; and | 86763 |

| | | |
|------------|--|--------|
| iv. | provide a direct connection to the Paid area of FSS that must not degrade, relative to the conditions prior to Day 1 without Melbourne Metro, including: | 86764 |
| (1) | [Not disclosed] | 150446 |
| (2) | existing revenue sources i.e. vending machines and advertising (unless otherwise agreed); and | 86769 |
| (3) | maintainability of existing services and infrastructure. | 86770 |
| | Assessment of the items above must be made prior to commencement of Works. | 86772 |
| | Project Co must demonstrate that reasonable endeavours have been used to minimise the potential impact of introducing new localised areas of congestion or exacerbating existing conditions, including within runoff zone on the FSS platforms as described by MTM – Structures and facilities standard – Metropolitan Railway Station for vertical transport. | |
| | In additional to the assessment defined above, Project Co must, by way of pedestrian modelling, demonstrate the impact of passenger circulation to and from the interchange with CBD South on FSS platform circulation for review by the State and Train Franchisee. | |
| (b) | CBD South Station northern entrance must provide a reinstated City Square in accordance with a design developed in consultation with the City of Melbourne, including: | 86773 |
| i. | a primary shared entrance to CBD South Station and any subterranean public/ retail space to be provided by Project Co at the corner of Collins and Swanston Streets; | 86774 |
| ii. | a structure that allows for a range of surface types and landscape elements to be installed above; | 86775 |
| iii. | provision for a surface level cafe; | 86776 |
| iv. | maintaining access to the retail tenancies at the Westin Hotel promenade level; | 86777 |
| v. | vents, stairs, tree locations and raised surfaces located at the perimeter of City Square; and | 86778 |
| vi. | a set-down in the City Square slab, in close proximity to the location of the existing water feature, to allow for the provision of a water feature. | 86779 |
| (c) | [Not disclosed] | 86780 |
| (d) | The existing FSS Swanston Street eastern concourse toilets must be relocated to a position in accordance with PTV/MTM requirements to accommodate a paid side passenger connection between CBD South Station. | 86781 |
| (e) | Use of the Cocker Alley (South) laneway under the western portion of 222-224 Flinders Street building in the final design should consider the building history. Any changes to the building are to be with agreement from the building owner. | 86782 |
| 7.6.3 | Domain Station | 86783 |
| (a) | Domain station design must not preclude a future extension of the proposed subway continuing under the Shrine Grounds and beyond. | 86784 |
| (b) | The Domain Station pedestrian subway must be designed so that it can be closed to access at night. | 86785 |
| (c) | Every effort must be made to locate the chiller plant within or next to an existing or proposed building. | 86786 |
| 7.7 | Station design requirements | 86787 |
| 7.7.1 | General | 86788 |
| (a) | Station rooms that interface with the RSA, operator(s) or the Train Franchisee must be provided in accordance with the requirements set out in Appendix B3. | 86789 |
| (b) | All necessary furniture, fittings and equipment must be provided for the Train Franchisee Day-1 occupancy and operations and as required to interface with the RSA. | 86790 |

| | | |
|-------|--|-------|
| | (c) Stations must provide shelter and seating for customers in Station forecourts, waiting areas, concourses and Paid areas. | 86791 |
| | (d) Stations must minimise the need for screens and barriers in the design of the infrastructure. Where screens and barriers are necessary they must be treated as components in the overall design composition and align with the character and design intent of the place. | 86792 |
| | (e) The design must eliminate: | 86793 |
| | i. where practical, voids that may be inhabited by vermin; | 86794 |
| | ii. exposed beams or structures where birds may perch, where this cannot be satisfied deterrents must be installed; | 86795 |
| | iii. voids or fenced areas that cannot be accessed for de-littering; and | 86796 |
| | iv. [Not disclosed]. | 86797 |
| | (f) The design must eliminate gaps which might allow rubbish to accumulate (e.g. between stairs and balustrades, allowing ingress of rubbish into void under stairs) where practical. | 86798 |
| | (g) Confined spaces must be avoided in the design SFAIRP. | 86799 |
| | (h) Materials must provide adequate durability, vandal proofing and comply with the Building Code of Australia (BCA) and NFPA 130. | 86800 |
| | (i) Synchronised clocks in the Stations must be provided in the paid and unpaid areas. | 86801 |
| | (j) Each station must provide facilities for Station and to train Station staff to support operation. | 86802 |
| | (k) [Not disclosed]. | 86803 |
| | (l) [Not disclosed]. | 86804 |
| | (m) Architectural elements associated with the smoke management system must not come within the structural gauge or affect passenger handling areas (including escalator shafts, walkway / approach areas etc.). | 86805 |
| | (n) Any sprinkler system must be installed in such a way to be easily maintained and without requirement for overhead isolations. | 86806 |
| 7.7.2 | Entrances | 86807 |
| | (a) [Not disclosed]. | 86808 |
| | (b) The design must eliminate opportunities for rubbish to be thrown onto entrance roof tops, causing blockages to gutters and down pipes. | 86809 |
| | (c) [Not disclosed] | 86810 |
| | (d) Station entrances must be weather protected, taking into account the effects of wind driven rain. | 86811 |
| | (e) Station entrances must include a free draining non-slip section. | 86812 |
| 7.7.3 | Concourses | 86813 |
| | (a) Station concourses must provide integrated general arrangements (location, lighting, accessibility, shelter) and highly visible ticketing and fare infrastructure. | 86814 |
| | (b) [Not disclosed] | 86815 |
| | (c) Public phones in the unpaid area of the station must be at an accessible height for wheelchair customers and with a sign displaying the PTV TTY number for hearing impaired customers. | 86816 |
| | (d) Telephone and data services for the operation of commercial facilities including retail kiosks and vending machines must be provided. | 86817 |
| 7.7.4 | Customer Service Centres | 86818 |
| | Customer Service Centres (CSCs) must: | 86819 |
| | (a) be positioned to service both paid and unpaid concourse areas; | 86820 |
| | (b) be located in a conspicuous area of the concourse with sightlines across the concourse and gate line areas, and provide either: | 86821 |
| | i. a readily accessible connection to a dedicated unisex toilet and tea point/meal preparation amenities (i.e. sink, microwave, small fridge); or | |

- ii. [Not disclosed]
- (c) have windows which offer an open, approachable appearance; 86822
- (d) have an intuitive queuing system; 86823
- (e) not have queuing arrangement that impacts on horizontal circulation; 86824
- (f) [Not disclosed] 86825
- (g) [Not disclosed] 86826
- (h) allow staff working in CSCs at any of the primary or Accessible service counters to have a clear and direct line of sight of the entire gate line from their normal working position (without having to stand, bend, lean or turn); 86827
- (i) have at least two ticket windows at each concourse. Additional CSC windows must be provided to reflect the station entry passenger demand, and ticket windows numbers to the Unpaid side of the concourse based on the following formula: 86828

No. of Ticket Windows⁽¹⁾ = $2046 \text{ Peak 1 hour Station Entry Demand} \times 1.55\%^{(2)} \times 95\%^{(3)} \times 45 \text{ (sec)}^{(4)}$
3600⁽⁵⁾

where:

- (1) = No. of Ticket Windows rounded up to a whole number
- (2) = Percentage of passengers requiring tickets at ticket windows
- (3) = Percentage of passengers requiring tickets during the peak hour of ticket sale not waiting more than 3 minutes
- (4) = Average transaction time
- (5) = 20 (No. of 3 minute periods in 1 hour) X 180 (No. of seconds in 3 minutes)

- (j) include one accessible service counter located on the unpaid side of the gate line, external height must comply with AS 1428.2 Clause 24.1.1 and internal height to comply with AS/NZS 4443:1997 (680mm-735mm, with a preferred height of 710mm-720mm); 86829
- (k) include an accessible service counter located on the paid side of the gate line; 86830
- (l) have service counters that all face in the same direction to enable a single operator to monitor all windows at once; 86831
- (m) make spatial allowance and provide services for Myki ticket office terminals (**TOTs**) at each service counter; 86832
- (n) Provide services for one EFTPos machine per TOT; 86833
- (o) [Not disclosed] 86834
- (p) [Not disclosed] 86835
- (q) [Not disclosed] 86836
- (r) [Not disclosed] 86837
- (s) [Not disclosed] 86838
- (t) [Not disclosed] 86839
- (u) [Not disclosed] 86843
- (v) make spatial provision and services for a Myki Winterm, located to ensure that the gate line is visible whilst operating the Winterm; 86844
- (w) provide a station landline telephone; 86845
- (x) provide a SEPAC telephone (the Train Franchisee's train control telephone system); 86846
- (y) provide data/communication points and general purpose outlets (**GPOs**) as required for the ticket office equipment; 86847
- (z) provide carpet floor with underlay in ticket offices; 86848
- (aa) provide a bulletin board; and 86849
- (bb) provide a waste bin. 86850

7.7.5 [Not disclosed] 86851

| | | |
|-------|--|-------|
| 7.7.6 | Customer Services and Ticketing | 86853 |
| | Stations must provide: | 86854 |
| | (a) services and cable trunking routes and provide spatial provision for ticket gate control assets (LEOS and GAC) within each station entry in proximity to the fare barrier line; | 86855 |
| | (b) adequate numbers of ticketing assets to allow customers to touch on and off without causing congestion to meet the LoS requirements; | 86856 |
| | (c) revenue protection gates (i.e. ticket gates) throughput efficiency at the Stations must support station operation at Day-1; | 86857 |
| | (d) for the installation of systems to provide customers with access to reliable, clear, consistent, timely and accurate service information in the event; | 86858 |
| | i. of unplanned disruptions, including the nature of the disruption, what services are being impacted and provided with transport alternatives to complete their journey, where possible; and | 86859 |
| | ii. information on planned works or events which may impact travel times or normal operation of services, or create significant noise disruption; and | 86860 |
| | (e) customer service counters that provide: | 86861 |
| | i. ticket purchasing; | 86862 |
| | ii. information on the next available train; | 86863 |
| | iii. network connections; | 86864 |
| | iv. basic tourist information on the surrounding precinct; | 86865 |
| | v. special event related information prior to the event; | 86866 |
| | vi. special event fares and ticketing options; and | 86867 |
| | vii. digital displays that provide tourism and event information. | 86868 |
| 7.7.7 | Gatelines | 86869 |
| | (a) For the purposes of fare protection barrier gate number calculations, passenger throughput must be based on 28 passengers per minute. | 86870 |
| | (b) Day-1 gate numbers must be based on the 2031 Project Case passenger demand forecasts set out in Appendix B1. | 86871 |
| | (c) The arrangement of gatelines must provide for an ultimate gate arrangement and barrier numbers based on the Design Case passenger demand forecasts set out in Appendix B1 for each station concourse. | 86872 |
| | (d) The total number of gates must provide a minimum redundancy of 1 gate for every 8 gates or 1 gate where less than 8 gates are required. | 86873 |
| | (e) Spatial provisions for two (2) wide barrier gates must be provided per gateline. Wide barrier gates must be provided at the end of the gateline closest to the CSC. | 86874 |
| | (f) Stations must provide services and cable trunking routes and provide spatial provision for ticket gates and control assets. | 86875 |
| | (g) Spatial provision for a gate attendant control (GAC) with manual control functionality (individually, and grouped) is to be provided adjacent to each gateline in proximity to the wide gate. | 86876 |
| | (h) [Not disclosed] | 86877 |
| | (i) Passenger counting technology must be installed at the gateline and interchange adits to inform the SCR and NCC of passenger influx. | 86878 |
| | (j) A bypass gate must: | 86879 |
| | i. [Not disclosed] | 86880 |
| | ii. be no less than 1.2m wide or such width determined appropriate for the passage of maintenance plant and equipment; | 86881 |
| | iii. not mimic the appearance of the gateline but that of the adjacent fixed delineation barrier; and | 86882 |

| | | |
|--------|---|-------|
| | iv. [Not disclosed] | 86883 |
| | (k) Customers requiring access with children, those with luggage or bulky items and anyone having difficulty using the barriers, must have an alternative way to enter the Paid area. | 86884 |
| | (l) The design must include provision for digital overhead signage at wide barrier gate locations for use during heavy passenger flow times where the location is not immediately visible at ground level. Signage must be controlled from nearest CSC and SCR. | 86885 |
| 7.7.8 | First Aid Room | 86886 |
| | All Stations must provide a dedicated first aid treatment facility. | 86887 |
| 7.7.9 | Parents Room | 86888 |
| | Parents Rooms must: | 86889 |
| | (a) be provided at all stations; | 86890 |
| | (b) be a room separate to the rest room facilities, in proximity of the CSC with a separate entrance located off the paid concourse; | 86891 |
| | (c) [Not disclosed] | 86892 |
| | (d) [Not disclosed]; and | 86893 |
| | (e) display the room status at the external entrance. | 86894 |
| 7.7.10 | Passenger Toilets and Facilities | 86895 |
| | (a) Publicly accessible toilets must not be located on station platforms. | 86896 |
| | (b) Male and Female sanitary facilities for passengers must be based on “BCA Table F2.3, Class 9b – Public halls, function rooms or the like”. | 86897 |
| | (c) The number of persons for each of the stations must be calculated based on the maximum peak 3 minute passenger numbers of the passenger demand of the Design Case. | 86898 |
| | (d) Sanitary facilities must be provided on the basis of equal numbers of males and females. | 86899 |
| | (e) As a minimum: | 86900 |
| | i. male and female sanitary facilities must be provided for Arden, Parkville and Domain Stations; | 86901 |
| | ii. CBD North must provide male and female sanitary facilities to both the Franklin Street and Swanston Street entrances; and | 86902 |
| | iii. CBD South Station must provide male and female sanitary facilities at both the City Square and the Southern entrances. | 86903 |
| | (f) Male and female toilets must: | 86904 |
| | i. [Not disclosed] | 86905 |
| | ii. provide door-less entry arrangements to toilets for users with ambulant disabilities; | 86906 |
| | iii. be designed with simple architectural detailing, with robust materials and standard fixtures and fittings that are readily available; | 86907 |
| | iv. have cubicle doors and door catches designed to enable emergency escape and emergency access from the outside; | 86908 |
| | v. be designed such that exposed fixings, subject to human contact, must be recessed, smooth and flush. Domed heads must be used where flush countersunk heads are not practicable; and | 86909 |
| | vi. include integrated bins, sanitary disposal units, needle disposal containers and hand dryers. | 86910 |
| | (g) All Stations must provide: | 86911 |
| | i. in addition to the two unisex accessible toilets described in 7.3.1(d), a minimum of one toilet that is suitable for users with ambulant disabilities, located in the male and female sanitary facilities; | 86912 |

| | | | |
|--------|-------|--|--------|
| | ii. | automated cavity sliding, DDA compliant toilet doors with privacy locking system, mushroom head activation buttons, braille control plates, toilet status indicators and key operated emergency opening from external side to all unisex accessible toilets; and | 86913 |
| | iii. | DDA compliant toilets with an emergency call button linked directly to station staff or other emergency support. | 86914 |
| (h) | | Changing Places Facilities (CPF) | 150447 |
| | | A minimum of one Changing Places Facility must be provided at Arden, Parkville, CBD North, CBD South and Domain Stations. The facilities must: | 150448 |
| | i. | where possible, be located in close proximity to the Customer Service Centre (CSC); | 150449 |
| | ii. | be visible from the CSC [Not disclosed]; | 150450 |
| | iii. | be provided with a lockable automatic sliding door operable by MLAK locking system and a secure access release (interlocked to prevent opening when occupied) from the CSC; | 150451 |
| | iv. | display the room status at the external entrance; | 150452 |
| | v. | be located at street level or in the Unpaid area for the convenience of mobility impaired users, where possible; | 150453 |
| | vi. | not obstruct passenger circulation; | 150454 |
| | vii. | be designed and constructed in compliance with the “Changing Places, Transforming Lives –Information Guide & Technical Standard” (June 2017) – Option 1A or Option 1B, unless otherwise agreed with the relevant authority; and | 150455 |
| | viii. | be additional to the required disability accessible toilets and parent’s room. | 150456 |
| 7.7.11 | | Commercial / Retail Concessions | 86915 |
| | (a) | Station retail and retail queueing areas must not obstruct passenger circulation, emergency egress or operations and maintenance requirements. | 86916 |
| | (b) | Retail facilities must not be located on the station platform. | 86917 |
| | (c) | [Not disclosed] | 86918 |
| | (d) | [Not disclosed] | 86919 |
| | (e) | All commercial / retail concessions must be separately metered. | 86920 |
| 7.7.12 | | Vending Machines | 86921 |
| | (a) | The proposed location and number of vending machines in the Stations must be assessed and approved by stakeholders. | 86922 |
| | (b) | Vending machines must be housed with the front face flush with wall surfaces or within architecturally designed cladding units when free-standing. Concealed services connections must be provided for vending machines. | 86923 |
| | (c) | Vending machines and vending queueing areas must not obstruct passenger circulation, emergency egress or operations, maintenance requirements and must comply with DSAPT. | 86924 |
| | (d) | Where applicable Vending machines must be fully weather protected, located in proximity to high traffic areas and preferably recessed to prevent vandalism and eliminate blind spots. [Not disclosed]. | 86925 |
| | (e) | Each vending machine location must be provided with suitable footings, a lockable IP66 double GPO and concealed data pathway. | 86926 |
| | (f) | Vending machine sockets must be mounted out of reach of public and captive screw type. | 86927 |
| | (g) | A secure data point must be installed at each vending machine location for the provider to manage payment systems and remote monitoring of the asset maintenance and stock levels. | 86928 |
| | (h) | Remote monitoring is a feature necessary to avoid unnecessary station visits by external suppliers during operational hours. | 86929 |
| | (i) | Vending machines must only utilise a card payment facility. | 86830 |

| | | |
|--------|---|-------|
| | (j) Provision must be made for vending machines to be anchored to the floor, platform or wall to prevent tipping. | 86831 |
| 7.7.13 | ATMs | 86932 |
| | (a) The ATM and associated queueing areas must not obstruct passenger circulation. | 86933 |
| | (b) ATMs must: | 86934 |
| | i. be located at concourse level in the Unpaid area for the convenience of passengers; | 86935 |
| | ii. be provided with line of sight to the CSC. [Not disclosed]; and | 86936 |
| | iii. be housed with the front face flush with wall surfaces or within architecturally designed cladding units when free-standing. Concealed services connections must be provided for ATMs. | 86937 |
| 7.7.14 | [Not disclosed] | 86938 |
| 7.7.15 | [Not disclosed] | 86941 |
| 7.7.16 | [Not disclosed] | 86949 |
| 7.7.17 | General Offices | 86953 |
| | General offices must: | 86954 |
| | (a) have a one-way window which provides a direct view from the workstations into the CSC and of the service counters. A user in the normal seated position must not have to turn to view the service counters; | 86955 |
| | (b) provide a minimum of one general use workstation with Train Franchisee intranet access, office chair and mobile storage caddy. Provision must be made for future installation of a second workstation (with office chair and mobile storage caddy); | 86956 |
| | (c) provide a station landline telephone; | 86957 |
| | (d) provide data/communication points and GPOs, as required for general office equipment; | 86958 |
| | (e) include a bulletin board; | 86959 |
| | (f) include a white board; | 86960 |
| | (g) include cupboards, drawers for stationery storage and appropriate loose furniture; and | 86961 |
| | (h) provide carpeted floor with underlay. | 86962 |
| 7.7.18 | [Not disclosed] | 86963 |
| 7.7.19 | Myki Equipment | 86975 |
| | Myki equipment cabinets must: | 86976 |
| | (a) be located in a low risk location that will not interfere with passenger flows; | 86977 |
| | (b) be located such that maintenance can be safely undertaken during operational hours; | 86978 |
| | (c) [Not disclosed]; | 86979 |
| | (d) not be located in the Station offices or amenities areas; | 86980 |
| | (e) provide adequate clearances for maintenance; and | 86981 |
| | (f) be provided separately from the CER. Myki ticketing will only operate at the station. | 86982 |
| 7.7.20 | Platforms | 86983 |
| | (a) The platform length must support operation of the Extended HCMT, the platforms must be a minimum of 225 metres in length. | 86984 |
| | (b) Platforms must be designed to accommodate a PSDS incorporating PSDs to the full extent of the active platform length. | 86985 |
| | (c) The PSDS must be a full height, fully closed system. | 86986 |
| | (d) The PSDS and PSDs must maximise the extent of full height transparent glazing and minimise the extent of glazing manifestations in order to improve customers' sightlines from platform to train and train to platform. | 86987 |
| | (e) The PSDS top guide assembly and drive system must be concealed within a continuous linear bulkhead system located above the PSDS. | 86988 |

| | | |
|--------|---|-------|
| (f) | The PSDS and PSDs must minimise the extent of vertical support structures. | 86989 |
| (g) | Active and static wayfinding and information systems and signage (where present) must be integrated in the design arrangement of the bulkhead system above the PSDS. | 86990 |
| (h) | The train – platform interface (horizontal and vertical) must be determined in collaboration with HCMT contractor, PTV and RSA SFAIRP to reduce the effective gap between train, platform and PSD. | 86991 |
| (i) | The HCMT contractor must provide a dynamic gauging model of HCMT moving through MMRA stations based on proposed station alignment, track maintenance standards and speed data as input. | 86992 |
| (j) | The proposed effective gap between train, platform and PSD must be assessed via formal risk assessment in collaboration with HCMT contractor, PTV and the RSA. | 86993 |
| (k) | An assessment of compliance with DSAPT must be completed in collaboration with the contractor for the HCMT Project, PTV and the RSA. | 86994 |
| (l) | The station platform coping trackside edge must be constructed to the agreed offsets and the following tolerances measured from the as-constructed track position: | 86995 |
| | i. vertical (above top of rail) +0, -2mm; and | 86996 |
| | ii. horizontal (from centreline) +2, -0mm. | 86997 |
| (m) | Platforms must: | 86998 |
| | i. use a coping to the platform edge at the PSD threshold that: | 86999 |
| | (1) is integral to the platform, (i.e. level with the non-coping platform); | 87000 |
| | (2) provide 30 percent luminance contrast at the PSD door threshold; and | 87001 |
| | (3) extend from the customer side face alignment of the PSDS to the platform coping, track side edge; | 87002 |
| | ii. be level across the traverse section; | 87003 |
| | iii. facilitate unassisted boarding from the normal stopping position; | 87004 |
| | iv. provide a clear platform width, free of all structure, equipment, furniture and fixtures of at least 4.0 metres from the customer side face of the PSDS at CBD North, CBD South and Parkville Stations; | 87005 |
| | v. provide a clear platform width, free of all structure, equipment, furniture and fixtures of at least 3.0 metres from the customer side face of the PSDS at Arden and Domain Stations; and | 87006 |
| | vi. provide egress routes from the Tunnel to the Stations for escape of people in the event of an emergency situation. | 87007 |
| (n) | Stations must provide safe zones at the Station platform level that: | 87008 |
| | i. contain a CHP; | 87009 |
| | ii. are lit; and | 87010 |
| | iii. [Not disclosed]. | 87011 |
| (o) | Train door locations must be demarcated on the platform to improve boarding and alighting. | 87012 |
| (p) | Passenger facilities must be distributed along the platform to encourage passenger to board all carriages on the train and not congregate in one area. | 87013 |
| (q) | [Not disclosed]. | 87014 |
| 7.7.21 | [Not disclosed] | 87015 |
| 7.7.22 | [Not disclosed] | 87021 |
| 7.7.23 | [Not disclosed] | 87041 |
| 7.7.24 | Waste Management | 87043 |
| | (a) Station waste infrastructure must: | 87044 |
| | i. facilitate the efficient collection, storage and removal of waste; | 87045 |

| | | | |
|------------|------|--|-------|
| | ii. | influence changes in behaviour to reduce overall levels of waste collected and change behaviours to increase levels of recycling; and | 87046 |
| | iii. | [Not disclosed] | 87047 |
| (b) | | Cleaners Rooms | 87048 |
| | i. | A main cleaners' store room for cleaning sundries and equipment of no less than 20m ² , with hot / cold running water and wash facilities must be provided to the main concourse; | 87049 |
| | ii. | Each interstitial floor containing primarily BOH or equipment rooms must be provided with a cleaners' store room for cleaning sundries and equipment of no less than 10m ² with hot/cold running water and wash facilities fitted with a waste sump; and | 87050 |
| | iii. | Floor access to and within cleaners' store rooms must be level. | 87051 |
| (c) | | Refuse collection room must: | 87052 |
| | i. | be of no less than 12m ² and must be provided in the back of house/operational area; | 87053 |
| | ii. | be situated in close proximity to the service lift from platform to concourse, and concourse to ground; and | 87054 |
| | iii. | have an extraction fan. | 87055 |
| (d) | | Separate transparent waste bins for recyclables and general waste must be provided in the Stations. | 87056 |
| (e) | | Waste bins must be provided throughout the Station environment at a frequency agreed with the Train Franchisee. | 87057 |
| (f) | | Waste bins must be provided with lids to prevent access by vermin. | 87058 |
| 7.7.25 | | Project Co must not degrade the existing precinct waste collection services. | 87060 |
| 7.7.26 | | Precinct waste infrastructure must, where practical: | 87062 |
| | (a) | improve functionality; | 87063 |
| | (b) | improve amenity; | 87064 |
| | (c) | reduce noise; | 87065 |
| | (d) | reduce congestion and CO2 emissions; | 87066 |
| | (e) | increase levels of recycling; | 87067 |
| | (f) | increase safety; | 87068 |
| | (g) | influence changes in behaviour; | 87069 |
| | (h) | provide for both Station and over site development in a single location; and | 87070 |
| | (i) | provide for local precinct waste management to assist decluttering streets and laneways connected to Station entries. | 87071 |
| 7.7.27 | | Precinct waste infrastructure must utilise: | 87073 |
| | (a) | precinct traffic management / site areas; and | 87074 |
| | (b) | corridors / space from Utility Provider relocations, protection, local connections. | 87075 |
| 7.7.28 | | [Not disclosed] | 87076 |
| | | | 87100 |
| 7.8 | | Materials, Finishes and Components | |
| 7.8.1 | | Project Co must: | 87101 |
| | (a) | not use materials and finishes in proximity of the rail tracks that present reflections or glare from the sun or artificial light sources that could distract operational staff from their tasks; | 87102 |
| | (b) | not use or locate assets, equipment or materials that may distract or confuse train driver interpretation of movement authority; | 87103 |
| | (c) | utilise materials and components that are fit for purpose, are robust and resistant to vandalism when located in accessible zones and require low maintenance. Specification and detailing of finishes and surfaces must be appropriate for the intended function of the area; | 87104 |
| | (d) | incorporate maintenance access requirements that minimise or negate the impact | 87105 |

| | | |
|-------|---|-------|
| | on operational functionality or passenger/user amenity; | |
| (e) | use material types and detailing based on the whole of life considerations that include: | 87106 |
| | i. maintenance; | 87107 |
| | ii. replacement / renewal; | 87108 |
| | iii. cleaning; | 87109 |
| | iv. repair; | 87110 |
| | v. accessibility and tampering by the public; and | 87111 |
| | vi. thermal and structural movement; | 87112 |
| (f) | minimise the use of material types and detailing that require specialised cleaning regimes, access and equipment; | 87113 |
| (g) | design elements to prevent scaling (climbing) of surfaces; | 87114 |
| (h) | design elements to deter urban sports activities; and | 87115 |
| (i) | design elements to eliminate recesses in cladding systems. | 87116 |
| 7.8.2 | Floors and Paving | 87117 |
| | Stations must: | 87118 |
| (a) | include pedestrian trafficable floor and paving materials in accordance with 'HB 198:2014 Guide to the Specification and Testing of Slip Resistance of Pedestrian Surfaces' as a minimum; | 87119 |
| (b) | include coordinated control, movement and expansion joints to be aligned with paving and tiling modules; and | 87120 |
| (c) | eliminate trip hazards, including exposed structural base plates within pedestrian areas. | 87121 |
| 7.8.3 | Walls and Façades | 87122 |
| (a) | Station walls and facades must: | 87123 |
| | i. minimise the area of horizontal surfaces for vertical surfaces (walls and facades) for the Stations; and | 87124 |
| | ii. allow integration of the façade with maintenance and cleaning processes to ensure safe, efficient and cost effective façade maintenance and cleaning. | 87125 |
| (b) | Stations must include facade glazing systems (i.e. "low E" coatings) within occupied zones to maximise thermal performance. | 87126 |
| (c) | Crash rails and/or wall protection must be provided to protect walls and doorway from impact damage from trolleys and mobile equipment including both sides of all corridors with high to moderate trolley traffic. | 87127 |
| 7.8.4 | Ceilings and Soffits | 87128 |
| (a) | The design and construction of all ceilings and associated works within stations must: | 87129 |
| | i. remain stable without deflection, distortion, looseness or rattling due to fluctuations in air pressures; | 87130 |
| | ii. have sufficient adjustment to accommodate long-term base-structure deflection; | 87131 |
| | iii. ensure seal joints and junctions to adjacent work to maintain the integrity of fire, smoke, acoustic and moisture barriers; | 87132 |
| | iv. provide appropriate access to services located above; and | 87133 |
| | v. provide a 'monolithic' flush ceiling system for CSCs and publicly visible office areas within the Stations. | 87134 |
| (b) | Ceiling and soffit heights within the stations and associated infrastructure must: | 87135 |
| | i. provide a 3.5 metre minimum ceiling/headroom height above the finished floor level for 75% of any customer accessible platform area for the stations; | 87136 |
| | ii. provide a 3.5 metre minimum ceiling/headroom height above the finished floor level for 75% of the customer accessible areas where a passenger floor | 87137 |

| | | |
|-------|--|-------|
| | level is provided above the platform level; | |
| iii. | provide a 3.0 metre minimum ceiling/headroom height above the following areas: | 87138 |
| | (1) public toilet facilities; | 87139 |
| | (2) nosing of stairs; | 87140 |
| | (3) escalators; and | 87141 |
| | (4) passages between unpaid and paid customer/public accessible areas (with the exception of the Paid subway connection to FSS concourse) to the top of the escalator; | 87142 |
| iv. | provide a 4.5 metre minimum ceiling/headroom height above the finished floor level for 75% of the customer accessible concourse area for the following stations: | 87143 |
| | (1) Arden; | 87144 |
| | (2) Parkville; | 87145 |
| | (3) CBD North; and | 87146 |
| | (4) CBD South; | 87147 |
| v. | provide a 4.0 metre minimum ceiling/headroom height above the finished floor level for 75% of the customer accessible concourse area at Domain Station; | 87148 |
| vi. | provide a 2.7 metre minimum ceiling/headroom height above the finished floor level for all other areas within a Station with the exception of areas below escalators and stairs; | 87149 |
| vii. | provide a 5.0 metre minimum ceiling/headroom height above the finished floor level for 75% of the publicly accessible entrances for the Stations; | 87150 |
| viii. | enclose areas under escalators and stairs to a height of 2.4 meters above the finished floor level within stations; | 87151 |
| ix. | provide a 2.7 metre minimum ceiling/headroom height above the finished floor level for PSO facilities (including the Handover Room); | 87152 |
| x. | provide a 3.0 metre minimum ceiling/headroom height above the finished floor level for the CSC and all other visible customer facing staff operations rooms; and | 87153 |
| xi. | provide a ceiling with a minimum height above floor level in accordance with the BCA for back of house and station staff areas within the Stations (unless noted otherwise or as required for operations and maintenance). | 87154 |
| 7.8.5 | Doors and Shutters | 87155 |
| | (a) All doors and door-frames must: | 87156 |
| | i. provide widths, appropriate to facilitate unhindered maintenance and replacement access and withstand impact from equipment moving through the doorway, without denting or distorting; | 87157 |
| | ii. have an acoustic rating to ensure that the adjoining walls and partitions are in accordance with the acoustic requirements set out in Section 7.10; | 87158 |
| | iii. [Not disclosed] | 87159 |
| | iv. provide kickplates to BOH doors to a minimum 300mm above finished floor level. | 87160 |
| | (b) [Not disclosed] | 87161 |
| 7.8.6 | Balustrades and Glazed Screens | 87169 |
| | (a) Stations must include balustrades to a minimum height of 1200mm from floor level in paid and unpaid public/customer accessible areas. | 87170 |
| | (b) [Not disclosed] | 87171 |
| | (c) Stations must provide a minimum of one (1) 1800mm wide, 180 degree swing, manually operated, unlocked drop bolt, secured by-pass maintenance gate adjacent to the fare barriers at each concourse level. | 87172 |

| | | |
|-------|--|--------|
| | (d) All balustrades must comply with AS1735 and AS1288. | 118562 |
| 7.8.7 | Lighting | 87173 |
| | (a) Stations and precincts must provide lighting levels that can be tailored to provide varying light levels. | 87174 |
| | (b) Stations must provide lighting that can vary light levels gradually. | 87175 |
| 7.8.8 | Fittings and Equipment | 87176 |
| | (a) Stations must provide furniture that incorporates functionality, levels of comfort, convenience, safety, encourages activity and is DDA compliant. | 87177 |
| | (b) Station precincts must adopt the City of Melbourne Design Standards in relation to furniture materials and finishes for the design of the public realm within the City of Melbourne and the City of Port Phillip municipal boundaries. | 87178 |
| | (c) Stations and the public realm must incorporate street furniture in such a manner that it provides clear pathways for pedestrians and gives priority to circulation along the building line. | 87179 |
| | (d) All Station platform areas must be designed to have a consistent architectural aesthetic by use of common fittings and equipment | 87180 |
| | (e) Fitting and equipment must not impede circulation through all station areas. | 87181 |
| | (f) Station areas must provide sufficient general rubbish and recycling bins throughout the station facility at both platform and concourse levels. | 87182 |
| | (g) Where galvanised fittings are applied they must be hot dip galvanised. | 87183 |
| 7.8.9 | Seating | 87184 |
| | (a) Seating must be provided based on passenger demand, circulation and optimal layout. | 87185 |
| | (b) No seats must be positioned in locations where they will impact on horizontal circulation. | 87186 |
| | (c) Seating must be provided within 5m of the passenger lifts. | 87187 |
| | (d) [Not disclosed] | 87188 |
| | (e) Seating must be vandal resistant but easily replaceable if required. | 87189 |
| | (f) Seating must be in accordance with MTM standard MCST 020100-01 sections 12.8.2 and 12.8.3, and Part 7 of the DSAPT. | 87190 |
| | (g) Seating in the Stations must be four-person seat, bench type units. | 87191 |
| | (h) Parkville, CBD North, CBD South and Domain Station platforms must provide armrest seating evenly distributed along the platform length and accommodate 5% of the Design Case peak boarding three-minute period for each platform face. | 87192 |
| | (i) Arden Station must provide a minimum of 40 seats, evenly distributed along the platform length. | 87193 |
| | (j) On island platforms, seating must be located in the centre of the platform and integrated, as appropriate, with other platform fittings such as signage and help points. | 87194 |
| | (k) One DDA compliant, priority seat must be provided in proximity to each public lift or group of lifts at each lift level served. | 87195 |
| | | 87196 |
| 7.9 | Signage and Wayfinding | |
| 7.9.1 | Key Principles | 87197 |
| | (a) Wayfinding, advertising and signage for the Stations must be in accordance with an overarching strategy for the entire alignment, inclusive of Stations and the public realm. | 87198 |
| | (b) The PIDS must to be positioned in areas that will be most effective by being easily visible to passengers. Both single side and double side (back to back) PIDS units must be provided for placement depending on the particular location at each Station. | 87199 |
| | (c) The Stations and the public realm way finding strategy, information systems and active signage must: | 87200 |

| | | | |
|-------|-------|---|-------|
| | i. | represent an outstanding example of international best practice; | 87201 |
| | ii. | be provided at all Stations and tram stops; | 87202 |
| | iii. | be fully integrated with the overall design of the Station architecture; | 87203 |
| | iv. | address the overall spatial organisation and circulation strategy; | 87204 |
| | v. | ensure all signage is designed to be integrated with the facility design; and | 87205 |
| | vi. | ensure that information screens provide customers information across multiple modes of transport. | 87206 |
| | (d) | Multimodal service information must be provided at the Unpaid / Paid concourse at the Stations. | 87207 |
| 7.9.2 | | Static Signage | 87208 |
| | (a) | Static signage must be used to indicate to customers the locations of fixed customer facilities. | 87209 |
| | (b) | Permanent (static) signage must be installed where signage is not subject to change. | 87210 |
| 7.9.3 | | Digital Signage | 87211 |
| | (a) | Dynamic digital signage must be installed where flexibility is necessary in displaying wayfinding content or instruction. | 87212 |
| | (b) | [Not disclosed] | 87213 |
| | (c) | Digital dynamic signage must be provided to support special event modes of operation. | 87216 |
| 7.9.4 | | Statutory Signage | 87217 |
| | | Statutory signage must be integrated with the overall signage strategy to provide a consistent style and arrangement. | 87218 |
| 7.9.5 | | Corporate Signage | 87219 |
| | (a) | Stations and Station precincts must: | 87220 |
| | i. | provide line and Station identity signage in accordance with the relevant authority branding and style guide requirements; | 87221 |
| | ii. | provide maps at appropriate locations to indicate the location of customers for the following: | 87222 |
| | | (1) within the Station; and | 87223 |
| | | (2) on the public transport network (including local bus and tram routes); | 87224 |
| | iii. | provide display public transport network maps at station entrances, concourse and platforms to approval of the relevant authority; | 87225 |
| | iv. | provide way finding at Stations and stops indicating the location of ramps, lifts, escalators, and disability facilities; | 87226 |
| | v. | provide signage to clearly indicate actions required to be undertaken by customers in the event of an emergency; | 87227 |
| | vi. | use symbols that conform to internationally recognised conventions; | 87228 |
| | vii. | provide customer wayfinding signage at Stations / stops that is clearly legible and positioned where customers need it most so that they can find their way around the Station / stop and the local area; | 87229 |
| | viii. | provide information on local amenities, facilities and destinations near the Station; | 87230 |
| | ix. | provide way finding information for visually impaired customers; | 87231 |
| | x. | provide signage to indicate: | 87232 |
| | | (1) the location of customer service counters at Stations; | 87233 |
| | | (2) the locations of ticket machines and other ticketing assets; | 87234 |
| | | (3) the name of the Station on platforms such that it is visible from trains entering and leaving the Station; | 87235 |
| | | (4) exit points on the Station platforms including exit point information; | 87236 |

| | | |
|--------|---|-------|
| | (5) areas that are not accessible to customers in the stations; | 87237 |
| | (6) to customers that video surveillance is in use; | 87238 |
| | (7) the location of CHPs within the stations; and | 87239 |
| | (8) that bicycles are not permitted on the front carriage of trains; | 87240 |
| | xi. inform customers that smoking is not permitted at stations and stops via prominently displayed 'no smoking' signs; and | 87241 |
| | xii. provide variable digital displays to provide customers with real time information. | 87242 |
| | (b) Within BOH areas Stations must provide a room numbering and naming convention system, on the door or wall adjacent to the room entrance door, that uniquely identifies the floor level and room in a manner that: | 87243 |
| | i. is discreet but readily accessible; | 87244 |
| | ii. logical and easily identifiable; | 87245 |
| | iii. relates to the asset management system; and | 87246 |
| | iv. accommodates changes that maintain consistency of the signage system, room numbering and naming conventions. | 87247 |
| 7.9.6 | Advertising | 87248 |
| | (a) Where advertising is provided in the Stations and Station Precincts, infrastructure must be incorporated sensitively within the overall design. Advertising must be located as second order element that does not negatively impact on the user's experience. | 87249 |
| | (b) Stations and Station Precincts must incorporate advertising sensitively into the Station precincts in accordance with the Urban Design Strategy and local government planning requirements. | 87250 |
| | (c) Digital advertising may be installed where it enhances the customer experience. | 87251 |
| | (d) Digital advertising is preferred as it minimises the need for regular intervention. | 87252 |
| | (e) Digital advertising must: | 87253 |
| | i. enhance the customer experience and provides an outlet for entertainment; | 87254 |
| | ii. minimise the need for regular intervention; | 87255 |
| | iii. be programmable to display evacuation information in an emergency event; and | 87256 |
| | iv. if provided alongside escalators, be non-continuous advertising and comply with the fire and life safety strategy. The digital advertising must not extend to areas within 5 metres of the escalator ends. | 87257 |
| 7.10 | Noise and Vibration | 87258 |
| 7.10.1 | General | 87259 |
| | Noise and vibration must be mitigated in accordance with the project statutory approvals, including: | 87260 |
| | (a) the requirements of the Victorian Government Passenger Rail Infrastructure Noise Policy (April 2013) must be complied with; and | 87261 |
| | (b) EPRs developed as part of the Environmental Management Framework (EMF) approved by the Minister for Planning under the Incorporated Document must be complied with, including design criteria for addressing noise and vibration. | 87262 |
| 7.10.2 | [Not disclosed] | 87263 |

8 [Not disclosed]

87275

9 Mechanical Systems and Control

87766

9.1 General

87767

- 9.1.1 Project Co must provide mechanical systems, to achieve the functional and operational requirements. Mechanical systems include: 87768
- (a) Station Environmental Control Systems (**ECS**); 87769
 - (b) Mechanical Ventilation and Air Conditioning (**MVAC**) Systems; 87770
 - (c) Station Smoke Management Systems (**SSMS**); 87771
 - (d) Tunnel Ventilation Systems (**TVS**); 87772
 - (e) fire detection, alarm and suppression systems; 87773
 - (f) plumbing and drainage systems; 87774
 - (g) lifts and escalators; 87775
 - (h) associated acoustic treatment and accessories; 87776
 - (i) vibration treatment and accessories; 87777
 - (j) associated motor control centre (**MCC**) rooms; 87778
 - (k) associated electrical sub-main distribution systems and earthing systems; 87779
 - (l) power factor correction facilities; 87780
 - (m) control systems and associated software; 87781
 - (n) associated cable containment systems, and 87782
 - (o) Building Management System (**BMS**) and Energy and Water Management Systems (**E&WMS**). 87783
- 9.1.2 All mechanical systems must satisfy the requirements of the National Construction Code (BCA). 87784
- 9.1.3 Mechanical systems must be sized to cater for the peak facility loads with due allowance to accommodate future adaptability, expansion and climate change. 87785
- 9.1.4 All mechanical systems provided must be robust, safe, energy efficient, simple to operate and easy to maintain as well as comply with the project sustainability requirements. 87786
- 9.1.5 Exhaust dispersion modelling must be completed for all exhaust discharges that are intended to discharge smoke and/or Type A and Type B effluents (AS1668.2). Exhaust dispersion modelling must use proven CFD modelling software and must satisfactorily demonstrate that the discharge location, size and configuration of each exhaust discharge: 87787
- (a) is appropriate for use based on the surrounding topography, adjacent buildings and prevailing wind speed and direction; 87788
 - (b) minimises the risk of effluents being drawn into adjacent air intakes, station entrances and/or other adjacent building openings; 87789
 - (c) is able to safely discharge effluents (including smoke) so as not to create adverse environmental impact to surrounding pedestrianised areas; 87790
 - (d) gives due consideration to existing adjacent land uses; and 87791
 - (e) [Not disclosed]. 118064
- [Not disclosed] 118151
- 9.1.6 [Not disclosed] 87792
- 9.1.7 At no time should the operation of any ventilation system create an air velocity that would hinder the safe movement and evacuation of occupants, including persons with restricted mobility. 87793
- 9.1.8 TVS must be designed, installed and commissioned to control air quality, dust, heat, humidity, air pressure transients and smoke in the tunnels and platform trackways. 87794
- 9.1.9 All mechanical systems must include painting and identification in accordance with AS2311, AS2312 and AS1345. 87795

- 9.1.10 Mechanical system installation fixings must be compatible with AS1170 (earthquake restraint requirements). 87796
- 9.1.11 All mechanical systems must have the appropriate IP and IK ratings for the expected environmental conditions and locations. 87797
- 9.1.12 All ductwork systems must be designed in accordance with AS4254. Duct leakage must not exceed the following. 87798

Table 9-1: Duct pressure class

87799

| Duct Pressure Class | Static Pressure | | Leakage |
|---------------------|-----------------|----------|--------------------------------------|
| | Positive | Negative | L/s/m ² duct surface area |
| <i>Class A</i> | 500Pa | 500Pa | 0.027.Δp ^{0.65} |
| <i>Class B</i> | 1000Pa | 750Pa | 0.009.Δp ^{0.65} |
| <i>Class C</i> | 2000Pa+ | 750Pa+ | 0.003.Δp ^{0.65} |

- 9.1.13 Air leakage from/to builders work shafts and concrete ducts must not exceed 0.003. Δp^{0.65}. L/s/m² duct surface area at the maximum expected system pressure. 87800
- 9.1.14 Mechanical electrical works installations must be in accordance with section 10. 87801

9.2 Climate Control and Ventilation 87802

- 9.2.1 Station ECS must be provided throughout all public areas of the stations to provide a comfortable and safe environment for occupants. 87803
- 9.2.2 MVAC systems must be provided throughout all non-public areas to maintain a comfortable and safe environment for staff and support the reliable operation of equipment. 87804
- 9.2.3 The ECS and MVAC systems must be coordinated with the fire and smoke management system design. 87805
- 9.2.4 The ECS and MVAC system must be arranged and protected to allow for individual starting and shutdown of equipment groups and areas with varying hours of operation, sequence of automatic/ manual starting and needs for load balancing, shedding and energy saving. 87806
- 9.2.5 All central energy plant (chillers, refrigeration plant, heat pumps, heating plant and the like) must be designed to meet the peak expected load with at least 20% installed allowance for future expansion. 87807
- 9.2.6 Water cooled heat rejection plant design must comply with; 87808
 - (a) The Public Health and Wellbeing Act 2008, and 87809
 - (b) Health and Wellbeing Regulations 2009. 87810
- 9.2.7 All plant using refrigerants must be selected for zero ozone depleting and low hydrocarbon global warming potential. 87811
- 9.2.8 In the event of failure of any single plant item, the central energy plant must be capable of maintaining 24hr uninterrupted coverage for all critical equipment rooms and operational rooms at 100% load and all remaining facilities at a minimum 50% load. 87812
- 9.2.9 [Not disclosed] 87813
- 9.2.10 Project Co must calculate air-conditioning system loads using IES or other industry recognised approved program. 87826
- 9.2.11 ECS and MVAC systems must be sized to achieve design indoor environmental conditions at the following ambient conditions: 87827
 - (a) Critical Areas: 87828
 - i. Summer 37.5°C DB, 21.5°C WB and full solar load; and 87829
 - ii. Winter 3.5°C DB 100% RH; 87830

- (b) Other areas: 87831
 - i. Summer 34.3°C DB, 19.4°C WB and full solar load; and 87832
 - ii. Winter 3.5°C DB 100% RH. 87833
- 9.2.12 All plant and equipment must be able to maintain continuous operation without loss of installed capacity when exposed to the following extreme ambient conditions: 87834
 - (a) Summer 50°C DB, 28°C WB and full solar load; and
 - (b) Winter 0.0°C DB 100% RH.
- 9.2.13 ECS systems must be sized to be able to maintain comfortable internal conditions within the Station public areas, based on the Design Case (2046 plus 25 percent) pedestrian loads. 87835
- 9.2.14 The ECS must be capable of maintaining the temperature at the platform and concourse at 27°C DB at the above summer design ambient condition. 87836
- 9.2.15 The ECS systems must have the ability to vary the platform and concourse temperatures in response to changing ambient temperatures as set out in Table 9-2. 87837

Table 9-2: Acceptable platform and concourse temperatures.

87838

| Ambient Air Temperature | Acceptable platform and concourse temperature |
|--|---|
| Greater than 34.3°C DB, | 7°C +/- 1.5°C DB below the measured ambient temperature |
| 34.3°C DB to 30°C DB | 27°C +/- 1.5°C DB; |
| 30.0°C DB to 21°C DB | 3°C +/- 1.5°C DB below the measured ambient temperature |
| 21.0°C DB to 18°C DB | 18°C +/- 1.5°C DB; |
| Less than 18°C DB | Not greater than 18°C +/- 1.5°C DB |
| Final temperatures to be agreed with the Franchisee. | |

- 9.2.16 The ECS system must form an acceptable temperature gradient between the outside air temperature and concourse temperature at all times. 87839
- 9.2.17 The temperature and direction of air supplied to a given space must be arranged to prevent condensation forming on or within fixtures and fittings in direct contact with the air supply. 87840
- 9.2.18 Permanently occupied spaces located in public areas (such as CSCs etc.) must be provided with local comfort air conditioning capable of providing internal temperatures of: 87841
 - (a) Cooling: 23°C +/- 1.5°C DB; and 87842
 - (b) Heating: 22.0°C +/- 1.0°C DB. 87843
- 9.2.19 MVAC systems to Critical Areas (excluding transformer rooms and electrical switch rooms) must be capable of sustained 24-hour operation at the following environmental conditions. 84844
 - (a) Cooling: 23°C +/- 1.0°C DB, 50-60% +/- 5% RH; and 87845
 - (b) Heating: 22.0°C +/- 1.0°C DB, 50-60% +/- 5% RH. 87846
 (Specific humidity control to be provided as required to match equipment specifications). 87847
 MVAC systems to transformer rooms and electrical switch rooms must be capable of maintaining appropriate environmental conditions to sustain 24 hour operation. 118576
- 9.2.20 MVAC systems to other areas must be capable of maintaining the following internal conditions: 87848
 - (a) Cooling: 23°C +/- 1.5°C DB; and 87849
 - (b) Heating: 22.0°C +/- 1.0°C DB. 87850

| | | |
|--------|---|----------------------------------|
| 9.2.21 | All ventilation systems must provide an effective means to control air quality and safely disperse dust, heat, humidity, noxious gases, contaminants and smoke to the outside in accordance with the SEPP (Air Quality Management) and the SEPP (Ambient Air Quality). | 87851 |
| 9.2.22 | All ventilation rates must be in accordance with the minimum requirements of AS1668.2. Where required, the minimum ventilation rates must be increased to meet the requirements of the targeted sustainability ratings. | 87852 |
| 9.2.23 | Except for BoH plant rooms, all systems used to supply outside air for the ventilation of the Stations must incorporate demand control ventilation in accordance with AS1668.2. Minimum outside air flow rates must be maintained to: <ul style="list-style-type: none"> (a) ensure adequate make air supplies for exhaust systems; (b) keep critical equipment rooms and operational rooms at relative pressure to prevent ingress of dust and/or other airborne particles; and (c) ensure a positive air flow from the platform to the outside. | 87853 87854 87855 87856 |
| 9.2.24 | Air movement within the occupied spaces must be in accordance with ASHRAE standards 55 and 62.1, and AS1668.2. | 87857 |
| 9.2.25 | Indoor air quality must be maintained at all times in accordance with the minimum National Occupational Health and Safety Commission (NOHSC) requirements and to meet all Occupational Health and Safety requirements for workplace exposure of airborne contaminants. | 87858 |
| 9.2.26 | The ECS and MVAC systems must include appropriate air filtration in accordance with AIRAH Technical Handbook. ECS systems must have a minimum filtration level of F5. | 87859 |
| 9.2.27 | The ECS and MVAC systems must maintain acceptable levels of humidity within an acceptable range for the functions of the space. | 87860 |
| 9.2.28 | All refrigeration systems must be selected to ensure the maximum refrigerant concentrations in any room (in the event of system leak) does not exceed safe levels and, as a minimum, is in accordance with AS1677. | 87861 |
| 9.2.29 | The ECS design must take into account air leakage through the PSDs created by train movements through the Tunnels. The PSD leakage rates and tunnel environmental conditions must be confirmed by the TVS specialist. | 87862 |
| 9.2.30 | The following services must be provided to all commercial and retail services in the Stations to support the subsequent fit out by future tenants: <ul style="list-style-type: none"> (a) dedicated chilled water drawn from the Station's centralised chilled water system; (b) dedicated centralised mechanical ventilation that is separate to the Station's centralised ventilation system (outside air and kitchen exhaust if required); and (c) dedicated smoke exhaust duct which can be isolated from the centralised Station Smoke Management System, but shares the central fans. <p>All base building connections must include metering systems to record energy use.</p> | 87863 |
| 9.2.31 | External lift shafts exposed to solar radiation must be provided with climate control systems to maintain internal shaft temperatures not greater than 35°C (or temperature as specified by the lift supplier). | 87864 |
| 9.2.32 | All lift cars must be able to maintain internal ambient conditions equivalent to the areas they serve. | 87865 |
| 9.2.33 | Lift shafts must be ventilated or air conditioned to support maintaining passenger safety as per EN 81. | 118577 |

| | | |
|--------|--|-------|
| 9.3 | [Not disclosed] | 87866 |
| 9.4 | [Not disclosed] | 87892 |
| 9.5 | [Not disclosed] | 87961 |
| 9.6 | [Not disclosed] | 87992 |
| 9.7 | Plumbing and Drainage | 88051 |
| 9.7.1 | All plumbing and drainage systems must comply with AS3500, the National Construction Code (BCA) and water authority regulations. | 88052 |
| 9.7.2 | The design and installation must promote excellence in water conservation, including promoting and incorporating the latest technologies and systems to reduce water consumption and drainage impacts. | 88053 |
| 9.7.3 | All incoming water supplies must be metered in accordance with the local water authority requirements. All retail facilities must be separately metered. | 88054 |
| 9.7.4 | [Not disclosed] | 88055 |
| 9.7.5 | [Not disclosed] | 88065 |

| | | |
|------------|--|--------|
| 9.8 | Lifts | 88109 |
| 9.8.1 | The mechanical systems for lifts must comply with Section 7: Stations and provide the following minimum operational and physical attributes. | 88110 |
| | (a) Lifts must: | 88111 |
| | i. be of Type 1 – Public lifts and Type 2 – Back of House (BOH)/Goods/ intervention lifts; | 88112 |
| | ii. have lift doors with high speed door operators that include continuous infrared door safety edge protection; | 88113 |
| | iii. have rated lift car speeds of >1.0m/sec where the overall vertical lift rise distance is less than or equal to 10 metres; | 88114 |
| | iv. have rated lift car speeds of >2.5m/sec where the overall vertical lift rise distance is greater than 10 metres, with the exception of dedicated material management lifts; | 88115 |
| | v. use lifts with variable voltage/ variable frequency drive systems; | 88116 |
| | vi. be provided with Automatic Rescue Device (ARD) for emergency operation c/w appropriate UPS backup; | 88117 |
| | vii. locate all lift controllers at the upper most level served by the lift; | 88118 |
| | viii. include real time remote monitoring and control via the BMS; and | 88119 |
| | ix. facilitate remote homing / park control via the BMS. | 88120 |
| | (b) Lifts used for the evacuation of PRMs must be designed in accordance with the requirements of MFB Fire Safety Guidelines and the ABCB handbook. | 137191 |
| | (c) Lift operation must be interfaced with the automatic fire detection and alarm system to ensure the lift car is prevented from stopping and discharging persons to a landing in a fire zone where a fire detector has been activated. | 88121 |
| | (d) Incorporate a group controller for all groups of two or more side by side lifts that provides full collective group control. | 88122 |
| | (e) Project Co must: | 88123 |
| | i. provide hall lanterns at each floor for each lift providing information on the location and status of each lift; and | 88124 |
| | ii. ensure all lifts have lift annunciation panels located at the following points: | 88125 |
| | (1) adjacent to the lift landing doors at all landing levels; and | 88126 |
| | (2) at the FCR. | 88127 |
| 9.8.2 | Upgrade works to existing lift wells at MCS to facilitate passenger connectivity with CBD North must be: | 88128 |
| | (a) carried out and reinstated in accordance with Train Franchisee standards; and | 88129 |
| | (b) must be completed in such a manner that one lift remains functioning at all times during operational hours. | 88130 |
| 9.9 | Escalators | 88131 |
| 9.9.1 | Escalators must comply with section 7, and must, as a minimum: | 88132 |
| | (a) be capable of variable step speed with a design rated step speed of 0.75m/sec; | 88133 |
| | (b) incorporate variable voltage/ variable frequency regenerative drive systems; | 88134 |
| | (c) be capable of undertaking a controlled stop and reversal with a controlled deceleration and acceleration under full load; | 88135 |
| | (d) have emergency stop buttons at the top and bottom landings, and at regular intervals over the length of the escalator; | 88136 |
| | (e) have digital dynamic signage at each escalator to display the status and direction of each landing; | 88137 |
| | (f) be capable of automatically restricting access to the individual escalator, including the provision of audial and visual alarms; | 88138 |
| | (g) allow automatic restart of escalators in compliance with Clause 5.12.2.4.2 (a) of | 88139 |

| | | |
|-------------|---|--------|
| | EN115; | |
| (h) | provide controller / drive units located within the top of the machine space of the escalator truss pit with secure and safe access integrated within the truss construction; | 88140 |
| (i) | be high specification frequency drive units capable of undertaking a controlled stop and similarly a controlled acceleration under full load in emergency evacuation times; | 88141 |
| (j) | [Not disclosed]; | 88142 |
| (k) | include real time remote monitoring and control via the BMS; | 88143 |
| (l) | have an IP 65 rating; | 88144 |
| (m) | be capable of bi-directional operation to ensure the operator can reduce asymmetrical wear; and | 88145 |
| (n) | provide sleep mode and/ or energy saving mode. | 118578 |
| 9.9.2 | Extended runoffs should be considered to allow for the installation of automated gates which enable remote closure/reversal of escalators. | 88146 |
| 9.9.3 | Motor rooms must be designed to provide restricted access to authorised persons only. | 88147 |
| 9.9.4 | [Not disclosed] | 88148 |
| 9.9.5 | Project Co must develop procedures for the reversal of direction of escalators, in accordance with NFPA130 as well as relevant statutory requirements and work health and safety considerations. | 88149 |
| 9.10 | [Not disclosed] | 88150 |
| 9.11 | Energy and Water Management | 88195 |
| 9.11.1 | Energy and Water Management System (E&WMS) must be capable of metering, monitoring and trending energy and water consumption for the Station and Tunnel building. | 88196 |
| 9.11.2 | The E&WMS must have sufficient storage capacity to retain operational data over a complete annual operating cycle. | 88197 |
| 9.11.3 | The E&WMS must be capable of producing detailed reports presenting information on instantaneous usage, usage trends over selected periods, total consumption, and comparisons with previous periods. | 88198 |
| 9.11.4 | [Not disclosed] | 88199 |
| 9.12 | Miscellaneous | 88229 |
| 9.12.1 | Commercial /retail tenancies | 88230 |
| (a) | Project Co must provide the following mechanical services to each individual tenancy space: | 88231 |
| | i. chilled water supply (metred); | |
| | ii. potable water (metred); | |
| | iii. general exhaust; and | |
| | iv. drainage. | |
| (b) | Each tenancy must be provided with facilities (including cable trays, distribution boards or similar) to obtain power and communications direct from the relevant Utility Provider, complete with independent metering. | 118585 |
| 9.12.2 | Noise and Vibration | 88232 |
| (a) | Mechanical systems must include all necessary acoustic treatments to achieve the design ambient noise levels in accordance with section Error! Reference source not found. | 88233 |
| (b) | Acoustic treatments must address: | 88234 |
| | i. noise generated through air movement, moving parts and structural vibration; | 88235 |

| | | | |
|--------|------|--|--------|
| | ii. | break out of sound energy from shafts and/or ductwork system; | 88236 |
| | iii. | plant noise transmitted to occupied spaces via airborne and/or structure borne noise paths through building elements; | 88237 |
| | iv. | noise radiated directly to the spaces from plant located within the occupied space; and | 88238 |
| | v. | transfer of noise between acoustically rated rooms. | 88239 |
| (c) | | Mechanical systems must be selected to minimise tonal noise and pulsing noise where: | 88240 |
| | i. | Tonal noise is defined as noise that contains narrow band frequency components; and | 88241 |
| | ii. | Pulsing noise is defined as any noise characteristic that is evidenced by rapid changes in noise level. | 88242 |
| | iii. | Equipment will be deemed to be tonal based on the tonality assessment methodology outlined in ISO1996-2:2007, Annex. D. | 150481 |
| (d) | | In locations where the noise from mechanical systems is expected to include a subjectively identifiable tonal and/or pulsing character, the ambient noise levels in that area must be lowered by a minimum of 5dB; | 88243 |
| 9.12.3 | | Planning and Coordination | 88244 |
| | (a) | Air intakes and exhaust discharged must be located to minimise the risk of air recirculation. | 88245 |
| | (b) | Systems containing water, must not be located and/or routed through or be placed near or above water sensitive equipment including electrical switch rooms, SERs, CERs, lifts shafts, escalator chambers and the like. | 88246 |
| | (c) | Secure and vandal proof plant enclosures must be provided for operational critical infrastructure. | 88247 |
| | (d) | All lifting and materials handling systems required to replace plant must be fit for purpose. | 88248 |
| | (e) | Plant replacement staging areas must be provided to temporary store replacement, or old equipment where future plant replacement cannot be demonstrated to be completed in a single ALBF period. | 88249 |
| | (f) | All Mechanical and electrical services risers must be provided with permanent flooring to enable access to services at each floor. | 88250 |

10 Electrical Power Systems

88251

10.1 Low Voltage Electrical Systems

88252

10.1.1 General

88253

- (a) The scope of the low voltage (**LV**) electrical systems includes the following major components:
 - i. LV main switchboards; 88255
 - ii. LV distribution switchboards; 88256
 - iii. power supplies to mechanical equipment and systems; 88257
 - iv. submains and sub circuits; 88258
 - v. lighting and general power requirements; 88259
 - vi. emergency lighting and exit signage; 88260
 - vii. lighting control systems; 88261
 - viii. UPS system; 88262
 - ix. earthing, bonding and surge protection; and 88263
 - x. power supplies to support RSA and RSI equipment. 88264
- (b) Electrical power supply must be provided with appropriate distribution and protection systems. 88265
- (c) The LV distribution system which supplies power to all interfacing systems must be provided at 400V, 3-phase or 230V, single phase. 88266
- (d) Electrical systems must be designed, installed and commissioned to limit the cascade of equipment faults to the minimum number of locations. 88267
- (e) A safe and reliable source of electrical power supply must be provided and must ensure that a first order failure of any part of the power supply network will not impact on the operation of any system connected to the Stations and/or tunnel LV distribution power supply network. 88268
- (f) All electrical systems must achieve the minimum requirements of:
 - i. the FER; 88270
 - ii. EMC; and 88271
 - iii. section 15.
- (g) Electrical systems must be common across all Stations and Tunnels, SFAIRP, to reduce numbers of types and availability of spares. 88273
- (h) Electrical systems must be capable of running services continuously for 5 single event days between the first timetabled service on Friday and the last timetabled service on Tuesday. 88274
- (i) Electrical system zoning must align with the earthing and bonding equipotential zoning requirements. 88275
- (j) Dual power supplies must be provided to all operational critical systems and systems supporting rail operations as provided by the RSA. The dual power supplies must be terminated at final distribution boards located in the associated equipment room, as specified by the RSA. 88276
- (k) All dual power supplies must be capable of being simultaneously energised to maintain system operation with a minimum interruption time required for automatic change over in the event of first and second order failures in any part of the distribution power supply. 88277
- (l) Where new electrical systems are required to interface with existing electrical systems, the existing system must be upgraded to form a fully integrated system. 88278
- (m) Electrical systems used to provide power to the services and assets within the Stations and Tunnels must not be impacted by any abnormal operating modes from adjacent existing electrical systems and networks. 88279

| | | |
|-------------|--|-------|
| (n) | Existing railway electrical system functions must not be rendered inoperable due to the introduction of the Stations and Tunnels and associated systems. | 88280 |
| (o) | Electrical infrastructure and assets, must be able to withstand, 20 mm/sec vibrations, unless otherwise required. | 88281 |
| (p) | Noise generated by electrical equipment must not exceed the requirements set out in section 7.10. At no time should any tonal (single frequency) or pulsating noise cause interference with passenger communication announcements or distract operational staff. Equipment will be deemed to be tonal based on the tonality assessment methodology outlined in ISO1996-2:2007, Annex. D. | 88282 |
| (q) | [Not disclosed] | 88283 |
| (r) | Power quality requirements must be coordinated with the interfacing systems provider to ensure power requirements of equipment are understood and provided for. | 88287 |
| (s) | Electrical systems must reduce environmental impact and be designed and installed to support sustainability and climate change objectives. | 88288 |
| (t) | Electrical systems must be arranged to allow repair or replacement whilst the system remains fully functional. | 88289 |
| (u) | The design and layout of systems and equipment must limit or eliminate vandalism so far as is practical. | 88290 |
| (v) | All plant and equipment must have the appropriate IP and IK rating to account for the environmental conditions (bugs, dust, and moisture) and potential exposure to mechanical damage (vandalism, foot traffic). | 88291 |
| (w) | Electrical plant room locations must be selected considering access and maintenance strategy to allow for safe, easy and unobstructed route for the replacement of electrical equipment during both planned and reactive maintenance. | 88292 |
| 10.1.2 | [Not disclosed] | 88293 |
| 10.1.3 | [Not disclosed] | 88338 |
| 10.1.4 | [Not disclosed] | 88352 |
| 10.1.5 | [Not disclosed] | 88370 |
| 10.1.6 | [Not disclosed] | 88448 |
| 10.1.7 | [Not disclosed] | 88464 |
| 10.2 | [Not disclosed] | 88482 |
| 10.3 | Earthing and Bonding | 88681 |
| 10.3.1 | General | 88682 |
| (a) | Project Co must provide all necessary earthing, bonding and stray current mitigation systems to: | 88683 |
| i. | ensure the safety of all users and staff; | 88684 |
| ii. | enhance the operational resilience of sensitive electrical and electronic equipment and/or systems from the impacts of stray current; and | 88685 |
| iii. | mitigate the effects of electrolysis and provide corrosion protection of structural assets and operating equipment. | 88686 |
| (b) | Project Co must develop an earthing, bonding and stray current mitigation strategy to: | 88687 |
| i. | mitigate electrolytic corrosion risk to the Project Assets and third party utilities and structures. | 88688 |
| ii. | outline how the electrolytic corrosion risk to the Project Assets from existing street level 750V DC tram networks is mitigated; | 88689 |
| iii. | ensure that step and touch potential hazards from AC and DC short circuits are mitigated to safe levels; | 88690 |
| iv. | inform all other design disciplines, construction, testing, commissioning and | 88691 |

- operating and maintenance teams to ensure compliance with this strategy;
and
- v. establish an interdisciplinary review process to ensure the design development is consistent with the strategy. 88692
- (c) Project Co must carry out soil electrical resistivity measurements and modelling along the entire alignment to provide input into the high voltage earthing design and stray current mitigation design. 88693
- (d) Project Co must provide lightning protection systems to: 88694
- i. ensure the safety of all users and staff; 88695
 - ii. protect sensitive electrical and electronic equipment from the potential damage resulting from lightning strikes; and 88696
 - iii. support operational resilience of sensitive electrical and electronic systems by minimising disruption from potential lightning strikes. 88697
- (e) Project Co must liaise with all relevant stakeholders and interfacing parties to coordinate and provide appropriate earthing and bonding systems for all operating systems, including: 88698
- i. communication systems; 88699
 - ii. controls and SCADA systems; 88700
 - iii. PSDS / PSD; 88701
 - iv. security and CCTV systems; 88702
 - v. signaling / CBTC Systems; 88703
 - vi. ticketing; 88704
 - vii. OHLE; 88705
 - viii. traction power substation; 88706
 - ix. 66kV / 22kV power supply system;
 - x. LV distribution system;
 - xi. electrolysis mitigation; and
 - xii. stray current management.
- (f) The earthing and bonding strategy must allow for dividing the Stations and Tunnel into a discrete number of equipotential zones. 88707
- (g) The final equipotential zoning arrangement must be consistent with the final electrical distribution systems, traction power systems and OHLE. 88708
- (h) Each equipotential zone must be connected to rail via a monitored voltage limiting device. 88709
- (i) The earthing and bonding must be seamlessly integrated into the existing earthing and bonding systems for the existing Metropolitan Rail Network. 88710
- (j) The final equipotential zoning arrangement must be electrically segregated from all adjoining third party assets. 88711
- (k) Electronic test points must be provided throughout the Stations and Tunnel as required. 88712
- (l) Stations that have: 88713
- i. a transport interchange with an existing rail station; 88714
 - ii. a transport interchange with an existing tram stop; or 88715
 - iii. subway connections to adjoining properties and/or precincts, 8816
- must be physically separated from metallic structures of other parties by a minimum distance of 2 metres to prevent inadvertent bridging between adjacent equipotential zones at all times. 88717
- (m) All external metallic services and/or fixtures, including water pipes, sewer mains, handrails, walkways, floors etc., must incorporate minimum 2 metre insulated sections with insulated flanges/ connections at the equipotential zone interface within the station box. 88718

| | | | |
|--------|------|--|--------|
| | (n) | All steel reinforcement within individual concrete elements and electrical bonding between adjacent structural elements and/or structure sections must be made electrically continuous by appropriate welding or providing mechanical couplers specifically designed to support the electrical continuity of reinforcing. Continuity must ensure that any anticipated levels of current (AC or DC) can be safely managed by the continuity system throughout the Design Life of the structure. | 88719 |
| | (o) | All steel reinforcement is to provide a large metallic cross sectional area to dissipate stray current into the general mass of the earth and minimise the HV/LV earth grid impedance. | 88720 |
| | (p) | Project Co must provide a system of embedded copper earth grids(s) installed under the raft / base slabs where ever possible. | 88721 |
| | (q) | All earthing electrodes, ferrules, connectors, connection cables and the like must be capable of dissipating the full fault current protection clearance time. | 88722 |
| | (r) | All electrodes/ earthing rods associated with the earthing and/or lightning protection systems must be appropriately sized and installed to achieve the minimum Design Life requirements, and be arranged to prevent damage to installed liners. | 88723 |
| 10.3.2 | | Traction System | 88724 |
| | (a) | All earthing and bonding systems must be suitable for both 1500V DC and 3000v DC traction supply systems. | 88725 |
| | (b) | Earthing connection plates / common bonding terminal are to be provided within each traction power substation in accordance with the traction power system requirements. | 88726 |
| 10.3.3 | | OHLE | 88727 |
| | (a) | Adequate clearances must be maintained at all times between the OHLE and adjacent structural soffits to take account of the pantograph zone as defined by EN50122.1. | 88728 |
| | (b) | Where a structural steel member is installed in proximity to the OHW: | 88729 |
| | i. | the OHW must, as a minimum, be double insulated from all structural steel members used to support any part of the OHLE; | 88730 |
| | ii. | the LV side of the primary insulation must be directly bonded to rail; | 88731 |
| | iii. | the steel members located in the DC fault zone must be bonded to rail and comply with L1-CHE-STD-016; | 88732 |
| | iv. | the steel member must be electrically isolated from adjacent metallic items at the ends; and | 88733 |
| | v. | other metallic structures or services must have a minimum 2 metre long insulating space or two 100 mm gaps spaced 2 metres apart. | 88734 |
| 10.3.4 | | Platform Screen Door System | 88735 |
| | (a) | All PSD assemblies must be electrically bonded directly to rail to ensure the safety of persons and resilience in installation and operation. | 88736 |
| | (b) | The PSDS must be electrically isolated from the Station earth, including all interconnecting power, control and communications cable systems. | 88737 |
| | (c) | Any metallic part of the PSD assembly that can be touched by a person must be protected by electrical isolation zones. The zones must extend: | 88738 |
| | i. | vertically, as a minimum of 2.5m from the platform floor; | 88739 |
| | ii. | Transversely, as a minimum of 2.5m from the inner face of the platform screen; and | 88740 |
| | iii. | Longitudinally, as a minimum of 1.8m beyond the platform screen returns. | 88741 |
| | | The electrical isolation zone must protect persons on the platform against inadvertently touching the PSD at rail potential and any metallic component at earth potential. | 118647 |
| | (d) | Where the minimum requirements for providing the PSD electrical isolation zone cannot be achieved, alternative protection measures must be provided (for example, the zone between the PSD and the ceiling services zone over the platform). The alternative protection measures must protect maintenance persons | 88742 |

| | | |
|--------|---|-------|
| | from inadvertently touching the PSD at rail potential and therefore bridging any metallic component at earth potential. | |
| | (e) The platform area immediately adjacent to the PSD assembly must be provided with a high resistivity platform capping material or embedded epoxy membrane covering an area of at least 2.5m from the face of the PSD. | 88743 |
| 10.3.5 | Station Box | 88744 |
| | (a) All reinforcement of the entire Station structure must be electrically continuous. | 88745 |
| | (b) Where precast elements are used, each precast element must be provided with appropriate ferrules and/or starter bars to facilitate electrical bonding of all neighbouring elements. | 88746 |
| | (c) Earthing connection ferrules must be welded to the reinforcing on both sides of the Station / Tunnel interfaces, and used to interconnect the Tunnel and Station sections. Earthing connection ferrules must be coordinated with the waterproofing membrane and any secondary lining. | 88747 |
| | (d) All Station metallic services, including pipework, ductwork, cable containment /ladders and the like, must be: | 88748 |
| | i. bonded to the Station reinforcement; and | 88749 |
| | ii. located a minimum of 2m away from any metallic fixing or fixture that is bonded to live rail. | 88750 |
| | (e) Where the minimum 2m separation cannot be achieved alternative protection measures must be provided. | 88751 |
| 10.3.6 | Track Work | 88752 |
| | (a) As a minimum, all track/rail installation must be double insulated from the track slab. Standard rail fastening devices designed for DC traction systems must be used. | 88753 |
| | (b) Project Co must determine the most appropriate required resistance of each electrical insulation layer between: | 88754 |
| | i. the rail fasteners and baseplates; and | 88755 |
| | ii. the baseplate and the track slab. | 88756 |
| | (c) Project Co must determine the minimum resistance levels to achieve compliance with the Electrical Resistance Test as per Transit Cooperative Research Program (TCRP) Report 71, Volume 6: Direct Fixation Track Design Specifications, Research, and Related Material, Section 3, Part A, Section 4.03. Test G (Page 35). | 88757 |
| | (d) Project Co must not use a direct fixed or ballasted rail system without appropriate electrical insulation. | 88758 |
| | (e) Project Co must provide stray current monitoring facilities within the track slabs. The stray current monitoring facilities must comprise of a steel reinforcement cage made electrically continuous and installed in nominal 100m long sections. | 88759 |
| | (f) Where fibre reinforced concrete is used in the track slab, a layer of metallic reinforcement mesh must be installed solely to provide stray current monitoring. | 88760 |
| | (g) Each stray current monitoring facility must include a connection ferrule at each end for testing purposes and, if required, connection of a stray current mitigation bond cable. | 88761 |
| | (h) Stray current monitoring facilities must maintain 100mm ² cross section and 0.5 Ohm longitudinal resistance per km of slab length. | 88762 |
| 10.3.7 | Tunnels, Cross Passages, Shafts | 88763 |
| | (a) Each Tunnel lining segment must be electrically isolated from the adjacent segment/s. | 88764 |
| | (b) All metallic materials installed throughout the Tunnel must be segmented at the ends of each equipotential zone. The segmentation detail must be arranged to prevent inadvertent bridging between adjacent equipotential zones. | 88765 |
| | (c) Where plant and/ or equipment in the tunnels and cross passages cannot be earthed via respective Station/ Tunnel equipotential zones, appropriate local earthing electrodes must be installed to provide local earthing. | 88766 |

| | | |
|-------------|---|--------|
| | (d) Project Co must provide rail insulating joints approximately 1m into the ballasted track outside every tunnel portal, bridged across by lugged and bolted bonding cable under normal operation conditions. | 88767 |
| | (e) Metallic structures associated with the Works must be physically separated from metallic structures of other parties by a minimum distance of 2 metres to prevent inadvertent bridging between adjacent equipotential zones. | 118648 |
| 10.3.8 | Miscellaneous Structures | 88768 |
| | (a) Project Co must ensure that steel components of any elevated structures, retaining walls and shotcrete include measures to mitigate the effects of stray currents. | 88769 |
| | (b) Project Co must ensure that all anchor rods, soil nails, rock bolts and or whalers, used to stabilise retaining structures / walls which are in contact with continuous reinforcement; | 88770 |
| | i. remain electrically isolated from any supplementary reinforcement in the retaining wall; | 88771 |
| | ii. the reinforcement mesh must be electrically segregated at not greater than 30m sections; and | 88772 |
| | iii. whalers must not be continuous for more than 30m length and must not bridge between the 30m reinforcement sections. | 88773 |
| | (c) Project Co must ensure that steel bar / mesh reinforcement used in shotcrete walls and/or linings, is electrically segregated, at not greater than 30m spacing's along the wall / lining. | 88774 |
| 10.3.9 | Tram Works | 88775 |
| | Project Co must ensure that the earthing systems of the Tram Franchisee infrastructure remain electrically isolated from the Tunnel and Stations earthing and rail systems at all times. | 88776 |
| | | 88777 |
| 10.4 | Electromagnetic Compatibility (EMC) | |
| 10.4.1 | General | 88778 |
| | (a) Systems, including electrical plant, must be electromagnetically compatible with their surrounding environment and other systems. Where required Project Co must introduce appropriate EMI mitigation measures to ensure compatibility is met. | 88779 |
| | (b) Systems, including electrical plant must not generate unacceptable levels of electro-magnetic interference, in accordance with EN50121. | 88780 |
| | (c) Systems (throughout the systems lifecycle), when interfaced with and operating in conjunction with systems from the RSA, the RIA, the HCMTs and existing railway infrastructure, must not generate unacceptable levels of electro-magnetic interference that affect: | 88781 |
| | i. existing infrastructure and systems; | 88782 |
| | ii. third party EMI sensitive equipment / receivers; or | 88783 |
| | iii. other systems. | 88784 |
| 10.4.2 | EMC Technical Requirements | 88785 |
| | (a) The following EMC standards and regulations must be complied with: | 88786 |
| | i. IEC 62236-4 (within the 3 m zone); | 88787 |
| | ii. IEC (outside of the 3 m zone); | 88788 |
| | iii. IEC 61000-6-4; and | 88789 |
| | iv. IEC 61000-3-2 and IEC 61000-3-3; | 88790 |
| | Zoning principles for within the 3 m zone and outside of the 3m zone are according to IEC 62236-4. | 88791 |
| | (b) Project Co must ensure electro-magnetic fields produced by its systems, including electrical plant, complies with the recommended exposure limits defined in the ICNIRP guidelines for time varying fields up to 300 GHz, regarding passengers, personnel (occupational) and other people in the vicinity of the railway environment (i.e. 20 m from the nearest track or substation wall). | 88792 |

- (c) All systems and equipment that are placed outside of the railway environment (i.e. 20 m from the nearest track or substation wall) must comply with the following EMC standards and regulations: 88793
 - i. IEC 61000-6-3; and 88794
 - ii. IEC 61000-6-1. 88795
- (d) Communications system equipment placed outside of the railway environment (i.e. 20 m from the nearest track or substation wall) must comply with the following EMC standards and regulations: 88796
 - i. EN 50130-4 (immunity) for alarm systems; 88797
 - ii. IEC 55103-1 1(emissions) and IEC 55103-2 (immunity) for PA systems; 88798
 - iii. EN 50132-2-1 (immunity) for CCTV system; and 88799
 - iv. EN 55022 (emissions) and EN 55024 (immunity) for IT equipment. 88800
- (e) Traction power system equipment must comply with the following EMC standards and regulations: 88801
 - i. IEC 62236-5; 88802
 - ii. IEC 61000-6-4; 88803
 - iii. IEC61000-3-2 and IEC 61000-3-3; and 88804
 - iv. IEC 61000-3-6 and IEC 61000-3-7. 88805
- (f) Radiated emissions generated by the traction substations, as a whole, must comply with the limits defined in IEC 62236-5. 88806
- (g) Radiated emissions generated by the railway infrastructure, as a whole, must comply with the limits defined in IEC 62236-2. 88807
- (h) The HV system and traction power systems must not generate unacceptable induced voltages, above the limits stated in IEC 62128-1 on other systems (including electrical equipment, electrical plant and cables). 88808
- (i) The HV system must comply with the power quality requirements (fluctuation in voltage, harmonic content) as specified by the HV supply authority. 88809
- (j) Electrical and electro-mechanical system equipment must comply with the following EMC standards and regulations: 88810
 - i. IEC 62236-5; 88811
 - ii. IEC 61000-3-6 and IEC 61000-3-7; 88812
 - iii. EN 50152-1; 88813
 - iv. IEC 60255; 88814
 - v. EN 62271-1; and 88815
 - vi. IEC 62040-2. 88816

11 [Not disclosed]

| | | |
|-------------|--|--------|
| 12 | Surface Transport | 88847 |
| 12.1 | General | 88848 |
| 12.1.1 | All Road Functional Layouts for each precinct must optimise transport movements based upon the transport modal priorities provided in Appendix B4. | 88850 |
| 12.1.2 | Standards | 88851 |
| | (a) Project Co must ensure that all road, bus, cycle facilities and footpath design and construction is undertaken in accordance with the applicable standards of the Responsible Road Authority, unless agreed otherwise by the approving authority. | 88852 |
| | (b) Project Co must design and construct all VicRoads infrastructure in compliance with VicRoads standards, other than existing infrastructure which will be as agreed with the relevant road authority. | 88853 |
| | (c) Project Co must construct or reinstate all relevant local council assets, including roads, kerb and channels, footpaths, medians, drainage, public lighting, pavement marking and signage, in accordance with plans and specifications approved by the relevant local council. | 888534 |
| 12.1.3 | Overview | 88855 |
| | (a) The design of tram works must be fully coordinated with road design to provide an integrated outcome. | 88856 |
| 12.1.4 | Interchanges | 88857 |
| | (a) Project Co must minimise walking distance between interchange points with existing bus and tram services and new stations, and ensure the route and interchange can be used by people who are mobility impaired. | 88858 |
| | (b) Transfer routes between interchange stations must be designed to reduce conflicts in customer flow. | 88859 |
| | (c) Bi-directional routes between interchange stations must be provided with overhead and surface level signage indicating the passenger flow direction to improve circulation and reduce conflicts, i.e. signage advising customers to keep to the left. | 88860 |
| 12.1.5 | Lighting and signage | 88861 |
| | (a) Street lighting and traffic signal lanterns at VicRoads intersections must be upgraded to light emitting diodes (LEDs) where an intersection remodel requires more than 50% new/reconfigured lighting to be installed. | 88862 |
| | (b) Lighting pole heights must not exceed 6.0m | 88863 |
| | (c) Passive or active way finding information and signage must be provided where access and egress to properties is obscured, changed or visually impacted. | 88864 |
| | (d) A minimum of 50% of all pedestrian lanterns installed as part of the Works must use female pedestrian symbols, unless otherwise approved by the State. | 150496 |
| 12.1.6 | Accessibility, location, functionality and interchange opportunities of bus and tram stops must be maintained except by formal agreement with PTV. | 88866 |
| 12.2 | Station Specific Requirements | 88867 |
| 12.2.1 | Arden | 88868 |
| | (a) The design of Arden Station must be integrated into the precinct in a manner that encourages and facilitates interchange to/from other nearby public transport access points, including other mode stops and North Melbourne Station. | 88869 |
| 12.2.2 | CBD North | 88870 |
| | (a) The design must support customer interchange between train services at CBD North Station and MCS and bus services at adjacent bus stops (Lonsdale Street). | 88871 |
| | (b) The design must support operation of bus services on Lonsdale Street at Day-1. | 88872 |
| 12.2.3 | Parkville | 88873 |

| | | | |
|--------|---|--|-------|
| | (a) | The design must support customer interchange between train services at Parkville Station and tram services at adjacent tram stops (Royal Parade, Flemington Road/Grattan Street). | 88874 |
| | (b) | The design of the platforms stops in Royal Parade must discourage passengers from crossing outside the designated pedestrian crossing points to ensure the safety of customers. | 88875 |
| | (c) | A bus interchange facility must be provided at Parkville Station to provide for interchange between train and bus and tram and bus. | 88876 |
| | (d) | Access, connectivity, frequency and functionality must be provided within the precinct for up to six bus routes at Day-1. Bus stop provisions shall be in accordance with the requirements of Part A section 11.3 and Part B Appendix B4: Modal Priorities. Bus stops must be independently operable and accommodate a minimum 10.0m spacing between buses so as to not degrade the functionality or operation of scheduled bus services. Rail replacement bus services if integrated with scheduled bus facilities must not degrade the functionality or operation of scheduled bus services. | 88878 |
| | (e) | The final arrangement of University of Melbourne's Gate 10 must accommodate pre-construction pedestrian capacity and vehicle access capability, except to the extent that pedestrian and vehicle access requirements: | 88879 |
| | | i. will change as a result of the University of Melbourne's permanent closure of the South Lawn carpark; and | |
| | | ii. are predicted by Project Co to change as a result of the Project. | |
| 12.2.4 | Domain | | 88880 |
| | (a) | The current operational functionality of Domain Interchange infrastructure must be maintained at Day-1 whether or not the track alignment is retained along Toorak Road after the completion of the construction activities. This includes the functionality enabling the turn back of trams clear of the through tram tracks on St Kilda Road. | 88881 |
| | (b) | The road and tram legacy design must support the reinstatement of the tram service along Domain Road unless otherwise agreed by PTV. | 88882 |
| | (c) | The Domain tram interchange must be designed to accommodate two 33 metre trams in each direction simultaneously. | 88883 |
| | (d) | The current level of connectivity must be maintained for customers at Domain Interchange at Day-1. | 88884 |
| | (e) | The design must support operation of bus services along St Kilda Road. | 88885 |
| 12.2.5 | Bicycle Parking | | 88886 |
| | (a) | Safe and secure bicycle parking spaces must be provided. Minimum provision is as follows: | 88887 |
| | | i. Arden – 100 spaces; | 88888 |
| | | ii. Parkville – 200 spaces; | 88889 |
| | | iii. CBD North – 50 spaces; | 88890 |
| | | iv. CBD South – 50 spaces; and | 88891 |
| | | v. Domain – 100 spaces; and | 88892 |
| | (b) | Project Co must make provision in the design for future additional bicycle parking as follows: | 88893 |
| | | i. Arden – additional 200 spaces; | 88894 |
| | | ii. Parkville – additional 200 spaces; | 88895 |
| | | iii. CBD North – additional 200 spaces; | 88896 |
| | | iv. CBD South – additional 200 spaces; and | 88897 |
| | | v. Domain – additional 200 spaces. | 88898 |
| | (c) | Bicycle parking at Parkville Station must not obstruct access to the VCCC. | 88899 |
| 12.2.6 | Passenger drop off and pick up spaces must be provided at Arden, Parkville and Domain Stations. | | 88900 |

12.3 Roadworks

88901

12.3.1 Design Vehicle

88902

- (a) Roads layouts must be based on the design vehicle, including accommodation of vehicles swept paths for all through lanes, turning and deceleration lanes and intersections.

88890

Table 12-1: Typical Design and Checking Vehicle

88904

| ELEMENT | DESIGN VEHICLE | CHECKING VEHICLE ⁽¹⁾ |
|--|----------------------------------|--|
| Intersections between Arterial / Arterial Road | 19.0m Prime mover / semi-trailer | 25.0m Prime mover / long semi-trailer ⁽²⁾ |
| Intersections between Arterial / Collector Road and Collector / Collector Roads | 12.5m Single unit truck / bus | 19.0m Single articulated vehicle |
| Intersections between other road types | 8.8m Service vehicles | 12.5m Single unit truck / bus |
| Intersections with multiple turn lanes | As appropriate from above | 19.0m semi-trailer in one turn lane turning concurrently with cars in the other turn lane(s) |
| 1 5kph minimum intersection turning speed | | |
| 2 Vehicle assumed permitted to intrude into adjacent traffic lanes to negotiate turn | | |

- (b) Road intersection layouts must accommodate the swept path of the design vehicle with a minimum offset of 0.5m from the extremities of the vehicle path to a line of kerb, pavement edge or centreline, unless otherwise agreed with the relevant road authority.

88905

- (c) Road layouts must ensure that opposing movements within an intersection allow for 1.0m clearance and 2.0m clearance where at least one of the movements has two vehicles side by side, except where split phasing is agreed with the relevant road authority.

88906

- (d) Road layouts must ensure that swept paths are assessed at a minimum speed of 5 kph.

88907

- (e) Road layout design must ensure that vehicle swept path are carried out in accordance with:

88908

i. Austroads Guide to Road Design (AGRD) Part 4;

88909

ii. VicRoads Supplement to AGRD Part 4; and

88910

iii. Austroads Design Vehicle and Turning Path Templates Guide.

88911

12.3.2 Horizontal Clearance

88912

- (a) Roadside furniture must be located a minimum of 500mm clear of the swept path of the design vehicles and not be within 500mm behind the face of kerb and channel, or otherwise in accordance with the standards of the Returned Asset Owner.

88913

12.3.3 Sight Distance Criteria

88914

- (a) Sight distance must be in accordance with the:

88915

i. Austroads Guide to Road Design (AGRD) Part 3; and

88916

ii. VicRoads supplement to AGRD Part 3.

88917

12.3.4 Horizontal and Vertical Alignments

88918

- (a) The horizontal and vertical alignment must be in accordance with the:

88919

i. Austroads Guide to Road Design (AGRD) Part 3; and

88920

ii. VicRoads supplement to AGRD Part 3,

88921

| | | |
|-------------|---|--------|
| | other than for existing infrastructure which will be as agreed with VicRoads or the relevant road authority. | 150497 |
| 12.3.5 | Post Speeds and Design Speeds | 88922 |
| | (a) The road design speed must be equal to the current posted speed limit or otherwise as agreed with the Responsible Road Authority, with the exception of Grattan Street where a 40kph speed limit is to be instated between Flemington Road and Leicester Street. | 88923 |
| 12.3.6 | Cross Section and Lane Widths | 88924 |
| | (a) The effective footpath width on Collins Street, Franklin Street, Flinders Street and La Trobe Street must not be reduced from its pre-construction width, and must be a minimum of 3 metres unless otherwise agreed with the City of Melbourne. | 88925 |
| | (b) The effective footpath width on Swanston Street in areas of new and modified roadworks or a station entry must be a minimum of 4.5 metres unless otherwise agreed with the City of Melbourne, with the exception of the following areas where effective footpath width must be maximised within the available space: | 88926 |
| | i. north of Franklin Street; and | |
| | ii. the western footpath south of Little LaTrobe Street adjacent to the proposed parking spaces. | |
| | (c) Pedestrian crossing widths should be widened based upon pedestrian flows and comfort. | 88927 |
| | (d) Pedestrian crossings must be a minimum of 2.5 metres wide, except where otherwise noted. | 88928 |
| 12.3.7 | Bicycles | 88929 |
| | (a) Project Co must ensure that any changes to intersections includes provision of advanced stop line areas for cyclists in accordance with VicRoads design standards. | 88930 |
| | (b) Space must be provided for bike share schemes at Stations in agreement with the bike scheme operator. | 88931 |
| | (c) Bicycle pathways must not conflict with pedestrian pathway desire lines or otherwise impede traffic flow, with interfaces designed in accordance with Austroads Guide to Road Design Part 6A Paths for Walking and Cycling and Part 4 Intersections and Crossings, cycling aspects of Austroads Guides and AS1742.9:2000 'Manual of uniform traffic control devices', Part 9: Bicycle facilities and associated VicRoads Supplements to AGRD and Traffic Engineering Manuals. | 88932 |
| 12.3.8 | Buses | 88933 |
| | (a) The road layout must ensure that the design vehicle for buses must be a 12.5m bus except at Parkville, where an allowance for at least one 18m articulated bus within each bus interchange must be accommodated. | 88934 |
| | (b) Rail replacement services where integrated with existing facilities must not degrade the functionality or operation of the existing arrangements. | 88935 |
| | (c) Consistent bus stops, shelters and seating must be provided for all new infrastructure. | 88936 |
| | | 88937 |
| 12.4 | Tram works | |
| 12.4.1 | General | 88938 |
| | (a) New and modified tram infrastructure must be designed for Day-1 operations. | 88939 |
| | (b) New tram stops must provide capacity to support passenger demand levels and pedestrian movements forecast at Day-1. | 88940 |
| | (c) The new and modified assets must not preclude the operation of all vehicle types supported on the existing tram network at the date of the Agreement, with the exception of the Parkville outbound tram stop which must provide a minimum 60m platform. | 150502 |
| | (d) The new and modified assets must not result in a degradation of service delivery performance as far as reasonably practicable to the satisfaction of the State. | 88941 |
| | (e) The design of new tram stops and termini must not preclude future extensions or | 88942 |

| | | |
|--------|---|-------|
| | modifications to accommodate longer trams. | |
| (f) | New and redesigned tram tracks and stops must be designed and constructed in accordance with standards prescribed by PTV, VicRoads and the Tram Franchisee. | 88943 |
| (g) | A tram terminus must: | 88944 |
| | i. be incorporated at the end points of any new tram lines introduced as part of the Works; | 88945 |
| | ii. be designed to accommodate two 33m trams simultaneously; and | 88946 |
| | iii. provide facilities for the staff required at each new tram terminus (including drivers and customer service employees) to support the operation. | 88947 |
| (h) | In the event that there is a need to relocate / remove platforms at a tram stop, the spacing and change in location of tram stops must be between 200m and 400m unless agreed with TfV, PTV and the Tram Franchisee. | 88948 |
| (i) | ICT/OCS and security assets must be provided at tram/ train interchanges and at new tram terminuses provided at end points of new tram lines introduced as part of the Works. | 88949 |
| (j) | New tram track must be separated from road traffic where a segregated tram track reserve is available. | 88950 |
| 12.4.2 | Transport Integration | 88951 |
| (a) | Customers must be able to easily understand and navigate the network changes associated with the Metro Tunnel. | 88952 |
| 12.4.3 | Customer Experience | 88953 |
| (a) | Any new tram infrastructure must provide appropriate access for maintenance vehicles and personnel. | 88954 |
| (b) | Tram stops that are replaced or redesigned must provide the same or greater level of safety than the existing stop that has been replaced. | 88955 |
| (c) | Functionality and accessibility of tram stops in the vicinity of Flinders Street and CBD South Stations must be maintained. | 88956 |
| (d) | Tram stop design must assist with distributing passengers for even rollingstock loading and minimising alighting and boarding times. | 88957 |
| (e) | Sufficient general rubbish and recycling bins must be provided at major tram stops. | 88958 |
| 12.4.4 | Tram Infrastructure | 88959 |
| (a) | The design must provide for new tram curves at the intersection of Flinders Street and Elizabeth Street to allow these routes to continue east into Flinders Street with analysis to confirm tram delays through the intersection for all movements are minimised as far as practicable while maintaining pedestrian priority to the satisfaction of PTV. | 88960 |
| (b) | Seating and shelter for customers in waiting areas and platforms must be provided on modified or new tram stops. | 88961 |
| (c) | Weather protection must be provided at tram platforms where new or redesigned tram stops are installed as part of the project. The extent of the weather protection must be agreed with stakeholders. | 88962 |
| 12.4.5 | Performance | 88963 |
| (a) | The operational functionality and passenger connectivity of the tram network must be maintained at Day-1. | 88964 |
| (b) | Future upgrades to the tram network must not be precluded in accordance with the Tram Concept of Operation (CoO). | 88965 |
| (c) | New tram stops must be capable of supporting 33m trams. | 88967 |
| (d) | Any new or modified tram tracks must allow services to be delivered as prescribed in the Tram Concept of Operation (CoO) at Day-1. | 88968 |
| (e) | New tram stops must be sized based upon standard tram stop designs consistent with the tram corridor they are constructed on. | 88969 |
| (f) | If there is a need to relocate/remove platforms at a tram stop, the spacing and change in location of tram stops must be agreed with the Tram Franchisee. | 88970 |

| | | |
|---------|--|-------|
| 12.4.6 | Operational Resilience | 88971 |
| | (a) The design must allow tram services to be delivered in line with the Tram Concept of Operation (CoO) from pre-construction up to Day-1. | 88972 |
| | (b) The design must allow tram services to be delivered in line with the Tram Concept of Operation (CoO) at Day-1. | 88973 |
| | (c) The design must allow operational resilience of the tram network to be maintained to ensure degraded mode operations are accommodated. | 88974 |
| 12.4.7 | Civil Works – General | 88975 |
| | (a) Design loads must comply with: | 88976 |
| | i. AS/NZS 1170: Structural Design Actions Set; | 88977 |
| | ii. AS1657: Fixed platforms, walkways, stairways and ladders – Design, construction and installation; | 88978 |
| | iii. AS4678: Earth Retaining Structures; and | 88979 |
| | iv. AS5100: Bridge Design Set. | 88980 |
| | (b) Track infrastructure must be capable of supporting a maximum of 70km/hr operating speed, or in accordance with the regulatory roadway speed applicable to trams. | 88981 |
| | (c) As a minimum, track infrastructure for curved tracks must be capable of supporting a speed equal to the proposed operating speed. | 88982 |
| | (d) Trams tracks must be provided with a standard gauge (1435mm) that is measured between the running edges on the inside of the rails. | 88983 |
| | (e) Standard tram track components must be used. | 88984 |
| | (f) Track components currently approved for use within the Melbourne Tram Network must be used. | 88985 |
| | (g) E-Class (33.45m) length trams must be able operate on new or modified tram tracks. | 88986 |
| 12.4.8 | Alignment Design | 88987 |
| | (a) The design must ensure that any tram works associated with the project provide for the comfort of tram occupants. | 88988 |
| | (b) The design must ensure that any tram works associated with the project provide for the safety of tram occupants (both customers and staff) in both normal and abnormal operating modes. | 88989 |
| | (c) The design of any tram works associated with the project must demonstrate the total life of expandable track materials and components are optimised by providing a whole of life costing analysis. | 88990 |
| | (d) The design of the any tram works associated with the project must comply with the requirements of VRIOGS 005.1 – Tram Track Design Manual. | 88991 |
| 12.4.9 | Gauging and Clearances | 88992 |
| | Tram tracks must maintain clearances in line with the requirements of VRIOGS 005.1 – Tram Track Design Manual. | 88993 |
| 12.4.10 | Rail Track Components | 88994 |
| | Modified tram tracks must be as follows: | 88995 |
| | (a) embedded track - Ri57A grooved profile; and | 88996 |
| | (b) ballasted track – 41kg/m standard T rail. | 88997 |
| 12.4.11 | Track Structure | 88998 |
| | (a) The tram track construction must comply with the VRIOGS 005.2 – Tram Track Construction Part 1 to 4. | 88999 |
| | (b) Tram track structure must be as specified by Tram Franchisee (Standard Drawing STD_T9010 Rev D). | 89000 |
| 12.4.12 | Turnouts and Crossings | 89001 |
| | (a) Tram tracks must use switches that are Tram Franchisee standard design (SL45 or SR45 as required). | 89002 |

| | | |
|---------|---|-------|
| | (b) Turnouts must conform to the Tram Franchisee standard drawing (STD_T9010 Rev D). | 89003 |
| 12.4.13 | Tram Platforms | 89004 |
| | Tram platforms must comply with VRIOGS 005.2 – Tram Stop Infrastructure. | 89005 |
| 12.4.14 | Tram Roadmarking | 89006 |
| | All road markings must comply with the VicRoads Traffic Engineering Manual Volume 2 – Sections 16, 17 and 18. | 89007 |
| 12.4.15 | Tram Track Drainage | 89008 |
| | (a) Track drainage must cater for a 1 in 100 year ARI flood event (including the effects of climate change). | 89009 |
| | (b) Tram tracks must have drainage points at geometric low points. | 89010 |
| | (c) Tram track drainage must provide all aspects of the track system so as to provide for free drainage of all surfaces, trackwork, rail grooves and ancillary equipment for example electrical and mechanical equipment associated with switches and turnouts and expansion joints | 89011 |
| | (d) Tram track drainage must be positioned to intercept water that would otherwise enter in major crossroads and / or customer areas. | 89012 |
| | (e) Tram track drainage designers must identify all existing drainage services, charted or uncharted. Where this may conflict with the new tram track works or temporary works the drainage must be protected, relocated and/or adjusted. | 89013 |
| 12.4.16 | Electrical Requirements | 89014 |
| | Tram electrical works must comply with VRIOGS 005.1 – Tram Track Design Manual – Section 9. | 89015 |

13 Utility Infrastructure Works

89016

13.1 General Requirements

89017

- 13.1.1 Project Co must deliver all utility infrastructure required to support the operation of the Tunnel, Stations and Portals and must undertake any utility diversions in accordance with the relevant Utility Provider's requirements. 89018
- 13.1.2 Project Co must reinstate utility infrastructure temporarily relocated by the Early Works Managing Contractor as set out in Appendix B5. 89019
- 13.1.3 All minimum clearances (horizontal and vertical) must be maintained between Utility services, unless otherwise agreed with the relevant Utility Provider in writing in advance of commencement of the relevant Works. 89020
- 13.1.4 All utility infrastructure Works must have a safe means of access and egress. 89021
- 13.1.5 Project Co must provide the gas, telecommunications, electrical, water sewerage and drainage connections from the Stations to local networks. The connections must provide sufficient future capacity, including for any retail or commercial areas. 89022
- 13.1.6 Project Co must ensure that designs account for future servicing of any compulsorily acquired land which is identified for future development. 89023
- 13.1.7 Physical protection from damage must be provided for all new, relocated or existing utility infrastructure assets which are impacted upon or delivered as part of the design. 89024
- 13.1.8 Protection supported by structural assessments must be provided against, but not limited to, the following: 89025
- (a) ground vibration; 89026
 - (b) vehicle and plant movements; 89027
 - (c) excavation; and 89028
 - (d) access (operational and maintenance). 89029
- 13.1.9 The design must not result in load transfer onto existing or new utility infrastructure, unless otherwise agreed with the relevant Authority. Loading includes, but is not limited to, loads resulting from new construction, vehicle movements and construction storage. 89030
- 13.1.10 The design must not reduce or adversely impact the capacity of any existing utilities, including relocated, diverted or protected Utility Infrastructure. 89031
- 13.1.11 Temporary relocations must be avoided, where possible. 89032
- 13.1.12 The design of the Tunnels, Stations and Portals must ensure that any utility relocations maintain the structural independence of all other assets. 89033
- 13.1.13 All utility infrastructure must be earthed and bonded, as a minimum in accordance with the Utility Provider's requirements. 89034
- 13.1.14 The design must account for future Utility Provider servicing of developments on property acquired for the project and on property developed in close proximity to the project. 89035
- 13.1.15 The design of the Tunnels, Stations and Portals must be compatible with the existing storm water and sewer systems. 89036
- 13.1.16 Existing assets must not be rendered inoperable due to the performance of the Works. 89037
- 13.1.17 Project Co must design utility infrastructure and assets to withstand 20 mm/sec peak particle velocity, unless otherwise agreed with the each Utility Provider in writing prior to commencement of the Utility Infrastructure Works. 89038

13.2 Gas

89039

- 13.2.1 The design of the Tunnels, Stations and Portals must comply with the: 89040
- (a) Pipelines Act for any works performed on gas transmission assets; 89041
 - (b) Gas Safety Act 1997 Victoria for any works conducted on gas assets; 89042
 - (c) AusNet Technical Standard 2607.2 Conditions for Works Near Gas Transmission Pipelines; and 89043

| | | |
|--------------------------------|---|-------|
| | (d) AusNet Technical Standard 2607.3 Conditions for the Use of Explosives Near Gas Transmission Pipelines and Mains. | 89044 |
| 13.2.2 | A minimum clearance of 300mm horizontally and 150mm vertically must be provided between gas and other underground assets (with the exception of electricity). | 89045 |
| 13.2.3 | A minimum 1000mm clearance must be provided between gas mains and parallel electrical underground assets. | 89046 |
| 13.2.4 | A minimum 1200mm cover must be provided to gas mains under tram tracks. | 89047 |
| | | 89048 |
| 13.3 Telecommunications | | |
| 13.3.1 | The design of the Tunnels, Stations and Portals must comply with the: | 89049 |
| | (a) Communications Alliance Ltd Industry Code C524:2013 External Telecommunication Cable Networks; | 89050 |
| | (b) Telecommunications Network Protection Plan, TS-SP-015_V03_R1.1 for all Works on VicTrack infrastructure. | 89051 |
| | (c) Telecommunications Specification; and | 89052 |
| | (d) VicTrack Telecommunications Department; | 89053 |
| 13.3.2 | The design of all relocated telecommunications assets must ensure they are relocated outside of tram reserves. | 89054 |
| 13.3.3 | All installed cable joints must be easily accessible and comply with Utility Providers standards, or as a minimum adopt the relevant Telstra standards. | 89055 |
| 13.3.4 | Project Co must ensure adequate provision is made, including cable containment through the stations to allow future retail and/or commercial tenants to apply for and install dedicated telecommunication / data lines for their own use. | 89056 |
| | | 89057 |
| 13.4 Electrical | | |
| 13.4.1 | Temporary power sub-station kiosk earthing grid design must be coordinated with Utility Provider earthing grids where induced voltage potential exists between grids. | 89058 |
| 13.4.2 | Any temporary power sub-station kiosk which supplies 3 rd party properties must be located on the boundary of the Site such that the Utility Provider has unimpeded access. | 89059 |
| 13.4.3 | The Victorian Electrical Distribution Networks (VEDN) management system and rules for any electrical services works must be followed. | 89060 |
| 13.4.4 | The design must maintain supply to all properties affected by removal and or modification of any substations within the designated project area. | 89061 |
| 13.4.5 | Project Co must ensure adequate provision is made, including metering space and cable containment through the stations to allow future retail and/or commercial tenants to apply for and install dedicated power supplies. | 89062 |
| | | 89063 |
| 13.5 Water | | |
| 13.5.1 | All incoming water supply pipes must provide secure but accessible isolation valves and pits located within the Stations. The pits must be positioned and detailed such that a water pipe cannot drain into the station. | 89064 |
| 13.5.2 | The design must provide the minimum cover to water mains in accordance with MRWA-W-202. Any reduced cover proposed by Project Co for water mains must be agreed with the Utility Provider, taking into account road manager or road user requirements, the adequacy of the proposed protection measures, minimum heights required for fittings (such as valves and hydrants) and the pipe's embedment zone remains intact (see MRWA-W-202 for dimensions) prior to the commencement of the Works. | 89065 |
| 13.5.3 | The design of any concrete encasement of water assets must be undertaken in accordance with relevant Utility Provider requirements. | 89066 |
| 13.5.4 | Where a City West Water asset is agreed with City West Water to be installed within 1 metre of property boundary the creation of an easement/licence encumbrance must be facilitated. The easement/licence must be recorded on any property title. | 89067 |
| 13.5.5 | The design must provide adequate offsets from property lines (or title boundary) for all | 89068 |

| | |
|---|-------|
| relocated water assets including: | |
| (a) the angle of repose of the building; | 89069 |
| (b) depth of trench construction; | 89070 |
| (c) any underground footing or ground anchors that protrude out from the property boundary; | 89071 |
| (d) overhanging building aspects; | 89072 |
| (e) potential for third party damage by failure of the asset; | 89073 |
| (f) the provision of adequate access for operation and maintenance of pipelines; | 89074 |
| (g) the outside diameter of manhole or any other pipeline protrusions; and | 89075 |
| (h) City West Water's "build over" process. | 89076 |
| 13.5.6 Relocated assets must not be under electricity or tram lines, except for transverse crossings (with appropriate clearances). | 89077 |
| 13.5.7 The design must provide continuity of fire-fighting water supplies at all times, with all connections/hydrants to be identified prior to the Works. | 89078 |
| 13.5.8 The design must account for, and the relevant Authority must be advised of: | 89079 |
| (a) future land use; and | 89080 |
| (b) any surplus land post construction that may require the relevant Authority to declare that surplus land as having 'serviced properties'/future development. | 89081 |
| 13.5.9 Relocated water reticulation mains must have firefighting services supplied directly from the water mains and have no less than the current capability of fire service connections (same number of hydrants/valves, capacity, pressure, maximum spacing and meet the Fire Safety Code during and after construction of the works). This applies to temporary and permanent water main relocations and associated fire-fighting connections (hydrants, valves). | 89082 |
| All relocated or replaced hydrants must be reviewed by the combined Fire Protection Committee (Utility Providers, MFB and the local government authorities). | |
| 13.5.10 New or temporary road hydrants relocated or installed must be placed so they are accessible at all times to emergency vehicles and personnel, to the satisfaction/ approval of the asset owner, MFB and the local government authorities. | 89083 |
| 13.5.11 Existing, temporary and new road hydrants impacted by the Works must be able to be maintained. | 89084 |
| 13.5.12 A minimum of 1.5 metres cover must be provided above water pipes. A minimum of 2 metres cover must be provided above the DN750Ø and DN450Ø water mains respectively (allowing for water main saddle seating on top of the station box, water main and valves/spindle) to provide an acceptable permanent traverse of relevant assets. | 89085 |
| 13.5.13 A minimum of 1 metre clearance must be provided between water and power assets unless otherwise agreed with the relevant Authority. | 89086 |
| 13.5.14 City West Water pipeline assets within the construction zone at Parkville that are to be temporarily or permanently relocated must be renewed to at least a 10 metre clearance beyond the construction zone in each case to minimise operational disruption during the Utility service relocation works and minimise risk to the Site. | 89087 |
| 13.5.15 Isolation valves (remotely actuated) and flow and pressure monitoring instruments must be provided on major water main diversions (DN750Ø and DN450Ø) where they are diverted over the Parkville Station construction site and on other temporarily relocated water mains as agreed with City West Water. | 89088 |
| 13.5.16 Isolation valves and pressure / flow monitoring must be provided on water distribution mains where there they are within a combined services trench (including in Grattan St). | 89089 |
| 13.5.17 Water mains must be relocated under footpaths (and at least 1m from a property boundary) rather than in roads, under electricity or tram lines, unless agreed with the relevant Authority. | 89090 |
| 13.6 Sewer | 89091 |
| 13.6.1 All sewers must be structurally independent of the Works at all times. | 89092 |

| | | |
|-------------|---|-------|
| 13.6.2 | Minimum horizontal clearance of 2 metres must be allowed for between the outside of the sewer and the Station boxes, adits, caverns and Tunnel. | 89093 |
| 13.6.3 | Relocated sewer assets must have a sufficient number of appropriately sized sewer manholes provided, notably at significant changes of direction, as agreed with the relevant Authority. | 89094 |
| 13.6.4 | Sewerage services located under, above or adjacent to any part of the Station box must: | 89095 |
| | (a) be sized for the relevant authorities' ultimate capacity for that part of the network; and | 89096 |
| | (b) provide acceptable future access for operational and maintenance purposes. | 89097 |
| 13.6.5 | A risk assessment of all water and sewerage assets within the Station box and the zone of influence around it must be undertaken and all sewer assets with a category 3 or 4 risk rating (based on relevant Authorities asset management system) must be relined for a minimum manhole to manhole length of 30 metres or treated as otherwise agreed with the relevant Utility Provider. Ground stabilisation may be required if settlement is at risk. | 89098 |
| 13.6.6 | Protection must be provided to the existing MEL and the new replaced/relocated section of the MEL as agreed with City West Water. | 89099 |
| 13.6.7 | The design of the Parkville Station box sewer outlets must be connected to a City West Water sewer on the south side of the Station box (not a sewer on private land). | 89100 |
| 13.6.8 | The vertical and horizontal clearances (to all other assets forming part of the Tunnels and Stations) of the new South Yarra Main diversion sewer running through the cavity traversing under the Station box must be agreed with Melbourne Water. | 89101 |
| 13.6.9 | The Station box design around the South Yarra Main Sewer relocated by the Early Works Managing Contractor must be supported by appropriate structural and where necessary hydraulic analysis, including: | 89102 |
| | (a) horizontal clearance of minimum 1.0 metre between pipe structure spring-lines; | 89103 |
| | (b) nominal vertical clearance of outer GRP to underside of bearing structure of 0.3m; | 89104 |
| | (c) no impedance of space directly under the protected area to allow for future optional use by Melbourne Water; and | 89105 |
| | (d) an appropriate allowance within sewer envelope for the effects of future jacking or boring (vibration, heave, etc.). | 89106 |
| 13.6.10 | Sewer assets within the rock / soil anchor zone of the Tunnel, Stations, Portals, adits and shafts must be assessed and appropriately protected / relocated. | 89107 |
| 13.7 | Drainage | 89108 |
| 13.7.1 | The following freeboard must be provided for relocated drains (in order of precedence): | 89109 |
| | (a) freeboard of 300mm between the hydraulic grade line and the top of drainage pits; or | 89110 |
| | (b) freeboard as close as possible to 300mm; or | 89111 |
| | (c) maintain the freeboard as currently exists for the drain as a minimum. | 89112 |
| 13.7.2 | Physical protection must be provided to all drainage assets delivered as part of the Works. The extent of the protection must be agreed with the asset owner. | 89113 |
| 13.7.3 | Drainage pump stations within the Stations must not cause an increase of flow in the downstream drainage system. | 89114 |
| 13.7.4 | The drainage system must interface to existing storm water systems and ensure that it does not exceed the maximum allowable flow rates for these systems. | 89115 |
| 13.7.5 | The relocation of drainage assets must not cause an increase of peak flow rate to the downstream drainage system. | 89116 |
| 13.7.6 | A 32% increase in rainfall intensity due to climate change must be allowed for in all hydrological analysis for drainage. | 89117 |
| 13.7.7 | New drainage pipe diversions must be designed to a 1:20 ARI standard or other agreed standard. | 89118 |
| 13.7.8 | The drainage system must be designed with a pit inlet capacity blockage factor of 50% and ensure no loss of existing hydraulic capacity. | 89119 |

- 13.7.9 City of Melbourne drainage pipes must be constructed from reinforced concrete pipe (rubber ring jointed) class 4 minimum. 89120
- 13.7.10 The maximum allowable spacing between drainage pits must be 90m, unless otherwise approved by the relevant Authority. 89121
- 13.7.11 The creation of an easement or licence over all City of Melbourne drainage assets in favour of the City of Melbourne must be facilitated, where the drainage diversion is located on land not under the control of the City of Melbourne. 89122
- 13.7.12 The drainage system must not have pipe joints located within the footprint of any existing or proposed structure. 89123
- 13.7.13 New or upgraded drainage infrastructure (pipe systems and overland flow) associated with tram line relocation must be designed for a 1:100 ARI storm event. 89124
- 13.7.14 Where drainage infrastructure is replaced or relocated within the Elizabeth Street drainage catchment, it should be designed for a minimum 1:20 ARI flow capacity. 89125
- 13.7.15 Existing surface flooding issues in the Peter Doherty Institute delivery bay at the corner of Grattan Street and Elizabeth Street must not be exacerbated as a result of the Works. 89126

14 Environment

89127

14.1 General

89128

14.1.1 The following must be complied with:

89129

- (a) Minister for Planning’s assessment of the Environment Effects Statement (**EES**) prepared under the Environmental Effects Act 1978; 89130
- (b) Incorporated Document; 89131
- (c) Environment Management Framework (**EMF**) approved by the Minister for Planning under the Incorporated Document, including the EPRs and 89132
- (d) EPBC Particular Manner Decision including conditions. 89133

14.1.2 Project Co must design the Works and the Temporary Works in compliance with all EPRs contained in the EMF endorsed by the Minister for Planning, except for the following:

89134

- (a) CH22. 89136

14.1.3 The State is responsible for achieving the following nominated EPRs:

89137

- (a) AR2. 89144
- (b) B1 – only in relation to “direct acquisition”; 89140
- (c) SC1 – only in relation to “direct acquisition”; 89141
- (d) SC3 118160
- (e) SC11 118161
- (f) SC12; 118649
- (g) T1 118162
- (h) T6; 89138
- (i) T8 – only in relation to items 1 and 5; 89139

14.1.4 Project Co must implement the outcomes for the above nominated EPRs, as follows:

89145

Table 14-1: EPR Implementation

| EPR | Project Co responsibility |
|------|--|
| AR2 | Prepare and implement designs that address the requirements of section 15.3.1(c) of the PS&TR. |
| B1 | All activities other than “direct acquisition”. |
| SC1 | All activities other than “direct acquisition”. |
| SC3 | Prepare and maintain a Communication and Stakeholder Engagement Management Plan that addresses CSEMF requirements. |
| SC11 | Attend group meetings, consult with group and respond to actions arising from the group. |
| SC12 | Attend group meetings, consult with group and respond to actions arising from the group. |
| T1 | Attend group meetings, consult with group and respond to actions arising from the group. |
| T6 | Prepare and implement designs and activities that address the MMRA TDM strategy requirements. |
| T8 | Prepare and implement designs that address the requirements arising from resolution of items 1 and 5 of this EPR. |

14.1.5 In relation to EPR AE5, the relevant flood management requirements to inform initial design are found in section 5.2.7 (Drainage and Flood Control).

89153

14.1.6 In relation to EPRs EMI1 and EMI2, the relevant Electro-Magnetic Interference requirements are found in section 10.4 (Electromagnetic Compatibility).

118163

14.1.7 In relation to EPR GM1, the relevant tunnel design requirements in sub-item 1(b) are found in section 5.2.8(Settlement).

89149

| | | |
|---------|---|----------------|
| 14.1.8 | In relation to EPR GM2, the appropriate acceptability criteria for initial discussion with relevant stakeholders are found in section 5.2.7(i) (Settlement). | 89150 |
| 14.1.9 | In relation to EPR GW1, GW2 and AE6, the relevant groundwater requirements are found in section 5.2.5 (Watertightness) and section 5.2.6 (Groundwater Control). | 89147 89148 |
| 14.1.10 | In relation to EPR SW1, the relevant management requirements to inform initial design and flood immunity risk assessment are found in section 5.2.7 (Drainage and Flood Control). | 89151 |
| 14.1.11 | In relation to EPR SW2, the relevant flood management requirements to inform modelling are found in section 5.2.7 (Drainage and Flood Control). | 89152 |
| 14.1.12 | In relation to EPR T7, the relevant design standards in item 1 are found in section 12: Surface Transport. | 89146 |

| | | |
|-------------|--|-------|
| 15 | Sustainability and Climate Change | 89155 |
| 15.1 | General | 89156 |
| 15.1.1 | Project Co must ensure that sustainability principles are embedded into the design of the Tunnel, Stations and Portals. | 89157 |
| 15.1.2 | The design must meet the outcomes specified in the MMRA Sustainability Strategy and support the Sustainability Targets as applicable to the Tunnel, Stations and Portals. | 89158 |
| 15.2 | Excellence | 89159 |
| 15.2.1 | Project Co must adopt green building practices and achieve a minimum 5 star certified rating under the GBCA GS Rating Tool for all Stations. | 89160 |
| 15.2.2 | Project Co must achieve a certified 'Design' and 'As Built' rating with a minimum IS score of 84 ("LEADING") under the IS Rating Tool (v1.2) for the Works. | 89161 |
| 15.2.3 | Project Co must achieve a minimum of 3 points under the ISCA Innovation Credit. | 89162 |
| 15.3 | Urban Ecology and Vegetation | 89163 |
| 15.3.1 | Project Co must: | 89164 |
| | (a) demonstrate excellence in the design, construction and management of urban landscapes and ecosystems by applying the principles outlined in the Living Infrastructure Plan to deliver resilient, climate-proof urban landscapes; | 89165 |
| | (b) deliver a post-construction net increase in vegetated surfaces, whereby Project Co must: | 89166 |
| | i. construct at least one tree plot for every tree removed either as part of the Works or as part of any works undertaken by the Early Works Managing Contractor in an area subsequently occupied by Project Co. Tree plots must: | 89167 |
| | (1) be in the same location or an alternative location in the nearest viable vicinity (to be determined in consultation with the relevant local government authority) of the removed tree; | 89168 |
| | (2) be at least one third of the projected mature canopy volume; | 89169 |
| | (3) be prepared to a depth of one metre, or 1.5 metres if the tree plot is positioned over an underground structure; | 89170 |
| | (4) be continuous between avenues of trees and be supported by structural cells and lateral trenches; | 89171 |
| | (5) include subsurface drainage and supporting media; | 89172 |
| | (6) be of a sufficient size to accommodate any underground services without comprising root growth; | 89173 |
| | (7) be supported by rainwater and stormwater runoff from adjacent surfaces to provide passive irrigation; and | 89174 |
| | (8) include any necessary finishing treatment such as grates, footpaths and kerbs. | 89175 |
| | ii. construct ground cover vegetation plots that are: | 89176 |
| | (1) appropriately integrated into the urban design of the Works; | 89177 |
| | (2) of sufficient volume to support diverse, multi-story plantings; | 89178 |
| | (3) created in or near the Metro Tunnel areas of work and equivalent in size to at least 10% of the area defined as the 'extent of landscape works'; and | 89179 |
| | (4) supported by rainwater and stormwater runoff from adjacent surfaces to provide passive irrigation; | 89180 |
| | iii. also consider the implementation of vegetated surfaces including vegetated roofs, walls or facades; | 89181 |

| | | |
|-------------|---|-------|
| (c) | implement Water Sensitive Urban Design (WSUD) measures in accordance with the Melbourne Water ' <i>Water Sensitive Urban Design Guidelines</i> ' and ' <i>WSUD Engineering Procedures</i> '; | 89182 |
| (d) | deliver a post-construction net increase in public amenity space; and | 89183 |
| (e) | consider biophilic design initiatives at all Stations in accordance with the Biophilic Design Guidelines. | 89184 |
| 15.3.2 | The clearing of biodiversity sensitive land must be performed in accordance with the Victorian Department of Environment, Land, Water and Planning document entitled "Permitted clearing of native vegetation - Biodiversity assessment guidelines." | 89185 |
| 15.3.3 | All biodiversity offsets must be placed on land that is not owned by VicTrack. | 89186 |
| 15.4 | Climate Resilience | 89187 |
| 15.4.1 | The design must include measures for all high and extreme climate change risks to ensure the infrastructure, Stations and precincts are resilient to the projected impacts of a changing climate over the relevant asset's Design Life. This should be in accordance with the adopted climate change projections and scenarios within the MMRA Climate Change Risk Assessment and Climate Change Adaptation Plan. | 89188 |
| 15.4.2 | Project Co must implement flooding adaptation measures in accordance with section 5.2.7. | 89189 |
| 15.5 | Energy | 89190 |
| 15.5.1 | Project Co must, to the maximum extent possible, limit energy demand and minimise greenhouse gas emissions through optimization of design initiatives investigating as a minimum the best practice GHG abatement initiatives in the ISCA Carbon and Energy 'Reference Design' Footprint. | 89191 |
| 15.5.2 | All systems must be designed to support energy efficient operation. | 89192 |
| 15.5.3 | Project Co must achieve reductions in greenhouse gas emissions (Scope 1 and 2 emissions) by a minimum of 30% below Project Co's ISCA base case, excluding traction power and the use of renewable energy, for the infrastructure lifecycle through best practice design and construction initiatives. | 89194 |
| 15.5.4 | The design must provide a minimum installed capacity of 125kW from renewable sources within the Licensed Maintenance Area for the Maintenance Phase for generation of onsite renewable energy. | 89196 |
| 15.5.5 | The design must provide the ability to maximise the use of regenerative braking during the infrastructure lifecycle (100 years) to enable a minimum 20% peak energy saving. | 89198 |
| 15.5.6 | The energy efficiency of electrical and mechanical systems, including lighting and ventilation, must be maximised. | 89199 |
| 15.5.7 | Energy consuming equipment must meet the Minimum Energy Performance Standards (MEPS) of the Australian Greenhouse and Energy Minimum Standards Regulator. | 89200 |
| 15.5.8 | Energy consuming equipment must have an energy star rating of at least 5 stars, as rated by the Australian Greenhouse and Energy Minimum Standards Regulator. | 89201 |
| 15.5.9 | New information technology equipment must be Energy Star accredited to the most recent applicable specification of the U.S.A Government's Environmental Protection Agency. | 89202 |
| 15.6 | Materials and Waste | 89206 |
| 15.6.1 | Project Co must minimise, to the maximum extent possible, materials volumes. | 89207 |
| 15.6.2 | Project Co must achieve a minimum 24% reduction in materials lifecycle impacts (measured through Enviropoints) below Project Co's base case in accordance with the ISCA Materials Lifecycle Impact Credit. | 89209 |
| 15.6.3 | Portland cement content must be reduced by 44%, measured by mass across all concrete used in the Works compared to the base case mix as defined by the ISCA Materials Lifecycle Impact Base Case v1.2. | 89211 |
| 15.6.4 | Project Co must specify and source 95% of all timber products used for permanent Works from re-used timber, post-consumer recycled timber or from Forest Stewardship Council. | 89212 |

| | | |
|-------------|--|--------|
| 15.6.5 | Project Co must specify and source at least 80% of steel used in construction from suppliers certified under Australasian Certification Authority for Reinforcing Steels or similar international association or organisation. | 89213 |
| 15.6.6 | Project Co must specify and source at least 80% of fabricated structural steelwork from a steel fabricator / steel contractor which is accredited to the Environmental Sustainability Charter of the Australian Steel Institute (ASI) or similar international association or organisation. | 89214 |
| 15.6.7 | Where shell and core infrastructure is provided the provisions must be coordinated with stakeholders to ensure access and future connections to networks. | 89215 |
| 15.7 | Water | 89216 |
| 15.7.1 | Project Co must utilise rainwater and/or stormwater to support vegetation health by applying the principles outlined in the Living Infrastructure Plan. | 89217 |
| 15.7.2 | Infrastructure Sustainability Council of Australia (ISCA) | 118164 |
| | (a) Project Co must demonstrate a minimum of 40% reduction in total water use below Project Co's ISCA base case in accordance with the ISCA Wat-1 Credit. | 89219 |
| | (b) The Works must achieve a minimum of 20% replacement of the total water use in accordance with the ISCA Wat-2 Credit. | 89220 |
| 15.7.3 | Green Building Council of Australia (GBCA) | 118165 |
| | (a) Project Co must provide infrastructure to reduce operational railway station use of potable water by a minimum of 30% compared with a GBCA Reference Building. | 89221 |
| | (b) Project Co must manage stormwater runoff from new or reinstated ground surfaces and roof areas to achieve the best practice water quality performance objectives inclusive of water sensitive urban design measures as set out in the CSIRO Urban Stormwater Best Practice Environmental Management Guidelines (Victoria). | 89222 |
| 15.7.4 | Best-practice performance objectives for the environmental management of stormwater for post-construction must be achieved. | 89223 |
| 15.7.5 | The design must meet the performance objectives of the State Environment Protection Policy (SEPP) (Waters of Victoria and Groundwaters of Victoria). | 89224 |

Appendix B1: [Not disclosed]

Appendix B2: Level of Service Designations

Level of Service designations indicating minimum and maximum thresholds for each level.

| | Level of Service | | | | | |
|---|------------------|------|------|------|------|------|
| | A | B | C | D | E | F |
| Forecourts, Entrances, Concourse, Ticket Halls and Platforms (Queuing) | | | | | | |
| Minimum (m ² /person) | 1.21 | 0.93 | 0.65 | 0.28 | 0.19 | 0.00 |
| Maximum (m ² /person) | N/A | 1.21 | 0.93 | 0.65 | 0.28 | 0.19 |
| Circulation (Walkways) | | | | | | |
| Minimum (m ² /person) | 3.25 | 2.32 | 1.39 | 0.93 | 0.46 | 0.00 |
| Maximum (m ² /person) | N/A | 3.25 | 2.32 | 1.39 | 0.93 | 0.46 |
| Stairways | | | | | | |
| Minimum (persons/minute per m width) | 0.0 | 16.4 | 23.0 | 32.8 | 42.7 | 55.8 |
| Maximum (persons/minute per m width) | 16.4 | 23.0 | 32.8 | 42.7 | 55.8 | N/A |

Appendix B3: [Not disclosed]

Appendix B4: Modal Priorities

With reference to the Tables below:

- One tick (✓) = limited provisions
- Two ticks (✓✓) = adequate provisions
- Three ticks (✓✓✓) = abundant provisions
- Encircled ticks (✓✓✓) and question mark? = discussion ongoing / further analysis required / further comment required / priority not certain
- Dashed line (–) = not applicable / not considered

Parkville Precinct Modal Priorities and Provisional Summary

| Features | Grattan Street (Flemington Road to Royal Parade) | Grattan Street (Royal Parade to Swanston Street) | Elizabeth Street & Royal Parade |
|---|--|--|------------------------------------|
| Moving modes | | | |
| Pedestrian access | ✓✓✓ | ✓✓✓ | ✓✓✓ |
| Bikes | ✓✓ | ✓✓ | ✓✓✓ |
| Buses (3.0m wide lane minimum) | ✓✓ | ✓✓ | ✓ |
| Trams (Stop length to be as close to 66m as possible to the satisfaction of the State) | – | – | ✓✓✓ |
| Local Traffic to Local Destinations | ✓✓ | ✓✓ | ✓ |
| Through Traffic | ✓ | ✓ | ✓✓✓ |
| Trucks (through movement) | – | – | ✓ |
| Ambulance | ✓✓✓ | ✓✓ | ✓✓✓ |

Kerbside/Footpath Provision

| Features | Grattan Street (Flemington Road to Royal Parade) | Grattan Street (Royal Parade to Swanston Street) | Elizabeth Street & Royal Parade |
|----------|--|--|------------------------------------|
| Taxis | ✓✓ | – | ✓ (Melbourne Private Hospital) |

| | | | |
|---|--|--|---|
| Bike Parking (On road reserve) | - | ✓ (Leicester St/Barry St) | ✓ |
| Trees | - | ✓✓ | ✓✓✓ |
| DDA Car Parking – Long Term | ✓ | - | - |
| Parking | - | ✓ (south side, east of Leicester Street only) | - |
| Delivery vehicles refuse/ loading bay | ✓ (Night time only) | ✓ North side near station entrance. | ✓ (VCCC: varies time of day) (Peter Doherty Institute: 24/7) |
| Emergency vehicles other than ambulances | ✓✓✓ | ✓✓ | ✓ |
| Patient Drop Off/Short Stay | ✓✓✓ | - | ✓ (Melbourne Private) |
| Ambulance layby | ✓✓ (must be as close as possible to emergency department) | - | ✓ |
| Pedestrian Crossings | ✓✓✓ | ✓✓✓ | ✓✓ |
| Bus stop | ✓✓ (one bay each way) | ✓✓ (three bays each way plus bus replacement*) | ✓ (consistent with existing provisions) |

*Note: bus replacement bay may be located elsewhere within the precinct subject to agreement with the State and the relevant authorities.

Appendix B5: Temporary Utility Diversions

89280

This Appendix B5 contains an indicative, non exhaustive list of the utilities to be temporarily relocated by the Early Works Managing Contractor and reinstated to their permanent position by Project Co.

89281

Table B5.1: Utility reinstatement works in the Parkville Precinct

89282

| Asset Owner | Asset ID | Affected Asset | Drawing Reference | Temporary (T) or Permanent (P) relocation | Managing Contractor – Enabling Works | Managing Contractor – EES Assessed Early Works | PPP Works |
|--|----------|-------------------------------------|---------------------------|---|--------------------------------------|--|--|
| Telstra / Optus / Vernet / NBN / NextGen | PV-T04 | P100 telecommunications conduits | MMR-AJM-UGPV-DR-CU-412411 | P & T | T | | P, refer to Note 1. |
| Telstra / Vernet / NBN / NextGen | PV-T06 | P100 telecommunications conduits | MMR-AJM-UGPV-DR-CU-412411 | P & T | T | | P, refer to Note 1. |
| Optus | PV-T07 | P100 telecommunications conduits | MMR-AJM-UGPV-DR-CU-412411 | P & T | T | | P, refer to Note 1. |
| CitiPower | PV-E10 | High voltage cables | MMR-AJM-UGPV-DR-CU-412111 | P & T | T | | P, refer to Note 1. |
| CitiPower | PV-E11 | High voltage and low voltage cables | MMR-AJM-UGPV-DR-CU-412111 | P & T | | T | P |
| CitiPower | PV-E13 | Low voltage cables | MMR-AJM-UGPV-DR-CU-412111 | P & T | | T | Permanent reinstatement if required by Citipower |

| | | | | | | | |
|-------------|--------|-------------------------------|---------------------------|-------|------------------------|-------------------|----------------------------|
| APA | PV-G01 | DN300 high pressure gas main. | MMR-AJM-UGWP-DR-CU-412211 | P & T | T | | P, refer to Note 1. |
| UoM - sewer | PV-S04 | DN225 Vitrified Clay sewer | MMR-AJM-PWPV-DR-CU-412311 | P & T | T | | P, refer to Note 2. |
| CWW- water | PV-W04 | DN225/150 water mains | MMR-AJM-PWPV-DR-CU-412511 | P & T | T | T | P, refer to Note 3. |
| CWW- water | PV-W08 | DN225/150 water mains | MMR-AJM-PWPV-DR-CU-412511 | P & T | T (excluding Barry St) | P (Barry St only) | P (excluding Barry Street) |

Note 1. PPP works include permanent relocation of the utility, as well as removal (or decommissioning subject to UoM acceptance) of the redundant temporary utility from UoM grounds in line with the UoM Handback Works Deed.

Note 2. Sewer pits to replace bends after the removal of the temporary power cables inside the University of Melbourne (PV-E10).

Note 3. Certain extents of PV-W04 within UoM land will be retained as permanent assets, and the remainder is removed (or decommissioned subject to UoM acceptance) from UoM. PPP works include reconnecting the Medical Building supply from the main water feed from Grattan street.

89283

| | | |
|------------|---|-------|
| 1 | Process Requirements | 89336 |
| 1.1 | Systems Engineering | 89337 |
| 1.1.1 | Introduction | 89338 |
| 1.1.1.1 | Project Co must prepare and update the Systems Engineering and Assurance Management Plans described in Annexure 3. | 89339 |
| 1.1.1.2 | Project Co must employ a systems lifecycle process model (SLPM) to manage the delivery of the Project, in accordance with: | 89340 |
| | (a) AS/NZS ISO/IEC 15288:2015 (the Systems Engineering Standard); | 89341 |
| | (b) Public Transport Victoria's 'System Engineering Policy', version G dated 14 August 2014, as updated from time to time (the System Engineering Policy); and | 89342 |
| | (c) the other requirements of the Agreement. | 94222 |
| 1.1.1.3 | A suitably experienced and qualified person must be appointed as 'Systems Engineering Manager' for the Project. | 89343 |
| 1.1.2 | Tailoring of the Systems Engineering Standard | 89344 |
| 1.1.2.1 | Project Co must tailor the Systems Engineering Standard to the Project. | 89345 |
| 1.1.2.2 | Project Co must record any tailoring of processes from the Systems Engineering Standard in the Systems Engineering Management Plan. | 89346 |
| 1.1.3 | Project Systems | 89347 |
| 1.1.3.1 | Project Co must define the breakdown structure of the System in sub-sub-systems and System Elements that map to the Project Assets based upon the Systems Breakdown Structure in Appendix A2 to Part A. | 89348 |
| 1.1.4 | Project Lifecycle Stages | 89348 |
| 1.1.4.1 | Project Co must define the Lifecycles for the Project, the System and Assets, which must include discrete Lifecycle Stages with defined deliverables and Stage Gate Reviews, noting that multiple Lifecycles may run in parallel. | 89350 |
| 1.1.5 | Project Processes | 89351 |
| 1.1.5.1 | The System Lifecycle Processes are classified in the Systems Engineering Standard as Agreement Processes, Organisational Enabling Processes, Project Processes and Technical Processes. | 89352 |
| 1.1.5.2 | Project Co must develop and structure its Management Plans to accord with the Systems Life Cycle Processes defined in the Systems Engineering Standard. | 89353 |
| 1.1.6 | Stage Gate Reviews | 89354 |
| 1.1.6.1 | Project Co must conduct the Stage Gate Reviews at the timeframes set out in Table 1-1. | 89355 |
| 1.1.6.2 | Project Co must conduct Stage Gate Reviews in a manner consistent with the Stage Gate Review Guide. | 89356 |
| 1.1.6.3 | The entry and exit criteria associated with each Stage Gate Review are set out in Appendix C1. | 89357 |

Table 1-1: Stage Gate Reviews

| Stage Gate Review | Timeframe | 89358 |
|--|--|-------|
| System Definition Review (SDR) | Within 90 Business Days of Financial Close unless otherwise agreed with the State. | |
| Preliminary Design Review (PDR) | Following the submission and review of Interim Design Documentation. | |
| Critical Design Review (CDR) | Following the submission and review of Certified Design Documentation. | |
| Issued for Construction Review (IFCR) | Following the submission and review of IFC Design Documentation. | |

| | |
|---|--|
| Test Readiness Review (TRR) | Prior to the commencement of testing and commissioning activities. |
| Integration Readiness Review (IRR) | Prior to Provisional Acceptance. |
| System Acceptance Review (SAR) | Prior to Final Acceptance. |

| | | |
|------------|---|-------|
| 1.1.7 | Requirements Management | 89359 |
| | Project Co must ensure that the requirements set out in this PS&TR are mapped and linked in the Dynamic Object-Oriented Requirements System (DOORS NG®) to manage and maintain traceability through all Lifecycle Stages. | 89360 |
| 1.2 | Management Plans | 89361 |
| 1.2.1 | General Requirements | 89362 |
| 1.2.1.1 | The intended purposes of the Management Plans include to: | 89363 |
| | (a) demonstrate to the State and the Independent Reviewer how Project Co will meet its obligations under the State Project Documents in relation to the D&C Activities; | 94223 |
| | (b) document: | 94224 |
| | (1) the processes and procedures that Project Co will adopt for the management of the D&C Activities; and | 94225 |
| | (2) the management accountabilities for ensuring effective implementation of such processes and procedures; and | 94226 |
| | (c) demonstrate how the requirements of each of the processes within the Systems Engineering Standard are met. | 94227 |
| 1.2.1.2 | The Management Plans must be configured in a logical integrated structure and avoid overlapping content. | 89364 |
| 1.2.2 | Preparation and Review of Management Plans | 89365 |
| 1.2.2.1 | Project Co must prepare and submit the Management Plans and all other plans, manuals, documents, programs and systems at the times set out in Column 2 of the table contained in Annexure 1 and as otherwise required by the Agreement. | 89366 |
| 1.2.2.2 | Where there is a prior version of a Management Plan, all updates to that Management Plan must be consistent with, and not limit or reduce the requirements or obligations of Project Co under the relevant Management Plan, other than the extent necessary to comply with the State Project Documents or as otherwise agreed by the State. | 89367 |
| 1.2.2.3 | Compliance by Project Co with its obligations under this section 1.2 is not evidence of compliance by Project Co with its other obligations under the State Project Documents and does not ensure that Project Co will fulfil all of the requirements of the State Project Documents. | 89368 |
| 1.2.3 | Updating and Revision of Management Plans | 89369 |
| 1.2.3.1 | Each Management Plan must be reviewed and updated: | 89370 |
| | (a) throughout the period identified in Column 3 of the table contained in Annexure 1; | 89371 |
| | (b) at a frequency no less than the frequency specified for each Management Plan in Column 4 of the table contained in Annexure 1; and | 89372 |
| | (c) as otherwise required by this section 1.2 or the Agreement. | 89373 |
| 1.2.4 | Audit Procedures and Intervals | 89374 |
| 1.2.4.1 | Project Co must: | 89375 |
| | (a) audit its and its Subcontractors' compliance with each Management Plan in accordance with the requirements of AS/NZS ISO 19011: 2014 at intervals appropriate to the nature of the D&C Activities being performed; | 89376 |
| | (b) provide the State and the Independent Reviewer with at least 5 Business Days' prior notice of an audit under this section 1.2.4, as well as audits under sections 3.5, 4.7 and 6.2; and | 89377 |

| | | |
|------------|---|-------|
| | (c) deliver copies of each audit report together with proposed and/or implemented actions for addressing any non-conformances identified in the report to the State and the Independent Reviewer within 5 Business Days of completion of the audit. | 89378 |
| 1.2.4.2 | The Construction Environmental Management Plan and the Health and Safety Management Plan are subject to additional auditing requirements under sections 3.5 and 6.2 respectively. | 89379 |
| 1.3 | Records | 89380 |
| 1.3.1 | Construction Packages | 89381 |
| 1.3.1.1 | Project Co must subdivide the Works into Construction Packages that will be used as a basis for: | 89382 |
| | (a) the D&C Program; | 89383 |
| | (b) packaging of Construction Documentation and construction records; and | 89384 |
| | (c) progressive closure of As-Built Records. | 89385 |
| 1.3.1.2 | As a minimum, there must be separate Construction Packages for each construction zone including for the: | 89386 |
| | (a) Preparatory Works; | 89387 |
| | (b) Returned Works; | 89388 |
| | (c) manufactured precast components or fabricated components; | 89389 |
| | (d) Temporary Works; and | 89390 |
| | (e) significant items of plant or equipment. | 89391 |
| 1.3.1.3 | A Construction Package must not be related to more than one submission of Interim or Certified Design Documentation. | 89392 |
| 1.3.2 | Access to records | 89393 |
| 1.3.2.1 | During the D&C Phase, the State and the Independent Reviewer must be provided with electronic access to the design and construction records indexed by Construction Package including: | 89394 |
| | (a) Construction Records as set out in section 1.3.4; | 89395 |
| | (b) Design Documentation as set out in section 7.5; | 89396 |
| | (c) Construction Documentation as set out in section 10.4; | 89397 |
| | (d) testing and commissioning records as set out in section 11.1.5; | 89398 |
| | (e) Monthly D&C Phase Progress Reports required by section 1.4; | 89399 |
| | (f) the Defects List required by section 1.3.9; and | 89400 |
| | (g) closed As-Built Records as set out in 1.3.5. | 89401 |
| 1.3.2.2 | Electronic access to records must: | 89402 |
| | (a) be made available during the D&C Phase; | 89403 |
| | (b) be accessible by web based interface; and | 89404 |
| | (c) enable searching and selection of records. | 89405 |
| 1.3.2.3 | Project Co must, in accordance with the Digital Engineering Management Plan, submit on a weekly basis during the design development, and on a fortnightly basis thereafter: | 89406 |
| | (a) published native data files (issued via a network interface); | 89407 |
| | (b) published federated models; | 89408 |
| | (c) published visualisations, presentation models, 3D imagery, animated models and fly-through models; | 89409 |
| | (d) GIS data updates accompanied by a change register; | 89410 |
| | (e) Asset registers. | 89411 |
| 1.3.3 | Submission of Records | 89412 |
| 1.3.3.1 | Construction Records must be provided to the State as a complete electronic record as a condition precedent to each of Provisional Acceptance and Final Acceptance. | 89413 |
| 1.3.3.2 | A complete electronic copy of the As-Built Records for each Construction | 89414 |

| | | |
|---------|---|-------|
| | Package (including the final revised electronic versions of IFC Design Documentation) must be supplied to the State and Independent Reviewer prior, and as a condition precedent, to Final Acceptance. | |
| 1.3.3.3 | A complete electronic copy of the As-Built Records for each Returned Works Construction Package (including the final revised electronic versions of the IFC Design Documentation) must be supplied to the State and the Independent Reviewer no later than 60 days after the date of completion of the Returned Works and as a condition precedent to Handback of Returned Works. As-Built Records for Returned Works must also include the relevant inspection and maintenance records for the Returned Works during construction. | 89415 |
| 1.3.3.4 | Complete electronic copy includes all the final CAD drawings for the Works in the format identified in section 1.3.11 and the final GIS data in the format identified in section 1.3.12. | 89416 |
| 1.3.4 | Construction Records | 89417 |
| 1.3.4.1 | General | 89418 |
| | Accurate and complete Construction Records must be maintained at all times during the D&C Phase for every Asset, Asset Component and Asset Sub-Component identified in the Asset Inventory in a form that is readily accessible to the State and the Independent Reviewer. | 89419 |
| 1.3.4.2 | Construction Records system | 89420 |
| | The system used to maintain Construction Records must: | 89421 |
| | (a) ensure that all Construction Records are compiled in Work Lots and that each Work Lot is clearly referenced to the relevant Asset, Asset Component or Asset Sub-Component; and | 89422 |
| | (b) ensure that each certificate issued by the Quality Manager clearly identifies the relevant Asset, Asset Components and Asset Sub-Components to which it relates and their constituent Work Lots. | 89423 |
| 1.3.4.3 | Contents of Construction Records | 89424 |
| | (a) Construction Records for each Construction Package must include: | 89425 |
| | (1) all quality assurance records required by the Inspection and Test Plans (ITPs); | 89426 |
| | (2) site instructions and any Design Change Notices (DCNs); | 89427 |
| | (3) non-conformance reports; and | 89428 |
| | (4) current versions of the IFC Design Documentation with as-built changes (including repaired Defects) marked up to scale and referenced to the applicable DCN. | 89429 |
| | (b) If a drawing is amended and issued as a new revision before completion of the Construction Package, any changes recorded as mark-ups prior to that amendment must be incorporated in the new revision and the traceability to the relevant DCN must be preserved. | 89430 |
| 1.3.5 | As-Built Records | 89431 |
| 1.3.5.1 | General | 89432 |
| | (a) As-Built Records must include the final versions of the Construction Records together with associated feature survey/ laser scans/ point cloud data. | 89433 |
| 1.3.5.2 | Closure of As-Built Records | 89434 |
| | (a) The As-Built Records for a Construction Package or part of a Construction Package must be completed and closed as soon as practicable, in accordance with the Quality Management Plan, so as to ensure that after Provisional Acceptance, the As-Built Records represent the Works as completed. | 89435 |
| | (b) Closure of As-Built Records cannot occur until: | 89436 |
| | (1) all inspections and tests required for the Work Lots represented by As-Built Records have been completed and the results recorded; | 89437 |
| | (2) any non-conformances and Defects of a non-material nature that | 89438 |

| | | |
|---------|---|-------|
| | cannot be corrected promptly have been notified and recorded on the Defects List in accordance with section 1.3.9 and the non-conformance report marked accordingly; | |
| | (3) the final marked-up copy of every drawing relevant to the Construction Package or the part of the Construction Package, including drawings without change, have been checked for completeness and signed by a person with responsibility for supervision of the work; | 89439 |
| | (4) the complete set of As-Built Records for the Construction Package or the part of the Construction Package has been made available to the State and the Independent Reviewer; and | 89440 |
| | (5) the Independent Reviewer has certified (in the form required by the Schedule of Certificates and Notices) compliance with the requirements of this section 1.3.5. | 89441 |
| | (c) As-Built Records must be closed before: | 89442 |
| | (1) the Works represented by the As-Built Records are covered up or subsequent Works are undertaken which would, in the opinion of the Independent Reviewer, prevent inspection or repairs; | 89443 |
| | (2) manufactured components, including precast and fabricated components, are erected or incorporated into the Works; and | 89444 |
| | (3) in the case of Returned Works, any notice required by the Agreement has been issued for the Returned Works represented by the As-Built Records. | 89445 |
| | (d) The requirements in section 1.3.5.2(c) will not apply where it is either not practicable to undertake testing required for closure of As-Built Records before Works are covered up (e.g. flushing of subsoil drains) or in particular situations where test results are available. Where these circumstances apply, any additional inspection or testing arrangements required by the Independent Reviewer must be included in the applicable ITP, and the As-Built Records must be closed as soon as practicable after the test results are available. | 89446 |
| 1.3.5.3 | Revisions of As-Built Records | 89447 |
| | The electronic CAD files and associated models for the As-Built Records must be revised after the relevant Construction Packages have been closed to incorporate all changes to enable production of the final electronic CAD files and associated models for the As-Built Records. | 89448 |
| 1.3.6 | PASS Assets and DMS Requirements | 89449 |
| 1.3.6.1 | Prior to Final Acceptance, Project Co must book all relevant As-Built Records into the PTV Drawings Management System (PTV DMS) in accordance with the PTV Infrastructure Drafting Standard. Project Co must obtain any necessary certification and authorisation from the RTO. Where applicable, superseded drawings being booked back in to the PTV DMS must be appropriately marked and booked in as 'superseded'. | 89450 |
| 1.3.6.2 | Prior to Final Acceptance, Project Co must update the State GIS application PASS Assets in respect of the Works. PASS Asset requirements are further detailed in the PTV PASS Assets Data Requirements. | 89451 |
| 1.3.6.3 | Project Co must provide all information and assistance that the Train Franchisee requires to update its asset management system (currently Ellipse) together with PASS Assets. | 89452 |
| 1.3.7 | Asset Inventory | 89453 |
| 1.3.7.1 | The Asset Inventory compiled in accordance with this section must be used as the basis for: | 89454 |
| | (a) the Work Breakdown Structure throughout the D&C Phase; and | 89455 |
| | (b) the Asset Management System during the Maintenance Phase. | 89456 |
| 1.3.7.2 | The Asset Inventory must be structured in layers comprising Assets, classified by type, Asset Components and Asset Sub-Components where: | 89457 |

| | | |
|----------|--|-------|
| | (a) Asset Components and Asset Sub-Components are the constituent parts of an Asset which need to be separately identified in the design; and | 89458 |
| | (b) Asset Component types are identifiable elements of an Asset type which have differing characteristics and inventory data requirements. | 89459 |
| 1.3.8 | Asset Management | 89460 |
| | Project Co must maintain, or must ensure the D&C Subcontractor maintains, accreditation to ISO 55001 (or equivalent should ISO 55001 be replaced) for the duration of the D&C Activities. | 89461 |
| 1.3.9 | Defects List | 89462 |
| 1.3.9.1 | Project Co must establish and maintain an electronic defect management system, including a Defects List, for monitoring the rectification of any Defects or other non-conformances. | 89463 |
| 1.3.9.2 | The defect management system must be: | 89464 |
| | (a) integrated with the overall Asset Management System; | 89465 |
| | (b) capable of exporting all required data to the Train Franchisee's systems in respect of Returned Train Works; and | 89466 |
| | (c) integrated with the Failure Reporting, Analysis and Corrective Action System (FRACAS). | 89467 |
| 1.3.9.3 | Where Defects or other non-conformances are notified by the State or the Independent Reviewer, the Defects List must record the party that notified the Defect or other non-conformance and a reference to the notification. | 89468 |
| 1.3.9.4 | The Defects List must identify any Defects proposed to be accepted by the State in accordance with the Agreement and must include references to any correspondence between the State and Project Co in respect of such Defects. | 89469 |
| 1.3.9.5 | Records of Defects or other non-conformances must not be deleted from the Defects List. | 89470 |
| 1.3.9.6 | The Defects List must be maintained during the Term. | 89471 |
| 1.3.9.7 | Every Defect and other non-conformance must be identified against the relevant asset component or sub-component and the location and nature of each Defect or other non-conformance must be described in sufficient detail to enable subsequent inspection, repair and monitoring. | 89472 |
| 1.3.9.8 | Non-conformances which are notified by the State or the Independent Reviewer must be closed out to the satisfaction of the State or the Independent Reviewer as applicable. | 89473 |
| 1.3.10 | Format of manuals, plans, drawings and reports | 89474 |
| | Any manuals, plans, drawings, programs, reports or associated information, or any updates or revisions of such manuals, plans, drawings, programs, reports or associated information required to be submitted must be submitted as a hard copy and as an electronic copy in the form agreed between Project Co and the State (or failing such agreement, in such form as the State or the Independent Reviewer may require). | 89475 |
| 1.3.11 | Format of CAD Data and drawings | 89476 |
| 1.3.11.1 | The format of published CAD data and drawings issued to the State and Independent Reviewer during the design delivery phase must be in accordance with the Digital Engineering Management Plan. | 89477 |
| 1.3.11.2 | The format of the CAD drawings and model files issued to the State and Independent Reviewer as As-Built Records must be in accordance with the PTV Infrastructure Drafting Standards v1.0. | 89478 |
| 1.3.11.3 | The CAD drawings must include: | 89479 |
| | (a) all issued drawings; | 89480 |
| | (b) all 2D and 3D model files; and | 89481 |
| | (c) all reference or x-ref files. | 89482 |
| 1.3.12 | Format of GIS Data | 89483 |
| | The format of the GIS data issued to the State and the Independent Reviewer must be as follows: | 89484 |

| | | |
|------------|--|-------|
| 1.3.12.1 | Vector: geodatabase format (.gdb): | 89485 |
| | (a) Raster: grid (elevation data) or ECW (aerial photography); | 89486 |
| | (b) Symbology: layer files (.lyr) defining layer symbology for each GIS layer; | 89487 |
| | (c) Metadata: in accordance with the GIS Management Plan; and | 89488 |
| | (d) Catalogue: An index of available GIS layers, grouped by major themes; and | 89489 |
| 1.3.12.2 | Horizontal and vertical coordinate systems must be in accordance with the requirements set out in Part B, section 1.1 of this PS&TR. | 89490 |
| 1.3.13 | Format of Federated Data | 89491 |
| | The format of federated data issued to the State and Independent Reviewer during the design delivery phase and as As-Built Records must be in accordance with the Digital Engineering Management Plan. | 89492 |
| | | 89493 |
| 1.4 | Reporting | |
| 1.4.1 | Project Co must prepare Monthly D&C Phase Progress Reports in accordance with the Agreement and the requirements of section 1.4.2. | 89494 |
| 1.4.2 | The Monthly D&C Phase Progress Report must include the following: | 89495 |
| 1.4.2.1 | a management overview which addresses overall progress and key D&C Phase issues; | 89496 |
| 1.4.2.2 | photographs and video records of the progress of the D&C Activities; | 89497 |
| 1.4.2.3 | a report on the D&C Activities which addresses: | 89498 |
| | (a) non-conformances identified in any audit including evidence of the close out of any non-conformances; | 89499 |
| | (b) for each part of the Works, progress towards: | 89500 |
| | (1) completion of Design Documentation; | 89501 |
| | (2) completion of Certified Design Documentation; | 89502 |
| | (3) Acceptance; and | 89503 |
| | (4) closure of As-Built Records; | 89504 |
| | (c) the D&C Program and progress relative to the D&C Program, including Progress Milestones, Interface Milestones and other key milestones; | 89505 |
| | (d) key risks to the conduct of the Work being those that have broader Metro Tunnel wide implications, including interface risks and risks to the reputation of the State; | 89506 |
| | (e) contractual and financial issues (including any Claims lodged under clause 63.3 of the Agreement); | 89507 |
| | (f) progress claims paid under the D&C Subcontract; | 89508 |
| | (g) commissioning and completion progress of the Works including procurement and performance; | 89509 |
| | (h) key occupational health and safety, environment, quality, project organisation structure and staffing, industrial relations, contractor and subcontractor issues, and Project Co's response to these issues; | 89510 |
| | (i) stakeholder issues covering property and authorities/utilities; | 89511 |
| | (j) traffic management issues; | 89512 |
| | (k) rail access issues; | 89513 |
| | (l) incidents notified to the State or the Independent Reviewer and outcomes of investigations or responsive actions; | 89514 |
| | (m) identification and progress on rectification work; | 89515 |
| | (n) trends regarding entries to the Site by Union Officials; | 89516 |
| | (o) updates on the status of any actual, potential or threatened Industrial Action; and | 89517 |
| | (p) planning and implementation of Final Acceptance Works prior to Provisional Acceptance and of the Services prior to Final Acceptance; | 89518 |
| 1.4.2.4 | a Program Summary Report (refer to section 2.2.2); | 89519 |
| 1.4.2.5 | an Interface Issues Register (refer to section 2.4.5); | 89520 |

| | | |
|----------|--|-------|
| 1.4.2.6 | a Workforce Development and Training Report (refer to section 2.5.2); | 89521 |
| 1.4.2.7 | a Social Procurement Report (refer to section 2.6.2); | 89522 |
| 1.4.2.8 | an Environmental Report (refer to section 3.3.1); | 89523 |
| 1.4.2.9 | a Sustainability Report (refer to section 4.5.2); | 89524 |
| 1.4.2.10 | a Communications and Stakeholder Engagement Report (refer to section 5.9.1); | 89525 |
| 1.4.2.11 | a Health and Safety Performance Report (refer to section 6.1.5); and | 89526 |
| 1.4.2.12 | other reasonable requirements of the State or the Independent Reviewer. | 89527 |

| | | |
|------------|---|-------|
| 2 | Project Management Requirements | 89528 |
| 2.1 | Quality Management | 89529 |
| 2.1.1 | Project Co must: | 89530 |
| 2.1.1.1 | prepare and update the Quality Management Plan; | 89531 |
| 2.1.1.2 | ensure that quality management is addressed throughout the performance of the D&C Activities; | 89532 |
| 2.1.1.3 | ensure the Works are undertaken in accordance with a certified Quality Management System which meets requirements of all current and relevant AS/NZS ISO Standards for Quality Management Systems as and when they are published; | 89533 |
| 2.1.1.4 | appoint a suitably experienced and qualified person as the 'Quality Manager' who is responsible for: | 89534 |
| | (a) the application and operation of the Quality Management System; and | 89535 |
| | (b) ensuring that the requirements of the Quality Management Plan are implemented and maintained. | 89536 |
| 2.1.1.5 | ensure that the Quality Manager has no direct responsibility for the management and/or execution of the Works; and | 89537 |
| 2.1.1.6 | ensure that the Quality Manager provides appropriate management input into the rectification of any Defects. | 89538 |
| 2.2 | Program Management | 89538 |
| 2.2.1 | D&C Program Requirements | 89540 |
| 2.2.1.1 | Project Co must prepare the D&C Program. | 89541 |
| 2.2.1.2 | The D&C Program must, in addition to the requirements of the Agreement, include the entire scope, deliverables and all stages of the Works (both permanent and temporary) including but not limited to: | 89542 |
| | (a) key milestones; | 89543 |
| | (b) Critical Interface Milestones with the RSA and the RIA; | 89544 |
| | (c) key constraints; | 89545 |
| | (d) Management Plans, Design Documentation and Construction Documentation including due allowance for review, comment and approval timeframes required by the Agreement; | 89546 |
| | (e) planning and statutory approvals and secondary consents; | 89547 |
| | (f) external interfaces, reviews, permits and approvals; | 89548 |
| | (g) procurement of long lead time items; | 89549 |
| | (h) procurement of subcontractors; | 89550 |
| | (i) preparation and submission of Design Documentation; | 89551 |
| | (j) dates for possession of land; | 89552 |
| | (k) off-Site fabrication and assembly; | 89553 |
| | (l) site mobilisation and establishment; | 89554 |
| | (m) dates and durations for: | 89555 |
| | (1) any local tram and traffic disruption and closures, including as a result of tram works on St Kilda Road and Royal Parade; | 89556 |
| | (2) any disruptions to the existing train network, including as a result of construction impacts to Melbourne Central Station and Flinders Street Station; | 89557 |
| | (3) major road disruptions; and | 89558 |
| | (4) other access requirements such as service outages; | 89559 |
| | (n) construction and installation; | 89560 |
| | (o) testing and commissioning; | 89561 |
| | (p) systems integration; | 89562 |

| | | |
|---------|--|-------|
| | (q) operational readiness; | 89563 |
| | (r) dates for Handback of Returned Works to the relevant Returned Asset Owners; and | 89564 |
| | (s) satisfaction of all Handback and Acceptance requirements. | 89565 |
| 2.2.1.3 | Work Breakdown Structure (WBS) and coding | 89566 |
| | Project Co must: | 94229 |
| | (a) group the full scope of the D&C Program as activities and milestones in accordance with the WBS provided in Appendix C3; and | 94230 |
| | (b) develop the WBS provided in Appendix C3 to the necessary lower levels to include all discrete D&C Activities. | 94231 |
| 2.2.1.4 | Relationships and logic | 89567 |
| | Project Co must ensure that: | 89568 |
| | (a) except for the designated date of Contract Close and Date for Final Acceptance, all activities and milestones have a predecessor and successor; | 89569 |
| | (b) logic drives D&C Program dates; | 89570 |
| | (c) the D&C Program minimises the use of positive lags, and excludes the use of negative lags, between activities; | 89571 |
| | (d) Finish to Start relationships are used for the majority of the relationships between task dependent activities; | 89572 |
| | (e) Start to Finish relationships are not used; and | 89573 |
| | (f) retained logic is used (not progress override). | 89574 |
| 2.2.1.5 | Critical path(s) | 89575 |
| | Project Co must ensure that: | 89576 |
| | (a) clear, identifiable, continuous and realistic critical path(s) exist between the current Data Date and completion date(s); | 89577 |
| | (b) there is no negative float in the initial D&C Program; and | 89578 |
| | (c) any subsequent D&C Program revisions or updates that contain negative float must be followed by a migration plan, to be submitted within 10 Business Days, to remove the negative float. | 89579 |
| 2.2.1.6 | Activities and durations | 89580 |
| | Project Co must ensure that: | 89581 |
| | (a) the D&C Program contains an adequate number of activities to accurately plan and model the scope of Works without introducing too much detail that would make it difficult to use as an effective tool during delivery of the Works; | 89582 |
| | (b) activity descriptions are brief but clearly convey the nature and the scope. Any abbreviation used must be explained; | 89583 |
| | (c) activities generally do not exceed 20 Business Days in duration, and activities with duration of less than 5 Business Days must be kept to a minimum. This must not be applied to procurement of long lead time items; | 89584 |
| | (d) percentage complete types are 'physical % complete' and recorded for each in progress activity as well as remaining duration; and | 89585 |
| | (e) the D&C Program does not contain: | 89586 |
| | (1) actual dates ahead of the Data Date; | 94232 |
| | (2) out of sequence activities; | 94233 |
| | (3) activities with unsatisfied constraints; and | 94234 |
| | (4) activities with unsatisfied relationships. | 94235 |
| 2.2.1.7 | Calendars | 89587 |
| | Project Co must ensure that: | 89588 |
| | (a) calendars identify holidays, rostered days off, Christmas shutdown and any other shutdowns; | 89589 |
| | (b) calendars are kept to a minimum; and | 89590 |

| | | |
|---------|--|-------|
| | (c) working hours between different calendars are kept to a minimum and where possible kept consistent between each calendar. | 89591 |
| 2.2.1.8 | Contingency | 89592 |
| | Project Co must ensure that: | 89593 |
| | (a) the contingent time allowance is included in the D&C Program for inherent risks and for any potential unplanned events that might cause delays; and | 89594 |
| | (b) a report on the allocation and usage of contingency and forecast of the remaining contingency is provided in each reporting period. The format and contents of the report must be agreed to by the State. | 89595 |
| 2.2.1.9 | Resources | 89596 |
| | Project Co must identify any activities which involve the State, the Independent Reviewer or external Stakeholders for the purpose of assessing resource demand to support the D&C Program. | 89597 |
| 2.2.2 | Program Summary Report | 89598 |
| | Project Co must: | 89599 |
| 2.2.2.1 | prepare and submit to the State and Independent Reviewer with each update to the D&C Program a Program Summary Report that lists the planning assumptions that underpin the D&C Program; | 89600 |
| 2.2.2.2 | ensure that the Program Summary Report functions as a narrative and communication tool to translate the underlying planning principles and development assumptions incorporated into the Bid D&C Program and any revised or updated D&C Program; and | 89601 |
| 2.2.2.3 | ensure that the Program Summary Report includes: | 89602 |
| | (a) an executive summary; | 89603 |
| | (b) key milestones and dates including the following columns: | 89604 |
| | (1) baseline finish date; | 89605 |
| | (2) last month's forecast finish date; | 89606 |
| | (3) this month's forecast finish date; | 89607 |
| | (4) variance to baseline; | 89608 |
| | (5) variance to last month; | 89609 |
| | (6) reason for variance; and | 89610 |
| | (7) risk in meeting baseline finish date; | 89611 |
| | (c) a summary of D&C Program changes for each month including proposed and/or adopted measures to mitigate any actual and/or forecast delays and slippage; | 89612 |
| | (d) a summary of D&C Program issues, risks and opportunities for each month; | 89613 |
| | (e) progress against Critical Interface Milestones (or any issues in relation to these); | 89614 |
| | (f) activities completed this month; | 89615 |
| | (g) activities forecast to finish next month; | 89616 |
| | (h) planned % complete consistent with the Bid D&C Program and actual % complete based on objective measures; | 89617 |
| | (i) resource histograms for both key work crews and total crews; | 89618 |
| | (j) justification for any constraints used; | 89619 |
| | (k) summary and commentary of critical path activities and milestones; | 89620 |
| | (l) summary of any contingency used and forecast remaining contingency; and | 89621 |
| | (m) D&C Program assumptions and notes that underpin the D&C Program including: | 89622 |
| | (1) long lead time items; | 89623 |
| | (2) approvals and permits; | 89624 |
| | (3) calendars, working hours and shifts; | 89625 |

| | | |
|------------|--|-------|
| | (4) production rates, crew sizes, cycle times and measured quantities used for all major Work elements; and | 89626 |
| | (5) staging, sequencing and delivery strategy. | 89627 |
| 2.2.3 | D&C Program submissions and updates | 89628 |
| 2.2.3.1 | Project Co must: | 89629 |
| | (a) submit to the State and the Independent Reviewer for review updates of the D&C Program in accordance with the Agreement; | 89630 |
| | (b) with each update of the D&C Program, provide the following: | 89631 |
| | (1) electronic format of the D&C Program in Oracle Primavera P6 Project Management software in native (*.XER) format that permits 100% data and format transfer with Oracle Primavera P6 Release 7.0 including the layout and filter (*.PLF) file, and allows interrogation by the State and the Independent Reviewer; | 89632 |
| | (2) PDF submissions of the following: | 89633 |
| | (i) summary D&C Program (no more than two A3 pages); | 89634 |
| | (ii) full D&C Program; | 89635 |
| | (iii) critical path filter applied to the full D&C Program; | 89636 |
| | (iv) time chainage diagram (if applicable); and | 89637 |
| | (v) staging diagrams (if applicable). | 89638 |
| 2.2.3.2 | PDF submissions must: | 89639 |
| | (a) be clear, neat and legible. Each sheet of the D&C Program must be numbered sequentially and contain a title block. They must be in A3 format and be in colour; | 89640 |
| | (b) show the following columns in the column view: | 89641 |
| | (1) activity ID; | 89642 |
| | (2) activity name; | 89643 |
| | (3) remaining duration; | 89644 |
| | (4) start; | 89645 |
| | (5) finish; | 89646 |
| | (6) approved baseline finish; | 89647 |
| | (7) variance to approved baseline finish; | 89648 |
| | (8) physical % complete; and | 89649 |
| | (9) total float; and | 89650 |
| | (c) show the following in the Gantt chart view: | 89651 |
| | (1) actual duration bars; | 89652 |
| | (2) remaining duration bars; | 89653 |
| | (3) baseline duration bars; and | 89654 |
| | (4) critical bars (in red). | 89655 |
| | | 89656 |
| 2.3 | Risk Management | |
| 2.3.1 | Project Co must: | 89657 |
| 2.3.1.1 | prepare and update the Risk Management Plan; | 89658 |
| 2.3.1.2 | ensure risk management is addressed throughout the performance of the D&C Activities; | 89659 |
| 2.3.1.3 | ensure that the D&C Activities are performed in accordance with: | 89660 |
| | (a) AS/NZS ISO 31000: 2009 - Risk Management and ISO/IEC 31010: 2009; | 89661 |
| | (b) AS4292 – Rail Safety Management; and | 89662 |
| | (c) the Risk Management Plan; | 89663 |
| 2.3.1.4 | implement risk management techniques to determine risks which could affect the Project and develop and implement risk management strategies to manage these risks. These risk management strategies must be documented in the Risk | 89664 |

| | | |
|------------|--|-------|
| | Management Plan; | |
| 2.3.1.5 | ensure that all risks arising from or associated with the implementation of the Works are identified and mitigated, and safety risks reduced so far as is reasonably practicable (SFAIRP); and | 89665 |
| 2.3.1.6 | ensure that no residual risks exceed the safety tolerability limits. | 89666 |
| 2.3.2 | Risk Register | 89667 |
| 2.3.2.1 | Project Co must develop and maintain a risk register that includes all hazards and risks associated with the Project Activities. The risk register must be referred to from the Risk Management Plan and must include: | 89668 |
| | (a) a description of all hazards and risks and their likely impact; | 89669 |
| | (b) the risk rating assessed for each hazard and risk; | 89670 |
| | (c) specific control measures to be implemented to eliminate or reduce the risk rating; | 89671 |
| | (d) the residual risk rating following mitigations; | 89672 |
| | (e) the personnel responsible for monitoring implementation of the control measures; | 89673 |
| | (f) consultative processes employed by Project Co in relation to the risk and the personnel involved in the consultative process; and | 89674 |
| | (g) demonstration that risks to safety have been eliminated, so far as is reasonably practicable, and where elimination of risks to safety is not reasonably practical, those risks to safety have been minimised so far as is reasonably practicable. | 89675 |
| 2.3.2.2 | Project Co must also develop, maintain and submit for review a Design Risk Register in accordance with section 7.4. | 89676 |
| | | 89677 |
| 2.4 | Interface Management | |
| 2.4.1 | General | 89678 |
| 2.4.1.1 | Project Co must: | 89679 |
| | (a) prepare and update the PPP Interface Management Plan; | 89680 |
| | (b) appoint (a) suitably experienced and qualified person(s) as the 'Interface Manager(s)', following consultation with the State and without limiting any obligation of Project Co, who is responsible for: | 89681 |
| | (1) compliance with this section; | 89682 |
| | (2) the implementation of the PPP Interface Management Plan; | 89683 |
| | (3) ongoing coordination with all interfacing parties; | 89684 |
| | (4) maintaining an Interface Issues Register; and | 89685 |
| | (5) monitoring the status of Critical Interface Milestones; and | 89686 |
| | (c) develop and implement processes for identifying and managing all interfaces associated with the Project Activities, including any design, construction, testing, commissioning and program interfaces that exist between Project Co and any other party, | 89687 |
| | in each case in a manner consistent with the Framework Coordination and Interface Principles. | 89688 |
| 2.4.2 | Interfacing parties | 89689 |
| | Project Co must identify all interfacing parties in relation to the Works. Interfacing parties include: | 89690 |
| 2.4.2.1 | Metro Tunnel Package Contractors, meaning each of: | 89691 |
| | (a) the RSA; and | 89692 |
| | (b) the RIA; | 89693 |
| 2.4.2.2 | the Train Franchisee Interface Party; | 89694 |
| 2.4.2.3 | the Tram Franchisee Interface Party; | 89695 |
| 2.4.2.4 | VicRoads; | 89696 |
| 2.4.2.5 | Public Transport Victoria; | 89697 |

| | | |
|----------|--|-------|
| 2.4.2.6 | the Ticketing Works Contractor; | 89698 |
| 2.4.2.7 | the CityLink Manager; | 89699 |
| 2.4.2.8 | any parties undertaking Related State Project Works, which include: | 89700 |
| | (a) the Level Crossing Removal Project; | 89701 |
| | (b) the High Capacity Metro Trains Project; | 89702 |
| | (c) Western Distributor; and | 89703 |
| | (d) Flinders Street Station Redevelopment; | 89704 |
| 2.4.2.9 | any parties undertaking Oversight Development Works, including: | 89705 |
| | (a) the CBD North OSD Developer; and | 89706 |
| | (b) the CBD South OSD Developer; | 89707 |
| 2.4.2.10 | Utility Providers; | 89708 |
| 2.4.2.11 | the Victorian Planning Authority (in relation to the development of the Arden Urban Renewal Precinct); | 89709 |
| 2.4.2.12 | any other parties undertaking any work, services, activities and functions: | 89710 |
| | (a) in connection with the Project Assets or the Metro Tunnel; | 89711 |
| | (b) otherwise in connection with the Project Activities; or | 89712 |
| | (c) adjacent to or in the vicinity of the Works, the Project Assets or the Metro Tunnel, the Site or the Victorian Rail Network, including those described as Appendix C2.3, | 89713 |
| | simultaneously with Project Co's performance of the Project Activities. | 89714 |
| 2.4.3 | Interface documentation | 89715 |
| | Project Co must, jointly with other parties to the JCC, develop, update and implement: | 89716 |
| 2.4.3.1 | relevant Management Plans – including details of how the parties will work together to identify and manage direct package-to-package interfaces in accordance with the Framework Co-ordination and Interface Principles; | 89717 |
| 2.4.3.2 | Interface Definition Sheets (IDSs) – which will identify and manage package to package deliverables and support coordination between the respective packages; | 89718 |
| 2.4.3.3 | Critical Interface Definition Sheets (CIDS) – which are IDSs that contain Critical Interface Milestones (not all IDSs will contain Critical Interface Milestones); | 89719 |
| 2.4.3.4 | Interface Control Documents (ICDs) – which document the package to package interface and integration requirements and deliverables through all lifecycle stages at a more detailed and technical level; and | 89720 |
| 2.4.3.5 | Interface Programs – which set out the relevant activities, dependencies and timeframes in relation to package-to-package interfaces. | 89721 |
| 2.4.4 | Interface obligations | 89722 |
| | To the extent that any interfaces exist between the Works and any work, services, activities and functions to be undertaken by any interfacing party, including but not limited to those parties set out in section 2.4.2, Project Co must, in a manner consistent with the Framework Coordination and Interface Principles: | 89723 |
| 2.4.4.1 | co-operate with interfacing parties in good faith to assist in achieving the successful implementation and completion of the Project; | 89724 |
| 2.4.4.2 | co-ordinate with interfacing parties to resolve any issues with regard to scheduling, access, exchange of relevant design information and other such matters; | 94236 |
| 2.4.4.3 | work with other parties to eliminate or reduce SFAIRP risks to health and safety associated with technical interfaces (such as the potential for passenger entrapment between the Platform Screen Door System (PSDS) and HCMT); | 89725 |
| 2.4.4.4 | perform all obligations in a diligent and prompt manner; | 89726 |
| 2.4.4.5 | plan, program and carry out the Works in a manner so as to minimise any interference with other interfacing parties; | 89727 |
| 2.4.4.6 | if there is a delay in the performance of another Metro Tunnel Package Contractor's works, use reasonable endeavours to overcome any resulting | 89728 |

| | | |
|------------|--|-------|
| | delay, taking a whole of project perspective; | |
| 2.4.4.7 | notify interfacing parties of any proposed works that might impact them, prior to the commencement of such works; | 89729 |
| 2.4.4.8 | not unduly interfere with, obstruct, impede, damage or delay the works being carried out by an interfacing party; | 89730 |
| 2.4.4.9 | work with other parties to ensure that the Works are appropriately integrated with any interfacing systems or assets and are capable of being accepted into service by the Train Franchisee; | 89731 |
| 2.4.4.10 | monitor, manage and co-ordinate the integration of relevant Works; and | 89732 |
| 2.4.4.11 | cooperate with the State and relevant Authorities to accommodate any changed traffic flows associated with any adjacent works or a Special Event in any areas directly or indirectly affected by the Works or the Temporary Works, noting that restrictions on construction traffic may be implemented during Special Events. | 89733 |
| 2.4.5 | Interface Issues Register | 89734 |
| | Project Co must: | 89735 |
| 2.4.5.1 | develop, maintain and update an Interface Issues Register, and record interfacing issues and resolutions throughout the Works; and | 89736 |
| 2.4.5.2 | ensure that the latest version of the Interface Issues Register is provided to the State with the Monthly D&C Phase Progress Report in both (.XLSX) and PDF formats and made available via the Information Exchange System (IES). | 89737 |
| | | 89738 |
| 2.5 | Workforce Development and Training | |
| 2.5.1 | Project Co must: | 89739 |
| 2.5.1.1 | prepare and update the Workforce Development and Training Management Plan; | 89740 |
| 2.5.1.2 | meet all statutory obligations in relation to training, including in respect of health and safety and environmental matters; | 89741 |
| 2.5.1.3 | ensure that all persons undertaking the D&C Activities have been adequately trained and provide structured training programs (noting the particular requirements regarding heavy vehicle driver training set out in section 6.3.2), and are appropriately qualified and experienced, to address the requirements of the Agreement; | 89742 |
| 2.5.1.4 | ensure that all persons undertaking the D&C Activities have undergone an appropriate induction program in respect of specific risks and the required management and mitigation measures in relation to health and safety, quality, risk, information management, site and traffic management, construction techniques and Work methods, design management, environmental management, sustainability management and stakeholder and community relations, including compliance with all relevant statutory obligations, policies and procedures; | 89743 |
| 2.5.1.5 | utilise Victoria registered apprentices, Victorian registered trainees or engineering cadets for at least 10% of the Works' total estimated labour hours in accordance with the Major Projects Skills Guarantee; | 89744 |
| 2.5.1.6 | achieve the Aboriginal Employment Target of 2.5% of the Works' estimated total labour hours and demonstrate how performance against this target will be measured; | 89745 |
| 2.5.1.7 | achieve the Priority Jobseeker Requirements; | 89746 |
| 2.5.1.8 | implement initiatives which improve the participation of Priority Jobseekers and underrepresented groups in the industry; | 89747 |
| 2.5.1.9 | implement workforce development initiatives which result in: | 89748 |
| | (a) Priority Jobseekers and underrepresented groups in the industry, advancing in the workforce to more senior roles; | 89749 |
| | (b) talented young trade and professional workers being identified and developed; | 89750 |
| 2.5.1.10 | develop and implement nationally recognised accredited training and skill | 89751 |

| | | |
|----------|---|-------|
| | development programs and ensure that 20% of the workforce participate in nationally recognised accredited training; | |
| 2.5.1.11 | actively participate in evaluation processes to support continuous improvement in workforce development and training; and | 89752 |
| 2.5.1.12 | provide the State with access to all training material, training management records and induction records upon request. | 89753 |
| 2.5.2 | Reporting | 89754 |
| 2.5.2.1 | Project Co must prepare the Workforce Development and Training Report in a format and structure agreed with the State for inclusion in the Monthly D&C Phase Progress Report. | 89755 |
| 2.5.2.2 | The Workforce Development and Training Report must include as a minimum: | 89756 |
| | (a) total workforce; | 89757 |
| | (b) total workforce Full Time Equivalent; | 89758 |
| | (c) total project hours; | 89759 |
| | (d) the Major Projects Skills Guarantee Performance Report; | 89760 |
| | (e) the number of apprentices, trainees and engineering cadets aged over 21 years; | 89761 |
| | (f) the total number of Aboriginal people employed and/or working; | 89762 |
| | (g) the number of Priority Jobseekers employed, and their role, start date and end date; | 89763 |
| | (h) the number of Priority Jobseekers, underrepresented groups, apprentices, trainees and engineering cadets who are promoted to more senior roles; | 89764 |
| | (i) a workforce gender and diversity report including a breakdown by profession, seniority and annual income over \$110,000; | 89765 |
| | (j) the number of people working part time house (less than 30 hours per week over fewer than four days); | 89766 |
| | (k) board diversity report including breakdown by gender, Aboriginal representation, cultural background and representatives aged under 55 years; | 89767 |
| | (l) initiatives developed and implemented to achieve the Priority Jobseekers Requirements, the Major Projects Skills Guarantee, the Aboriginal Employment Target and in relation to the development of an innovative and inclusive workforce; | 89768 |
| | (m) identification of training and skills gaps in the workforce and initiatives to respond to the training and skills gaps; and | 89769 |
| | (n) details of training undertaken including: | 89770 |
| | (1) list of all individuals and positions who have participated in training; | 89771 |
| | (2) the training undertaken; | 89772 |
| | (3) the period of the training; | 89773 |
| | (4) the qualification achieved; and | 89774 |
| | (5) the trainer. | 89775 |
| 2.5.3 | Resourcing | 89776 |
| 2.5.3.1 | Project Co must ensure that a suitably qualified and experienced person is appointed as the 'Workforce and Training Manager'. | 89777 |
| 2.5.3.2 | The Workforce and Training Manager must: | 89778 |
| | (a) be employed in a full-time capacity on the Project until the Date of Provisional Acceptance; | 89779 |
| | (b) be responsible for implementing, monitoring and reporting on Project Co's performance against the Workforce Development and Training Management Plan and the Major Projects Skills Guarantee Compliance Plan; and | 89780 |
| | (c) attend monthly meetings with the State's skills and workforce development representatives. | 89781 |

| | | |
|------------|--|-------|
| 2.6 | Social Procurement | 89782 |
| 2.6.1 | Project Co must: | 89783 |
| 2.6.1.1 | prepare and update the Social Procurement Management Plan; and | 89784 |
| 2.6.1.2 | achieve positive social outcomes through the implementation of procurement initiatives. | 89785 |
| 2.6.2 | Reporting | 89786 |
| 2.6.2.1 | Project Co must prepare the Social Procurement Report in a format and structure agreed with the State for inclusion in the Monthly D&C Phase Progress Report. | 89787 |
| 2.6.2.2 | The Social Procurement Report must include as a minimum: | 89788 |
| | (a) the number of small and medium enterprises. Aboriginal businesses and social enterprises engaged by Project Co and its Key Subcontractors and the overall the capital spend for each of these; | 89789 |
| | (b) a description of any procurement initiatives implemented to achieve positive social outcomes; | 89790 |
| | (c) a description of initiatives and activities undertaken to develop social procurement opportunities in Victoria; and | 89791 |
| | (d) metrics of positive social outcomes achieved through implementation of social procurement initiatives. | 89792 |
| | | 89793 |
| 2.7 | Information Management | |
| 2.7.1 | General | 89794 |
| 2.7.1.1 | Project Co must comply with all applicable requirements of all Authorities in respect of the preparation, updating, revision, transmittal, storage, and retention of Project Co Material. | 89795 |
| 2.7.1.2 | Project Co must prepare and update the Information Management Plan. | 89796 |
| 2.7.2 | Information Exchange System (IES) | 89797 |
| 2.7.2.1 | Project Co must upload to the IES: | 89798 |
| | (a) all contractual correspondence sent by Project Co to the State and the Independent Reviewer which includes the State as a “To” or a “cc”; | 89799 |
| | (b) all documents that have been submitted to the State for review or approval in accordance with the Agreement; or | 89800 |
| | (c) all documents otherwise submitted to the State in accordance with the Agreement or the Project Requirements including: | 89801 |
| | (1) Design Documentation; | 89802 |
| | (2) IFC Design Documentation; | 89803 |
| | (3) As-Built Records; | 89804 |
| | (4) Management Plans; | 89805 |
| | (5) minutes, agendas and associated reports for any meetings involving the State; | 89806 |
| | (6) Monthly D&C Phase Progress Reports; | 89807 |
| | (7) progress claims; and | 89808 |
| | (8) Handback Documentation as set out in section 11.2.1 | 89809 |
| 2.7.2.2 | Project Co may use the IES to upload documents in addition to those described in section 2.7.2.1. | 89810 |
| 2.7.2.3 | Project Co must use the IES for the transmission of documentation to and from other Metro Tunnel Package Contractors. | 89811 |
| 2.7.2.4 | Project Co staff will receive training in the use of the IES by representatives of the system vendor and/ or the State. | 89812 |
| 2.7.3 | Naming Convention | 89813 |
| 2.7.3.1 | Project Co must comply with the Technical Document Numbering System provided in Appendix C6. | 89814 |

| | | |
|------------|--|--------|
| 2.8 | Digital Engineering | 89815 |
| 2.8.1 | Project Co must establish a live digital engineering environment to enable collaboration and coordination of information, data sharing and enhanced communication on the project. | 89816 |
| 2.8.2 | The live digital engineering environment is on a non-reliance basis. | 89817 |
| 2.8.3 | Project Co must: | 89818 |
| 2.8.3.1 | prepare and update the Digital Engineering Management Plan; and | 89819 |
| 2.8.3.2 | implement the live digital engineering environment. | 89820 |
| 2.8.4 | The live digital engineering environment must include as a minimum: | 89821 |
| 2.8.4.1 | GIS; | 89822 |
| 2.8.4.2 | a common data environment including an electronic data management system; | 89823 |
| 2.8.4.3 | a network interface to the common data environment supporting native data files accessible to the State and the Independent Reviewer; and | 89824 |
| 2.8.4.4 | a web-based user interface to the common data environment supporting design review files accessible to the State, the Independent Reviewer and by agreement interfacing parties. | 89825 |
| 2.8.5 | The web-based user interface to the common data environment must as a minimum provide access to: | 89826 |
| 2.8.5.1 | GIS; | 89827 |
| 2.8.5.2 | published monitoring data; | 89828 |
| 2.8.5.3 | published geotechnical data; | 89829 |
| 2.8.5.4 | published federated models; | 89830 |
| 2.8.5.5 | published photograph logs; and | 89831 |
| 2.8.5.6 | records submitted in accordance with section 1.3.3. | 89832 |
| 2.8.6 | Project Co must provide training sessions on the web-based user interface to the common data environment to the State, the Independent Reviewer and by agreement interfacing parties. | 89833 |
| 2.8.7 | Project Co must undertake a compliance audit of the implemented digital engineering strategy against future State or Federal digital engineering (BIM) related standards or guidelines and report its findings to the State and the Independent Reviewer. | 89834 |
| 2.8.8 | Project Co must engage with the State and the Train Franchisee throughout the project lifecycle to define the operational and maintenance information requirements (including but not limited to asset information, asset classes, asset attributes and component definition) required by the State to support a digital asset management system. | 150442 |
| 2.8.9 | Project Co must issue to the State federated asset information models with sufficient embedded or linked data and information to satisfy the operational and maintenance information requirements to support a digital asset management system. | 150443 |
| 2.8.10 | Project Co must adopt digital engineering technologies including but not limited to virtual reality, augmented reality, and simulation facilities to support an effective design review process. | 150445 |
| 2.9 | State Requirements | 89835 |
| | Project Co must develop a Local Industry Development Plan (LIDP) in accordance with the Victorian Industry Participation Policy (VIPP) that establishes a strategy to meet or exceed an overall minimum of 84% local content and specifies proposed percentages for each of the contestable items identified by Industry Capability Network Victoria (ICN). | 89836 |

3 Environmental Management Requirements 89837

3.1 General 89838

- 3.1.1 Project Co must carry out the Works so as to: 89839
 - 3.1.1.1 address and achieve the environmental commitments and responsibilities set out in the MMRA Environmental Policy to the extent that they relate to the Works; 89840
 - 3.1.1.2 comply with the Environmental Management Framework (**EMF**) and Environmental Performance Requirements (**EPRs**) as approved by the Minister for Planning from time to time; 89841
 - 3.1.1.3 achieve the environmental requirements as outlined in Part B of this PS&TR; and 89842
 - 3.1.1.4 as far as is reasonably practicable, implement measures to mitigate impacts to key institutional stakeholders as determined in accordance with section 5.2.1.7. 89843
- 3.1.2 Project Co must prepare and update the Environmental Management Plans (**EMPs**), including the Construction Environmental Management Plan (**CEMP**) and the Site Environmental Implementation Plans (**SEIPs**). 89844
- 3.1.3 Project Co must attend and prepare materials for all internal and external environmental management groups, or related technical or coordination working groups, as requested by the State. Environmental management groups include, but are not limited to: 89845
 - 3.1.3.1 Precinct Reference Groups, such as the Parkville Precinct Reference Group, as referenced in EPR SC11 and SC12; and
 - 3.1.3.2 Traffic and Transport Working Group as referenced in EPR T1. 89846

3.2 Environmental Management System 89846

- 3.2.1 Project Co must establish, implement and maintain a certified Environmental Management System (**EMS**) in accordance with the requirements set out in this section 3.2. 89847
- 3.2.2 The EMS must be a single-volume, overarching document for the whole of the design and construction of the Works, including Temporary Works. As a minimum, it must: 89848
 - 3.2.2.1 be developed and delivered in accordance with the EMF; 89849
 - 3.2.2.2 be developed, implemented and maintained to align with and comply with the EMF and be certified to ISO 14001:2015; 89850
 - 3.2.2.3 provide a structured approach for leadership endorsement, planning, risk management, support, performance evaluation and improvement of the EMS during project delivery; 89851
 - 3.2.2.4 ensure that objectives and targets are consistent with the objectives of the MMRA Environmental Policy and identified significant risks, and provide plans to achieve the targets; 89852
 - 3.2.2.5 include processes for considering environmental hazards, risks and opportunities in accordance with the risk management standard AS/NZS/ISO31000:2009 and must include assessment of residual risks and opportunities; 89853
 - 3.2.2.6 include details of all monitoring, incident management and reporting requirements; and 89854
 - 3.2.2.7 ensure processes are in place to continuously improve the suitability, adequacy and effectiveness of the EMS, including responding if necessary to any amendment of the EMF or EMS. 89855

3.3 Environmental monitoring and reporting 89856

- 3.3.1 Project Co must prepare the Environmental Report for inclusion in the Monthly D&C Phase Progress Report to show progress against environmental requirements in Part B, section 14 of this PS&TR for the Works and specified in the CEMP, including: 89857
 - 3.3.1.1 monthly data records detailing relevant monitoring required by the EPRs or Environmental Management Plans in graphical format; 89858
 - 3.3.1.2 if monitoring indicates that a trigger level for any measurable effect has been reached, details as to mitigation measures undertaken, their effectiveness to the time of reporting, and outline of further monitoring scheduled to confirm effectiveness; 89859

| | | |
|------------|--|-------|
| 3.3.1.3 | details of mitigation measures undertaken to rectify any impacts highlighted by monitoring; | 89860 |
| 3.3.1.4 | external and internal audit findings; | 89861 |
| 3.3.1.5 | details of any incidents; and | 89862 |
| 3.3.1.6 | details of any nonconformities. | 89863 |
| 3.3.2 | Project Co must provide reports on the progress against environmental objectives and targets and notification of significant incidents as per the EMS requirements. | 89864 |
| 3.3.3 | Project Co must monitor and report on environmental indicators to be determined in consultation with key institutional stakeholders in accordance with section 5.2.1.7. | 89865 |
| 3.3.4 | Project Co must cooperate with any reasonable requests from the State or any relevant government agency to provide records of environmental management or compliance with approvals. | 89866 |
| 3.4 | Resourcing | 89867 |
| 3.4.1 | Project Co must ensure that a suitably qualified and experienced person is appointed as the 'Environment Manager'. The Environment Manager must: | 89868 |
| 3.4.1.1 | be employed in a full-time capacity on the Project; | 89869 |
| 3.4.1.2 | report to the Project Director of the D&C Subcontractor (for the D&C Phase) and provide evidence of updates provided to the senior management team on a monthly basis; | 89870 |
| 3.4.1.3 | as a minimum, have had suitable experience on major infrastructure construction projects as an environmental professional and a minimum of eight years' relevant environmental management experience; | 89871 |
| 3.4.1.4 | be responsible for monitoring Project Co's compliance with the CEMP; and | 89872 |
| 3.4.1.5 | attend monthly meetings with the State's environment and sustainability representatives to report on progress against the EPRs, the CEMP and any other related matters as determined by the State. | 89873 |
| 3.4.2 | Project Co must ensure that a suitably qualified and experienced person is appointed as an 'Environment Coordinator'. The Environment Coordinator must: | 89874 |
| 3.4.2.1 | be employed in a full-time capacity on the Project; | 89875 |
| 3.4.2.2 | as a minimum, have had suitable experience as a professional in implementation of environmental management on construction projects for at least five years and possess the required technical skills and knowledge to perform the role; | 89876 |
| 3.4.2.3 | be able to demonstrate competence, experience and training in implementing the CEMP as outlined in Annexure 4; and | 89877 |
| 3.4.2.4 | report to the Environment Manager. | 89878 |
| 3.4.3 | Project Co must ensure that the Environment Manager and Environment Coordinator are adequately supported by additional resources to meet the requirements of this PS&TR. | 89879 |
| 3.5 | Environmental Audits | 89880 |
| 3.5.1 | Project Co must engage an Independent Environmental Auditor to: | 89881 |
| 3.5.1.1 | review and verify, prior to commencement of work, that Project Co has complied with relevant EPRs and Approval Conditions; | 89882 |
| 3.5.1.2 | carry out the following audits: | 89883 |
| | (a) 6-monthly audits of compliance with the EMF and the EMS; | 89884 |
| | (b) quarterly audits of: | 89885 |
| | (1) compliance with the EPRs; | 89886 |
| | (2) compliance with the CEMP (during the D&C Phase); and | 89887 |
| | (3) implemented SEIPs including auditing the effectiveness of SEIPs. | 89888 |
| 3.5.2 | Results of all environmental audits must be promptly provided to the State, the Independent Reviewer and any relevant government agency as required by the State. | 89889 |
| 3.5.3 | Project Co must undertake corrective and preventative actions arising as a result of environmental audits undertaken and within the timeframe specified in the audit report. | 89890 |

| | | |
|---------|---|-------|
| 4 | Sustainability Management Requirements | 89891 |
| 4.1 | General | 89892 |
| 4.1.1 | Project Co must: | 89893 |
| 4.1.1.1 | ensure that sustainability is addressed throughout the performance of the D&C Activities, including in the development of appropriate design and construction responses, consistent with the MMRA Sustainability Policy and in accordance with the requirements of the MMRA Sustainability Strategy and the MMRA Sustainability Management Plan to the extent that they relate to the D&C Activities; | 89894 |
| 4.1.1.2 | prepare and update the Sustainability Management Plan; and | 89895 |
| 4.1.1.3 | attend and prepare materials for MMRA’s sustainability coordination group, monthly meetings, and any follow up interim meetings, as outlined in the MMRA Sustainability Management Plan. | 89896 |
| 4.2 | Sustainability rating tools | 89897 |
| 4.2.1 | Project Co must register to use the following industry rating tools: | 89898 |
| 4.2.1.1 | the ISCA IS Rating Tool; and | 89899 |
| 4.2.1.2 | the GBCA GS Rating Tool. | 89900 |
| 4.2.2 | IS Rating Tool | 89901 |
| 4.2.2.1 | Project Co must: | 89902 |
| | (a) achieve a certified ‘Design’ and ‘As Built’ rating with a minimum IS Rating Tool score of 84 (“LEADING”) under the IS Rating Tool (version 1.2) for the Works; | 89903 |
| | (b) submit all evidence to ISCA for independent verification of ISCA rating scores in accordance with the IS rating process described in the IS rating scheme; | 89904 |
| | (c) make available information relating to the Works that may be required in order to achieve an ISCA IS Rating in subsequent phases or on other work packages of the Metro Tunnel Project; | 89905 |
| | (d) develop credit interpretation requests, technical clarifications, credit allocation and scope requirements related to the IS Rating Scheme for approval by ISCA; | 89906 |
| | (e) submit the IS Rating Tool Scorecard to the State prior to formal submission to ISCA as follows: | 89907 |
| | (1) the ‘Design’ IS Rating Tool Scorecard as part of the Sustainable Design Report described in section 7.18.1.4; and | 89908 |
| | (2) the ‘As-Built’ IS Rating Tool Scorecard one month prior to the Date for Provisional Acceptance in accordance with the Review Procedures; and | 89909 |
| | (f) submit any proposed changes to the ISCA Materials Lifecycle Impact Base Case and the ISCA Carbon and Energy Base Case for review in accordance with the Design Review Process or Review Procedures (as relevant) prior to submission to ISCA for re-verification; | 89910 |
| | (g) develop a design materials footprint model which demonstrates the achievement of requirements of section 15.6.2 of Part B from the base case provided in the ISCA Materials Lifecycle Impact Base Case; | 89911 |
| | (h) demonstrate that, as a minimum, the materials reduction initiatives detailed in the ISCA Materials Lifecycle Impact ‘Reference Design’ Footprint have been investigated; | 89912 |
| | (i) develop a design greenhouse gas footprint which models construction and operational forecast greenhouse gas emissions to demonstrate the reduction from the base case, excluding renewable energy, as required by section 15.5.3 of Part B in accordance with MMRA Energy and Carbon Base Case and Reductions Model; | 89913 |
| | (j) develop an as-built materials footprint model which demonstrates the achievement of the requirements of section 15.6.2 of Part B from the base case provided in the ISCA Materials Lifecycle Impact Base Case; | 89914 |
| | (k) achieve reductions in greenhouse gas emissions (Scope 1 and 2 emissions) by a minimum of 30% below Project Co’s ISCA base case, excluding traction power | 89916 |

| | | |
|------------|---|-------|
| | and the use of renewable energy, for the infrastructure lifecycle through best practice design and construction initiatives; | |
| | (l) develop an as-built greenhouse gas footprint which measures construction and models operational greenhouse gas emissions to demonstrate the reduction from the base case, excluding renewable energy, as required by section 15.5.3 of Part B in accordance with the MMRA Energy and Carbon Base Case and Reductions Model; and | 89917 |
| | (m) develop a water base case in accordance with the ISCA IS rating scheme to be used in the ISCA Water Credits. | 89918 |
| 4.2.3 | GS Rating Tool | 89919 |
| | 4.2.3.1 Project Co must: | 89920 |
| | (a) achieve a minimum GS Rating Tool score of 5 stars and target 6 stars for each Station; | 89921 |
| | (b) develop credit interpretation requests, technical clarifications and scope requirements related to the GS Rating Tool Scorecard for approval by GBCA; and | 89922 |
| | (c) submit the GS Rating Tool Scorecard prior to formal submission to GBCA as follows: | 89923 |
| | (1) the 'Design' GS Rating Scorecard as part of the Sustainable Design Report described in section 7.18.1.4; and | 89924 |
| | (2) the 'As-Built' GS Rating Scorecard one month prior to the Date for Provisional Acceptance in accordance with the Review Procedures. | 89925 |
| | | 89926 |
| 4.3 | Water | |
| 4.3.1 | Project Co must: | 89927 |
| | 4.3.1.1 model the storm water treatment performance of new and reinstated areas using industry recognised software to achieve the stormwater objectives required by local government planning provisions; | 89928 |
| | 4.3.1.2 work with the State on legacy water offsetting projects in accordance with the MMRA Sustainability Strategy; | 89929 |
| | 4.3.1.3 optimise water sensitive urban design opportunities across the project footprint and implement feasible initiatives set out in the 'WSUD Opportunities Assessment'; and | 89930 |
| | 4.3.1.4 investigate and implement feasible rainwater and stormwater harvesting systems at Stations and Portals with consideration to OSD opportunities. | 89931 |
| | | 89932 |
| 4.4 | Urban Ecology and Vegetation | |
| 4.4.1 | Project Co must: | 89933 |
| | 4.4.1.1 comply with the City of Melbourne's Tree Protection Policy across the Works; | 89934 |
| | 4.4.1.2 coordinate with and make provision for a specialist contractor engaged by the local council to place soil and plant trees at all sites; | 89935 |
| | 4.4.1.3 provide information to the community at least 7 days prior to removal advising of the timing, process and possible attendance of tree removals; and | 89936 |
| | 4.4.1.4 develop management manuals outlining maintenance, stormwater protection and (if necessary) irrigation requirements for ongoing maintenance of sites and landscaping, and provide any relevant training for the land manager. | 89937 |
| | | 89938 |
| 4.5 | Sustainability monitoring and reporting | |
| 4.5.1 | Project Co must provide data and inputs to inform annual State and Rail Franchisee public or internal reporting and to support operational ratings for the IS Rating Tool or GS Rating Tool on sustainability performance throughout the design, construction and operation phases of the project. | 89939 |
| 4.5.2 | Project Co must prepare the Sustainability Report for inclusion in the Monthly D&C Phase Progress Report, which as a minimum must include: | 89940 |
| | 4.5.2.1 progress against the sustainability requirements; | 89941 |
| | 4.5.2.2 compliance with the Sustainability Management Plan; | 89942 |

| | | |
|------------|--|-------|
| 4.5.2.3 | an update on the progress against the IS Rating Tool target score and an outline of any key issues and opportunities; | 89943 |
| 4.5.2.4 | an update on the progress against the GS Rating Tool Scorecard; | 89944 |
| 4.5.2.5 | monthly data records relating to tracking against targets in graphical format, including: | 89945 |
| | (a) where applicable, the current level of potable and non-potable water usage consumed and performance against water targets specified in the water credits in the IS Rating Tool and the GS Rating Tool; | 89946 |
| | (b) the volume and details of the sources of non-potable water harvested; | 89947 |
| | (c) the current level of greenhouse gas emissions, energy and fuel usage consumed and performance against carbon targets specified in the energy and materials credits in each of the IS Rating Tool and GS Rating Tool; and | 89948 |
| | (d) the volumes of materials used in the Works, particularly concrete and steel. | 89949 |
| 4.5.2.6 | The Sustainability Report must be prepared in a format that is consistent with the MMRA PPP Sustainability Reporting Template. | 89950 |
| | | 89951 |
| 4.6 | Resourcing | |
| 4.6.1 | Project Co must ensure that a suitably qualified and experienced person be appointed as the 'Sustainability Manager'. The Sustainability Manager must: | 89952 |
| 4.6.1.1 | be employed in a full-time capacity on the Project until the 'As-Built' IS Rating Score and the 'As-Built' GS Rating Score have been obtained; | 89953 |
| 4.6.1.2 | have demonstrated experience on construction projects as a sustainability professional and a minimum of eight years' relevant sustainability experience; | 89954 |
| 4.6.1.3 | be an ISCA Accredited Professional and Green Star Accredited Professional; | 89955 |
| 4.6.1.4 | report to the Project Director of the D&C Subcontractor and provide evidence of updates provided to the senior management team on a monthly basis; | 89956 |
| 4.6.1.5 | be responsible for implementing and monitoring Project Co's compliance with the Sustainability Management Plan prepared in accordance with Annexure 5; | 89957 |
| 4.6.1.6 | not be the same person as the Environment Manager; and | 89958 |
| 4.6.1.7 | attend monthly meetings with the State's environment and sustainability representatives to report on progress against the sustainability requirements in this PS&TR. | 89959 |
| 4.6.2 | Project Co must ensure that a suitably qualified and experienced person is appointed as 'Sustainability Coordinator'. The Sustainability Coordinator must: | 89960 |
| 4.6.2.1 | be employed in a full-time capacity on the Project until the 'As-Built' IS Rating Score and the 'As-Built' GS Rating Score have been obtained; | 89961 |
| 4.6.2.2 | have demonstrated experience on construction projects as a sustainability professional and a minimum of three years' relevant sustainability experience; | 89962 |
| 4.6.2.3 | be an ISCA Accredited Professional and Green Star Accredited Professional; and | 89963 |
| 4.6.2.4 | report to the Sustainability Manager. | 89964 |
| 4.6.3 | Project Co must ensure that the Sustainability Manager and Sustainability Coordinator are adequately supported by additional resources to meet the requirements of this PS&TR. | 89965 |
| | | 89966 |
| 4.7 | Sustainability Audits | |
| | Project Co acknowledges that the State (or an associate or a third party engaged by the State) may reasonably conduct audits against the Sustainability Management Plan in accordance with the Agreement. | 89967 |

| | | |
|------------|--|--------|
| 5 | Communications and Stakeholder Engagement Management Requirements | 89968 |
| 5.1 | General | 89969 |
| 5.1.1 | Project Co must, at all times, act in a manner consistent with safeguarding and enhancing positive community and stakeholder sentiment towards the Project. | 89970 |
| 5.1.2 | Project Co must prepare and update a Communications and Stakeholder Engagement Management Plan which: | 89971 |
| 5.1.2.1 | implements procedures to: | 89972 |
| | (a) keep the community properly informed in relation to the Project and the Works; and | 89973 |
| | (b) maintain the reputation of the State; and | 89974 |
| 5.1.2.2 | has regard to the fact that the Works are: | 89975 |
| | (a) to be conducted in areas of great importance to many people, including local residents, community groups, stakeholders and businesses; and | 89976 |
| | (b) of a high profile in the community generally, and of a particularly high profile in communities surrounding and adjacent to the Site; and | 89977 |
| 5.1.2.3 | complies with the requirements of this section 5. | 89978 |
| | | 89979 |
| 5.2 | Community and stakeholder engagement | |
| 5.2.1 | Project Co must: | 89980 |
| 5.2.1.1 | achieve a minimum of Level 2 for each of the ISCA Community Health, Wellbeing and Safety Credits and the ISCA Stakeholder Participation Credits; | 89981 |
| 5.2.1.2 | establish and maintain effective relationships with local residents, businesses and stakeholders along the project corridor, wherever Works are taking place; | 89982 |
| 5.2.1.3 | provide timely and relevant information to the community and relevant stakeholders about the Works, including milestones, design and construction impacts; | 89983 |
| 5.2.1.4 | provide adequate means for people with a disability or who speak a language other than English to request and receive information or to make a complaint; | 89984 |
| 5.2.1.5 | consider reduction of disruption to affected stakeholders and the wider community as a key element in decision-making around timing and methodology of construction works; | 89985 |
| 5.2.1.6 | consider stakeholder operational requirements, plans and events during planning for construction activities and incorporate these constraints into construction plans and timetables; | 89986 |
| 5.2.1.7 | identify and consult with key institutional stakeholders, including health, research and educational institutions, to determine: | 89987 |
| | (a) potential impacts to their operations arising from the construction and operation of the Works; and | 89988 |
| | (b) the measures necessary to acceptably mitigate these impacts. | 89989 |
| | In determining acceptable mitigation measures, Project Co must consider any information or agreements prepared by the State prior to Financial Close. A register must be maintained for each key institutional stakeholder documenting the identified impacts and mitigation measures; | 89990 |
| 5.2.1.8 | at least 20 Business Days prior to the commencement of construction activities in respect of any Returned Asset for which the University of Melbourne is the Returned Asset Owner: | 150457 |
| | (a) provide Construction Documentation to the University in respect of that part of the Works; | 150458 |
| | (b) engage with the University regarding completion of that part of the Works; and | 150459 |
| | (c) consider and, where reasonably possible, adopt the University's suggestions and/ or requirements for the purposes of completing that part of the Works; | 150460 |

| | | |
|------------|--|--------|
| 5.2.1.9 | prepare and implement a business disruption plan for non-acquired businesses in accordance with EPR B2, to engage with and provide support to businesses and property owners throughout the Works, and mitigate and manage impacts to businesses; | 89991 |
| 5.2.1.10 | submit for approval by the State any proposals and associated promotional activities or events for naming competitions for the new Stations, construction equipment (including TBMs) or other aspects of the Works, noting that these must not be undertaken without the State's prior written consent; | 89992 |
| 5.2.1.11 | establish and manage community and stakeholder advisory groups across the Works to facilitate meaningful engagement and address concerns; | 89993 |
| 5.2.1.12 | attend meetings and provide regular project updates to community or stakeholder advisory groups established by the State; and | 89994 |
| 5.2.1.13 | to the extent relevant to St. Paul's Cathedral, provide to the Melbourne Anglican Trust Corporation (MATC) for comment, a draft version of the Dust Management Plan prepared under EPR AQ1, the Heritage Management Plan prepared under EPR CH2, and the Community and Stakeholder Engagement Management Plan, at least 20 Business Days prior to submitting each draft plan to the Independent Reviewer. | 137209 |
| 5.3 | Community notification and advice | 89995 |
| 5.3.1 | Project Co must: | 89996 |
| 5.3.1.1 | prepare accurate and high quality written notices and other content for public distribution, and provide to the State all written notices and other content for public distribution at least three Business Days prior to distribution, for review and approval; | 89997 |
| 5.3.1.2 | where unplanned or emergency Works are required to be undertaken at short notice, provide to the State all written notices and other content for public distribution as soon as reasonably practicable prior to distribution; | 89998 |
| 5.3.1.3 | consult with the key institutional stakeholders identified in accordance with 5.2.1.7 to determine specific minimum notification periods and notice requirements, and provide Works notification accordingly; | 89999 |
| 5.3.1.4 | notify households and businesses likely to be materially affected by the Works, including noise, dust, changed conditions (including traffic and access) in accordance with the minimum time periods in Table 5-1. Special consideration and management plans must be established for notifications and door knocks in large apartment buildings. Written notices must include, as a minimum: | 90000 |
| | (a) a description of relevant Works; | 90001 |
| | (b) the dates, times and durations of the relevant disruptions; | 90002 |
| | (c) the expected impact of the Works on private property or access; | 90003 |
| | (d) alternative access arrangements; and | 90004 |
| | (e) Project contact details including the Metro Tunnel Telephone Information Line, social media accounts and website; | 90005 |

Table 5-1: Minimum notification period for households and businesses affected by the Works

| Timing of works | Notification period in advance of works | Type of notification |
|---|---|------------------------|
| Daytime works: 7am to 6pm weekdays and 8am to 5pm Saturday | 5 Business Days | Written |
| Out of hours and night works: all Works after 6pm weekdays, after 5pm Saturday or any time on Sundays or public holidays | 7 Business Days | Written and door knock |
| Unplanned / emergency works | As soon as reasonably practicable | Written and door knock |

- 5.3.1.5 include the Metro Tunnel Telephone Information Line on all written notices and other content for public distribution. Project Co may establish an email address for use on written and online materials for public distribution but must not establish a separate project information line; 90007
- 5.3.1.6 develop and implement specific communications plans for road closures, rail and tram disruptions, including radio, print and digital advertising, and any mandatory obligations to rail customers required under network operator franchise agreements, detailing notification timeframes in agreement with the State, and work with the State and relevant transport providers/Authorities to ensure road and public transport users are informed of any closures or disruptions in accordance with agreed timeframes; 90008
- 5.3.1.7 develop and implement specific communications plans for Utility Infrastructure relocations or disruptions, in consultation with the relevant asset owner, which must detail: 90009
- (a) notification methods (including, but not limited to, by way of radio print and digital advertising) and timeframes in agreement with the State; 90010
 - (b) how Project Co will work with the State and affected stakeholders to ensure stakeholders and the community are informed of any service disruptions prior to the commencement of the relevant Works; and 90011
 - (c) where the Works are likely to affect critical business operations, alternative arrangements to reduce impacts including provision of sufficient advance notification of the Works in agreement with those stakeholders; and 90012
- 5.3.1.8 to the extent that undertaking the Works described in Part A section 13.1.1(a) and (b) is likely to result in any disruption to services to the University of Melbourne, use reasonable endeavours to obtain the University's prior written consent in advance of undertaking such Works; 150461
- 5.3.1.9 book Works notification advertising through the appointed media agency (currently Zenith Optimedia) under the Victorian Government Master Agency Media Services (MAMS) contract and in line with the following requirements: 90013
- (a) all Project Co advertising must be functional. Functional advertising typically has a low creative content and is generally text based with limited design elements, pictures, maps or images. It seeks to impart specific information in a direct and unembellished manner and is generally for immediate or short-term appearance. Examples of activities Project Co would be expected to advertise for include road closures, public transport disruptions and major works impacting public open space; 90014
 - (b) all Project Co advertising must comply with the State's style and branding guidelines and be laid out by a suitably qualified graphic designer. Final layouts must be provided to the State for approval at least 24 hours prior to the printing/publishing deadline; 90015
 - (c) the Department of Premier and Cabinet requires MMRA to submit a 12 month advertising look-ahead plan, outlining the next financial year's proposed 90016

advertising strategy.

| | | 90017 |
| 5.4 | Community issues management | |
| 5.4.1 | Project Co must in good faith seek to enable community issues to be resolved by: | 90018 |
| 5.4.1.1 | meeting with affected householders and/or businesses; | 90019 |
| 5.4.1.2 | exchanging information; | 90020 |
| 5.4.1.3 | considering all reasonably available alternatives; and | 90021 |
| 5.4.1.4 | if necessary, considering changes to the design/construction methodology in consultation with the State and subject to complying with the requirements of the Agreement. | 90022 |
| 5.4.2 | Project Co must: | 90023 |
| 5.4.2.1 | document all meetings, interactions and agreements with affected stakeholders and maintain records of these in the Stakeholder Management Database; | 90024 |
| 5.4.2.2 | acknowledge all community and stakeholder enquiries received via email within two hours and, where possible, resolve on the same day. Where resolution cannot be achieved within this timeframe, enquiries are to be resolved within three Business Days; | 90025 |
| 5.4.2.3 | acknowledge all allocated enquiries from the Metro Tunnel Telephone Information Line within 15 minutes, and where possible, resolve within 30 minutes. Where resolution cannot be achieved within this timeframe, enquiries are to be resolved within three Business Days; | 90026 |
| 5.4.2.4 | respond to letters received from stakeholders within seven Business Days; | 90027 |
| 5.4.2.5 | provide the State's communications and engagement team details of any complaints received within two hours of receipt, including name and address of the complainant; date, time and location; method of contact (email, phone call, etc.); nature of the complaint; and action taken to address the complaint; | 90028 |
| 5.4.2.6 | inform and provide details to the State of any enquiries from Members of Parliament or councillors within two hours of receipt; | 90029 |
| 5.4.2.7 | develop a noise and vibration modelling tool to be used in advance of works to inform community mitigation measures and the extent of notification required; | 90030 |
| 5.4.2.8 | develop and implement protocols that include measures to evaluate the effectiveness of the noise and vibration mitigation, including field monitoring and community feedback, and publish these protocols; and | 90031 |
| 5.4.2.9 | develop and implement protocols in relation to how community impacts associated with construction will be managed including consistent triggers for mitigation measures such as alternative accommodation, and publish these protocols. | 90032 |
| | | 90033 |
| 5.5 | Respite, relocation and business disruption | |
| 5.5.1 | Project Co must: | 90034 |
| 5.5.1.1 | comply with the Construction Management Plan and the Noise and Vibration Management Plan including notification, respite and relocation measures in respect of Works that may disrupt residents; | 90035 |
| 5.5.1.2 | comply with the requirements of the Residential Impact Mitigation Guidelines including funding and managing logistics for alternative accommodation; and | 90036 |
| 5.5.1.3 | comply with the requirements of the Business Support Guidelines for Construction. | 90037 |
| 5.5.2 | Notwithstanding that it may otherwise have satisfied its obligations under the EPRs and the PS&TR with respect to noise levels, Project Co must provide alternative accommodation for any residents who request relocation on the basis of noise levels cause by the Works that are considered to be excessive. Project Co must make reasonable provision to fund and manage such requests, and must ensure that this process is managed efficiently so as not to unduly delay the Works. | 118650 |
| | | 90038 |
| 5.6 | Communications materials, branding and signage | |
| 5.6.1 | Project Co must: | 90039 |
| 5.6.1.1 | comply with the State's style and branding guidelines for all written and digital | 90040 |

| | | |
|------------|--|--------|
| | publications, including appropriate use of logos, branding and styles; | |
| 5.6.1.2 | supply and install construction signage and banners in accordance with section 10.8.6; | 90041 |
| 5.6.1.3 | prepare and implement a Culturally and Linguistically Diverse (CALD) Engagement Strategy, with reference to the overarching MMRA CALD Engagement Strategy, demonstrating how communities in the vicinity of the Works will be engaged and notified about construction impacts and progress of Works; | 90042 |
| 5.6.1.4 | translate communications materials into the top six languages in the local area, with the languages to be reviewed annually in line with local council data and data from the Australian Bureau of Statistics Census of Population and Housing and the Department of Social Services' Settlement Reporting Database; | 90043 |
| 5.6.1.5 | provide for reasonable access to interpreters or translated information when communicating with stakeholders from CALD backgrounds; | 90044 |
| 5.6.1.6 | provide quarterly (or as required and agreed) photography (still, timelapse and video including aerial) updates showing the progress of the Works to assist in promotion of the Works and for inclusion in social media, newsletters, eNews and other collateral as required. Project Co must use a photographer approved by the State and the State will contribute 50 per cent of the agreed costs. Timelapse locations must be agreed with the State; | 90045 |
| 5.6.1.7 | prepare accurate and high quality written information about the Works for publishing on the State's website and social media channels, and provide copies of all printed communications materials prior to distribution in a format suitable for publishing on the State's website. Project Co must not create their own online channels (such as website, social media, eNews); and | 90046 |
| 5.6.1.8 | provide the State with detailed design files for the Project to enable development of the State's 3D modelling system. Project Co must not create 3D animations or videos for public use, without agreement with the State. | 90047 |
| | | 90048 |
| 5.7 | Media and events | |
| 5.7.1 | Project Co must: | 90049 |
| 5.7.1.1 | develop and implement protocols for media management, recognising that Project Co must not provide media comment or release media materials other than in accordance with the Agreement; | 90050 |
| 5.7.1.2 | forward any media queries received by Project Co to the State's designated media contact within 15 minutes of contact; | 90051 |
| 5.7.1.3 | provide initial information for media responses to the State as soon as practicable; | 90052 |
| 5.7.1.4 | identify and train Project Co staff to act as media spokespeople where asked to do so by the State; | 90053 |
| 5.7.1.5 | allow provision for communications and engagement, design and technical staff availability to attend community or stakeholder meetings, information sessions, open days and other public events; | 90054 |
| 5.7.1.6 | plan and provide community forums or events in each project precinct (Western Portal, Arden, Parkville, CBD, Domain and Eastern Portal) in respect of the Works. The first forum must be held ahead of the Works commencing in each precinct to provide an overview of the Works. Subsequent forums must be held during the Works to provide an update on progress and key milestones; | 90055 |
| 5.7.1.7 | work in conjunction with the State to organise events to celebrate appropriate key milestones and promote the Project, including an official opening event to commemorate the commencement of Train Operations; | 90056 |
| 5.7.1.8 | allow safe access to sites (including Tunnel and Stations) for site visits by media, stakeholders and community and representatives of the State, for photography and filming (including for the filming of a project documentary) as reasonably requested and agreed with the State; | 90057 |
| 5.7.1.9 | provide group tours of the sites under construction (including the Tunnel, Stations and TBMs) as reasonably requested by the State; | 150462 |
| 5.7.1.10 | create spaces such as viewing platforms for the public to safely view the Works under construction; | 90058 |

| | | |
|------------|---|--------|
| 5.7.1.11 | plan and implement appropriate traffic and transport management measures for any major community or media events that occur during the D&C Activities; | 90059 |
| 5.7.1.12 | allow safe access to the station mockups prepared under section 7.6 for media, stakeholders, members of the community and representatives of the State, and ensure that any branding elements used comply with the Metro Tunnel branding requirements; | 118328 |
| 5.7.1.13 | work with the State on award submissions that the State applies for relating to the Works or the Project and seek approval from the State before submitting for any awards for the Works or Project; and | 90060 |
| 5.7.1.14 | inform the State of any requests to present at public speaking engagements and seek approval to present from the State at least two weeks' prior to the event. All presentations must be approved by the State at least three Business Days prior to the event. | 90061 |
| 5.8 | Resourcing | 90062 |
| 5.8.1 | Project Co must ensure that a suitably qualified and experienced person is appointed as the 'Communications and Stakeholder Engagement Manager' who: | 90063 |
| 5.8.1.1 | is employed in a full-time capacity on the Project; | 90064 |
| 5.8.1.2 | has at least five years' demonstrated experience in communications, stakeholder engagement, issues management or a related field; | 90065 |
| 5.8.1.3 | is responsible for: | 90066 |
| | (a) communications and stakeholder engagement in respect of the D&C Activities; and | 90067 |
| | (b) the implementation of the Communications and Stakeholder Engagement Management Plan; and | 90068 |
| 5.8.1.4 | is readily available and contactable during the D&C Activities and able to respond appropriately to urgent enquires and requests. | 90069 |
| 5.8.2 | Project Co must ensure that an adequate number of suitably qualified and experienced communications and stakeholder engagement professionals are appointed who: | 90070 |
| 5.8.2.1 | have a minimum of three years' experience in managing community enquiries and stakeholder management; and | 90071 |
| 5.8.2.2 | are responsible for: | 90072 |
| | (a) key stakeholder liaison; | 90073 |
| | (b) local business and social welfare liaison; | 90074 |
| | (c) community engagement for different precincts; | 90075 |
| | (d) media response support; | 90076 |
| | (e) preparing communications materials for online, print and CALD formats as required; | 90077 |
| | (f) monitor and manage phone calls received through the Metro Tunnel Telephone Information Line and enquiries received through the online contact form for the duration of the Works and in line with approved construction hours; and | 90078 |
| | (g) completion and Handback. | 90079 |
| 5.8.3 | The State will establish a Project Information Hub and Project Co must: | 90080 |
| 5.8.3.1 | provide two suitably qualified staff to support the State to resource the Project Information Hub during its opening hours (weekdays and at least on weekend day). | 90081 |
| 5.8.3.2 | provide suitable high quality material for the Project Information Hub at least every six months for the duration of the Works and updates to materials as requested. | 90082 |
| 5.9 | Reporting and information management | 90083 |
| 5.9.1 | Project Co must prepare a Communications and Stakeholder Engagement Report for inclusion in the Monthly D&C Phase Progress Report, which as a minimum must detail: | 90084 |
| 5.9.1.1 | any community and stakeholder issues related to the Works including current status of complaints; | 90085 |
| 5.9.1.2 | status of community and stakeholder engagement activities; | 90086 |
| 5.9.1.3 | milestones and potential media opportunities for the next three months; | 90087 |

| | | |
|---------|--|-------|
| 5.9.1.4 | notifications issued for Works; | 90088 |
| 5.9.1.5 | upcoming Works requiring development of specific communications plans; | 90089 |
| 5.9.1.6 | Works in the next three months requiring notification; and | 90090 |
| 5.9.1.7 | progress against ISCA credits for stakeholder participation and community health and wellbeing. | 90091 |
| 5.9.2 | Project Co must: | 90092 |
| 5.9.2.1 | update and maintain the Stakeholder Management Database to accurately report all enquiries from the public regarding the Works or Metro Tunnel, within 24 hours of receipt of enquiry including: | 90093 |
| | (a) names (where provided); | 90094 |
| | (b) contact details (where provided); | 90095 |
| | (c) time and date of enquiry; | 90096 |
| | (d) nature of enquiry; and | 90097 |
| | (e) response provided; and | 90098 |
| 5.9.2.2 | comply at all times with the Privacy Principles and any associated policies, and notify the State immediately of any suspected breaches of privacy. | 90099 |
| 5.9.3 | Project Co must chair and minute meetings held at least quarterly with the State detailing: | 90100 |
| 5.9.3.1 | summary of community and stakeholder issues related to the Works: | 90101 |
| 5.9.3.2 | status of community and stakeholder engagement activities; | 90102 |
| 5.9.3.3 | upcoming milestones and potential media opportunities for the next three months; and | 90103 |
| 5.9.3.4 | upcoming Works for the next three months. | 90104 |

| | | |
|------------|---|-------|
| 6 | Occupational Health and Safety Management | 90105 |
| 6.1 | General | 90106 |
| 6.1.1 | Project Co must consider the following principles throughout the performance of the D&C Activities: | 90107 |
| 6.1.1.1 | an overriding commitment to preventing catastrophic incidents, fatalities and serious injuries; | 90108 |
| 6.1.1.2 | safety is not a priority that can be reordered, but is a value associated with every priority; | 90109 |
| 6.1.1.3 | development of a work environment based on employee involvement, accountability, team work, education, training and visible safety leadership; | 90110 |
| 6.1.1.4 | continuous improvement, innovation, knowledge sharing and learning from incidents; | 90111 |
| 6.1.1.5 | reinforcement of the need for employees to actively care about their co-workers; and | 90112 |
| 6.1.1.6 | recognition of group and individual achievement. | 90113 |
| 6.1.2 | Prior to the preparation of the Health and Safety Management Plan and in addition to its obligations under clause 15.2 (d) of the Agreement, Project Co must conduct a Safety Strategy and Culture Workshop. Project Co must ensure that: | 90114 |
| 6.1.2.1 | key Stakeholders and any personnel nominated by the State are invited to attend the Safety Strategy and Culture Workshop; | 90115 |
| 6.1.2.2 | the Safety Strategy and Culture Workshop covers, as a minimum, the following: | 90116 |
| | (a) how Project Co's safety culture will initially be fostered and maintained throughout the Works; | 90117 |
| | (b) proposed lead indicators which align with Project Co's safety culture and planned strategic activities; and | 90118 |
| | (c) identification of role specific safety accountabilities and deliverables for senior leaders, management and workforce; and | 90119 |
| 6.1.2.3 | at least one full day is allocated for the Safety Strategy and Culture Workshop. | 90120 |
| 6.1.3 | Safety Forums | 90121 |
| | Project Co must ensure the following personnel attend any Project related safety forums that are coordinated by the State and held throughout the D&C Phase: | 90122 |
| 6.1.3.1 | key personnel employed or engaged by the Subcontractors responsible for project management of health and safety issues; | 90123 |
| 6.1.3.2 | the Site health and safety professional(s); | 90124 |
| 6.1.3.3 | safety and management representatives from any Subcontractors; and | 90125 |
| 6.1.3.4 | any other relevant safety or management representatives from Project Co and Subcontractors, who are requested to attend by the State. | 90126 |
| 6.1.4 | Health and Safety Risk Assessment | 90127 |
| | Project Co maintain a current and thorough written risk assessment detailing all significant health and safety risks, and provide the assessment to the State when requested. | 90128 |
| 6.1.5 | Notification and Reporting | 90129 |
| | For the purpose of facilitating the sharing of health and safety information across work packages, Project Co must: | 90130 |
| 6.1.5.1 | promptly enter into the State's Incident Management System details of all Health and Safety Incidents, any associated reports and any updates to information in respect of a Health and Safety Incident; and | 90131 |
| 6.1.5.2 | each month upload to the Incident Management System a report in the form of the Health and Safety Performance Report Template. | 90132 |

| | | |
|------------|--|-------|
| 6.2 | Health and Safety Audits | 90133 |
| 6.2.1 | Independent Safety Auditor | 90134 |
| | The Independent Safety Auditor appointed by Project Co under the Agreement must: | 90135 |
| 6.2.1.1 | be approved by the State (acting reasonably); | 90136 |
| 6.2.1.2 | be a contractor independent of Project Co, and free of any other separate commitment or obligation to Project Co or its Subcontractors (noting however that the Independent Safety Auditor may also act as the Independent Environmental Auditor); | 90137 |
| 6.2.1.3 | not have been involved in the development of the Health and Safety Management Plan or any associated sub-plan; and | 90138 |
| 6.2.1.4 | have demonstrated competence, experience and training in workplace health and safety and audits in road, rail and tunnel construction or a related discipline. | 90139 |
| 6.2.2 | Health and Safety Management Plan Audit | 90140 |
| 6.2.2.1 | The Independent Safety Auditor must perform Health and Safety Management Plan Audits that verify that the Health and Safety Management Plan: | 90141 |
| | (a) appropriately addresses the risks identified in the risk assessment; and | 90142 |
| | (b) is in accordance with the requirements specified in the PS&TR and the Agreement. | 90143 |
| 6.2.2.2 | Project Co must ensure that the Independent Safety Auditor provides it with the following: | 90144 |
| | (a) a report regarding the Health and Safety Management Plan Audit; and | 90145 |
| | (b) a declaration, which includes: | 90146 |
| | (1) details of the Independent Safety Auditor's skills, qualifications and expertise; | 90147 |
| | (2) a statement that the Health and Safety Management Plan complies with the requirements of the Agreement; and | 90148 |
| | (3) a statement that all non-conformances identified in the report described in item (a) have been rectified. | 90149 |
| 6.2.2.3 | The declaration must be submitted to the State at the same time the Health and Safety Management Plan is submitted to the State. | 90150 |
| 6.2.2.4 | Any amendment(s) to the Health and Safety Management Plan after submission of the declaration must be referred to the Independent Safety Auditor for review and written confirmation that the declaration remains valid. | 90151 |
| 6.2.3 | Health and Safety Compliance Audits | 90152 |
| 6.2.3.1 | The Independent Safety Auditor must perform Health and Safety Compliance Audits that verify that the Works are being performed in compliance with: | 90153 |
| | (a) OHS Legislation and the health and safety requirements of the State Project Documents; and | 90154 |
| | (b) the Health and Safety Management Plan. | 90155 |
| 6.2.3.2 | The Health and Safety Compliance Audits must, as a minimum, include: | 90156 |
| | (a) review of relevant documentation and records generated as a result of implementing the Health and Safety Management Plan; | 90157 |
| | (b) inspection of all parts of the Site where the Works, or part thereof, are being performed; | 90158 |
| | (c) a sample of observations of the Works being performed, including a sample of high risk work being performed; | 90159 |
| | (d) consultation with a sample of the workforce performing the Works in relation to the Health and Safety Management Plan and its implementation; and | 90160 |
| | (e) review of actions and close-out of previous non-conformances. | 90161 |
| 6.2.3.3 | Following a Health and Safety Compliance Audit the Independent Safety Auditor must prepare a report that: | 90162 |
| | (a) provides evidence of or a detailed summary of the audit methodology; | 90163 |
| | (b) identifies any non-conformances or areas for improvement; | 90164 |

| | | |
|------------|--|-------|
| | (c) provides recommendations as to appropriate control measures to address those non-conformances; | 90165 |
| | (d) nominates the timeframes for resolution of any non-conformances identified; and | 90166 |
| | (e) conform to the State's requirements for classification of non-conformances, and any other reasonable reporting requirements of the State. | 90167 |
| 6.2.3.4 | Project Co must provide evidence of the close out of any non-conformances identified as a result of the audit in the Health and Safety Performance Report. | 90168 |
| 6.2.3.5 | Project Co must ensure a Health and Safety Compliance Audit is performed by an Independent Safety Auditor once within the first 3 months following commencement of the Works and at least every 6 months thereafter. | 90169 |
| 6.2.3.6 | Project Co must submit an audit and compliance schedule within the Health and Safety Management Plan and Health and Safety Performance Report. | 90170 |
| | | 90171 |
| 6.3 | Road Safety | |
| 6.3.1 | Safety equipment on vehicles | 90172 |
| | Without limiting Project Co's obligations under the Heavy Vehicle National Law, Project Co must ensure that all heavy vehicles used during the performance of the D&C Activities have: | 90173 |
| 6.3.1.1 | side under run guards fitted (unless Project Co can demonstrate to the satisfaction of the State and the Independent Reviewer that the vehicle will not perform the function for which it is intended if side under run guards are fitted); | 90174 |
| 6.3.1.2 | front, rear and side blind spots completely eliminated or minimised as far as practical and possible, through the use of fully operational direct and indirect vision aids, sensors and audible or visual driver alerts; | 90175 |
| 6.3.1.3 | equipment fitted with an audible means of warning other road users of a left manoeuvre; and | 90176 |
| 6.3.1.4 | prominent signage on the vehicle to warn cyclists and other road users of the dangers of passing the vehicle on the inside or of getting too close to the vehicle. | 90177 |
| 6.3.2 | Driver training | 90178 |
| | Throughout the performance of the D&C Activities, Project Co must ensure that all heavy vehicle drivers, including drivers employed by Project Co's subcontractors, undergo training (to include a mix of theoretical, e-learning, practical and on the job training) and continuous professional development covering the safety of vulnerable road users and on-road hazard awareness. | 90179 |
| | | 90180 |
| 6.4 | Hazardous Materials | |
| 6.4.1 | Prior to the commencement of the Works, Project Co must engage an independent hazardous materials auditor to perform an audit of any structures at each relevant Site in accordance with the requirements of Division 6, Part 4.3 – Asbestos, of the <i>Occupational Health and Safety Regulations 2007 (Vic)</i> . | 90181 |
| 6.4.2 | Project Co must promptly provide a copy of the hazardous materials audit to the State. | 90182 |
| | | 90183 |
| 6.5 | Emergency Response and Incident Management | |
| 6.5.1 | Emergency Contacts | 90184 |
| | Project Co must advise the State of the names and telephone numbers of employees or representatives who can be contacted in an emergency and out of hours and keep this list current. | 90185 |
| 6.5.2 | Emergency Response and Incident Management Workshop | 90186 |
| 6.5.2.1 | Project Co must facilitate an Emergency Response and Incident Management Workshop with the State prior to finalising the Emergency Response and Incident Management Plan. | 90187 |
| 6.5.2.2 | Project Co must: | 90188 |
| | (a) invite nominees of the State to attend the Emergency Response and Incident Management Workshop; | 90189 |
| | (b) ensure that the key persons and, so far as is practicable, key representatives | 90190 |

| | | |
|------------|--|--------|
| | from Project Co's Subcontractors attend the Emergency Response and Incident Management Workshop; and | |
| | (c) take into consideration the views expressed by attendees of the Emergency Response and Incident Management Workshop when finalising the Emergency Response and Incident Management Plan to be submitted to the State and the Independent Reviewer. | 90191 |
| 6.5.3 | Emergency Service Organisations | 90192 |
| | Project Co must establish consultation arrangements with the Emergency Service Organisations within 20 Business Days of Contract Close. This consultation must, as a minimum: | 90193 |
| 6.5.3.1 | outline the D&C Program and any potential disruptions to emergency services travel routes, road closures and the like; | 90194 |
| 6.5.3.2 | establish a notification process whereby the Emergency Service Organisations receive no less than 10 Business Days' notification of anticipated potential disruptions to emergency services travel routes (including but not limited to road closures); | 90195 |
| 6.5.3.3 | reach a joint understanding of the capability of Project Co, its Subcontractors and Emergency Service Organisations which must be included in the Emergency Response and Incident Management Plan and the risk assessment; and | 90196 |
| 6.5.3.4 | develop a process for ongoing consultation between Project Co, the Emergency Service Organisations and the State regarding Works throughout the Term. | 90197 |
| 6.5.4 | Project Co must coordinate with the key institutional stakeholders that have an emergency management responsibility to ensure that their emergency response capabilities are not hindered. | 90198 |
| 6.5.5 | Project Co must coordinate with relevant stakeholders to ensure that alternative arrangements for on street emergency assembly points are in place where existing emergency assembly points are impacted by the Works. | 90199 |
| 6.5.6 | Project Co must establish protocols in the event that the Parkville Precinct is required to respond to a major emergency, including identifying any authority by which state emergency management agencies may suspend the Works or coordinate activities for the duration of the emergency. | 90200 |
| 6.6 | Harmful Ionising Radiation | 150463 |
| 6.6.1 | Project Co must: | 150464 |
| 6.6.1.1 | consult with the current Victorian State radiation licensing authority (currently the Team Leader, Radiation in the Environmental Health Regulation and Compliance Team at the Department of Health and Human Services) to determine if there are any radiation sources that present a human health risk during the construction and/or operation of the Tunnel and Stations; | 150465 |
| 6.6.1.2 | if the radiation licencing authority identifies a radiation risk, Project Co must cooperate with the licensed radiation facility responsible for the risk to allow the licence holder to comply with their obligations under Section 22 of the Victorian Radiation Act 2005, and any other obligations arising from the standards and regulations listed in section 6.6.2; and | 150466 |
| 6.6.1.3 | if a licenced radiation facility determines that, as a result of the Project, mitigation measures are required to be introduced to ensure compliance with relevant regulations and standards, Project Co must work with the licence holder to determine and implement the lowest cost mitigation measure. | 150467 |
| 6.6.2 | The mitigations measures introduced are to be at the cost of the licensed radiation facility responsible for the radiation risk in accordance with clause 16.9 of the Agreement. | 150468 |
| 6.6.3 | Ionising Radiation Technical Requirements | 150469 |
| | The following standards and regulations must be complied with: | 150470 |
| 6.6.3.1 | Radiation Act 2005; | 150472 |
| 6.6.3.2 | Radiation Regulations 2007; and | 150473 |
| 6.6.3.3 | Australian Radiation Protection and Nuclear Safety Act 1998. | 150474 |

| | | |
|------------|--|-------|
| 7 | Design Requirements | 90201 |
| 7.1 | General | 90202 |
| 7.1.1 | Project Co must prepare and update the Design Management Plan. | 90203 |
| 7.1.2 | The design of the Works must: | 90204 |
| 7.1.2.1 | be developed and completed in accordance with: | 90205 |
| | (a) this section 7; | 90206 |
| | (b) the Design Review Schedule; and | 90207 |
| | (c) the State Project Documents; | 90208 |
| 7.1.2.2 | consider and minimise asset life cycle costs; | 90209 |
| 7.1.2.3 | follow a User Centred design process; | 90210 |
| 7.1.2.4 | satisfy the Train Franchisee in respect of joinery and location, quantity and quality of fixed and loose furniture provided in areas to be occupied by the Train Franchisee; and | 90211 |
| 7.1.2.5 | consider the operation and maintenance strategy for normal, degraded and emergency operations including the interface between new and existing stations. | 90212 |
| 7.1.3 | Project Co must: | 90213 |
| 7.1.3.1 | attend design review meetings as described in section 7.3; | 90214 |
| 7.1.3.2 | liaise with Stakeholder Groups during the Design Review Process as set out in the Design Review Schedule, including but not limited to Emergency Service Organisations and disability advocacy groups; | 90215 |
| 7.1.3.3 | attend and prepare materials for the wheel/ rail interface committee meetings as required by the State; and | 90216 |
| 7.1.3.4 | comply with the wheel/ rail interface committee meetings Terms of Reference. | 90217 |
| | | 90218 |
| 7.2 | Design Package Register | |
| 7.2.1 | The Design Package Register must be submitted with the Design Management Plan and must: | 90219 |
| 7.2.1.1 | identify the drawings and other documentation that will comprise the Design Documentation to be submitted for each Design Package; | 90220 |
| 7.2.1.2 | identify the dates on which the Design Documentation will be submitted; and | 90221 |
| 7.2.1.3 | list the Design Documentation and include the following information in respect of each item: | 90222 |
| | (a) Design Package name; | 90223 |
| | (b) drawing/document/model number; | 90224 |
| | (c) title; | 90225 |
| | (d) current revision; | 90226 |
| | (e) date; | 90227 |
| | (f) percent complete; and | 90228 |
| | (g) status/comments. | 90229 |
| 7.2.2 | The Design Package Register must be provided via the IES. | 90230 |
| | | 90231 |
| 7.3 | Design Review Meetings | |
| 7.3.1 | Design review meetings must be held at least fortnightly, or as otherwise agreed by the State, throughout the D&C Phase to review: | 90232 |
| 7.3.1.1 | progress in submitting Design Documentation against the D&C Program; | 90233 |
| 7.3.1.2 | an updated four week forecast for Design Documentation submission to assist in scheduling design reviews; | 90234 |
| 7.3.1.3 | a register of issues affecting design progress and actions to resolve such issues; and | 90235 |
| 7.3.1.4 | any other issues arising out of the design of the Works. | 90236 |
| 7.3.2 | Design review meetings must involve representatives from the State, Project Co, the | 90237 |

Independent Reviewer, the D&C Subcontractor and its designers, including urban and landscape designers where required, the Maintenance Subcontractor and, where relevant, the Proof Engineer.

| | | |
|------------|--|--------|
| | | 90238 |
| 7.4 | Design Risks Register | |
| 7.4.1 | Project Co must: | 90239 |
| 7.4.1.1 | establish a Design Risk Register to record design risks during the design process; | 90240 |
| 7.4.1.2 | ensure that the Design Risk Register is continuously reviewed and updated by Project Co throughout the D&C Phase; and | 90241 |
| 7.4.1.3 | provide a copy of the latest Design Risk Register to the State and Independent Reviewer every two weeks in electronic (*.XLSX) and PDF formats via the Information Exchange System. | 90242 |
| | | 90243 |
| 7.5 | Design Documentation | |
| 7.5.1 | General | 90244 |
| 7.5.1.1 | For each Design Package, Project Co must submit: | 90245 |
| | (a) Interim Design Documentation; | 90246 |
| | (b) Certified Design Documentation; and | 90247 |
| | (c) IFC Design Documentation; | 90248 |
| | to the State and the Independent Reviewer for review in accordance with the Design Review Schedule. | 90249 |
| 7.5.2 | Interim Design Documentation must include: | 90250 |
| 7.5.2.1 | an interim design report which: | 90251 |
| | (a) identifies the Design Package(s) to which the Interim Design Documentation relates, including any Design Packages that have been issued for Preparatory Works; | 90252 |
| | (b) identifies the aspects of the Design Management Plan to which the Interim Design Documentation relates; | 90253 |
| | (c) identifies all Reference Documents used in the preparation of the Interim Design Documentation; | 90254 |
| | (d) demonstrates that all relevant performance requirements including constructability, maintenance and operations requirements have been met and integrated into the Interim Design Documentation; | 90255 |
| | (e) documents any changes to the Technical Solution and the justification for such changes; | 90256 |
| | (f) confirms that any changes to the Technical Solution have been dealt with in accordance with the Design Review Schedule; | 90257 |
| | (g) identifies all key decisions made in the design development to date; | 90258 |
| | (h) provides results of any additional modelling, investigations or testing; | 90259 |
| | (i) provides evidence that comments on the Interim Design Documentation were sought from stakeholders and the Maintenance Subcontractor; | 90260 |
| | (j) provides written confirmation from the urban and landscape designer that the Interim Design Documentation meets the intent of the urban and landscape design; | 90261 |
| | (k) to the extent required by the Design Management Plan, includes written confirmation from the Lead Architect that the Interim Design Documentation meets the intent of the architectural design and is consistent with the architectural requirements of the PS&TR; | 150475 |
| | (l) identifies any relevant Interim Design Documentation for Preparatory Works; | 90262 |
| | (m) to the extent relevant to the Design Package, demonstrates the Interim Design Documentation is in accordance with the requirements of the approved FEB; | 90263 |
| | (n) includes, as appendices to the interim design report (where relevant to the Design Package): | 90264 |
| | (1) the approved FEB; | 90266 |
| | (2) any relevant tunnel ventilation documentation as set out in section 7.13.3; | 90267 |

| | | |
|------|--|-------|
| (3) | a report documenting the outcomes of a formal SiD assessment as described in section 7.14; | 90268 |
| (4) | [Not disclosed] | 90269 |
| (5) | [Not disclosed] | 90270 |
| (6) | [Not disclosed] | 90271 |
| (7) | a Sustainable Design Report as described in section 7.18; | 90272 |
| (8) | an assessment on deficiency and vehicle curving to demonstrate that potential flange contact on curves has been minimised; | 90273 |
| (9) | a wheel/ rail interface study as set out in PS&TR Part B, section 5.1.4 (b)(vi); | 90274 |
| (10) | a 'Train Protection Risk Report' that addresses: | 90275 |
| | (i) derailment risk within the tunnels; and | 90276 |
| | (ii) collision risk, | 90277 |
| | for all rolling stock (including maintenance) in the Tunnel; | 90278 |
| (11) | a Transport Design Report and Transport Modelling Report as described in sections 9.2.3 and 9.2.4; | 90279 |
| (12) | if relevant, a road safety audit report including all dispositions to the audit recommendations and an explanation as to the manner in which those dispositions have been addressed; | 90280 |
| (13) | a flood impact assessment and treatment strategy for any Design Package that could affect patterns of stormwater drainage; | 90281 |
| (14) | all relevant geotechnical and hydrogeological information and the results of any analysis required for the design, including: | 90282 |
| | (i) any Durability Assessment required by section 7.10; | 90283 |
| | (ii) the Geotechnical Interpretive Report, Hydrogeological Interpretive Report and Contaminated Land Assessment Interpretive Report described in section 7.11; | 90284 |
| | (iii) any assessment of tunnel, embankment or excavation stability; | 90285 |
| | (iv) any assessment of ground water settlements and ground water movements, including movement of known contaminants; | 90286 |
| | (v) predicted settlement extents and any treatments and monitoring controls required to achieve the requirements of the State Project Documents; | 90287 |
| | (vi) any assessment of the capacity of recommended foundations for structures; and | 90288 |
| | (vii) details of the geotechnical and hydrogeological parameters employed in the design together with details of the sensitivity analysis conducted for all elements in contact with the ground; | 90289 |
| (15) | construction sequence drawings which show key steps in the construction of the element being considered; | 90290 |
| (16) | a noise and vibration impact assessment and mitigation strategy for any Design Package that could affect sensitive receivers identified in the EES; | 90291 |
| (17) | in addition to item (14)(iv) above and Part B, section 5.2.5, a detailed hydrogeological model showing where works are proposed below the water table at CBD South, Arden, Domain and the Western Portal or where the works include drained temporary works. Hydrogeological modelling is to include mitigated, unmitigated, construction phase and operational phase scenarios; | 90292 |
| (18) | waterproofing design details including interface treatments at connections between like and/or differing waterproofing systems and at geometric interfaces; | 90293 |
| (19) | reinforcement layouts including bar sizes, layers of reinforcement, and connection details (laps, couplers, welds etc.) where the Design Package includes reinforced concrete elements; | 90294 |
| (20) | an AGI file of design lux levels for all locations; | 90295 |

| | | | |
|---------|---------|--|--------|
| | (21) | a contingency plan to replace or augment the baseplate hold down bolts in the event of unexpected failure; | 90296 |
| | (22) | a decommissioning and disposal plan for the proposed trackform; and | 90297 |
| | (23) | a Station Planning and Passenger Modelling Report which must include, as a minimum: | 118651 |
| | (i) | details of the proposed modelling approach used including clear identification of and justification for the parameters and assumptions adopted, including those set out in the PS&TR. Where variations to any data or parameters set out in the PS&TR have been proposed, justification must also be provided; | 118652 |
| | (ii) | maps of station average Levels of Service in accordance with the requirements in section 7.4 of Part B, and calculated in accordance with Appendix C7 which states that the area must be calculated to exclude intervals with zero pedestrian flow; and | 118653 |
| | (iii) | journey times for average, minimum and maximum journey times from platform to street for each walk route (i.e. exit), for each modelled scenario and time period at each station. | 118654 |
| 7.5.2.2 | | all necessary drawings, reports and specifications bound separately for each Design Package to which the Interim Design Documentation relates, including: | 90298 |
| | (a) | demonstration that the relevant elements of the Maintained Assets are wholly contained within the Licensed Construction Area; | 90299 |
| | (b) | a schedule of Assets, Asset Components and Asset Sub-Components to which the report and layout drawings relate, showing the location of each Asset; | 90300 |
| | (c) | a list of the applicable Reference Documents and any additions to the requirements in the Reference Documents; and | 90301 |
| | (d) | a list of interface design requirements and inclusions from key stakeholders, RSA and other relevant interfaces; and | 90302 |
| 7.5.2.3 | | any other information required by the State Project Documents. | 90303 |
| 7.5.3 | | Certified Design Documentation must include: | 90304 |
| | 7.5.3.1 | a design report which: | 90305 |
| | (a) | identifies the Design Packages to which the Certified Design Documentation relates, including any Design Packages that have been issued for Preparatory Works; | 90306 |
| | (b) | identifies the aspects of the Design Management Plan to which the Certified Design Documentation relates; | 90307 |
| | (c) | identifies all Reference Documents used in the preparation of the Certified Design Documentation; | 90308 |
| | (d) | documents any changes to the design since the Interim Design report was issued; | 90309 |
| | (e) | defines the land boundaries of each Returned Asset to which the Certified Design Documentation relates; | 90310 |
| | (f) | includes all key decisions made in the design development to date; | 90311 |
| | (g) | confirms that any changes to the Technical Solution have been dealt with in accordance with the Design Review Schedule; | 90312 |
| | (h) | provides results of any additional modelling, investigations or testing; | 90313 |
| | (i) | demonstrates that all relevant requirements of the State Project Documents including constructability, maintenance and operations requirements have been met and integrated into the Certified Design Documentation; | 90314 |
| | (j) | provides evidence that comments on the Certified Design Documentation were sought from Stakeholders and the Maintenance Subcontractor; | 90315 |
| | (k) | provides written confirmation from the urban and landscape designer that the Certified Design Documentation meets the intent of the urban and landscape design; | 90316 |
| | (l) | to the extent required by the Design Management Plan, includes written confirmation from the Lead Architect that the Certified Design Documentation meets the intent of the architectural design and is consistent with the architectural requirements of the PS&TR; | 150477 |

| | | |
|------------|---|--------|
| | (m) identifies any relevant Certified Design Documentation for Preparatory Works; | 90317 |
| | (n) provides dispositions to all comments provided on the Interim Design Documentation; | 90318 |
| | (o) provides evidence of any required Approvals that have been obtained; | 90319 |
| | (p) to the extent relevant to the Design Package, demonstrates that the Certified Design Documentation is in accordance with the requirements of the approved FER; | 90320 |
| | (q) includes as appendices to the design report (where relevant to the Design Package): | 90321 |
| | (1) a report and accompanying drawings identifying proposed protection zones around new surface infrastructure; | 90323 |
| | (2) the approved FER; | 90324 |
| | (3) a strategy that demonstrates how Rail Network Emergency Response Vehicles (RNERVs) will be capable of being deployed to facilitate intervention at all locations within the tunnels; | 118329 |
| | (4) any relevant tunnel ventilation documentation as set out in section 7.13.3; | 90325 |
| | (5) the outcomes of a SiD assessment as described in section 7.14; | 90326 |
| | (6) [Not disclosed] | 90327 |
| | (7) [Not disclosed] | 90328 |
| | (8) a Sustainable Design Report as described in section 7.18, including the water balance study as described in section 7.18.1.5; | 90329 |
| | (9) a Transport Design Report and Transport Modelling Report as described in sections 9.2.3 and 9.2.4; | 90330 |
| | (10) if relevant, a road safety audit report including all dispositions to the audit recommendations and, if relevant, an explanation as to the manner in which those dispositions have been addressed; | 90331 |
| | (11) an AGI file of design lux levels for all locations; and | 90332 |
| | (12) any appendices to the Interim Design Documentation including reports, studies and modelling, that have been amended or updated; | 90333 |
| 7.5.3.2 | all necessary drawings, reports and specifications bound separately for each Design Package to which the Certified Design Documentation relates, including: | 90334 |
| | (a) demonstration that the relevant elements of the Maintained Assets are wholly contained within the Licensed Construction Area; | 90335 |
| | (b) a schedule of Assets, Asset Components and Asset Sub-Components to which the report and layout drawings relate, showing the location of each Asset; | 90336 |
| | (c) a list of the applicable Reference Documents and any additions to the requirements in the Reference Documents; and | 90337 |
| | (d) a list of interface design requirements and inclusions from key stakeholders, RSA and other relevant interfaces; and | 90338 |
| 7.5.3.3 | any other information required by the State Project Documents. | 90339 |
| 7.5.4 | IFC Design Documentation must include: | 90340 |
| 7.5.4.1 | all items required to be submitted as Certified Design Documentation up revised to 'Issued for Construction'; | 90341 |
| 7.5.4.2 | a report documenting the outcome of the Issued for Construction Review conducted by Project Co in accordance with section 1.1.6; | 90342 |
| 7.5.4.3 | any amendments to the approved FER; and | 90343 |
| 7.5.4.4 | subject to the Design Review Schedule, evidence of the Independent Reviewer's certification of the Certified Design Documentation in accordance with the Design Review Schedule. | 90344 |
| | | 90345 |
| 7.6 | Mock ups and material samples | |
| 7.6.1 | General | 90346 |
| 7.6.1.1 | As part of the Design Review Process, Project Co must prepare and submit to the Independent Reviewer the following project specific material samples and mock ups: | 90347 |
| | (a) one full scale mock-up of a section of a typical station concourse level, | 90348 |

| | | |
|------------|---|--------|
| | incorporating all proposed wall, floor and ceiling materials and finishes; lighting, signage and advertising panels; ticket barriers; ticket vending machine; card vending machine, fare payment device and stand-alone enquiry Machine; PIDS, PA, CCTV and antennas. Any variation between materials and/ or configuration in stations to be addressed by provision of material samples and/ or 3D rendered imagery; | |
| | (b) in relation to station platforms: | 90349 |
| | (1) one full scale mock-up covering both CBD stations: 10m in length (2 bays) by 1/2 combined platform/ concourse width of a station platform, including Platform Screen Door System and all proposed wall, floor and ceiling materials and finishes; lighting, signage and advertising panels; PIDS, PA, CCTV and antennas; customer help point. Any variation between materials and/ or configuration in stations to be addressed by provision of material samples and/ or 3D rendered imagery; and | |
| | (2) one full scale mock-up covering the Domain, Parkville and Arden Stations: 10m in length by ½ platform width of station platform level including Platform Screen Door System and all proposed wall, floor and ceiling materials and finishes; lighting, signage and advertising panels; PIDs, PA, CCTV and antennas; customer help points. Any variation between materials and/ or configuration in stations to be addressed by provision of material samples and/ or 3D rendered imagery; | |
| | (c) full scale mock-up of a typical tunnel cross-section, including trackwork; walkways; mechanical and electrical services; communication and signalling equipment; and overhead line; and | 90350 |
| | (d) full scale mock-up of station interior and exterior way-finding and signage which must be representative of the proposed signage positioning, dimensions and visibility. | 90351 |
| 7.6.1.2 | Project Co must coordinate the production of the samples and mock ups with the Rail Systems Alliance in accordance with the Framework Co-ordination and Interface Principles. | 90352 |
| 7.6.1.3 | The material samples and mock-ups are to be submitted so as to: | 90353 |
| | (a) demonstrate that the materials and detailing selected in respect of the relevant Works complies with the requirements of the Agreement; | 90354 |
| | (b) to demonstrate aesthetic effects of the relevant Works; and | 90355 |
| | (c) to establish the standard to be achieved in the relevant Works. | 90356 |
| 7.6.1.4 | The material samples and mock-ups must be representative of the relevant completed Works in terms of colour, texture and finish (including material and colour variations), aesthetic effects, detailing and workmanship. | 90357 |
| 7.6.1.5 | All material sample and mock up submissions must be accompanied by any information otherwise required by this section 7. | 90358 |
| 7.6.1.6 | Once certified by the Independent Reviewer, the material samples and mock-ups will become the required standard or quality to be achieved in the Works. | 90359 |
| 7.6.1.7 | All material samples and mock ups must, once certified by the Independent Reviewer, be securely stored by Project Co in a dedicated facility for the duration of the D&C Phase, unless otherwise agreed with the State. | 90360 |
| 7.6.2 | Submission of material samples and mock ups | 90361 |
| 7.6.2.1 | Material samples in respect of any Works comprised in a Design Package must be submitted to the Independent Reviewer at the same time as the Interim Design Documentation in respect of that Design Package. | 90362 |
| 7.6.2.2 | Mock-ups must be available for inspection by the Independent Reviewer within three months of the Independent Reviewer issuing a notification or certification under clauses 2.8(a) and 2.8(c) of the Design Review Schedule in relation to all Design Packages relevant to the mock-up. | 150480 |
| 7.7 | Design Verification | 90363 |
| 7.7.1 | Project Co must perform all design verification and validation required in accordance with the State Project Documents, AS 4292 Rail Safety Management and AS/NZS ISO 9000 Quality | 90364 |

| | | |
|------------|---|-------|
| | Management and quality assurance standards. | |
| 7.7.2 | Project Co must appoint a suitably experienced and qualified person as the Lead Verifier following consultation with the State. The Lead Verifier must be independent of those having direct responsibility for the design. | 90365 |
| 7.7.3 | Design Documentation for each Design Package must be subject to a process of design verification that covers all aspects of the design before submission of Certified Design Documentation. | 90366 |
| 7.7.4 | The Lead Verifier must verify that the Design Documentation complies with all requirements of the State Project Documents and that detail in drawings, reports and specifications accurately and adequately conveys the design. | 90367 |
| 7.7.5 | Complete records of the scope and outcomes of design verification must be retained and signed by the designated Lead Verifier. | 90368 |
| 7.8 | Proof Engineering | 90369 |
| 7.8.1 | Project Co must ensure that, in the performance of the D&C Activities, the Proof Engineer: | 90370 |
| 7.8.1.1 | undertakes an independent detailed check and certifies (in the form set out in the Schedule of Certificates and Notices) the adequacy of the Design Documentation for all: | 90371 |
| | (a) civil structures consisting of primary structure and primary structural connections of stations, station canopies and station entrances (i.e. beams; columns, ties (tension columns), slabs and foundations, and PSD embedded connections). Excludes cladding, glazing, fixings, balustrades and secondary structures (e.g. maintenance access walkways and internal non-load bearing walls); | 90372 |
| | (b) tunnel structures including all tunnel support and primary and secondary linings, all relevant fire and life safety considerations and OHW primary fixing and jet fan primary fixing into the tunnel lining. Checking does not include brackets or elements not embedded into the tunnel lining for OHW and jet fans; | 90373 |
| | (c) bridges and underpasses comprising primary structure and primary structural connections (i.e. girders, piers, decks and foundations); | 90374 |
| | (d) earth retaining structures with earth retained height greater than 1m; | 90375 |
| | (e) engineered design directional sign gantries (i.e. large signage as defined in Section 1.4 of the VicRoads Road Structures Inspection Manual June 2014), including all foundations; | 90376 |
| | (f) load bearing falsework; | 90377 |
| | (g) Temporary Works, comprising: | 90378 |
| | (1) primary structural excavation support (e.g. propping and waling); | |
| | (2) primary and secondary temporary excavation support for all mined caverns, tunnels and adits; | |
| | (3) station temporary decking (i.e. primary and intermediate); | |
| | (4) crane foundations; | |
| | (5) hoardings and structures (i.e. acoustic sheds) with public interface; | |
| | (6) TBM launch and receiving elements and TBM traversing frames; | |
| | (7) tower crane and gantry crane free stand installation structure and foundations; | |
| | (8) "Critical Risk" category mobile crane lifts as per the John Holland Lift Planning Matrix (Reference JH-FRM-WHS-030-01 Lift Planning Matrix, Rev. No. 3, 5 July 2017); | |
| | (9) structural works associated with temporary traffic management; | |
| | (10) other Temporary Works design elements assessed to constitute a safety risk by Project Co, the State or the Independent Reviewer; | |
| | (11) ground improvement works; and | |
| | (12) strengthening or stabilising works (e.g. propping, underpinning etc.). | |
| | (h) formwork required for concrete pours higher than 2 metres; | 90379 |
| | (i) [Not disclosed] | 90380 |

| | | |
|------------|---|-------|
| | (j) geotechnical designs including earth retaining structures (soil nailing and rock anchoring), embankment and formation, excluding landscaping areas with batters gentler than 1:5; | 90381 |
| | (k) drainage design (excluding the proof engineering of standard proprietary products that meet Industry acceptable performance criteria) and flood modelling as determined by the relevant authority; | 90382 |
| | (l) groundwater settlement, groundwater movement predicted extents analysis and proposed mitigation measures; and | 90383 |
| | (m) elements designed to AS5100; | |
| 7.8.1.2 | prior to any load being applied to load bearing falsework: | 90384 |
| | (a) inspects all such load bearing falsework and formwork required for concrete pours higher than 2 metres prior to the application of loading; and | 90385 |
| | (b) certifies (in the form set out in the Schedule of Certificates and Notices) that the falsework or formwork (as applicable) has been erected in accordance with the IFC Design Documentation. | 90386 |
| 7.8.2 | Project Co must ensure that: | 90387 |
| 7.8.2.1 | proof engineering includes a full and independent assessment of all factors influencing the final integrity of the specified components of the Works; | 90388 |
| 7.8.2.2 | proof engineering must be undertaken by a Proof Engineer who is prequalified under the VicRoads Consultant Pre-qualification Scheme; | 90389 |
| 7.8.2.3 | proof engineering is based on the designer's drawings and specifications without reference to the designer's computations; | 90390 |
| 7.8.2.4 | the Proof Engineer must be independent of Project Co and its designers; and | 90391 |
| 7.8.2.5 | all advice and comments including calculations exchanged with the Proof Engineer must be in writing. | 90392 |
| 7.8.3 | The Proof Engineer must stamp and sign all relevant drawing(s) and documents and provide a Proof Engineering Certificate of Compliance as evidence of the Proof Engineer's detailed check and acceptance prior to their issue of the Certified Design. The Proof Engineering Certificate of Compliance must be in accordance with the form set out in the Schedule of Certificates and Notices. | 90393 |
| 7.8.4 | All amendments to the design after issue of the Proof Engineering Certificate of Compliance must be reviewed by the Proof Engineer and the Proof Engineer must provide written confirmation that the certificate remains valid. Project Co must provide evidence of this confirmation not less than five Business Days prior to the commencement of the relevant Works. | 90394 |
| 7.8.5 | Each Proof Engineering Certificate of Compliance is to be forwarded to the State and Independent Reviewer with the Certified Design Documentation. | 90395 |
| | | 90396 |
| 7.9 | Preparatory Works | |
| 7.9.1 | Certified Design Documentation for Preparatory Works must include: | 90397 |
| 7.9.1.1 | a Preparatory Works design report which: | 90398 |
| | (a) clearly defines the scope of the proposed Preparatory Works; | 90399 |
| | (b) confirms that Interim Design Documentation has been submitted for any Works to which the Preparatory Works relate; and | 90400 |
| | (c) provides evidence that any required Approvals have been obtained; | 90401 |
| 7.9.1.2 | marked up design drawings clearly defining the scope of the Preparatory Works; | 90402 |
| 7.9.1.3 | relevant reports and specifications for the Preparatory Works; and | 90403 |
| 7.9.1.4 | any certificates required by the Schedule of Certificates and Notices. | 90404 |
| 7.9.2 | Subject to clause 4.12 of the 'Melbourne Metro Rail Project Incorporated Document December 2016', and unless otherwise approved in writing by the State, Preparatory Works must be limited to: | 90405 |
| 7.9.2.1 | survey and site investigations; | 90406 |
| 7.9.2.2 | site clearing and grubbing; | 90407 |
| 7.9.2.3 | site establishment; | 90408 |
| 7.9.2.4 | fencing; | 90409 |

| | | |
|-------------|--|--------|
| 7.9.2.5 | preliminary earthworks and drainage; and | 90410 |
| 7.9.2.6 | relocation of, or modifications to, Utility Infrastructure in line with the 'Melbourne Metro Rail Project Incorporated Document December 2016'. | 90411 |
| | | 90412 |
| 7.10 | Durability Assessment | |
| | The durability assessment must: | 90413 |
| 7.10.1 | be undertaken and submitted as part of the Design Documentation; | 90414 |
| 7.10.2 | demonstrate how the selected design, materials, construction and maintenance methods will achieve the durability requirements for each Asset and Asset Component and the specified Design Life for each Asset and Asset Component specified; and | 90415 |
| 7.10.3 | establish performance criteria for materials giving consideration to factors including: | 90416 |
| 7.10.3.1 | the micro-environment to which the element is exposed including: ground and groundwater conditions; and contamination and exposure conditions including temperature, humidity, CO2 level and atmospheric pollution; | 90417 |
| 7.10.3.2 | potential deterioration mechanisms in this micro-environment including penetration of aggressive substances into structural cracks, joints or wick action; | 90418 |
| 7.10.3.3 | operational conditions including drying and wetting, vibration, heat and stray current effects; | 90419 |
| 7.10.3.4 | the likely material life; | 90420 |
| 7.10.3.5 | the feasibility and cost of in situ monitoring, maintenance and/or repair; | 90421 |
| 7.10.3.6 | the necessity and cost-effectiveness of providing additional protection; | 90422 |
| 7.10.3.7 | the rate and significance of deterioration; | 90423 |
| 7.10.3.8 | risk and variability of the constructed product; | 90424 |
| 7.10.3.9 | the feasibility and cost of in-situ monitoring, maintenance and/or repair and replacement; | 90425 |
| 7.10.3.10 | the necessity of providing additional protection including coatings; and | 90426 |
| 7.10.3.11 | the significance of failure. | 90427 |
| | | 90428 |
| 7.11 | Geotechnical, Hydrogeological and Contamination Reports | |
| 7.11.1 | General | 90429 |
| 7.11.1.1 | Project Co must prepare: | 90430 |
| | (a) a Geotechnical Interpretative Report (GIR) that presents the design geotechnical models and associated geotechnical parameters for each part of the Works; | |
| | (b) a Hydrogeological Interpretative Report that presents the hydrogeological models and associated hydrogeological parameters for each part of the Works; and | |
| | (c) a Contaminated Land Assessment – Interpretive Report; | |
| | and submit the each of these as part of the Interim Design Documentation. | |
| 7.11.1.2 | The GIR must include a description of the stratigraphy along the alignment, the design geotechnical parameters adopted for each stratigraphic unit (including a discussion on the derivation of these values), the design groundwater levels, the foundation levels for the works and any other information that is relevant to the Works. | 90431 |
| 7.11.1.3 | All available geological, geotechnical and hydrogeological data must be taken into account of in the GIR. If any new data or information becomes available which is materially relevant to GIR, the GIR must be updated accordingly. | 90432 |
| 7.11.1.4 | Project Co must undertake any other investigations which it deems necessary, including but not limited to any additional geotechnical investigations required for the purpose of assessing the geological, hydrogeological and geotechnical conditions and developing the design geotechnical model and associated parameters. | 90433 |
| 7.11.1.5 | Project Co must prepare a Geotechnical and Hydrogeological Investigation Factual Report for any additional investigations which it deems necessary. | 118334 |
| 7.11.2 | Reporting | 90434 |

| | | |
|----------|---|-------|
| 7.11.2.1 | The GIR must include but not be limited to the following: | 90435 |
| | (a) outline of the Works; | 90436 |
| | (b) plan and longitudinal profile of the alignment; | 90437 |
| | (c) summary of the investigation works considered in the preparation of the GIR; | 90438 |
| | (d) description of the geological and hydrogeological ground conditions; | 90439 |
| | (e) geotechnical and engineering geological characteristics of the various layers; | 90440 |
| | (f) interpretation of the ground conditions as related to the design and construction of the Works; | 90441 |
| | (g) development of the design geotechnical sections; | 90442 |
| | (h) development of geotechnical parameters for design and construction; | 90443 |
| | (i) assessment of groundwater levels for design and construction; | 90444 |
| | (j) sensitivity assessment of the geotechnical parameter values and the impact on the Works design; and | 90445 |
| | (k) identification of key geotechnical risks associated with the Works and discussion on how these will be addressed in the design and construction process. | 90446 |
| 7.11.2.2 | Geological and geotechnical longitudinal sections and transverse cross-sections at key locations must be prepared for the full alignment of the Works. The longitudinal and transverse sections must include groundwater levels, boreholes and any other relevant information. | 90447 |
| 7.11.3 | Design Geotechnical Parameters | 90448 |
| 7.11.3.1 | The types and selected values of the design geotechnical parameters must be appropriate for the ground conditions and proposed depths of where the Works are to be performed. They must take into consideration the type, extent and geometry of underground and other structures, the construction methods and the requirements of the proposed analysis methods, and any other relevant factors. A discussion of the derivation of the design parameters adopted is required to be included in the GIR. | 90449 |
| 7.12 | [Not disclosed] | 90450 |
| 7.13 | Tunnel Ventilation | 90503 |
| 7.13.1 | Project Co must appoint a suitably qualified tunnel ventilation specialist/s to undertake the development, documentation, installation, testing and commissioning of the tunnel ventilation systems. | 90504 |
| 7.13.2 | The responsibilities of the tunnel ventilation specialist/s include, but are not limited to: | 90505 |
| 7.13.2.1 | the development, documentation and implementation of the tunnel ventilation systems and strategies; | 90506 |
| 7.13.2.2 | planning, preparing and submission of documentation detailing the requirements of the tunnel ventilation systems; | 90507 |
| 7.13.2.3 | modelling studies of the tunnel ventilation systems to confirm the functional and performance requirements under the various operational modes (normal / degraded / congested / incident); | 90508 |
| 7.13.2.4 | modelling studies of the station smoke exhaust systems to confirm the functional and performance requirements under the various operational modes; | 90509 |
| 7.13.2.5 | exhaust dispersion modelling studies of all ventilation shaft-associated discharges; | 90510 |
| 7.13.2.6 | the development of tunnel ventilation electrical power supply strategies and requirements; | 90511 |
| 7.13.2.7 | the development of the tunnel ventilation system control systems, including the pneumatic control systems and associated interfaces with the station smoke management systems, fire detection systems and communications based train control (CBTC) systems; | 90512 |
| 7.13.2.8 | the development and submission of the plant status for each operational mode of the tunnel ventilation systems and station smoke management systems under all scenarios; | 90513 |
| 7.13.2.9 | the development and incorporation of the functional and operational interfaces between the tunnel ventilation systems and other systems, including but not limited | 90514 |

| | | |
|--------|---|--------|
| | to: | |
| | (a) the CBTC system; | 90515 |
| | (b) the HCMT fire detection systems (RSA/HCMT); | 90516 |
| | (c) the Station fire detection systems; | 90517 |
| | (d) the Station Smoke Management Systems; | 90518 |
| | (e) the building and energy management systems; | 90519 |
| | (f) operator work stations in the Network Control Centre; and | 90520 |
| | (g) the tunnel fire detection system. | 137210 |
| 7.13.3 | Project Co must prepare the following documentation: | 90521 |
| | 7.13.3.1 tunnel ventilation and exhaust dispersion modelling plan; | 90522 |
| | 7.13.3.2 tunnel ventilation modelling analysis report; | 90523 |
| | 7.13.3.3 tunnel ventilation system design report/s; | 90524 |
| | 7.13.3.4 exhaust dispersion modelling report; | 90525 |
| | 7.13.3.5 tunnel ventilation system control and systems integration report; | 90526 |
| | 7.13.3.6 tunnel ventilation system drawings; and | 90527 |
| | 7.13.3.7 tunnel ventilation system specification and equipment schedules. | 90528 |
| 7.13.4 | Project Co must prepare a modelling plan that outlines the parameters and methodologies to be used in the modelling and includes: | 90529 |
| | 7.13.4.1 description of the analysis to be undertaken; | 90530 |
| | 7.13.4.2 the methodology; | 90531 |
| | 7.13.4.3 input data for both the one-dimensional (1D) and three-dimensional (CFD) models; | 90532 |
| | 7.13.4.4 standards on which the system is to be modelled and designed; | 90533 |
| | 7.13.4.5 a description of the used software; and | 90534 |
| | 7.13.4.6 acceptance criteria and how results will be presented. | 90535 |
| 7.13.5 | Project Co must utilise industry recognised modelling software that is validated and proven for the application for which it is intended. | 90536 |
| 7.13.6 | Project Co must provide a tunnel ventilation modelling analysis report that must include the following: | 90537 |
| | 7.13.6.1 air flow requirements to maintain acceptable tunnel temperatures and environmental conditions under all normal, degraded and congested operations; | 90538 |
| | 7.13.6.2 air flow requirements to maintain acceptable tunnel temperatures and environmental conditions during maintenance operations; | 90539 |
| | 7.13.6.3 air flow requirements to remove smoke and maintain tenable conditions under all incident operations; | 90540 |
| | 7.13.6.4 air flow velocities and pressures within the tunnels during evacuation and fire intervention; | 90541 |
| | 7.13.6.5 pressure transients and forces exerted on the PSDS due to train movement approaching and leaving station; | 90542 |
| | 7.13.6.6 PSDS leakage analysis between the trackway and station platforms to ascertain the amount of air exchange and thermal loads on the platforms; | 90543 |
| | 7.13.6.7 CFD analysis for train fire at the station with PSDS opened to ascertain the capacity of the smoke extraction system; and | 90544 |
| | 7.13.6.8 CFD analysis for station fires in public areas to ascertain the capacity of the smoke extraction system. | 90545 |
| 7.13.7 | All numerical criteria proposed to be used must be provided to the Train Franchisee for review and approval in accordance with the timeframes set out in the Design Development Process. The numerical criteria must satisfy the air velocity requirements and must be justified to minimise risk SFAIRP. | 137211 |
| 7.13.8 | All engineering analysis of the ventilation system must include a validated subway analytical simulation program augmented as appropriate by a quantitative analysis of airflow dynamics produced in the fire scenario, such as would result from the application of validated computational fluid dynamics (CFD) techniques. The results of the analysis must include the no-fire (or cold) air velocities that can be measured during commissioning to confirm that a | 137212 |

| | | |
|-------------|--|--------|
| | mechanical ventilation system as built meets the requirements determined by analysis. | 137213 |
| 7.13.9 | The no-fire (or cold) airflows provided by the installed mechanical ventilation system must be measured during commissioning to confirm that the airflows meet the requirements determined by analysis. | 90546 |
| 7.14 | Safety in Design | |
| 7.14.1 | Project Co must ensure that design of the Works complies with the obligations of the <i>Rail Safety National Law Application 2013</i> and the <i>Occupational Health & Safety Act 2004 (Vic)</i> and all associated regulation, as may be amended from time to time, or successor legislation, which include to, so far as is reasonably practicable, incorporate all safety considerations associated with the full life cycle of each element of the design. | 90547 |
| 7.14.2 | Project Co must facilitate Safety in Design (SiD) Workshops with the Independent Reviewer, the State and the Rail Franchisee to discuss the risk profile and assessment of the planned Works, including safety associated with construction, installation, operation, maintenance, repair and modification. | 90548 |
| 7.14.3 | The SiD Workshops must be attended by Project Co's key personnel and by selected Subcontractor personnel. | 90549 |
| 7.14.4 | Project Co must: | 90550 |
| 7.14.4.1 | undertake SiD Workshops for each Design Stage; | 90551 |
| 7.14.4.2 | appoint a suitably qualified SiD Workshop Facilitator; | 90552 |
| 7.14.4.3 | advise the Independent Reviewer and the State of the date, time and location of the SiD Workshops not less than 5 Business Days prior to the SiD Workshops; | 90553 |
| 7.14.4.4 | prior to each SiD Workshop, undertake desktop analysis to consider past and relevant hazards, controls, accidents and incidents; | 90554 |
| 7.14.4.5 | ensure that the SiD Workshops: | 90555 |
| | (a) identify the hazards and risks associated with the Works including Operation; | 90556 |
| | (b) assess the likelihood of occurrence and severity of the risks so that the risks can be prioritised; | 90557 |
| | (c) recommend actions and strategies to eliminate or reduce, so far as reasonably practicable, the risks occurring and their impacts; and | 90558 |
| | (d) cover all hazards and risks associated with the Works; | 90559 |
| 7.14.4.6 | provide the State at least 2 Business Days prior to the SiD Workshops with a draft SiD Risk Register to assist with the identification of risks for the Safety in Design Workshops; | 90560 |
| 7.14.4.7 | facilitate the handover of information from the State in relation to specific geographic hazards associated with each of the Work locations; | 90561 |
| 7.14.4.8 | within 5 Business Days of completion of the SiD Workshops, prepare and submit to the State and the Independent Reviewer a report that details the outcomes of the SiD Workshop including assessed risks and recommendations; | 90562 |
| 7.14.4.9 | incorporate the recommendations from the SiD Workshops into the Design Documentation; and | 90563 |
| 7.14.4.10 | record hazards and risks in the hazard log. | 90564 |
| | | 90565 |
| 7.15 | [Not disclosed] | |
| | | 90599 |
| 7.16 | [Not disclosed] | |
| | | 90627 |
| 7.17 | [Not disclosed] | |
| | | 90657 |
| 7.18 | Sustainability in Design | |
| 7.18.1 | Project Co must: | 90658 |
| 7.18.1.1 | address the sustainability requirements within all relevant Design Packages at each Design Stage; | 90659 |
| 7.18.1.2 | produce a sustainability benchmarking report two months after Contract Close which | 90660 |

| | | |
|----------|---|-------|
| | demonstrates lessons learnt and best practice initiatives to be applied to the Works; | |
| 7.18.1.3 | ensure that the sustainability requirements for the D&C Activities are allowed for and addressed in: | 90661 |
| | (a) design briefings for all personnel involved in the preparation of design documentation; | 90662 |
| | (b) processes for the development of design documentation; and | 90663 |
| | (c) relevant Management Plans and documents for the design, procurement, delivery, operation, maintenance and management of the Works; | 90664 |
| 7.18.1.4 | produce a Sustainable Design Report at each Design Stage which: | 90665 |
| | (a) includes a table demonstrating the status of the compliance with relevant sustainability requirements from section 15 of Part B; | 90666 |
| | (b) includes a consolidated list of initiatives to be implemented in relation to the sustainability themes in the MMRA Sustainability Strategy; | 90667 |
| | (c) demonstrates that climate change mitigation and adaptation measures or changes have been implemented in design; | 90668 |
| | (d) includes other life cycle assessments, including concrete and steel, and details of where the lifecycle assessments have informed design, selection of materials and materials sourcing; | 90669 |
| | (e) includes a detailed design Materials Calculator to demonstrate the achievement of the materials requirements in this PS&TR; | 90670 |
| | (f) includes greenhouse gas footprinting assessments including details of where low carbon initiatives have been implemented in the design and construction of the Works and Temporary Works; | 90671 |
| | (g) describes how the MMRA Sustainability Strategy and sub-strategy requirements are being investigated and implemented; | 90672 |
| | (h) includes IS rating tool and GS rating tool scorecards with information on progress against each credit; | 90673 |
| | (i) describes how initiatives are integrated in other discipline design reports and drawings; | 90674 |
| | (j) includes a demonstration and description of innovative sustainable design initiatives; and | 90675 |
| | (k) includes other studies as required by the State; and | 90676 |
| 7.18.1.5 | develop a water balance study to inform Certified Design that models the sources, uses and estimated quantities of potable and non-potable water which will be created and used in the construction and operational phases for the Works to demonstrate achievements of requirements in Part B sections 15.7.2, 15.7.3, and 15.7.4. | 90677 |

7.19 Electromagnetic Compatibility

| | | |
|----------|--|-------|
| 7.19.1 | Project Co must: | 90678 |
| 7.19.1.1 | Comply with EPRs EMI1 and EMI2; | 90679 |
| 7.19.1.2 | undertake a system wide Electromagnetic Interference (EMI)/ Electromagnetic Compatibility (EMC) impact assessment investigation for existing infrastructure, system and equipment considering all phases of the project, in compliance with relevant stakeholder requirements; | 90680 |
| 7.19.1.3 | have regard to the specific stakeholder concerns as set out in Appendix C2 with respect to EMI/EMC; | 90681 |
| 7.19.1.4 | take into account the impact of the electromagnetic emissions generated by the operation of any electrical or electronic equipment used for D&C Activities; | 90682 |
| 7.19.1.5 | demonstrate EMC for intra-system, inter-system and extra-system EMC in accordance with the EMC Management Plan; | 90683 |
| 7.19.1.6 | manage direct electrical interfaces with third party stakeholders in accordance with the EMC Management Plan; | 90684 |
| 7.19.1.7 | take all reasonable steps to obtain a 'letter of non-objection' from the third party stakeholder when an EMC technical assessment has been accepted by that relevant third party stakeholder; | 90685 |

| | | |
|---------------------------------|---|--------|
| 7.19.1.8 | provide evidence that maintenance, testing and training equipment and systems are compliant with appropriate EMC standards and statutory legislation; | 90686 |
| 7.19.1.9 | develop a cable management system for: | 90687 |
| | (a) the signalling system; | 90688 |
| | (b) the communication system; | 90689 |
| | (c) the signalling control system; | 90690 |
| | (d) the Passenger Screen Door system; | 90691 |
| | (e) the mechanical systems; and | 90692 |
| | (f) the electrical systems; | 90693 |
| 7.19.1.10 | assess compliance of the existing signalling system (wider area where signalling works take place), with the following EMC standards and regulations: | 90694 |
| | (a) IEC 62236-4 (within the 3 m zone); | 90695 |
| | (b) IEC 61000-6-2 (outside of the 3 m zone); | 90696 |
| | (c) IEC 61000-6-4; | 90697 |
| | (d) IEC 61000-3-2 and IEC 61000-3-3 (for equipment in the scope of the Works); and | 90698 |
| | (e) Note: Zoning principles according to IEC 62236-4; and | 90699 |
| 7.19.1.11 | conduct regular audits of all electrical or electronic systems or pieces of equipment used as part of the Works during the construction, testing and commissioning phases of the D&C Phase against the requirements of the specific EMC Management Plan for that equipment or system. | 90700 |
| 7.20 Electrolysis | | 118336 |
| 7.20.1 | Project Co must ensure that the Works comply with: | 118337 |
| | 7.20.1.1 the Electrical Safety Act 1998; | 118338 |
| | 7.20.1.2 the Electrical Safety (Cathodic Protections) Regulations 2009 | 118339 |
| | 7.20.1.3 the Victorian Code of practice for electrolysis mitigation and cathodic protection 2015; and | 118340 |
| | 7.20.1.4 AS 2832 Cathodic Protection of Metals. | 118341 |
| 7.20.2 | Project Co must liaise with the Train Franchisee and the Victorian Electrolysis Committee (VEC) to establish the electrolysis requirements framework and agree on the proposed mitigation systems during the design development process and throughout the D&C Phase. | 118342 |
| 7.21 Passenger Modelling | | 118343 |
| 7.21.1 | Project Co must use the parameters and assumptions set out in Appendix C7 to undertake passenger modelling. | 118344 |

| | | |
|---------|---|-------|
| 8 | Property and Land Requirements | 90701 |
| 8.1 | Private Property | 90702 |
| 8.1.1 | Maintaining access to private property | 90703 |
| 8.1.1.1 | All things necessary must be done to ensure that: | 90704 |
| | (a) subject to sections (b) to (f), access, amenity and function is maintained to all properties at all times; | 90705 |
| | (b) safe access and egress is maintained to all properties, including as set out in Appendix C2, at all times during construction. This must include but not be limited to all mode movements essential to the operation of the stakeholder operations inclusive of emergency and building services; | 90706 |
| | (c) reduction to the level of access to and egress from commercial properties during their normal trading hours is avoided to the greatest extent possible; | 90707 |
| | (d) any reduction in the level of access to and egress from any property is limited to the absolute minimum duration necessary to carry out the relevant construction related D&C Activities and is carried out in accordance with the approved Worksite Traffic Management Plan (WTMP); | 90708 |
| | (e) all permanent access to any property affected by the D&C Activities must be restored, including associated landscaping and restoration works, and temporary access arrangements removed, within 7 days of completing the activity requiring the temporary access measures or within such other time as agreed with the relevant property owner. The restored permanent access must be to a condition at least equivalent to that existing prior to the commencement of the relevant D&C Activities; and | 90709 |
| | (f) without limiting Project Co's obligations under the Agreement, including any obligations under the Environmental Performance Requirements, notice must be given to the owner and occupier of a property in respect of which access may be affected by construction-related D&C Activities at least 10 Business Days prior to the commencement of such activities. Such notice must include: | 90710 |
| | (1) a full description of the relevant activities; | 90711 |
| | (2) the impact such activities are likely to have on the property including access to the property; and | 90712 |
| | (3) the Metro Tunnel Telephone Information Line contact phone number, through which the owner or occupier of the property may obtain further information or register complaints regarding the carrying out of the activities or the effect of the activities on or near the property. | 90713 |
| 8.1.1.2 | Project Co must respond to and resolve, at its own cost, any claims from commercial proprietors in relation to reduced access as a result of the construction methodology adopted by Project Co to perform the Works. | 90714 |
| 8.1.2 | Occupation of private property | 90715 |
| 8.1.2.1 | Without limiting the Agreement, where Project Co wishes to enter private property to carry out the Works, Project Co must: | 90716 |
| | (a) not enter into any private property or enter negotiations with the owners and occupiers of any private property unless and until it has received written confirmation from the State that it is authorised to enter into that land (which confirmation must not be unreasonably withheld or delayed), unless Project Co has the expressed agreement or consent of the relevant owners and occupiers of that private property; | 90717 |
| | (b) provide the State with any agreement with the relevant owners or occupiers of the private property and, if requested by the State, a copy of all correspondence with the relevant owners or occupiers of the private property; | 90718 |
| | (c) prior to Project Co entering the private property to carry out the Works, Project Co must prepare and give to the State a report setting out the condition of the land at the date of occupation; | 90719 |

- (d) cause as little harm and inconvenience and do as little damage as possible to the private property and anything on or growing on the private property; 90720
- (e) remain upon the private property only for such period as is reasonably necessary for undertaking the Works; 90721
- (f) remove from the private property on the completion of the occupation of that land all Temporary Works and Materials and Equipment brought onto, or erected on, that land other than any of those things that the owner or occupier agrees may be left on that land; 90722
- (g) leave the private property, as nearly as possible, in the condition in which it was immediately before it was occupied; 90723
- (h) use its best endeavours to co-operate with the owners and occupiers of the private property; 90724
- (i) be responsible for preventing the spread of weeds or the escape of stock and liable for any costs arising from the spread of weeds or the escape of stock; 90725
- (j) be responsible for all costs and liabilities associated with accessing and carrying out the Works on the private property; and 90726
- (k) separate the relevant part of the private property with sufficient fencing, with such gates as are necessary, from the remainder of any land adjoining it and ensure that all gates are kept securely locked when not in use. 90727

90728

8.2 Temporary Occupation Land

8.2.1 General 90729

Project Co must: 90730

8.2.1.1 use its best endeavours to negotiate an agreement with landowners or occupants of any land required to be temporarily occupied for the purposes of performing the Works before submitting a notice under clause 6.3 of the Agreement with respect to Temporary Occupation Land; 90731

8.2.1.2 minimise the impact of the Works on Temporary Occupation Land and the length of time that Temporary Occupation Land is required for the performance of the Works; 90732

8.2.1.3 ensure, prior to any Works commencing on any Temporary Occupation Land, that the land is fenced with appropriate security fencing and that a pre-condition survey of the land and any structures on the land is carried out in accordance with section 10.7; and 90733

8.2.1.4 reinstate the Temporary Occupation Land upon completion of the Works and must obtain written confirmation from the landowner that any reinstatement and rectification works (e.g. fencing or pavement works) have been carried out to the landowners satisfaction and that no outstanding claims (past, present or future) remain unresolved or will be made by the landowner against the State or Project Co. 90734

8.2.2 Access to Temporary Occupation Land 90735

8.2.2.1 Project Co may only procure access to Temporary Occupation Land for the purposes of performing the Works, in accordance with this section. 90736

8.2.2.2 Without limiting the Agreement, where Project Co wishes to enter Temporary Occupation Land to carry out the Works, Project Co must: 90737

(a) not enter into any Temporary Occupation Land unless and until it has complied with this section and has obtained written authorisation from the State to enter the Temporary Occupation Land (which authorisation must not be unreasonably withheld or delayed); 90738

(b) prior to Project Co entering the Temporary Occupation Land to carry out the Works, Project Co must prepare and provide to the State and the landowner/ occupier a report setting out the condition of the Temporary Occupation Land at the date of occupation; 90739

(c) do all things reasonably required by the State to assist the State to reach agreement with the owners and the occupiers of the Temporary Occupation Land regarding the contents of any condition report prepared by Project Co pursuant to section 8.2.2.2(b); 90740

(d) cause as little harm and inconvenience and do as little damage as possible to 90741

| | | |
|------------|--|-------|
| | the Temporary Occupation Land and anything on or growing on the Temporary Occupation Land; | |
| | (e) remain upon the Temporary Occupation Land only for such period as is reasonably necessary for undertaking the Works; | 90742 |
| | (f) not undertake any Works on the Temporary Occupation Land unless approved in writing by the State and the relevant owner or occupier of the Temporary Occupation Land; | 90743 |
| | (g) remove from the Temporary Occupation Land on the completion of the occupation of the Temporary Occupation Land all Temporary Works and Materials and Equipment brought onto, or erected on, the Temporary Occupation Land other than any Works approved in writing by the State and the relevant owner or occupier of the Temporary Occupation Land; | 90744 |
| | (h) leave the Temporary Occupation Land, as nearly as possible, in the condition in which it was immediately before the Temporary Occupation Land was occupied; | 90745 |
| | (i) use its best endeavours to co-operate with the owners and occupiers of the Temporary Occupation Land; | 90746 |
| | (j) be responsible for preventing the spread of weeds or the escape of stock and liable for any costs arising from the spread of weeds or the escape of stock; and | 90747 |
| | (k) separate the relevant part of the Temporary Occupation Land by sufficient fencing, with such gates as are necessary, from the remainder of any land adjoining it and ensure that all gates are kept securely locked when not in use. | 90748 |
| 8.2.2.3 | The State will be responsible for any rent that the State pays the owner or occupier of the Temporary Occupation Land under the Major Transport Projects Facilitation Act 2009 (Vic), in relation to Project Co's occupation of Temporary Occupation Land pursuant to this section. | 90749 |
| 8.3 | Fencing | 90750 |
| 8.3.1 | Subject to section 8.3.2: | 90751 |
| 8.3.1.1 | fences must be designed and constructed to prohibit the public from accessing the Works; | 90752 |
| 8.3.1.2 | appropriate boundary fencing must be provided between the Site and abutting land; and | 90753 |
| 8.3.1.3 | a security fence must be constructed between any shared use path and the rail corridor. | 90754 |
| 8.3.2 | A boundary fence or a security fence is not required where there is a noise wall which meets the requirements, other than fence type, for the boundary fence or the security fence, as the case may be, at that location. | 90755 |
| 8.3.3 | A new boundary fence may be required when: | 90756 |
| 8.3.3.1 | there is no existing boundary fence; or | 90757 |
| 8.3.3.2 | the existing boundary fence does not perform the functions as described in section 8.3.5. | 90758 |
| 8.3.4 | Each section of new boundary fencing must: | 90759 |
| 8.3.4.1 | be accurately located by cadastral survey on the Site boundary defined on the relevant survey plans; | 90760 |
| 8.3.4.2 | prevent access by vehicles, persons or animals to the Site at locations other than authorised access points; | 90761 |
| 8.3.4.3 | be constructed from materials and to standards that represent good workmanship; | 90762 |
| 8.3.4.4 | be in a sound structural condition; | 90763 |
| 8.3.4.5 | be of uniform appearance and be maintained free from graffiti when viewed from easily accessible public land; | 90764 |
| 8.3.4.6 | provide an acceptable level of privacy to the property where the abutting land use is residential; and | 90765 |
| 8.3.4.7 | for private property fencing, be of no lesser standard than any removed fencing or the remainder of the property fencing. | 90766 |

| | | |
|------------|---|-------|
| 8.3.5 | Each section of existing boundary fence proposed to be used as the permanent boundary fence must: | 90767 |
| 8.3.5.1 | be of a condition to prevent access by vehicles, persons or animals to the Licensed Construction Area at locations other than authorised access points; | 90768 |
| 8.3.5.2 | be in a sound structural condition; | 90769 |
| 8.3.5.3 | provide an acceptable level of privacy to the property where the abutting land use is residential; and | 90770 |
| 8.3.5.4 | not vary from the Licensed Construction Area boundary by more than 100mm, unless otherwise agreed by the State. | 90771 |
| 8.3.6 | Where a concrete safety barrier is required between a shared use path and rail corridor, the security fence must be a welded mesh fence erected on top of the concrete safety barrier. | 90772 |
| | | 90773 |
| 8.4 | Demolition and Salvaged Materials | |
| 8.4.1 | All residential buildings required to be demolished as part of the Works must be demolished within 20 Business Days after Project Co is provided access to those buildings in accordance with the Agreement, unless otherwise agreed to or directed by the State. | 90774 |
| 8.4.2 | Project Co is to undertake condition surveys of land at the following stages: | 90775 |
| 8.4.2.1 | immediately prior to the commencement of Demolition Works; and | 90776 |
| 8.4.2.2 | immediately after demolition and prior to commencement of any further D&C Activities. | 90777 |
| 8.4.3 | The following salvaged materials which have been removed from their in-situ state within the Project Area remain the property of the relevant Returned Asset Owner unless otherwise agreed by the Returned Asset Owner: | 90778 |
| 8.4.3.1 | bluestone paving and kerbing; | 90779 |
| 8.4.3.2 | train rails, sleepers and electrical infrastructure; and | 90780 |
| 8.4.3.3 | all other salvaged materials, the retention of which constitutes a usual requirement of the Returned Asset Owner. | 90781 |
| 8.4.4 | Unless otherwise agreed with the Returned Asset Owner, Project Co must make the salvaged material available for collection in a manner and location to facilitate easy loading and transport by the Returned Asset Owner. | 90782 |
| | | 90783 |
| 8.5 | Condition of Land | |
| 8.5.1 | Any property affected by the D&C Activities, to the extent that such property does not comprise part of the Relevant Infrastructure or the Returned Works, must be reinstated following the carrying out and completion of the relevant D&C Activities to at least the standard that it was in prior to access by Project Co. | 90784 |
| 8.5.2 | Nothing in this section 8.5 restricts or affects Project Co's right or obligation to remove infrastructure on, or make improvements to, such land to the extent authorised or required by the Project Agreement. | 90785 |
| 8.5.3 | Where repatriation of cultural heritage values is required to occur on VicTrack land, Project Co must consult with and undertake repatriation to the satisfaction of VicTrack. | 90786 |
| | | 90787 |
| 8.6 | Land Availability | |
| 8.6.1 | Roads | 90788 |
| 8.6.1.1 | Before Project Co accesses any Roads identified in the Property Schedule, Project Co must use its best endeavours to agree a maintenance plan with the Responsible Road Authority for that land which identifies: | 90789 |
| | (a) the discrete area in respect of which access is required; | 90790 |
| | (b) Project Co's maintenance obligations with respect to that discrete area and the assets located on that discrete area; | 90791 |
| | (c) the condition of the assets within and, where appropriate, adjacent to, the discrete area; | 90792 |
| | (d) the routine inspections to be undertaken; | 90793 |

| | | |
|------------|---|-------|
| | (e) the date from which Project Co will assume maintenance responsibility of the discrete area; and | 90794 |
| | (f) the names and contact information of a representative from Project Co and the Responsible Road Authority. | 90795 |
| 8.6.1.2 | Where Project Co is unable, despite using its best endeavours, to agree a maintenance plan with the Responsible Road Authority within 10 Business Days of first contacting that Responsible Road Authority, Project Co must submit a report to the State: | 90796 |
| | (a) demonstrating how it used its best endeavours to agree a maintenance plan; | 90797 |
| | (b) detailing Project Co's proposed maintenance plan; and | 90798 |
| | (c) detailing the reasons why agreement was not able to be reached. | 90799 |
| 8.6.1.3 | Within 10 Business Days of receiving the report under section 8.6.1.2 the State will, unless Project Co and the Responsible Road Authority subsequently agree a maintenance plan, either: | 90800 |
| | (a) procure the agreement of the Responsible Road Authority to Project Co's proposed maintenance plan; or | 90801 |
| | (b) direct Project Co to comply with a maintenance plan (which may include such amendments to address issues raised by Project Co or the Responsible Road Authority as the State considers appropriate). | 90802 |
| 8.6.1.4 | Prior to accessing that land, a maintenance plan must be in place (either agreed between Project Co and the Responsible Road Authority or as directed by the State). | 90803 |
| 8.6.1.5 | Project Co must comply with any maintenance plan agreed or directed under this section 8.6.1. | 90804 |
| 8.6.1.6 | Project Co must keep records of all maintenance activities undertaken on the Land and regularly submit them to the Responsible Road Authority and the State, including upon completion of the Works on that land. | 90805 |
| 8.6.2 | Property Schedule | 90806 |
| 8.6.2.1 | Access to land will be made available to Project Co subject to the conditions and not before the date set out in the Property Schedule. | 90807 |
| 8.6.3 | Temporary Works Areas | 90808 |
| 8.6.3.1 | No part of the Maintained Assets or the Returned Assets may be located on those areas identified as "Temporary Works Areas" on the Property Schedule. | 90809 |
| | | 90810 |
| 8.7 | Survey Plan | |
| 8.7.1 | Without limiting clause 6 of the Agreement, the Survey Plan must; | 90811 |
| 8.7.1.1 | be provided in Type 2, Type 4 and Type 5 formats as defined in Table 8-1; and | 94242 |
| 8.7.1.2 | be provided in an OP format acceptable to both the State and the Surveyor-General; and | 94243 |
| 8.7.1.3 | identify segments and points for the whole of the boundary of the Commercial Opportunities Lease Areas, the Licensed Maintenance Areas and the Licensed Construction Areas which must be either: | 94244 |
| | (a) a boundary line within a Survey Plan; or | 94245 |
| | (b) a defined point within a Survey Plan. | 94246 |
| 8.7.2 | Prior to Final Acceptance or Handback of a Returned Asset, Project Co must provide to the State and any relevant Returned Asset Owner a plan: | 90812 |
| 8.7.2.1 | on a photogrammetric base which identifies the completed Works; | 90813 |
| 8.7.2.2 | in Type 2, Type 4 and Type 5 formats as defined in Table 8-1; and | 90814 |
| 8.7.2.3 | which identifies segments and points for the whole of the boundary of the Maintenance Area or the Returned Asset (as relevant) which must be either: | 90815 |
| | (a) a boundary line within a Survey Plan; | 90816 |
| | (b) a defined point within a Survey Plan; or | 90817 |

(c) an easily determined and permanent on site location. 90818

90819

8.8 Road and Authorised Access Points Gazettal Plans

8.8.1 The road and authorised access points gazettal plans must: 90820

8.8.1.1 be provided to enable the Roads to be declared. 90821

8.8.1.2 be provided to the State as a condition precedent to Provisional Acceptance, at least two months prior to Provisional Acceptance unless otherwise agreed by the State; 90822

8.8.1.3 be in a form agreed by VicRoads; 90823

8.8.1.4 be produced in consultation with the Responsible Road Authority for each Road; 90824

8.8.1.5 be produced in Type 2, Type 4 and Type 5 formats as defined in Table 8-1; 90825

8.8.1.6 be agreed by the State; and 90826

8.8.1.7 identify segments and points for the whole of the boundary of each road declaration which must be either: 90827

(a) a boundary line within a survey plan; or 90828

(b) a defined point within a survey plan. 90829

90830

8.9 Format and Development of Plans

8.9.1 The plans to be provided under this section 8 must be: 90831

8.9.1.1 produced in the format required in the relevant section and defined in Table 8-1; and 90832

8.9.1.2 prepared and progressively developed. 90833

90834

Table 8-1: Plan Formats

| Format Type | Definition |
|-------------|---|
| 1 | Electronic .pdf format fully text searchable and selectable |
| 2 | Electronic .pdf format with image selectable |
| 3 | Electronic CAD as described in section 1.3.11 |
| 4 | Electronic GIS as described in section 1.3.12 |
| 5 | Printed |

| | | |
|---------|--|-------|
| 9 | Transport Management Requirements | 90835 |
| 9.1 | General | 90836 |
| 9.1.1 | Project Co must: | 90837 |
| 9.1.1.1 | prepare and update the Transport Management Plan; | 90838 |
| 9.1.1.2 | prepare and update Traffic Management Plans (TMPs) and Worksite Traffic Management Plans (WTMPs) for all construction stages in each of the Precincts; | 90839 |
| 9.1.1.3 | address any Environmental Requirements; | 90840 |
| 9.1.1.4 | comply with the Road Management Act and the Transport Integration Act; | 90841 |
| 9.1.1.5 | support the State's Travel Demand Management (TDM) Strategy, including provision of the following: | 90842 |
| | (a) continuous surface transport data for vehicles, pedestrians, cyclists, trucks, buses and trams for each precinct; | 90843 |
| | (b) any transport related feedback from stakeholders and members of the public gathered by Project Co; and | 90844 |
| | (c) communications and stakeholder engagement support to deliver the State's TDM strategy to stakeholders in each precinct; and | 90845 |
| 9.1.1.6 | ensure that the Communications and Stakeholder Engagement Management Plan and the Transport Management Plan are consistent with the State's delivery of the TDM strategy and do not hinder or obstruct the State's delivery of the TDM strategy. | 90846 |
| 9.2 | Transport Design and Modelling Reports | 90847 |
| 9.2.1 | Project Co must engage a suitably qualified and experienced transport professional to prepare a Transport Design Report and Transport Modelling Report for each Design Stage. The transport professional must be a VicRoads prequalified consultant. | 90848 |
| 9.2.2 | Prior to commencing transport modelling activities, Project Co must demonstrate to the satisfaction of the State: | 90849 |
| 9.2.2.1 | the transport models used to support the precinct and road functional layouts; | 94247 |
| 9.2.2.2 | the geographic scope for the transport modelling; | 94248 |
| 9.2.2.3 | the appropriate model validation techniques; | 94249 |
| 9.2.2.4 | the modelling performance and approach to delivering an outcome that achieves the modal priorities set out in Part B, Appendix B4; and | 94250 |
| 9.2.2.5 | the appropriate modelling and design guidelines/ standards and approvals from the relevant transport or road authority. | 94251 |
| 9.2.3 | The Transport Design Report must: | 90850 |
| 9.2.3.1 | provide a summary of the project transport requirements for each precinct and road functional layout; | 90851 |
| 9.2.3.2 | detail how each precinct and road functional layout meets those requirements; | 90852 |
| 9.2.3.3 | demonstrate how each precinct and road functional layout integrates with other interfacing work packages; | 90853 |
| 9.2.3.4 | detail the stakeholder consultation undertaken and how the outcome of that consultation informs each precinct and road functional layout; | 90854 |
| 9.2.3.5 | detail how each precinct and road functional layout are supported by the transport modelling; | 90855 |
| 9.2.3.6 | demonstrate that any approvals from the relevant transport or road authority for each precinct and road functional layout have been obtained; | 90856 |
| 9.2.3.7 | include or cross reference to the drawings produced for each precinct and road functional layout; and | 90857 |
| 9.2.3.8 | be submitted as part of the Design Documentation. | 90858 |
| 9.2.4 | The Transport Modelling Report must: | 90859 |

| | | |
|------------|--|-------|
| 9.2.4.1 | provide a summary of the project transport modelling requirements for each precinct and road functional layout; | 90860 |
| 9.2.4.2 | demonstrate that the relevant transport stakeholders have been consulted and how the outcome of that consultation informs the transport modelling; | 90861 |
| 9.2.4.3 | demonstrate that the transport models have been validated; | 90862 |
| 9.2.4.4 | demonstrate how the modelling results have been generated and analysed; | 90863 |
| 9.2.4.5 | detail how the transport modelling outputs for each precinct and road functional layout meet the modelling performance requirements; | 90864 |
| 9.2.4.6 | detail how the transport modelling informed each precinct and road functional layout; | 90865 |
| 9.2.4.7 | demonstrate that any approvals from the relevant transport or road authority for the transport modelling have been obtained; | 90866 |
| 9.2.4.8 | demonstrate how the transport modelling integrates with other interfacing work packages; and | 90867 |
| 9.2.4.9 | be submitted as part of the Design Documentation. | 90868 |
| | | 90869 |
| 9.3 | Road Functional Layouts | |
| 9.3.1 | Project Co must: | 90870 |
| 9.3.1.1 | develop road functional layouts for each precinct that optimise transport movements based upon the transport modal priorities provided in Part B, Appendix B4; | 94252 |
| 9.3.1.2 | demonstrate consideration of all modes of transport including pedestrians, cyclists, cars, buses, trams and trucks; | 94253 |
| 9.3.1.3 | document the benefits and impacts of all road functional layouts to all modes including cars, pedestrians, cyclists, buses, trams and freight of any proposed changes compared to the situation before the project; | 94254 |
| 9.3.1.4 | undertake stakeholder consultation to inform each precinct and road functional layout and gain agreement with the State and relevant authorities where the State is the final arbiter on the final precinct and road functional layout; | 94255 |
| 9.3.1.5 | consult with the Train Franchisee in relation to any proposed changes to rail relocation bus stops; | 94256 |
| 9.3.1.6 | cooperate with the State and relevant Authorities to accommodate other transport and urban improvements in the area; and | 94257 |
| 9.3.1.7 | effectively manage and support the forecast pedestrian demands in each precinct on the footpaths, intersections, crossings, tram platforms and bus stops for Day 1 operation. | 94258 |
| 9.3.2 | Road functional layouts must: | 90871 |
| 9.3.2.1 | be supported by transport modelling including all vehicles, cyclists, pedestrians, public transport users and freight vehicles; | 90872 |
| 9.3.2.2 | support the Urban Design Strategy; and | 90873 |
| 9.3.2.3 | provide a safe environment for all vehicles, cyclists, pedestrians, public transport users, freight vehicles and construction personnel, with clear and accurate information provided to all users. | 90874 |
| | | 90875 |
| 9.4 | Transport Approvals | |
| 9.4.1 | Project Co is responsible for obtaining any required approvals from the Responsible Road Authority in relation to the Transport Management Plan and for each TMP and WTMP prior to the commencement of any works or Traffic Guidance Scheme (TGS). | 90876 |
| 9.4.2 | Project Co must obtain approval from the Responsible Road Authority of the Transport Management Plan before developing TMPs, and approval from the Responsible Road Authority for the TMPs before developing the WTMPs. | 90877 |
| 9.4.3 | Project Co must not undertake any D&C Activities that impact on the transport network or TGS until such time as all required approvals have been obtained from the Responsible Road Authority with respect to: | 90878 |
| 9.4.3.1 | the Transport Management Plan for the Project; | 90879 |

| | | |
|------------|---|-------|
| 9.4.3.2 | the TMP for that Precinct; and | 90880 |
| 9.4.3.3 | the WTMP for the relevant part of the Works. | 90881 |
| 9.4.4 | Project Co must coordinate and liaise with the Responsible Road Authority, the Tram Franchisee, any party carrying out relevant Related State Project Works, any party carrying out any works, services or activities adjacent to the Works and any relevant stakeholders. | 90882 |
| 9.5 | Traffic Management | 90883 |
| 9.5.1 | Project Co must: | 90884 |
| 9.5.1.1 | use appropriate traffic and transport management methods and procedures to effectively and safely manage all road users throughout the D&C Phase including consideration of the wider transport network impacts; | 90885 |
| 9.5.1.2 | consider the needs of all road users (including pedestrians, cyclists and vehicles) which may be affected as a result of the Works; | 90886 |
| 9.5.1.3 | obtain the approval of the Responsible Road Authority to the decrease in the network performance and/or any ameliorative works including the communication plan proposed; | 90887 |
| 9.5.1.4 | obtain the approval of VicRoads or the Responsible Road Authority to entries to and exists from the Site; | 90888 |
| 9.5.1.5 | undertake all traffic signal works in consultation with, and with the approval of VicRoads. No changes or alterations must be made without VicRoads approval and agreement. | 90889 |
| 9.5.1.6 | provide a safe environment for all vehicles, cyclists, pedestrians, public transport users and construction personnel, with clear and accurate wayfinding information for all users; | 90890 |
| 9.5.1.7 | carry out the road works in such a way as to minimise delay and disruption to all road users (including pedestrians, cyclists, public transport passengers and operators); | 90891 |
| 9.5.1.8 | implement measures to mitigate impacts to key institutional stakeholders as determined in accordance with 5.2.1.7; | 90892 |
| 9.5.1.9 | undertake transport modelling to support the TMP and WTMPs including modelling of all vehicles, cyclists, pedestrians, public transport users and freight vehicles; | 90893 |
| 9.5.1.10 | where the planning or execution of the Works directly or indirectly impacts any road, footpath, bus, cycle lane or tram lane: | 90894 |
| | (a) cooperate and discuss with the State and relevant Authorities any changes to the transport network required prior to submission of the TMP or WTMP; | 90895 |
| | (b) maintain the access and connectivity of all transport modes; | 90896 |
| | (c) minimise the number of changes to road, footpath, bus, cycle, lane and tram lanes; | 90897 |
| | (d) minimise the duration and extent of any necessary closure of a lane, carriageway or road due to an emergency situation; | 90898 |
| | (e) undertake CPTED assessment where footpaths are closed, narrowed or diverted with consideration of personal security issues; | 90899 |
| | (f) ensure that appropriate measures are implemented to ensure that construction activities do not adversely impact any persons with restricted mobility; and | 90900 |
| | (g) note that construction activities requiring the temporary possession of roads may need to be undertaken outside the assumed hours during periods of low demand to minimise safety impacts and inconvenience to commuters; | 90901 |
| 9.5.1.11 | ensure that ambulance access and egress is maintained to all hospitals at all times; | 90902 |
| 9.5.1.12 | cooperate with the State and relevant Authorities to accommodate any changed traffic flows associated with a Special Event in any areas directly or indirectly affected by the Works or the Temporary Works, noting that restrictions on construction traffic may be implemented during Special Events; and | 90903 |
| 9.5.1.13 | undertake the Works so as to satisfy the Specific Stakeholder Requirements set out in Appendix C2. | 90904 |

| | | |
|------------|---|-------|
| 9.6 | Worksite Traffic Management | 90905 |
| 9.6.1 | Project Co must develop a travel plan for each worksite to manage construction traffic to and from each worksite. | 90906 |
| 9.6.2 | The worksite travel plans must be consistent with the Transport Management Plan, and be developed as part of the TMPs and WTMPs. | 90907 |
| 9.6.3 | As a minimum, the worksite travel plans must: | 90908 |
| 9.6.3.1 | identify access arrangements and make provision for staff travel; | 90909 |
| 9.6.3.2 | minimise access by private vehicle by staff and site visitors; | 90910 |
| 9.6.3.3 | include a range of tools to actively promote and provide public transport and active transport options to construction sites for staff and site visitors; | 90911 |
| 9.6.3.4 | identify any parking provision required for staff and site visitors and not assume that staff and site visitor parking can be accommodated in local streets; | 90912 |
| 9.6.3.5 | make provision for all site shift patterns, including any changes to shift patterns, 'out of hours' working, including staff safety and accessibility, fluctuations in workers employed onsite, changing transport/traffic conditions and any transport management tools not operating as planned; | 90913 |
| 9.6.3.6 | develop a freight management plan to minimise the movement of materials and spoil and truck movements to and from worksites; and | 90914 |
| 9.6.3.7 | be in place throughout the whole project lifecycle and be updated for different project stages. | 90915 |
| 9.6.4 | Project Co must: | 90916 |
| 9.6.4.1 | not park or wait heavy vehicles on the road unless at truck holding areas established in consultation with and to the satisfaction of the Responsible Road Authority; | 90917 |
| 9.6.4.2 | not implement the WTMP as the deemed TGS unless the Responsible Road Authority has provided agreement to the WTMP; | 90918 |
| 9.6.4.3 | minimise construction vehicle movements between the hours of 6.00pm to 7.00am in the vicinity of noise sensitive receivers; | 90919 |
| 9.6.4.4 | advise the State and Responsible Road Authority of the completion of each traffic event including the removal of any traffic management measures; and | 90920 |
| 9.6.4.5 | provide vulnerable road user awareness training for all heavy vehicle drivers and fit all heavy vehicles with safety devices as set out in section 6.3. | 90921 |
| 9.6.5 | Traffic Guidance Scheme | 90922 |
| 9.6.5.1 | Project Co must ensure that a TGS is included in an associated WTMP. | 90923 |
| 9.6.5.2 | To implement a TGS, Project Co must ensure that the WTMP agreed with the Responsible Road Authority, containing the TGS, is available 10 Business Days in advance of the proposed implementation of the TGS. | 90924 |
| 9.6.5.3 | If an agreed WTMP is not available 10 Business Days prior to the proposed implementation of the TGS, Project Co must reschedule the implementation of the TGS and the associated Works at Project Co's expense to provide a minimum of 10 Business Days between the Responsible Road Authority's agreement to the final WTMP and the implementation of the TGS. | 90925 |
| 9.6.5.4 | Variable message signs (VMSs) must be installed in accordance with the Worksite Safety – Traffic Management Code of Practice and the WTMP. | 90926 |
| 9.6.5.5 | After the TGS has been implemented in accordance with the relevant WTMP and prior to the commencement of the relevant construction Works in relation to the relevant Traffic Event, Project Co is responsible for reviewing the operation of the TGS and undertaking any amendments or changes necessary to ensure the TGS complies, operates and functions in accordance with the requirements of the Transport Management Plan, the relevant TMP and the relevant WTMP. | 90927 |
| | | 90928 |
| 9.7 | Works affecting tram and bus services | |
| 9.7.1 | General | 90929 |

| | | |
|---------|--|-------|
| 9.7.1.1 | Where the planning or execution of the Works directly or indirectly impacts any other public transport routes: | 90930 |
| | (a) access, connectivity, frequency and on-road priority of public transport services must be maintained; and | 90931 |
| | (b) the extent and duration of disruption must be minimised. | 90932 |
| 9.7.1.2 | Project Co must ensure that functionality and level of resilience of existing public transport infrastructure affected by the D&C Activities is maintained or replicated unless agreed to by PTV. | 90933 |
| 9.7.1.3 | Planning and execution of the Works must minimise customer disruption. | 90934 |
| 9.7.1.4 | Project Co must coordinate with PTV and the Train Franchisee in relation to the arrangement of replacement services in the event that the D&C Activities require planned cancellations or line closures. | 90935 |
| 9.7.1.5 | Frequency of bus and tram services must be maintained except by formal agreement with PTV. | 90936 |
| 9.7.2 | Safety | 90937 |
| 9.7.2.1 | A safety and risk assessment must be undertaken prior to any occupations (rail, road and tram). | 90938 |
| 9.7.2.2 | A safety and risk assessment must be undertaken prior to the re-commencement of any train or tram services. | 90939 |
| 9.7.3 | Bus services | 90940 |
| 9.7.3.1 | Project Co must ensure that bus services continue to operate during construction, with respect to frequency and routing, unless agreed to by PTV. | 90941 |
| 9.7.3.2 | Full closure of roads or detours during construction affecting scheduled PTV bus services must be avoided. | 90942 |
| 9.7.3.3 | Where it is not practicable to avoid road closures or detours altogether, they must be minimised and localised to preserve route integrity and excessive variance to travel times. | 90943 |
| 9.7.3.4 | Any proposed road changes, route alterations and temporary bus stops must be agreed with PTV and any Responsible Road Authorities at least 42 days prior to the commencement of the road works. | 90944 |
| 9.7.3.5 | Project Co must ensure that: | 90945 |
| | (a) bus stops impacted by the Works provide capacity accessibility and functionality to support patronage levels and pedestrian movements forecast for the D&C Phase; | 90946 |
| | (b) any temporary bus infrastructure remain operable and maintainable over its lifecycle; | 90947 |
| | (c) bus services operating on Lonsdale Street continue to operate during construction and at Day 1; and | 90948 |
| | (d) access connectivity, frequency and on road priority for routes 401, 402, 403, 505 and 546 bus services are maintained throughout the construction period. | 90949 |
| 9.7.4 | Tram services | 90950 |
| 9.7.4.1 | Project Co must: | 90951 |
| | (a) ensure tram services continue to operate during construction, with respect to frequency and routing, unless agreed to by PTV; | 90952 |
| | (b) ensure tram stops impacted by the Works provide capacity to support patronage levels and pedestrian movements forecast for the construction phase. This should be supported by modelling the impacts on patronage movements; | 90953 |
| | (c) model the impact of patronage movements for any tram stops impacted by the project for the following: | 90954 |
| | (1) accessibility; | 90955 |
| | (2) capacity; and | 90956 |
| | (3) functionality. | 90957 |
| | (d) document and minimise the impact on tram services delivery performance and | 90958 |

| | | |
|------------|--|-------|
| | on-time performance during the construction staging for the Works; | |
| (e) | ensure any temporary tram infrastructure remains operable and maintainable over its lifecycle; | 90959 |
| (f) | allow tram services to be delivered in line with the Tram Concept of Operation (CoO) from pre-construction up to Day-1; | 90960 |
| (g) | ensure tram services continue to operate during construction and at Day-1: | 90961 |
| | (1) at Domain, with the exception of localised occupations for transitions between construction stages; | 90962 |
| | (2) on La Trobe Street; and | 90963 |
| | (3) on Royal Parade and Elizabeth Street; and | 90964 |
| (h) | consult with and obtain agreement from both PTV and the Tram Franchisee if any Domain Interchange platforms require relocation/removal, specifically around the spacing and location of relocated platforms. | 90965 |
| 9.7.4.2 | Tram diversions must minimise the impact to customers' journey times and accessibility to tram services. | 90966 |
| 9.7.4.3 | Traffic diversions must minimise the impact to tram services. | 90967 |
| 9.7.4.4 | The operational functionality and passenger connectivity provided by the Domain tram stop must be maintained during construction. | 90968 |
| 9.7.4.5 | Construction work must not preclude the continued operation of both East-West and North-South tram services at the Swanston Street and Flinders Street intersection unless agreed to by PTV. | 90969 |
| | | 90970 |
| 9.8 | Resourcing | |
| 9.8.1 | Project Co must appoint a suitably experienced and qualified person as the 'Traffic Manager' who is responsible for: | 90971 |
| 9.8.1.1 | the development and implementation of the Transport Management Plan, TMPs and WTMPs; | 90972 |
| 9.8.1.2 | coordination of the Works; | 90973 |
| 9.8.1.3 | all issues relating to traffic management throughout the performance of the Works; and | 90974 |
| 9.8.1.4 | compliance with the requirements of the Worksite Safety – Traffic Management Code of Practice. | 90975 |
| | | 90976 |
| 9.9 | Road Safety Audits | |
| 9.9.1 | Project Co must ensure that Road Safety Audits are carried out in accordance with the Austroads Guide to Road Safety – Part 6: Road Safety Audit. | 90977 |
| 9.9.2 | The audit team must be from a company pre-qualified under the VicRoads Pre-qualification Scheme at the RSAUDIT Level and led by a VicRoads accredited senior Road Safety Auditor. Other team members must have undertaken appropriate training in Road Safety Audits. Road Safety Auditors must be independent of any other commitment or obligation to Project Co and its subcontractors carrying out the design for the Works. | 90978 |
| 9.9.3 | Project Co must ensure that a Road Safety Audit is undertaken at the following times: | 90979 |
| 9.9.3.1 | prior to implementing each proposed TMP and WTMP not specifically covered by arrangements shown in AS 1742.3 and its various user guides; | 90980 |
| 9.9.3.2 | immediately upon implementing each TGS from a WTMP; | 90981 |
| 9.9.3.3 | during the first day and night a.m. and p.m. peak hours following the implementation of each TGS; and | 90982 |
| 9.9.3.4 | where applicable, at any other time nominated in the Worksite Safety – Traffic Management Code of Practice. | 90983 |
| 9.9.4 | Road Safety Audits must be completed and all issues raised in the audit responded to prior to commencement of the next stage of the Works. | 90984 |
| 9.9.5 | Project Co must: | 90985 |
| 9.9.5.1 | implement any necessary corrective actions arising from the initial Road Safety Audit | 90986 |

| | | |
|-------------|---|-------|
| | Report as soon as possible after identification; | |
| 9.9.5.2 | promptly address all issues raised in Road Safety Audits, and prepare a written response to the audit that: | 90987 |
| | (a) details action taken/to be taken to address each issue raised; | 90988 |
| | (b) provides justification for proposals not to undertake action on particular issues raised; | 90989 |
| | (c) highlights issues raised not considered to be the responsibility of Project Co; and | 90990 |
| | (d) within 2 Business Days of the Road Safety Audit being undertaken in relation to the WTMP, forward a Road Safety Audit initial report and Project Co's response to the report to the State and Independent Reviewer; | 90991 |
| 9.9.5.3 | prepare and maintain a register of all Road Safety Audits. The register must include: | 90992 |
| | (a) audit stage and date; | 90993 |
| | (b) summary of each issue; | 90994 |
| | (c) any changes required to the TMP, WTMP or TGS; | 90995 |
| | (d) status of action to address each issue; and | 90996 |
| | (e) verification of completed actions. | 90997 |
| 9.9.5.4 | implement any major changes required to the TMP, WTMP or TGS, as identified by the detailed Road Safety Audit Report; and | 90998 |
| 9.9.5.5 | respond to any minor changes required to the TMP, WTMP or TGS, as identified by the detailed Road Safety Audit Report. | 90999 |
| 9.9.6 | The State or Independent Reviewer may request, at any time, comment by the senior Road Safety Auditor on road safety issues associated with the Works. | 91000 |
| | | 91001 |
| 9.10 | Transport monitoring and reporting | |
| 9.10.1 | Project Co must prepare the Transport Review Report for inclusion in the Monthly D&C Phase Report, which as a minimum must detail: | 91002 |
| 9.10.1.1 | compliance with the Transport Management Plan, TMPs, WTMPs and TGS; | 94259 |
| 9.10.1.2 | the daily operation of the TMPs, WTMPs and TGS; | 94260 |
| 9.10.1.3 | any changes made to the TMPs, WTMPs and TGS as a result of the monitoring and review strategy; and | 94261 |
| 9.10.1.4 | how the performance requirements and any key performance indicators are being met. | 94262 |
| 9.10.2 | Project Co must provide recurring updates or transport bulletins at intervals required by the Responsible Road Authority in relation to the following: | 91003 |
| 9.10.2.1 | all current Works affecting the transport network, including roads, footpaths, cycle paths, buses, rail, trams and public transport users; | 91004 |
| 9.10.2.2 | all proposed Works to be carried out within the next 8 weeks that will affect the transport network, including roads, footpaths, cycle paths, buses, rail, trams and public transport users; and | 91005 |
| 9.10.2.3 | daily monitoring and reporting of travel time delays associated with the Works. | 91006 |
| 9.10.3 | Following implementation of the Transport Management Plan, any TMP, any WTMP or any TGS, Project Co must implement a monitoring and review strategy to ensure the TMPs, WTMPs and TGS comply, operate and function as intended. | 91007 |
| 9.10.4 | Any minor changes required to the TMP, WTMP or TGS, as identified by Project Co as a result of the review, must be implemented and recorded on the TMP, WTMP or TGS by the Traffic Manager. | 91008 |
| 9.10.5 | Any major changes required to the TMP, WTMP or TGS, as identified by Project Co as a result of a review, must be approved by the Traffic Manager and the Responsible Road Authority, and the TMP, WTMP and TGS must be updated accordingly. | 91009 |

| | | |
|-------------|--|-------|
| 9.11 | Unplanned transport disruptions | 91010 |
| 9.11.1 | Project Co must: | 91011 |
| 9.11.1.1 | avoid any unplanned disruptions to a traffic lane, footpath, cycleway, tramway, bus lane, or road; | 91012 |
| 9.11.1.2 | immediately report any unplanned disruptions to a traffic lane, footpath, cycleway, tramway, bus lane, or road caused by the Works to the Responsible Road Authority, Emergency Service Organisations, the State and the Independent Reviewer; | 91013 |
| 9.11.1.3 | develop a stakeholder communication process to immediately inform any stakeholders of unplanned disruptions and the proposed amelioration measures; and | 91014 |
| 9.11.1.4 | following any unplanned disruption event, review the Transport Management Plan and the relevant TMP, WTMP and TGS and report the outcome of the review to the State and the Independent Reviewer. | 91015 |
| 9.11.2 | Any changes required to the TMP, WTMP or TGS identified as a result of a review must be undertaken in consultation with and to the satisfaction of the Responsible Road Authority, and the TMP, WTMP and TGS must be updated accordingly. | 91016 |

| | | |
|-------------|---|-------|
| 10 | Construction Requirements | 91017 |
| 10.1 | General | 91018 |
| 10.1.1 | Project Co must: | 91019 |
| 10.1.1.1 | prepare and update the Construction Management Plan; | 91020 |
| 10.1.1.2 | ensure that the D&C Activities are undertaken in accordance with: | 91021 |
| | (a) the approved Environmental Performance Requirements; | 91022 |
| | (b) BS 6164-2011: Health and Safety in Tunnelling; | 91023 |
| | (c) Safe Work Australia: Guide for Tunnelling Work (2013); | 91024 |
| | (d) AS 2601-2001: The demolition of structures; | 91025 |
| | (e) AS4349.1-2007: Inspection of Buildings; | 91026 |
| | (f) AS1742.3-2009: Traffic control devices for works on roads; | 91027 |
| | (g) Part 2 of the VicRoads Road Design Guidelines; | 91028 |
| | (h) in respect of the construction of all road, bus, cycle facilities and footpath construction, the applicable standards established by the relevant Authority; and | 91029 |
| | (i) all other Management Plans; | 91030 |
| | to the extent that items (a) to (i) relate to the D&C Activities; | 91031 |
| 10.1.1.3 | ensure that the D&C Activities are undertaken in consideration of the stakeholder requirements set out in Appendix C2; | 91032 |
| 10.1.1.4 | attend construction review meetings in accordance with section 10.5. | 91033 |
| 10.1.2 | Project Co must only utilise new tunnel boring machines (TBMs) to undertake the Works. | 91034 |
| | | 91035 |
| 10.2 | Working Hours | |
| 10.2.1 | The construction of the Works must be carried out to minimise impact on local businesses, institutions and the community and in accordance with the Environmental Requirements. | 91036 |
| 10.2.2 | Project Co must implement appropriate mitigation measures in order to ensure that the noise and vibration targets for particular time periods as set out in the EPRs are not exceeded. This may include the restriction of working hours during particular construction activities. | 91037 |
| | | 91038 |
| 10.3 | Notification of Incidents | |
| 10.3.1 | Notification | 91039 |
| | Project Co must notify the State of any incidents associated with or affecting the D&C Activities in accordance with the Project Agreement. | 91040 |
| 10.3.2 | Incident Details | 91041 |
| | All relevant details of any incident must be recorded (supported by photographs of the incident site including the location of all safety devices) as soon as possible after the incident. | 91042 |
| | | 91043 |
| 10.4 | Construction Documentation | |
| 10.4.1 | Construction Documentation for each Construction Package must include: | 91044 |
| 10.4.1.1 | the relevant IFC Design Documentation (both Permanent and Temporary Works); | 91045 |
| 10.4.1.2 | a schedule of Assets, Asset Components and Asset Sub-Components contained within that Construction Package; | 91046 |
| 10.4.1.3 | the planned sequence of work for the Construction Package; | 91047 |
| 10.4.1.4 | the program for the Construction Package; | 91048 |
| 10.4.1.5 | ITPs and Construction Procedures; | 91049 |
| 10.4.1.6 | relevant WTMPs; | 91050 |
| 10.4.1.7 | the SEIP, including a specific risk assessment for the Construction Package; | 91051 |
| 10.4.1.8 | a risk assessment for all high risk activities for the Construction Package; | 91052 |
| 10.4.1.9 | safety plans, including safety procedures required for any construction operations such | 91053 |

| | | |
|-------------|--|-------|
| | as lifting or trenching; and | |
| 10.4.1.10 | forecast construction impacts including noise, vibration, ground movement, ground water impact and other community impacts and proposed mitigation measures. | 91054 |
| 10.4.2 | A standard set of the ITPs and Construction Procedures required by the Reference Documents must be established and used for relevant construction activities. | 91055 |
| 10.4.3 | ITPs and Construction Procedures must include all Hold Points required by the relevant Reference Document, and must describe the process pursuant to which the Nominated Authority releases each Hold Point. | 91056 |
| 10.4.4 | Each Construction Procedure must describe: | 91057 |
| 10.4.4.1 | the scope of activities covered; | 91058 |
| 10.4.4.2 | the materials, plant and equipment to be used; | 91059 |
| 10.4.4.3 | the personnel required and their roles, responsibilities and required competencies; | 91060 |
| 10.4.4.4 | all induction requirements; | 91061 |
| 10.4.4.5 | all permit requirements; | 91062 |
| 10.4.4.6 | the ITPs to be used and quality assurance documentation to be completed; and | 91063 |
| 10.4.4.7 | the detailed construction procedures to be followed. | 91064 |
| 10.4.5 | Project Co must submit Construction Documentation which complies with section 10.4.1 to 10.4.4 for each Construction Package to the State and the Independent Reviewer in accordance with the Review Procedures. | 91065 |
| 10.4.6 | If required by the Independent Reviewer, Project Co must make available appropriate personnel to: | 91066 |
| 10.4.6.1 | explain the Construction Documentation; and | 91067 |
| 10.4.6.2 | provide such information regarding the Construction Documentation as the Independent Reviewer reasonably requests. | 91068 |
| 10.4.7 | Project Co must not proceed with the construction of any Construction Package until it has satisfied its obligations under the Review Procedures in relation to the relevant Construction Documentation. | 91069 |
| | | 91070 |
| 10.5 | Construction Review Meetings | |
| 10.5.1 | Construction review meetings must be held at least monthly, or as otherwise agreed by the Independent Reviewer and the State, throughout the D&C Phase to review: | 91071 |
| 10.5.1.1 | progress in submitting ITPs and Construction Procedures; | 91072 |
| 10.5.1.2 | progress in submitting Construction Documentation for each Construction Package; | 91073 |
| 10.5.1.3 | progress in closure of As-Built Records; | 91074 |
| 10.5.1.4 | progress in dealing with non-conformances and in rectification of Defects; | 91075 |
| 10.5.1.5 | any issues relating to safety; | 91076 |
| 10.5.1.6 | progress in completion and Handback of Returned Works; and | 91077 |
| 10.5.1.7 | a register of issues affecting construction progress and actions to resolve such issues. | 91078 |
| 10.5.2 | Construction review meetings must involve at least one representative from each of the State, Project Co, the D&C Subcontractor and the Independent Reviewer. | 91079 |
| | | 91080 |
| 10.6 | Sustainability Management | |
| 10.6.1 | Project Co must: | 91081 |
| 10.6.1.1 | source a minimum of 20% of energy from renewable sources for the construction phase through either: | 91082 |
| | (a) generation of onsite renewable energy; and/or | 91083 |
| | (b) use of alternative fuels; and/or | 91084 |
| | (c) purchase of renewable energy from an Australian Government accredited renewable energy supplier. | 91085 |
| 10.6.1.2 | demonstrate by the end of the construction phase a 15% reduction in materials lifecycle | 91086 |

| | | |
|-------------|---|--------|
| | impacts (measured through Enviropoints) below the base case of 1,235,000 Enviropoints in accordance with: | |
| | (a) ISCA Materials Lifecycle Impact Base Case; | 91087 |
| | (b) MMRA Materials Base Case and Reductions Model; and | 91088 |
| | (c) IS Materials Calculator Base Case; | 91089 |
| 10.6.1.3 | divert greater than 95% by volume of reusable topsoil and spoil (general fill), greater than 90% by volume of inert and non-hazardous waste and greater than 60% by volume of office waste from landfill; | 91090 |
| 10.6.1.4 | conserve 100% of all useable topsoil to be recycled as topsoil on the site or on a site within a reasonable distance; | 91091 |
| 10.6.1.5 | ensure that all soil reuse is approved by VicTrack (or the landowner), as per the VicTrack "Soil Reuse Guidelines PG-GL 004 V1"; | 91092 |
| 10.6.1.6 | minimise the use of potable water during construction; | 91093 |
| 10.6.1.7 | implement sustainability measures in relation to temporary site facilities as set out in section 10.8.5.1; | 91094 |
| 10.6.1.8 | provide a cost payback analysis of installing photovoltaic panels on large acoustic sheds and other construction site facilities; and | 91095 |
| 10.6.1.9 | consult with the University of Melbourne regarding reuse of trees removed as part of the works on University land, and provide handling, transport and storage of the timber to facilitate reuse by the University. | 150493 |
| | | 91096 |
| 10.7 | Site Investigation, Condition Surveys and Monitoring | |
| 10.7.1 | General | 91097 |
| | Without limiting any obligations imposed on Project Co by the Environmental Performance Requirements and Environmental Requirements, Project Co must: | 91098 |
| 10.7.1.1 | undertake all pre and post construction site investigations, property, land and condition surveys and ground and infrastructure condition surveys as required for the performance of the D&C Activities; and | 91099 |
| 10.7.1.2 | ensure that the Works, including Temporary Works, have and will have no material adverse impacts on any existing ground conditions or on the performance of any infrastructure, property or utility (including roads, parks and other publicly accessible areas, footpaths and cycleways, Utility Infrastructure, railways, buildings, bridges and other structures including MURL and CityLink). | 91100 |
| 10.7.2 | Condition Surveys | 91101 |
| 10.7.2.1 | Project Co must undertake condition surveys of existing ground, infrastructure, properties and utilities within the determined Potential Zone of Influence (unless it can be demonstrated to the satisfaction of the State that a condition survey is not required) in accordance with AS4349.1-2007. | 91102 |
| 10.7.2.2 | Condition surveys must be undertaken: | 91103 |
| | (a) prior to the commencement of and following the completion of the relevant part of the Works; | 91104 |
| | (b) for all assets that are reasonably accessible and within the Potential Zone of Influence of the D&C Activities, or other assets that may be affected by the D&C Activities unless otherwise agreed by the State; | 91105 |
| | (c) to accurately record the condition of EES Heritage Listed Places; and | 91106 |
| | (d) with the prior approval of the relevant property owner and/or occupier. | 91107 |
| 10.7.2.3 | Condition surveys must be forwarded to the owner of the asset, the State and the Independent Reviewer within 4 weeks of the condition survey being undertaken and prior to commencement of the relevant Works. | 91108 |
| 10.7.2.4 | Project Co must also make provision for resurvey immediately following a recorded exceedance. | 91109 |
| 10.7.2.5 | Where required by the CityLink Interface Deed, Project Co must undertake condition surveys in respect of CityLink. | 91110 |

| | | |
|----------|---|--------|
| 10.7.2.6 | Project Co must ensure that the condition surveys described in this section 10.7.2 are carried out by an independent and appropriately qualified and experienced assessor for the specific asset being surveyed. | 91111 |
| 10.7.2.7 | Project Co must consider any brief prepared by MATC in determining the survey methods to be used in preparing a condition report for St. Paul's Cathedral, and at least 20 Business Days prior to undertaking a condition report in respect of St. Paul's Cathedral, provide MATC with written details of the survey methods that are proposed to be used. At least 20 Business Days prior to finalising a condition report in respect of St. Paul's Cathedral, Project Co must provide the draft condition report to MATC for comment. | 137214 |
| 10.7.3 | Survey Control | 91112 |
| 10.7.3.1 | Prior to the commencement of any relevant Works, Project Co must undertake a baseline control survey to be established for the purposes of monitoring for: | 91113 |
| | (a) all areas susceptible to settlement, movement or deformation; and | 91114 |
| | (b) all works within the rail or tram reserves. | 91115 |
| 10.7.3.2 | Project Co must, as a minimum, establish and maintain permanent survey marks (PSMs) which tie into the Survey Control Network at the following locations: | 91116 |
| | (a) at all Station excavations; | 91117 |
| | (b) at all intervention shafts; | 91118 |
| | (c) at a maximum spacing of 200m along the Tunnels; and | 91119 |
| | (d) at all major construction zones. | 91129 |
| 10.7.3.3 | All survey and design levels must refer to the Survey Control Network, based upon MGA94 Zone 55 (GDA94) coordinate system and Australian Height Datum (AHD). | 91121 |
| 10.7.3.4 | Surveys undertaken by Project Co must: | 91122 |
| | (a) comply with the Requirements of the Surveying Act where appropriate, and the Surveying (Cadastral Surveys) Regulations; and | 91123 |
| | (b) adopt where appropriate guidelines from Intergovernmental Committee on Surveying and Mapping (ICSM) and the Office of Surveyor General Victoria (OSGV). | 91124 |
| 10.7.3.5 | Project Co must: | 91125 |
| | (a) liaise and coordinate with OSGV when establishing new PSMs; | 91126 |
| | (b) verify and validate all existing datasets including the established Survey Control Network prior to commencement of survey activities; | 91127 |
| | (c) avoid, where possible, disturbance of established Survey Control Network marks or registered OSGV survey marks and must re-establish any such marks disturbed or affected by the works, in accordance with the requirements of relevant Acts, Regulations and Authorities; and | 91128 |
| | (d) provide a copy of quality assurance processes and verification documentation to the State and Independent Reviewer upon request. | 91129 |
| 10.7.4 | Monitoring | 91130 |
| 10.7.4.1 | Project Co must prepare and update the Monitoring Management Plan. | 91131 |
| 10.7.4.2 | Project Co must undertake a detailed and rigorous engineering analysis (including numerical modelling) to determine the Predicted Effects of the Works and the Temporary Works over time on existing ground conditions, infrastructure, properties and utilities (including roads, parks and other publicly accessible areas, footpaths and cycleways, Utility Infrastructure, railways, buildings and other structures including MURL and CityLink). | 91132 |
| 10.7.4.3 | In determining the Predicted Effects, the detailed rigorous engineering analyses must, as a minimum, consider the effects of vertical and horizontal displacements, rotations, strain, shear, structural loads, vibration, noise, geological conditions and variations, seepage, and groundwater movement as well as potential variations or changes to the existing ground and infrastructure conditions. The Predicted Effects must include the limits of accuracy of the prediction and the expected statistical spread of measured results. | 91133 |
| 10.7.4.4 | Project Co must also determine the Acceptable Effects, which must be consistent with | 91134 |

| | | |
|-----------|--|--------|
| | satisfying the Environmental Requirements. | |
| 10.7.4.5 | Throughout the D&C Activities until the later of: | 91135 |
| | (a) Provisional Acceptance; or | 91136 |
| | (b) a time which is not less than 6 months after settlement has stabilised, | 91137 |
| | Project Co must monitor continuously over time the actual effects of the Works and the Temporary Works on the ground and groundwater conditions, infrastructure, properties and utilities and compare the actual effects to both the Predicted Effects and the Acceptable Effects. Continuous monitoring must be undertaken in critical areas. | 91138 |
| 10.7.4.6 | Monitoring of the actual effects of the Works and the Temporary Works on existing ground, infrastructure, properties and utilities must be undertaken by qualified and experienced geologists, geotechnical engineers, structural engineers, heritage specialists, noise and vibration specialists and environmental specialists (as applicable). | 91139 |
| 10.7.4.7 | In the event that the actual effects of the Works and the Temporary Works on the existing ground, infrastructure, properties and utilities exceed the Predicted Effects or significantly vary over time, Project Co must: | 91140 |
| | (a) review and, if necessary, re-evaluate the Predicted Effects and make any adjustment subsequently necessary to any aspects of the manner in which the D&C Activities are undertaken to ensure that the Acceptable Effects are not exceeded; and | 91141 |
| | (b) undertake any remedial action necessary to ensure that the Acceptable Effects are not exceeded, | 91142 |
| | in order to ensure full compliance with the Environmental Requirements of the State Project Documents. | 94273 |
| 10.7.4.8 | Notwithstanding the Predicted Effects or the Acceptable Effects on infrastructure contemplated in this section, Project Co must repair and reinstate infrastructure and property at the earliest opportunity so that Project Co satisfies the Environmental Requirements and the State Project Documents. | 91143 |
| 10.7.4.9 | Project Co must promptly and progressively provide the State and the Independent Reviewer with: | 91144 |
| | (a) analysis and determinations, including the original Predicted Effects and any Acceptable Effects and any revisions, and re-evaluations of the Predicted Effects and the Acceptable Effects; | 91145 |
| | (b) results of monitoring the actual effects of the Works and the Temporary Works on the existing ground conditions, infrastructure and properties over time, in a form which is directly comparable to the Acceptable Effects and Predicted Effects; | 91146 |
| | (c) details of any adjustments to the manner in which Project Co's Works are carried out which are necessary as a consequence of any re-evaluation of Predicted Effects; and | 91147 |
| | (d) details of designs and materials for the repair and reinstatement of infrastructure and properties required by section 10.7.4.8. | 91148 |
| 10.7.4.10 | Project Co must submit, prior to the Date of Provisional Acceptance, a final updated report detailing the Predicted Effects, Acceptable Effects and actual effects of the Works on the existing ground and groundwater conditions, infrastructure, properties and utilities, and detailing the works undertaken in accordance with section 10.7.4.8. | 91149 |
| 10.7.4.11 | Project Co must undertake monitoring of the condition of St. Paul's Cathedral at a consistent or higher standard than previous monitoring performed as part of the Metro Tunnel works, and as adjusted or modified as appropriate to take into account the final Project design and its associated impacts on St. Paul's Cathedral. Where the results of ongoing monitoring suggest that there is a real risk of imminent or significant damage to any part of St. Paul's Cathedral, Project Co must notify MATC as soon as is reasonably practicable. | 137215 |

10.8 Site Management

10.8.1 Construction Site

| | | |
|----------|---|-------|
| 10.8.1.1 | The Construction Site must be kept in a safe and tidy condition at all times. | 91152 |
| 10.8.1.2 | Project Co must ensure that existing security measures such as locks, barriers and access detection are maintained or equivalent measures introduced to protect existing assets during construction. | 91153 |
| 10.8.1.3 | Waste collection facilities must be confined to the construction site and be accessible via access points which have been established in accordance with the requirements outlined in section 9. | 91154 |
| 10.8.2 | Roads | 91155 |
| | Subject to any maintenance plan agreed or directed under section 8.6.1, all Roads within the Construction Site must be: | 91156 |
| 10.8.2.1 | maintained and repaired until Handback to the relevant Returned Asset Owner; and | 91157 |
| 10.8.2.2 | maintained in accordance with the relevant Returned Asset Owner's road management plans (if any) and usual requirements. | 91158 |
| 10.8.3 | Maintenance Records | 91159 |
| 10.8.3.1 | Maintenance records must be maintained on site and must be available for review by the Independent Reviewer, any relevant Returned Asset Owner or the State. | 91160 |
| 10.8.3.2 | All maintenance and inspection records for the inspection and maintenance activities undertaken during the D&C Phase must be provided to the relevant Returned Asset Owner upon Handback of the Returned Works. | 91161 |
| 10.8.4 | Site Reinstatement | 91162 |
| 10.8.4.1 | Construction Sites, and any other land accessed for the purposes of carrying out any part of the Works, must be progressively reinstated in compliance with the EPRs (subject to the carrying out of the Works) as each part of the Works is completed, as a condition precedent to Handback, Provisional Acceptance or Final Acceptance (as applicable to that part of the Works). | 91163 |
| 10.8.4.2 | All temporary areas and other land accessed or used for the purpose of the D&C Activities, including storage and site facilities, must be reinstated to a condition at least equivalent to that existing prior to their occupation or use after Project Co has departed the land. | 91164 |
| 10.8.5 | Temporary Site Facilities | 91165 |
| 10.8.5.1 | Project Co must ensure that, where reasonable and feasible, any temporary site facilities provided by Project Co include: | 91166 |
| | (a) energy efficient lighting schemes and light fittings; | 91167 |
| | (b) plug-in electrical equipment which complies with the requirements of the Equipment Energy Efficiency Program (E3) "Minimum Energy Performance Standards" and has at least a five-star Energy Rating Label; | 91168 |
| | (c) high performance thermal insulation in all walls, ceilings and floors that optimise thermal performance; | 91169 |
| | (d) natural daylighting; | 91170 |
| | (e) natural ventilation; | 91171 |
| | (f) photovoltaic panels on construction site facilities, acoustic sheds or within the project footprint; | 91172 |
| | (g) rainwater harvesting; | 91173 |
| | (h) water efficient fixtures, fittings and controls; | 91174 |
| | (i) air conditioning refrigerants with low or zero global warming potential; and | 91175 |
| | (j) bicycle storage facilities, showers and changing room facilities. | 91176 |
| 10.8.5.2 | Project Co must consider CPTED principles in the design and construction of any temporary site facilities, hoardings and fencing. | 91177 |
| 10.8.6 | Construction Hoarding, Fencing and Acoustic Sheds | 91178 |
| 10.8.6.1 | General | 91179 |
| | (a) Project Co must ensure that hoarding, fencing or acoustic sheds installed as part of the Works are: | 91180 |
| | (1) designed with consideration of amenity impacts on adjacent properties | 91181 |

| | | |
|----------|---|--------|
| | including overshadowing; | |
| | (2) capable of being fitted with banners, signage and digital panels; | 91182 |
| | (3) developed as 'living or green structures' including, where feasible, interim vegetation in areas with community interfaces; and | 91183 |
| | (4) maintained and cleaned of graffiti, such that all graffiti is removed within two hours of being identified. | 91184 |
| | (b) Project Co must not place any signage, advertising or branding (other than as required by sections 10.8.6.3 and 10.8.6.4) on the external face of any hoarding, fence or acoustic shed without the prior written approval of the State. | 91185 |
| | (c) If the banners or signage are irreparably damaged, Project Co must install replacement banners or signage within 24 hours of the damage occurring. | 91186 |
| 10.8.6.2 | Hoarding and Fencing | 91187 |
| | (a) Project Co must ensure that hoarding, fencing or any other Site delineation device is compliant with the Urban Design Strategy and is: | 91188 |
| | (1) at least 2.4 metres high; | 91189 |
| | (2) able to screen the Site from view, with the capacity to incorporate viewing access if requested by the State; | 91190 |
| | (3) structurally sound and designed for wind loading; | 91191 |
| | (4) set to allow minimum runoff zone from any vertical transportation in the vicinity; | 91192 |
| | (5) able to protect the public when using the adjacent footpath; and | 91193 |
| | (6) constructed of recycled materials where feasible. | 91194 |
| | (b) Project Co must incorporate public viewing access into the Swanston St face of the City Square hoardings until such time as the City Square acoustic shed is constructed. Viewing access into the site must be provided via Perspex windows of adequate size and spacing to provide a clear view into the construction site, and unless otherwise agreed with the State, the external face of the hoardings must feature hoarding treatment in accordance with the preliminary design proposal prepared by the State. | 150495 |
| 10.8.6.3 | Signage | 91195 |
| | Project Co must provide, install and maintain: | 91196 |
| | (a) wayfinding signage to direct pedestrians, commuters and vehicles around the Construction Site; | 91197 |
| | (b) signage that provides the community with details of the Metro Tunnel Telephone Information Line and out of hours contact details for Project Co; | 91198 |
| | (c) safety signage; and | 91199 |
| | (d) other signage required to comply with the Law. | 91200 |
| 10.8.6.4 | Banners and Digital Panels | 91201 |
| | (a) Project Co must provide, install and maintain banners for the external faces of hoardings, fences and acoustic sheds (visible to the public) that are: | 91202 |
| | (1) produced in accordance with a design provided by the State; | 91203 |
| | (2) made from vinyl (where banners are installed at the locations of future Metro Tunnel stations) and shade cloth (where banners are installed at other locations); and | 91204 |
| | (3) printed in full colour. | 91205 |
| | (b) Project Co must supply and install large format digital panels on hoarding in or around the City Square, Franklin Street and Federation Square sites that is capable of displaying digital content to be provided by the State. | 91206 |
| | (c) Project Co must, every 12 months or as requested by the State, replace the existing banners for the external faces of fences, hoardings and acoustic sheds with new banners. | 91207 |
| 10.8.7 | Interim open space | 91208 |
| | 10.8.7.1 Project Co must provide temporary open space for public access adjacent to, or within | 91209 |

close proximity of, construction sites in the CBD North and CBD South Station Precincts. These sites:

- (a) should be opportunistically identified with public or private land managers; 91210
- (b) must be of a minimum size suitable for two standard bench seats; 91211
- (c) must include temporary vegetation such as large potted or relocatable trees; 91212
- (d) should be north facing where possible; and 91213
- (e) be clearly signed as available for public use. 91214
91215

10.9 Temporary Works

- 10.9.1 Project Co must undertake all necessary Temporary Works including: 91216
 - 10.9.1.1 temporary measures necessary to meet the needs of all road, public area and pathway users during the D&C Activities, including the requirements for any temporary footpaths, shared paths and public transport facilities if applicable; 91217
 - 10.9.1.2 temporary arrangements to divert and control traffic and to provide public amenity, security and safety during the D&C Activities; 91218
 - 10.9.1.3 temporary arrangements for people and vehicles to access all property affected by the D&C Activities; 91219
 - 10.9.1.4 demolition, clearing and associated decontamination; 91220
 - 10.9.1.5 all environmental safeguards and measures necessary to mitigate environmental effects during construction of the Works; 91221
 - 10.9.1.6 sustainability initiatives to minimise resource use during construction of the Temporary Works; 91222
 - 10.9.1.7 cleaning, maintenance, repair, replacement and reinstatement, as required, of all areas occupied by Project Co during construction of the Works; 91223
 - 10.9.1.8 temporary site facilities required for construction of the Works; and 91224
 - 10.9.1.9 temporary infrastructure installed or erected to undertake construction of the Works. 91225
- 10.9.2 Project Co must consider the impacts of imposed loads from plant and materials on existing infrastructure, including but not limited to the Federation Square deck and University Square carpark and agree on a methodology with the asset owner where this is unavoidable. 91226
- 10.9.3 Groundwater control measures must be developed and implemented as part of the temporary works to mitigate against adverse impacts on groundwater. The design of these elements, mitigation measures, management and the monitoring system must be based on a detailed hydrogeological impact assessment. 91227
- 10.9.4 Vertical clearance for Temporary Works 91228
 - Project Co must: 91229
 - 10.9.4.1 provide a minimum vertical clearance for all structures over roadways in accordance with Part 2 of the VicRoads Road Design Guidelines. Notwithstanding this, a temporary minimum clearance of 4.5 metres may be provided over roads during construction subject to the prior written approval of the State; 91230
 - 10.9.4.2 where the vertical clearance during construction is less than the specified design clearance in the VicRoads Road Design Guidelines, design, supply, erect and maintain temporary low clearance warning gauges in advance of the bridgeworks. The location, type and details of all low clearance warning gauges must comply with the requirements of AS 1742.3, taking into account the safety of bridge workers and other traffic, traffic volume, and types of vehicles using the road, and suitable detours for high vehicles. In addition, Project Co must provide bridge clearance signs in accordance with AS 1742.3; 91231
 - 10.9.4.3 submit details of the low clearance warning gauge proposal to the State in the relevant WTMP(s); and 91232
 - 10.9.4.4 remove low clearance warning gauges and bridge clearance signs at the earliest possible time after the completion of the relevant Works. Project Co must arrange and provide traffic management during erection and removal of the low clearance warning gauges. 91233

| | |
|--|-------|
| 10.10 Works affecting existing rail infrastructure | 91234 |
| 10.10.1 Project Co must: | 91235 |
| 10.10.1.1 ensure that access to critical railway infrastructure is maintained at all times during construction; | 91236 |
| 10.10.1.2 ensure that safe access and egress to existing stations and all services and infrastructure within existing stations, including platforms and vertical transport, is maintained for the duration of the Works unless otherwise agreed with the Train Franchisee. | 91237 |
| 10.10.1.3 provide safe alternative access to any existing assets impacted by the Works; | 91238 |
| 10.10.1.4 consult with the Train Franchisee regarding any temporary construction or laydown areas that will impact on the operational circulation of an existing station and model the potential impact of such activities; | 91239 |
| 10.10.1.5 in conjunction with the Train Franchisee, conduct risk assessments in relation to the impact of dust and noise on passengers and any impacts to fire and life safety assets or systems in existing stations as a result of the D&C Activities; | 91240 |
| 10.10.1.6 not alter any existing station fire and life safety assets without the express consent of the Train Franchisee; | 91241 |
| 10.10.1.7 ensure that existing fire egress routes are not altered or augmented without the express consent of the Train Franchisee; | 91242 |
| 10.10.1.8 be responsible for any electrical faults on circuits in existing metropolitan stations affected by the Works; | 91243 |
| 10.10.1.9 ensure that existing ICT/OCS functionality is maintained for the duration of the Works; | 91244 |
| 10.10.1.10 stage the Works in such a way that there is no loss of firefighting or detection functionality in existing stations while those stations are operational; | 91245 |
| 10.10.1.11 give consideration to utilising occupations planned by other works where track occupations are required; | 91246 |
| 10.10.1.12 consider impacts of imposed loads from plant and materials on existing rail infrastructure and agree on a methodology with the Rail Franchisee where this is unavoidable; | 91247 |
| 10.10.1.13 repair any damage to any rail infrastructure, road, footpath, bridge or other structure within the Train Franchisee leasehold as a result of the Works; | 91248 |
| 10.10.1.14 liaise with the Train Franchisee prior to the removal of any salvageable existing rail infrastructure and make any necessary arrangements for its relocation to the satisfaction of the Train Franchisee; | 91249 |
| 10.10.1.15 immediately report any hazard, incident or safety practice that may affect the Accreditation of the Train Franchisee to the State and the Train Franchisee, and provide any information reasonably required by the Train Franchisee in relation to the hazard, incident or safety practice; and | 91250 |
| 10.10.1.16 notify the Train Franchisee of any hazardous materials that may be disturbed that have the potential to impact on existing stations or Train Operations. | 91251 |
| 10.10.2 Any relocation or modification of existing Train Franchisee staff and station facilities must be undertaken in consultation with and to the satisfaction of the Train Franchisee. | 91252 |
| 10.10.3 Any access to the Train Franchisee's infrastructure lease must comply with the MTM Site Access Procedures L1-CCO-PRO-001. | 91253 |
| 10.11 Works affecting CityLink | 91254 |
| 10.11.1 Project Co must undertake the Project Activities in accordance with the Citylink Direct Interface Agreement. | 91255 |
| 10.12 Utility Infrastructure Works | 91256 |
| 10.12.1 General | 91257 |
| 10.12.1.1 Project Co must: | 91258 |

- (a) identify all the Utility Infrastructure (including overland flow paths) potentially affected by D&C Activities to determine requirements for adjustment, protection, support or relocation. This must be undertaken in consultation with the relevant Utility Infrastructure owner or Authority; 91259
 - (b) identify all Utility Infrastructure required for D&C Activities and must do all things necessary to provide and maintain connections to such Utility Infrastructure to the Works and the Temporary Works; 91260
 - (c) whether or not the existence or extent of the existing Utility Infrastructure was known prior to the date of the Agreement: 91261
 - (1) investigate, adjust, protect, support, relocate or provide for all Utility Infrastructure services that are affected by D&C Activities or required for D&C Activities and obtain acceptance from Utility Providers for such Works; and 91262
 - (2) ensure that all Utilities remain unimpeded in their function for the duration of the Works; 91263
 - (d) ensure that the supply of critical services, including the 450 diameter gas transmission main (Dandenong to West Melbourne), is not interrupted at any time during the Works; 91264
 - (e) ensure that Utility services to existing customers are maintained for the duration of the Works; 91265
 - (f) avoid unplanned disruptions to Utility Infrastructure services resulting from D&C Activities and ensure that planned disruptions are minimised. Project Co must advise all affected parties including local residents, businesses, and the State prior to any disruption of any Utility Infrastructure; 91266
 - (g) arrange, and where necessary design, and coordinate the relocation of all Utility Infrastructure affected by the Works and must ensure that the requirements of each Utility Infrastructure owner and Authority are met. Project Co must obtain the written approval and acceptance of all works to and around any Utility Infrastructure from the relevant Utility Infrastructure owner or Authority in accordance with the Agreement; 91267
 - (h) undertake the relocation of Utility Infrastructure in a manner so as to minimise the impact of pedestrian, tram and traffic diversions; 91268
 - (i) not undertake blasting within 20 metres of Utility Infrastructure, unless otherwise agreed with Utility Provider in advance of the commencement of the relevant Utility Infrastructure Works; and 91269
 - (j) inform the State of the status of the Utility Infrastructure owner or Authority arrangements and must provide sufficient notice to allow the State Representative to attend Utility Infrastructure owner or Authority meetings as may be required from time to time. 91270
- 10.12.1.2 Temporary relocations must be avoided, where possible. 91271
- 10.12.1.3 Permanent location markers must be provided as required by the relevant owner or Authority. As constructed details of the locations of Utility Infrastructure must be provided to the State and the Utility Provider on completion of each section of the Works. 91272
- 10.12.1.4 All Utility Infrastructure exposed to view as a consequence of D&C Activities must be protected in accordance with the requirements of the relevant Utility Infrastructure owner or Authority. 91273
- 10.12.1.5 Loading on third party assets, including as a result of new construction, vehicle movements and construction storage, must not exceed agreed limits. 91274
- 10.12.1.6 Project Co must limit vibration to a maximum of 20mm/s peak particle velocity as measured at all utility service assets, unless a specific requirement is otherwise agreed with the relevant Utility Provider in writing in advance of commencement of the relevant part of the Works. 91275
- 10.12.1.7 With the approval of the relevant Authorities, Project Co may abandon Utility Infrastructure, in which case any works to decommission and make safe the Utility Infrastructure must be to the satisfaction of the Authorities. 91276
- 10.12.1.8 Protection must be provided during the Works to not adversely impact existing assets in 91277

| | |
|--|-------|
| the vicinity. Protection supported by structural assessments must be provided against, but not be limited to, the following: | |
| (a) ground vibration; | 91278 |
| (b) vehicle and plant movements; | 91279 |
| (c) excavation; | 91280 |
| (d) access (operational and maintenance); and | 91281 |
| (e) temporary works. | 91282 |
| 10.12.1.9 Project Co must ensure that no damage is caused to the existing power assets in Laurens Street as part of the station construction or tunnelling (including grouting to start the TBM). | 91283 |
| 10.12.1.10 The performance of the Works must not prevent the safe operation and maintenance of existing assets. | 91284 |
| 10.12.1.11 All utility diversion works must consider the impact to the road surface where the road will not be resurfaced as part of the overall Works. | 91285 |
| 10.12.2 Drainage | 91286 |
| 10.12.2.1 Physical protection must be provided to all drainage assets delivered as part of the Works. | 91287 |
| 10.12.2.2 Existing drainage connections and irrigation services impacted by the Works through the Shrine of Remembrance must be reinstated to the satisfaction of the City of Melbourne. | 91288 |
| 10.12.3 Water Utility Infrastructure Works | 91289 |
| 10.12.3.1 All Utility Infrastructure within the Potential Zone of Influence must be reviewed for risk rating prior to the relevant part of the Works being undertaken and any requirement for renewal or protection identified. | 91290 |
| 10.12.3.2 Water assets must be adequately protected and monitored so that no deterioration from their current condition occurs as a result of the Works. This must be based on a risk assessment including for any works proposed over, under or within vicinity of water or sewer mains. | 91291 |
| 10.12.3.3 Continuity of all water supplies, including fire-fighting water supplies, must be provided to Royal Melbourne Hospital (RMH), Royal Women's Hospital (RWH), Victorian Comprehensive Cancer Centre (VCCC) and University of Melbourne (UoM) with all connections/hydrants to be identified. | 91292 |
| 10.12.3.4 Project Co must ensure that the critical '2 Star rating' (involving assurance of dual supplies and redundancy) to the RMH, RWH and VCCC is maintained at all times during the Works for any temporary or permanent relocation of City West Water assets. | 91293 |
| 10.12.3.5 Uninterrupted service must be provided to existing customers and for firefighting services despite any temporary water diversions. | 91294 |
| 10.12.3.6 Project Co must undertake all water main relocation works in periods of low demand (winter) unless otherwise agreed with City West Water. | 91295 |
| 10.12.3.7 Water supply quality and quantity to all water customers (domestic and emergency services) must be maintained during the Works. | 91296 |
| 10.12.3.8 Temporary and permanent relocation of water assets must maintain at a minimum the existing agreed water supply quality, quantity and pressure to all research and medical facilities including the RMH, RWH VCCC and RMIT such that no water is supplied to such facilities from "dead ends" and that they are not the last user on a water main. | 91297 |
| 10.12.3.9 Project Co must ensure all existing water connection points from the relocated City West Water assets to its customers are re-instated at current building connection points unless agreed by City West Water and the customer. | 91298 |
| 10.12.3.10 A risk assessment must be undertaken of City West Water's DN750Ø and DN450Ø distribution mains on Royal Parade when the Station design, construction methodology, topography, timing etc. is known to determine the extent of renewal of these mains, considering the consequences of failure during and post construction (especially of the DN450Ø which is an older cast iron main). This risk assessment will also inform the location of the online pressure / flow monitors (e.g. on-line acoustic monitoring for early | 91299 |

| | | |
|---|---|-------|
| | leak detection) and isolation valves required. | |
| 10.12.3.11 | Project Co must ensure that the structural and operational integrity of both the DN 750 Ø and 450Ø water mains running along Royal Parade and Elizabeth St are maintained at all times so that continuous supply is available always both to CBD and all local customers. | 91300 |
| 10.12.3.12 | Project Co must review and agree with City West Water the pipe sizing and network reconfiguration to ensure supply/fire service demand requirements and pressures are maintained to commercial customers (including to the Kensington station). The MFB must be notified and consulted to review the proposed fire management system. | 91301 |
| 10.12.3.13 | Project Co must liaise with City West Water to conduct a full planned shutdown to establish the number of properties connected at Childers St and south of the railway line and their demands/capacity and pressure requirements. | 91302 |
| 10.12.4 | Sewer Utility Infrastructure Works | 91303 |
| 10.12.4.1 | Asset condition surveys, using CCTV or other inspection methods, must be undertaken of the sections of the existing North Yarra Sewer Main and South Yarra Main Sewer and associated manholes impacted by the Works prior to, during and after construction of Works. | 91304 |
| 10.12.4.2 | Vibrations at the existing brick South Yarra Sewer Main must be limited to a maximum of 2mm/sec during construction. Where vibrations have the potential to exceed this threshold Project Co must submit the construction methodology to Melbourne Water for approval. | 91305 |
| 10.12.4.3 | Project Co must develop a decommissioning and dilapidation plan for the section of the South Yarra Main to be abandoned, including any manholes or ventilator shafts to be de-commissioned as part of the South Yarra Main Sewer diversion works (e.g. SYM15) as agreed with Melbourne Water. | 91306 |
| 10.12.4.4 | Pre and post construction asset condition assessments (CCTV or equivalent) of the potentially impacted section of the MEL in Flinders St must be undertaken to the satisfaction of City West Water. | 91307 |
| 10.12.4.5 | Project Co must coordinate any surveys required along the MEL potentially affected by both the Flinders Street Station interchange and Federation Square entry adit connection with City West Water to inform proposed protection or relocation options required as a result of the project. | 91308 |
| 10.12.4.6 | Project Co must confirm with City West Water impacts on MEL sewer resulting from the design of the Flinders Street Station interchange and Federation Square entry and agree on appropriate protection or relocation of MEL as part of its works. | 91309 |
| 10.12.4.7 | Protection must be provided to the existing MEL and the new replaced/relocated section of the MEL during all phases of the Utility Infrastructure relocation works as agreed with City West Water. | 91310 |
| 10.12.4.8 | Project Co must confirm with City West Water the flow monitoring requirements along the MEL sewer line. | 91311 |
| | | 91312 |
| 10.13 Particular location requirements | | |
| 10.13.1 | General | 91313 |
| 10.13.1.1 | The Works must be undertaken to accommodate the specific stakeholder considerations as set out in Appendix C2 so far as is reasonably practicable. | 91314 |
| 10.13.2 | Arden | 91315 |
| 10.13.2.1 | Any aspect of construction which will result in a permanent impact on the land licenced from VicTrack must be agreed to by VicTrack (e.g. easements for the power conduits). | 94310 |
| 10.13.2.2 | Project Co must coordinate with Brookfield and VicTrack for any issues relating to neighbouring tenants. | 91316 |
| 10.13.3 | Parkville | 91317 |
| 10.13.3.1 | The Works must not adversely affect air quality by disrupting soil and releasing aspergillus spores, which may enter hospitals via air intakes and cause infection in patients. | 91318 |

| | | |
|-----------|--|-------|
| 10.13.3.2 | Project Co must ensure that air ambulance access to the helipad on RMH roof is maintained at all times. | 91319 |
| 10.13.3.3 | Project Co must coordinate its construction activities with the Graduate Union of the University of Melbourne and the Works must not adversely impact the redevelopment of Graduate House. | 91320 |
| 10.13.3.4 | The Sculpture in front of Tri-radiate Building on Grattan Street must be removed and stored at the University of Melbourne during construction. | 91321 |
| 10.13.4 | CBD North | 91322 |
| 10.13.4.1 | The Works must not disturb the forecourt or gardens outside the State Library. | 91323 |
| 10.13.4.2 | Project Co must, in consultation with RMIT, develop a detailed delivery and servicing strategy for RMIT owned buildings and tenants including the Oxford Scholar, Swanston Academic Building retail spaces, New Academic Street retail spaces, all buildings fronting Swanston Street (Buildings 22, 16, 8, 10, 12, 14, 39, 80, 18, 37) and Franklin Street (Buildings 9, 14, 39, 49). | 91324 |
| 10.13.4.3 | Project Co must identify and maintain a register of noise and vibration sensitive equipment within the RMIT city campus. This register must include monitoring measures to ensure equipment operation is not impacted without prior agreement with RMIT. | 91325 |
| 10.13.5 | CBD South | 91326 |
| 10.13.5.1 | Project Co must identify in consultation with City of Melbourne and Victoria Police alternative parking for police vehicles at CBD South Station in vicinity of Melbourne East police station. | 91327 |
| 10.13.6 | Domain | 91328 |
| 10.13.6.1 | Works within the Shrine of Remembrance land must be performed in a manner that is sensitive to the need to retain all existing trees. Any proposed Works in this area must be located outside of the Tree Protection Zone; | 91329 |
| 10.13.6.2 | Throughout the D&C Activities Project Co must continue to ensure that impact on the Shrine and its associated infrastructure located within the reserve within proximity to the construction site (including memorials, trees, plaques, furniture and paths/roadways) is eliminated or minimised. | 91330 |
| 10.13.6.3 | There must be respectful awareness of various commemoration days throughout the year and construction activities must be organised so as to minimise disruption on any ceremonial proceedings. All works are to be suspended on ANZAC day and Remembrance Day. The site must be tidied/prepared accordingly for such events. | 91331 |
| 10.13.6.4 | Project Co must minimise the use of public parking surrounding the Shrine precinct including Domain Road, Dallas Brooks Drive, Birdwood Ave. Sufficient coach access is to be provided along Birdwood Ave during business hours. This is particularly important during ceremonial events. | 91332 |
| 10.13.6.5 | Construction activities must respect the sensitivities associated with the Cobbers Memorial Statue and the people that regularly visit it. Construction work must not take place during the Battle of Fromelles ceremony. | 91333 |
| 10.13.6.6 | Pedestrian access along both sides of St Kilda Rd and Domain Rd are to be maintained where possible. Pedestrian access to the Cobbers Statue and MacPherson Robertson fountain must be maintained. | 91334 |
| 10.13.6.7 | Project Co must comply with the Victoria Barracks security procedures in the Victoria Barracks precinct. | 91335 |

| | | |
|----------|---|-------|
| 11 | Transition and Acceptance Requirements | 91336 |
| 11.1 | Testing and Commissioning | 91337 |
| 11.1.1 | Project Co must: | 91338 |
| 11.1.1.1 | prepare and update the Testing and Commissioning Management Plan; | 91339 |
| 11.1.1.2 | undertake testing and commissioning activities as set out in the Testing and Commissioning Management Plan and the Final Acceptance Schedule; | 91340 |
| 11.1.1.3 | in respect of Returned Train Works: | 91341 |
| | (a) actively participate in the JCC Systems Integration Team (SIT) established as a subcommittee to the Joint Coordination Committee (JCC); and | 91342 |
| | (b) undertake testing and commissioning activities, or support other parties to the JCC in undertaking such activities, as set out in section 11.1.4 or as otherwise required in order to support operational readiness, acceptance and Handback of Returned Train Works; | 91343 |
| 11.1.1.4 | prepare testing and commissioning records in accordance with section 11.1.5; and | 91344 |
| 11.1.1.5 | carry out its testing and commissioning activities in a structured manner to ensure a logical and efficient progression through the testing and commissioning activities. | 91345 |
| 11.1.2 | Testing and commissioning must: | 91346 |
| 11.1.2.1 | be carried out and comply with the requirements of this section, the Construction Management Plan and the Testing and Commissioning Management Plan; and | 91347 |
| 11.1.2.2 | be documented with the performance results clearly recorded by the appropriate personnel against the design requirements and documentation. | 91348 |
| 11.1.3 | When specific tests do not form part of the Works, these must be identified and reasons for exclusion clearly recorded in the testing and commissioning documentation. | 91349 |
| 11.1.4 | System integration and testing hierarchy | 91350 |
| 11.1.4.1 | Project Co must: | 91351 |
| | (a) in respect of the Works, perform and pass: | 91352 |
| | (1) all Level 0 Systems Integration; | 91353 |
| | (2) all Level 1 Systems Integration; and | 91354 |
| | (3) all Level 2 Systems Integration; | 91355 |
| | (b) for all Relevant Infrastructure other than the Rail Systems Assets, perform and pass: | 91356 |
| | (1) all Level 3 Systems Integration; and | 91357 |
| | (2) all Level 4 Systems Integration; | 91358 |
| | (c) in respect of the Rail Systems Assets, provide support to enable the RSA to perform and pass: | 91359 |
| | (1) all Level 3 Systems Integration; and | 91360 |
| | (2) all Level 4 Systems Integration; and | 91361 |
| | (d) undertake any other work or testings as directed by the SIT and as required to enable transition of the system to operational readiness. | 91362 |
| 11.1.5 | Testing and commissioning records | 91363 |
| 11.1.5.1 | Project Co must maintain up to date and marked up testing records for the duration of the testing and commissioning activities. | 91364 |
| 11.1.5.2 | Testing and commissioning records must be made available to the State and the Independent Reviewer in accordance with section 1.3 and must include: | 91365 |
| | (a) Work Lot registers which must: | 91366 |
| | (1) provide access to all checklists, test reports, test certificates, as-built survey certificates or other quality assurance documentation required by the Quality Management Plan and ITPs; and | 91367 |
| | (2) identify for each Work Lot: | 91368 |

| | | |
|-------------|---|-------|
| | (i) location and Asset (including Asset Components and Asset-Sub Components); | 91369 |
| | (ii) quantities and sources of materials; | 91370 |
| | (iii) details to enable tracing of test samples; and | 91371 |
| | (iv) sampling frequency compared to specified testing frequency; | 91372 |
| | (b) registers of sampling and testing which enable identification of all test requisitions for each Work Lot and the date and reference number of corresponding test reports; | 91373 |
| | (c) Road Safety Audit reports; | 91374 |
| | (d) commissioning reports verifying compliance with: | 91375 |
| | (1) ride quality requirements; | 91376 |
| | (2) rolling stock noise amelioration requirements; and | 91377 |
| | (3) any mechanical and electrical systems requirements; and | 91378 |
| | (e) as-built survey certificates, which must be certified by a qualified surveyor and which must compare the as-built survey with the design geometry and identify any non-conformances. | 91379 |
| 11.1.6 | Testing of off-site equipment | 91380 |
| 11.1.6.1 | Off-site manufactured equipment must be tested at the point of manufacture prior to delivery (wherever this is practical) and further on site tests carried out during commissioning. | 91381 |
| 11.1.6.2 | Testing of off-site equipment or subsystems must comply with the Testing and Commissioning requirements as well as the Testing and Commissioning Management Plan. | 91382 |
| 11.1.6.3 | Testing of off-site equipment must be completed in a timely manner such that its acceptance does not directly or indirectly affect other deliverables. | 91383 |
| 11.1.7 | Non-conformance and Defects | 91384 |
| 11.1.7.1 | The State and the Independent Reviewer must be promptly notified of any non-conformance or Defect identified by testing and commissioning. | 91385 |
| 11.1.7.2 | Non-conformances or Defects identified by testing and commissioning must be recorded in the Defects List as set out in section 1.3.9. | 91386 |
| | | 91387 |
| 11.2 | Handback | |
| 11.2.1 | Handback Documentation | 91388 |
| 11.2.1.1 | Project Co must provide Handback Documentation for each Returned Asset or group of Returned Assets that contains the key information required by the State or the Returned Asset Owner to operate, maintain or repair the relevant Returned Asset. | 91389 |
| 11.2.1.2 | As a minimum, the Handback Documentation for each Returned Asset must include: | 91390 |
| | (a) records, documentation and other information required under the Agreement (including in the form and/or manner in which they are required to be prepared, updated and stored under the Agreement), including the As-Built Records, Construction Documentation and Construction Records; | 91391 |
| | (b) records relevant to compliance with the requirements of all Laws and Authorities; | 91392 |
| | (c) copies of all correspondence with all relevant Authorities and Key Subcontractors in relation to Approvals; | 91393 |
| | (d) a register of all compliance inspections, audits, details of any non-compliance and rectification actions taken or outstanding; | 91394 |
| | (e) evidence of satisfaction of all requirements (including clearances, declarations and certificates) required by Stakeholders (whether under the Agreement or otherwise) in relation to the Works; | 91395 |
| | (f) ITPs to the satisfaction of the State and Independent Reviewer (including those inspections and tests required at Provisional Acceptance), demonstrating compliance to the State Project Documents including evidence that the inspections, test results and audits are in accordance with the Agreement; | 91396 |

| | | |
|----------|---|-------|
| (g) | evidence that all tests (including the tests set out in the Completion Schedule, the Final Acceptance Schedule and the Testing and Commissioning Management Plan) have been passed in accordance with the Agreement; | 91397 |
| (h) | evidence that all incident reports have been closed out; | 91398 |
| (i) | documents and details proving that all waste materials have been removed from Site and disposed of in an accordance with the State Project Documents; | 91399 |
| (j) | copies of all structural design calculation documentation for each item of Returned Works; | 91400 |
| (k) | all manufacturers' and trade warranties required by the Agreement; | 91401 |
| (l) | copies of all Regulatory Requirements required by the Agreement including evidence of compliance with the State's Regulatory Requirements; | 91402 |
| (m) | details of all non-conformances that have been resolved; | 91403 |
| (n) | the program to correct the Defects on the Punch List along with contact details for the person who will responsible for the correction of the Defects; | 91404 |
| (o) | regular works inspection scope, staff resources and schedule to be carried out during the Defects Liability Period; | 91405 |
| (p) | the details of any claims that are not finally resolved; | 91406 |
| (q) | the Health and Safety Completion Report as set out in section 11.2.2; | 91407 |
| (r) | certification from each of Project Co's design consultants stating that Project Co's Documents submitted by Project Co to the State and Independent Reviewer comply with the requirements of the Agreement; | 91408 |
| (s) | certification from Project Co (in a form acceptable to the State and Independent Reviewer) that the Works have been executed in accordance with the IFC Design Documentation; | 91409 |
| (t) | certification from a licensed surveyor to the effect that the Returned Asset is within the boundaries required by the Agreement and that the structural elements of the Returned Asset are within the spatial tolerances specified in the Agreement in locations where the Returned Asset is within 2m of the boundary; | 91410 |
| (u) | a Site Condition Report that demonstrates that the Site is at least in as good condition as identified in the condition survey, prepared under section 10.7.2, with the exception of the Returned Asset; and | 91411 |
| (v) | all other information which, in the opinion of the State and Independent Reviewer, is reasonably necessary for the operation, use and maintenance of the Returned Asset. | 91412 |
| 11.2.1.3 | In addition to the Handback Documentation required to be provided for Returned Assets under section 11.2.1.2, the Handback Documentation for Returned Train Works, Returned VicTrack Works and Returned Tram Works must also include: | 91413 |
| (a) | Rail O&M Manuals and any other relevant O&M Manuals in accordance with the requirements of the State Project Documents; | 91414 |
| (b) | maintenance requirements for each trackform supported by documentation showing the basis for these requirements; | 91415 |
| (c) | delivery of all the receipts and documents confirming the provision of Spare Parts ordered in accordance with the Agreement; | 91416 |
| (d) | evidence of compliance with all Project Co's obligations in respect of the Rail Safety National Law (RSNL); | 91417 |
| (e) | asset data associated with changes to rail asset configuration in accordance with the current version of the PTV Infrastructure Drafting Standards and the PTV PASS Assets Data Requirements; | 91418 |
| (f) | a register of all system, sub-system and enabling and supporting system faults, the outcome of the fault investigation, fault root-cause and measures taken to rectify the fault; | 91419 |
| (g) | all documentation which is required to support an amendment to a Safety Management System in accordance with the RSNL; | 91420 |
| (h) | a certificate from Project Co which states that any regulatory reviews required of the Safety Management System have been satisfactorily completed; and | 91421 |
| (i) | any other documentation necessary to demonstrate compliance with the RTO's | 91422 |

Safety Management System and the State Project Documents.

| | | |
|----------|--|-------|
| 11.2.2 | Health and Safety Completion Report | 91423 |
| | Project Co must prepare and provide to the State and the Independent Reviewer for review a Health and Safety Completion Report that includes, as a minimum, the following: | 91424 |
| 11.2.2.1 | a final copy of Project Co's risk register (safety) and any other documentation that details any residual risks to Health and Safety in connection with the Works; | 91425 |
| 11.2.2.2 | a summary of the safety information in the monthly Health and Safety Performance Report in accordance with section 6.1.5.2 across the life of the Works; and | 91426 |
| 11.2.2.3 | details of any health and safety innovations or initiatives implemented in connection with the Works. | 91427 |
| 11.2.3 | Training Schedule | 91428 |
| 11.2.3.1 | Project Co must develop and implement a Training Schedule relevant for station staff, station controllers, train operators, train control operators, maintainers and other appropriate end users whose role is determined to be impacted by the Works. | 91429 |
| 11.2.3.2 | The Training Schedule must include each of the training modules and proposed programs for the following 12 month period to meet the obligations of the Agreement. | 91430 |
| 11.2.3.3 | Project Co must review and update the Training Schedule on an ongoing basis throughout the Term to ensure that training needs comply with its obligations under the Agreement. | 91431 |
| 11.2.3.4 | Project Co must submit the Training Schedule for review in accordance with the Review Procedures. | 91432 |
| 11.2.3.5 | In relation to fire and life safety assets, Project Co must: | 91433 |
| | (a) liaise with the Train Franchisee to develop operating procedures to be implemented in the event of a fire and/or other emergency; | 91434 |
| | (b) provide comprehensive training to operations and maintenance staff in the operation, maintenance and testing of all installed fire and life safety systems in advance of Handback. The training must be supported by complete operational, maintenance and testing documentation and schedules; and | 91435 |
| | (c) develop training requirements to ensure that Train Franchisee and MFB personnel are appropriately trained in relation to: | 91436 |
| | (1) the operational requirements for the fire and life safety systems; | 91437 |
| | (2) the implementation of emergency response procedures in line with the Emergency Risk Management Plan; and | 91438 |
| | (3) the communication protocol and requirements in the event of a fire in the Tunnel or Stations. | 91439 |
| 11.2.4 | Spares, special tools and equipment | 91440 |
| | Project Co must provide all spares, special tools and equipment for Returned Assets (at Handback) as required by the respective standards and specifications under which these assets are designed and constructed in accordance with Annexure 3, sections 3.7.4(e) and (f). | 91441 |
| 11.2.5 | Tunnel cleaning methodology | 91442 |
| | Project Co must provide a detailed methodology for the periodic cleaning of the linings of Tunnels, shafts and cross passages identifying the applicable processes, frequencies, equipment and chemicals that may be applied without adversely impacting the Tunnels, shafts and cross passages or any equipment contained therein. The methodology must include case studies where the proposed processes have been successfully applied in similar environments. | 91443 |

| | | |
|-------------|--|-------|
| 12 | Rail Safety Accreditation | 91444 |
| 12.1 | General | 91445 |
| 12.1.1 | Project Co must develop, implement and maintain a Rail Safety Accreditation Plan which identifies how Project Co will comply with the rail safety requirements of the Agreement. | 91446 |
| 12.2 | Accreditation | 91447 |
| 12.2.1 | Throughout the D&C Phase Project Co must, prior to carrying out any work arising under or in connection with Works for which Accreditation is required by the Rail Safety National Law (RSNL), hold and maintain Accreditation or carry out Works under the effective management and control of a Key Subcontractor that is an accredited Rail Transport Operator (RTO). | 91448 |
| 12.2.2 | Project Co must provide the State with copies of communications between Project Co and ONRSR in relation to Accreditation and the RSNL. | 91449 |
| 12.3 | Returned Train Works | 91450 |
| 12.3.1 | Project Co must: | 91451 |
| 12.3.1.1 | identify and provide justification for any design variances to engineering and technical standards applicable to the Works (including those which form part of a RTO's Safety Management System), to enable the RTOs to assess such variances in accordance with their Management of Change Process. Project Co will be responsible for obtaining agreement from relevant RTOs for any proposed design variances to standards or technical standards as part of the Works prior to incorporating into the Works; | 91452 |
| 12.3.1.2 | develop, implement and seek review from affected RTOs in respect of processes, procedures and records, to demonstrate the effective management of Project Co's rail safety obligations; | 91453 |
| 12.3.1.3 | if requested by the State, provide information in a format acceptable to affected RTOs, that clearly identifies the changes arising out of the Works, including (without limitation) design, construction, testing, commissioning, operations and maintenance; | 91454 |
| 12.3.1.4 | participate in any required risk assessments associated with the RTO's Management of Change Process in relation to the Works; | 91455 |
| 12.3.1.5 | provide all necessary information to assist all affected RTOs in the carrying out of their Management of Change Process to manage the changes arising out of the Works; | 91456 |
| 12.3.1.6 | provide all necessary information to assist all affected RTOs in the development of any necessary applications for variation of Accreditation or any notifications; | 91457 |
| 12.3.1.7 | prepare all relevant Type Approval information to a level of detail and format acceptable by the affected RTOs (including as required by the relevant RTO) for any types of infrastructure not currently Type- Approved by the relevant RTO. Project Co will be responsible for obtaining Type Approval for any part of the Works prior to incorporation into the Works; | 91458 |
| 12.3.1.8 | provide all necessary information to assist all affected RTOs in the preparation of any new, or the alteration of any existing, Safety Interface Agreements (as described in the RSNL); and | 91459 |
| 12.3.1.9 | provide all affected RTOs with any information requested for the purposes of updating their asset registers. | 91460 |

13 [Not disclosed]

Annexure 1 Management Plans

91503

Table Ann- 1: Submission and updating requirements for Management Plans

91504

| Name of Management Plan | Time for Submission | Period during which Project Co must provide updates | Update Interval |
|---|---|---|-----------------|
| Project Management Plans | | | |
| Strategic Management Plan | On or before Financial Close. | From initial submission until the end of the D&C Phase. | 6 monthly |
| Project Management Plan | On or before Financial Close. | From initial submission until the end of the D&C Phase. | 6 monthly |
| Quality Management Plan | On or before Financial Close. | From initial submission until the end of the D&C Phase. | 6 monthly |
| Risk Management Plan | On or before Financial Close. | From initial submission until the end of the D&C Phase. | 6 monthly |
| PPP Interface Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Workforce Development and Training Management Plan | Within 30 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Social Procurement Management Plan | Within 30 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Industrial Relations Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Information Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Digital Engineering Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Knowledge Management Plan | Within 120 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Competency Management Plan | Within 30 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Systems Engineering and Assurance Management Plans | | | |
| Systems Engineering Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Configuration Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Requirements Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Verification & Validation Management Plan | Within 20 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Systems Assurance Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| System Safety Management Plan | Within 20 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| RAM Management Plan | Within 20 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |

91505

91506

91507

| Name of Management Plan | Time for Submission | Period during which Project Co must provide updates | Update Interval |
|--|--|---|-----------------|
| System Integration Management Plan | Within 20 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Human Factors Management Plan | Within 20 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Environmental Management Plans | | | |
| Construction Environmental Management Plan | On or before Financial Close. | From initial submission until the end of the D&C Phase. | 6 monthly |
| Site Environment Implementation Plan | At least 30 Business Days prior to the commencement of Works at the relevant Site. | From initial submission until the date that all of the relevant Returned Assets have achieved Handback. | 6 monthly |
| Urban Design Management Plan | Within 40 Business Days after Financial Close. | From initial submission until the Date of Provisional Acceptance. | 6 monthly |
| Noise and Vibration Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Sustainability Management Plan | | | |
| Sustainability Management Plan | Within 20 Business Days after Financial Close | From initial submission until the Date of Provisional Acceptance. | 6 monthly |
| Communications & Stakeholder Engagement Management Plan Management Plan | | | |
| Communications and Stakeholder Engagement Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Health and Safety Management Plan | | | |
| Health and Safety Management Plan | On or before Financial Close. | From initial submission until the end of the D&C Phase. | 6 monthly |
| Emergency Response and Incident Management Plan | On or before Financial Close. | From initial submission until the end of the D&C Phase. | 6 monthly |
| Design Management Plan | | | |
| Design Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Electromagnetic Compatibility Management Plan | Within 60 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Transport Management Plans | | | |
| Transport Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Traffic Management Plans | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Worksite Traffic Management Plans | At least 30 Business Days prior to the commencement of Works at the relevant Site. | From initial submission until the date that all of the relevant Returned Assets have achieved Handback. | 6 monthly |

| Name of Management Plan | Time for Submission | Period during which Project Co must provide updates | Update Interval |
|---|--|---|-----------------|
| Construction Management Plans | | | |
| Construction Management Plan | On or before Financial Close. | From initial submission until the end of the D&C Phase. | 6 monthly |
| Mobilisation Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Spoil Management Plan | On or before Financial Close. | From initial submission until the Date of Provisional Acceptance. | 6 monthly |
| Monitoring Management Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Demolition Management Plan | Within 20 Business Days after Financial Close. | From initial submission until the Date of Provisional Acceptance. | 6 monthly |
| Rail Access Management Plan | Within 20 Business Days after Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Completion and Commissioning Management Plan | | | |
| Testing and Commissioning Management Plan | At least 12 months prior to the commencement of Level 1 System Integration activities. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Handback Management Plan | At least 24 months prior to the first Handback. | From initial submission until the Date of Final Acceptance. | 6 monthly |
| Rail Safety Accreditation Plan | | | |
| Rail Safety Accreditation Plan | On or before Financial Close. | From initial submission until the Date of Final Acceptance. | 6 monthly |

Annexure 2 Project Management Plans 91508

2.1 Strategic Management Plan 91509

- 2.1.1 Project Co must develop, implement and maintain a Strategic Management Plan which identifies how Project Co intends to manage the Works and details Project Co's key relationships over both the D&C Phase and Maintenance Phase. 91510
- 2.1.2 The key purpose of the Strategic Management Plan is to: 91511
- (a) describe Project Co's overall vision and management approach; and 91512
 - (b) demonstrate how the project objectives will be achieved. 91513
- 2.1.3 The Strategic Management Plan must, as a minimum, address the following items: 91514
- (a) executive summary; 91515
 - (b) vision for the Project; 91516
 - (c) partnering and working relationships; 91517
 - (d) management approach and key initiatives; 91518
 - (e) management team and structure; 91519
 - (f) key entities; 91520
 - (g) management (project) plans and systems including the Management Plans and any plans required by the Environmental Management Plans or Approvals; and 91521
 - (h) key activities. 91522
- 2.1.4 The executive summary must provide a concise summary of the Strategic Management Plan's key features that covers: 91523
- (a) the D&C Phase; 91524
 - (b) the integration and commissioning phase; 91525
 - (c) the transition to Maintenance Phase; and 91526
 - (d) the Maintenance Phase. 91527
- 2.1.5 The vision statement must outline Project Co's overall vision for the Project and commitments that demonstrate how: 91528
- (a) the vision is to be delivered; and 91529
 - (b) the project objectives will be achieved. 91530
- 2.1.6 The partnering and working relationships component of the Strategic Management Plan must include: 91531
- (a) a statement of partnering that incorporates the following four elements: role clarity, commitment, trust and culture. The statement must include details on both the D&C Phase and Maintenance Phase with particular emphasis on: 91532
 - (1) how Project Co will work in a partnering relationship with the State particularly in the areas of service delivery, customer satisfaction and transport planning; 91533
 - (2) how Project Co will work cooperatively with other public transport providers, regulators, the community and other stakeholders; and 91534
 - (3) the proposed approach to create and deliver sustained value; 91535
 - (b) a statement of how Project Co will manage working relationships with and between the Key Subcontractors and Material Subcontractors during both the D&C Phase and Maintenance Phase; 91536
 - (c) a description of initiatives that are to be implemented to promote partnering and good working relationships during: 91537
 - (1) both the D&C Phase and Maintenance Phase generally; and 91538
 - (2) the period up to one year after the next update of the Strategic Management Plan is due; and 91539

| | | |
|--------|--|-------|
| | (d) where applicable, cross references to the PPP Interface Management Plan. | 91540 |
| 2.1.7 | The management approach and key initiatives component of the Strategic Management Plan must: | 91541 |
| | (a) detail the overall management strategies and integrated approach to: | 91542 |
| | (1) key systems and processes, including third party accreditations; | 91543 |
| | (2) responding to the requirements of the RSNL and any associated regulations; and | 91544 |
| | (3) any integrated management systems; | 91545 |
| | (b) outline the approach to ensure the delivery of whole-of-life outcomes; | 91546 |
| | (c) outline the initiatives that will be implemented to ensure high quality outcomes during the: | 91547 |
| | (1) D&C Phase; | 91548 |
| | (2) initial 12 months of operation post Final Acceptance; | 91549 |
| | (3) first five years of operation post Final Acceptance; and | 91550 |
| | (4) remainder of the Term; | 91551 |
| | (d) outline how future proofing is being addressed; and | 91552 |
| | (e) outline the approach to asset management. | 91553 |
| 2.1.8 | The management team and structure component of the Strategic Management Plan must: | 91554 |
| | (a) provide the overall senior (executive) management personnel and organisation structures for the D&C Phase, transition from the D&C Phase to the Maintenance Phase, and the Maintenance Phase, including: | 91555 |
| | (1) key personnel; | 91556 |
| | (2) overall senior management personnel and reporting structure within Project Co and the Key Subcontractors and Material Subcontractors; and | 91557 |
| | (3) interfaces with the management teams associated with implementing the Project Activities, including those covered by other Management Plans; | 91558 |
| | (b) identify any changes planned to the structures or senior management personnel in the period up until the next scheduled Strategic Management Plan update; | 91559 |
| | (c) provide a strategy and nominated resource pool, including from within the Key Subcontractors and Material Subcontractors, for supplementing or replacing the key personnel in the event that particular individuals are no longer available; and | 91560 |
| | (d) incorporate CVs of the personnel nominated for each role identified as an attachment to the Strategic Management Plan; and | 91561 |
| | (e) incorporate role descriptions for each position in the management team structure as an attachment to the Strategic Management Plan and identifying the: | 91562 |
| | (1) responsibilities; | 91563 |
| | (2) levels of authority; and | 91564 |
| | (3) necessary qualifications, skills and experience. | 91565 |
| 2.1.9 | The key entities component of the Strategic Management Plan must: | 91566 |
| | (a) identify key entities (including Key Subcontractors and Material Subcontractors) responsible for each major activity during the D&C Phase and the Maintenance Phase; and | 91567 |
| | (b) outline for each entity the: | 91568 |
| | (1) scope of work; | 91569 |
| | (2) contracting relationship through to Project Co; and | 91570 |
| | (3) period of the contract. | 91571 |
| 2.1.10 | The management systems, processes and plans component of the Strategic Management Plan must provide: | 91572 |
| | (a) a description of the overall strategy for management systems, processes and plans, including their purpose; | 91573 |

| | | |
|------------|---|-------|
| | (b) a description of the processes for establishing, integrating and maintaining all management systems, processes and plans; | 91574 |
| | (c) the structure showing all the Management Plans and demonstrating how each interfaces with, or relates to, the other Management Plans, including the Strategic Management Plan; | 91575 |
| | (d) a cross referencing plan that identifies the relationship between the proposed Management Plans. This must identify where the requirements of the Management Plans will be fulfilled; | 91576 |
| | (e) for each proposed Management Plan that differs from the Management Plans, a summary that outlines: | 91577 |
| | (1) the plan's purpose; | 91578 |
| | (2) the plan's content, including any content additional to that required by the PS&TR; | 91579 |
| | (3) the key resources to be applied in developing and implementing the plan; and | 91580 |
| | (4) other information that Project Co considers relevant; | 91581 |
| | (f) a structure and description of all management systems and processes that clearly demonstrates how they interface with, or relate to, the other systems and processes and the Management Plans; | 91582 |
| | (g) details on business systems and processes to be implemented and utilised including: | 91583 |
| | (1) purpose and description; | 91584 |
| | (2) provider; | 91585 |
| | (3) resources, including personnel and system requirements; | 91586 |
| | (4) status, including timing for implementing or updating; | 91587 |
| | (5) accessibility for the State; | 91588 |
| | (6) relevance to achieving the Project objectives; and | 91589 |
| | (h) details on the information technology strategy and forward planning, including those related to recurring activities, incremental upgrades, updates and maintenance and operation of information technology assets. | 91590 |
| 2.1.11 | The Strategic Management Plan must include a summary of key activities to be undertaken in the period up until the next scheduled Strategic Management Plan update and include: | 91591 |
| | (a) key mobilisation and demobilisation activities; and | 91592 |
| | (b) planned achievement of key milestones. | 91593 |
| | | 91594 |
| 2.2 | Project Management Plan | |
| 2.2.1 | Project Co must prepare and update the Project Management Plan (PMP). | 91595 |
| 2.2.2 | The PMP must identify the procedures, processes and management systems that will apply in relation to the D&C Activities. | 91596 |
| 2.2.3 | As a minimum, the PMP must: | 91597 |
| | (a) define an organisational structure for the D&C Subcontractor that sets out the governance structure for the project and identifies the key positions, roles, and the minimum skills and experience required for each position; | 91598 |
| | (b) provide a framework for how the Works will be divided and delivered in separate construction zones; | 91599 |
| | (c) outline the classification system of Asset types and Asset Component types to be used in the Asset Inventory required by section 1.3.7, and numbering protocol to be used to uniquely identify each Asset, Asset Component and Asset Sub-Component; | 91600 |
| | (d) define a standard set of work types and a consistent method for describing location that will be used to identify each construction zone; | 91601 |
| | (e) describe policies and processes that will ensure: | 91602 |
| | (1) effective input of the Maintenance Subcontractor into design and construction so as to optimise implementation of whole of life considerations; | 91603 |

| | | |
|------------|--|-------|
| (2) | effective consultation with Returned Asset Owners to facilitate efficient commencement of construction, progressive completion of Returned Works and Handback of Returned Assets; and | 91604 |
| (3) | compliance with the requirements of section 7; | 91605 |
| (f) | describe strategies and procedures for: | 91606 |
| (1) | managing risk; | 91607 |
| (2) | maximising local industry participation; | 91609 |
| (3) | obtaining all necessary Approvals; and | 91610 |
| (4) | schedule management and cost control. | 91611 |
| | | 91612 |
| 2.3 | Quality Management Plan | |
| 2.3.1 | Project Co must prepare and update the Quality Management Plan. | 91613 |
| 2.3.2 | The Quality Management Plan must: | 91614 |
| (a) | comply with AS/NZS ISO 9001:2015 Quality Management Systems – Requirements; | 91615 |
| (b) | define Project Co's quality related objectives for the Works, including processes for the delivery of all quality and compliance related documents at Handback of each Returned Asset as required under section 11.2.1; | 91616 |
| (c) | nominate and define the responsibility and authority of the Quality Manager; | 91617 |
| (d) | define the responsibility, authority and reporting function of personnel primarily responsible for quality assurance, including the name, qualification and scope of each Nominated Authority for the release of Hold Points required by the Design Documentation and other relevant Reference Documents. The Nominated Authority must have appropriate knowledge of the Design Documentation relevant to the Hold Point being released; | 91618 |
| (e) | describe processes: | 91619 |
| (1) | to coordinate and implement quality assurance functions across all Management Plans, including: | 91620 |
| (A) | audit and surveillance; | 91621 |
| (B) | verification that ITPs and Construction Procedures include all Hold Points required by the Design Documentation and other relevant Reference Documents; | 91622 |
| (C) | notification of Hold Points required by the Design Documentation and other relevant Reference Documents and witness points and release of those Hold Points; | 91623 |
| (D) | identification, notification and control of non-conformances; and | 91624 |
| (E) | corrective action and process improvement; and | 91625 |
| (2) | that provide for the role of the Independent Reviewer and the associated interactions with Project Co, including: | 91626 |
| (A) | processes that provide the Independent Reviewer with reasonable notice of: | 91627 |
| i. | Hold Points prior to their release; and | 91628 |
| ii. | witness points; | 91629 |
| (B) | a mechanism for the Independent Reviewer to nominate additional Hold Points and witness points for inclusion in the ITPs and Construction Procedures at any time during the D&C Activities; and | 91630 |
| (C) | provision and access for the Independent Reviewer to attend the release of any Hold Point or witness point. | 91631 |
| | | 91632 |
| 2.4 | Risk Management Plan | |
| 2.4.1 | Project Co must prepare and update the Risk Management Plan. | 91633 |

| | | |
|------------|--|-------|
| 2.4.2 | The Risk Management Plan must address the management of all types of risk across the Project Activities. Where applicable, the Risk Management Plan may include references to other Management Plans to avoid duplication. The types of risk to be identified, analysed, treated and monitored for the duration of the Project Activities include: | 91634 |
| | (a) Safety in Design risks; | 91635 |
| | (b) security risks; | 91636 |
| | (c) rail safety risks – during construction and operations; | 91637 |
| | (d) workplace safety, environment and quality risks; and | 91638 |
| | (e) business risks such as stakeholder, approvals, commercial and schedule risks. | 91639 |
| 2.4.3 | The Risk Management Plan must: | 91640 |
| | (a) address how Project Co will comply with the risk management requirements of the Agreement for the duration of the Project Activities; | 91641 |
| | (b) define how appropriate risk management strategies are defined and implemented in accordance with AS/NZS ISO 31000: 2009; | 91642 |
| | (c) cover all aspects of the Project Activities and as a minimum address all requirements set out in section 2.3; | 91643 |
| | (d) systematically address risks throughout the life cycle of the Asset from conception through to retirement; | 91644 |
| | (e) describe the process, purpose and objectives of the risk management plan, the risk management standards, risk acronyms, terms and definitions; | 91645 |
| | (f) describe how the standard risk management processes will be implemented for the Project, including: | 91646 |
| | (1) establishing the context; | 91647 |
| | (2) assessment of risks and opportunities (including identifying the risks and opportunities, analysing the risks and opportunities, qualitative process, quantitative process, deterministic analysis, probabilistic analysis and evaluation), as well as providing the matrices used for the assessment process; | 91648 |
| | (3) treating the risks; | 91649 |
| | (4) monitoring, reviewing and internal reporting of the risks; | 91650 |
| | (5) roles and responsibilities for risk management; | 91651 |
| | (6) methods to be used to monitor effectiveness of control; | 91652 |
| | (7) communication and consultation; | 91653 |
| | (8) tools to be used; | 91654 |
| | (9) identifying and addressing the requirements for internal risk framework audits and/or maturity reviews; and | 91655 |
| | (10) defining the process for closure of risks and verification of risk treatment implementation. | 91656 |
| | (g) outline the detail to be provided and process to be used for reporting, as required in section 1.4.2.3(d); | 91657 |
| | (h) detail the process to be used to transfer any risks that are residual to the D&C Phase to the appropriate stakeholder or to the Maintenance Subcontractor; | 91658 |
| | (i) detail how the risk management process will change during transfer from the D&C Phase to the Maintenance Phase; and | 91659 |
| | (j) detail the process to be used to transfer any risks that are residual to the Maintenance Phase to the appropriate stakeholder. | 91660 |
| | | 91661 |
| 2.5 | PPP Interface Management Plan | |
| 2.5.1 | Project Co must prepare and update the PPP Interface Management Plan. | 91662 |
| 2.5.2 | The PPP Interface Management Plan must: | 91663 |
| | (a) provide a full description of the scope of the Works being undertaken and all | 91664 |

| | | |
|------------|---|-------|
| | Stakeholders involved; | |
| (b) | include a matrix setting out all potential interfacing parties and their impact on or connection with the Works; | 91665 |
| (c) | provide for the interface issues in the Interface Issues Register; | 91666 |
| (d) | provide clear delineation of the responsibilities of each party (Project Co, the State and relevant Stakeholder(s)) in relation to the interface issues and identify the data to be communicated by each party; | 91667 |
| (e) | provide identification of the nominated first point of contact for each Stakeholder with respect to the Information Management Plan for: | 91668 |
| | (1) the provision of data; and | 91669 |
| | (2) the assessment of engineering compatibility; | 91670 |
| (f) | include identification of procedures for: | 91671 |
| | (1) the exchange, communication and agreement of interface data and information including: | 91672 |
| | (A) interface control documents; | 91673 |
| | (B) distribution lists; | 91674 |
| | (C) confidentiality issues; and | 91675 |
| | (D) dispute resolution procedures; | 91676 |
| | (2) the sharing of good practice, issues of concern and relevant safety information; | 91677 |
| | (3) the reporting and investigation of incidents and notifiable occurrences, including reporting protocol and responsible persons in accordance with AS 4292.1; and | 91678 |
| | (4) document control; | 91679 |
| (g) | include identification of related documentation, for example supporting standards, specifications and requirements; | 91680 |
| (h) | identify the roles and responsibilities in managing interfaces; | 91681 |
| (i) | detail a formal meeting schedule between Project Co and each interface party; | 91682 |
| (j) | include the communication, interfaces and integration management strategies, processes and procedures for cooperation and coordination with other parties including between Project Co and: | 91683 |
| | (1) the Key Subcontractors and Material Subcontractors; | 91684 |
| | (2) the State, PTV, the Franchisee, Authorities and other third parties involved in or affected by Project Co, as required; | 91685 |
| (k) | interface information schedules; | 91686 |
| (l) | collaborative interface problem resolution processes; | 91687 |
| (m) | details on any dedicated interface management resources and their roles and responsibilities; and | 91688 |
| (n) | detail how existing interface control documents are incorporated. | 91689 |
| | | 91690 |
| 2.6 | Workforce Development and Training Management Plan | |
| 2.6.1 | Project Co must prepare and update the Workforce Development and Training Management Plan. | 91691 |
| 2.6.2 | The Workforce Development and Training Management Plan must, as a minimum: | 91692 |
| | (a) detail the workforce initiatives that provide for the utilisation of new workplace skills and contribute to relevant sectoral, state and national targets, including consideration of existing government incentives and schemes to promote traineeships and apprentices; | 91693 |
| | (b) detail the workforce initiatives to meet all statutory obligations in relation to training, including in respect of health and safety and environmental matters; | 91604 |
| | (c) detail the initiatives to achieve the utilisation of Victorian registered apprentices, Victorian registered trainees or engineering cadets for at least 10% of the Works' total estimated labour hours in accordance with the Major Projects Skills Guarantee | 91695 |

| | | |
|------------|---|-------|
| | Compliance Plan; | |
| (d) | detail the initiatives to achieve the Aboriginal Employment Target of 2.5% of total labour hours and demonstrate how performance against this target will be measured; | 91696 |
| (e) | detail initiatives to achieve the Priority Jobseekers' Requirements; | 91697 |
| (f) | detail initiatives to improve participation of Priority Jobseekers and underrepresented groups in the industry; | 91698 |
| (g) | detail initiatives which will result in: | 91699 |
| | (1) Priority Jobseekers and underrepresented groups in the industry advancing in the workforce to more senior roles; and | 91700 |
| | (2) talented young trade and professional workers being identified and developed; | 91701 |
| (h) | detail the initiatives to develop and implement nationally recognised accredited training and skill development programs and ensure that 20% of the workforce participate in nationally recognised accredited training; and | 91702 |
| (i) | assess current and future workforce skill needs and develop a skills and labour gap plan and workforce profiles, including skill categories, required for the design and construction of major elements of the Works. | 91703 |
| | | 91704 |
| 2.7 | Social Procurement Management Plan | |
| 2.7.1 | Project Co must prepare and update the Social Procurement Management Plan. | 91705 |
| 2.7.2 | The Social Procurement Management Plan must, as a minimum: | 91706 |
| | (a) identify procurement initiatives that provide environmental and social improvement; | 91707 |
| | (b) identify procurement initiatives to engage Aboriginal businesses; | 91708 |
| | (c) identify procurement initiatives to develop social procurement opportunities in Victoria; | 91709 |
| | (d) describe the process for identifying and procuring suitable products with low life cycle environmental and social impacts; | 91710 |
| | (e) detail the environmental and social criteria in the selection process for Subcontractors including but not limited to, a demonstration of: | 91711 |
| | (1) systems, processes and practices that enable a supplier's reduction in environmental impacts; | 91712 |
| | (2) fair employment practices for workforce employees and subcontractors; | 91713 |
| | (3) formal corporate social responsibility commitments or corporate social responsibility initiatives in which the organisation is involved; and | 91714 |
| | (4) steps taken to reduce greenhouse gas emissions; and | 91715 |
| | (f) detail how the Social Procurement Management Plan relates to the LIDP. | 91716 |
| | | 91717 |
| 2.8 | Industrial Relations Management Plan | |
| 2.8.1 | Project Co must prepare and update the Industrial Relations Management Plan. | 91718 |
| 2.8.2 | The Industrial Relations Management Plan must: | 91719 |
| | (a) include a strategy for managing industrial relations; | 91720 |
| | (b) demonstrate compliance with all workplace laws; | 91721 |
| | (c) identify key employment and workplace relations risks; | 91722 |
| | (d) include the approach to: | 91723 |
| | (1) developing competitive workforce agreements; | 91724 |
| | (2) developing and maintaining a productive workforce; | 91725 |
| | (3) sourcing, selection and training of employees; | 91726 |
| | (4) relationship management with employees, employee representatives or other stakeholders (including unions); | 91727 |
| | (e) describe how rights of entry will be managed; and | 91728 |
| | (f) describe how Project Co will address any industrial relations matters that may arise with | 91729 |

respect to interfaces with other Metro Tunnel Package Contractors.

2.9 Information Management Plan

- 91730
- 2.9.1 Project Co must prepare and update the Information Management Plan. 91731
- 2.9.2 Project Co must ensure that the Information Management Plan is a single document and, as a minimum, includes: 91732
- (a) details of how Project Co will implement an electronic information management system that has the capability to manage all documentation, information, records and other types of project data; 91733
 - (b) details as to how information is collected, retained, secured, processed, disseminated and disposed of; 91734
 - (c) details of the information management system induction and training program for all users; 91735
 - (d) details of the expected competency levels for staff dedicated to the implementation and maintenance of the information management system; 91736
 - (e) identification of the IT requirements for information management, including the information and communications technology infrastructure network requirements (including software application, hardware and electronic communications); and 91737
 - (f) details of the disaster recovery process to be adopted in relation to information management. 91738

2.10 Digital Engineering Management Plan

- 91739
- 2.10.1 Project Co must prepare and update the Digital Engineering Management Plan. 91740
- 2.10.2 The Digital Engineering Management Plan must: 91741
- (a) describe the digital engineering strategy and its implementation throughout the project life cycle; 91742
 - (b) describe the process for the implementation of a live digital engineering environment to enable collaboration and coordination of information, data sharing and enhanced communication on the project; 91743
 - (c) demonstrate consideration of the need to coordinate with other Metro Tunnel Package Contractors with respect to the establishment of the digital engineering environment; 91744
 - (d) describe the process for the implementation of federated asset information models with sufficient embedded or linked data and information to satisfy operational and maintenance information requirements and support an asset management system appropriate for the scale of the Metro Tunnel; 91745
 - (e) describe the information security controls and procedures within the live digital environment to ensure compliance with security requirements of the State and or third parties; 91746
 - (f) describe the access control procedures for permitted users, access rights restrictions, and data entry permissions; 91747
 - (g) describe the common data environment including the electronic data management system; 91748
 - (h) describe the network and web-based user interfaces to the common data environment; 91749
 - (i) define the suite of software platforms (including versions) and data exchange formats to be adopted and address: 91750
 - (1) data exchange protocols (including to and from the asset information models); 91751
 - (2) forward and backward compatibility; 91752
 - (3) open standards compliance and non-proprietary interfaces (including to the asset management systems); 91753
 - (4) interoperability of the software platforms to support federated models; 91754
 - (5) handover compliance with PTV DMS and PASS Assets; and 91755

| | | |
|--------|---|-------|
| (6) | software viewers for federated models and their accessibility to the State, the Independent Reviewer and interfacing parties; | 91756 |
| (j) | define the common spatial coordinate system to be adopted across all software platforms, or (if not possible with the software platforms being adopted) the process to translate project elements or models into the common spatial coordinate system for coordination purposes; | 91757 |
| (k) | define the core documents and information management standards to be adopted and to what degree they are to be implemented; | 91758 |
| (l) | define digital engineering specific roles and responsibility associated with the management of models, data integration, model approvals, the electronic data management system and the common data environment; | 91759 |
| (m) | define the IT infrastructure requirements of Project Co, the State, the Independent Reviewer and interfacing parties; | 91760 |
| (n) | describe the information model production and deliverable strategy and define: | 91761 |
| (1) | the scope of the models to be generated including anticipated model sizes; | 91762 |
| (2) | the expected output detail on a discipline basis and a schedule of model deliverables for each work package during the design delivery phase; | 91763 |
| (3) | the coordination and clash detection process addressing technical query workflows, tolerance strategy, interface reports, model review workshops and a clash resolution process; | 91764 |
| (4) | the process for the management of the information and modelling from commencement through to published data; | 91765 |
| (5) | the migration of the model between different stages of the life cycle through to completion of an as-built model and asset information models; | 91766 |
| (6) | the process for updating and coordinating changes during construction into the as-built model; | 91767 |
| (7) | methods for showing simulations of construction staging; | 91768 |
| (8) | methods for showing visualisations, presentation models, 3D imagery, animated models, augmented reality models and fly-through models; | 91769 |
| (9) | methods for showing simulations in the operating environment; | 91770 |
| (10) | methods for showing major equipment space clearance reservations for operations, repair, maintenance and replacement; | 91771 |
| (11) | methods for undertaking digital as-built verification surveys; | 91772 |
| (12) | methods for ensuring the contents of the asset information models and embedded or linked data and information align with the physical assets; | 91773 |
| (13) | methods for demonstrating the implementation of a sustainability performance model(s) with sufficient information to satisfy life cycle environmental performance, design optimisations inclusive of daylighting, thermal, acoustics, energy, water, material and waste analysis. Project Co must provide output from the model(s) to the State and the Independent Reviewer demonstrating compliance with the performance requirements of the Sustainability Management Plan and Sustainability Targets; | 91774 |
| (o) | describe the process for the management of the information and data within the asset information models and the frequency of data transfer from the D&C Phase models; and | 91775 |
| (p) | describe the process for updating and coordinating changes to the asset information models as the assets change. | 91776 |
| 2.10.3 | Project Co must submit a CAD Management Plan as a sub-plan to the Digital Engineering Management Plan. | 91777 |
| 2.10.4 | The CAD Management Plan must as a minimum: | 91778 |
| (a) | describe the process for managing and exchanging drawings relating to rail infrastructure; | 91779 |
| (b) | define non rail infrastructure asset owner drawing standards to be adopted; and | 91780 |

| | | |
|-------------|---|-------|
| | (c) define naming conventions, cross-referencing, drawing scales, line-styles, sheet sizes, title blocks, dimensioning, typefaces, abbreviations and symbols | 91781 |
| 2.10.5 | Project Co must submit a GIS Management Plan as a sub-plan to the Digital Engineering Management Plan. | 91782 |
| 2.10.6 | The GIS Management Plan must define the GIS data schema and the GIS layers. | 91783 |
| 2.10.7 | Metadata associated with the GIS layers should as a minimum include major themes, purpose, description, data limitations, data custodian and data updates. | 91784 |
| 2.10.8 | The GIS layers should as a minimum include infrastructure geometric layouts, construction footprints, land and property, ground movement, underground services, environmental, survey, topographic data, geotechnical data, published photograph logs and aerial photography. | 91785 |
| 2.11 | Knowledge Management Plan | 91786 |
| 2.11.1 | Project Co must prepare and update a Knowledge Management Plan. | 91787 |
| 2.11.2 | The Knowledge Management Plan must: | 91788 |
| | (a) describe how knowledge accumulated through the project life cycle will be captured, managed and made available to project participants and by agreement the wider industry. Knowledge captured must as a minimum include background and details of: | 91789 |
| | (1) key learnings; | 91790 |
| | (2) international best practices adopted; | 91791 |
| | (3) international standards adopted; | 91792 |
| | (4) innovative construction techniques adopted; and | 91793 |
| | (5) new technologies developed or adopted; | 91794 |
| | (b) describe systems and processes used to create, manage and disseminate knowledge throughout the project lifecycle; | 91795 |
| | (c) define key learning themes on the project that will be documented and must include as a minimum: | 91796 |
| | (1) project and program management; | 91797 |
| | (2) architecture and urban design; | 91798 |
| | (3) health and safety; | 91799 |
| | (4) workforce – mobilisation, retention and training; | 91800 |
| | (5) environment; | 91801 |
| | (6) sustainability; | 91802 |
| | (7) engineering; | 91803 |
| | (8) standards; | 91804 |
| | (9) operations and maintenance; | 91805 |
| | (10) innovation; and | 91806 |
| | (11) information management and technology (including digital engineering); | 91807 |
| | (d) define the document types to be generated for each of the key learning themes including as appropriate: | 91808 |
| | (1) guidance or good practice documents; | 91809 |
| | (2) insight reports; | 91810 |
| | (3) case studies; and | 91811 |
| | (4) technical papers; and | 91812 |
| | (e) define knowledge management specific roles and responsibilities associated with the management of knowledge on the project. | 91813 |

| | | |
|-------------|---|--------|
| 2.12 | Competency Management Plan | 137256 |
| 2.12.1 | Project Co must develop, implement and maintain a Competency Management Plan. | 137257 |
| 2.12.2 | The Competency Management Plan must: | 137258 |
| | (a) describe the processes used to identify engineering competency requirements, assess competencies and maintain records to support delivery of the Works; and | 137259 |
| | (b) address rail safety worked Accreditation, including: | 137260 |
| | (1) Rail Safety National Law competency requirements; and | 137261 |
| | (2) Rail Transport Operator competency requirements. | 137262 |

Annexure 3 Systems Engineering and Assurance Management Plans 91814

3.1 Systems Engineering Management Plan 91815

3.1.1 Project Co must prepare and update the Systems Engineering Management Plan (**SEMP**). 91816

3.1.2 The SEMP must: 91817

(a) describe the strategy, plans, methodologies and processes for the management of a fully integrated engineering program in accordance with the Agreement; 91818

(b) comply with the Systems Engineering Standard; 91819

(c) be consistent with the PMP; 91820

(d) define the relationship to other planning documentation, including subordinate engineering plans and key non-technical plans such as the PMP; 91821

(e) align with the MTP SIT Systems Engineering Management Plan; 91822

(f) describe the development of the Systems Breakdown Structure (**SBS**) in Part A, Appendix A2; 91823

(g) describe Project Co's Lifecycle Cost (**LCC**) program for Returned Train Works consistent with a 30 year design timeframe; 91824

(h) define the tailored application of Project Co's systems engineering process to the activities of the Agreement, including: 91825

(1) engineering management system methodology; 91826

(2) systems engineering process planning (major engineering activities and outputs); 91827

(3) systems engineering control (contractor/subcontractor management and contractor project plans); 91828

(4) design management; 91829

(5) type approval; 91830

(6) the major products and / or increments to be delivered; 91831

(7) the major outcomes to be achieved; 91832

(8) the major systems engineering tools that will be used and identification of requirements for configuration management and control of the tool data; 91833

(9) the program and integration of effort including design, requirements management, verification and validation, systems assurance, system safety, RAM, human factors integration (**HFI**) and Stage Gate Reviews; 91834

(10) the management and progressive reporting of technical performance measures; 91835

(11) stakeholder requirements analysis and definition; 91836

(12) system architecture (functional analysis, functional allocation, functional verification, logistic engineering analysis, system architecture deliverables); 91837

(13) build; 91838

(14) T&C deployment; 91839

(15) system acceptance and handover; 91840

(16) interface management and functional analysis and allocation (inputs and outputs); and 91841

(17) the approach planned to establish and maintain control of external and internal interfaces; 91842

(i) describe the engineering organisation for the Agreement, including key engineering positions; 91843

(j) identify the training requirements, including internal training, user training and 91844

- maintenance training;
- (k) nominate the required procedures and related templates, reference documents, standards, RTO engineering authorisation, organisational roles, responsibilities and authorities; 91845
 - (l) describe how technical effort will be coordinated to meet cost, schedule and performance objectives; 91846
 - (m) summarise planned personnel needs by discipline and level of expertise; 91847
 - (n) define how all work conducted by subcontractors will be scoped, managed and monitored to ensure the objectives set out in the systems engineering program are met; 91848
 - (o) describe the selection and control of Subcontractors; 91849
 - (p) identify key interfacing projects and the engagement strategy to ensure technical risks are communicated and managed; 91850
 - (q) identify the key events in the system development lifecycle, including the relationships between them and those significant key events of interfacing projects; 91851
 - (r) describe the methods for documentation and control of engineering and technical information, including expected specifications and configuration baselines; 91852
 - (s) describe the process for developing, implementing and maintaining operational concept documents (**OCDs**) as agreed with the accredited RTO for the system and all relevant subsystems, which must also align with RSA's OCDs; 91853
 - (t) describe the Verification and Validation (**V&V**) strategy and the various Management activities used to achieve this; 91854
 - (u) describe the methods and tools for analysis, verification and validation of system requirements; 91855
 - (v) describe the use of DOORS as the requirement management tool, including its use to facilitate the generation of reporting metrics, the Requirements Traceability Matrix (**RTM**) and the Verification and Validation Cross Reference Matrix (**VCRM**); 91856
 - (w) describe how relevant stakeholders are consulted on the tailoring of criteria and criteria weighting for significant decisions; 91857
 - (x) describe the strategies governing the use of commercial-off-the-shelf (**COTS**), open systems architecture and re-use technologies; 91858
 - (y) describe how interface specifications and conditions of use are considered for the integration of COTS elements; 91859
 - (z) describe the approach of integration and assembly of the system; 91860
 - (aa) describe the approach to establish and maintain requirements traceability between systems products and design data; 91861
 - (bb) describe the expected use of any system performance models, in particular those that may be used as part of V&V; 91862
 - (cc) describe the approach planned to establish and maintain configuration control of identified system products and processes; 91863
 - (dd) describe the technical risk management approach and identify any special considerations of risks as part of the engineering program, e.g. integration and testing; 91864
 - (ee) identify the requirements for the system engineering reports including the system problem reports; 91865
 - (ff) define, in a traceability matrix from each requirement to section(s) within the SEMP, how each requirement of the Systems Engineering Standard is addressed, including justification of any tailoring of the Systems Engineering Standard; 91866
 - (gg) describe the approach for implementing and integrating a FRACAS with the Quality Management System used for classifying, tracking, reporting and managing: 91867
 - (1) failed tests from V&V activities; 91868
 - (2) non-conformances identified by functional configuration audit and PCA; 91869
 - (3) installation defects; 91870
 - (4) quality defects; and 91871

| | | |
|------------|---|-------|
| | (5) in-service failure of assets delivered, prior to commissioning; and | 91872 |
| | (hh) describe the approach planned to establish and conduct the Stage Gate Reviews necessary for effective implementation of the systems engineering program. | 91873 |
| 3.1.3 | Stage Gate Reviews must be conducted as part of Project Co's systems engineering program and use the Stage Gate Review Guide to inform the review process. | 91874 |
| 3.2 | Configuration Management Plan | 91875 |
| 3.2.1 | Project Co must prepare and update the Configuration Management Plan. | 91876 |
| 3.2.2 | The Configuration Management Plan must: | 91877 |
| | (a) define Project Co's policy, procedures and responsibilities for Configuration Management (CM) to meet the requirements of the PS&TR; | 91878 |
| | (b) define how Project Co intends to manage configuration of assets and documentation throughout the lifecycle; | 91879 |
| | (c) include supporting systems, processes and tools to facilitate and support whole-of-life management of assets provided as part of the Works, including both hardware and software assets; | 91880 |
| | (d) define the change management process to manage risks associated with configuration baseline changes throughout the project lifecycle; | 91881 |
| | (e) define the roles of any change control board (CCB); | 91882 |
| | (f) describe how Project Co will manage the process of ensuring accurate configuration records and that the configuration records are updated to the latest configuration status in a timely manner throughout the lifecycle; | 91883 |
| | (g) describe the system for defining and recording the configuration; | 91884 |
| | (h) describe the CM organisation including: | 91885 |
| | (1) lines of authority and linkages within Project Co's internal structure; | 91886 |
| | (2) formal links between Project Co's configuration management organisation and any subcontractors; | 91887 |
| | (3) the responsibilities and authority of participating groups, organisations and individuals involved in CM, including their role in CCBs; and | 91888 |
| | (4) mandatory inclusion of a Systems Assurance representative; | 91889 |
| | (i) identify and detail the integration of CM with other activities such as systems engineering, design, systems assurance, Stage Gate Reviews, HFI, RAM management and V&V; | 91890 |
| | (j) define the process and procedures used for managing formal deliverables and internal documentation; | 91891 |
| | (k) detail the implementation of CM in line with key milestones and events, including: | 91892 |
| | (1) the release and submission of controlled documentation in relation to Stage Gate Reviews; | 91893 |
| | (2) the establishment of configuration baselines; | 91894 |
| | (3) the implementation of the change management process and establishment of CCBs; and | 91895 |
| | (4) the conduct of configuration audits; | 91896 |
| | (l) define the process, procedures and tools used to manage configuration items; | 91897 |
| | (m) define the procedures for the selection of hardware, computer software and Interface configuration items and the list of configuration items and their respective specifications and associated documentation; | 91898 |
| | (n) define the requirements for establishing configuration baselines and include procedures for establishment of the functional, allocated and product baselines and the documentation used to define each baseline; | 91899 |
| | (o) define the procedures for issuing configuration documentation, and amendments to this documentation; | 91900 |

| | | |
|------------|--|-------|
| | (p) detail the process for configuration control and the level of authority for change approval; | 91901 |
| | (q) establish and maintain a configuration baseline of hardware and software elements of the system, including interfaces and procedural documentation; | 91902 |
| | (r) define the intended modification status of each of the elements identified in the configuration baseline; | 91903 |
| | (s) define the actual modification status for each of the elements identified in the configuration baseline, within the configuration register; and | 91904 |
| | (t) define the methods used to ensure that any subcontractors comply with the CM requirements of the PS&TR. | 91905 |
| | | 91906 |
| 3.3 | Requirements Management Plan | |
| 3.3.1 | Project Co must prepare and update the Requirements Management Plan. | 91907 |
| 3.3.2 | The Requirements Management Plan must: | 91908 |
| | (a) comply with the Systems Engineering Standard; | 91909 |
| | (b) detail the strategy of requirements analysis, including specification and definition of requirements to capture stakeholder needs and include: | 91910 |
| | (1) what the system has to do; | 91911 |
| | (2) when it has to do it; and | 91912 |
| | (3) how well it has to do it; | 91913 |
| | (c) detail Project Co's formal requirements management strategy, processes and activities to ensure that requirements defined in the Agreement are managed throughout the project lifecycle; | 91914 |
| | (d) describe the process for the requirements issues resolution process; | 91915 |
| | (e) detail the use of DOORS as the requirement management tool, including its use to facilitate the generation of reporting metrics, the RTM and the VCRM; | 91916 |
| | (f) detail the requirements for management activities, timelines and the integration with the systems engineering program, configuration management, V&V, systems assurance, system safety, HFI, RAM activities and other design activities; | 91917 |
| | (g) describe the process for defining and agreeing the acceptance criteria for all requirements with relevant stakeholders; | 91918 |
| | (h) detail the management and recording of requirements baseline and change; | 91919 |
| | (i) define the process of systematic audit of documentary evidence, appropriate to each state of the system lifecycle; and | 91920 |
| | (j) define how the stakeholder requirements are to be validated. | 91921 |
| 3.3.3 | The Requirements Management Plan must include processes for progressively developing, maintaining and submitting a RTM that must: | 91922 |
| | (a) show the traceability for the PS&TR; | 91923 |
| | (b) identify for each requirement: | 91924 |
| | (1) a unique and unmodifiable identifier for the requirement; | 91925 |
| | (2) the architectural element (configuration item or interface) to which the requirement belongs; | 91926 |
| | (3) the document and paragraph number of the requirement; | 91927 |
| | (4) the derivation, or reference to the design record that records the derivation, for the requirement from its parent where the requirement has a parent within the database; and | 91928 |
| | (5) other attributes as identified by the design process. | 91929 |
| | (c) identify parent-child and child-parent links that provide the rationale and unambiguous traceability for all requirements; | 91930 |
| | (d) show the parent-child and child-parent traceability through multiple levels of the design hierarchy to assess the impact of potential specification changes; | 91931 |

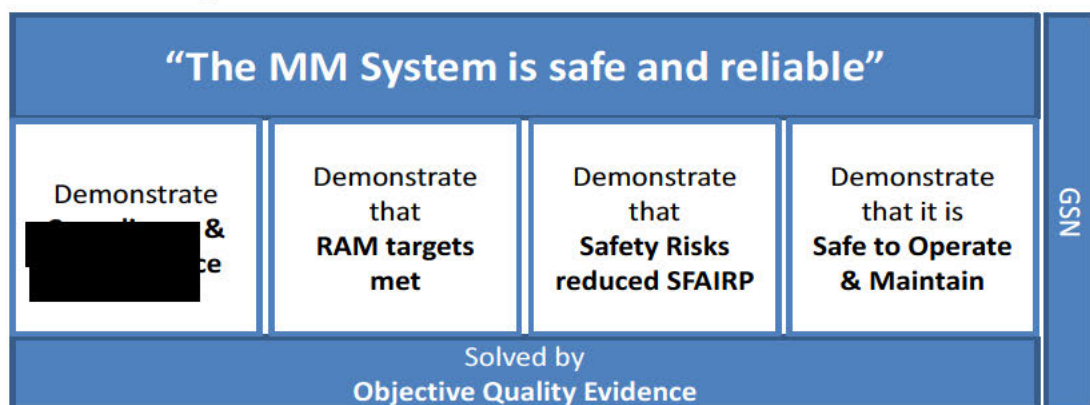

| | | |
|------------|---|-------|
| | (e) be accompanied with user documentation showing the operation, the data relationships and interpretation of all data fields; and | 91932 |
| | (f) be produced from the common data source within DOORS as the VCRM. | 91933 |
| | | 91934 |
| 3.4 | Verification and Validation Management Plan | |
| 3.4.1 | Project Co must prepare and update the Verification and Validation Management Plan. | 91935 |
| 3.4.2 | The Verification and Validation Management Plan (V&VMP) must: | 91936 |
| | (a) describe the V&V strategy, methodology, processes and sequence of activities to meet the requirements set out in the PS&TR; | 91937 |
| | (b) establish and maintains the strategy of progressive V&V throughout the development, integration and delivery process; | 91938 |
| | (c) include Project Co's organisation for its V&V program and the inter-relationships with other parties, such as systems engineering, design, systems assurance, system safety, RAM and HFI; | 91939 |
| | (d) detail all resources (e.g. personnel, witnesses, test platforms, Lead Verifier etc.) anticipated as being required at various stages of the V&V program; | 91940 |
| | (e) include relevant stakeholder input in the development and execution of the V&VMP; | 91941 |
| | (f) identify documentation requirements for each phase of the V&V program, describing generation and approval processes, document change and revision control, and the interdependence between the engineering and V&V documentation; | 91942 |
| | (g) describe the procedures for coordinating the V&V program with other Metro Tunnel Package Contractors, interfacing projects and key stakeholders; | 91943 |
| | (h) detail the V&V program work breakdown structure and schedule to include: | 91944 |
| | (1) all significant V&V milestones and efforts in development; | 91945 |
| | (2) any special tests or examinations necessary as part of the V&V program; | 91946 |
| | (3) any independent V&V activities required for suppliers; | 91947 |
| | (4) in-revenue testing, including monitoring operations and system operation, service performance, performance of operational problem resolution and customer support; | 91948 |
| | (5) hardware and software integration schedules; | 91949 |
| | (6) requirements for V&V concurrency; | 91950 |
| | (7) the person responsible for each V&V event; and | 91951 |
| | (8) the Lead Verifier for each V&V event; | 91952 |
| | (i) include the procedures for monitoring, evaluating and controlling the status of V&V tasks and achievement of the V&V schedules; | 91953 |
| | (j) identify and addresses the requirements for certificates of conformance; | 91954 |
| | (k) provide details of the expected configurations of the system or system components during the V&V program showing how the system configuration will be managed through the V&V phases to ensure that V&V will be conducted on equipment that is of the same hardware and software configuration as will be offered for Acceptance; | 91955 |
| | (l) describe the FRACAS used for the collection of non-conformance data (including that of Subcontractors and interfacing parties) and must identify when it will be established; | 91956 |
| | (m) identify the process used to track the corrective action taken as a result of a failure, and the interaction with Subcontractors and the State; | 91957 |
| | (n) identify how regression testing will be managed following test failure or design change throughout the V&V program; and | 91958 |
| | (o) refer to the VCRM such that for each requirement it identifies the method and stage of the V&V program at which compliance is verified and / or validated. | 91959 |
| 3.4.3 | The V&VMP must include processes for progressively developing, maintaining and submitting a VCRM that must: | 91960 |
| | (a) be used to plan and record the results of Project Co's V&V activities; | 91961 |

- (b) be progressively developed and validated to reflect the system lifecycle phases; 91962
- (c) contain at least: 91963
 - (1) a unique and unmodifiable identifier for the requirement; 91964
 - (2) the requirement words or a summary of the requirement for context; 91965
 - (3) the proposed Verification or Validation method(s), i.e. one or more of: 91966
 - (A) test; 91967
 - (B) demonstration; 91968
 - (C) inspection; 91969
 - (D) analysis; 91970
 - (E) simulation; 91971
 - (F) modelling; 91972
 - (G) experiment; 91973
 - (H) audit; 91974
 - (I) trial; 91975
 - (J) walk-through; 91976
 - (K) system review; 91977
 - (L) comparison; 91978
 - (M) historical data; 91979
 - (N) compliance certificate; or 91980
 - (O) other means; 91981
 - (4) the phase during which the requirements will be Verified or Validated; 91982
 - (5) a brief description of the proposed Verification or Validation method; 91983
 - (6) a reference to the specific test procedure(s) and relevant documentation, including unique version identifiers; 91984
 - (7) a reference to the report which contains the results; 91985
 - (8) the progressive status of each phase of the V&V program with respect to the requirement; 91986
 - (9) a result summary (i.e. PASS/FAIL or incomplete if all of the Verification or Validation activities associated with the requirement have not been completed); and 91987
 - (10) a record that the V&V results were independently checked by a Lead Verifier; and 91988
- (d) be produced from the common data source within DOORS as the RTM. 91989

3.5 Systems Assurance Management Plan 91990

- 3.5.1 Project Co must prepare and update the Systems Assurance Management Plan. 91991
- 3.5.2 The Systems Assurance Management Plan (**SAMP**) must: 91992
 - (a) define Project Co's framework for the development, integration and progressive delivery of the Assurance Case; 91993
 - (b) align with the MTP SIT Systems Assurance Management Plan; 91994
 - (c) detail the assurance activities, performed throughout the system lifecycle, to produce and integrate objective quality evidence in support of the Assurance Case; 91995
 - (d) comply with the requirements of EN50126:1999 "Railway Applications – The Specification and Demonstration of Reliability, Availability, Maintainability and Safety (RAMS)"; 91996
 - (e) detail the process for cascading these SAMP requirements to the relevant subcontractors, suppliers and lower level work packages, where applicable; 91997
 - (f) describe the assurance organisation, including the responsibility and authority of each person and entity involved in implementing the SAMP and production of the evidence to 91998

- support the Assurance Case;
 - (g) describe key systems assurance working groups, including those for RAM, system safety and HFI, and detail the lines of communication; 91999
 - (h) identify key interfacing projects and the engagement strategy to ensure interface risks are communicated and managed; 92000
 - (i) identify key stakeholders and the engagement strategy to achieving systems assurance objectives; 92001
 - (j) describe how Project Co will interface and coordinate with the Train Franchisee's Independent Safety Assessor (ISA); 92002
 - (k) detail the responsibilities for carrying out all RAM, system safety and HFI tasks within each phase of the lifecycle, including the interfaces between associated tasks; 92003
 - (l) identify and describe all interfacing processes such as accreditation, risk management, quality management, systems engineering, design, requirements management, implementation, V&V, independent safety assessment and other key processes that provide evidence to support the Assurance Case; 92004
 - (m) detail the schedule and scope of each progressive delivery of the Assurance Case throughout the lifecycle, via the Assurance Case Reports; 92005
 - (n) detail the development, implementation and integration of key assurance processes including the RAM, system safety and HFI programs; and 92006
 - (o) describe the management of risks and issues with respect to RAM, hazards and human factors issues logs (HFILs) and how these logs are used to facilitate risk communication, transfer and management. 92007
- 3.5.3 The SAMP must set out processes for the development of the Assurance Case, which must: 92008
- (a) contain objective quality evidence to support a structured and comprehensive assurance argument using Goal Structuring Notation as defined in the "GSN Community Standard Version 1 – November 2011"; 92009
 - (b) be developed and integrated using the "Adelard ASCE (Assurance and Safety Case Environment)"; 92010
 - (c) use the preliminary Goal Structuring Notation as the baseline for the GSN development; and 92011
 - (d) detail further strategies, supported by sub-goals and solutions, to make the overall assurance argument that: 92012

- 3.5.4 The SAMP must set out processes for the development and progressive delivery of the Assurance Case Reports, which must: 92013
- (a) provide an executive summary that succinctly states that the Assurance Case is appropriate for the particular phase of the lifecycle; 92014
 - (b) progressively detail the argument, at the time of the report, to support the Stage Gate Reviews; 92015
 - (c) present the RAM Log and describe the key RAM risks and the corresponding resolution actions; 92016

| | | |
|------------|--|-------|
| (d) | present the Hazard Log and describe the key safety risks and the corresponding resolution actions; | 92017 |
| (e) | present the HFIL and describe the key human factors risks and the corresponding resolution actions; | 92018 |
| (f) | detail the key risks associated with engineering change and corresponding resolution actions; | 92019 |
| (g) | detail the key system interface risks and corresponding resolution actions; | 92020 |
| (h) | report on the status of each goal, sub-goals and solutions in the GSN as to the level of completeness; | 92021 |
| (i) | reference all supporting evidence to support the GSN and provide these in corresponding appendices; | 92022 |
| (j) | detail the progress of the safety verification and validation efforts and the status of the corresponding VCRM; | 92023 |
| (k) | detail the status of the remaining assurance efforts required to produce the final Assurance Case; | 92024 |
| (l) | detail emerging risks and issues that could impact the Assurance Case; | 92025 |
| (m) | detail the findings and actions as a result of ISA report or activity that are pertinent to the particular phase of the lifecycle; | 92026 |
| (n) | describe the handover of residual risk to the asset operator and maintainer; and | 92027 |
| (o) | provide a conclusion and recommend actions to address any emerging risks and future activities. | 92028 |
| | | 92029 |
| 3.6 | System Safety Management Plan | |
| 3.6.1 | Project Co must prepare and update the System Safety Management Plan. | 92030 |
| 3.6.2 | The System Safety Management Plan (SSMP) must define a program to satisfy the systems assurance requirements by describing: | 92031 |
| | (a) the scope of the system safety program in terms of the system lifecycle; | 92032 |
| | (b) the integration of system safety activities with the systems engineering, design, quality management, HFI, RAM, Safety in Design, health and safety, accreditation and other functional areas; and | 92033 |
| | (c) the resource requirements needed to execute the SSMP. | 92034 |
| 3.6.3 | The SSMP must: | 92035 |
| | (a) comply with the requirements of EN50126: 1999 “Railway Applications – The Specification and Demonstration of Reliability, Availability, Maintainability and Safety (RAMS)”; | 92036 |
| | (b) describe the system safety organisation, including the organisational and functional relationships and lines of communication; | 92037 |
| | (c) identify the responsibility and authority of each person and entity involved in implementing the SSMP, including key persons, subcontractors and system safety working groups; | 92038 |
| | (d) describe how Project Co will interface and coordinate with the Train Franchisee’s Independent Safety Assessor (ISA); | 92039 |
| | (e) describe the procedures that will be used to integrate system safety efforts for external system interfaces; | 92040 |
| | (f) define a schedule of system safety program milestones and relate the schedule to systems engineering activities, specific engineering analyses such as type approval, options analysis and incident analysis, HFI activities, Stage Gate Reviews and key milestones such as commissioning and progressive acceptance into service; | 92041 |
| | (g) describe the process for hazard identification, risk assessment, risk mitigation, SFAIRP justification, communication of risks and risk acceptance; | 92042 |
| | (h) describe the approach for applying system safety processes to existing system interfaces; | 92043 |

| | | |
|-------|---|-------|
| | (i) describe the process for determining whether a qualitative or quantitative risk assessment is appropriate for a given hazard; | 92044 |
| | (j) detail Project Co's approach to the derivation, allocation and implementation of safety requirements and safety integrity and the use of Safety Integrity Level (SIL); | 92045 |
| | (k) describe, for system interfaces, how analysis of the integrated system design, operations and maintenance (O&M) and the interfaces will be executed; | 92046 |
| | (l) detail how data preparation tools for safety critical systems are applied (e.g. CBI and CBTC data preparation tools); | 92047 |
| | (m) describe the efforts to identify and control occupational health and safety (OHS) hazards directly related to the design for both construction and O&M; | 92048 |
| | (n) describe the detail of all system safety analyses to be conducted throughout the system lifecycle; | 92049 |
| | (o) describe the approach for development, management and review of the Hazard Log and its use in supporting the accreditation process; | 92050 |
| | (p) describe the process for verification of mitigation measures including requirements for certification, independent review and special testing of safety features; | 92051 |
| | (q) describe the procedures for ensuring the safe conduct of all V&V activities; | 92052 |
| | (r) describe the audit program to ensure that the objectives and related requirements of the SSMP are being accomplished; | 92053 |
| | (s) describe the safety training for all personnel involved in the system safety activities; and | 92054 |
| | (t) describe the near-miss, incident reporting and investigation processes. | 92055 |
| 3.6.4 | The SSMP must set out processes for the following system safety analyses to be progressively conducted, documented and delivered to the State: | 92056 |
| | (a) Preliminary Hazard Analysis (PHA) | 92057 |
| | The hazard analysis results within the PHA Report, as a minimum must: | 92058 |
| | (1) include a description of the use of appropriate risk techniques and resources to conduct the PHA such as brainstorming, SWIFT or HAZOP; | 92059 |
| | (2) review and evaluate past data of similar systems, their hazards including accidents and near misses; | 92060 |
| | (3) include the identification and description of each hazard; | 92061 |
| | (4) include the analysis and evaluation of the associated risks; | 92062 |
| | (5) include a description of the potential risk mitigation measures; | 92063 |
| | (6) include a list of the hazards that will be subject to further Quantitative Risk Assessment (QRA); | 92064 |
| | (7) include the corresponding hazard log entries; and | 92065 |
| | (8) include the associated SFAIRP justifications. | 92066 |
| | (b) System Hazard Analysis (SHA) | 92067 |
| | The hazard analysis results within the SHA Report in respect of subsystems and interrelationships, as a minimum must include: | 92068 |
| | (1) a review of the subsystems interrelationships for compliance with specified safety requirements, which will include: | 92069 |
| | (A) compliance with requirements associated with the integration of COTS subsystems; and | 92070 |
| | (B) compliance with the system requirements associated with integrating elements that have already achieved a specified SIL; | 92071 |
| | (2) a description of the use of appropriate risk techniques and resources to conduct the SHA such as SWIFT, HAZOP, FMECA, FTA or ETA; | 92072 |
| | (3) the possible independent, dependent, and simultaneous hazardous events including system failures, failure of safety devices, common cause failures and events, and system interactions that could create a hazard or result in increased system risk; | 92073 |

| | | |
|-----|--|-------|
| (4) | design changes that affect subsystem hazards and / or associated risks; | 92074 |
| (5) | the implications for human systems integration, including the impact on human-system interface and the risk of human errors; | 92075 |
| (6) | recommended actions to eliminate the system hazards and / or associated risks; | 92076 |
| (7) | the list of safety critical functions; | 92077 |
| (8) | the corresponding hazard log entries; and | 92078 |
| (9) | the associated SFAIRP justifications. | 92079 |
| (c) | Interface Hazard Analysis (IHA) | 92080 |
| | The hazard analysis results within the IHA Report, as a minimum must include: | 92081 |
| (1) | a review of compliance with safety requirements contained in interface specifications and / or documents, which will include: | 92082 |
| (A) | compliance with requirements associated with the integration of COTS elements; and | 92083 |
| (B) | compliance with the interface requirements associated with integrating elements that have already achieved a specified SIL ; | 92084 |
| (2) | a description of the use of appropriate risk techniques and resources to conduct the SHA such as SWIFT, HAZOP or FMECA; | 92085 |
| (3) | previously unidentified hazards associated with the system-system interfaces; | 92086 |
| (4) | an assessment of the risk associated with the total system design, including software, and specifically of the external system interfaces; | 92087 |
| (5) | recommended actions to eliminate the interface hazards and / or associated risks; | 92088 |
| (6) | the corresponding hazard log entries; and | 92089 |
| (7) | the associated SFAIRP justifications. | 92090 |
| (d) | Quantitative Risk Assessment (QRA) | 92091 |
| | QRA must be conducted for selected hazards or hazardous events, as identified in the PHA and / or other system safety analyses. Each QRA must be developed as early in the system lifecycle as possible and progressively be updated and refined throughout the lifecycle to support SFAIRP demonstration. As a minimum the QRA Report must include: | 92092 |
| (1) | a description of the system, its safety critical functions and hazardous event under consideration; | 92093 |
| (2) | the root causes and probability of occurrence of the specified hazardous event, typically using fault tree analysis including the data sources used in the fault tree model; | 92094 |
| (3) | the scenarios and consequences as a direct result of the hazardous event, typically using event tree analysis including the data sources used in the event tree model; | 92095 |
| (4) | sensitivity analyses (where appropriate); | 92096 |
| (5) | a description of the relative importance (sensitivity) of a basic event or cut-set within the fault tree or events within the event tree; | 92097 |
| (6) | the corresponding hazard log entries; | 92098 |
| (7) | quantification of risks to support SFAIRP justification and / or achievement of associated SIL; and | 92099 |
| (8) | recommendations to reduce the associated risk and the associated SFAIRP justifications. | 92100 |
| (e) | Operating and Maintenance Hazard Analysis (OMHA) | 92101 |
| | The hazard analysis results within the OMHA Report, as a minimum must include: | 92102 |
| (1) | hazards associated with the operating and maintenance activities and the actions required to minimise risk during these activities; | 92103 |
| (2) | a description of the use of appropriate risk techniques and resources to conduct | 92104 |

| | | |
|------------|---|-------|
| | the OMHA such as human factors techniques, SHERPA, or Human HAZOP; | |
| (3) | any changes needed in functional or design requirements for system, facilities, tooling, or support / test equipment to eliminate or control hazards or reduce associated risks; | 92105 |
| (4) | requirements for safety devices and equipment, including personnel safety and life support equipment; | 92106 |
| (5) | warnings, cautions and special emergency procedures; | 92107 |
| (6) | requirements for the packaging, handling, storage, transportation, and disposal of hazardous materials; | 92108 |
| (7) | requirement for safety training and personnel certification; | 92109 |
| (8) | potentially hazardous system states under operator control; | 92110 |
| (9) | the corresponding hazard log entries; and | 92111 |
| (10) | the associated SFAIRP justifications. | 92112 |
| (f) | Health Hazard Analysis (HH A) | 92113 |
| | The hazard analysis results within the HHA Report must include: | 92114 |
| (1) | identification of health hazards associated with the system; | 92115 |
| (2) | the assessment of the associated risks; | 92116 |
| (3) | recommended actions to eliminate the health hazards and / or associated risks; | 92117 |
| (4) | the corresponding hazard log entries; and | 92118 |
| (5) | the associated SFAIRP justifications. | 92119 |
| | | 92120 |
| 3.7 | RAM Management Plan | |
| 3.7.1 | Project Co must prepare and update the Reliability, Availability and Maintainability Management Plan (RAMMP). | 92121 |
| 3.7.2 | The RAMMP must define a program to satisfy the RAM requirements by describing: | 92122 |
| (a) | the scope of the RAM program in terms of the system lifecycle; | 92123 |
| (b) | the integration of RAM activities with the systems engineering, design, asset management, quality management, HFI, health and safety, accreditation, security and other functional areas; and | 92124 |
| (c) | the resource requirements needed to execute the RAMMP. | 92125 |
| 3.7.3 | The RAMMP must: | 92126 |
| (a) | comply with the requirements of EN50126:1999 "Railway Applications – The Specification and Demonstration of Reliability, Availability, Maintainability and Safety (RAMS)"; | 92127 |
| (b) | describe the RAM organisation, including the organisational and functional relationships and lines of communication; | 92128 |
| (c) | identify the responsibility and authority of each person and entity involved in implementing the RAMMP, including key persons, subcontractors and RAM working groups; | 92129 |
| (d) | describe the procedures that will be used to integrate RAM efforts for external system interfaces; | 92130 |
| (e) | describe the RAM design principles for designers to consult; | 92131 |
| (f) | define a schedule of RAM program milestones and relate the schedule to systems engineering activities, system safety activities, Stage Gate Reviews and key milestones; | 92132 |
| (g) | describe the process for RAM risk and issue identification, assessment, mitigation, communication and acceptance; | 92133 |
| (h) | describe the process for managing RAMS risks and issues that are shared with the Hazard Log; | 92134 |
| (i) | describe the approach for applying RAM processes to existing system interfaces; | 92135 |
| (j) | describe, for system interfaces, how analysis of the integrated system design, operations | 92136 |

| | | |
|-------|---|-------|
| | and the interfaces will be executed; | |
| | (k) describe the efforts to identify and control RAM risks and issues directly related to the design; | 92137 |
| | (l) describe the process for managing derived RAM requirements including RAM targets that were decomposed by the work package entity; | 92138 |
| | (m) describe the approach for development, management and review of the RAM Log, including: | 92139 |
| | (1) use of the partial schema articulated in the MMRA RAM Log Process; | 92140 |
| | (2) expansion of the partial schema, as appropriate, to account for applicable lifecycle activities such as V&V; | 92141 |
| | (3) incorporation of RAM Log entries characterised in a previous project phase; | 92142 |
| | (4) decision making framework to agree on mitigations required for issues and risks with the relevant stakeholders; | 92143 |
| | (5) periodic review of the RAM Log with the relevant stakeholders; and | 92144 |
| | (6) consideration of life cycle cost of mitigations; | 92145 |
| | (n) describe the risk matrices to be used in RAM activities, that are consistent with the Safety Management System of the relevant RTO; | 92146 |
| | (o) describe the strategy for progressively monitoring the achievement of RAM targets through the defined V&V framework, including use of test configurations over finite periods to supplement supplied data, where justified by risk; | 92147 |
| | (p) describe the audit program to ensure that the objectives and related requirements of the RAMMP are being accomplished; | 92148 |
| | (q) describe the training for all personnel involved in the RAM activities; | 92149 |
| | (r) describe the approach for managing asset performance prior to Day 1, including: | 92150 |
| | (1) incorporation of a FRACAS or equivalent to influence requirements and design activities; | 92151 |
| | (2) the process for classifying failures to drive the required corrective actions (e.g. installation defect has a different corrective action compared with random component failure); and | 92152 |
| | (3) interface with the owner of the live maintenance data; | 92153 |
| | (s) describe how RTOs are engaged in the RAM process, and how the following critical parameters are agreed during system design: | 92154 |
| | (1) estimated Mean Down Time (MDT) for all assets that have Service Affecting Failures; and | 92155 |
| | (2) estimated operational impact of all Failure Modes; | 92156 |
| | (t) describe the approach for achieving process alignment with the Rail Systems Alliance. In particular, this may relate to the use of common modelling tools and analysis outputs to allow for cross-package management of RAM; and | 92157 |
| | (u) include an Obsolescence Management Plan prepared in accordance with AS 62402 that sets out strategies, processes and tools to ensure ongoing currency of systems, subsystems, supporting infrastructure and components. | 92158 |
| 3.7.4 | The RAMMP must set out processes for the following RAM activities to be progressively conducted, documented and delivered to the State: | 92159 |
| | (a) Quantitative modelling | 92160 |
| | The quantitative modelling activity must be conducted in accordance with the following terms: | 92161 |
| | (1) produce a quantitative modelling report based on development maturity; | 92162 |
| | (2) use of a single recognised reliability analysis standard such as AS 61078:2008; | 92163 |
| | (3) document and execute an approach to progressively model the availability performance of the design against the RAM performance targets; | 92164 |
| | (4) ensure data from equipment suppliers are vetted for exaggeration and normalised | 92165 |

- to the expected operating conditions;
- (5) describe how modelling data, modelling assumptions, correction factors, data uncertainty and related engineering judgments are to be recorded, classified, prioritised and managed; 92166
 - (6) assess the design for RAM non-compliances, issues and risks using the model; 92167
 - (7) ensure that the MDT components of administrative delay, logistic delay, investigation time, repair/exchange time and test time are consistently incorporated within the model, as per CLC/TR CENELEC 50126-2:2007-02 Annex F; 92168
 - (8) allocate RAM performance targets downwards within the project's System Breakdown Structure, to an appropriate level for delivery and procurement purposes. For example, Line Replaceable Unit (**LRU**) level may be suitable where Project Co is directly responsible for the subsystem in question. A subsystem level target may be suitable where the subsystem has been partitioned off to a subcontractor by the Project Co; 92169
 - (9) provide recommendations to mitigate identified RAM non-compliances, issues and risks, in the form of requirements or, where applicable, corrective actions for the design; and 92170
 - (10) create the corresponding RAM Log entries. 92171
- (b) Maintainability Strategy 92172
- (1) Project Co must produce a Maintainability Strategy that describes how systems will be designed and installed to ensure ease of maintenance and support. 92173
 - (2) The Maintainability Strategy must inform Project Co's design decisions such that maintainability is built into the assets. 92174
 - (3) The Maintainability Strategy must as a minimum: 92175
 - (A) describe maintainability objectives including desirable design features such as standardisation, interchangeability, modularisation, testability and accessibility; 92176
 - (B) describe the key opportunities and constraints presented by the operating environment to minimise the effort necessary to undertake maintenance; 92177
 - (C) describe how preventive and corrective maintenance would be optimised through design such that the systems perform to their specified performance; 92178
 - (D) describe provisions of condition monitoring, fault detection, diagnostic, logistic, accessibility, fault isolation, ease of repair, and support systems to support achieving the specified performance; 92179
 - (E) describe how maintenance support systems for Returned Assets (training, spares allocation and storage, facilities, special tools, manuals, etc.) would be optimised; 92180
 - (F) describe how maintainability considerations would inform whole of life consideration through design; 92181
 - (G) be developed in conjunction with the asset maintainers and consider impact of human factors; 92182
 - (H) define first line, second line and third line maintenance; and 92183
 - (I) be consistent with the Obsolescence Management Plan. 92184
- (c) Failure Modes Effects and Criticality Analysis (**FMECA**) 92185
- The FMECA must be conducted in accordance with the following terms: 92186
- (1) produce a FMECA – reliability centred maintenance (**RCM**) report based on development maturity; 92187
 - (2) produce a Reliability Critical Items List (**RCIL**) based on a criticality measure; 92188
 - (3) use of a single recognised FMECA standard such as AS 60812-2008 or MIL-STD-1629A; 92189

- (4) use a quantitative criticality measure that incorporates detectability of failures; 92190
 - (5) document and execute an approach to conducting a FMECA on the design; 92191
 - (6) ensure that the FMECA covers all subsystems including civil, track, structure and architectural elements as they will need to be cascaded through to the RCMA and maintenance task definition activity to derive the maintenance outputs; 92192
 - (7) ensure that environment (e.g. temperature, water ingress, etc.) and vermin are considered as potential failure causes; 92193
 - (8) ensure that all single point failures that have significant geographic impact are assessed comprehensively within the FMECA; 92194
 - (9) ensure that the FMECA is cascaded into lower-level FMECAs, as appropriate, to manage depth and breadth of the analysis; 92195
 - (10) ensure the FMECA depth is appropriate for delivery and procurement purposes. For example, analysis down to the LRU level may be suitable where Project Co is directly responsible for the subsystem in question. A higher level analysis may be suitable where the subsystem has been partitioned off to a subcontractor by Project Co, noting that interfaces to the subsystem must be considered in the FMECA; 92196
 - (11) provide recommendations to mitigate identified RAM non-compliances, issues and risks, in the form of requirements or, where applicable, corrective actions for the design; 92197
 - (12) create the corresponding RAM Log entries; and 92198
 - (13) ensure that the FMECA output flows efficiently onto the RCM analysis (i.e. no need for intermediate RAM Log entries to interface between the FMECA and the RCMA). 92199
- (d) Reliability Centred Maintenance Analysis (**RCMA**) 92200
- The RCMA must be conducted in accordance with the following terms: 92201
- (1) analysis is integrated into the FMECA-RCM report; 92202
 - (2) use and tailoring of a single recognised RCM standard such as AS 60300.3.11; 92203
 - (3) document and execute an approach to applying RCM principles, to appropriately mitigate Failure Modes identified and ranked in the FMECA; 92204
 - (4) identify the hierarchy of controls to be used in the RCMA, including the use of maintenance tasks as a control of last resort; 92205
 - (5) ensure that supporting infrastructure is considered in selecting controls (e.g. electricity for tools, water for cleaning, storage space); 92206
 - (6) ensure Life Cycle Costing is considered in the selection of controls; 92207
 - (7) ensure sufficiently detailed analysis is carried out to support the decision making on selection of controls; 92208
 - (8) document the decisions made, their rationale and supporting analyses in the report; 92209
 - (9) provide recommendations to mitigate identified RAM non-compliances, issues and risks, in the form of requirements or, where applicable, corrective actions for the design; 92210
 - (10) create the corresponding RAM Log entries; and 92211
 - (11) ensure that the RCMA output flows efficiently onto the maintenance task definition activity (i.e. no need for intermediate RAM Log entries). 92212
- (e) Maintenance task definition 92213
- The maintenance task definition activity must be conducted in accordance with the following terms: 92214
- (1) aligned with the Maintainability Strategy; 92215
 - (2) engage the asset maintainers' representative in the maintenance task definition process; 92216

| | | |
|------|---|-------|
| (3) | produce a technical maintenance plan, in a format and structure suitable for hand over to the asset maintainer; | 92217 |
| (4) | produce all required O&M collateral subordinate to the technical maintenance plan, suitable for hand over to the asset maintainer; | 92218 |
| (5) | develop and document an approach for managing configuration of assets delivered by Project Co, in consultation with the asset maintainer, and integrate into relevant subsidiary documents; | 92219 |
| (6) | provision of all maintenance collateral provided by the equipment suppliers; | 92220 |
| (7) | document and execute an approach to define maintenance tasks and supporting maintenance arrangements where maintenance tasks have been identified as a control in the RCMA; | 92221 |
| (8) | define the maintenance echelon(s) to be used; | 92222 |
| (9) | ensure that the maintenance tasks are characterised through a minimum of: | 92223 |
| | (A) asset specific procedures; | 92224 |
| | (B) maintenance task triggers (e.g. precursor metric, fault indication, time-based); | 92225 |
| | (C) coverage of all maintenance types (e.g. corrective, preventative, end of life replacement); | 92226 |
| | (D) temporary repairs where appropriate; | 92227 |
| | (E) spares and tools required; and | 92228 |
| | (F) safeworking provisions; | 92229 |
| (10) | ensure that supporting maintenance arrangements are characterised through a minimum of: | 92230 |
| | (A) staffing and competency requirements; | 92231 |
| | (B) 3rd party arrangements if applicable; | 92232 |
| | (C) non first line maintenance arrangements; | 92233 |
| | (D) plan for disruption management, for activities requiring cancellation of revenue services; and | 92234 |
| | (E) other logistics support needs; | 92235 |
| (11) | ensure interface to training activities are actively managed; | 92236 |
| (12) | ensure that non-critical maintenance tasks identified in the FMECA but not flowed onto the RCMA are covered (e.g. cleaning of public areas); and | 92237 |
| (13) | ensure the outputs of this activity are consistent with the obsolescence management approaches called out within the Obsolescence Management Plan. | 92238 |
| (f) | Spares allocation | 92239 |
| | The spares allocation activity must: | 92240 |
| (1) | produce spares allocation report based on development maturity and timeliness for procurement; | 92241 |
| (2) | document and execute an approach to determining the spares allocation for every asset within design scope, which must be centred around a quantitative queuing model; | 92242 |
| (3) | ensure that qualitative considerations such as multiple depot locations, current spares level held by maintainer, storage requirements and reverse logistics (e.g. are failed units returned to vendor for replacement in bulk) are factored into the allocation process; | 92243 |
| (4) | ensure that cross work package interfaces are considered (e.g. one work package entity determines spares allocation, and a different work package entity procures the equipment and spares); and | 92244 |
| (5) | ensure that the spares allocation report is provided in time to inform procurement for interim delivery stages. | 92245 |

- | | |
|--|-------|
| (g) RAM workshops | 92246 |
| RAM workshops must be conducted in accordance with the following terms: | 92247 |
| (1) produce RAM workshop reports on a per workshop basis; | 92248 |
| (2) document and execute an approach to identify RAM non-compliances, issues and risks with subject matter experts in a workshop environment; | 92249 |
| (3) ensure the design scope is fully covered by the RAM workshops; | 92250 |
| (4) one workshop must cover intentional and un-intentional damage by the general public in the Front of House areas; | 92251 |
| (5) provide recommendations to mitigate identified RAM non-compliances, issues and risks, in the form of requirements or, where applicable, corrective actions for the design; and | 92252 |
| (6) create the corresponding RAM Log entries. | 92253 |
| (h) Common Cause Failure Analysis (CCFA) | 92254 |
| The CCFA must be conducted in accordance with the following terms: | 92255 |
| (1) produce a CCFA report based on development maturity; | 92256 |
| (2) document and execute an approach to identify and assess common cause failures; | 92257 |
| (3) ensure analysis covers both random and systematic failure sources; | 92258 |
| (4) ensure that the following scenarios are assessed comprehensively: | 92259 |
| (A) changeover and standby systems; | 92260 |
| (B) shared data and their configurations; | 92261 |
| (C) software/firmware deployed in multiple assets; | 92262 |
| (D) common factors affecting co-located equipment such as fire, climatic conditions, EMI/EMC, lightning, vandalism; and | 92263 |
| (E) supply chain issues; | 92264 |
| (5) provide recommendations to mitigate identified RAM non-compliances, issues and risks, in the form of requirements or, where applicable, corrective actions for the design; and | 92265 |
| (6) create the corresponding RAM Log entries. | 92266 |
| (i) Other analyses | 92267 |
| Any additional RAM analyses as required to support design activities and/or to adequately manage RAM, such as RAM input into options analyses and technology selection activities. | 92268 |

3.8 System Integration Management Plan 92269

- | | | |
|-------|---|-------|
| 3.8.1 | Project Co must prepare and update the Systems Integration Management Plan. | 92270 |
| 3.8.2 | The System Integration Management Plan must: | 92271 |
| (a) | comply with the Systems Engineering Standard; | 92272 |
| (b) | align with the Metro Tunnel System Integration Management Plan and identify how the integration process will be managed throughout the lifecycle for intra and inter work package scope, as well as provision of support to overall system integration; | 92273 |
| (c) | describe the progressive systems integration strategy, program, processes and tools used throughout the system lifecycle; | 92274 |
| (d) | define Project Co's role in the integration of the Metro Tunnel including: | 92275 |
| (1) | the integration organisation, roles and responsibilities of integration resources; | 92276 |
| (2) | management of the system architecture and configuration items; | 92277 |
| (3) | integration of Rail Systems Alliance and Rail Infrastructure Alliance works and corresponding Assurance Cases; | 92278 |
| (4) | integration of other Related State Project Works; | 92279 |

| | | |
|------|--|-------|
| (5) | participation in testing, commissioning and system acceptance activities; | 92280 |
| (6) | process to resolve integration issues; | 92281 |
| (7) | interfacing with the Train Franchisee for network integration; | 92282 |
| (8) | communication lines to key stakeholders; | 92283 |
| (9) | level of resourcing required to sustain the system integrator function for the Works; and | 92284 |
| (10) | relevant transport and Station Precinct operators, authorities and stakeholders; | 92285 |
| (e) | describe the identification and management of all interfaces and system constraints; | 92286 |
| (f) | identify the key interface and integration issues, including interfaces with existing equipment, rolling stock and signalling interfaces, track interfaces and station interfaces; | 92287 |
| (g) | identify relevant modes of transport arriving at and interchange with Metro Tunnel at each Station and the way each will be managed; | 92288 |
| (h) | detail all integration requirements, standards, processes and procedures for the implementation of the system, sub-systems, assemblies and components; | 92289 |
| (i) | detail the integration testing and commissioning process; | 92290 |
| (j) | detail the progressive audit of the system integration program; | 92291 |
| (k) | detail the operational readiness process including operation readiness, maintenance readiness, rail safety accreditation, staff readiness and documentation; | 92292 |
| (l) | address coordination of first and last required train services with other service providers; | 92293 |
| (m) | demonstrate and gain acceptance of how information regarding planned and unplanned changes to Rail Services is exchanged with the media and other service providers; | 92294 |
| (n) | describe how Project Co will coordinate with Station Precinct stakeholders, including government and private transport operators and Authorities, local councils, land owners, tenants, community, user groups, Emergency Service Organisations and event organisers, for: | 92295 |
| (1) | management of relationships with Station Precinct stakeholders, including details of relevant Project Co personnel responsible; | 92296 |
| (2) | methods to identify and engage with new Station Precinct stakeholders; | 92297 |
| (3) | methods to identify and engage with the operators of new transport services; | 92298 |
| (4) | sharing of information; | 92299 |
| (5) | participation in place branding; | 92300 |
| (6) | participation in community engagement; | 92301 |
| (7) | participation with Special Events management/organisers; and | 92302 |
| (8) | methods for coordination of Special Events, service disruption, maintenance and accident events; | 92303 |
| (o) | identify physical elements provided by Project Co to achieve physical integration with other transport networks and facilities, with elements outside the extent of the Metro Tunnel, including: | 92304 |
| (1) | pedestrian facilities including Customer connections, footpaths and pedestrian infrastructure; | 92305 |
| (2) | bicycle parking, bicycle end of trip facilities and cycleways; | 92306 |
| (3) | shared paths; | 92307 |
| (4) | bus bays, bus lanes, bus priority measures and facilities and layover space; | 92308 |
| (5) | taxi ranks; | 92309 |
| (6) | kiss-and-ride drop-off and pick-up locations; | 92310 |
| (7) | off-street and on-street car parking facilities; | 92311 |
| (8) | dynamic car parking information systems; and | 92312 |
| (9) | local road works; | 92313 |
| (p) | identify elements provided by Project Co to achieve transport integration outcomes for | 92314 |

| | |
|--|-------|
| customers, including elements outside the extent of the Works, for: | |
| (1) dynamic customer information: | 92315 |
| (A) within Stations and interchanges; and | 92316 |
| (B) within the Station Precincts; | 92317 |
| (2) printed customer information: | 92318 |
| (A) within Stations and interchanges; and | 92319 |
| (B) within the Station Precincts; | 92320 |
| (3) remotely accessible Customer information; | 92321 |
| (4) signage and wayfinding within the Stations, interchanges and Station Precincts; and | 92322 |
| (5) CCTV and security information systems at transport interchanges; | 92323 |
| (q) set out arrangements for the management and maintenance of the transport integration elements, including ownership, operation, maintenance and coordination between Project Co, transport operators and Authorities and Station Precinct stakeholders; and | 92324 |
| (r) set out strategies for the continuous improvement of physical, operational and Customer integration, including but not limited to: | 92325 |
| (1) monitoring of use and performance of elements of transport integration provided by Project Co; | 92326 |
| (2) Station and Station Precinct maintenance and service vehicle access; | 92327 |
| (3) mechanisms to identify, and respond to changes in: | 92328 |
| (A) passenger demand; | 92329 |
| (B) Station Precinct land use; | 92330 |
| (C) other public transport operations and services; and | 92231 |
| (D) new public transport networks, operators and services; and | 92232 |
| (4) mechanisms to respond to issues arising from the section above, including but not limited to: | 92233 |
| (A) elements owned or operated by Project Co; and | 92234 |
| (B) elements owned or operated by relevant transport and Station Precinct operators, Authorities and stakeholders. | 92235 |
| | 92236 |

3.9 Human Factors Management Plan

| | | |
|-------|---|-------|
| 3.9.1 | Project Co must prepare and update the Human Factors Management Plan. | 92237 |
| 3.9.2 | The Human Factors Management Plan (HFMP) must define a program to satisfy the systems assurance requirements by describing: | 92238 |
| (a) | the scope of the HFI activities applied throughout the system lifecycle to provide effective human-system interfaces in support of achieving safety and performance requirements; | 92239 |
| (b) | the HFI principles, criteria and requirements applied to system and subsystem designs; | 92240 |
| (c) | the integration of HFI activities with the systems engineering, quality management, system safety, design, RAM, health and safety, accreditation, V&V and other functional areas; | 92241 |
| (d) | the activities to be undertaken within the HFI, including: | 92242 |
| (1) | early human factors analysis; | 92243 |
| (2) | human factors integration plans; | 92244 |
| (3) | human factors awareness raising; | 92245 |
| (4) | attendance at workshops; | 92246 |
| (5) | specific human factors analyses; | 92247 |
| (6) | human factors issues log; and | 92248 |
| (7) | human factors issues reporting; | 92249 |

| | | |
|-------|--|-------|
| | (e) how the system is to be made robust to the risks of human error, procedural violation and undesirable human behaviour that could impact system safety; and | 92250 |
| | (f) the personnel, related documents and references and legislative requirements needed to execute the HFMP. | 92251 |
| 3.9.3 | The HFMP must: | 92252 |
| | (a) identify and describe the primary organisational element responsible for the HFI activities; | 92253 |
| | (b) identify the responsibility and authority of each person and entity involved in implementing the HFMP, including key persons, subcontractors and working groups; | 92254 |
| | (c) describe the relationships of the HFI responsible with other organisational and functional areas, including key external parties; | 92255 |
| | (d) describe the procedures that will be used to integrate HFI activities for external interfaces; | 92256 |
| | (e) define a schedule of HFI program milestones and relate the schedule to systems engineering activities, system safety activities, Stage Gate Reviews, V&V and other key milestones; | 92257 |
| | (f) be aligned with the processes and timelines specified in other relevant plans and including the System Safety Management Plan and the Design Management Plan; | 92258 |
| | (g) describe the human factors participation in studies, tests, mock-up evaluations, dynamic simulation, specification preparation and system reviews; | 92259 |
| | (h) describe the process for human error identification, hazard and risk assessment, risk mitigation, SFAIRP justification, communication of human factors risks and acceptance of these risks using the Rail Franchisee's safety risk criteria; | 92260 |
| | (i) describe the approach for applying human factors analyses to existing system interfaces; | 92261 |
| | (j) describe how human factors analyses of the integrated system design, operations and the interfaces will be executed; | 92262 |
| | (k) describe the active participation of human factors expertise in the key areas of system development such as analysis, design and development and test and evaluation; | 92263 |
| | (l) describe all the human factors analyses to be conducted throughout the system lifecycle; | 92264 |
| | (m) describe the approach for development, management and review of the HFIL and its use in risk management and in supporting the accreditation process. The HFIL must align with the Train Franchisee's SMS requirements; | 92265 |
| | (n) describe the approach for development, management and review of end-user requirements and how these are captured in DOORS; | 92266 |
| | (o) describe the process for verification and validation of mitigation measures applied during analysis, design, development, test, evaluation and commissioning; | 92267 |
| | (p) describe the training for all personnel involved in the HFI activities; | 92268 |
| | (q) describe the audit program to ensure that the objectives and related requirements of the HFMP are being accomplished; | 92269 |
| | (r) consider the relevant aspects of the following standards: | 92270 |
| | (1) ISO 18529:2000: Ergonomics of human-system interaction – Human-centred lifecycle process descriptions; | 92271 |
| | (2) ISO 9241-210:2010: Ergonomics of human-system interaction - Part 210: Human-centred design for interactive systems; | 92272 |
| | (3) ISO 9241: Ergonomics of human-system interaction or the relevant parts may include but not be limited to: Part 2: Guidance on Task Requirements, Parts 5 Workstation layout and postural Requirements, Part 6: Guidance on the Work Environment, Part 110: Dialogue principles]; | 92273 |
| | (4) ISO 11064: Parts 1 - 7: Ergonomic design of control centres; | 92274 |
| | (5) AS IEC 62508-2011: Guidance on human aspects of dependability; | 92275 |
| | (6) ISO 9355: Parts 2 - 3: Ergonomic requirements for the design of displays and control actuators; | 92276 |

- (7) ISO 10075-3:2004: Ergonomic principles related to mental workload – Part 3: Principles and requirements concerning methods for measuring and assessing mental workload; 92277
 - (8) ISO 6385:2004: Ergonomic principles in the design of work systems; 92278
 - (9) ISO/TS 18152:2010(E): Ergonomics of human-system interaction - Specification for the process assessment of human-system issues; and 92279
 - (10) ISO 2631: Mechanical vibration and shock; and 92280
 - (s) Demonstrate that all human factors issues have been appropriately considered, addressed and documented in accordance with the MTM Human Factors Integration Procedure (L0-SQE-PRO-046). 150498
- 3.9.4 In the event that the works to be carried out by Project Co are grouped into a series of separate work packages, each work package must develop its own Human Factors Integration Plan (**HFIP**), aligned with the overall Project Co HFMP, to describe: 92281
- (a) responsibilities and activities 92282
 - (b) working arrangement and liaison with the State; 92283
 - (c) working arrangements with other stakeholders; 92284
 - (d) potential collaboration and working arrangements with other work packages; 92285
 - (e) how the preliminary HFIL will be managed and existing human factors issues addressed; and 92286
 - (f) coordination and conduct of the human factors analysis tasks detailed in the following table, ensuring that key user groups are involved and the referenced HFIL entries are addressed. 92287

Table 13-1: Human factors analysis tasks

| # | Key User Group | HF Analysis Tasks | | | | | | | | | | | HF Issues Log Reference | |
|----|----------------------------|-------------------|----------------|-------------------|---------------------|-------------------------|-------------------------------|------------|-------------------------|------------------------------------|--------------------|---------------------|-------------------------|--|
| | | Task Analysis | Error Analysis | Workload Analysis | Wayfinding Analysis | Communications Analysis | Functional Interface Analysis | HCI Design | Training Needs Analysis | Risk-Based Training Needs Analysis | Ergonomic Analysis | Crowd Flow Analysis | | Scenario Testing and Simulation |
| 1 | Customers | X | X | | X | | | | | | X | X | X | HFIR-020, HFIR-026, HFIR-032, HFIR-033, HFIR-041 |
| 2 | Drivers | X | X | X | | | X | X | | X | | | X | HFIR-021, HFIR-023, HFIR-027, HFIR-028, HFIR-034, HFIR-035, HFIR-040 |

Annexure 4 Environmental Management Plans

92389

4.1 Construction Environmental Management Plan

92390

- 4.1.1 Project Co must prepare and update the Construction Environmental Management Plan (**CEMP**) in accordance with EPR EMF2. 92391
- 4.1.2 The CEMP may apply to the whole of the Works or separate CEMPs may be developed for each precinct or component of the Works. 92392
- 4.1.3 As a minimum, the CEMP must: 92393
- (a) be developed using a risk-based approach and allow the project to be delivered in accordance with, as a minimum, the Environmental Management Framework (**EMF**), Environmental Performance Requirements (**EPR**) and Approvals; 92394
 - (b) detail appropriate design and construction responses that comply with, and implement, the EMF, and Environmental Management System (**EMS**), as well as addressing the EPRs; 92395
 - (c) include an archaeological management plan to manage disturbance of archaeological sites and values affected by the project in accordance with EPR CH7; 92396
 - (d) detail a process for identifying relevant or required consultation with local councils, Heritage Victoria, VicRoads, Melbourne Water, PTV, EPA, the Office of the Victorian Government Architect or other government agencies or stakeholders in preparing plans or documents to comply with the EPRs or Approvals; 92397
 - (e) detail the approach to obtaining all necessary planning, environmental and heritage approvals; 92398
 - (f) detail the approach to complying with any conditions on any approvals obtained by Project Co or by the State; 92399
 - (g) ensure that all relevant Laws, Reference Documents or specific requirements of the State, relevant government agencies and stakeholders are referred to and complied with; 92400
 - (h) include details of the organisational structure of Project Co and its Key Subcontractors, including, but not limited to, identification of those roles with specific environmental management responsibilities, and description of the rationale for environmental management resourcing; 92401
 - (i) detail how environmental integration will be achieved during construction through other key disciplines using cross references to other Management Plans; 92402
 - (j) detail how Project Co, any Subcontractors or any other relevant parties will comply with, monitor and adopt the CEMP at all sites; 92403
 - (k) detail how complaints and other community or stakeholder enquiries will be dealt with relating to environmental management and compliance with approvals, including compliance with EPRs SC3 and SC4; 92404
 - (l) detail the approach to implementing mitigation measures determined in consultation with key institutional stakeholders in accordance with 5.2.1.7; 92405
 - (m) detail the processes and methodologies for identifying, tracking and implementing environmental opportunities into the Works and provide performance milestones for all environmental opportunities; 92406
 - (n) include details of the arrangements for Site inductions and training to ensure that all relevant parties are aware of the requirements of the CEMP; and 92407
 - (o) include details of the processes and responsibilities for: 92408
 - (1) reviewing and updating the CEMP; 92409
 - (2) external and independent review of the CEMP; 92410
 - (3) monitoring, measurement and internal auditing arrangements to ensure that all relevant parties comply with the requirements of the CEMP; 92411

| | | |
|------------|---|-------|
| (4) | arrangements for facilitating independent audits of the CEMP and for the prompt and effective rectification of any non-conformances identified during such auditing; | 92412 |
| (5) | implementation of contingency measures in accordance with the EMF; | 92413 |
| (6) | arrangement for periodic reporting of environmental performance to the State and the Independent Reviewer; and | 92414 |
| (7) | implementing an adaptive approach for the assurance, monitoring, auditing and corrective action for the continuous improvement of environmental performance. | 92415 |
| | | 92416 |
| 4.2 | Site Environment Implementation Plans | |
| 4.2.1 | Project Co must prepare and update separate Site Environment Implementation Plans (SEIPs) for each work site in accordance with EPR in accordance with EPR EMF2. | 92417 |
| 4.2.2 | The SEIP must detail site-specific environmental control measures to be implemented by Project Co. As a minimum, they must: | 92418 |
| (a) | identify specific measures included in the relevant construction methodology to prevent adverse environmental impacts and enable environmental opportunities; and | 92419 |
| (b) | include relevant drawings at an appropriate scale (developed using GIS mapping) showing: | 92420 |
| (1) | location and scope of works to be managed; | 92421 |
| (2) | location and nature of key site features such as significant structures, sensitive receivers and protected trees in the vicinity of the work site; | 92422 |
| (3) | location and nature of physical controls or the nature of management controls required by the plan; | 92423 |
| (4) | nature and frequency of monitoring to be undertaken for each of the identified potential environmental impacts to ensure compliance with the EMF, the EPRs and Project Co's EMS; | 92424 |
| (5) | nature and frequency of monitoring to be undertaken of environmental indicators developed in consultation with key institutional stakeholders; | 92425 |
| (6) | procedures for notification of any incident or potential hazard, including emergency contacts; and | 92426 |
| (c) | be displayed, kept current and visible where the relevant works are occurring. | 92427 |
| | | 92428 |
| 4.3 | Urban Design Management Plan | |
| 4.3.1 | Project Co must prepare and update the Urban Design Management Plan. | 92429 |
| 4.3.2 | The Urban Design Management Plan must: | 92430 |
| (a) | be developed in accordance with the Metro Tunnel Urban Design Strategy; | 92431 |
| (b) | articulate how the urban design approach will deliver the design outcomes sought for the Project; | 92432 |
| (c) | identify the design team (architecture, landscape architecture industrial design, heritage, land use planning) and their role in the design process, including their skills, qualifications and experience; | 92433 |
| (d) | identify change management processes for public realm designs; | 92434 |
| (e) | demonstrate how public realm and station design processes will be integrated; | 92435 |
| (f) | demonstrate how relevant EPRs, including EPR LV3, will be addressed during the D&C Phase; | 92436 |
| (g) | identify how and when relevant stakeholder and land manager feedback will be incorporated into the public realm designs (as required by the EPRs); | 92437 |
| (h) | include an Interim Open Space Plan that must: | 92438 |
| (1) | identify the location of all interim open space; | 92439 |

| | | |
|------------|--|-------|
| (2) | include details of the proposed landscaping strategy inclusive of temporary vegetation and potted or relocatable trees; | 92440 |
| (3) | include details of any proposed street furniture, lighting and wayfinding; | 92441 |
| (4) | be designed to promote safety and inclusiveness; and | 92442 |
| (5) | incorporate cultural and community identity themes and elements, where appropriate and in accordance with the Cultural and Community Identity Enhancement Sub-Plan; and | 92443 |
| (i) | include a Cultural and Community Identity Enhancement Sub-Plan developed in accordance with the MMRA Creative Strategy which must identify: | 92445 |
| (1) | the role that features that enhance the cultural and community identity will play in the Metro Tunnel project; | 92446 |
| (2) | the character, location and scope for features that enhance the cultural and community identity in Stations, Station Precincts, and civil structures during both the D&C Phase and Maintenance Phase; | 92447 |
| (3) | how cultural and community identity enhancements or features will be embedded into the design as well as operational policies and procedures; | 92448 |
| (4) | the interface with other technical areas such as lighting, urban design, engineering and architectural specialists; customer and marketing consultants; signage & branding specialists; advertising and digital signage specialists; | 92449 |
| (5) | the capacity of the cultural and community identity features to address specific themes and purpose; | 92450 |
| (6) | the program of cultural and community identity features with suitable timing for development and approval to achieve key Works milestones; | 92451 |
| (7) | opportunities for temporary installations or experiences during the D&C Phase; | 92452 |
| (8) | the involvement of community and stakeholders; | 92453 |
| (9) | the process for finalising and procuring cultural and community identity features; and | 92454 |
| (10) | the curator responsible for advising on implementation of the cultural and community identity features, including skills, qualifications and relevant experience. | 92455 |
| 4.4 | Noise and Vibration Management Plan | 92917 |
| 4.4.1 | Project Co must prepare and update the Noise and Vibration Management Plan in accordance with Part C and EPR NV21. | 92918 |
| 4.4.2 | The Noise and Vibration Management Plan must identify how the acoustic and vibration effects of the design, construction, installation, operation and maintenance of the Works will be managed in accordance with the Agreement. | 92919 |
| 4.4.3 | The Noise and Vibration Management Plan must: | 92920 |
| (a) | have regard to the Environmental Management Plan, the Sustainability Management Plan, any Approvals and conditions on those Approvals; | 92921 |
| (b) | address Environmental Requirements; | 92922 |
| (c) | describe how Project Co will ensure compliance with all Laws and applicable policies and Guidelines in respect of noise and vibration; | 92923 |
| (d) | detail processes and methodologies to comply with construction noise and vibration constraints set out in the Environmental Requirements; | 92924 |
| (e) | detail the approach to implementing mitigation measures determined in consultation with key institutional stakeholders in accordance with 5.2.1.7; | 92925 |
| (f) | detail roles and responsibilities of key contractor personnel with respect to noise and vibration management and engagement of noise and vibration specialists; | 92926 |
| (g) | for each worksite, provide for the development of noise and vibration impact assessment procedures, including the preparation of individual site specific noise | 92927 |

| | | |
|-------|---|--------|
| | impact statements, for regenerated noise from bored piling, diaphragm wall installation, excavation, underground mining, tunneling operations, station construction, service facilities construction and surface construction support operations and out of hours deliveries; | |
| | (h) consider the approach to 24 hour tunneling and underground construction works; | 92928 |
| | (i) consider the approach to diaphragm wall construction cycles, including wall panel excavation, panel desanding, reinforcement cage placement and panel concreting; | 92929 |
| | (j) detail the blast management strategy (if blasting is proposed); | 92930 |
| | (k) include, for Works (including heavy vehicle movements) to be undertaken outside of the standard daytime construction periods, a description of the proposed activities, the duration of the Works, how often out of hours works are required, the noise and vibration impacts in relation to the management levels and the mitigation measures that will be required to reduce the impacts (including relocation of any sensitive receivers); and | 92931 |
| | (l) detail how Project Co will comply with its obligations under section 5.5, including a description of relocation strategies to be implemented and measures to ensure that the Works are not unduly delayed; | 118659 |
| | (m) identify all noise and vibration sources and conduct a risk assessment of the potential to cause disturbance to local residents, impact on amenity values and impact on native fauna. | 92932 |
| 4.4.4 | The Noise and Vibration Management Plan must address the following: | 92933 |
| | (a) site preparation noise including blasting etc.; | 92934 |
| | (b) construction noise; | 92935 |
| | (c) installation noise; | 92936 |
| | (d) train maintenance facility operational noise; | 92937 |
| | (e) power sub-station operational noise; and | 92938 |
| | (f) noise and vibration control measures and procedures that will be implemented and as a minimum must include: | 92939 |
| | (1) measures to ensure that all noise and vibration environmental obligations and criteria are met; | 92940 |
| | (2) the use of noise and vibration best management practice to reduce noise and vibration; | 92941 |
| | (3) selection of plant and equipment and noise-reducing components to control and reduce noise impacts; | 92942 |
| | (4) the use of broadband reversing alarms on all plant, site vehicles and delivery vehicles at all times; | 137263 |
| | (5) placement of work compounds, parking areas, equipment and material stockpile sites away from noise-sensitive locations; | 92943 |
| | (6) provision of acoustic enclosures; | 92944 |
| | (7) use of temporary noise barriers and/or mounds; | 92945 |
| | (8) consultation with affected residents and key institutional stakeholders; | 92946 |
| | (9) timing and direction of construction activities and opportunities to combine noisy activities to reduce their impact; | 92947 |
| | (10) use, installation, management and maintenance of environmental control measures, including prompt installation; | 92948 |
| | (11) construction vibration management for various plant items working adjacent to buildings; and | 92949 |
| | (12) monitoring of noise and vibration levels undertaken to provide information on the effectiveness of controls and measures. | 92950 |

Annexure 5 Sustainability Management Plan

5.1 Sustainability Management Plan

92457

- 5.1.1 Project Co must prepare and update the Sustainability Management Plan in accordance with EPR GHG1. 92458
- 5.1.2 The Sustainability Management Plan must be a single volume for the whole of the D&C Activities. As a minimum, it must: 92459
- (a) set out the processes, methodologies and initiatives to be implemented in order to achieve the sustainability requirements contained in the PS&TR during the performance of the D&C Activities; 92460
 - (b) be developed and delivered in accordance with the MMRA Sustainability Management Plan to the extent that it relates to the Works; 92461
 - (c) develop appropriate design and construction responses that comply with the MMRA Sustainability Policy, MMRA Sustainability Strategy and MMRA Sustainability Management Plan to the extent that they relate to the Works; 92462
 - (d) ensure that all relevant Laws, Reference Documents or specific requirements of relevant government agencies, stakeholders and the State are referred to and complied with; 92463
 - (e) include details of the organisational structure of Project Co and its Key Subcontractors, including, but not limited to, identification of those roles with specific sustainability management responsibilities, and a description of the rationale for sustainability management resourcing; 92464
 - (f) demonstrate how sustainability integration will be achieved through other key disciplines by nominating roles with specific sustainability management responsibilities and using cross references to other Management Plans; 92465
 - (g) detail how Project Co, any Subcontractors or any other relevant parties will comply with, monitor and adopt the Sustainability Management Plan; 92466
 - (h) include details of the arrangements for Site inductions and training to ensure that all relevant parties are aware of the requirements of the Sustainability Management Plan; and 92467
 - (i) include details of the processes and responsibilities for: 92468
 - (1) reviewing and updating the Sustainability Management Plan; 92469
 - (2) external and independent review of the Sustainability Management Plan; 92470
 - (3) monitoring and internal auditing arrangements to ensure that all relevant parties comply with the requirements of the Sustainability Management Plan; 92471
 - (4) arrangements for facilitating independent audits of the Sustainability Management Plan and for the prompt and effective rectification of any non-conformances identified during such auditing; and 92472
 - (5) implementing an adaptive approach for the assurance, monitoring, auditing and corrective action for the continuous improvement of reporting on sustainability performance. 92473
- 5.1.3 Project Co must: 92474
- (a) address and detail the processes and methodologies for identifying, tracking and implementing sustainability initiatives into the Works; 92475
 - (b) provide performance milestones for key sustainability initiatives; 92476
 - (c) provide an overarching implementation approach including processes to progressively check the achievement of the minimum IS Rating Tool score of 71 for design and as-built milestones; 92477
 - (d) provide an overarching implementation approach including processes to progressively check the achievement of the minimum GS Rating Tool minimum score of 5 stars for each station; 92478

| | | |
|-------|---|-------|
| | (e) provide an overview of the systems to be adopted to support sustainability management; | 92479 |
| | (f) provide data and inputs to inform the State and the Rail Franchisee public reporting on sustainability performance throughout the design, construction and operation phases of the project; and | 92480 |
| | (g) prepare and implement the following sub-plans as appendices to the Sustainability Management Plan: | 92481 |
| | (1) Urban Ecology and Vegetation Sub-Plan; | 92482 |
| | (2) Climate Resilience Sub-Plan; | 92483 |
| | (3) Carbon and Energy Sub-Plan; | 92484 |
| | (4) Materials and Waste Sub-Plan; and | 92485 |
| | (5) Water Sub-Plan. | 92486 |
| 5.1.4 | The Urban Ecology and Vegetation Sub-Plan must, as a minimum: | 92487 |
| | (a) detail the processes, methodologies and initiatives to be implemented to achieve the urban ecology and vegetation requirements set out in this PS&TR; | 92488 |
| | (b) detail the processes, methodologies and initiatives to be implemented to achieve the requirements outlined in the Biophillic Design Guidelines and the Living Infrastructure Plan; and | 92489 |
| | (c) set out the process for coordinating with specialist contractors engaged by the State or the local council to plant trees and provide soil in tree plots. | 92490 |
| 5.1.5 | The Climate Resilience Sub-Plan must, as a minimum, include; | 92491 |
| | (a) a climate risk assessment, adopting climate change projections and scenarios within the MMRA Adoption of Climate Change Scenarios and Projections Report and, if applicable, providing justification of any deviations from MMRA Climate Risk Assessment; | 92492 |
| | (b) a climate change adaptation plan that identifies existing measures based on the MMRA Climate Change Adaptation Plan and relevant new measures to address climate risks over the forecast lifecycle of the key infrastructure and components; | 92493 |
| | (c) details of the processes, methodologies and initiatives to achieve the climate resilience sustainability requirements in this PS&TR including a workshop with the State and key stakeholders to review, validate and update risk assessments; and | 92494 |
| | (d) the approach to developing and implementing flooding adaptation measures to prevent flooding in the Tunnel in accordance with section 5.2.7 of Part B. | 92495 |
| 5.1.6 | The Carbon and Energy Sub-Plan must, as a minimum: | 92496 |
| | (a) provide a description of the overall approach to the identification of opportunities to reduce greenhouse gas emissions, energy use and embodied lifecycle impacts of the Works, including options for alternative onsite electricity generation; | 92497 |
| | (b) detail low carbon strategies and initiatives that will be implemented to minimise, to the maximum extent possible, the greenhouse emissions associated with the Works to achieve the percentage reduction in section 15.5.3 of Part B; | 92498 |
| | (c) detail energy efficiency strategies and initiatives that will be implemented to minimise energy use and achieve the energy requirements in this PS&TR; | 92499 |
| | (d) demonstrate the understanding of the base case set and verified by the State in the 'ISCA Carbon and Energy Base Case'; | 92500 |
| | (e) include processes to develop a detail design greenhouse gas footprint to demonstrate the achievement of the energy requirements in section 15.5 of Part B; | 92501 |
| | (f) detail how the carbon model provided in the Energy and Carbon Base Case and Reductions Model will be used by Project Co to demonstrate achievement of the energy targets and ISCA energy credit levels; | 92502 |
| | (g) demonstrate how construction equipment will be selected to maximise energy efficiency in line with the construction methodology; | 92503 |
| | (h) detail processes and systems to collect greenhouse gas emissions data during the construction phase; and | 92504 |
| | (i) include processes to develop an as-built greenhouse gas footprint to demonstrate the | 92505 |

| | | |
|-------|--|-------|
| | achievement of the energy requirements in this PS&TR. | |
| 5.1.7 | The Materials and Waste Sub-Plan must, as a minimum: | 92506 |
| | (a) detail the processes and methodologies to achieve the materials and waste requirements in this PS&TR; | 92507 |
| | (b) detail strategies to reduce materials and waste use through design refinement to meet the requirements of section 15.6 of Part B; | 92508 |
| | (c) details strategies to reduce materials and waste by construction planning and construction methods, waste minimisation, recycling and resource recovery; | 92509 |
| | (d) include a detailed design Materials Calculator to demonstrate the achievement of the materials requirements in section 10.6.1.2 of this Part C and section 15.6 of Part B to be implemented in the construction phase; and | 92510 |
| | (e) include an as-built version of the Materials Calculator to demonstrate the achievement of the materials requirements in this PS&TR and monitor, measure and report materials consumption in the Sustainability Report on a monthly basis. | 92511 |
| 5.1.8 | The Water Sub-Plan must, as a minimum: | 92512 |
| | (a) detail the processes and methodologies to achieve the water requirements in this PS&TR for the Works; | 92513 |
| | (b) detail initiatives to be implemented during the performance of the D&C Activities to meet the sustainability requirements in this PS&TR; | 92514 |
| | (c) include evidence to demonstrate that initiatives have been investigated during design and implemented in the construction phase with respect to the following: | 92515 |
| | (1) reduction in potable water usage; | 92516 |
| | (2) replacements of potable water with local non-potable water sources; | 92517 |
| | (3) reduction of overall materials used; | 92518 |
| | (4) implementation of water sensitive urban design initiatives; and | 92519 |
| | (5) use of rainwater or stormwater harvesting; | 92520 |
| | (d) detail how Project Co will work with the State on legacy water offsetting projects in accordance with MMRA Sustainability Strategy; | 92521 |
| | (e) include a detailed design water model to demonstrate the achievement of the water requirements in section 15.7 of Part B to be reviewed by the State at each Design Stage; | 92522 |
| | (f) include an as-built version of the water model to demonstrate the achievement of the water requirements in this PS&TR and monitor, measure and report potable and non-potable water consumption in the Sustainability Report on a monthly basis; and | 92523 |
| | (g) include processes to ensure that all construction equipment requiring water must be selected taking into account the water efficiency of the equipment and associated construction methodology. | 92524 |

Annexure 6 Communications and Stakeholder Engagement Management Plan

| | | |
|------------|--|--------|
| 6.1 | Communications and Stakeholder Engagement Management Plan | 92526 |
| 6.1.1 | Project Co must prepare and update the Communications and Stakeholder Engagement Management Plan (CSEMP). | 92527 |
| 6.1.2 | The CSEMP must: | 92528 |
| | (a) be consistent with all requirements in section 5; | 92529 |
| | (b) be consistent with the Community and Stakeholder Engagement Management Framework developed by the State, as approved by the Minister for Planning, in accordance with EPR SC3; | 118350 |
| | (c) demonstrate how stakeholders including businesses, community members, transport network users and government bodies will be engaged during the planning, detailed design and delivery of the Works; | 92530 |
| | (d) demonstrate how stakeholder issues and concerns, including those set out in Appendix C2, will be identified, documented and addressed; | 92531 |
| | (e) demonstrate how Project Co will establish and engage with the Stakeholder Groups in the Design Review Process; | 92532 |
| | (f) address any relevant Environmental Performance Requirements including: | 92533 |
| | (1) the preparation of the relocation management framework described in EPR SC2, which must be consistent with the Residential Impact Mitigation Guidelines; | 92534 |
| | (2) the preparation of a Business Disruption Plan in accordance with EPR B2, which must be consistent with the Business Support Guidelines for Construction; | 92535 |
| | (3) the preparation of a Community and Business Involvement Plan in accordance with EPRs SC3 and SC4; and | 92536 |
| | (4) the preparation of a communications plan to liaise with potentially affected community stakeholders and land owners regarding potential noise and vibration impacts in accordance with EPR NV5. | 92537 |
| | (g) provide for the appointment of communications, community relations and stakeholder engagement representatives and outline each representative's responsibilities; | 92538 |
| | (h) include: | 92539 |
| | (1) a commitment statement that demonstrates a high level of commitment to stakeholders and that the engagement processes are valued; | 92540 |
| | (2) objectives that determine the level of engagement appropriate to the needs of the Project; | 92541 |
| | (3) an analysis of stakeholders including a table that identifies all relevant stakeholders and indicates their likely level of interest in the project and their likely issues; | 92542 |
| | (4) a community engagement program including a description of project specific stakeholder engagement techniques that respond to the objectives, level of engagement and stakeholder analysis; | 92543 |
| | (5) a timetable, to be updated on a regular basis, including key community engagement milestones and demonstrating early engagement activities and milestones for reviewing and responding to feedback; and | 92544 |
| | (6) a review and evaluation process linked to the stakeholder engagement objectives for the Project, including undertaking research to gauge effectiveness of engagement efforts and community surveys undertaken at least annually during construction and at least one survey during the first two years of operation. The evaluation process must also include the identification and implementation of any | 92545 |

- required corrective actions;
- (i) include procedures to: 92546
 - (1) in accordance with EPR EMF4, manage public enquiries, feedback and complaints concerning the Works and the Project consistent with Australian Standard AS/NSZ 10002:2014 *Guidelines for Complaint Management in Organisations*; 92547
 - (2) record and report on the preparation and distribution of community notices and public materials; 92548
 - (3) build and maintain effective relationships with local communities and stakeholders; 92549
 - (4) respond in a timely and sensitive manner to matters which are of interest or concern to the community, including but not limited to: 92550
 - (A) project design; 92551
 - (B) significant milestones; 92552
 - (C) construction activities including working hours and potential impacts; 92553
 - (D) changed traffic and transport conditions; and 92554
 - (E) changed access arrangements; 92555
 - (5) use both written and online communications: 92556
 - (A) to develop protocols for media management and liaise with the State on key milestones and opportunities for project promotion related to construction activities; 92557
 - (B) to address instances where the construction activities result in material impacts on the transport network; 92558
 - (C) to address incidents occurring in the construction areas which impact on transport network operations; 92559
 - (D) to deal with complaint resolution including escalation beyond Project Co; 92560
 - (E) for the organisation of Site visits, community open days and opening events; and 92561
 - (F) to promote the Project and its benefits; 92562
 - (j) include, at a minimum: 92563
 - (1) initiatives to build community capacity and resilience and to generate positive social outcomes during the delivery of the Works and as a legacy; and 92564
 - (2) the approach to working with local government, not for profit organisations, community groups and other relevant State and Commonwealth agencies to achieve mutually beneficial outcomes; 92565
 - (k) include as appendices to the CSEMP: 92566
 - (1) a Special Events Sub-Plan that addresses proactive identification of, coordination, communication and engagement with Special Event organisers across the Works, including but not limited to those listed in Appendix C4, noting that some major events are planned years in advance; and 92567
 - (2) a crisis communications plan that outlines how communications and media activities, stakeholder and community relations, and interfaces with the State, other contractors, relevant government agencies and emergency services would be managed in a crisis. This plan must be consistent with the Integrated Crisis Framework. 92568

Annexure 7 Health and Safety Management Plan

92569

7.1 Health and Safety Management Plan

92570

- 7.1.1 Project Co must prepare and update the Health and Safety Management Plan in accordance with EPR C4. 92571
- 7.1.2 The Health and Safety Management Plan must: 92572
- (a) describe how workplace health and safety will be managed at each distinct area of the Site, and in relation to the Relevant Infrastructure and the D&C Activities for the duration of the D&C Phase; 92573
 - (b) ensure that the D&C Activities are undertaken in accordance with the principles set out in section 6.1.1; 92574
 - (c) be a single volume for the whole of the D&C Activities (including any D&C Activities performed by Subcontractors); and 92575
 - (d) as a minimum, comply with the following requirements: 92576
 - (1) all applicable OHS Legislation, without limitation, this includes general duty provisions applying to Project Co, Principal Contractor provisions and specific regulations regarding construction work; and 92577
 - (2) BS6164: 2011 and AS4801:2001 or a comparative international standard. 92578
- 7.1.3 The Health and Safety Management Plan must include, as a minimum: 92579
- (a) Project Co's health and safety policy and objectives; 92580
 - (b) demonstration of how the outcomes of the Safety Strategy and Culture Workshop have been incorporated; 92581
 - (c) the Health and Safety Risk Assessment; 92582
 - (d) the details required to be included in a health and safety coordination plan under the OHS Regulations; 92583
 - (e) details of the organisational structure of the Subcontractors including, but not limited to, identification of those roles with specific health and safety responsibilities, such as the roles and responsibilities of the health and safety professionals (including the Occupational Health and Safety Manager) and description of the rationale for safety resourcing; 92584
 - (f) details of how Project Co will manage safety on the Project, including in relation to: 92585
 - (1) underground safety and supervision; 92586
 - (2) any demolition activities; 92587
 - (3) heavy lifting and safe crane operations; 92588
 - (4) HV installation and management; 92589
 - (5) working in confined spaces; 92590
 - (6) traffic and vehicle interaction; 92591
 - (7) management of heavy vehicle movements (giving consideration to the use of GPS tracking to manage heavy vehicle movements) and loading/ unloading; 92592
 - (8) pedestrian and cyclist protection; 92593
 - (9) mental health; 92594
 - (10) occupational illnesses and disease; 92595
 - (11) flood management; 92596
 - (12) spoil management; 92597
 - (13) compliance with the Heavy Vehicle National Law; 92598
 - (14) hazardous materials; 92599
 - (15) fatigue; 92600

| | | |
|------|--|-------|
| (16) | identification of high risk activities and field verification of the effectiveness of critical controls in place to manage those activities; and | 92601 |
| (17) | prevention of impacts to underground services; | 92602 |
| (g) | procedures and responsibilities for: | 92603 |
| (1) | preparation, implementation, review and updating of the Health and Safety Management Plan; | 92604 |
| (2) | identifying hazards and risks associated with the Project Activities, including preparation, review and updating of the Health and Safety Risk Assessment and establishing appropriate controls which must be in accordance with the hierarchy of controls during the Works; | 92605 |
| (3) | providing such information, instruction and training as is necessary to ensure risks are appropriately eliminated or controlled; | 92606 |
| (4) | the management of Subcontractors; | 92607 |
| (5) | ensuring the preparation and implementation of Safe Work Method Statements for all High Risk Work; | 92608 |
| (6) | reviewing the effectiveness of the Health and Safety Management Plan, particular controls implemented under the Health and Safety Management Plan, and where necessary revising the Health and Safety Management Plan and the controls implemented thereunder; | 92609 |
| (7) | monitoring and verification of the effectiveness of critical controls for high risk activities; | 92610 |
| (8) | complying with the Heavy Vehicle National Law; | 92611 |
| (9) | managing hazards and risks associated with fatigue; | 92612 |
| (10) | managing hazards and risks associated with hazardous materials; | 92613 |
| (11) | reporting and investigation of Health and Safety Incidents; | 92614 |
| (12) | reporting and investigation of Health and Safety Incidents that that have the potential to impact a Rail Franchisee's Accreditation. These must be reported immediately or as soon as possible. Any investigation is to be performed to the satisfaction of the Rail Franchisee, with required improvements identified and actions closed out; | 92615 |
| (13) | arrangements for ensuring appropriate Site-specific and task-specific induction and training is undertaken by all relevant Subcontractors and other persons who attend the Site to ensure they are aware of the requirements of the Health and Safety Management Plan and safety controls identified therein; | 92616 |
| (14) | arrangements for ensuring induction and training; | 92617 |
| (15) | arrangements for ensuring training addresses the risk profile and emergency procedures for that part of the Site; | 92618 |
| (16) | performance monitoring and auditing arrangements including an audit schedule; | 92619 |
| (17) | arrangements for facilitating the Health and Safety Management Plan Audit and the Health and Safety Compliance Audits, and for the prompt rectification of any non-conformances identified; | 92620 |
| (18) | arrangements for consulting with Key Subcontractors; | 92621 |
| (19) | arrangements for consulting with and providing safety information to relevant stakeholders; | 92622 |
| (20) | managing public safety during all Project Activities, including control measures and ongoing verification of the effectiveness of these control measures; and | 92623 |
| (21) | consideration of overlapping safety obligations and requirements under the RSNL. | 92624 |
| | | 92625 |

7.2 Emergency Response and Incident Management Plan

| | | |
|-------|--|-------|
| 7.2.1 | Project Co must prepare and update the Emergency Response and Incident Management Plan (ERIMP). | 92626 |
|-------|--|-------|

| | | |
|-------|---|-------|
| 7.2.2 | The ERIMP must comply with OHS Legislation and must ensure reporting and investigation of Health and Safety Incidents by Project Co and all Subcontractors. | 92627 |
| 7.2.3 | The ERIMP must, at a minimum, provide details of the following: | 92628 |
| | (a) roles and responsibilities in the event of an Emergency or crisis; | 92629 |
| | (b) procedures for managing and controlling Emergencies, Incidents or crises; | 92630 |
| | (c) details of safe egress or evacuation of the Site following an Incident or Emergency; | 92631 |
| | (d) emergency and crisis contacts list (including contacts for out of hours); | 92632 |
| | (e) details of first aid and emergency equipment kept on Site; | 92633 |
| | (f) procedures for locating and/or identifying all workers who may have been involved in or affected by the Emergency or Incident; | 92634 |
| | (g) procedures for training workers in relation to Emergencies and Incidents; | 92635 |
| | (h) details of possible emergency or crisis scenarios that may occur during the Works and how those emergencies are proposed to be managed; | 92636 |
| | (i) details for contacting, notifying and interfacing with relevant government agencies, Emergency Service Organisations and other relevant stakeholders, such as Utility Providers and municipal councils; | 92637 |
| | (j) specific Emergency Service Organisations' information relating to their respective capabilities and functions. This information must be sourced directly from the relevant Emergency Service Organisations or from the State; | 92638 |
| | (k) procedures for the immediate notification to the State of incidents which may give rise to a public interest or be communicated to Victorians through the media; | 92639 |
| | (l) means for compliance with and coordination of any other emergency notification requirements under the Agreement; and | 92640 |
| | (m) procedures for testing and reviewing the ERIMP throughout the Term. | 92641 |
| 7.2.4 | The ERIMP must address and be consistent with the Integrated Crisis Framework | 92642 |

Annexure 8 Design Management Plan

92643

8.1 Design Management Plan

92644

8.1.1 Project Co must prepare and update the Design Management Plan.

92645

8.1.2 The Design Management Plan must:

92646

(a) identify how Project Co will manage the design development process in order to comply with the design requirements of the Agreement;

92647

(b) cover all aspects of the Works;

92648

(c) detail the proposed approach to identification and application of standards during the design development process including consideration of variances between or gaps in standards and how these will be addressed;

92649

(d) include a schedule of Design Packages;

92650

(e) identify which Design Packages will be reviewed by the Lead Architect prior to submission of Design Documentation to the Independent Reviewer;

150501

(f) for each Design Package, list technical specifications and standards applicable to the Design Package;

92651

(g) identify how Project Co will manage the design development process for the Accelerated Design Packages;

92652

(h) include a design process flow chart that describes the design development process for all Design Packages including any Accelerated Design Packages;

92653

(i) include a design program to ensure that Design Documentation is submitted in package sizes and timings that are reasonable and manageable to enable the State, Independent Reviewer and/or Returned Asset Owner to carry out their obligations and respond within required timeframes;

92654

(j) detail Project Co's approach to conducting Stage Gate Reviews during the design development process;

92655

(k) detail Project Co's approach to achieving and demonstrating Level 0 Systems Integration;

92656

(l) provide within the organisational structure of the D&C Subcontractor the key position roles and the minimum skills and experience required for each position in the D&C Subcontractor's design team, including its subcontractors, its design verifiers and the position of Proof Engineer;

92657

(m) describes the processes to be used to assure the quality of the design, including:

92658

(1) a mechanism for incorporating the comments of the Independent reviewer, the State or any Stakeholder Groups involved in the design development process as set out in the Design Review Schedule;

92659

(2) details of the processes in relation to risk management and Safety In Design (including the development of risk registers and the reporting of residual risk in accordance with AS/NZS ISO 31000:2009 – Risk management – Principles and guidelines);

92660

(3) details of the processes in relation to quality assurance certification;

92661

(4) details of the processes in relation to compliance with the Agreement;

92662

(5) the design reviews in accordance with the Design Review Schedule;

92663

(6) details of the processes in relation to design change management;

92664

(7) details of the management and coordination of design interfaces, including interfaces with other design disciplines and with interfacing works;

92665

(8) details of the design verification (including in relation to proof engineering and the Temporary Works), interdisciplinary checks, validation and certification processes, including providing a verification, validation and certification schedule;

92666

| | | |
|------------|--|--------|
| | and | |
| | (9) in relation to management review and approval; | 92667 |
| (n) | include details of the design co-ordination requirements for design reviews, risk assessments, risk management workshops, comments and co-ordination meetings among each of the design disciplines and with the State and other stakeholders including, where appropriate, any parties carrying out Related State Project Works; | 92668 |
| (o) | include details of the processes to be used for the preparation and submission of As-Built Records and utility asset information; | 92669 |
| (p) | describe the process for providing design updates in the Monthly D&C Phase Progress Report prepared in accordance with section 1.4.2.3(b) that summarises the status and progress of the design and records discussion and decisions affecting the design and construction; | 92670 |
| (q) | contain the following as appendices: | 92671 |
| | (1) a SiD Management Sub-Plan that addresses how Safety In Design must be implemented; | 92672 |
| | (2) [Not disclosed] | 92673 |
| | (3) an Electromagnetic Compatibility Management Plan as set out below; | 92674 |
| | (4) a Durability Management Sub-Plan that addresses how durability requirements and standards will be complied with during the design development; | 92675 |
| | (5) a Modelling Management Sub-Plan that describes the modelling procedures, including review and verification, and addresses how modelling requirements will be met in relation to the Works; and | 92676 |
| | (6) a Wheel/ Rail Interface Management Sub-Plan, including: | 118023 |
| | (A) consideration of HCMT wheel profile and type, rail deflection, bending stresses, longitudinal stresses and wheel rail contact stresses and defects (including potential for corrugations, rolling contact fatigue and other rail head defects to develop); | 118024 |
| | (B) determination of the grade/type of rail required (e.g. standard carbon, head hardened etc.); and | 118025 |
| | (C) assessment of the need and/or suitability for track based rail lubrication or friction modifiers; and | 118026 |
| | (D) a Blast Assessment Sub-Plan. | 150503 |
| (r) | include processes and allocation of responsibilities that will ensure that: | 92677 |
| | (1) the Interim Design Documentation complies with section 7.5.2; | 92678 |
| | (2) the Certified Design Documentation complies with section 7.5.3; and | 92679 |
| | (3) the documentation, certification and notification of proposed changes to IFC Design Documentation comply with section 7.5.4. | 92680 |
| | | 92681 |
| 8.2 | Electromagnetic Compatibility Management Plan | |
| 8.2.1 | Project Co must prepare and update the Electromagnetic Compatibility (EMC) Management Plan. | 92682 |
| 8.2.2 | The EMC Management Plan must: | 92683 |
| | (a) consider the electromagnetic emissions generated by the Works as a whole throughout the different phases of the Project as follows: | 92684 |
| | (1) trials; | 92685 |
| | (2) construction; | 92686 |
| | (3) commissioning; | 92687 |
| | (4) testing; | 92688 |
| | (5) operation (for all modes of operation); | 92689 |
| | (6) maintenance; | 92690 |

- (7) decommissioning; and 92691
- (8) on the safe and correct operation of any other adjacent railway infrastructure or relevant 3rd party stakeholders; 92692
- (b) include an EMC hazard identification; 92693
- (c) include provisions for obtaining assurance and certification for each system that makes up the Works; 92694
- (d) include provisions for the maintenance of an “EMC Project File” that contains, as a minimum, the following: 92695
 - (1) EMC Management Plan; 92696
 - (2) EMC risk analysis; 92697
 - (3) EMC design review; 92698
 - (4) EMC pre site survey (measured background electromagnetic interference); 92699
 - (5) EMC equipment test report; and 92700
 - (6) EMC compliance matrix and associated technical files; 92701
- (e) provide for performing EMC studies to determine the impact of earthing and bonding connections between the Rail Infrastructure assets and the neighbouring railway infrastructure (wider area), businesses, residences and utilities.; 92702
- (f) include an EMC test strategy to address EMC across the Works; 92703
- (g) provide for an EMC study regarding the interaction between the train detection system and rolling stock according to IEC 62427 for the tunnel and stations where signalling infrastructure is modified or added as part of the Works; and 92704
- (h) provide for a register of non-conformant items (regarding EMC), for equipment that fails to achieve the appropriate standards or specific requirements. 92705

Annexure 9 Transport Management Plans

92706

9.1 Transport Management Plan

92707

9.1.1 Project Co must prepare and update the Transport Management Plan in accordance with EPR T2. 92708

9.1.2 The Transport Management Plan must: 92709

- (a) be a single overarching document for the whole of the Works; 92710
- (b) comply with the relevant Environmental Performance Requirements; 92711
- (c) consider all modes of transport including pedestrians, cyclists, cars, buses, trams and trucks; and 92712
- (d) optimise movements based upon the modal priorities provided in Part B, Appendix B4. 92713

92714

9.2 Traffic Management Plan

9.2.1 Project Co must prepare and update the Traffic Management Plans. 92715

9.2.2 The Traffic Management Plans (**TMPs**) must: 92716

- (a) address any Environmental Requirements; 92717
- (b) be consistent with the Transport Management Plan; 92718
- (c) demonstrate how the transport network will be safely and effectively managed in each Precinct throughout the D&C Phase for all vehicles, cyclists, pedestrians, public transport users and construction personnel, with clear and accurate information for all users; 92719
- (d) comply with the *Road Management Act 2004*, the *Worksite Safety – Traffic Management Code of Practice under the Road Management Act 2004* and the Agreement; 92720
- (e) be prepared by VicRoads prequalified consultants; 92721
- (f) address and ensure compliance with the requirements of all Authorities; 92722
- (g) include area strategies for proposed traffic management arrangements for each location where vehicles, cyclists, pedestrians and public transport may be affected; 92723
- (h) detail the approach to implementing mitigation measures determined in consultation with key institutional stakeholders in accordance with 5.2.1.7; 92724
- (i) be supported by traffic data and analysis to demonstrate that traffic impacts will be minimised and showing the proposed staging provisions for: 92725
 - (1) temporary transport and pedestrian routes; 92726
 - (2) managing restricted lane widths; 92727
 - (3) construction clear zones; and 92728
 - (4) property access arrangements; and 92729
- (j) include procedures and responsibilities for managing and reporting traffic accidents and incidents. 92730

9.2.3 Project Co must prepare a TMP for each Precinct that aligns with the Transport Management Plan and includes as a minimum: 92731

- (a) the purpose and objectives of the TMP; 92732
- (b) a schedule of events expected to impact on the transport network including an outline of proposals for any closure or other activity (including routes beyond the Site) and proposed timeframes; 92733
- (c) procedures and responsibilities for preparing, reviewing and updating the WTMPs; 92734
- (d) transport analysis to verify the adequacy of the TMP and any WTMP; 92735
- (e) independent Road Safety Audits, in accordance with section 9.9, of WTMPs and associated TGS; 92736

| | | |
|-------|--|-------|
| | (f) a process to meet all relevant program and approval requirements for TMPs and WTMPs; | 92737 |
| | (g) development and implementation of communications requirements in accordance with section 5; and | 92738 |
| | (h) processes for implementing, auditing and adjusting the WTMPs. | 92739 |
| 9.2.4 | TMPs must: | 92740 |
| | (a) show any changes to the proposed arrangements for staging the Works, including Temporary Works, and for managing vehicles, pedestrians, cyclists, public transport and construction traffic; | 92741 |
| | (b) include the requirements of all Responsible Road Authorities including the in-principle agreements of the Responsible Road Authorities; | 92742 |
| | (c) include submission of VicRoads Planned Road/Lane Closure Advice form for inclusion in roadworks bulletins; | 92743 |
| | (d) include arrangements for Site induction to ensure that the relevant personnel are aware of the requirements of the TMP and the requirements of specific TMPs and WTMPs; | 92744 |
| | (e) include processes for reviewing the appropriateness of the design standards adopted for TMPs and WTMPs; | 92745 |
| | (f) include a schedule of relevant standards, specifications, Laws, Regulatory Requirements and other requirements in accordance with which the WTMPs are prepared; | 92746 |
| | (g) include detail of the impacts on local roads, due to transport diversions or altered travel patterns, including details of the following: | 92747 |
| | (1) provision of advance notice; | 92748 |
| | (2) signage indicating changes due to the truncation, realignment and other alterations of roads shown in Project Co's design; and | 92749 |
| | (3) signage indicating alternative routes/detours that have been agreed to by the Responsible Road Authority(s); | 92750 |
| | (h) include the use of Variable Message Sign (VMS) as follows: | 92751 |
| | (1) where advanced notification is required for any Traffic Event that requires traffic to utilise an alternate route (other than a side track / localised diversion road) and/or which results in traffic being delayed by more than 5 minutes, a minimum of one VMS must be provided on each road approach, placed continuously from 7 days prior to the proposed Traffic Event; | 92752 |
| | (2) a VMS must be in place for at least the first 7 days of any Traffic Event (or, if the duration of the Traffic Event is less than 7 days, the full duration of the Traffic Event) that requires traffic to utilise an alternate route and/or which results in traffic being delayed by more than 5 minutes. Static signs may be used for any duration beyond 7 days; | 92753 |
| | (3) Project Co should where possible seek to utilise existing fixed VMSs operated by VicRoads; | 92754 |
| | (4) the message and panel format proposed for static signs and/or VMSs must be in accordance with the Worksite Safety – Traffic Management Code of Practice; and | 92755 |
| | (5) the placing of VMSs must not obstruct the movement of pedestrians or cyclists, or obscure driver sightlines, traffic signals or existing road signs; | 92756 |
| | (i) include protocols for communication of traffic impacts to motorists, and notices to property owners/occupiers whose access is affected in accordance with Annexure 9, section 9.2.4(c); | 92757 |
| | (j) include provision of formal advice to all relevant stakeholders, including but not limited to residents, businesses, schools, community groups, municipal councils, road user groups, public transport, affected individuals and emergency services affected in accordance with Annexure 9, section 9.2.4(c) prior to a proposed Traffic Event; | 92758 |
| | (k) include emergency contacts including emergency services and other relevant Authorities and procedures to ensure after hours attendance at the Site in the event of an | 92759 |

| | | |
|------------|---|-------|
| | emergency; | |
| (l) | include drawings that demonstrate the proposed traffic staging methodology for each section of the Works and clearly identify the stages of the Works or particular activities for which individual WTMPs are produced. Drawings must include details of barriers and associated widths of 'no go zones' and lane widths and shoulder widths; | 92760 |
| (m) | include the timetable which outlines the proposed timeframe for commencement of stages of the Works or particular activities identified above, and the timetable for the submission and implementation of any WTMP and associated TGS; | 92761 |
| (n) | processes for liaison and co-ordination with Responsible Road Authorities and any parties undertaking adjacent works or activities; | 92762 |
| (o) | the proposed arrangements for the management of traffic within the Site, including routes within the Site from Site access points to Work areas and delivery points; | 92763 |
| (p) | the proposed arrangements for managing vehicle movements in and outside of the worksite including management of interactions with both pedestrian and bicycle movements. | 92764 |
| (q) | the proposed diversion routes for emergency services accessing all major hospitals affected by the Works; | 92765 |
| (r) | allow a minimum period of 10 Business Days' notice for providing advice to Emergency Service Organisations of Works requiring diversion routes. | 92766 |
| | | 92767 |
| 9.3 | Worksite Traffic Management Plan (WTMP) | |
| 9.3.1 | Project Co must prepare and update the WTMPs. | 92768 |
| 9.3.2 | The WTMPs must: | 92769 |
| (a) | provide for the management of the performance of discrete stages or components of the Works and Temporary Works that have an impact on (or on users of) roads, shared use paths, footpaths or public transport infrastructure. | 92770 |
| (b) | be prepared in accordance with the following: | 92771 |
| (1) | the Transport Management Plan and relevant TMPs; | 92772 |
| (2) | the Road Management Act 2004 Worksite Safety – Traffic Management Code of Practice; | 92773 |
| (3) | Austrroads Guides; and | 92774 |
| (4) | AS 1742.3: Traffic control for Works on Roads; and | 92775 |
| (c) | be live documents that are updated in response to changed traffic conditions. | 92776 |
| 9.3.3 | Project Co must obtain all necessary approval of the WTMP from the Responsible Road Authority, and coordinate/implement any arrangements associated with the WTMPs. | 92777 |
| 9.3.4 | Each WTMP must be a complete document incorporating the following: | 92778 |
| (a) | an introduction describing the WTMP, its purpose and justification including alternatives considered; | 92779 |
| (b) | measures to adequately control vehicle, bicycle, pedestrian and public transport movements including consideration of passengers; | 92780 |
| (c) | worksite hazard assessments in accordance with the Worksite Safety – Traffic Management Code of Practice; | 92781 |
| (d) | results of transport analysis demonstrating the impacts of proposed arrangement(s); | 92782 |
| (e) | the location and extent of any proposed road, footpath, tramway, bus lane, cycle path or lane closures or other event that impacts on transport users; | 92783 |
| (f) | proposed operating conditions including speed limits; | 92784 |
| (g) | the timing of any proposed road or lane closures or other event that impacts on traffic; | 92785 |
| (h) | transport movements at intersections that are proposed to be prohibited (if any) and the transport movements normally prohibited that are proposed to be allowed (if any); | 92786 |
| (i) | any proposed signage and pavement markings, including any changes to the existing signage and/or pavement markings; | 92787 |

| | |
|---|-------|
| (j) modifications proposed to existing traffic control devices and onroad services including but not limited to traffic signals and traffic signal phasing, help phones, incident detection loops, control boxes and closed circuit television; | 92788 |
| (k) the location of any proposed temporary traffic signals; | 92789 |
| (l) notification, including the submission of any Memorandum of Authorisation (provided to Project Co from the Responsible Road Authority) of any Major Traffic Control Devices proposed or affected, which require installation, removal and/or alteration. If a Major Traffic Control Device is proposed or affected as above, then the Memorandum of Authorisation is required from VicRoads, irrespective of whether the Responsible Road Authority is VicRoads or a municipal council; | 92790 |
| (m) CAD drawings that clearly show the proposed transport staging; | 92791 |
| (n) the detours proposed, including details of the proposed signing scheme for such detours (if different from the TMP); | 92792 |
| (o) replacement public transport services; | 92793 |
| (p) the following details for proposed side tracks: | 92794 |
| (1) the geometry of the side track; and | 92795 |
| (2) the details of surfacing treatment and, where applicable, the associated maintenance regime; | 92796 |
| (q) measures proposed to mitigate the disruption to transport, including transport that is disrupted outside the Site; | 92797 |
| (r) evidence of the agreement of the Responsible Road Authority; | 92798 |
| (s) an implementation program for the Traffic Event; | 92799 |
| (t) a complete list of relevant contacts including Project Co, the State, Emergency Service Organisations, Authorities and service providers; | 92800 |
| (u) the findings and actions from a Road Safety Audit; | 92801 |
| (v) arrangements for Road Safety Audits after implementation of the WTMP; | 92802 |
| (w) arrangements for the provision of temporary low clearance warning gauges in accordance with section 10.9.4 (if applicable); and | 92803 |
| (x) a TGS as set out in section 9.6.5. | 92804 |

Annexure 10 Construction Management Plans

92805

10.1 Construction Management Plan

92806

- 10.1.1 Project Co must prepare and update the Construction Management Plan. 92807
- 10.1.2 The Construction Management Plan may be one volume for the whole of the Works or may be submitted as an overarching Construction Management Plan and multiple Site Construction Management Plans. 92808
- 10.1.3 In either case, the Construction Management Plan/s must: 92809
- (a) address any relevant Environmental Performance Requirements including; 92810
 - (1) the preparation of a Ground Movement Plan in accordance with EPR GM3; 92811
 - (2) the preparation of a Groundwater Management Plan in accordance with EPR GW3; 92812
 - (3) the preparation of a Dust Management Plan describing dust management and monitoring activities in accordance with EPR AQ1, including in respect of St Paul's Cathedral; and 92813
 - (4) the relocation management framework described in EPR SC2, which must be consistent with Residential Impact Mitigation Guidelines (and may be cross referenced to the CSEMP); 92814
 - (5) the preparation of a Business Disruption Plan in accordance with EPR B2, which must be consistent with the Business Support Guidelines for Construction (and may be cross referenced to the CSEMP); 92815
 - (b) detail processes and methodologies for ensuring that the Works will be appropriate for the long term operation of Melbourne Metro; 92816
 - (c) include a schedule of Construction Packages; 92817
 - (d) for each Construction Package: 92818
 - (1) list technical specifications and construction standards applicable to each Construction Package 92819
 - (2) include procedures for the monthly updating, monitoring and review of the D&C Program and the monthly progress summary required by sections 2.2.1 and 2.2.2; and 92820
 - (3) include procedures for the development and approval of Construction Documentation complying with section 10.4; 92821
 - (e) include: 92822
 - (1) records management indexing protocols that will enable referencing of all design and construction records back to Construction Packages, and Construction Packages to Asset, work type and location; and 92823
 - (2) procedures to ensure progressive development, closure and storage of As-Built Records in accordance with section 1.3.5; 92824
 - (f) provide a framework for delivery of components of the Works within each construction zone including an outline of the Construction Packages required within the zone; 92825
 - (g) for each construction site, provide a detailed site establishment and management plan that specifies the nature, extent, location and operation of construction compounds and ancillary facilities and environmental considerations and management; 92826
 - (h) provide detailed construction methodologies for each major construction stage and or key activity, including piling, diaphragm wall installation, ground support, tunneling, underground mining, excavation, station construction, services facilities construction including construction staging, sequencing and techniques; 92827
 - (i) provide details of bored piling, diaphragm wall installation, tunneling, underground mining and excavation equipment, including water sealing and probing arrangements for 92828

- road-headers and tunnel boring machines;
- (j) include details of the physical resources in terms of plant, equipment, materials that will be used for the construction of the Works including the Temporary Works; 92829
 - (k) provide the construction management team structure, including key personnel, authority and roles of key personnel, lines of responsibility and communication, minimum skill level of each role and interfaces with the overall project organisation structure; 92830
 - (l) provide proposed procurement and contracting strategies for key subcontractors and suppliers, along with strategies and processes for their engagement and management; 92831
 - (m) provide processes for construction risk assessment and construction risk mitigation, including a register of key construction risks including noise, vibration and other community impacts and proposed mitigation measures; 92832
 - (n) include relevant details from or cross references to the EMC Management Plan; 92833
 - (o) detail measures to be implemented to mitigate impacts to key institutional stakeholders as determined in accordance with 5.2.1.7, which may include: 92834
 - (1) the restriction of working hours during particular construction activities; 92835
 - (2) additional communication measures (for example information packages for hospital patients and visitors, provision of travel information to hospital visitors, support updating websites and other published information); 92836
 - (3) building and public realm modifications for access purposes; 92837
 - (4) works to sensitive receivers to reduce impacts (for example double glazing, ground support, vibration isolation, EMI isolation); and 92838
 - (5) relocation of facilities, services or equipment and their staff (for example relocation of medical diagnostic equipment, research instruments, bio-resources); 92839
 - (p) provide management strategies for utility service works and local area works, including coordination and interfacing with Authorities; 92840
 - (q) set out processes for collection, presentation and management of subsurface and surface utilities data, which must be consistent with the MMRA Underground Utilities Survey Guideline; 92841
 - (r) set out processes for the protection of underground utilities which must be consistent with the requirements of Appendix C5; 92842
 - (s) set out processes for ensuring the adequacy and safety of Temporary Works; 92843
 - (t) include a protocol for notification of all Incidents; 92844
 - (u) outline safe processes for each element of work and how outcomes of the safety in design processes identified in the Design Management Plan are to be incorporated into the construction activities to ensure these outcomes are achieved; 92845
 - (v) address access to the Construction Site and to affected properties; 92846
 - (w) detail, in a schedule, the necessary property works and utility service works; 92847
 - (x) detail maintenance methods to be used during construction; 92848
 - (y) address security of the Works, Temporary Works and the Construction Site; 92849
 - (z) include procedures in relation to survey and condition monitoring; 92850
 - (aa) provide processes for the development and management of Construction Procedures; 92851
 - (bb) detail how design performance and durability requirements are to be addressed and satisfied during the D&C Activities; 92852
 - (cc) provide, in a schedule, the required construction Approvals and the process and program for obtaining construction Approvals; 92853
 - (dd) provide processes for the provision of up-to-date information to the State and Independent Reviewer; and include a detailed tunneling, underground mining and excavation management plan that deals with key issues associated with tunneling, underground mining and excavation, including: 92854
 - (1) excavation stability; 92855
 - (2) groundwater control; 92856
 - (3) construction techniques and resources; 92857

- (4) construction techniques for work carried out in areas of contaminated material and acid sulphate soil and rock; 92858
- (5) monitoring of encountered geotechnical conditions and validation of design assumptions; and 92859
- (6) recording of encountered geotechnical conditions; 92860
- (ee) include a detailed plan which specifically describes the works associated with the concrete batching plant and precast concrete manufacturing facility (including tunnel precast segments) and associated support facilities including environmental considerations and management, site establishment, site layout, facility assembly and operation, resources and site decommissioning; and 92861
- (ff) detail interactions with any other Management Plans. 92862

10.2 Mobilisation Management Plan 92863

- 10.2.1 Project Co must prepare and update the Mobilisation Management Plan, including a D&C Mobilisation Program. 92864
- 10.2.2 The Mobilisation Management Plan must describe the mobilisation process, including Project Co's mobilisation requirements at each part of the Site that the Works will be performed and relevant conditions and timeframes. 92865
- 10.2.3 The Mobilisation Management Plan must provide assurance that critical design and construction activities will be able to commence at each site as planned. As a minimum the Mobilisation Management Plan must address: 92866
 - (a) mobilisation of facilities such as project office, design office, and specific site establishments including any necessary property acquisitions; 92867
 - (b) identification of any Utility relocations or protection required to facilitate site establishments; 92868
 - (c) mobilisation of key personnel, whether consultant, principal contractor or subcontractor required to achieve pre-construction activities such as from consortium parent organisations, major consultancies, and subcontractors, and any key recruitment activities; 92869
 - (d) mobilisation of key delivery personnel of the D&C Subcontractor including but not limited to: 92870
 - (1) project director; 92871
 - (2) construction director(s); 92872
 - (3) occupational health and safety manager; 92873
 - (4) environment manager; 92874
 - (5) sustainability manager; 92875
 - (6) quality manager; 92876
 - (7) TBM tunnel project manager; 92877
 - (8) mined tunnels and caverns manager; 92878
 - (9) design director/manager; 92879
 - (10) lead fire engineer; 92880
 - (11) system integration and commissioning manager; 92881
 - (12) general superintendent; 92882
 - (13) station(s) project manager(s); 92883
 - (14) segment manager; 92884
 - (15) mechanical and electrical manager; 92885
 - (16) mechanical and electrical superintendent (temporary facilities and operations); 92886
 - (17) Temporary Works coordinator; 92887
 - (18) Chief E&M coordinator; 92888

| | |
|---|-------|
| (19) architectural project manager; | 92889 |
| (20) building surveyor; | 92890 |
| (21) communications and stakeholder engagement manager; | 92891 |
| (22) inter-agencies coordination manager; | 92892 |
| (23) program manager; | 92893 |
| (24) traffic coordinator(s); | 92894 |
| (25) utilities coordinator(s); and | 92895 |
| (26) compliance manager; | 92896 |
| (e) obtaining relevant stakeholder approvals required prior to mobilising to worksites and commencing construction including statutory approvals, permits, and secondary consents; | 92897 |
| (f) finalisation and approval of Management Plans that detail management of project aspects including scope, integration, time, cost, procurement, methodology, environmental, quality, risk, OHS, human resources, communications, and stakeholders; | 92898 |
| (g) detailed design development through to issue of IFC designs for initial Design Packages, including identification of relevant technical approving authorities; | 92898 |
| (h) establishment of key information management systems and processes such as document repositories and transmittals; | 92900 |
| (i) procurement and suppliers of major plant, materials, equipment and subcontractors, including key management systems and processes and identification of commercial levels of authority; | 92901 |
| (j) procurement of major plant including: | 92902 |
| (1) new tunnel boring machines; | 92903 |
| (2) road headers; | 92904 |
| (3) specialist foundation equipment; | 92905 |
| (4) spoil conveyance systems and equipment (i.e. rolling stock, conveyors); | 92906 |
| (5) slurry treatment plants; | 92907 |
| (6) noise attenuation systems; | 92908 |
| (7) segment moulds; | 92909 |
| (8) concrete supply; | 92910 |
| (9) reinforcement supply; | 92911 |
| (10) permanent MEP provisions; | 92912 |
| (11) specialist earth retention systems; and | 92913 |
| (12) specialist grouting equipment; | 92914 |
| (k) pre-construction condition surveys of structures at relevant sites; and | 92915 |
| (l) geotechnical and hydrogeological Site investigations and laboratory tests to support and inform development of initial Design Packages. | 92916 |
| | 92951 |

10.3 Spoil Management Plan

| | | |
|--------|--|-------|
| 10.3.1 | Prior to construction of main works or shafts, Project Co must prepare, implement and update the Spoil Management Plan in accordance with the EPR C1. | 92952 |
| 10.3.2 | The Spoil Management Plan must: | 92953 |
| | (a) be prepared in accordance with the State's Spoil Management Strategy (as exhibited in the EES) and relevant regulations, standards and best practice guidance; | 92954 |
| | (b) be developed in consultation with and to the satisfaction of the EPA; | 92955 |
| | (c) include, but not be limited to: | 92956 |
| | (1) identifying applicable regulatory requirements; | 92957 |
| | (2) identifying the nature and extent of spoil (clean fill, contaminated spoil, and acid | 92958 |

- sulphate soil and rock) across all precincts;
- (3) roles and responsibilities; 92959
- (4) identifying management measures for handling and transport of spoil for the protection of health and the environment, including methodologies for on-site spoil handling, on site storage and stock piling arrangements, testing (including for contamination and acid sulphate soil and rock), methods of loading, transportation, haulage rates and environmental mitigation measures; 92960
- (5) identifying, designing and developing specific environmental management plans for temporary stockpile areas; 92961
- (6) identifying suitable sites for re-use, management or disposal of any spoil; 92962
- (7) monitoring and reporting, including extraction volumes and reuse and disposal locations; and 92963
- (8) sub-plans as required by the Environmental Performance Requirements, including: 92964
 - (A) an Acid Sulfate Soil and Rock (**ASS/ASR**) Management Sub-Plan in accordance with EPR C2; and 92965
 - (B) a Prescribed Industrial Waste (**PIW**) Management Sub-Plan. 92966

10.4 Monitoring Management Plan

- 10.4.1 Project Co must prepare and update the Monitoring Management Plan. 92968
- 10.4.2 The Monitoring Management Plan must: 92969
 - (a) address the relevant Environmental Performance Requirements; 92970
 - (b) include any usual requirements of relevant Authorities and stakeholders; 92971
 - (c) provide the monitoring and protection management team structure, including key personnel, authority and roles of key personnel, lines of responsibility and communication, minimum skill levels of each role and interfaces with the overall project organization structure; 92972
 - (d) detail the approach to implementing mitigation measures determined in consultation with key institutional stakeholders in accordance with 5.2.1.7; 92973
 - (e) detail the equipment, devices, locations and processes to be used for monitoring settlement and movement, noise, vibration, groundwater levels and discharge water quality; 92974
 - (f) include the establishment of the baseline conditions; 92975
 - (g) address the requirements for groundwater modelling; 92976
 - (h) include the establishment of predicted impacts and mitigation measures; 92977
 - (i) detail processes and methodologies for monitoring the actual effects of the Works on existing ground conditions and infrastructure; 92978
 - (j) include processes and methodologies for monitoring encountered geotechnical conditions, verifying geotechnical and design assumptions and actions required if monitoring results do not confirm any geotechnical or design assumption; 92979
 - (k) include processes and methodologies for the ongoing review of the effectiveness of the monitoring systems and development and modification of the monitoring systems; 92980
 - (l) include processes and methodology to identify and protect existing infrastructure during construction of the Works and Temporary Works including actions that may be required if monitoring indicates that impacts are different from predicted impacts in material respects; 92981
 - (m) detail the Predicted Effects of the Works, temporary works and the D&C Activities on existing ground conditions, infrastructure, properties and utilities; 92982
 - (n) describe the approach to undertaking pre-construction and post-construction condition surveys for ground conditions and existing infrastructure, properties and utilities; 92983
 - (o) include processes for the management of monitoring data and information; 92984
 - (p) outline how existing infrastructure will be protected from the impact of the Works, 92985

temporary works and the D&C Activities including actions that may be required if monitoring indicates that impacts are different from predicted impacts in material respects; and

- (q) detail interactions with the other Management Plans.

92986

92987

Table 13-2: Minimum Monitoring Requirements

| Area | Item | Minimum Monitoring Requirement |
|---|----------------------------------|---|
| Condition Assessments and Monitoring of Existing Assets | Building Asset Condition Surveys | Survey Control Pre & Post Condition Surveys |
| | Building Monitoring | Survey Control including but not limited to: Automated deformation monitoring; Automated robotic stations; Tiltmeters and reflector survey prisms; and Tilt beams / electro level sensors |
| | Building Condition Monitoring | Pre & Post Condition Surveys |
| | Internal Basements | Survey Control Pre & Post Condition Surveys |
| Ground Movement (Project Wide) | Ground Monitoring | Survey Control |
| Ground Movement (Local to the Structure) | Ground Monitoring | Extensometers and Inclinometers |
| Ground Water Monitoring | Ground Water Monitoring | Piezometers and Standpipes |
| Temporary Works Monitoring | Temporary Works Monitoring | Extensometer |
| Ground Movement (Rail Reserve) | Remote Ground Monitoring | Survey Control (frequency and notification periods/ protocols subject to agreement with the Train Franchisee) |

92988

10.5 Demolition Management Plan

10.5.1 Project Co must prepare and update the Demolition Management Plan.

92989

10.5.2 The Demolition Management Plan must comply with OHS Legislation including, without limitation, the requirements of AS 2601- 2001 The demolition of structures and Compliance Code 'Removing Asbestos in workplaces', September 2008, and contain, at a minimum, details of the following:

92990

- (a) approach to OHS and include copy of relevant OHS documentation, including OHS policy and procedures;
- (b) procedure of ensuring compliance with OHS Legislation and contractual obligations;
- (c) demolition subcontractor team structure, including key personnel, authority and roles of key personnel, lines of responsibility and communication, minimum skill levels of each role and interfaces with the overall project organization structure;
- (d) the general principles to be adopted throughout the works, to minimize the impact of the hazardous material removed and demolition works on the surrounding areas;
- (e) site access, site mobilisation, demolition, disposal and haulage methodology and the

92991

92992

92993

92994

92995

| | | |
|-------------|---|-------|
| | management measures to avoid, reduce, reuse and recycle waste, including details of proposed beneficial reuse of demolished material; | |
| (f) | hours of operation, public and property protection, noise, dust management, odour control, storage of dangerous goods, water quality / storm water runoff, waste management and recycling, hazardous materials management, traffic and pedestrian management and services disconnections; | 92996 |
| (g) | demolition methodology for existing buildings and structures, and protection plan for adjacent/ neighboring properties, including: | 92997 |
| | (1) construction methods, plant and equipment to be used for the Demolition Works; | 92998 |
| | (2) staging of the Demolition Works; and | 92999 |
| | (3) disposal of the demolition materials; | 93000 |
| (h) | process of identifying and managing risks and establishing OHS systems and procedures; | 93001 |
| (i) | process of establishing adequate Site safety facilities; | 93002 |
| (j) | procedures of safe access and egress from the Site; | 93003 |
| (k) | emergency response and incident management procedures; | 93004 |
| (l) | systems of reporting incidents, near misses and hazards; | 93005 |
| (m) | system of risk assessment, inspection and maintenance of plant, including process of ensuring any applicable licensing and registration requirements will be complied with; | 93006 |
| (n) | system of providing necessary information, instruction, training and supervision, including induction and task-specific training; | 93007 |
| (o) | compliance with the requirements of WorkSafe Code of Practice No. 14 Demolition; | 93008 |
| (p) | procedure of ensuring timely approval of all safety approvals required for the Demolition Works; | 93009 |
| (q) | traffic management; and | 93010 |
| (r) | monitoring and auditing procedures. | 93011 |
| | | 93012 |
| 10.6 | Rail Access Management Plan | |
| 10.6.1 | Project Co must prepare and update the Rail Access Management Plan. | 93013 |
| 10.6.2 | The Rail Access Management Plan must address how Project Co will manage access to the Rail Infrastructure for the purposes of the Works. | 93014 |
| 10.6.3 | The Rail Access Management Plan must: | 93015 |
| (a) | address how Project Co will comply with the occupations requirements under the Agreement; | 93016 |
| (b) | nominate the relevant personnel including for occupation, RTO resourcing and safe-working resourcing; | 93017 |
| (c) | include the occupation program which must set out the major occupations, weekend occupations, APL-BPFT occupations and details of the occupation interface with other packages (identifying potential opportunities for shared occupation and/or value for money) and the alternate passenger arrangements (including for disruptions to rail passengers and disruptions to rail freight services); | 93018 |
| (d) | describe in detail the way in which occupations will be managed, including the planning and control process (including for the occupation gateway timeline, communications about disruptions to services and passengers and for communicating with the public), the occupation delivery (including the rail safety pre-work brief, the securing of points and the multiple work groups), the process for completion, handback and documentation and the post occupation and defects identification process; | 93019 |
| (e) | describe in detail how rail safety will be managed during the occupations including, during access to the rail corridor, the type of rail access, fence delineation and management of rail safety incidents; | 93020 |
| (f) | describe in detail the bussing operations including, the occupation bussing operation principles and the bus operational management of the Rail Franchisee (including bus | 93021 |

- controllers, types of buses, communications and bus driver awareness); and
- (g) identify the requirements for staff operations including, patron notification and signage, operational duration, customer service personnel (including revenue protection, daily bus forecast and transfer of customers with special needs) and the staff amenities for the Rail Franchisee.

93022

Annexure 11 Transition and Acceptance Management Plans 93023

11.1 Testing and Commissioning Management Plan 93024

11.1.1 Project Co must prepare and update the Testing and Commissioning Management Plan. 93025

11.1.2 The Testing and Commissioning (T&C) Management Plan must define: 93026

(a) processes and systems that will be used to monitor all completion and commissioning activities, including closure of Defects; 93027

(b) a detailed scope of tests which must be carried out prior to Provisional Acceptance and, where applicable, the sequence of such tests; 93028

(c) the approach to activities to be undertaken during the integration and commissioning phase; 93029

(d) any Approvals or acceptances required from relevant Authorities, including Emergency Service Organisations; and 93030

(e) the requirements for safety audits. 93031

11.1.3 The Testing and Commissioning Management Plan must, as a minimum: 93032

(a) cover all systems and subsystems to be constructed, introduced or modified as part of the Works; 93033

(b) describe how Project Co will comply with the testing and commissioning requirements of the Agreement to validate all aspects of the requirements including those developed by Project Co in accordance with the Design Management Plan and the Systems Engineering Management Plan; 93034

(c) describe the approach to Level 1, Level 2, Level 3 and Level 4 System Integration; 93035

(d) identify and address matters in relation to testing and commissioning, completion tests, performance tests, milestones, the acceptance certificate, defects liability period, timeline of testing and commissioning activities, interfacing works among civil works and systems, factory and acceptance tests, installation tests and subsystem tests; 93036

(e) show the test program for each Asset, with each test program including all tests, the duration of each test, requirements for the sequence of tests, the interrelationship between tests on different Assets, integration with other Assets (including those delivered by other parties), any contingency and responsibilities for delivering the tests; 93037

(f) detail how each test will be certified, where test records are kept and for how long they will be retained; 93038

(g) detail the requirements for submissions including commissioning plan, factory testing plan, on-site testing and commissioning plan, contingency plan, test procedures, request for inspection of works form and register and test records and reports (test content, T&C submissions monitoring system and As-Built Records); 93039

(h) describe and address the implementation requirements, including civil works and systems interfaces, notification, execution, coordination, surveillance, nonconformity report, request for change form and register, fault log, test instruments and equipment, and Handback; 93040

(i) identify and address training requirements, including training during testing and commissioning, objectives, on the job training, system control training, training courses and training materials; 93041

(j) describe and address the safety requirements, including system safety, hazard log, purchase and factory acceptance, on-site installation, testing and commissioning, pre-revenue operations, reliability growth period and defect liability period, proof of safety, site safety, contractor's obligation, defined area, control of defined area, restricted area, access into restricted area and environmental safety; 93042

(k) cover the testing of all of the requirements of the Environmental Management Plan on 93043

| | | |
|-------------|--|-------|
| | an ongoing basis; | |
| | (l) describe the strategy for dealing with conflicts between Tests requiring access to the same test facilities at the same time; and | 93044 |
| | (m) be incorporated into an overall quality assurance regime. | 93045 |
| | | 93046 |
| 11.2 | Handback Management Plan | |
| 11.2.1 | Project Co must prepare and update the Handback Management Plan. | 93047 |
| 11.2.2 | The Handback Management Plan must provide the overall strategy and include planned dates for the progressive completion and Handback of Returned Works. | 93048 |
| 11.2.3 | Where applicable, the Handback Management Plan must include details of how the following matters are to be dealt with: | 93049 |
| | (a) operator training; | 93050 |
| | (b) demonstration and documentation of the Residual Life of the Returned Assets; | 93051 |
| | (c) the transfer of all required intellectual property, warranties, guarantees, records and documentation; and | 93052 |
| | (d) the disclosure of any liabilities or potential liabilities remaining at Handback. | 93053 |
| 11.2.4 | The Handback Management Plan must, as a minimum: | 93054 |
| | (a) identify all documents relevant to the operation and maintenance of the Returned Asset; | 93055 |
| | (b) identify all legal arrangements pertinent to the Project which will require transfer from Project Co to the State or the Returned Asset Owner; | 93056 |
| | (c) identify all configuration change, safety, environment, and quality actions to be closed out by Project Co before Handback; | 93057 |
| | (d) identify all activities required for the physical handover of Assets, special tools, maintenance equipment, spares and consumables from Project Co to the State or Returned Asset Owner; | 93058 |
| | (e) identify all superfluous construction materials, debris and general rubbish to be disposed of by Project Co prior to Handback; | 93059 |
| | (f) identify the scope of all training required that will be required for the State, the Returned Asset Owner and/or any authorised nominee; | 93060 |
| | (g) establish the process and resources required to facilitate the above, and achieve complete Handback by the planned date for Handback; | 93061 |
| | (h) identify each party's respective responsibilities with respect to each of the actions identified within the above; and | 93062 |
| | (i) establish the procedure, and identify resources for, Project Co to respond to any requests for information received from the State or its authorised nominees pertinent to Handback. | 93063 |

Annexure 12 Rail Safety Accreditation Plan

93064

12.1 Rail Safety Accreditation Plan

93065

12.1.1 Project Co must prepare and update the Rail Safety Accreditation Plan.

93066

12.1.2 The Rail Safety Accreditation Plan must:

93067

(a) demonstrate how Accreditation is to be obtained and maintained throughout the Term;

93068

(b) identify the entity or entities that will hold Accreditation through both the D&C Phase and the Maintenance Phase;

93069

(c) detail:

93070

(1) the proposed staging and timing for obtaining Rail Safety Accreditation in accordance with the deed and to meet the requirements of the RSNL;

93071

(2) the extent and potential source of any documentation, information, records and any other assistance Project Co will require in connection with its Accreditation, in respect of the Works;

93072

(3) the strategy and timing for liaison with the Office of the National Rail Safety Regulator (**ONRSR**) and other necessary interfacing parties covering rail safety, including fire brigades, police and other transport operator; and

93073

(d) include consultation arrangements with each stakeholder organisation.

93074

Annexure 13 [Not disclosed]

Appendix C1: Stage Gate Reviews

C1.1 System Definition Review

Within 90 Business Days of Financial Close unless otherwise agreed by the State, Project Co must conduct the System Definition Review (SDR), with the following entry and exit criteria:

System Definition Review (SDR): Ensure that the system concept design is complete and that a complete set of configuration documents that define that concept design are in place and available and that issues, risks and opportunities have been appropriately addressed. SDR provides assurance that the system concept adequately addresses the requirements.

| Entry Criteria | Exit Criteria |
|---|---|
| <p>1. SDR review criteria agreed</p> <p>Key Plans to support</p> <p>2. Design Management Plan</p> <p>3. Systems Engineering Management Plan</p> <p>4. System Integration Management Plan</p> <p>5. Configuration Management Plan</p> <p>6. Requirements Management Plan</p> <p>7. Verification & Validation Management Plan</p> <p>8. Systems Assurance Management Plan</p> <p>9. System Safety Management Plan</p> <p>10. Human Factors Management Plan</p> <p>11. RAM Management Plan</p> <p>Key Documentation to support</p> <p>12. systems architecture</p> <p>13. Systems Breakdown Structure (SBS)</p> <p>14. Interface Control Documents (ICDs)</p> <p>15. Requirements Traceability Matrix (RTM)</p> <p>16. preliminary FEB</p> <p>17. Risk Register</p> <p>18. RAM quantitative modelling actions closed or agreed moving forward</p> |

C1.2 Preliminary Design Review

Following the submission and review of the Interim Design Documentation, Project Co must conduct the Preliminary Design Review (PDR), with the following entry and exit criteria:

Preliminary Design Review (PDR): Ensure that the system preliminary design is complete and that the set of configuration documents that define the preliminary design are complete and appropriately address any issues, risks and opportunities. PDR provides assurance that the preliminary design is acceptable; this includes assurance that system requirements are acceptable, that the preliminary design documentation is acceptable and has been verified against system requirements, and that the supporting development and delivery plans are acceptable.

| Entry Criteria | Exit Criteria |
|--|---|
| <p>1. PDR review criteria agreed</p> <p>2. outcomes of Stage Gate Reviews affecting PDR have been successfully addressed or action plans</p> | <p>Key Plans</p> <p>1. Plans agreed</p> |

| | |

|---|--|

93119

C1.3 Critical Design Review

Following submission and review of the Certified Design Documentation, Project Co must conduct the Critical Design Review (CDR), with the following entry and exit criteria:

93120

Critical Design Review (CDR): Ensure that the system design, comprising all the sub-systems and interfaces, can fulfil the system functional and performance requirements, and that issues, risks and opportunities have been appropriately addressed. CDR provides assurance that the integrated system design is acceptable.

| Entry Criteria | Exit Criteria |
|--|---|
| <ol style="list-style-type: none"> 1. CDR Review Criteria agreed 2. audit actions/recommendations for PDR closed 3. outcomes from Stage Gate Reviews affecting CDR have been successfully addressed or action plans agreed <p>Key Plans to support</p> <ol style="list-style-type: none"> 4. updated management plans as required 5. audit plans for CDR 6. Testing and Commissioning Management Plan 7. Transition and Acceptance Management Plan 8. Testing and Commissioning Management Plan 9. Transition and Acceptance Management Plan 10. training management plan 11. technical maintenance plan 12. FRACAS implementation plan <p>Key Documentation to support</p> <ol style="list-style-type: none"> 13. GSN (design) | <p>Key Plans</p> <ol style="list-style-type: none"> 1. Plans agreed 2. Draft Plans reviewed 3. Audit actions / recommendations closed or agreed moving forward <p>Key Documentation</p> <ol style="list-style-type: none"> 4. RCMA, maintenance task definition, spares allocation reviewed 20. LCC model agreed |

93121

C1.4 Issued for Construction Design Review

Following submission and review of the IFC Design Documentation, Project Co must conduct the Issued for Construction Review (IFCR), with the following criteria:

93122

Issued for Construction Review (IFCR): Ensure all construction related risks and issues are reviewed and closed out prior to proceeding to construction. IFC provides assurance the system and associated documentation are acceptable to proceed to construction.

| Criteria |
|---|
| 1. all construction related risks are closed or agreed moving forward Key Plans to support 2. training management plan implemented for construction Key Documentation to support 3. Construction Documentation 4. GSN (construction) 5. Assurance Case Report (Construction) 6. all HF issues are closed and addressed 7. all construction RAM issues are closed and addressed 8. all occupation issues related to construction are closed and addressed 9. Proof Engineering 10. IFC Design Documentation Analysis to support 11. all construction OHS and system safety risks identified, eliminated or reduced SFAIRP |

C1.5 Test Readiness Review

Prior to commencement of Testing and Commissioning, Project Co must conduct the Test Readiness Review (TRR), with the following entry and exit criteria:

Test Readiness Review (TRR): Ensure that each sub-system assembly or component is of sufficient quality and has been tested / qualified to allow installation or site construction to begin, and that issues, risks and opportunities have been appropriately addressed. TRR provides assurance that the system is acceptable for installation.

| Entry Criteria | Exit Criteria |
|---|---|
| <ol style="list-style-type: none"> 1. TRR Review Criteria agreed 2. audit actions / recommendations closed or agreed moving forward <p>Key Plans to support</p> <ol style="list-style-type: none"> 3. audit plans for TRR 4. training management plan implemented for integration & test stage 5. updated training management plan <p>Key Documentation to support</p> <ol style="list-style-type: none"> 6. progressive PCA 7. audit reports for TRR 8. draft GSN (integration & test) 9. draft Assurance Case Report (integration & test) 10. updated Risk Register, Hazard Log, HFIL and RAM Log 11. documented redlines / change requests for all corresponding modifications made during construction and installation 12. formal engineering changes are reflected in the revised test documentation 13. suite of test documentation established for <ul style="list-style-type: none"> • subsystem and interfaces • safety controls/functions • HF controls • RAM demonstration 14. FRACAS Report | <p>Key Plans</p> <ol style="list-style-type: none"> 1. Plans agreed <p>Key Documentation</p> <ol style="list-style-type: none"> 2. draft GSN (integration & test) reviewed 3. draft Assurance Case Report (integration & test) reviewed 4. audit actions / recommendations closed or agreed moving forward 5. actions from risk register agreed 6. actions for Hazard Log management agreed 7. actions for HFIL management agreed 8. actions for RAM Log management agreed 9. scope of subsystem installation agreed 10. scope of component testing/ qualification agreed <ul style="list-style-type: none"> • subsystem and interfaces • safety controls/functions • HF controls • RAM demonstration 11. stakeholders and resources available for the scope of testing 12. ongoing testing status is acceptable and agreed moving forward 13. VCRM agreed 14. test safety actions closed or agreed moving forward <p>Analysis</p> <ol style="list-style-type: none"> 15. FRACAS Report actions closed or agreed moving forward |

C1.6 Integration Readiness Review

Prior to Provisional Acceptance, Project Co must conduct the Integration Readiness Review (IRR), with the following entry and exit criteria:

Integration Readiness Review (IRR): Ensure that the system is ready to proceed into the process of progressive levels of systems integration and testing, and that issues, risks and opportunities have been appropriately addressed. IRR provides assurance that the test and integration program is acceptable.

| Entry Criteria | Exit Criteria |
|--|--|
| <ol style="list-style-type: none"> 1. IRR review criteria agreed 2. audit actions / recommendations closed or agreed moving forward 3. audit actions / recommendations for TRR closed | <p>Key Plans</p> <ol style="list-style-type: none"> 1. Plans agreed |

Integration Readiness Review (IRR): Ensure that the system is ready to proceed into the process of progressive levels of systems integration and testing, and that issues, risks and opportunities have been appropriately addressed. IRR provides assurance that the test and integration program is acceptable.

| Entry Criteria | Exit Criteria |
|---|--|
| <p>Key Plans to support</p> <ol style="list-style-type: none"> 4. Handback Management Plan 5. audit plans for IRR 6. training management plan implemented for integration & test stage 7. 93127

C1.7 System Acceptance Review

Prior to Final Acceptance, Project Co must conduct the System Acceptance Review (SAR), with the following entry and exit criteria:

93128

System Acceptance Review (SAR): Ensure that verification and validation evidence for the system against the performance and functional requirements specification is provided and that all system definition, operation, maintenance and disposal documentation is provided to enable acceptance of the system. SAR provides assurance that the delivered system is fit to accept.

| Entry Criteria | Exit Criteria |
|---|--|
| <ol style="list-style-type: none"> 1. SAR review criteria agreed 2. audit actions / recommendations for IRR closed <p>Key Plans to support</p> <ol style="list-style-type: none"> 3. VCRM and associated data handover 12. RTM and associated data handover 13. training management plan and O&M training artefacts handover 14. completion of O&M training 15. handover package accepted |

Appendix C2: Specific Stakeholder Requirements

93129

C2.1 General

93130

An indicative, non-exhaustive list of specific stakeholder requirements, information and concerns is provided in this Appendix C2. Project Co must undertake the D&C Activities in order to accommodate and address these considerations.

93131

C2.2 Access and egress (including emergency egress) arrangements

93132

| Precinct | Stakeholder | Requirement/ information |
|-----------|---|--|
| Arden | Multiple | Vehicular access off Laurens Street and Arden Street must not be impeded. |
| Arden | City of Melbourne (CoM) | CoM has a brick lined storm water pipe which runs along the Queensberry St alignment under the Arden precinct. Access for repairs and servicing is required. |
| Arden | Nick Theodossi Prestige Cars | Rear access to the building off Laurens St must be maintained. |
| Arden | Taxi Tech/13 Cabs | Access to the car park and to the workshop off Barwise St must be maintained. |
| Arden | Turi Foods Farming Division | Access to the weigh bridge and between the mill and the weighbridge must be maintained. |
| Parkville | Ambulance Victoria | Ambulance access should be maintained for Royal Melbourne Hospital, Royal Women's Hospital, Peter Macallum Cancer Centre and Melbourne Private. |
| Parkville | Florey Institute | Maintain 24/7 access and egress to the Kenneth Myer Building from Royal Parade. |
| Parkville | IQ Apartments | Maintain 24/7 access from Berkeley Street for pedestrians. |
| Parkville | Melbourne Business School | Maintain 24/7 access from Leicester Street. |
| Parkville | Melbourne Health (Royal Melbourne Hospital) | <p>The following access arrangements need to be maintained for Royal Melbourne Hospital:</p> <ul style="list-style-type: none"> ▪ 24/7 road ambulance access from Royal Parade to the emergency department and egress from Grattan Street & Royal Parade; ▪ 24/7 road ambulance access and egress from Royal Parade to the mortuary driveway (100m north of Grattan St intersection); ▪ on street ambulance parking on Grattan Street between Flemington Road and Royal Parade; ▪ MFB (2) emergency vehicle parking on north side of Grattan Street by the fire control room; ▪ Diesel tanker access from the northern kerb on Grattan Street by the main pedestrian entrance; ▪ Vehicular access to main hospital car park from Royal Parade for staff, patients and visitors; ▪ Ambulant and non-ambulant pedestrian access to RMH main entrance Parade and the Emergency Department on Grattan Street and secondary entrance on Royal; |
| | | <ul style="list-style-type: none"> ▪ 24/7 access/ egress to the patient transit lounge and decontamination showers off Grattan Street. |
| Parkville | Melbourne Health | Maintain 24/7 air ambulance access to the helipad on RMH |

| | | | |
|-----------|----------------------------|---|---|
| | (Royal Melbourne Hospital) | roof. Helicopters create downward air pressure and can be obstructed by construction equipment. Helipad must be kept open as it 45-60min to transfer patients from the alternative helipad at RCH which compromises patient safety. | |
| Parkville | Parkville Music School | Maintain pedestrian access from Royal Parade, student drop off facilities on Storey Street and vehicular access to RMH's car park. | 93152 |
| Parkville | Peter Doherty Institute | The following access arrangements need to be maintained for PDI: <ul style="list-style-type: none"> ▪ 24/7 pedestrian access/ egress via Elizabeth Street and Grattan Street entrances; ▪ 24/7 access to the secure drop boxes drop boxes in the building wall fronting Grattan Street; ▪ vehicular (including emergency vehicles) access to the loading bay off Elizabeth Street 8am-7pm; ▪ UoM student access to the entrance on Berkeley Street 9am-5pm; there could be up to 200 students using this entrance at the same time to go to a lecture; ▪ bicycle access/ egress via the Grattan Street entrance; ▪ 2 on street delivery bays adjacent to their building, preferably the existing loading zones on Elizabeth St and Berkeley St. | 93153 93154 93155 93156 93157 93158 93159 |
| Parkville | Royal Women's Hospital | Compliant ambulant and non-ambulant pedestrian, and cyclist, access must be maintained to Royal Women's Hospital. | 93160 |
| Parkville | Royal Women's Hospital | Emergency access to Royal Women's Hospital from Flemington Road must be maintained during construction and operation. | 93161 |
| Parkville | Royal Women's Hospital | The following access arrangements need to be maintained for RWH: <ul style="list-style-type: none"> ▪ 24/7 access & egress for emergency, delivery and patient vehicles via their entrance off Flemington Road; ▪ 24/7 access & egress to oxygen and nitrogen stores; ▪ pedestrian access & egress via the main entrance on Grattan Street; ▪ MFB vehicle parking along Grattan Street north kerb; ▪ taxi rank on Grattan Street outside the hospital main entrance. | 93162 93163 93164 93165 93166 93167 |
| Parkville | University High School | Access to the Royal Melbourne Hospital car park must be maintained. | 93168 |
| Parkville | University of Melbourne | Leicester St must be kept open for vehicular traffic, taxi, bus and emergency vehicle access. Pedestrian access to Leicester St must also be maintained at all times as this is the access route to the Graduate House main entrance. Carpark and delivery access via Church St must be maintained. | 93169 |
| Parkville | University of Melbourne | Cycle access along Grattan St and adjoining streets to, from and past the UoM must be maintained during construction. | 93170 |
| Parkville | University of Melbourne | Cycle access to Alan Gilbert Building must be maintained. | 93171 |
| Parkville | University of Melbourne | Access for deliveries to Alan Gilbert Building must be maintained. | 93172 |
| Parkville | University of Melbourne | Vehicle movements must be restricted for any areas or roads subject to high volumes of pedestrians and cyclists. | 93173 |
| Parkville | University of Melbourne | Emergency access via Grattan Street and Gate 10 is vital to maintain emergency coverage. | 93174 |
| Parkville | University of | 24-hour access to the university grounds must be maintained | 93175 |

| | | | |
|-----------|--|---|---|
| | Melbourne | during construction. | |
| Parkville | University of Melbourne | Pedestrian access to Alan Gilbert Building, the Tri-radiate building, and UoM owned buildings on Barry St and Leicester St must be maintained. | 93176 |
| Parkville | University of Melbourne | A variety of delivery vehicles rely on access via Gate 10 because access via Gate 4 is impeded by road geometry or is otherwise impractical. If Gate 10 is closed to deliveries or restricted then alternate access will need to be accommodated for vehicles including: <ul style="list-style-type: none"> ▪ Trucks up to 10 tonnes; ▪ Semi-trailers (approximately twice per year); ▪ [Not disclosed]; and ▪ Tankers. | 93177 93178 93179 93180 93181 |
| Parkville | University of Melbourne | Access to the loading dock and equipment entrance to the Howard Florey Laboratories (bld 183) to be maintained throughout the project. | 93182 |
| Parkville | University of Melbourne | Truck access off Kernot Road to the loading dock for the Tri-radiate (Bld 181) to be maintained throughout the project. | 93183 |
| Parkville | University of Melbourne | Appropriate egress to be maintained to all fire stairs to the Tri-radiate (bld 181) or appropriate alternate arrangements developed, signed off by the University's Building Surveyor and appropriately displayed – including any exit sign relocations. | 93184 |
| Parkville | Victorian Comprehensive Cancer Centre (VCCC) | The following access must be maintained, or alternates provided. Access to car park, ambulance and loading bays off Flemington Road. Retailer's deliveries and patient drop offs on Grattan Street. Nitrogen and diesel deliveries on Elizabeth St. MFB control room access on Elizabeth St. | 93185 |
| Parkville | Victorian School of Languages | Maintain pedestrian access from Royal Parade, student drop off facilities on Storey Street and vehicular access to RMH's car park. | 93186 |
| CBD North | Melbourne City Baths | Emergency exit door on Franklin Street must remain accessible at all times. | 93187 |
| CBD North | Melbourne City Baths | Staff/contractor door on Franklin Street which is also utilised by MFB and is accessed 24/7 must remain accessible at all times during construction. | 93188 |
| CBD North | RMIT University | RMIT emergency response location is adjacent to the Building 14 tunnels and must remain accessible at all times during construction. | 93189 |
| CBD North | RMIT University | Building 14 "tunnels" to Franklin Street to be closed only during weekend or night time operations as agreed with RMIT (the tunnels contain access to the fire room and other RMIT emergency services rooms). | 93190 |
| CBD North | RMIT University | Emergency egress routes from RMIT buildings including Buildings 37 onto A'Beckett Street and 39 and 49 onto Franklin Street are to be maintained at all times. | 93191 |
| CBD North | RMIT University | RMIT emergency response location is adjacent to the Building 14 tunnels and must remain accessible at all times during construction. | 93192 |
| CBD North | RMIT University | A pedestrian walkway between Swanston Street and Victoria Street on Franklin Street must be maintained at all times, with the footpath adjacent to Building 14 to be accessible during the major works stages. | 93193 |
| CBD North | RMIT University | Operationally critical vehicle access to properties on Franklin Street must be maintained during construction. | 93194 |
| CBD North | RMIT University | Operationally critical vehicle access to RMIT Building 37 must be maintained during construction. | 93195 |
| CBD North | State Library of Victoria | State Library secondary entrance on Russell Street to remain accessible at all times during construction as this entrance | 93196 |

| | | | |
|-----------|---|---|-------|
| | | would operate as the sole major entry to the State Library during the redevelopment project. | |
| CBD North | Various | Access for deliveries to car dealerships on Franklin Street must be maintained. | 93197 |
| CBD South | [Not disclosed] | [Not disclosed] | 93198 |
| CBD South | ACMI | Exhibition deliveries are usually from Flinders Street (no allocated loading zones in this location). | 93199 |
| CBD South | Dangerfield (222-226 Flinders St), Young & Jacksons | Cocker Alley (South) is currently used by Dangerfield and Young & Jacksons for waste management. Any use of this lane as part of final design will require consultation with these parties. | 93200 |
| CBD South | Federation Square Management | Federation Square event bump in/out is managed from Swanston Street (Princes Bridge). | 93201 |
| CBD South | Melbourne Town Hall | Bump in crews for events at Melbourne Town Hall utilise the loading zone on the northern side of Collins Street. Often with trucks parking facing west due to the grade of the road. | 93202 |
| CBD South | [Not disclosed] | [Not disclosed] | 93203 |
| CBD South | [Not disclosed] | [Not disclosed] | 93204 |
| CBD South | [Not disclosed] | [Not disclosed] | 93209 |
| CBD South | [Not disclosed] | [Not disclosed] | 93210 |
| CBD South | [Not disclosed] | [Not disclosed] | 93211 |
| CBD South | [Not disclosed] | [Not disclosed] | 93212 |
| CBD South | [Not disclosed] | [Not disclosed] | 93213 |
| CBD South | [Not disclosed] | [Not disclosed] | 93214 |
| CBD South | [Not disclosed] | [Not disclosed] | 93215 |
| Domain | Albert Road Clinic | Rear access from Bowen Lane needs to be maintained as staff and trucks (including rubbish removal, linen delivery and food delivery services) access the Clinic via Bowen Lane from both St Kilda Rd and Kings Way. | 93216 |
| Domain | Albert Road Clinic | Drop off and pick up zones for inpatients, outpatients and ambulances need to be catered for. This is currently serviced by access from Bowen Lane. Noted that a lot of staff currently drive to work and park onsite (Bowen Lane) rather than taking public transport. | 93217 |
| Domain | [Not disclosed] | [Not disclosed] | 93218 |
| Domain | Botanica Apartments | Botanica has two entrances. One on Bowen Crescent (24no.) and the other on St Kilda Road (44no.). The carpark entrance on St Kilda Rd will require special consideration to ensure access during construction (given that main works are likely to be in very close proximity) . The St Kilda Road carpark entrance is the preferred for those residents or visitors that have mobility impairments and cannot be accessed any other way. This entrance is also required for building deliveries & maintenance. | 93219 |
| Domain | Botanica Apartments | Domain Station emergency egress location should not obstruct entrance to Botanica Apartments. | 93220 |
| Domain | Botanica Apartments | Current access for emergency services is via front of building on St Kilda Road. | 93221 |
| Domain | [Not disclosed] | [Not disclosed] | 93222 |

| | | | |
|--------|--------------------------------|---|---|
| Domain | Fawkner Park Child Care Centre | Fawkner Park Child Care Centre is very sensitive to loss of carparks either adjacent to the centre or in Toorak Road. | 93223 |
| Domain | Fawkner Park Child Care Centre | Drop-off & pick up zones must be retained Sensitive to any change to access or operations of the centre. | 93224 |
| Domain | Melbourne Girls Grammar School | Students and staff require access to nearby sporting facilities such as Fawkner Park Tennis courts. | 93225 |
| Domain | Melbourne Grammar School | At least one east-west crossing of St Kilda Road must be provided in vicinity of the school gates. | 93226 |
| Domain | Melbourne Grammar School | Pedestrians must be able to walk on the southern side of Domain Road and follow the path around into the eastern side of St Kilda Rd. This must be made safe or closed at night. | 93227 |
| Domain | Melbourne Grammar School | A convenient north-south connection across Domain Rd must be provided at all times in vicinity of school gates. | 93228 |
| Domain | Melbourne Grammar School | Access to Melbourne Grammar's underground carpark must be maintained during construction. | 93229 |
| Domain | Melbourne Grammar School | Existing school bus pick up and drop off zone in Domain Road. | 93230 |
| Domain | Melbourne Grammar School | School bus services need to be able to continue services to the school. | 93231 |
| Domain | Melbourne Grammar School | Waste collection point is on St Kilda Road. | 93232 |
| Domain | Melbourne Grammar School | School currently uses Edmund Herring Oval. | 93233 |
| Domain | Royce Hotel | Features critical to Hotel functionality: <ul style="list-style-type: none"> ▪ guest drop-off zones on St Kilda Road & Bromby Street; ▪ public parking; ▪ hotel private parking (including valet parking) on St Kilda Road; and ▪ loading/delivery dock and waste collection facility on St Kilda Road. | 93234 93235 93236 93237 93238 |
| Domain | [Not disclosed] | [Not disclosed] | 93239 |
| Domain | [Not disclosed] | [Not disclosed] | 93241 |
| Domain | [Not disclosed] | [Not disclosed] | 93243 |
| Domain | [Not disclosed] | [Not disclosed] | 93244 |
| Domain | [Not disclosed] | [Not disclosed] | 93245 |
| Domain | [Not disclosed] | [Not disclosed] | 93246 |

C2.3 Interfacing and future projects

| Precinct | Stakeholder | Requirement/ information | |
|-----------|---|--|----------------|
| Arden | Victorian Planning Authority/ City of Melbourne | The Victorian Planning Authority is in the process of developing the plan for the Arden Urban Renewal Precinct. | 93248 93249 |
| Parkville | City of Melbourne | The City of Melbourne has prepared a University Square Draft Master Plan and is targeting endorsement of the plan in late 2016. | 93250 |
| Parkville | Graduate House | The Graduate Union has embarked on a 10-year master plan which is at an advanced stage and involves staged redevelopment of the Graduate House properties from the Leicester Street frontages eastwards over the timeframe proposed for installation of the Parkville station and underground rail loop. The staged construction redevelopment of Graduate House is not to be hindered during construction | 93251 |

| | | | |
|-----------|---|--|-------------------------|
| | | delivery of the Melbourne Metro Rail Project. | |
| Parkville | Melbourne Health (Royal Melbourne Hospital) | Construction, operation and design of Parkville station must not preclude RMH's future redevelopment plans on their site. | 93252 |
| CBD South | ACMI | ACMI currently have plans to undertake a full internal refurbishment of the building (subject to funding). | 93253 |
| | | <ul style="list-style-type: none"> ▪ 2017/18: Funding received ▪ Late 2018: Commence refurbishment ▪ Early/ mid 2019: Complete refurbishment | 93254 93255 93256 |
| | | ACMI and City of Melbourne are proposing to upgrade the streetscape along Flinders Street southern footpath between Swanston Street and Russell Street. Works are funded for detailed design in 16/17 financial year and CoM have provided conditional funding for construction in the 17/18 financial year. | 93257 |
| CBD South | City of Melbourne | The City of Melbourne is developing the Elizabeth Street South Streetscape Improvement Plan and is targeting release of this document in mid-2017. | 93258 |
| CBD South | PTV | Flinders Street Station upgrade project | 93259 |
| Domain | [Not disclosed] | [Not disclosed] | 93260 |
| Domain | Royce Hotel | Hotel has approved plans to expand - construction of an 8 storey building, 67 rooms. Construction timeframe is 2017/2018. | 93261 |

C2.4 Emergency management arrangements

| Precinct | Stakeholder | Requirement/ information | |
|-----------|--|---|----------------|
| Parkville | Bio21 Molecular Science & Biotechnology Institute | The emergency assembly point location isn't known but could be affected by changes to other assembly points or increase in traffic in the precinct. It should be considered within a wider precinct emergency assembly location plan. | 93263 93264 |
| Parkville | Graduate Union of the University of Melbourne (Graduate House) | The emergency assembly point location is in University Square across Leicester Street and may be affected during construction. | 93265 |
| Parkville | IQ Apartments | The emergency assembly point location isn't known but could be on Berkeley Street and therefore be affected during construction. | 93266 |
| Parkville | Melbourne Business School | The emergency assembly point location is on the southern lawn of University Square across Leicester Street and access may be affected during construction. | 93267 |
| Parkville | Melbourne Health (Royal Melbourne Hospital) | RMH has several emergency assembly points - one adjacent to Uni High, one adjacent to Flemington Road and one on the corner of Royal Parade & Grattan Street where people often spill onto the road due to lack of space on the footpath. This will be an issue during construction of the VCCC entrance. | 93268 |
| Parkville | Melbourne Health (Royal Melbourne Hospital) | RMH is the statewide infectious disease & disaster hospital for Victoria. In the event of a major disaster Grattan Street may be closed by Victoria Police to facilitate RMH's response plans. | 93269 |
| | | VCCC station entrance could be closed if DISPLAN is activated to prevent egress into RMH's triage area on Grattan St. | 93270 |
| Parkville | Peter Doherty Institute | Peter Doherty Institute's emergency access point is on Haymarket Walk. | 93271 |
| Parkville | Peter Doherty Institute | Peter Doherty Institute has high security laboratories that are operated under external security protocols (Federal or State level). These protocols must be considered during the | 93272 |

| | | | |
|-----------|--|--|-------|
| | | design, construction & operation of the Metro Tunnel. | |
| Parkville | Victorian Comprehensive Cancer Centre (VCCC) | VCCC evacuates to Grattan St. The construction of VCCC entrance impacts VCCC's evacuation plans. | 93273 |
| Parkville | Walter and Eliza Hall Institute (WEHI) | WEHI evacuates to University High oval. | 93274 |

C2.5 EMI/ EMC

| Precinct | Stakeholder | Requirement/ information | |
|-----------|--|--|-------|
| Parkville | Bio21 Molecular Science & Biotechnology Institute | Equipment extremely sensitive to EMI that may require additional mitigation measures. | 93276 |
| Parkville | Florey Institute of Neuroscience and Mental Health | Florey Institute has EMI sensitive equipment on the lower floors of the Kenneth Myer Building that is in 24/7. | 93278 |
| Parkville | Melbourne Health (Royal Melbourne Hospital) | RMH has EMI sensitive equipment on 2 floors fronting Royal Parade. Their equipment must be a minimum of 40m from the tram tracks to prevent their equipment affecting the trams. The EMI relationship between RMH's equipment and Metro Tunnel equipment & trains must be clearly understood. | 93279 |
| Parkville | Peter Doherty Institute for Infection and Immunity | PDI is EMI sensitive equipment in the basement. There is protection in place however PPP must confirm that this provides sufficient protection from Metro Tunnel's EMI. | 93280 |
| Parkville | Victorian Comprehensive Cancer Centre (VCCC) | VCCC has EMI sensitive equipment in the basements and upper floors. The interaction between that equipment and Metro Tunnel's traction power system must be investigated. EMI mitigation measures were installed during VCCC construction so the PPP must confirm that these mitigations are sufficient or if any additional mitigations are required. | 93281 |

C2.6 Existing assets and conditions

| Precinct | Stakeholder | Requirement/ information | |
|-----------|--|--|----------------------------------|
| Arden | City of Melbourne | CoM have a brick lined storm water pipe which runs along the Queensberry St alignment under the Arden precinct. It must not be damaged during construction as a result of construction loading | 93283 |
| Parkville | Graduate Union of the University of Melbourne (Graduate House) | The eight terrace houses from 222 to 234 Leicester Street, known collectively as the 'Gladstone Terraces', are regarded as heritage construction from the 1870s. There are susceptible to damage by vibration and ground movement. | 93284 |
| Parkville | [Not disclosed] | [Not disclosed] | 93285 |
| Parkville | Melbourne Health (Royal Melbourne Hospital) | RMH infrastructure: <ul style="list-style-type: none"> ▪ 2 airbridges over Grattan Street connecting VCCC & RMH; ▪ service tunnel beneath Grattan St providing service (oxygen & fibre optic cables) connections between RMH & VCCC; ▪ basements fronting Grattan St will be adjacent to TBM route. | 93286 93287 93288 93289 |
| Parkville | Peter Doherty Institute for Infection and Immunity | There is a canopy on PDI's building at level 1 on the corner of Elizabeth Street/ Grattan Street that may be impacted by construction. | 93290 |
| Parkville | Peter Doherty Institute for Infection | There is a CitiPower substation within PDI's building that can power the Parkville precinct if required. | 93291 93292 |

| | | | |
|-----------|--|--|-------|
| | and Immunity | | |
| Parkville | Peter Doherty Institute for Infection and Immunity | Peter Doherty Institute have surface flooding issues in the delivery bay at the corner of Grattan St and Royal Parade. Changing surface water flows could exacerbate this issue. | 93293 |
| Domain | Royce Hotel | The Hotel has had ongoing issues with drainage at the end of Bromby Street, with water backing up and flooding the footpath. | 93294 |
| Domain | [Not disclosed] | [Not disclosed] | 93295 |
| Domain | Tabcorp | Tabcorp Head Office Building heavily relies upon telecomms cables servicing this building. Consequences of unexpected cut of these services are severe to Tabcorp. | 93296 |

C2.7 Particular noise, vibration and air quality concerns

| Precinct | Stakeholder | Requirement/ information | |
|-----------|--|---|-------|
| Parkville | Bio21 Molecular Science & Biotechnology Institute | Bio 21 Molecular Science and Biotechnology Institute contains equipment sensitive to ground-borne noise. | 93298 |
| Parkville | [Not disclosed] | [Not disclosed] | 93299 |
| Parkville | Graduate Union of the University of Melbourne (Graduate House) | Graduate House has meeting rooms and accommodation facing Leicester Street. | 93300 |
| Parkville | IQ Apartments | IQ Apartments is a residential block so noise levels shouldn't exceed the EPA limits for bedrooms and living rooms. Mitigation measures required if noise levels do exceed EPA limits, particularly at night. | 93301 |
| Parkville | Melbourne Business School | Melbourne Business School has accommodation areas so noise and vibration levels shouldn't exceed the EPA limits. Mitigation measures required if noise levels do exceed EPA limits, particularly at night. | 93302 |
| Parkville | [Not disclosed] | [Not disclosed] | 93303 |
| Parkville | Melbourne Health (Royal Melbourne Hospital) | RMH air intakes are located on Grattan Street and air filters are quickly clogged up with construction dust. Dust management is essential. | 93304 |
| Parkville | Melbourne Private Hospital | Noise impacts on major surgery. Mitigation measures should ensure that surgery isn't disrupted by excessive noise. | 93305 |
| Parkville | Melbourne Private Hospital | Share Royal Melbourne Hospital's sensitive equipment so vibration impacts should be managed via RMH's requirements. | 93306 |
| Parkville | Melbourne Private Hospital | Excessive noise impacts on major surgery may result in construction delays. Mitigation measures should ensure that surgery isn't disrupted by excessive noise. | 93307 |
| Parkville | [Not disclosed] | [Not disclosed] | 93308 |
| Parkville | Royal Women's Hospital | Construction noise will disrupt patients sleeping in wards at night. RWH prefer day works to 24/7 working hours. | 93309 |
| Parkville | Royal Women's Hospital | There are fresh air intakes at on each of the 9 floors that can be affected by construction dust. This has to be managed to prevent adverse impacts on staff and patients. | 93310 |
| Parkville | [Not disclosed] | [Not disclosed] | 93311 |
| Parkville | [Not disclosed] | [Not disclosed] | 93312 |
| Parkville | [Not disclosed] | [Not disclosed] | 93313 |
| Parkville | [Not disclosed] | [Not disclosed] | 93314 |
| Parkville | [Not disclosed] | [Not disclosed] | 93317 |
| CBD South | [Not disclosed] | [Not disclosed] | 93318 |
| CBD South | [Not disclosed] | [Not disclosed] | 93319 |
| Domain | Albert Road Clinic | The Albert Road Clinic is a private psychiatric facility which specialises in care for mental health. Construction noise may | 93320 |

| | | | |
|--------|--------------------------------|--|-------|
| | | be a concern for patients and staff, particularly in their consulting rooms where a quiet environment is needed. Inpatient rooms are on both sides of the building. Noted no double glazing on windows currently. | |
| Domain | [Not disclosed] | [Not disclosed] | 93321 |
| Domain | Shrine of Remembrance Trustees | Due to the proximity of the work site to the Cobbers statue, the Shrine expects that the contractor will delineate the site in an appropriate way that allows for construction to take place, but provides an appropriate treatment for those visiting the memorial. | 93322 |

C2.8 Stakeholder interactions

| Precinct | Stakeholder | Requirement/ information | |
|-----------|------------------------------|---|---|
| Parkville | Parkville Reference Group | <p>The Metro Tunnel Precinct Reference Group – Parkville (PRG) has been established to assist in the mitigation and management of construction impacts associated with construction of the tunnels and station in Parkville. Membership includes a representative from each of:</p> <ul style="list-style-type: none"> ▪ Ambulance Victoria ▪ Bio21 Molecular Science & Biotechnology Institute ▪ City of Melbourne ▪ Department of Health and Human Services ▪ The Florey Institute of Neuroscience and Mental Health ▪ Gene Technology Access Centre ▪ Graduate Union of the University of Melbourne (Graduate House) ▪ Melbourne Business School ▪ Melbourne Health (Royal Melbourne Hospital) ▪ Melbourne Private Hospital ▪ Peter Doherty Institute for Infection and Immunity ▪ Peter MacCallum Cancer Centre ▪ Public Transport Victoria ▪ Royal Children’s Hospital ▪ Royal Women’s Hospital ▪ University High School ▪ University of Melbourne ▪ VicRoads ▪ Victorian Comprehensive Cancer Centre (VCCC) ▪ Walter and Eliza Hall Institute of Medical Research | 93323 93324 93325 93326 93327 93328 93329 93330 93331 93332 93333 93334 93335 93336 93337 93338 93339 93340 93341 93342 93343 93344 93345 |
| CBD South | Federation Square Management | Federation Square Management are to be engaged during the planning of non-standard and/or "unavoidable" construction activities that may impact on their ability to operate including holding various events. | 93346 |
| Domain | G12 | <p>Large apartment blocks in the G12 group include:</p> <ul style="list-style-type: none"> ▪ St James Apartments, 350 St Kilda Road Melbourne ▪ Royal Domain Plaza, 360 St Kilda Rd Melbourne ▪ Royal Domain Tower, 368 St Kilda Rd Melbourne ▪ The Hallmark, 2-14 Albert Road South Melbourne ▪ Albert Tower, 38 Albert Rd South Melbourne ▪ Fifty Albert, 50 Albert Rd South Melbourne ▪ The Domain, 1 Albert Road South Melbourne ▪ Lucient, 430 St Kilda Rd Melbourne | 93347 93348 93349 93350 93351 93352 93353 93354 93355 |

| | | | |
|--------|---------------------------------------|--|---|
| | | <ul style="list-style-type: none"> ▪ Balencea - 454 St Kilda Road, Melbourne ▪ Capri - 38 Bank Street, South Melbourne ▪ Parkside - 28 Bank Street, South Melbourne ▪ Royal Albert - 15 Queens Road, Melbourne ▪ The Boulevard – 632 St Kilda Road, Melbourne | 93356 93357 93358 93359 93360 |
| Domain | Various | Others in the Precinct but not in the G12 group include: <ul style="list-style-type: none"> ▪ The Emerald, 35 Albert Road Melbourne ▪ Botanica, 400 St Kilda Road Melbourne ▪ The Princeton, 418 St Kilda Road Melbourne | 93361 93362 93363 93364 |
| | | <ul style="list-style-type: none"> ▪ Promenade, 416A St Kilda Road Melbourne ▪ City Condos, 416 St Kilda Road Melbourne | 93365 93366 |
| Domain | Schools – various (MGS, MGGS, MacRob) | Opportunity to consult all nearby schools as a collective with regard to TDM. | 93367 |
| Domain | [Not disclosed] | [Not disclosed] | 93368 |

C2.9 Transport arrangements

| Precinct | Stakeholder | Requirement/ information | |
|-----------|---|---|----------------------------------|
| Parkville | Melbourne Health (Royal Melbourne Hospital) | Ambulances must be able to drive in both directions across the northbound traffic lanes in Royal Parade, through the median on the west side of Royal Parade and onto the tram tracks or across the Grattan Street intersection as they currently do. | 93370 93371 |
| CBD North | RMIT University | Pedestrian access across Swanston Street opposite the Oxford Scholar to be available at all times. | 93372 |
| CBD North | RMIT University | Pedestrian access along Swanston Street including across Franklin Street to be available at all times. | 93373 |
| CBD North | RMIT University | Safe pedestrian access at the intersection of Swanston and La Trobe Street is to be provided for all users including at the RMIT information hub (Building 22) at the north-east corner. | 93374 |
| CBD North | RMIT University | The connection of Bowen Street to Franklin Street must be accessible throughout construction. | 93375 |
| Domain | MacRobertson Girls' High School | School has requested: <ul style="list-style-type: none"> ▪ 40 km/h speed limits outside school on Kings Way and Albert Rd; ▪ A drop-off zone constructed at the school; ▪ A pedestrian supervisor. | 93376 93377 93378 93379 |
| Domain | Royce Hotel | Hotel owners were in favour of re-connecting Bromby St with St Kilda Road. | 93380 |

C2.10 Special Events – Stakeholder specific

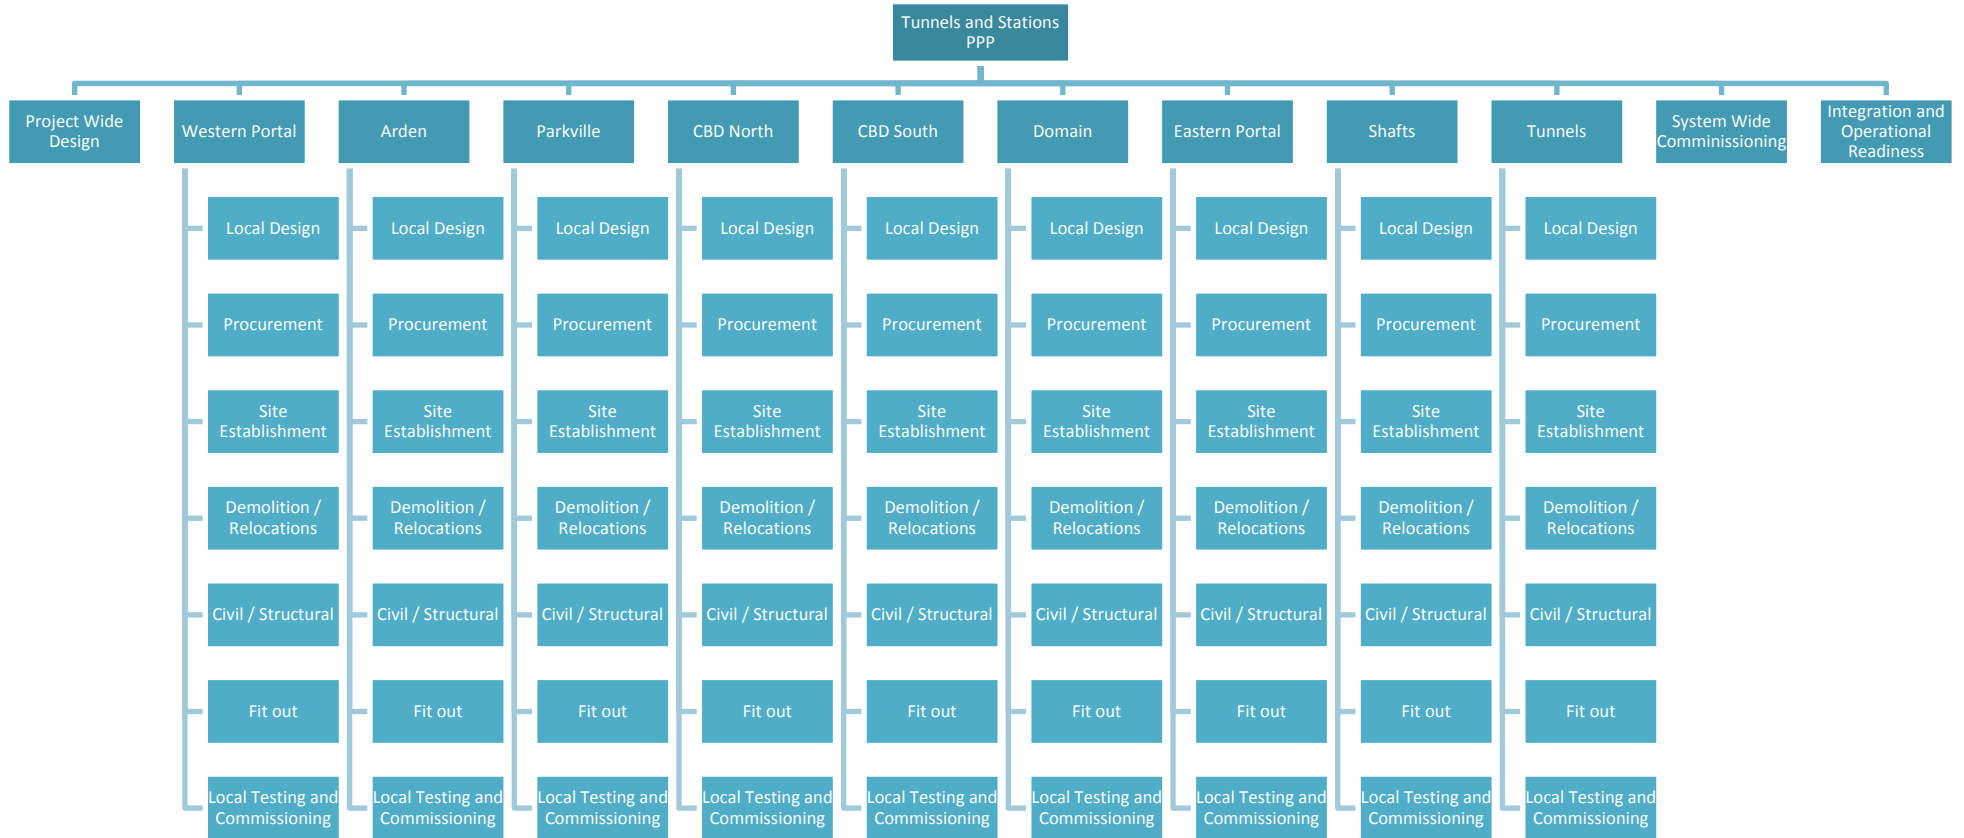

| Precinct | Stakeholder | Requirement/ information | |
|------------------|--|---|----------------|
| Parkville Domain | & University High, Melbourne Grammar School, Melbourne Girls Grammar School, MacRobertson Girls' High School | VCE exams will create additional sensitivities to noise, air quality and utility outages. Additional or alternative mitigation measures may be required during the exam period. | 93382 93383 |
| Parkville | Peter Doherty Institute for Infection and Immunity | PDI hold public events that may generate additional pedestrian traffic and require additional access arrangements. | 93384 |
| Parkville | University of | The University and Business School run examinations, | 93385 |

| | | | |
|--------|---|--|-------|
| | Melbourne and Melbourne Business School | open days, orientation week and other events which could potentially be impacted by works. | |
| Domain | Melbourne Hebrew Congregation | Construction during Hebrew High Holidays requires consideration and consultation. | 93386 |
| Domain | Melbourne Hebrew Congregation | The Jewish Sabbath is on sundown Friday evening to an hour after sundown on Saturday evening. Works in close proximity on Sabbaths may not be appreciated by some particularly when there might be a wedding or bar mitzvah. | 93387 |
| Domain | Shrine of Remembrance Trustees | The Shrine has 166 commemorative services a year and over 1 million visitors. There must be respectful awareness of various commemoration days throughout the year and organise construction activities accordingly, so as to minimise disruption on any ceremonial proceedings. All works are to be suspended on ANZAC day and Remembrance Day. The site should be tidied/prepared accordingly for such events. | 93388 |

Appendix C3: Program Work Breakdown Structure

93389

93390

Appendix C4: Special Events

This Appendix C4 includes a non-exhaustive list of Special Events that must be considered in the planning and execution of the Works.

| Month | Title | Description | Potential impact details |
|----------|-----------------------------|--|--|
| January | Ride the Night | Annual night time cycle event | Swanston Street, St Kilda Road, Docklands |
| January | Australia Day | State celebrations, flag raising at Town Hall and Parade with community groups and activation at Kings Domain. | Swanston Street, Lonsdale Street and Kings Domain |
| January | Midsumma | Large-scale music and lifestyle event on all lawns in Alexandra Gardens | Arts precinct, Alexandra Gardens and surrounds |
| January | Australian Open | Annual two-week festival, day and night | Birrarung Marr, Federation Square |
| February | Orientation Weeks | Orientation weeks for new students at RMIT, Melbourne University | Various - RMIT uses Bowen Street and Melbourne University uses University Square |
| February | Lonsdale Street Festival | Annual Greek cultural street festival | Lonsdale Street and Russell Street |
| February | White Night | CBD-wide annual event with multiple lighting / projection installations and large pedestrian presence | CBD-wide pedestrian management plan impacts. Footprint changes each year. |
| February | Chinese New Year | Annual festival across the city celebrating the lunar new year | TBC: Chinatown, Fed Square, Southbank, Docklands, Queen Victoria Markets |
| February | Moomba (CoM owned) | Annual large-scale CoM produced event | Alexandra Gardens, Riverbank (both sides), Arts Precinct, Queen Vic Gardens, Domain precinct |
| February | Sustainable Living Festival | Annual Sustainable Festival - 2 day event | Birrarung Marr, River Terrace and City Square (The New Joneses) |

| | | | |
|-----------------------|---|---|---|
| March | Comedy Festival | Annual Comedy Festival incorp. Family stage at City Square and ticket booth at Town hall | Swanston Street to Bourke Street and City Square |
| March | Melbourne Food and Wine Festival | Annual 10-day festival across the city | Queensbridge Square, Southbank, Batman Park, Yarra bridges, Fed Square |
| March | Virgin Australia Melbourne Fashion Festival | Week long Fashion Festival | Royal Exhibition Building |
| March | Australian Formula 1 Grand Prix | City Square and Federation square for activations leading up to main race | City Square |
| April | Herald Sun / CityLink Run for the Kids | Mass participation fun run via Herald and Weekly times sponsorship linked to Good Friday Appeal | St Kilda Road and Kings Domain |
| April | ANZAC Day | Annual, RSL organised street parade | St Kilda Road, Swanston Street |
| May | Mother's Day Classic | Breast cancer fundraiser walk / run | Alexandra Gardens and St Kilda Road |
| July | Run Melbourne | Annual running event | Alexandra Gardens, Birrarung Marr, Southbank, Docklands and CBD Streets |
| July | Open House Melbourne | Two day weekend with open buildings | Access via train station for attendees to access certain buildings. City Square was used in 2015. |
| August | Melbourne Spring Fashion Week hub (CoM owned) | Annual Spring Fashion Week hub | Retail precinct activation in City Square |
| August | RMIT Open Day | Annual RMIT open day | Roads closed through CBD North - Franklin Street, LaTrobe Street, Victoria Street, A'beckett Street |
| September/ October | AFL Grand Final Day Parade | Annual AFL Grand Final Parade | New proposed route along Spring Street may eliminate impacts |
| September | Melbourne Fringe Hub | City Square activation for Melbourne Fringe Festival | City Square - relocation required as of 2017 |
| September | Around the Bay | Large cycling event with three day expo (weekend) | Course and activation consideration starting Alexandra Gardens, Alexandra Ave, St Kilda Road, |

| | | | |
|------------|---|--|---|
| | | | Southbank |
| October | Melbourne Marathon | Running Festival throughout CoM and City of Port Phillip | St Kilda Road, Birrarung Marr, Domain precinct, Federation Square |
| October | Melbourne Festival | Temp festival hub at Alex Gardens. Citywide international arts festival. | Potential for parade down Swanston Street |
| October | Festival of Tabernacles | City Square annual event | City Square - relocation required as of 2017 |
| November | Melbourne Cup Parade | Melbourne Cup celebration including parade of jockeys sponsors & community groups. | Swanston Street to Lonsdale Street - St Kilda Road Service Lanes |
| November | Christmas (CoM owned) | Xmas festival | City Square N/A relocation necessary |
| November | Night Noodle Market | 2 week food festival | Birrarung Marr - access for bump in potentially |
| November | City 2 Sea | Mass participation fun run organised by Fairfax Media to promote healthy living and fitness. | St Kilda Road, Yarra Park |
| December | RMIT Parade | Graduates walk down Swanston St, from Latrobe Street to Federation Square | Swanston Street |
| December | NYE (CoM owned) | New Year's Eve annual CBD-wide activation | CBD-wide pedestrian management plan impacts |
| Year round | Other events including those described in Appendix C2.10. | | |

Appendix C5: Protection of Underground Services – Minimum Conditions*

93395

1. A Ground Penetration Permit (**GPP**) system will be in place for the management of all ground penetrations. A permit is required for any works where the ground is broken / penetrated. 93396
2. The GPP shall ensure that there is coordination and consultation with asset owners to ensure all requirements and approvals are achieved. 93397
3. Within the nominated work zone stipulated on the GPP, all known services will be identified¹, and dependent on the proximity of the ground penetration works to these services; positively located² (as per asset owner or contractor organisational requirements) and marked³ prior to the commencement of any ground penetration works. 93398
4. Service investigation works shall consider not only all known services but include investigations to locate domestic and commercial feeds/taps coming from the main. 93399
5. The GPP system will detail roles and responsibilities of all personnel involved in the permit process. Roles and responsibilities must be clearly defined including the minimum competencies, training, authority, consultation expectations and experience required for each role. 93400
6. All personnel involved in the GPP process (including but not limited to the project manager, GPP coordinator, the operators and spotters on the ground) shall receive detailed information, instruction and training into the GPP system. 93401
7. A senior suitably qualified and experienced person with appropriate authority shall be assigned to the position of GPP Coordinator (this role will be nominated under the contract). The GPP Coordinator will be a dedicated resource and shall have the responsibility to manage and coordinate the GPP system, and be the singular point of issue for all GPP's. This role is considered critical in the process and therefore should not be assigned additional unrelated tasks / functions, the role is to be separate from other operational disciplines. 93402
8. A specific hold point shall be included within the GPP, outlining the requirement of a walk through / site inspection to be conducted prior to the commencement of ground penetrating works. This is to be carried out by the GPP Coordinator, site supervisor(s) and all associated operational employees. 93403
9. Duration of the permit shall be determined using, whichever is assessed as the least duration from the following: a risk based approach; or by adhering to the timeframes outlined by dial before you dig (DBYD) (valid for 28 days). The permit shall have a re-validation section to be completed by the GPP Controller to ensure its currency and validity in the field. This re-validation section shall be completed at least weekly. 93404
10. Any unknown and/or redundant services identified during the ground penetration process 93405

* This document has been created by the Melbourne Metro Rail Authority in consultation with construction industry stakeholders and outlines a contemporary and practical summary of expected minimum conditions relating to work on or around underground services.

¹ Means of identification shall include the use of technologies such as acoustic devices, electromagnetic technologies or ground penetrating radar.

² Positively located is defined as verifying the precise horizontal and vertical location of underground assets through non-destructive means i.e. water jetting, vacuum excavation and/or soft digging methods

³ As per AS 1345:1995 Identification of the contents of pipes, conduits and ducts

shall be recorded, the relevant asset owner / stakeholder notified and the information captured as required by 'Minimum Condition 13'.

11. The scope of work including the task and limits of work boundaries must be clearly defined in the GPP and communicated to all affected workers and stakeholders. The issue of a permit covering multiple tasks such as a "blanket permit" and / or "piggy backing" of multiple tasks onto a single permit is to be avoided. 93406
12. All service strikes (and potential to strike) shall be reported through normal incident reporting processes and thoroughly investigated to identify casual factors and implementation of corrective actions to prevent recurrence. As part of the reporting process, escalation to the most senior project representative is required to demonstrate an appropriate governance structure is in place. 93407
13. An underground service data management system will be implemented to capture, update and classify⁴ all underground assets (including the dissemination of updated information) within suitable timeframes to protect underground assets from damage by other user groups. All relevant project participants will be expected to co-operate with the collation of this information. 98927
14. Where requested by MMRA, the GPP system will be independently audited to ensure the inclusion of these 'Minimum Conditions', to verify the adequacy and implementation of the GPP system / process. 93408

⁴As per AS 5488:2013 Classification of Subsurface Utility Information

Appendix C6: [Not disclosed]

Appendix C7: Passenger Modelling Parameters

C7.1 General

118357

Parameters to be used for passenger modelling of stations are provided in this Appendix C7.

118358

Project Co must present the details of its static and dynamic analysis including key assumptions and justification for the chosen modelling approach, especially if the proposed parameters depart from those listed here or otherwise advised by the State.

118359

In addition to the modelling scope and approach defined in these documents, the State may request additional pedestrian modelling to be undertaken by Project Co to test sensitivities of or changes to model inputs, such as network planning, timetable, or these parameters.

118360

C7.2 Static capacity calculations

118361

(a) Calculation of the required number of ticket gates must be based on the following assumptions:

118362

- i) the time profiles specified in Appendix B1 of *Volume 2, Part B: Technical Requirements* to convert 1-hour flows to 15-minute peak entry and exit flows;
- ii) a factor of 0.4 to convert the 15-minute peak flows to 5-minute peak entry and exit flows;
- iii) the number of gates required in each direction is to be determined based on the 5-minute peak entry and exit flows and the gate capacity set out in *Volume 2, Part B: Technical Requirements Section 7.4.1 (j)*; and
- iv) wide barrier gates and redundancy are to be added in accordance with *Volume 2, Part B: Technical Requirements Section 7.7.7*.

118363

118364

118365

118366

(b) For the purposes of calculating platform width, an edge effect of 0.5m should be assumed for the rear of each platform. No edge effect is required to be assumed for the front edge (PSD side) of the platform. The static calculation of the required platform width should assume a passenger occupancy load of 35% of the total patronage demand constrained to 25% of the available platform length.

118367

Note that pedestrian simulation modelling may ultimately indicate that additional gates, vertical transport and platform circulation space may be required to support the Level of Service targets established in *Volume 2, Part B: Technical Requirements Section 7.4.1 (g)*.

118368

C7.3 Operational scenarios

118369

C7.3.1 Normal operations scenario

118370

Volume 2, Part B: Technical Requirements Section 7.4 (f) i. defines normal operations for the purposes of calculating station levels of service as where trains arrive at scheduled headways of 150 seconds.

118371

For the purposes of modelling a normal operations scenario for the Design Case, it should be assumed that trains will arrive simultaneously in the eastbound and westbound directions in both the AM and PM peak periods.

118372

C7.3.2 Degraded operations scenario

118373

Volume 2, Part B: Technical Requirements Section 7.4 (f) i. defines degraded operations for the purposes of calculating station levels of service as the case where two consecutive scheduled train arrivals are missed on both platforms. Services resume at the time of the next scheduled train after the two missed headways. Upon resumption of services, the following trains arrive at 120-second headways until the timetable can be recovered (that is, until trains are able to run to their original schedule).

118374

For the purposes of modelling a degraded operations scenario for the Design Case, it should be assumed that trains will arrive simultaneously in the eastbound and westbound directions in both

118375

the AM and PM peak periods.

C7.3.3 Escalator unavailable scenario 118376

Volume 2, Part B: Technical Requirements Section 7.4 (f) i. defines an escalator unavailable scenario as where at least one escalator is not operating on each level of the station (including one escalator not operating at each of the station exits). During escalator unavailability, trains arrive at normal scheduled headways of 150 seconds. 118377

For the escalator unavailable scenario, escalator capacity may optionally be increased to 121 pax/min (see *Volume 2, Part B: Technical Requirements Section 7.5.5 (b)*) 118378

C7.4 Pedestrian simulation modelling 118379

Pedestrian simulation modelling must be based on the following assumptions: 118380

- (a) The Fruin distribution of walk speeds is to be used, specifically: 118381
 - i) Normal distribution with a mean of 1.35 m/s and standard deviation of 0.255 118382
 - ii) Minimum speed of 0.65m/s 118383
 - iii) Maximum speed of 2.05m/s. 118384
- (b) For the purposes of pedestrian simulation modelling, Project Co must demonstrate an adequate percentage of passengers have been assumed to use lifts, which must be greater than 2%. This is to enable simulation of the interactions between the walk routes for lift users and for escalator users. 118385
- (c) For normal operations and degraded operations scenarios, the capacities for ticket gates and escalators are to be capped as advised in the *Volume 2, Part B: Technical Requirements*. These capacities are 28 passengers per minute and 100 passengers per minute, respectively. Refer to *Volume 2, Part B: Technical Requirements* Clauses 7.4.1(j), 7.4.1 (f) i., 7.4.1 (f) ii., and 7.5.5 (a). 118386
- (d) For the escalator unavailable scenario (*Volume 2, Part B: Technical Requirements* Clauses 7.4.1 (f) iii. and 7.5.5 (b)), escalator capacity can optionally be assumed to increase to 121 passengers per minute. 118387
- (e) For the purposes of determining passenger waiting areas on platform, the platform area should be divided into four parts of equal length. As per the static calculations, an edge effect of 0.5m should be assumed at the rear of the platform. Passengers waiting on platforms should be distributed so that for each walk route to the platform: 118388
 - i) 35% of passengers will wait for a train in the quarter of the platform they first reach, 118389
 - ii) 30% of passengers will walk to wait in the closest adjacent quarter of the platform. If there are two equidistant adjacent quarters of the platform, passengers will travel to the quarter of the platform that minimises their turn radius (e.g. travel in the direction of the escalator, stair, or lift runoff), 118390
 - iii) 22.5% of passengers will walk to wait in the next adjacent quarter of the platform, 118391
 - iv) 12.5% of passengers will walk to wait in the furthest quarter of the platform. 118392
- (f) Outputs generated from the passenger simulation modelling must at a minimum be as follows: 118393
 - i) The average level of service for each area must be calculated to exclude intervals with zero pedestrian flow. Maximum level of service plots must also be provided for normal operations. 118394
 - ii) Journey times must be provided for average, minimum, and maximum journey times from platform to street for each walk route (i.e. exit), for each modelled scenario and time period. 118395
 - iii) For AM and PM peak hours for normal operations, the following is to be provided: 150504
 - (1) A stacked minute-by-minute histogram showing both the total boarding occupancy on platform as well as a breakdown of this total into each of the 150505

- Queuing Level of Service Designations as set out in Appendix B2
- (2) A minute-by-minute graph for alighting passengers on platform 150506
 - (3) A minute-by-minute graph for a zone of 6m around the gatelines showing the number of passengers queuing 150507

METRO TUNNEL

TUNNEL AND STATIONS

PUBLIC PRIVATE PARTNERSHIP

Project Scope and Technical Requirements (PS&TR)

Part D: Glossary of Terms

1 Glossary of Terms

Unless otherwise expressly defined in Table D1, expressions used in the PS&TR have the meaning given to them in the Agreement.

A table of acronyms is provided in Table D2.

Table D 1 – Glossary of Terms

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|--|-------|
| 2031 Project Case | | means the 2031 Project Case passenger forecasts defined in Part B, Appendix B1. | 93440 |
| Aboriginal Employment Target | | means the Aboriginal workforce target set by the Victorian Government of 2.5% estimated total labour hours. | 93441 |
| Accelerated Design Packages | ADP | has the meaning given in the Design Review Schedule. | 93442 |
| Acceptable Effects | | means the extent to which the existing ground conditions, infrastructure and properties may be acceptably affected consistent with the Environmental Requirements of the State Project Documents. | 93443 |
| Accessible | | means features to enable use by people with a disability as defined in AS 1428 and appropriate for providing universal access compliant with the Disability Discrimination Act. | 93444 |
| Accredited Professional | | means a person accredited as a Green Star Accredited Professional or an IS Accredited Professional by the GBCA or ISCA respectively. | 93445 |
| Acid Sulfate Soil and Rock (ASS/ASR) Management Sub-Plan | | means the sub-plans to the Spoil Management Plan to be prepared in accordance with EPR C2. | 93446 |
| Acquired Land | | means the land obtained by the State and made available to Project Co for delivery of the Works. | 93447 |
| After Last Before First | ALBF | means an occupation facilitated through the Train Franchisee, that takes place after the last train for the day and prior to the first train of the following day. | 93448 |
| Agreement Processes | | has the meaning given in the Systems Engineering Standard. | 93449 |
| AIRAH Technical Handbook | | means the Australian Institute of Refrigeration, Air Conditioning and Heating 'Technical Handbook' 5 th edn. 2013. | 93450 |
| Approval Conditions | | any condition or requirement to be satisfied as a result of a planning, environmental or heritage approval process, such as an Environmental Performance Requirement, condition of the relevant Incorporated Document, gazetted planning overlay or heritage approval. | 93451 |
| Arden-Macaulay Precinct | | means the 144 hectare area identified as an urban renewal precinct by the City of Melbourne, including Macaulay Precinct and Arden Precinct. | 93452 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|--|-------|
| Arden Precinct | | see 'Precinct'. | 93453 |
| Arden Station | | means the new underground station to be constructed at Arden as set out in the PS&TR. | 93454 |
| Arden Urban Renewal Precinct | | means the 56 hectare parcel within the Arden and Macaulay urban renewal area. | 93455 |
| Arden Vision and Framework | | means the document developed by the Victorian Planning Authority in collaboration with officers of the City of Melbourne and other Victorian Government departments and agencies and released in draft form in September 2016. | 93456 |
| As-Built Records | | means the as-built information required to be provided in relation to the Works in accordance with section 1.3.5 of Part C. | 93457 |
| Asset | | means a discrete physical component of the Works. | 93458 |
| Asset Component | | means a component of an Asset which has a specified Design Life or maintenance requirement which varies from that specified for the Asset of which the Asset Component forms a part. | 93459 |
| Asset Inventory | | has the meaning given in section 1.3.7 of Part C. | 93460 |
| Asset Management System | | means a system for Asset management that complies with section 1.3.7 of Part C. | 93461 |
| Asset Owner | | means any relevant Returned Asset Owner or Utility Infrastructure owner. | 93462 |
| Asset Sub-Component | | means one of the elements which forms an Asset Component. | 93463 |
| Assurance Case | | means a structured argument supported by a body of evidence that provides a compelling, comprehensible and valid justification that a system or asset is acceptably safe for its given application in a given operating environment. | 93464 |
| Assurance Case Report | | means the report described in Annexure 3, section 3.5.4 of Part C. | 93465 |
| Australian Bureau of Statistics Census of Population and Housing | | means statistical data captured from all Australians via the Census, providing information on key characteristics of people including languages spoken and origin of birth. | 93466 |
| Australasian Certification Authority for Reinforcing Steels | ACRS | means the industry based third party certification scheme certifying manufacturers and suppliers of reinforcing, prestressing and structural steels to Australian and New Zealand Standards. | 93467 |
| Australian Government Protective Security Policy Framework | | means the framework developed to assist Australian Government entities to protect people, information and assets, at home and overseas. | 93468 |
| Australian Greenhouse and Energy Minimum | | means the GEMS Regulator as described in the Greenhouse and Energy Minimum Standards Regulation (2012). | 93469 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|--------|
| Standards Regulator | | | |
| Australian Height Datum | AHD | means the geodetic datum for altitude measurement in Australia. | 93470 |
| Australian Standard | AS | means standards published by Standards Australia. | 93471 |
| Austrroads | | means the peak organisation of Australasian road transport and traffic agencies. | 93472 |
| Austrroads Design Vehicle and Turning Path Templates Guide | | means the Austrroads Guide of that name. | 93473 |
| Austrroads Guides | | means the range of guides published by Austrroads covering the design, construction, maintenance and operation of the road network in Australia, including the Guide to Traffic Management and the Guide to Road Design. | 93474 |
| Austrroads Guide to Road Design | AGRDR | means the Austrroads Guide of that name. | 93475 |
| Automatic Rescue Device | ARD | means the device that will bring a lift car to the nearest floor for evacuation of passengers in the event of motor failure and/or any power supply interruption, and hold the elevator car on that floor until normal lift service can be resumed. | 93476 |
| Average Recurrence Interval | ARI | means the average or expected period between exceedances of a given rainfall total accumulated over a given duration. | 93477 |
| Back of House | BOH | means the operational areas of the stations that are not accessible to the public. | 93478 |
| Base Case | | means a 'business as usual' early design of the project, accepted by key stakeholders and used to measure performance against quantifiable parameters such as resource consumption and greenhouse gas emissions. | 93479 |
| Baseline Security Clearance | | has the meaning given in the Protective Security Policy Framework, specifically the Australian Government personnel security management protocol. | 150557 |
| Bicycle Priority Route | BPR | means a discrete section of the VicRoads' Principle Bicycle Network that has been elevated to a higher order of priority, mainly on the basis of potential for separation from motorised traffic. | 93480 |
| Biophilic Design Guidelines | | means the document entitled 'Stations: Biophilic Design Guidelines' prepared and provided by the State, initially MMR-AJM-UGAA-RP-NS-002236. | 93481 |
| Blast Assessment | | means the assessment described in section 7.17 of Part C. | 93482 |
| Blast Assessment Report | | means the report described in section 7.17.5 of Part C. | 93483 |
| Building 14 | | means the RMIT building on the eastern corner of Swanston and Franklin Streets. | 93484 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|----------|---|-------|
| Building Code of Australia | BCA | means the uniform set of technical provisions for the design and construction of buildings and other structures which form Volumes One and Two of the National Construction Code. | 93485 |
| Building Management System | BMS | means a computer-based system that controls and monitors the mechanical and electrical plant and systems as described in section 9.10 of Part B. | 93486 |
| Business Disruption Plan | | means the plan described in Environmental Performance Requirement B2 to be prepared as part of the Communications and Stakeholder Engagement Management Plan. | 93487 |
| Business Support Guidelines for Construction | | means the guidelines prepared by the State to address the potential adverse impacts of a temporary nature that construction may have on businesses in areas close to construction activities. | 93488 |
| CAD Management Plan | | means the sub-plan described in Annexure 2, section 2.10.4 of Part C. | 93489 |
| Carbon and Energy Sub-Plan | | means the sub-plan described in Annexure 5, section 5.1.6 of Part C. | 93490 |
| Carlton and United Breweries Site | CUB Site | means the site formerly occupied by Carlton and United Breweries, located at the north end of Swanston Street in the centre of the block bordered by Victoria, Swanston, Queensberry and Bouverie Streets. | 93491 |
| CBD North Precinct | | see 'Precinct'. | 93492 |
| CBD North Public Realm Concept Plan | | means the document provided in Appendix A4. | 93493 |
| CBD North Station | | means the new underground station to be constructed at CBD North as set out in the PS&TR. | 93494 |
| CBD Revitalisation Project | | means the award winning project delivered by the City of Melbourne in 1996. | 93495 |
| CBD South Precinct | | see 'Precinct'. | 93496 |
| CBD South Station | | means the new underground station to be constructed at CBD South as set out in the PS&TR. | 93497 |
| Certified Design | | has the meaning given in the Design Review Schedule. | 93498 |
| Certified Design Documentation | | means the Design Documentation described in section 7.5.3 of Part C. | 93499 |
| City Baths | | means the building located on the block bounded by Swanston, Victoria and Franklin Streets. | 93500 |
| City of Melbourne Design Standards | | means the standards developed by the City of Melbourne to guide design and construction in public spaces, include typical features of streets and other public spaces such as paving, kerbs, tree pits, lighting and furniture. | 93502 |
| City of Melbourne Open Space | | means the document entitled 'Open Space Strategy: Planning for Future Growth' published by the City of | 93503 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|---|--------|
| Strategy | | Melbourne and describing the City of Melbourne's overarching framework and strategic direction for open space planning for the next 15 years. | |
| City of Melbourne University Square Master Plan | | means the master plan developed by the City of Melbourne to outline a new vision for University Square and describe how this will be delivered, released in draft form for public exhibition in 2016. | 93504 |
| City of Port Phillip | | means the local government authority for former cities of Port Melbourne, South Melbourne and St Kilda, Victoria, Australia. | 93505 |
| City Square Background Paper | | means the document prepared by the City of Melbourne and provided in Appendix A4. | 93506 |
| City West Water | | means one of three government owned retail water businesses responsible for provision of drinking water, sewerage, trade waste and recycled water services to customers in Melbourne's central business district, inner and western suburbs. | 93507 |
| Clause | | refers to a clause in the Project Agreement. | 93508 |
| Clifton Hill Metro Tunnel | | means the potential future metro rail project as described in the PTV Network Development Plan. | 93509 |
| Climate Resilience Sub-Plan | | means the sub-plan described in Annexure 5, section 5.1.5 of Part C. | 93510 |
| Closed Circuit Television | CCTV | means a TV system in which signals are not publicly distributed but are monitored, primarily for surveillance and security purposes. | 93511 |
| Coordinated Universal Time | UTC | means the primary time standard as defined by International Telecommunications Union Recommendation (ITU-R TF.460-6), Standard-frequency and time-signal emissions. | 150558 |
| Combined Services Route | CSR | means the common cable containment system that houses communications, signalling and power cabling. | 93512 |
| Common Cause Failure Analysis | CCFA | means the analysis to be undertaken by Project Co in accordance with Annexure 3 section 3.7.4 (h) of Part C. | 93513 |
| Communication Equipment Room | CER | means an equipment room designed to house communications infrastructure. | 93514 |
| Communications and Stakeholder Engagement Management Plan | CSEMP | means the Management Plan described in Annexure 6, section 6.1 of Part C. | 93515 |
| Communications and Stakeholder Engagement Manager | | means the person described in section 5.8.1 of Part C. | 93516 |
| Communications Based Train Control | CBTC | means a high capacity signalling system utilising high-resolution train location determination, independent of track circuits; continuous, high capacity, bidirectional train-to-wayside data communications; and train-borne and wayside processors capable of implementing vital functions. | 93517 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|--------|
| Community and Business Involvement Plan | | means the plan described in Environmental Performance Requirement SC4 to be prepared as part of the Communications and Stakeholder Engagement Management Plan. | 93518 |
| Communications and Stakeholder Engagement Report | | means the report described in section 5.9.1 of Part C. | 93519 |
| Competency Management Plan | | means the Management Plan described in Annexure 2, section 2.12 of Part C. | 150562 |
| Concept of Operation | COO | means the operating plan for the rail system. | 93520 |
| Condition Survey | | means the conditions surveys of existing ground, infrastructure property and utilities to be undertaken in accordance with section 10.7.2 of Part C. | 93521 |
| Configuration Management | CM | means the systems engineering process for establishing and maintaining consistency of an asset's performance, functional, and physical attributes with its requirements, design, and operational information throughout its life. | 93522 |
| Configuration Management Plan | | means the Management Plan described in Annexure 3, section 3.2 of Part C. | 93523 |
| Construction Documentation | | means the documentation described in section 10.4 of Part C. | 93524 |
| Construction Environmental Management Plan | CEMP | means the Management Plan described in Annexure 4, section 4.1 of Part C. | 93525 |
| Construction Management Plan | | means the Management Plan described in Annexure 10, section 10.1 of Part C. | 93526 |
| Construction Package | | means each construction package as contemplated by the Construction Management Plan. | 93527 |
| Construction Procedure | | means a procedure described in section 10.4.4 of Part C or as otherwise required to be prepared and submitted by a Reference Document. | 93528 |
| Construction Records | | means those documents described in section 1.3.4 of Part C. | 93529 |
| Consumables | | means those Asset Sub-Components which are not durable and are capable of being consumed, destroyed, dissipated, wasted or spent, including grease, lubricants, oils, indicator lamps, disposable filters, battery electrolytes, gaskets, cooling water, chemicals, belts, static fuses and landscaping composts. | 93530 |
| Contaminated Land Assessment – Interpretive Report | | means the report described in section 7.11 of Part C. | 150563 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|-------|
| Crime Prevention Through Environmental Design | CPTED | means an approach to crime prevention that takes into account the relationship between the physical environment and the users of that environment. | 93531 |
| Critical Areas | | means a room/s and or system that must provide uninterrupted operation, together with all associated plant and equipment. | 93532 |
| Critical Design Review | CDR | means the Stage Gate Review to be undertaken by Project Co in accordance with section 1.1.6 of Part C. | 93533 |
| Cultural and Community Identity Enhancement Sub-Plan | | means the sub-plan to the Urban Design Management Plan described in Annexure 4, section 4.3.2 (i). | 93534 |
| Culturally and Linguistically Diverse (CALD) Engagement Strategy | | means the engagement strategy to be prepared by Project Co as described in section 5.6.1.3 of Part C. | 93535 |
| Customer Help Point | CHP | means an OCS device installed at platforms and concourses which provides at-call train service information and emergency assistance intercom facilities. | 93536 |
| Customer Service Centre | CSC | means the Customer Service Centre as described in section 7.7.4 of Part B. | 93537 |
| D&C Mobilisation Program | | means a filtered view of the full D&C Program that shows the initial design, mobilisation, approvals, procurement, surveys and other pre-construction activities required to commence construction at each site as planned. | 93538 |
| Data Date | DD | means the date of the latest update to the D&C Program that defines the demarcation between actual work performed and remaining work. | 93539 |
| Day-1 | | means the proposed service plan on project opening in 2026. Also referred to as the “initial service plan”, which delivers the “initial capacity uplift”. | 93540 |
| Defects List | | means the list of all Defects to be maintained and updated by Project Co in accordance with section 1.3.9 of Part C. | 93541 |
| Degraded Operating State | | means a state of continuing system operation under significant operational or equipment failure. | 93542 |
| Demolition Management Plan | | means the Management Plan described in Annexure 10, section 10.5 of Part C. | 93543 |
| Demolition Works | | means the works described in section 8.4 of Part C. | 93544 |
| Department of Social Services' Settlement Reporting Database | | means the Federal Government database containing statistical data collected on permanent settlers to Australia who have arrived since January 1991. | 93545 |
| Design Case | | means the Design Case (2046 plus 25 percent) passenger forecasts defined in Part B, Appendix B1. | 93546 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|-------|
| Design Change Notice | DCN | means the notice to be submitted to the State and the Independent Reviewer describing a design change including the reason for the design change. | 93547 |
| Design Fire Scenario | DFS | has the meaning given in AS 4825. | 93548 |
| Design Management Plan | | means the Management Plan described in Annexure 7 section 7.1 of Part C. | 93549 |
| Design Package | | means a design package as set out in the Design Management Plan. | 93550 |
| Design Package Register | | means the register described in section 7.2 of Part C. | 93551 |
| Design Stage | | means the stages of the design development process as set out in the Design Review Schedule, being Interim Design, Certified Design and IFC Design. | 93552 |
| Design Report | | means the report to be submitted as part of the Interim Design Documentation and Certified Design Documentation as the context requires. | 93553 |
| Design Risk Register | | means the register described in section 7.4 of Part C. | 93554 |
| Design Year | | means 30 years after Day-1. | 93555 |
| Digital Engineering Management Plan | | means the Management Plan described in Annexure 2, section 2.10 of Part C. | 93556 |
| Disability Discrimination Act | DDA | means the <i>Disability Discrimination Act 1992</i> (Cth). | 93557 |
| Disability Standards for Accessible Public Transport | DSAPT | means the <i>Disability Standards for Accessible Public Transport 2002</i> (Cth) under section 31(1) of the <i>Disability Discrimination Act 1992</i> (Cth). | 93558 |
| Distribution Board | DB | means power supply distribution boards as described in section 10 of Part B. | 93559 |
| Distribution Substations | | means all power substations other than the traction power substation and the main intake substation. | 93560 |
| Domain Interchange | | means the tram interchange on St Kilda Road between Domain Road and Park Street. | 93561 |
| Domain Precinct | | see 'Precinct'. | 93562 |
| Domain Public Realm Concept Plan | | means the document provided in Appendix A4. | 93563 |
| Domain Station | | means the new underground station to be constructed at Domain as set out in the PS&TR. | 93565 |
| Down Time | | means the time interval for which the item is in a down state. Note: Where redundancy exists, while a particular system is a down state, the parent system may not be in a down state, dependent on system details and conditions. | 93566 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|---|-------|
| Durability Assessment | | means the assessment to be undertaken by Project Co in accordance with section 7.10 of Part C. | 93567 |
| Durability Management Sub-Plan | | means the sub-plan of the Design Management Plan described in Annexure 8, section 8.1.2 (p) of Part C. | 93568 |
| Dust Management Plan | | means the plan described in Environmental Performance Requirement AQ1 to be prepared as part of the Construction Management Plan. | 93569 |
| Dynamic Modelling | | means, in respect of station pedestrian capacity, the use of pedestrian simulation software to assess pedestrian flows, capacity and Levels of Service in a station. | 93570 |
| Dynamic Object-Oriented Requirements System | DOORS | means IBM's Rational DOORS Next Generation requirements management tool. | 93571 |
| Eastern Portal | | means the interface area between the existing Dandenong line to the Tunnel at South Yarra, including the decline structure and the cut and cover tunnel. | 93572 |
| Eastern Portal ventilation building | EPVB | means a remote building to support emergency services intervention and accommodate tunnel ventilation system including associated power and controls infrastructure. | 93573 |
| EES Heritage Listed Places | | means the Heritage places listed on the Victorian Heritage Register, Victorian Heritage Inventory or Heritage Overlay in the applicable planning schemes and described in the Project EES. | 93574 |
| Electrical Resistance Test | | means the test described in TCRP Report 71, Volume 6: Direct Fixation Track Design Specifications, Research, and Related Material, Section 3, Part A, Section 4.03. Test G (Page 35). | 93575 |
| Electrol | | means the electrical control centre for the Metropolitan Railway Network, located at Burnley. | 93576 |
| Electromagnetic Compatibility | EMC | means the ability for electronic and electrical systems or components thereof to continue to function as intended when exposed to electromagnetic field below a nominated value. | 93577 |
| Electromagnetic Compatibility (EMC) Management Plan | | means the Management Plan described in Annexure 8, section 8.2 of Part C. | 93578 |
| Electromagnetic Interference | EMI | means the disturbance of operation of electrical and electronic devices in the vicinity of electromagnetic field or in the radio frequency spectrum that is caused by another electrical and/or electronic source (existing and/ or new sources). | 93579 |
| Elizabeth Street South Streetscape Improvement Plan | | means the plan developed by the City of Melbourne describing proposed upgrades to Elizabeth Street between Flinders Lane and Flinders Street to expand the pedestrian space and improve the amenity of the area, released for public consultation in August 2016 and expected to be | 93580 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|---|--------|
| | | finalised in mid-2017. | |
| Emergency/ Emergencies | | means a potential or actual incident that: (a) poses significant harm to people, property, the environment or the local community; or (b) requires assistance from external emergency services agencies. | 93581 |
| Emergency Management Act | | means the <i>Emergency Management Act 2013</i> (Vic). | 93582 |
| Emergency Operating State | | means a state of system operations in response to a major safety or security event. | 93583 |
| Emergency Management (Critical Infrastructure Resilience) Regulations | | means the <i>Emergency Management (Critical Infrastructure Resilience) Regulations 2015</i> (Vic). | 93584 |
| Emergency Management Victoria | | means the statutory body tasked with ensuring Victoria is prepared for future emergencies and able to recover quickly from their impacts. | 93585 |
| Emergency Train Operations | | means the scenario requiring movement of trains through the system in line with the following parameters: (a) capacity to move up to 12 trains at any one time in both tunnels; (b) 10-car trains in operation; and (c) train movements restricted to a maximum speed of 30km/h. | 118935 |
| Emergency Power Supply | | means the source of emergency power described in section 10.2.3 of Part B and sized to continuously support 100% of all Operationally Critical and Operationally Essential Systems, as well as provide adequate traction power to facilitate Emergency Train Operations. | 118935 |
| Emergency Response and Incident Management Plan | ERIMP | means the sub-plan described in Annexure 7, section 7.2 of Part C. | 93586 |
| Emergency Response and Incident Management Workshop | | means the workshop described in section 6.5.2 of Part C. | 93587 |
| Emergency Risk Management Plan | ERMP | means the Management Plans described in Annexure 13, section 13.1 of Part C. | 93588 |
| Emergency Service Organisations | ESO | means any one or more of Victoria Police, MFB, Ambulance Victoria or the State Emergency Service as the context requires. | 93589 |
| Energy and Water Management | E&WMS | means the system described in section 9.11 of Part B. | 93590 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|-------|
| System | | | |
| Energy Rating Label | | means the rating system describing the energy efficiency of an appliance and its average use annual energy consumption. | 93591 |
| Energy Safe Victoria | | means the statutory body established under the <i>Energy Safe Victoria Act 2005</i> responsible for electricity, gas and pipeline safety in the State of Victoria. | 93592 |
| Engineering Product Approval | | has the meaning given in the MTM standard L1-CHE-PRO-004 - Type Approval Procedure. | 93593 |
| Environment Coordinator | | means the person or people described in section 3.4.2 of Part C. | 93594 |
| Environment Manager | | means the person described in section 3.4.1 of Part C. | 93595 |
| Environmental Control System | ECS | means the system to be provided throughout all public areas of the stations to provide appropriate environmental comfort to station occupants, as described in section 9.2 of Part B. | 93596 |
| Environment Effects Statement | EES | means the assessment of the potential environmental impacts of effects of the Project required under the <i>Environment Effects Act 1978 (Vic)</i> . | 93597 |
| Environmental Management Framework | EMF | means the Environmental Management Framework approved by the Minister for Planning in line with the Incorporated Document. | 93598 |
| Environmental Management Plans | | means the Management Plans described in Annexure 3 of Part C. | 93599 |
| Environmental Management System | EMS | means a system as described in AS/NZS/ISO 14001. | 93600 |
| Environmental Performance Requirements | EPR | means the performance requirements approved by the Minister for Planning as part of the Environmental Management Framework. | 93601 |
| Environmental Report | | means the report described in section 3.3 of Part C. | 93602 |
| Environmental Sustainability Charter | | means the Environmental Sustainability Charter of the Australian Steel Institute. | 93603 |
| Enviropoints | | means a composite measure of the environmental impact of any material, product or service and are used in the ISCA materials calculator. | 93604 |
| Equipment Energy Efficiency Program | E3 | means the program implemented through the Council of Australian Governments Energy Council to deliver an integrated program on energy efficiency standards and energy labelling for equipment and appliances. | 93605 |
| Extended HCMT | | means a 10 car formed of a single 10-car unit providing a train-set of approximately 234 metres in length with an operational driving cab at each end. See also 'High Capacity | 93606 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|--|-------|
| | | Metro Train'. | |
| Extreme Event | EFS | has the meaning given in AS 4825. | 93607 |
| Failure Mode | | means the manner in which failure occurs. | 93608 |
| Failure Modes Effects and Criticality Analysis | FMECA | means the analysis to be undertaken by Project Co in accordance with Annexure 3, section 3.7.4 (c) of Part C. | 93609 |
| Failure Reporting, Analysis and Corrective Action System | FRACAS | means a system used to report, analyse and record failures, and plan corrective actions and record results. | 93610 |
| Federation Square Management | | means Fed Square Pty Ltd. | 93611 |
| Finish to Start | | means a scheduling logic relationship that dictates that a successor activity cannot start until the predecessor activity finishes. | 93612 |
| Fire and Life Safety Strategy | | means the strategy set out in the Fire Engineering Report. | 93613 |
| Fire Brigade Intervention Model | FBIM | has the meaning given in the MFB Guidelines GL-17: Fire Brigade Intervention Model - General Provisions. | 93614 |
| Fire Control Room | FCR | has the meaning given in the Building Code of Australia (BCA). | 93615 |
| Fire Engineering Brief | FEB | has the meaning given in the International Fire Engineering Guidelines 2005. | 93616 |
| Fire Engineering Report | FER | has the meaning given in the International Fire Engineering Guidelines 2005. | 93617 |
| Fire Protection Committee | | means the committee comprising Utility Providers, the MFB and local government authorities. | 93618 |
| Fire Resistance Level | FRL | has the meaning given in the Building Code of Australia (BCA). | 93619 |
| Fire Safety Code | | means all relevant statutory and regulatory requirements governing the installation, testing, availability and maintainability of any system forming part of the fire and life safety provisions. | 93620 |
| Fitted | | means rolling stock and rail infrastructure that includes on-board or wayside equipment forming part of the high capacity signalling system. | 93621 |
| Forest Stewardship Council | | means the organisation administering the certification system for forest and forest products. | 93622 |
| Fractional Equivalent Dose | FED | means the fraction of the dose that would be expected to result in a specific effect (e.g. incapacitation) in 50% of the population exposed to that dose taking into account airborne contaminants absorbed and/or a measure of the combined | 93623 |

| TERM | ACRONYM | DEFINITION | DNG |
|------------------------------------|---------|--|--------|
| | | effects of convected and radiant heat by an occupant. | |
| Franchisee | | means either the Train Franchisee or the Tram Franchisee as the context requires. | 93624 |
| Front of House | | means the Paid and Unpaid areas of stations that are publicly accessible. | 93625 |
| Full Time Equivalent | FTE | means the hours worked by one person on a full-time basis. | 93626 |
| Gas Safety Act 1997 | | means the Gas Safety Act 1997 (Vic). | 93627 |
| Gate 10 | | means an entrance to the University of Melbourne located on the northern Grattan frontage opposite University Square. | 93628 |
| GBCA GS Rating Tool | | see 'GS Rating Tool'. | 93629 |
| GBCA Reference Building | | has the meaning given in section 2.12 of the document 'Green Star – Design & As Built: MMRP'. | 150559 |
| Geotechnical Interpretive Report | GIR | means the report described in section 7.11 of Part C. | 93630 |
| GIS Management Plan | | means the sub-plan described in Annexure 2, section 2.10.6 of Part C. | 93631 |
| Glossary of Terms | | means this Part D. | 93632 |
| Goal Structuring Notation | GSN | has the meaning given in the "GSN Community Standard Version 1 – November 2011". | 93633 |
| Good Electricity Industry Practice | GEIP | means the exercise of that degree of skill, diligence, prudence and foresight that reasonably would be expected from a significant proportion of operators of facilities forming part of a power system for the generation, transmission, distribution or supply of electricity under conditions comparable to those applicable to the relevant facility consistent with applicable laws, regulations, the Distribution Technical Code, licences, codes, reliability, safety and environmental protection. | 93634 |
| Graduate Union | | means the Graduate Union of the University of Melbourne Incorporated, a residential college of the University of Melbourne located at 220 Leicester Street Carlton. | 93635 |
| Green Star Accredited Professional | | means an individual who has successfully completed a Green Star Accredited Professional (GSAP) qualification delivered by the Green Building Council of Australia (GBCA) to work with the Green Star Rating Tools. | 93636 |
| Ground Movement Plan | | means the plan described in Environmental Performance Requirement GM3 to be prepared as part of the Construction Management Plan. | 93637 |
| Groundwater Management Plan | | means the plan described in Environmental Performance Requirement GW3 to be prepared as part of the Construction Management Plan. | 93638 |
| GS Rating Tool | | means the GBCA Green Star Design and As-Built Melbourne | 93639 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|--|-------|
| | | Metro Rail Tool. | |
| GS Rating Tool Scorecard | | means the self-assessment scorecard provided with the Green Star (GS) Rating Tool. | 93640 |
| Handback Documentation | | means the documentation described in section 11.2 of Part C. | 93641 |
| Handback Management Plan | | means the Management Plan described in Annexure 11, section 11.2 of Part C. | 93642 |
| Haymarket Walk | | means the footway between Berkeley Street and Elizabeth Street. | 93643 |
| Hazard Log | | means a record keeping tool applied to tracking all hazard analysis, risk assessment and risk reduction activities for the whole-of-life of a safety-related system. | 93644 |
| HCMT Project | | has the meaning given to the High Capacity Metro Trains Project in the Project Agreement. | 93645 |
| Health and Safety Completion Report | | means the report described in section 11.2.2 of Part C. | 93646 |
| Health and Safety Compliance Audit | | means the audits described in section 6.2.3 of Part C. | 93647 |
| Health and Safety Management Plan | | means the Management Plan described in Annexure 7, section 7.1 of Part C. | 93648 |
| Health and Safety Management Plan Audit | | means the audits described in section 6.2.2 of Part C. | 93649 |
| Health and Safety Performance Report | | means the report described in section 6.1.5 of Part C. | 93650 |
| Health and Safety Performance Report Template | | means the template provided by the State entitled 'Monthly Safety Report Form' upon which Project Co must base its Health and Safety Performance Report, initially DOC/15/1201. | 93651 |
| Health and Safety Professional | | means a person described in clause 15.2 (g). | 93652 |
| Health and Safety Risk Assessment | | means the risk assessment described in section 6.1.4 of Part C. | 93653 |
| Health Hazard Analysis | HHA | means the analysis to be undertaken by Project Co in accordance with Annexure 3, section 3.6.4 (f) of Part C. | 93654 |
| Heavy Vehicle National Law | | means the <i>Heavy Vehicle National Law Application Act 2013</i> (Vic) and related: <ul style="list-style-type: none"> (1) Regulations; (2) Codes of practise; (3) other compliance codes; (4) directions on safety or other notices issued by any relevant authority; and (5) standards relevant and applicable to any part of the | 93655 |

| TERM | ACRONYM | DEFINITION | DNG |
|-------------------------------------|---------|---|--------|
| | | Project Activities. | |
| Heritage Victoria | | means the statutory authority of that name. | 93656 |
| High Capacity Metro Train | HCMT | means the non-dividable 7 car train of approximately 164 metres in length with a driving cab at each end to be designed, manufactured, supplied and maintained under the High Capacity Metro Trains Project. See also 'Extended HCMT'. | 93657 |
| High Capacity Signalling | HCS | means the CBTC based signalling system that delivers increased train capacity controlled from an Automatic Train Supervision system for the Sunshine-Dandenong Line, covering areas of: (a) conventional signalling; (b) CBTC-Only; and (c) mixed operation. | 93658 |
| High Challenge Design Fire Scenario | HFS | has the meaning given in AS 4825. | 93659 |
| High Risk Work | | has the meaning given in the OHS Regulations. | 93660 |
| Hold Points | | means those points beyond which the stated construction activity must not proceed without the Nominated Authority's approval to proceed. | 93661 |
| Human Factors Integration Plan | HFIP | means the plan described in Annexure 3, section 3.9.4 of Part C. | 93662 |
| Human Factors Management Plan | HFMP | means the Management Plan described in Annexure 3, section 3.9 of Part C. | 93663 |
| Hydrogeological Interpretive Report | | means the report described in section 7.11 of Part C. | 150564 |
| IK Rating | IK | means Impact Protection rating, being the degree of protection provided by enclosures for electrical and mechanical equipment against the harmful effects of mechanical impacts. | 93664 |
| Incident Control Room | ICR | means a meeting room for incident management containing equipment to provide situational awareness of the incident being managed, to be located at each Station and at the NCC and its DRS. | 93665 |
| Incident Management System | | means the State's incident management system. | 93666 |
| Independent Environmental Auditor | | means the suitably qualified and independent person described in section 3.5 of Part C. | 93667 |
| Independent Safety Assessor | ISA | means the independent safety assessor engaged by the Train Franchisee. | 93668 |
| Independent Safety Auditor | | means the suitably qualified and independent person described in section 6.2.1 of Part C. | 93669 |
| Industrial Relations | | means the Management Plan described in Annexure 2, | 93670 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|-------|
| Management Plan | | section 2.8 of Part C. | |
| Information Exchange System | IES | means the State's information exchange system. | 93671 |
| Information Management Plan | | means the Management Plan described in Annexure 2, section 2.9 of Part C. | 93672 |
| Information Security System Management Plan | | means the Management Plan described in Annexure 13, section 13.2 of Part C. | 93674 |
| Infrastructure Sustainability Council of Australia | | means the industry body administering the IS Rating Scheme. | 93675 |
| Ingress Protection | IP | means ingress protection rating, indicating the degree of protection against dust, solid objects and moisture into an enclosure. | 93676 |
| Inherent Availability | | means a system's availability provided by the design under expected conditions of operation and ideal conditions of maintenance. Inherent Availability is bounded by the following conditions, in addition to mission success criteria that is context specific: (d) accounts for all Failure sources (intrinsic and externally caused); (e) accounts for the Repair Time (including on-site fault localisation); (f) does not account for other corrective Down Time components such as logistic, and; (g) administrative delays, and remote fault localisation. | 93677 |
| Inspection and Test Plan | ITP | means the plans related to inspections and tests that must be conducted at key points in the construction process. | 93678 |
| Intake Substation | ISS | means the facility described in section 10.2.2 of Part B. | 93679 |
| Integrated Crisis Framework | | means the document entitled 'Integrated Crisis Framework - A Common Appendix for all MM Project Partners' provided by the State, initially DOC/15/340615. | 93680 |
| Integration Readiness Review | IRR | means the Stage Gate Review to be undertaken by Project Co in accordance with section 1.1.6 of Part C. | 93681 |
| Interface Control Documents | ICD | means a document used to define and record interface requirements between two interfacing parties, projects, work packages, systems, or components. | 93682 |
| Interface Definition Sheet | IDS | means a document which sets out the activities, programmatic interfaces, deliverables and milestones associated with interfacing works. | 93683 |
| Interface Hazard Analysis | IHA | means the analysis to be undertaken by Project Co in accordance with Annexure 3, section 3.6.4 (c) of Part C. | 93684 |
| Interface Issues Register | | means the register described in section 2.4.5 of Part C. | 93685 |
| Interface Manager | | means the person(s) described in section 2.4.1 of Part C. | 93686 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|--|--------|
| Interface Programs | | means a Program used to manage Interface Milestones and maintain logic relationships between them. | 93687 |
| Intergovernmental Committee on Surveying and Mapping | ICSM | means the committee established to coordinate cooperative mapping programs related to Government activities, on a national basis. | 93688 |
| Interim Design | | has the meaning given in the Design Review Schedule. | 93689 |
| Interim Design Documentation | | means the Design Documentation described in section 7.5.2 of Part C. | 93690 |
| Interim Open Space Plan | | means the plan to be submitted as part of the Urban Design Management Plan. | 93691 |
| International Fire Engineering Guidelines | IFEG | means the International Fire Engineering Guidelines 2005 published by the Australian Building Codes Board. | 93692 |
| Internet Protocol | IP | means the communication protocol by which data is sent from one computer to another. | 93693 |
| Inter-station | | means wheel start to wheel stop between stations and from point of entry at each tunnel portal to wheel stop at the next station. | 150565 |
| IS Materials Calculator Base Case | | means the IS Materials Calculator V1.2 Base Case - Tunnel and Stations PPP provided by the State, initially MMR-AJM-PWAA-CA-NS-002326. | 93694 |
| IS Rating Scheme | | means version 1.2 of the rating system for evaluating sustainability across design, construction and operation of infrastructure as developed by the ISCA. | 93695 |
| IS Rating Tool | | means the ISCA Infrastructure Sustainability Rating Tool. | 93696 |
| IS Rating Tool Scorecard | | means the self-assessment scorecard provided with the IS Rating Tool. | 93697 |
| ISCA Accredited Professional | | means an individual who has successfully completed the ISCA Infrastructure Sustainability Training for Professionals qualification delivered by Infrastructure Sustainability Council of Australia (ISCA) for the purpose of using the ISCA (IS) Rating Tools. | 93698 |
| ISCA Carbon and Energy Credit | | means the Ene-1 and Ene-2 credits of the IS Rating Tool, focusing on monitoring energy and carbon emissions and the use of renewable energy on a project. | 93699 |
| ISCA Carbon and Energy Base Case | | means the ISCA Carbon and Energy (Ene-1) Credit V1.2 – Tunnel and Stations PPP Base Case’ provided by the State, initially DOC/16/372433. | 93700 |
| ISCA Carbon and Energy ‘Reference Design’ Footprint | | means the ISCA Carbon and Energy (Ene-1) Credit V1.2 – Tunnel and Stations PPP ‘Reference Design’ Footprint provided by the State, initially MMR-AJM-PWAA-RP-NS-002106. | 93701 |
| ISCA Community Health, Wellbeing and Safety Credits | | means the Hea-1, 2 and 3 credits of the IS Rating Tool. | 93703 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|--|-------|
| ISCA Innovation Credit | | means the Inn-1 credit of the IS Rating Tool. | 93704 |
| ISCA IS Rating Tool | | see 'IS Rating Tool'. | 93705 |
| ISCA Materials Lifecycle Impact Credit | | means the Mat-1 credit of the IS Rating Tool. | 93706 |
| ISCA Materials Lifecycle Impact Base Case | | means the 'ISCA Materials Lifecycle Impact (Mat-1) Credit V1.2 – Tunnel and Stations PPP Base Case' provided by the State, initially DOC/16/372434. | 93707 |
| ISCA Materials Lifecycle Impact 'Reference Design' Footprint | | means the 'ISCA Materials Lifecycle Impact (Mat-1) Credit 'Reference Design' Footprint V1.2 – Tunnel and Stations PPP' provided by the State, initially MMR-AJM-PWAA-RP-NS-002242. | 93708 |
| ISCA Stakeholder Participation Credits | | means the Sta-1, 2, 3 and 4 credits of the IS Rating Tool. | 93709 |
| ISCA Water Credits | | means the Wat-1, 2 and 3 credits of the IS Rating Tool. | 93710 |
| Issued for Construction Review | IFCR | means the Stage Gate Review to be undertaken by Project Co in accordance with section 1.1.6 of Part C. | 93711 |
| Knowledge Management Plan | | means the Management Plan described in Annexure 2, section 2.11 of Part C. | 93712 |
| Kiss & Ride | | means short term parking to allow motor vehicle drivers to drop off and pick up Passengers at train stations. | 93713 |
| Lead Verifier | | means the suitably qualified and experienced persons independent of those having direct responsibility for the design identified as 'Lead Verifiers' in the Design Management Plan. | 93714 |
| Level of Protection | | has the meaning given in the Unified Facilities Criteria, Department of Defence Minimum Antiterrorism Standards for Buildings, UFC 4-010-01. | 93715 |
| Level of Service | LoS | means an indicator of pedestrian convenience measured on a scale of A (best) to F (worst). The level of service indicates a pedestrian's freedom to choose their walking speed, the ability to pass slow-moving pedestrians and the relative ease of cross-flow movements. Level of service thresholds are defined in Appendix B2. | 93716 |
| Level 0 Systems Integration | | has the meaning given in the Final Acceptance Schedule. | 93717 |
| Level 1 Systems Integration | | has the meaning given in the Final Acceptance Schedule. | 93718 |
| Level 2 Systems Integration | | has the meaning given in the Final Acceptance Schedule. | 93719 |
| Level 3 Systems Integration | | has the meaning given in the Final Acceptance Schedule. | 93720 |

| TERM | ACRONYM | DEFINITION | DNG |
|-------------------------------|---------|--|-------|
| Level 4 Systems Integration | | has the meaning given in the Final Acceptance Schedule. | 93721 |
| Lifecycle | | has the meaning given in the Systems Engineering Standard. | 93722 |
| Lifecycle Cost | LCC | means the total cost throughout the life of an asset, including planning, design, acquisition, support costs, disposal and any other costs directly attributable to owning or using the asset. | 93723 |
| Lifecycle Stages | | has the meaning given in the Systems Engineering Standard. | 93724 |
| Line Replaceable Unit | LRU | means a modular element or components of a system that can be replaced quickly within the MRT at an operating location (in the field, equipment room, control room, etc.) | 93725 |
| Living Infrastructure Plan | | means the plan by that name prepared and provided by the State. | 93726 |
| Low Voltage | LV | means the electrical voltage system exceeding extra low voltage (50 V AC or 120 V ripple-free DC) but not- exceeding 1000 V AC or 1500 V DC, as described in section 10.1 of Part B. | 93727 |
| Main Suburban line | | means the tracks referenced as “Main Suburban Line” in the South Kensington Signalling Diagram 66/14 or the latest successor drawing, and the continuation of those tracks in the up and down directions. | 93728 |
| Maintainability Strategy | | means the strategy to be prepared as part of the RAM Management Plan and described in Annexure 3, section 3.7.4 of Part C. | 93729 |
| Maintained Rail Survey Plan | | means the plan described in section 8.7 of Part C. | 93730 |
| Major Traffic Control Devices | | means a traffic control device specified in Schedule 1 of the <i>Road Safety (Traffic Management) Regulations 2009</i> . | 93731 |
| Management of Change Process | | means the activities, processes and procedures accredited persons are obligated to comply with as part of their Safety Management System, under the <i>Rail Safety Act 2006 (Vic)</i> or the Rail Safety National Law as given force in Victoria by the Rail Safety National Law Application Act 2013 (Vic), when a change to their Rail Infrastructure and/or its management is proposed. | 93732 |
| Master Agency Media Services | MAMS | means the State Purchase Contract under which all advertising services (media strategy, planning, buying and reporting for campaign and non-campaign services) must be purchased. | 93733 |
| Materials and Waste Sub-Plan | | means the sub-plan described in Annexure 5, section 5.1.7 of Part C. | 93734 |
| Materials Calculator | | refers to the ISCA (IS) Rating Tool evaluative spreadsheet to analyse the environmental impacts of materials used on infrastructure projects and assets. | 93735 |
| Mean Down Time | MDT | means the expectation of the Down Time. | 93736 |
| Mean Repair Time | MRT | means the expectation of the Repair Time | 93737 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|---|-------|
| Mechanical Ventilation and Air Conditioning | MVAC | means the system/s provided throughout all non-public areas to maintain a comfortable and safe environment for staff and support the reliable operation of equipment, as described in section 9.2 of Part B. | 93738 |
| Medical Faculty Building 181 | | means the University of Melbourne building on the south west corner of the main campus, at the corner of Grattan Street and Royal Parade. | 93739 |
| Melbourne Metro Height Datum | MMHD | has the meaning given in section 1.1.2 of Part B. | 93740 |
| Melbourne Metro Reduced Level | MMRL | has the meaning given in section 1.1.2 of Part B. | 93741 |
| Melbourne Underground Rail Loop | MURL | means the existing underground rail tunnels in Melbourne's CBD. | 93742 |
| Melbourne Water | | means one of three government owned retail water businesses responsible for management of waterways and provision of drinking water, sewerage, trade waste and recycled water services to customers in the Port Phillip and Westernport region. | 93743 |
| Melbourne Water Guidelines for Development in Flood Prone Areas | | means the guidelines prepared by Melbourne Water to ensure that urban development is mindful of, and responds to, flood risk. | 93744 |
| Memorandum of Authorisation | | has the meaning given in the <i>Road Safety (Traffic Management) Regulations 2009</i> . | 93745 |
| Metro Tunnel Precinct Reference Group – Parkville | PRG | means the group described in Appendix C2.8 to Part C. | 93746 |
| Metro Tunnel Telephone Information Line | | means the project information phone line to be established by the State and operated by Project Co. | 93750 |
| Metrol | | means the train control facility for the Metropolitan Rail Network, currently located on Level 5, 595 Collins Street, Melbourne VIC 3000 and operated by the Rail Franchisee. | 93751 |
| Metropolitan Rail Network | | means the Melbourne metropolitan train and tram network. | 93752 |
| Minimum Energy Performance Standards | MEPS | means the minimum level of energy performance that electrical products or appliances must meet or exceed before they can be used or sold for commercial purposes. | 93753 |
| Ministerial Guidelines for Critical Infrastructure Resilience | | means the guidelines as describes in section 74W of the Emergency Management Act 2013 (Vic). | 93754 |
| MMRA Adoption of Climate Change Scenarios and | | means the MMRA Adoption of Climate Change Scenarios and Projections Report prepared and delivered by the state, | 93755 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|--|-------|
| Projections Report | | initially MMR-AJM-PWAA-RP-NS-000946 | |
| MMRA CALD Engagement Strategy | | means the strategy prepared and provided by the State. | 93756 |
| MMRA Climate Change Adaptation Plan | | means the MMRA Climate Change Adaptation Plan, initially MMR-AJM-PWAA-RP-NS-001435. | 93757 |
| MMRA Climate Risk Assessment | | means the Climate Risk Assessment prepared and provided by the State, initially MMR-AJM-PWAA-RP-NS-001114. | 93758 |
| MMRA Creative Strategy | | means the strategy prepared and provided by the State. | 93759 |
| MMRA Energy and Carbon Base Case and Reductions Model | | means the 'MMRA Energy and Carbon (Ene-1) Base Case and Reductions Model – Tunnel and Stations PPP' provided by the State. | 93760 |
| MMRA Environmental Policy | | means the State's Environmental Policy prepared for the MMRP, initially DOC/15/467966. | 93761 |
| MMRA Materials Base Case and Reductions Model | | means the 'Materials (Mat-1) Base Case and Reductions Model - Tunnel and Stations PPP' provided by the State. | 93762 |
| MMRA PPP Sustainability Reporting Template | | means the template prepared by the State as a basis for the Sustainability Report. | 93763 |
| MMRA RAM Log Process | | means the MMRA RAM Log Process document prepared and provided by the State, initially DOC/16/222436. | 93764 |
| MMRA Sustainability Management Plan | | means the plan by that name prepared and provided by the State, initially DOC/16/366652. | 93765 |
| MMRA Sustainability Policy | | means the State's policy in relation to sustainability for the MMRP, initially DOC/15/369912. | 93766 |
| MMRA Sustainability Strategy | | means the Sustainability Strategy prepared and provided by the state, initially DOC/16/135424. | 93767 |
| Mobilisation Management Plan | | means the Management Plan described in Annexure 10, section 10.2 of Part C. | 93768 |
| Modal Priorities | | means the transport modal priorities for specific areas provided in Appendix B4 to Part B. | 93769 |
| Modelling Management Sub-Plan | | means the sub-plan of the Design Management Plan described in Annexure 8, section 8.1.2 (p) of Part C. | 93770 |
| Monitoring Management Plan | | means the Management Plan described in Annexure 10, section 10.4 of Part C. | 93771 |
| Monthly D&C Phase Progress | | means the monthly report described in section 1.4 of Part C. | 93772 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|--|-------|
| Report | | | |
| MTP SIT Systems Assurance Management Plan | | means the plan by that name prepared and provided by the State. | 93747 |
| MTP SIT Systems Engineering Management Plan | | means the plan by that name prepared and provided by the State. | 93748 |
| MTP SIT System Integration Management Plan | | means the plan by that name prepared and provided by the State. | 93749 |
| National Construction Code | | means the <i>National Construction Code 2016</i> (Cth). | 93773 |
| National Emergency Risk Assessment Guidelines | | means the guidelines of that name published by the Australian Government Attorney-General's Department. | 93774 |
| National Occupational Health and Safety Commission | NOHSC | means the independent statutory agency by that name responsible for improving occupational health and safety and workers' compensation arrangements across Australia. | 93775 |
| National Terrorism Threat Advisory System | | means the system developed by the Australian Government to inform the public of the likelihood of an act of terrorism occurring in Australia. | 93776 |
| Network Control Centre | NCC | means the facilities from which railway network command and control is provided. Located at METROL main control site and its disaster recovery site for train service management and at ELECTROL main control site and its disaster recovery site for traction power management. | 93777 |
| Network Time Protocol | NTP | means a communications protocol used to synchronise computer clocks. | 93778 |
| New Academic Street | NAS | means the project being undertaken by RMIT to upgrade the lower levels of buildings 8, 10, 12 and 14 along Swanston and Franklin Streets. | 93779 |
| Noise and Vibration Management Plan | | means the Management Plan described in Annexure 4, section 4.4 of Part C. | 93780 |
| Noise Reduction Coefficient | NRC | means the arithmetic average (rounded to the nearest 0.05) of the absorption coefficients of a material at the 250 Hz, 500 Hz, 1 kHz and 2 kHz octave band frequencies. | 93781 |
| Nominated Authority | | means the nominated person with the authorisation to release each Hold Point. | 93782 |
| Non-conformance | | includes any non-conformances with the processes or systems set out in Part C. | 93783 |
| Non-essential Systems | | means all systems except those defined as Operationally Critical Systems or Operationally Essential Systems. | 93784 |
| Normal Operating | | means a state of continuing system operation, including minor disturbances and delays to the service during traffic | 93785 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|--------|
| State | | hours. | |
| O&M Manuals | | means the operating and maintenance processes and procedures required for the system, subsystem or equipment to be operated and maintained efficiently and safely. | 93786 |
| Obsolescence Management Plan | | means the plan prepared in accordance with AS62402 and included In the RAM Management Plan. | 93787 |
| Office of the National Rail Safety Regulator | ONRSR | means the independent regulator established under the Rail Safety National Law. | 93788 |
| Office of Surveyor General Victoria | OSGV | means the primary government authority responsible for surveying and cadastre. | 93789 |
| Official Information | | means any information (including personal information) obtained, generated, received or held by or for a Victorian public sector organisation for an official purpose or supporting official activities. This includes both hard and soft copy information, regardless of media or format. | 150560 |
| ONRSR Major Project Guidelines | | means the guideline 'Major Project Guideline' from the Office of the National Rail Safety Regulator. | 93790 |
| ONRSR SFAIRP Guidance | | means the guideline 'Meaning of Duty to Ensure So Far As Is Reasonably Practicable Guideline' from the Office of the National Rail Safety Regulator. | 93791 |
| Operating & Maintenance Hazard Analysis | OMHA | means the analysis to be undertaken by Project Co in accordance with Annexure 3, section 3.6.4 (e) of Part C. | 93792 |
| Operating States | | means the states of the operating railway being Normal, Degraded or Emergency Operating State. | 93794 |
| Operational Availability | | means the system availability provided by the design under expected conditions of operation and maintenance. Operational Availability is bounded by the following conditions, in addition to mission success criteria that is context specific: (a) accounts for all Failure sources (intrinsic and externally caused); and (b) accounts for all corrective Down Time contributions (including logistic and administrative delays, localisation delay and Repair Time). | 93795 |
| Operational Control System | OCS | means the sub-systems used to control service delivery operations, which typically consist of, but are not limited to: (a) CCTV; (b) PA; (c) PIDS; (d) AFILs; (e) CHP; (f) access control; (g) intruder detection, and; (h) existing Rail Transport Operator OCS systems. | 93796 |
| Operationally | | means the critical systems defined in Part B, section 10.1.2 | 93797 |

| TERM | ACRONYM | DEFINITION | DNG |
|-------------------------------------|---------|--|--------|
| Critical Systems | | (b). | |
| Operationally Essential Systems | | means the essential systems defined in Part B, Section 10.1.2 (c). | 93798 |
| Option B5 | | <p>an alignment configuration at the Western Portal as broadly set out in the Environmental Effects Statement (EES) as Option B and refined so as to;</p> <ul style="list-style-type: none"> – remove the need for a new rail-over bridge at Kensington Road; and – contain an ultimate configuration that removes the surface track connection of the Sunbury Lines towards Melbourne. <p>Further details regarding the alignment arrangement can be found in AJM document 'Western Portal Alignment B5 Supplementary Report To Reference Design' MMR-AJM-WOWP-RP-CC-003001 P2.</p> | 150561 |
| Organisational Enabling Processes | | has the meaning given in the Systems Engineering Standard. | 93799 |
| Over Head Line Equipment | OHLE | means overhead line equipment system comprising the electrical and mechanical components required to transmit electrical power from the traction substation(s) to the trains, and includes the overhead contact line and sectioning switchgear, as described in section 10.2.5 (i) of Part B. | 93800 |
| Paid | | means any publicly accessible area beyond the ticketing gateline in which passengers must have a valid ticket. | 93801 |
| Parkville Precinct | | see 'Precinct'. | 93802 |
| Parkville Station | | means the new underground station to be constructed at Parkville as set out in the PS&TR. | 93803 |
| Parkville Public Realm Design Brief | | means the document provided in Appendix A4. | 93804 |
| Part A | | means Part A (<i>Project Scope</i>) of the PS&TR. | 93805 |
| Part B | | means Part B (<i>Technical Requirements</i>) of the PS&TR. | 93806 |
| Part C | | means Part C (<i>Project Management Requirements</i>) of the PS&TR. | 93807 |
| Part D | | means Part D (<i>Glossary</i>) of the PS&TR. | 93808 |
| PASS Assets | | means the State owned Geographic Information System called "Privatised Arrangement Support Systems" utilised as a database of records of public transport infrastructure in the State of Victoria. | 93809 |
| Passenger Information Displays | PIDs | means visual display units and infrastructure used to display train service and other information. | 93810 |
| Peak Service | | means a service running during the peak period in the prevailing direction. | 93811 |
| Permanent Survey | PSMs | mean the major survey control marks established for MMRP | 93812 |

| TERM | ACRONYM | DEFINITION | DNG |
|----------------------------------|---------|---|-------|
| Marks | | or managed by the Office of Surveyor General Victoria to assist surveyors in establishing survey control. | |
| Permanent Works | | means the Works excluding the Temporary Works. | 93813 |
| Pipelines Act | | means the Pipelines Act 2005 (Vic). | 93814 |
| Planned Road/Lane Closure Advice | | VicRoads Planned Road/Lane Closure Advice form | 93815 |
| Platform Screen Doors | PSD | means the pair of sliding doors that automatically open in synchronisation with the train doors to allow passengers to embark and disembark from the train. | 93816 |
| Platform Screen Door System | PSDS | means all equipment located on the platform forming the Platform Screen and the equipment at the platform, in the Tunnel and within the equipment rooms required to operate the Platform Screen Doors and the associated maintenance equipment. | 93817 |
| Portal | | means the Eastern Portal and/or the Western Portal (as required by the context) being the interface area between the existing line and the Tunnel, including the decline structure and the cut and cover tunnel. | 93818 |
| Potential Zone of Influence | | means the area encompassing the predicted extent of: (a) any excavation induced ground movement of 5mm or greater; and (b) any primary consolidation settlement of 10mm or greater, as determined by Project Co. | 93819 |
| PPP Interface Management Plan | | means the Management Plan described in Annexure 2, section 2.5 of Part C. | 93820 |
| Precinct | | means the area adjacent to each of the each of the Western Portal, Eastern Portal, Arden station, Parkville station, CBD North station, CBD South station and Domain station. | 93821 |
| Predicted Effects | | means the predicted effects of the Works including the Temporary Works over time on existing ground conditions, infrastructure and properties as calculated under section 10.7.4 of Part C. | 93822 |
| Preliminary Design Review | PDR | means the Stage Gate Review to be undertaken by Project Co in accordance with section 1.1.6 of Part C. | 93823 |
| Preliminary Hazard Analysis | PHA | means the analysis to be undertaken by Project Co in accordance with Annexure 3, section 3.6.4 of Part C. | 93824 |
| Preparatory Works | | means any site preparation activities which are scheduled to commence before Certified Design Documentation is available as set out in section 7.9 of Part C. | 93825 |
| Preparatory Works design report | | means the report described in section 7.9.1.1 of Part C. | 93826 |
| Prescribed Industrial Waste | PIW | has the meaning given in the Environmental Protection (Industrial Waste Resource) Regulations 2009. | 93827 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|--|--------|
| Prescribed Industrial Waste Management Sub-Plan | | means the Management Plan described in Annexure 10, section 10.3.2 of Part C. | 93828 |
| Principal Bicycle Network | PBN | means the network of existing and proposed cycle routes identified to help people ride to major destinations around metropolitan Melbourne with a focus on getting people into activity centres and to make more use of local roads and off-road paths. | 93829 |
| Programmable Logic Controllers | PLC | means industrial control systems deployed for automation of specific functions. | 93830 |
| Program Summary Report | | means the report described in section 2.2.2 of Part C. | 93831 |
| Project Information Hub | | means a staffed, public information centre displaying project information and providing a place for stakeholders ask questions and provide feedback | 93832 |
| Project Lifecycle Stages | | see 'Lifecycle Stages'. | 93833 |
| Project Management Plan | | means the Management Plan described in Annexure 2, section 2.2 of Part C. | 93834 |
| Project Management Requirements | | means Part C (<i>Project Management Requirements</i>) of the PS&TR. | 93835 |
| Project Processes | | has the meaning given in the Systems Engineering Standard. | 93836 |
| Project Scope | | means Part A (<i>Project Scope</i>) of the PS&TR. | 93837 |
| Proof Engineer | | has the meaning given in the D&C Subcontract. | 93838 |
| Proof Engineering Certificate of Compliance | | means the certificate provided in the Schedule of Certificates and Notices. | 93839 |
| Protective Marking | | means an administrative label assigned to official information that is directly linked to the business impact level for a potential compromise of its confidentiality. It also informs the minimum protection requirements during use, storage, transmission, transfer and disposal. Protective markings include security classifications, dissemination limiting markers and caveats. | 150566 |
| Protective Security Documentation | | means information that contains procedural, physical, personnel, ICT, and information security measures, designed to protect official assets (information, functions, resources, people) from security threats. | 150567 |
| PTV Drawings Management System | PTV DMS | means the drawings management system operated and maintained by PTV containing drawings of certain Victorian rail infrastructure. | 93840 |
| PTV Infrastructure Drafting Standard | | means PTV Infrastructure Drafting Standards v1.0 and PTV Infrastructure Drafting Standards V1.0 Appendix. | 93841 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|-------|
| PTV Network Development Plan | | means the detailed plan prepared by PTV a of how Melbourne's train system needs to evolve to meet the needs of the city and of train passengers in the short, medium and long term. | 93842 |
| PTV Network Status Boards | | means network status boards which provide a snapshot of how train, tram and bus services are performing across the network, displaying up-to-date service information on the public transport system. | 93843 |
| PTV PASS Assets Data Requirements | | means PTV PASS Assets Data Requirements v1.0 and PTV PASS Assets Data Requirements V1.0 Appendix A. | 93844 |
| PTV Strategic Asset Management Policy and Guidance | | means PTV Strategic Asset Management Policy and Guidance. | 93845 |
| PTV Systems Engineering Policy | | means the PTV Systems Engineering Policy. | 93846 |
| Public Sector Data | | has the meaning given in the Privacy and Data Protection Act 2014. | 93847 |
| Punch List | | means the list all non-conformances that must be rectified prior to completion. | 93848 |
| Quality Management Plan | | means the Management Plan described in Annexure 2, section 2.3 of Part C. | 93849 |
| Quality Management System | | means a system as described in AS/NZS ISO 9001: 2015. | 93850 |
| Quality Manager | | means the person described in section 2.1.1.4 of Part C. | 93851 |
| Quantitative Risk Assessment | QRA | means the assessment to be undertaken by Project Co in accordance with Annexure 3, section 3.6.4 (d) of Part C. | 93852 |
| Queen Victoria Master Plan | | means the plan developed by the City of Melbourne to guide the redevelopment (over 10 years) of the Queen Victoria Market precinct. | 93853 |
| Rail Access Management Plan | | means the Management Plan described in Annexure 10, section 10.6 of Part C. | 93854 |
| Rail Network Emergency Response Vehicles | RNERVs | means the vehicles described in section 8.5.4 (c) of Part B. | |
| Rail O&M Manuals | | means an O&M Manual prepared in relation to any Rail Infrastructure. | 93855 |
| Rail Projects Agreements | | means the Train Franchisee Projects Agreement or the Tram Franchisee Projects Agreement (as relevant). | 93856 |
| Rail Safety Accreditation | | means accreditation under Part 3 of Division 4 of the Rail Safety National Law. | 93857 |
| Rail Safety Accreditation Plan | | means the Management Plan described in Annexure 12 of Part C. | 93858 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|-------|
| Rail Systems Assets | | means the assets to be designed, supplied or installed (as the context requires) by Project Co as set out in section 5 of Part A, including: <ul style="list-style-type: none"> (a) ICT/ OCS equipment; (b) security equipment; (c) communications equipment; (d) signalling equipment; and (e) Platform Screen Doors. | 93859 |
| RAM Log | RAML | means the log to be created and managed by Project Co in accordance with Annexure 3, section 3.7.3 of Part C. | 93860 |
| RAM Management Plan | RAMMP | means the Management Plan described in Annexure 3, section 3.7 of Part C. | 93861 |
| Reference Documents | | means those documents described in section 2 of Part A. | 93863 |
| Repair Time | | means part of active corrective maintenance time taken to complete repair action. Note: Repair time is comprised of fault localization time (192-07-18), fault correction time (192-07-14) and function checkout time (192-07-16), but excludes technical, administrative and logistic delays. | 93864 |
| Regulatory Requirements | | means any requirement or obligation imposed by any applicable Act, Statute or Regulation. | 93865 |
| Reliability, Availability, Maintainability Management Plan | RAMMP | see 'RAM Management Plan'. | 93866 |
| Reliability Centred Maintenance Analysis | RCMA | means the analysis to be undertaken by Project Co in accordance with Annexure 3, section 3.7.4 (d) of Part C. | 93867 |
| Reliability Critical Items List | RCIL | means the prioritised list to be generated by Project Co in accordance with Annexure 3, section 3.7.4 (c) of Part C. | 93869 |
| Requirements Management Plan | | means the Management Plan described in Annexure 3, section 3.3 of Part C. | 93870 |
| Requirements Traceability Matrix | RTM | means the matrix described in Annexure 3, section 3.3.3. | 93871 |
| Residential Impact Mitigation Guidelines | RIMG | means the guidelines prepared by the State to outline measures for offering respite and temporary alternative accommodation to residents affected by a range of different amenity impacts, including airborne noise, ground-borne noise and vibration, and loss of access. | 93872 |
| Responsible Road Authority | | has the meaning given to that term in section 3 of the <i>Road Management Act 2004</i> (Vic). | 93873 |
| Risk Management Plan | | means the Management Plan described in Annexure 2, section 2.4 of Part C. | 93874 |

| TERM | ACRONYM | DEFINITION | DNG |
|---------------------------------------|--------------------------|---|-------|
| Risk Register | | means the register including all hazards and risks associated with the Project Activities as described in section 2.3.2 of Part C. | 93875 |
| Road | | means any road or road reserve which crosses, is adjacent to, or is affected by, the Project Activities. | 93876 |
| Road Functional Layout | | means a two-dimensional concept design capturing the intended functions and operations of the area including kerb lines, road markings and general features and characteristics. | 93877 |
| Road Safety Audit | | means an audit as described in section 9.9 of Part C. | 93878 |
| Road Safety Audit Report | | means a report as described in section 9.9 of Part C. | 93879 |
| Road Safety Auditor | | means the person described in section 9.9 of Part C. | 93880 |
| Royal Parade entrance | | means the entrance to Parkville Station to be located on the northeast corner of the Royal Parade and Grattan Street intersection. | 93881 |
| Safe Work Australia | | means the Australian Government statutory agency established in 2009 under the <i>Safe Work Australia Act 2008</i> . Their primary responsibility is to improve work health and safety and workers' compensation arrangements across Australia. | 93882 |
| Safe Work Method Statements | SWMS | means a document that sets out the high risk construction work activities to be carried out at a workplace, the hazards arising from these activities and the measures to be put in place to control the risks | 93883 |
| Safety in Design | SiD | process defined as the integration of hazard identification and risk assessment methods early in the design process to eliminate or minimise the risks of injury throughout the life of a structure being designed | 93884 |
| Safety in Design Management Sub-Plan | | means the sub-plan of the Design Management Plan described in Annexure 8, section 8.1.2 (p) of Part C. | 93885 |
| Safety in Design Risk Register | SiD Risk Register | means the risk register described in section 7.14.4.6 of Part C. | 93886 |
| Safety in Design Workshop Facilitator | SiD Workshop Facilitator | means the person engaged by Project Co to facilitate the SiD Workshop as described in section 7.14.4.2 of Part C. | 93887 |
| Safety in Design Workshops | SiD Workshop | means the workshop described in section 7.14 of Part C. | 93888 |
| Safety Integrity Level | SIL | as defined in EN 50128 and EN 50129. | 93889 |
| Safety Interface Agreements | | has the meaning given in the Rail Safety National Law. | 93890 |
| Safety Management | SMS | has the meaning given in the Rail Safety National Law. | 93891 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|--------|
| System | | | |
| Safety Strategy and Culture Workshop | | means the workshop described in section 6.1.2 of Part C. | 93892 |
| Supervisory Control and Data Acquisition | SCADA | means a power monitoring and control system. In the context of the Metro Tunnel, this is the power control system located at ELECTROL which monitors and controls HV, Traction, industrial and signalling power. | 93893 |
| Scope Allocation Matrix | SAM | means the matrix described in Appendix A2 to Part A. | 93894 |
| Security Classified | - | means official information that has been security assessed as having a business impact level of 2, (high) or above for potential compromise of its confidentiality. This results in a security classification as a protective marking. Security classifications include PROTECTED, CONFIDENTIAL, SECRET and TOP SECRET. | 150568 |
| [Not disclosed] | - | [Not disclosed] | 150569 |
| [Not disclosed] | - | [Not disclosed] | 93895 |

| [Not disclosed] | - | [Not disclosed] | 93902 |
| [Not disclosed] | | [Not disclosed] | 93903 |
| Security Zones | | has the meaning given in the Australian Government Protective Security Policy Framework. | 93904 |
| Service Affecting Failure | | means a failure which affects revenue train services. | 93905 |
| So Far As Is Reasonably Practicable | SFAIRP | has the meaning given in the guidance (Meaning of Duty to Ensure So Far As Is Reasonably Practicable Guideline) from the Office of the National Rail Safety Regulator. | 93906 |
| Shrine of Remembrance Reserve | | means the 13-hectare memorial park built in Melbourne in 1934. | 93907 |
| Shrine Trustees | | means the trustees are appointed by the Governor in Council to look after the Shrine of Remembrance on behalf of the State of Victoria. | 93908 |
| SiD Management Sub-Plan | | see 'Safety in Design Management Sub-Plan'. | 93909 |
| Signalling | SER | means an equipment room located in each underground | 93910 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|-------|
| Equipment Room | | station housing rail signalling and associated equipment. | |
| Signal Post Telephones | | means the user interface for the telephony system that allows for voice communication from a signal post (signal mast) to a centralised location. | 93911 |
| Site Condition Report | | means the report described in section 11.2.1.2 of Part C. | 93912 |
| Site Construction Management Plan | | means the multiple Site Construction Management Plans that could make up an overarching Construction Management Plan as described in Annexure 10, Section 10.1. | 93913 |
| Site Environment Implementation Plans | SEIPs | means the Management Plan/s described in Annexure 4, section 4.2 of Part C. | 93914 |
| Social Procurement Management Plan | | means the Management Plan/s described in Annexure 2, section 2.7 of Part C. | 93915 |
| Social Procurement Report | | means the report described in section 2.6.2 of Part C. | 93916 |
| Special Event | | means a local or regional event which generates increased vehicle and/or pedestrian traffic or reduces traffic speed or lowers the capacity of the road network around the Construction Site. | 93917 |
| Special Events Sub-Plan | | means the appendix of the Communications and Stakeholder Engagement Management Plan described in Annexure 6, section 6.1.2 (j)(1) of Part C. | 93918 |
| Specific Stakeholder Requirements | | means Appendix C2 to Part C. | 93919 |
| Spoil Management Plan | | means the Management Plan described in Annexure 10, section 10.3 of Part C. | 93920 |
| Spoil Management Strategy | | means the strategy prepared by the State that provides performance based standards for spoil disposal and management as part of the EES. | 93921 |
| St Kilda Road Safety Improvement Project | | means the project to be undertaken by VicRoads to investigate and implement cyclist safety measures on St Kilda Road between Linlithgow Avenue in Southbank and Carlisle Avenue in East St Kilda. | 93922 |
| Stage Gate Review Guide | | means the guide developed by the State to inform the undertaking of Stage Gate Reviews, initially DOC/16/378185. | 93923 |
| Stage Gate Reviews | | means the set of system reviews to be undertaken by Project Co in accordance with section 1.1.6 of Part C as follows: <ul style="list-style-type: none"> (a) System Definition Review (SDR); (b) Preliminary Design Review (PDR); (c) Critical Design Review (CDR); (d) Issued for Construction Review (IFCR); (e) Test Readiness Review (TRR); (f) Integration Readiness Review (IRR); and (g) System Acceptance Review (SAR). | 93924 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|-------------------------------|---|--------|
| Stakeholder Groups | | has the meaning given in the Design Review Schedule. | 93925 |
| Stakeholder Management Database | | means the State's stakeholder management database, 'Darzin Software'. | 93926 |
| State Environmental Protection Policy (Air Quality Management) | SEPP (Air Quality Management) | means the policy that establishes the framework for managing emissions into the air environment in Victoria from all sources of air pollutants gazetted as the State Environment Protection Policy (Air Quality Management) No. S240, Gazette 21/12/2001. | 93927 |
| State Environmental Protection Policy (Ambient Air Quality) | SEPP (Ambient Air Quality) | means the policy setting air quality objectives and goals for the whole State of Victoria gazetted as the State Environment Protection Policy (Ambient Air Quality) No. S19, Gazette 9/2/1999. | 93928 |
| State Library | | means the State Library of Victoria. | 93929 |
| Static Analysis | | means, in respect of station pedestrian capacity, calculations based on average pedestrian flow rates during peak periods to determine preliminary requirements for circulation areas, queuing areas, ticket gates and vertical transport in stations. | 93930 |
| Stations | | means each of the new stations to be constructed Arden, Parkville, CBD North, CBD South and Domain. | 93931 |
| Station Control Room | SCR | means a room for monitoring and managing the operation of the station containing equipment to provide situational awareness of the station and tunnel for people and train movements. | 93932 |
| Station Equipment Room | StER | a room for station equipment, including the BMS, vertical transport, energy and water management. | 93933 |
| Station Planning and Passenger Modelling Report | | means the report described in section 7.5.2.1(m)(24) of Part C. | 118939 |
| Station Precinct | | see 'Precinct'. | 93934 |
| Station Room Schedule | | means Appendix B3 to Part B. | 93935 |
| Station Smoke Management Systems | SSMS | means the system described in section 9.3 of Part B. | 93936 |
| Station Substation | | means each or all (as the context requires) power substations serving the Tunnel, Stations and supporting plant and remote operational facilities such as the EPVB. | 93937 |
| Strategic Management Plan | | means the Management Plan described in Annexure 2, section 2.1 of Part C. | 93938 |
| Sub Fire Indication Panel | SFIP | means a Fire Indicator Panel (FIP) defined in National Construction Code (BCA) serving specific local areas and interlinking signals back to a main/ master FIP. | 93939 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|--|-------|
| Survey Control Network | | means the survey control network established by the State. | 93940 |
| Surveying Act | | means the <i>Surveying Act 2004 (Vic)</i> . | 93941 |
| Surveying (Cadastral Surveys) Regulations | | means the <i>Surveying (Cadastral Surveys) Regulations 2015 (Vic)</i> . | 93942 |
| Surveyor-General | | means the person appointed under the <i>Surveying Act 2004 (Vic)</i> . | 93943 |
| Sustainability Coordinator | | means the person or people described in section 4.6.2 of Part C. | 93944 |
| Sustainable Design Report | | means the report described in section 7.18.1.4 of Part C. | 93945 |
| Sustainability Management Plan | | means the Management Plan described in Annexure 5, section 5.1 of Part C. | 93946 |
| Sustainability Manager | | means the person described in section 4.6.1 of Part C. | 93947 |
| Sustainability Report | | means the report described in section 4.5.2 of Part C. | 93948 |
| Sustainability Targets | | means the list of agreed sustainability performance outcomes, initially DOC/16/347956. | 93949 |
| System | | means a set of interrelated elements considered in a defined context as a whole and separated from their environment. | 93950 |
| System Acceptance Review | SAR | means the Stage Gate Review to be undertaken by Project Co in accordance with section 1.1.6 of Part C. | 93951 |
| System Breakdown Structure | SBS | means the document contained in Appendix A2 that defines the notional hierarchy of System Elements that make up the System. | 93952 |
| System Definition Review | SDR | means the Stage Gate Review to be undertaken by Project Co in accordance with section 1.1.6 of Part C. | 93953 |
| System Elements | | means individual items presented within the System Breakdown Structure. | 93954 |
| System Engineering Policy | | means Public Transport Victoria's 'System Engineering Policy', version A dated 14 August 2014, as updated from time to time. | 93955 |
| System Hazard Analysis | SHA | means the analysis to be undertaken by Project Co in accordance with Annexure 3, section 3.6.4 (b) of Part C. | 93956 |
| System Integration | | means the process of bringing together the component elements and subsystems into one system and ensuring that all elements and subsystems function together as a complete system regardless of physical and scope boundaries. | 93957 |
| System Integration Management Plan | | means the Management Plan described in Annexure 3, section 3.8 of Part C. | 93958 |
| System Lifecycle | | means Agreement Processes, Organisational Enabling | 93959 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|--|-------|
| Processes | | Processes, Project Processes and Technical Processes as described in the Systems Engineering Standard. | |
| System Safety Management Plan | | means the Management Plan described in Annexure 3, section 3.6 of Part C. | 93960 |
| Systems Architecture | | has the meaning given in the Systems Engineering Standard. Note: for context, this typically refers to the actual collection of architecture views as per the Systems Engineering Standard. | 93961 |
| Systems Assurance | | means the justified confidence that the System functions as intended and is free of exploitable vulnerabilities, either intentionally or unintentionally designed or inserted as part of the system at any time during the life cycle. This confidence is achieved by system assurance activities, which include a planned, systematic set of multi-disciplinary activities to achieve the acceptable measures of system assurance and manage the risk of exploitable vulnerabilities. | 93962 |
| Systems Assurance Management Plan | | means the Management Plan described in Annexure 3, section 3.5 of Part C. | 93963 |
| Systems Breakdown Structure | SBS | means the document defining the notional hierarchy of elements that make up the MMRP. | 93964 |
| Systems Engineering and Assurance Management Plans | | means the Management Plans described in Annexure 3 of Part C. | 93965 |
| Systems Engineering Management Plan | | means the Management Plan described in Annexure 3, section 3.1 of Part C. | 93966 |
| Systems Engineering Manager | | means the person described in section 1.1.1.3 of Part C. | 93967 |
| Systems Engineering Standard | | means AS/NZS ISO/IEC 15288: 2015. | 93968 |
| Technical Document Numbering System | | means the document naming convention provided in Appendix C4 to Part C. | 93969 |
| Technical Processes | | has the meaning given in the Systems Engineering Standard. | 93970 |
| Technical Requirements | | means Part B (<i>Technical Requirements</i>) of the PS&TR. | 93971 |
| Temporary Occupation Land | | means land required to be temporarily occupied for the purposes of performing the Works. | 93972 |
| Temporary Works Areas | | means those areas identified as such on the Land Availability Plans. | 93973 |
| Terrorism Act | | means the <i>Terrorism (Community Protection) Act 2003 (Vic)</i> | 93974 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|---|-------|
| Test Readiness Review | TRR | means the Stage Gate Review to be undertaken by Project Co in accordance with section 1.1.6 of Part C. | 93975 |
| Testing and Commissioning | | means the activities to be undertaken under clause 22. | 93976 |
| Testing and Commissioning Management Plan | | means the Management Plan described in Annexure 11, section 11.1 of Part C. | 93977 |
| Traffic | | means, unless the context requires otherwise, all vehicles, pedestrians, cyclists, public transport and construction traffic. | 93978 |
| Traffic Event | | any works conducted on, under or over a road that results in an encroachment onto the road reserve or an impact to traffic (including vehicles, pedestrians, bicycles & public transport vehicles). | 93979 |
| Traffic Guidance Scheme | TGS | means an arrangement of temporary signs and devices to warn traffic and guide it through or past a work area or temporary hazard. | 93980 |
| Traffic Management Plan | TMP | means the Management Plan described in Annexure 9, section 9.2 of Part C. | 93981 |
| Traffic Manager | | means the person described in section 9.8.1 of Part C. | 93982 |
| Train Protection Risk Report | | means the report described in section 7.5.2 of Part C. | 93983 |
| Training Schedule | | means the schedule described in section 11.2.3 of Part C. | 93984 |
| Transition and Acceptance Management Plan | | means the Management Plans described in Annexure 11 of Part C. | 93985 |
| Transport Design Report | | means the report described in section 9.2.3 of Part C. | 93986 |
| Transport Integration Act | | means the <i>Transport Integration Act 2010</i> . | 93987 |
| Transport Management Plan | | means the Management Plan described in Annexure 9, section 9.1 of Part C. | 93988 |
| Transport Modelling Report | | means the report described in section 9.2.4 of Part C. | 93989 |
| Transport Review Report | | means the report described in section 9.10.1 of Part C. | 93990 |
| Travel Demand Management Strategy | TDM | to be prepared by the State and implemented by Project Co in accordance with EPR T6. | 93991 |
| Trial Design | | has the meaning given in the International Fire Engineering Guidelines 2005. | 93992 |
| Tree Protection Policy | | means the City of Melbourne's policy for the protection, retention and removal of public trees. | 93993 |

| TERM | ACRONYM | DEFINITION | DNG |
|--|---------|---|-------|
| Tree Protection Zone | | means the protection zone around a tree, measured as a radial distance in metres from the centre of the trunk and calculated using the method specified in Australian Standard AS4970-2009. | 93994 |
| Tunnel | | means the twin nine-kilometre tunnels from Kensington to South Yarra as part of the new Sunbury to Cranbourne / Pakenham line. | 93995 |
| Tunnel Reference Documents | | means the documents listed in section 6 of Appendix A1. | 93996 |
| Tunnel Ventilation Control System | TVCS | means Tunnel Ventilation Control System described in section 9.5 of Part B. | 93997 |
| Tunnel Ventilation System | TVS | means the system described in section 9.4 of Part B. | 93998 |
| Type Approved | | means that an element of the Rail Infrastructure has been approved by the RTO for use in accordance with its requirements under the Rail Safety National Law as given force in Victoria by the <i>Rail Safety National Law Application Act 2013 (Vic)</i> . | 93999 |
| Underground Utilities Survey Guideline | | means the MMRA Underground Utilities Survey Guideline document prepared and provided by the State, initially DOC-16-256092.1.3.IFI. | 94000 |
| Undrained | | means that the underground structure permanent works is designed as completely watertight, such that there is no discernible ingress of groundwater into the permanent works or any effect on the groundwater table in the long term. | 94001 |
| Universal Transverse Mercator | UTM | means a grid coordinate system based on the Transverse Mercator projection. | 94002 |
| University Square | | means the public square located on the southern side of Grattan Street, in the block bordered by Grattan, Leicester, Pelham and Barry Streets. | 94003 |
| University Square Master Plan | | means the blueprint developed by the City of Melbourne describing the vision and outcomes for the redevelopment of University Square. | 94004 |
| Unpaid | | means a publicly accessible area that does not require a valid ticket to enter. | 94005 |
| Urban Design Management Plan | | means the Management Plan described in Annexure 4, section 4.3 of Part C. | 94006 |
| Urban Design Strategy | | means the document entitled 'MMRP - Technical Appendix M - Urban Design Strategy' prepared and provided by the State, initially DOC/16/199886. | 94007 |
| Urban Ecology and Vegetation Sub-Plan | | means the sub-plan described in Annexure 5, section 5.1.4 of Part C. | 94008 |
| User-Centred | | has the meaning given in ISO 9241-210:2010. | 94009 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|---|-------|
| Variable Message Sign | VMS | means a traffic control device which displays one or more messages providing advance warning to road users with necessary information about construction operations, maintenance, road incidents, traffic congestion and/or road conditions where work activities may cause delays or require road users to behave in specific ways. | 94010 |
| Victorian Comprehensive Cancer Centre | VCCC | means the Victorian Comprehensive Cancer Centre. | 94011 |
| Verification and Validation | V&V | means, in respect of: (a) Verification: the activity of providing objective evidence that requirements truly are fulfilled. (b) Validation (of requirements): the activity of providing objective evidence that the requirements are correct, complete and consistent. (c) Validation (of product/system): the activity of providing objective evidence that the product is suitable for its intended use. Product validation is achieved by showing that all the requirements have been validated and verified. | 94012 |
| Verification and Validation Cross Reference Matrix | VCRM | means the document described in Annexure 3 section 3.4.3 of Part C. | 94013 |
| Verification and Validation Management Plan | V&VMP | means the Management Plan described in Annexure 3, section 3.4 of Part C. | 94014 |
| Vice Chancellor's Residence | | means the building adjacent to Gate 10 at the University of Melbourne. | 94015 |
| VicRoads Consultant Pre-qualification Scheme | | means prequalification scheme administered by VicRoads. | 94016 |
| Victorian Government Passenger Rail Infrastructure Noise Policy | | means the 2013 Victorian Government Passenger Rail Infrastructure Noise Policy, which provides a process that balances the benefits of new passenger rail infrastructure projects with the possible impacts on those living nearby. | 94017 |
| Victorian Government Master Agency Media Services | | means the State Purchase Contract under which all advertising services (media strategy, planning, buying and reporting for campaign and non-campaign services) must be purchased. | 94018 |
| Victorian Industry Participation Policy | VIPP | means the Victorian Industry Participation Policy made pursuant to section 4 of the <i>Victorian Industry Participation Policy Act 2003 (Vic)</i> . | 94019 |
| Victorian Protective Data Security Standards | | means the protective data security standards as defined in the <i>Privacy and Data Protection Act 2014 (Vic)</i> . | 94020 |
| Victorian Service Installation Rules | | means the service and installation rules for the connection of electrical installations developed by the Victorian Electricity Distributors Service and Installation Rules Management | 94021 |

| TERM | ACRONYM | DEFINITION | DNG |
|---|---------|---|--------|
| | | Committee. | |
| Vital Critical Infrastructure | | has the meaning as defined in the <i>Emergency Management Act 2013 (Vic)</i> | 94022 |
| Water Sensitive Urban Design | WSUD | means the land planning and engineering design approach which integrates the urban water cycle, including stormwater, groundwater and wastewater management and water supply, into urban design. | 94023 |
| Water Sub-Plan | | means the sub-plan described in Annexure 5, section 5.1.8 of Part C. | 94024 |
| Western Portal | | means the interface area between the existing Sunshine line to the Tunnel at Kensington, including the decline structure and the cut and cover tunnel. | 94025 |
| Western Shard | | means the building at the most north westerly corner of Federation Square that currently houses the visitor centre. | 94026 |
| West Melbourne Terminal Station | WMTS | means the electrical terminal station to be located in the vicinity of the proposed Arden station. | 94027 |
| Wheel/ Rail Interface Management Sub-Plan | | means the sub-plan of the Design Management Plan described in Annexure 8, section 8.1.2 (p) of Part C. | 150570 |
| Work Breakdown Structure | WBS | means the subdivision of a project into discrete work elements that can be used for project planning and delivery. | 94028 |
| Work Lot | | means any part of the work constructed or manufactured under essentially uniform conditions in a continuous operation and which is essentially homogeneous with respect to material properties, general appearance and construction or manufacturing process. | 94029 |
| Workforce Development and Training Management Plan | | means the Management Plan described in Annexure 2, section 2.6 of Part C. | 94030 |
| Workforce and Training Manager | | means the person described in section 2.5.3 of Part C. | 94031 |
| Workforce Development and Training Report | | means the report described in section 2.5.2.2 of Part C. | 94032 |
| WorkSafe | | means the statutory body established under the <i>Occupational Health and Safety Act 2004 (Vic)</i> . | 94033 |
| Worksite Safety - Traffic Management Code of Practice | | means the code of practice produced by VicRoads providing practical guidance for any person conducting, or proposing to conduct any works on roads in Victoria. | 94034 |
| Worksite Traffic Management Plan | WTMP | means the Management Plan described in Annexure 9, section 9.3 of Part C. | 94035 |
| WSUD Opportunities | | means the 'WSUD Opportunities Assessment for input into | 94036 |

| TERM | ACRONYM | DEFINITION | DNG |
|------------|---------|---------------------------|-----|
| Assessment | | the MMRA Water Strategy'. | |

Table D2 - Acronyms

| ACRONYM | Definition | DNG |
|----------|--|-------|
| ACMI | means the Australian Centre for the Moving Image. | 94037 |
| AFC | means automatic fare collection | 94038 |
| AFFL | means above finished floor level. | 94039 |
| AFIL | means audio-frequency induction loop. | 94040 |
| AHU | means air handling unit. | 94041 |
| AIS | means air insulated switchgear. | 94042 |
| APL-BPFT | means after passage of last, before passage of first train. | 94043 |
| ASHRAE | means the American Society of Heating, Refrigerating and Air-Conditioning Engineers. | 94044 |
| ATM | means automated teller machine. | 94045 |
| BIM | means building information modelling | 94046 |
| BMS | means Building Management System. | 94047 |
| CAD | means computer aided design. | 94048 |
| CALD | means culturally and linguistically diverse. | 94049 |
| CBD | means the Melbourne central business district. | 94050 |
| CBTC | means communications based train control. | 94051 |
| CCB | means change control board. | 94052 |
| CCTV | means closed circuit television. | 94053 |
| CEMP | means Construction Environmental Management Plan. | 94054 |
| CER | means communications equipment room. | 94055 |
| CFD | means computational fluid dynamics | 94056 |
| CIP | means central island platform. | 94057 |
| COTS | means commercial-off-the-shelf. | 94058 |
| CPTED | means Crime Prevention Through Environmental Design. | 94059 |
| CM | means Configuration Management. | 94060 |
| CUB | means Carlton and United Breweries. | 93491 |
| DB | means dry bulb. | 94061 |
| DDA | means the <i>Disability Discrimination Act 1992</i> (Cth). | 94062 |
| DISPLAN | means the State Emergency Medical Plan, including the necessary procedures for alerting and mobilising medical and health personnel and establishing on site medical control to ensure an integrated and effective response in times of emergency. | 94063 |

| ACRONYM | Definition | DNG |
|---------|--|--------|
| DTRS | means digital train radio systems. | 94064 |
| DOORS | means Dynamic Object-Oriented Requirements System. | 94065 |
| DSAPT | means the <i>Disability Standards for Accessible Public Transport 2002</i> (Cth) under section 31(1) of the <i>Disability Discrimination Act 1992</i> (Cth). | 94066 |
| DTS | means Deemed-to-Satisfy in relation to the National Construction Code. | 94067 |
| E&WMS | means Energy and Water Management System. | 94068 |
| ECS | means Environmental Control System. | 94069 |
| ECW | means enhanced compression wavelet (file format). | 94070 |
| EMC | means electromagnetic compatibility. | 94071 |
| EMI | means electromagnetic interference. | 94072 |
| EMF | means Environmental Management Framework. | 94073 |
| EMP | means Environmental Management Plans. | 94074 |
| EMS | means Environmental Management System. | 94075 |
| EPR | means Environmental Performance Requirement. | 94076 |
| EPVB | means the Eastern Portal ventilation building. | 94077 |
| ETA | means event tree analysis. | 94078 |
| EWIS | means emergency warning and intercommunication system. | 94079 |
| FCA | means functional configuration audit. | 94080 |
| FEB | means Fire Engineering Brief. | 94081 |
| FER | means Fire Engineering Report. | 94082 |
| FMECA | means failure mode, effects and criticality analysis. | 94083 |
| FRACAS | means Failure Reporting, Analysis and Corrective Action System. | 94084 |
| FCR | means Fire Control Room. | 150587 |
| FSS | means Flinders Street Station. | 94085 |
| FTA | means fault tree analysis. | 94086 |
| GAC | means gate attendant control. | 94087 |
| GBCA | means the Green Building Council of Australia. | 94088 |
| GHG | means greenhouse gas. | 94089 |
| GIR | means Geotechnical Interpretive Report. | 94090 |
| GIS | means Geographic Information System. | 94091 |
| GPOs | means general purpose outlet. | 94092 |
| GPS | means global positioning system. | 94093 |

| ACRONYM | Definition | DNG |
|---------|--|-------|
| GRP | means glass reinforced plastic. | 94094 |
| GSN | means Goal Structured Notation. | 94095 |
| HAZOP | means hazard and operability. | 94096 |
| HCMT | means High Capacity Metro Train. | 94097 |
| HF | means human factors. | 94098 |
| HFI | means human factors integration. | 94099 |
| HFIL | means human factors issues log. | 94100 |
| HHA | means Health Hazard Analysis. | 94101 |
| HRR | means heat release rate. | 94102 |
| HV | means high voltage. | 94103 |
| HVAC | means the heating, ventilation and air conditioning system. | 94104 |
| IAC | means internal arc classification. | 94105 |
| ICN | means the Industry Capability Network. | 94106 |
| ICNIRP | means the International Commission on Non-Ionizing Radiation Protection. | 94107 |
| ICT | means information and communications technology. | 94108 |
| IES | means Information Exchange System. | 94109 |
| IFC | means 'Issued for Construction'. | 94110 |
| IFEG | means the International Fire Engineering Guidelines 2005 | 94111 |
| IHA | means Interface Hazard Analysis. | 94112 |
| ISA | means Independent Safety Assessor. | 94113 |
| ISCA | means the Infrastructure Sustainability Council of Australia. | 94114 |
| ISS | means intake substation. | 94115 |
| JCC | means Joint Coordination Committee. | 94116 |
| ITP | means Inspection and Test Plan. | 94117 |
| LAN | means local area network. | 94118 |
| LCC | means lifecycle cost. | 94119 |
| LSC | means loss of service continuity. | 94120 |
| LED | means light emitting diode. | 94121 |
| LEOS | means Local Emergency Operating System. | 94122 |
| LIDP | means Local Industry Development Plan. | 94123 |

| ACRONYM | Definition | DNG |
|---------|---|--------|
| LSZH | means low smoke zero halogen. | 94124 |
| MASD | means multipoint aspirating smoke detection. | 150588 |
| MATC | means the Melbourne Anglican Trust Corporation. | 150589 |
| MCC | means motor control centre. | 94125 |
| MCS | means Melbourne Central Station. | 94126 |
| MDB | means main distribution board. | 94127 |
| MDE | means the line prefix to be adopted for the eastern track between South Kensington and South Yarra. | 94128 |
| MDW | means the line prefix to be adopted for the western track between South Kensington and South Yarra. | 94129 |
| MEL | means the MEL Sewer which is City West Water's | 94130 |
| MEP | means mechanical, electrical and plumbing | 94131 |
| MFB | means the Metropolitan Fire Brigade. | 94132 |
| MFIP | means master fire indication panel. | 94133 |
| MMRP | means the Melbourne Metro Rail Project. | 94134 |
| MRL | means machine roomless lifts | 94135 |
| MSB | means main switchboard. | 94136 |
| MURL | means Melbourne Underground Rail Loop. | 94137 |
| NFPA | means the National Fire Protection Association. | 94138 |
| NRC | means noise reduction coefficient. | 94139 |
| O&M | means operations and maintenance. | 94140 |
| OCS | means the Operational Control System comprising PIDS, PA, AFIL, CHP, SEPAC and CCTV. | 94141 |
| OHLE | means overhead line equipment. | 94142 |
| OHS | means occupational health and safety. | 94143 |
| OHW | means overhead wire. | 94144 |
| OMHA | means Operating and Maintenance Hazard Analysis. | 94145 |
| ONRSR | means Office of the National Rail Safety Regulator. | 94146 |
| OSD | means oversight development. | 94147 |
| OSSR | OHLE sectioning switch rooms. | 94148 |
| OTE | means over track exhaust. | 94149 |
| OTSSR | OHLE traction sectioning switch rooms | 94150 |
| PA | means public address. | 94151 |

| ACRONYM | Definition | DNG |
|----------|--|--------|
| PCA | means physical configuration audit. | 94152 |
| PHA | means Preliminary Hazard Analysis. | 94153 |
| PIDS | means passenger information display systems. | 94154 |
| PMP | means Project Management Plan. | 94155 |
| PMR | means Part C (Project Management Requirements) of the PS&TR. | 94156 |
| PoE | means power over Ethernet. | 94157 |
| PRM | means persons of restricted mobility. | 94158 |
| PSO | means a Protective Services Officer. | 94159 |
| PTV/MTM | means Public Transport Victoria/Metro Trains Melbourne. | 94160 |
| PTV TTY | means the Public Transport Victoria teletypewriter facility. | 94161 |
| QRA | means Quantitative Risk Assessment. | 94162 |
| RABT-ZTV | means tunnel fire curves as described by RABT - Guidelines for equipment and operation of road tunnels and ZTV - Additional Technical Conditions for the Construction of Road Tunnels. | 94163 |
| RAM | means Reliability, Accessibility and Maintainability. | 94164 |
| RAMMP | means Reliability, Accessibility and Maintainability (RAM) Management Plan. | 94165 |
| RAMS | means Reliability, Availability, Maintainability and Safety as described in EN50126:1999. | 94166 |
| RCM | means reliability centred maintenance. | 94167 |
| RCMA | means Reliability Centred Maintenance Analysis. | 94168 |
| RF | means radio frequency. | 94169 |
| RH | means Relative Humidity. | 94170 |
| RIA | means Rail Infrastructure Alliance | 94171 |
| RMH | means the Royal Melbourne Hospital. | 94172 |
| RMIT | means RMIT University. | 94173 |
| RNERV | means Rail Network Emergency Response Vehicle. | 150591 |
| RSNL | means Rail Safety National Law. | 94174 |
| RTM | means Requirements Traceability Matrix. | 94175 |
| RTO | means Rail Transport Operator. | 94176 |
| RWH | means the Royal Women's Hospital. | 94177 |
| SAMP | means Systems Assurance Management Plan. | 94178 |
| SBS | means System Breakdown Structure. | 94179 |
| SCADA | means supervisory control and data acquisition. | 94180 |

| ACRONYM | Definition | DNG |
|---------|--|--------|
| SCR | means station control room. | 94181 |
| SEIP | means Site Environmental Implementation Plan. | 94182 |
| SEMP | means Systems Engineering Management Plan. | 94183 |
| SEM | means structural electrical and mechanical or stand-alone enquiry machine. | 94184 |
| SEPAC | means an operational system used to broadcast voice messages from METROL to selected stations. | 94185 |
| SFAIRP | means So Far As Is Reasonably Practicable. | 94186 |
| SFIP | means sub fire indication panel. | 94187 |
| SHA | means System Hazard Analysis. | 94188 |
| SHERPA | means System Human Error Reduction and Prediction Approach. | 94189 |
| SiD | means Safety in Design. | 94190 |
| SIL | means safety integrity level. | 94191 |
| SIT | means the JCC Systems Integration Team. | 94192 |
| SLPM | means systems lifecycle process model. | 94193 |
| SRMC | means Security Risk Management Committee. | 94194 |
| SSMP | means System Safety Management Plan. | 94195 |
| STI | means speech transmission index. | 94196 |
| SWIFT | means structured what-if technique. | 94197 |
| T&C | means testing and commissioning. | 94198 |
| TBM | means Tunnel Boring Machine. | 94199 |
| TDM | means Travel Demand Management. | 94200 |
| TGS | means Traffic Guidance Scheme. | 94201 |
| TMP | means Traffic Management Plan. | 94202 |
| TORFM | means top of rail friction modifiers. | 150590 |
| TOT | means a ticket office terminal. | 94203 |
| TPSS | means traction power substation switch room. | 94204 |
| TSS | means traction substation system. | 94205 |

| ACRONYM | Definition | DNG |
|---------|---|-------|
| TVF | means tunnel ventilation fan. | 94206 |
| UoM | means the University of Melbourne. | 94207 |
| UPS | means an uninterruptable power supply. | 94208 |
| V&V | means verification and validation. | 94209 |
| V&VMP | means the Verification and Validation Management Plan. | 94210 |
| VCCC | means the Victorian Comprehensive Cancer Centre. | 94211 |
| VCRM | means the Verification and Validation Cross Reference Matrix. | 94212 |
| VEDN | means the Victorian Electrical Distribution Network. | 94213 |
| VIPP | means the Victorian Industry Participation Policy. | 94214 |
| VMS | means variable message sign. | 94215 |
| WAN | means wide area network | 94216 |
| WB | means wet bulb. | 94217 |
| WBS | means work breakdown structure. | 94218 |
| WTMP | means Worksite Traffic Management Plan. | 94219 |

1 Introduction

1.1 Project Agreement Definitions

Defined terms in Clause 1.2 (Definitions) of the Project Agreement apply in this Services Specification unless the context requires otherwise or the relevant term is defined in this this Services Specification.

1.2 Definitions

In this Services Specification, the following words and phrases have the following meanings unless the context requires otherwise:

| Term | Meaning |
|--------------------------------|---|
| Abatement Free Period | means the "Abatement Free Period" described in Table 4 in section 2.2.3 (Response Times and Abatement Free Periods). |
| Above Ground Tunnel Structures | means those elements of the Licenced Maintenance Areas that are visible above ground level. |
| ACB | means "air circuit breaker". |
| Accessible Areas | means areas within Licensed Maintenance Areas that can be accessed for the removal of Graffiti without the need for specialist equipment or access. |
| Air Quality Management Plan | means the plan prepared, submitted and updated by Project Co in accordance with AM26. |
| Annual Works Plan | means the plan prepared, submitted and updated by Project Co as part of the Asset Management Plan, in accordance with AM01 and Appendix F.1.10. |
| Asset | means a discrete physical component of the Maintained Assets. |
| Asset Management Manual | means the manual prepared, submitted and updated by Project Co as an element of the Maintenance Management Plans in accordance with CM04 and Appendix F1.2. |
| Asset Management Plan | means the Plan required to be prepared in accordance with AM01 and Appendix F1.10. |
| Asset Management Services | means the services to be provided as described in section 4 of this Services Specification. |
| Asset Register | means the register prepared, submitted and updated by Project Co in accordance with AM18. |
| Asset Standards | means the standards contained in Appendix I. |
| Associate | means the meaning given to that term in the Project |

| Term | Meaning |
|----------------------------------|--|
| | Agreement. |
| Authority | has the meaning given to that term in the Project Agreement. |
| Best Maintenance Practices | has the meaning given to that term in the Project Agreement. |
| Bid Method Statements | means the method statements submitted by Project Co as part of their proposal. |
| BMS | means “Building Management System”. |
| Back of House (BOH) | means the operational areas of the stations that are not accessible to the public. |
| BOH (High) Areas | <p>means areas within the Stations that are critical to Train Operations (except plant rooms) including:</p> <ul style="list-style-type: none"> i) the station control room; ii) the incident control room; iii) customer service centre; iv) fire control centre; v) and the like. <p>For avoidance of doubt BOH (High) Areas exclude staff amenities, store rooms, and plant rooms.</p> |
| BOH / Plant Room (Low) Areas | <p>means areas within the Stations that are not:</p> <ul style="list-style-type: none"> i) Passenger Areas; ii) BOH (High) Areas; or iii) Plant Room (Critical) Areas. |
| Building Code of Australia (BCA) | means the uniform set of technical provisions for the design and construction of buildings and other structures which form Volumes One and Two of the National Construction Code. |
| Business Day | has the meaning given to that term in the Project Agreement. |
| CAD | means “computer aided design”. |
| CAD Management Plan | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in accordance with CM04 and Appendix F1.7. |
| Cleaning Access Times | means those times set out in Appendix K. |
| Cleaning Services | means the services to be provided as described in section 6 of this Services Specification. |

| Term | Meaning |
|---|--|
| Cleaning Areas | means those areas set out in Appendix K. |
| Cleaning Services Standards | means those standards set out in Appendix L. |
| CMMS | means “computerised maintenance management system”. |
| Combined Services Route | means the common cable containment system that houses communications, signalling and power cabling. |
| Completion Requirements | means the requirements set out in the “Completion Schedule” as that term is defined in the Project Agreement. |
| Confidential Waste | means waste which is ‘Confidential Information’ as defined in the FCA. |
| Contract Management and Administration Services | means the services to be provided as described in section 2 of this Services Specification. |
| Contract Year | has the meaning given to that term in the Project Agreement. |
| Defects | has the meaning given to that term in the Project Agreement. |
| Degraded Operations | <p>means the disruption of Train Operations or material disruption of passengers as a direct result of a Fault, including by:</p> <ul style="list-style-type: none"> i) the Franchisee having been reasonably required (in accordance with the FCA) to make operational changes, including: <ul style="list-style-type: none"> a. slowing down or delaying trains, or otherwise amending the train timetable; b. preventing one or more trains embarking or disembarking passengers as intended by the FFP Warranty; c. restricting the number of passengers able to enter into the Station; or ii) passenger flow through the station having been materially disrupted. |
| Designated Special Event | means a special event designated by PTV under clause 6.5 of the Franchise Agreement as a Designated Special Event. |
| Digital Engineering Management Plan | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in accordance with CM04 and Appendix F.1.7. |
| Dispute | has the meaning given to that term in the Project Agreement. |
| Domestic Waste | means waste that is generated from normal domestic household, office or administrative based duties, which |

| Term | Meaning |
|---|--|
| | includes but is not limited to, kitchen waste, newspapers, office waste, cardboard and other packaging, paper towels, toner cartridges and other office consumables, glass, plastic containers, aerosols, cigarette butts, plastic bags and other wrappings, and garden waste. |
| Electronic Operational Document Library | means the library described in CM24. |
| Emergency | means a potential or actual incident that: <ul style="list-style-type: none"> • poses significant harm to people, property, the environment or the local community; and • requires assistance from external emergency services agencies. |
| Emergency Response and Incident Management Sub-Plan | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in accordance with CM04 and Appendix F.1.4. |
| Environmental Management Framework | means the Environmental Management Framework set out in the Environmental Effects Statement as endorsed by the Minister for Planning. |
| Environmental Performance Requirements | has the meaning given to that term in the Project Agreement. |
| Environmental Management System (EMS) | means the system to be maintained in accordance with CM28. |
| Equipment | has the meaning given to that term in the Project Agreement. |
| Event | means a Failure Event or other incident reported to the Help Desk, Project Co or any of Project Co's Associates. |
| Extended Rectification | means an extension to the Abatement Free Period and any associated Temporary Fix agreed in accordance with section 2.2.4 (Extended Rectifications). |
| Extended Abatement Free Period | has the meaning given to that term in section 2.2.4 (Extended Rectifications). |
| Failure Event (FE) | means any failure by Project Co to provide a Service accordance with this Services Specification which is designated 'FE' in the Minimum Services Specifications. |
| Failure Event Level | means, in relation to a Failure Event, the level applicable to that Failure Event as defined according to Table 3 at 2.1.7 (Failure Events: Failure Event Levels). |
| Fault | means any element of the Maintained Assets failing to meet the standards required by AM03a) as identified by a suitably |

| Term | Meaning |
|--|--|
| | trained maintenance technician(s) following investigation of a reported fault. |
| FCA | means Train Franchisee Cooperation Agreement including the Interface Management Plans. |
| FFP Warranty | has the meaning given to that term in the Project Agreement. |
| Final Acceptance | has the meaning given to that term in the Project Agreement. |
| Financial Close | has the meaning given to that term in the Project Agreement. |
| Fire Engineering Report | has the meaning given in the International Fire Engineering Guidelines 2005. |
| Fit For Purpose | has the meaning given to that term in the Project Agreement. |
| Forecast Maintenance and Refurbishment Program | means the plan prepared, submitted and updated by Project Co as part of the Asset Management Plan, in accordance with Appendix F1.10. |
| Franchisee | has the meaning given to the term “Train Franchisee Interface Party” in the Project Agreement. |
| Functional Unit Category | means the category applied to each room or area within the Stations and Tunnels, comprising: <ul style="list-style-type: none"> i) Passenger Areas; ii) BOH (High) Areas; iii) Plant Room (Critical) Areas; iv) BOH/Plant Room (Low) Areas; or v) Tunnel Areas. |
| GIS | means “geographic information system”. |
| GIS Management Plan | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in accordance with CM04 and Appendix F.1.7. |
| Graffiti | any visible marking, scratching, writing or drawing that has been made deliberately as an act of vandalism. This includes surface paint and any shadowing, ghosting or impression affecting the any surface. |
| Graffiti and Vandalism Management Plan | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in accordance with CM04 and Appendix F.1.10. |
| Handover Package | has the meaning given to that term in the Project Agreement, as further described in CM25. |

| Term | Meaning |
|---|--|
| Hazardous Materials Management Sub-Plan | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in accordance with CM04 and Appendix F.1.4.1. |
| Health and Safety Management Plan | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in accordance with CM04 and Appendix F.1.4 |
| Help Desk | means the facility established and maintained by Project Co in accordance with section 3 of this Services Specification to deliver the Help Desk Services. |
| Help Desk Services | means the services to be provided as described in section 3 of this Services Specification. |
| HV | means “high voltage”. |
| HVAC | means “heating, ventilation and air conditioning”. |
| ICT | means “information communication technology”. |
| Inaccessible Areas | areas that cannot be accessed without a Track Occupation or specialised equipment. |
| Information Management Plan | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in accordance with CM04 and Appendix F.1.6. |
| Interface Management Plans | has the meaning given to that term in the FCA. |
| Intervening Event | has the meaning given to that term in the Project Agreement. |
| Laws | has the meaning given to that term in the Project Agreement. |
| Licensed Maintenance Areas | has the meaning given to that term in the Project Agreement. |
| Maintained Assets | has the meaning given to that term in the Project Agreement. |
| Maintained Asset Software and Firmware | means software and firmware embedded within Maintained Assets, or otherwise required to operate Maintained Assets. |
| Maintenance Management Plan | means each of the plans listed in Appendix E and prepared, submitted and updated by Project Co in accordance with CM04. |
| Maintenance Phase | has the meaning given to that term in the Project Agreement. |
| Maintenance Phase Documentation | has the meaning given to that term in the Project Agreement and Appendix F. |
| Maintenance Phase | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in |

| Term | Meaning |
|--|---|
| Sustainability Plan | accordance with CM04 and Appendix F.1.9. |
| Maintenance Subcontractor | has the meaning given to that term in the Project Agreement. |
| Method Statements | means the documents of that name maintained in accordance with CM05. |
| Minimum Failure Event Level | means in relation to an event, the greater of: i) the Failure Event Level specified for that event in Appendix A (Minimum Failure Event Levels); and ii) the Failure Event Level specified for that event as set out in the 'Level / Points' column of the relevant Minimum Services Specification. |
| Minimum Services Specification | means in relation to a Service, the State's minimum specific requirements in relation to the relevant Service as set out in the 'Minimum Services Specification' section of section 2 (Contract Management and Administration Services) and each Specific Services Specification. |
| Monitoring Methods | means the methods referred to and set out in section 2.2.6. |
| Monthly Health and Safety Performance Report | means the report of that name prepared in accordance with CM33. |
| Monthly Maintenance Schedule | means the schedule required to be prepared in accordance with AM05. |
| Monthly O&M Meetings | has the meaning given to that term in the FCA and CM07. |
| Monthly Performance Report | means the report of that name provided in accordance with CM19 and Appendix D (Periodic Reporting Requirements). |
| MSDS | means "material safety data sheet". |
| Non-Operational Period | means times outside of Peak Periods and Off-Peak Periods. |
| Non Peak Period | means the periods that are not Peak Periods. |
| O&M Manual | means the manuals prepared, submitted and updated by Project Co in accordance with AM17. |
| Occupant | means any person who is entitled to enter into any part of the Licensed Maintenance Area, including but not limited to: iii) Users; iv) the Franchisee's Associates; v) the Project Co's Associates; and vi) the State's Associates. |

| Term | Meaning |
|--|--|
| Offensive Graffiti | means explicit language, pictures, drawings or content that discriminates by race, gender, religion or sexual orientation. |
| Off-Peak Period | means the periods between first train and last train that are not Peak Periods. |
| OHS | means “occupational health and safety”. |
| Operating Hours | means all Peak Periods or Off-Peak Periods. |
| Operating Month | means any calendar month during the Maintenance Phase. |
| Operations and Maintenance Protocol | has the meaning given to that term in the FCA. |
| Operations Environmental Management Plan | means the plan prepared, submitted and updated by Project Co as part of the Maintenance Management Plan, in accordance with CM04 and Appendix F.1.8. |
| Overnight Clean | means cleaning to be carried out during Non-Operational Periods and includes the daily removal of gum to all surfaces. |
| Passenger Areas | means all areas that are normally accessible to Users. |
| Payment Schedule | means schedule 3 of the Project Agreement. |
| Peak Period | means: i) Monday to Friday (excluding gazetted public holidays); a. First train until 0930 hours; and b. 1600 hours and 1900 hours, and ii) the period of a Designated Special Event, or as otherwise amended by the State from time to time. |
| Performance Assessment Period | means in relation to each Service, the period set out in the 'Performance Assessment Period' column of the relevant Minimum Services Specification (each as defined according to the key in Table 1 at 2.1.1). |
| Performance Data | means the Monthly Performance Report, the Quarterly Performance Report and the source information, documentation and data required for, created, produced or prepared in accordance with the Performance Monitoring Plan. |
| Performance Monitoring Audits | means audits undertaken in accordance with CM42. |
| Performance Monitoring Plan (PMP) | means the plan prepared, submitted and updated by Project Co as an element of the Maintenance Management Plans in accordance with CM04 and Appendix F1.1. |

| Term | Meaning |
|----------------------------------|--|
| Periodic Reports | means those reports to be delivered in accordance with CM19. |
| Personal Cleaning Consumables | means toilet paper, paper hand towel (if used), soap (blocks and liquid), plastic bin liners and antiseptic hand wash. |
| Pest Control Plan | means the plan prepared, submitted and updated by Project Co in accordance with PC01, CM04 and Appendix F1.11. |
| Pest Control Services | means the services to be provided as described in section 5 of this Services Specification. |
| Pests | <p>include:</p> <ul style="list-style-type: none"> i) spiders; ii) insects (including cockroaches, flying insects and ants); iii) rodents (including rats and mice); iv) reptiles (including snakes and lizards); v) birds; and vi) other animals. |
| Planned Periodic Cleaning | means those planned cleaning activities undertaken by Project Co in accordance with CL04 and Appendix J. |
| Planned Preventative Maintenance | means the planned preventive maintenance or programmed maintenance required to be carried out by Project Co in accordance with this Services Specification. |
| Plant Room (Critical) Areas | <p>means plant rooms within the Stations and Tunnels that contain equipment that is critical to Train Operations including:</p> <ul style="list-style-type: none"> i) signalling and PSD equipment rooms; ii) communications equipment rooms; iii) telephone equipment room; iv) uninterruptible power supply/central battery rooms; v) station, ticketing equipment rooms and server rooms; and vi) rooms containing power infrastructure and Tunnel ventilation equipment. |
| Platform SFE | means a Service Failure of that name described in Appendix B. |
| PPM | means “planned preventative maintenance”. |

| Term | Meaning |
|---|--|
| PPM Program | means the program prepared, submitted and updated by Project Co as part of the Asset Management Plan, in accordance with AM01. |
| PPM Service | means the planned preventative maintenance service to be provided by Project Co in accordance with the Services Specification. |
| Project Assets | has the meaning given to that term in the Project Agreement. |
| Project Co | has the meaning given to that term in the Project Agreement. |
| PS&TR | has the meaning given to that term in the Project Agreement. |
| PSDs | means platform screen doors. |
| PTV DMS | means the drawing management system operated by Public Transport Victoria. |
| Public Holidays | means a public holiday as gazetted in the State of Victoria. |
| Quality Failure (QF) | means any failure by Project Co to provide a Service in accordance with this Services Specification which is designated 'QF' in the Minimum Services Specifications. |
| Quality Failure Point | means those points incurred by Project Co as a result of a Quality Failure in accordance with this Services Specification |
| Quality Failure Remedy Period | means in relation to each Service, the period set out in the 'Quality Failure Remedy Period' column of the relevant Minimum Services Specification (each as defined according to the key in Table 1 at 2.1.1). |
| Quality Management Plan | means the plan maintained as part of the Maintenance Management Plans in accordance with CM04 and Appendix F.1.3. |
| Quarterly Performance Report | means the report of that name provided in accordance with CM19 and Appendix D (Periodic Reporting Requirements). |
| Quarterly Service Payment | has the meaning given to that term in the Project Agreement. |
| Rail Safety National Law | has the meaning given to that term in the Project Agreement. |
| Rectification (and "Rectify" and "Rectifying" (as applicable) | means Project Co undertaking the tasks to rectify a reported Service Failure set out in, and in accordance with, section 2.2.1 (Response). |
| Refurbishment Works | has the meaning given to that term in the Project Agreement. |
| Repeat Failure Events | has the meaning given to that term in CM45. |

| Term | Meaning |
|---|--|
| Response (and “Responding” (as applicable)) | means Project Co undertaking the tasks in response to a reported Service Failure set out in, and in accordance with, section 2.2.1 (Response). |
| Response Time | has the meaning given to it in section 2.2.3 (Response Times and Abatement Free Periods). |
| Returned Assets | has the meaning given to that term in the Project Agreement. |
| Returned Spaces | means the signalling equipment room, the communications equipment room and the telephone equipment room, only to the extent that each room does not contain any plant or equipment to be maintained by Project Co as Maintained Assets. |
| Review Procedures | has the meaning given to that term in the Project Agreement. |
| Reviewable Services | means: i) Cleaning Services; and ii) Pest Control Services. |
| Reviewable Services Manual | means the manual of that name required to be prepared in accordance with CM26. |
| Risk Management Plan | means the plan prepared, submitted and updated by Project Co as an element of the Maintenance Management Plans in accordance with CM04 and E1.6. |
| Routine Daytime Activities | means i) a visual inspection of all Passenger Areas at: a. 30 minute intervals during Peak Periods; and b. intervals appropriate to the amount of passenger traffic at other times, to identify the need for unscheduled cleaning in accordance with CL05; ii) emptying of all bins and removal of all litter from each Station; iii) removal of spills and contamination from the Station Precinct; iv) spot cleaning of surfaces in the Station so that any grime or spillage which could contaminate clothing is removed; v) maintaining and watering any plants located within the Station; vi) cleaning of all toilet surfaces, replenishment of Personal Cleaning Consumables and the updating of the visible record situated within the bathroom to include the date |

| Term | Meaning |
|-------------------------------------|---|
| | <p>and time of the last inspection and clean at least twice daily, and more frequently if required to meet the Cleaning Services Standards; and</p> <p>vii) replenishing of consumables located within each toilet.</p> |
| Scheduled | <p>means recurring work undertaken:</p> <p>i) against a schedule contained in a document reviewed in accordance with the Review Procedures under the terms of the Project Agreement, including this Services Specification; or</p> <p>ii) as otherwise agreed with the Franchisee (in accordance with the FCA) and/or approved by the State in accordance with this Services Specification.</p> |
| Service Failure | has the meaning given to that term in the Project Agreement. |
| Service Failure Assessment Criteria | means the criteria to be applied by the Help Desk in categorising Failure Events as set out in Table 3 in section 2.1.7 (Failure Events: Failure Event Levels). |
| Services | has the meaning given to that term in the Project Agreement. |
| Services Specification | means this Services Specification. |
| Services Training Program | means the training and induction program described in CM18. |
| Site | has the meaning given to that term in the Project Agreement. |
| Soft Services Areas | <p>means the Licensed Maintenance Areas excluding:</p> <p>i) Tunnels; and</p> <p>ii) areas trackside of the PSD.</p> |
| Spares | means replacement components used by Project Co rectify a Fault. |
| Specialist Cleaning Items | <p>means:</p> <p>i) passenger information displays;</p> <p>ii) ticketing machines;</p> <p>iii) automatic barriers;</p> <p>iv) public address speakers;</p> <p>v) advertising signs;</p> <p>vi) vending machines;</p> <p>vii) signage; and</p> <p>viii) ATM machines.</p> |
| Specification | means in relation to each Service, the specification set out in |

| Term | Meaning |
|----------------------------------|---|
| | the 'Specification' column of the relevant Minimum Services Specification. |
| Specific Services Specifications | means each of: i) section 3 (Help Desk Services); ii) section 4 (Asset Management Services); iii) section 5 (Pest Control Services); and iv) section 6 (Cleaning Services). |
| Standards | has the meaning given to that term in the Project Agreement. |
| State | has the meaning given to that term in the Project Agreement. |
| State's Associate | has the meaning given to that term in the Project Agreement. |
| Station | has the meaning given to that term in the Project Agreement. |
| Station Deep Clean | means a clean of a Station which includes the requirements of a Station daily clean and also includes: i) high pressure cleaning of all surfaces in the Station to remove the build-up of dust and grime; ii) replacement of bin lids where dust and grime cannot be removed; iii) replacement of plants within the Station if they have perished; and iv) removal of weeds and maintenance of vegetation within the Station. |
| Station SFE | means a Service Failure of that name described in Appendix B. |
| Station Precinct | means the area surrounding each of the Stations. |
| System Failure Event | means a Service Failure described in Appendix B. |
| Temporary Fix | has the meaning given to that term in section 2.2.4 (Extended Rectifications). |
| Temporary Fix Time | has the meaning given to that term in section 2.2.4 (Extended Rectifications). |
| Time Category | means Peak Period, Off-Peak Period or Non-Operational Period. |
| Total SFE | means a Service Failure of that name described in Appendix B. |
| Track Occupation | has the meaning given to that term in the FCA. |

| Term | Meaning |
|-------------------------------------|---|
| Train Accreditation | has the meaning given to that term in the Project Agreement. |
| Train Operations | has the meaning given to that term in the Project Agreement. |
| Tunnel | means tunnels and portals as described in the PS&TR. |
| Tunnel Areas | means: i) Tunnels; ii) walkways; iii) cross passages; iv) shafts; v) and the like. |
| Tunnel SFE | means a failure of that name described in Appendix B. |
| Unscheduled Pest Control | means the Services to be delivered by Project Co in accordance with PC03. |
| Unscheduled Repairs and Maintenance | means the Services to be delivered by Project Co in accordance with AM07. |
| UPS | means uninterrupted power supply. |
| User | has the meaning given to that term in the Project Agreement. |
| Utility | has the meaning given to that term in the Project Agreement. |
| Vandalism | means action involving deliberate destruction of or damage to property. |
| Vertical Transportation | means lifts or escalators. |
| VicTrack | has the meaning given to that term in the Project Agreement. |
| Waste | means all rubbish, litter, debris or waste including Confidential Waste, Domestic Waste, body fluids waste, recyclable waste, syringes, needles or other sharp instruments, kitchen waste, hazardous waste, building waste and engineering waste. |
| Waste Water Management Plan | means the plan prepared, submitted and updated by Project Co in accordance with AM25. |

1.3 Interpretation

All references to sections and appendices refer to sections and appendices of this Services Specification unless expressly stated to the contrary.

1.4 Contract Management and Administration Services and Specific Services Specifications

1.4.1 General

1.4.1.1 Structure

- a) The Services consist of the Contract Management and Administration Services (section 2) and Specific Services Specifications (sections 3 to 6).
- b) The Contract Management and Administration Services detail the State's general service requirements and contain general provisions applicable to all Services.
- c) The Specific Services Specifications detail the State's additional specific requirements for each of the Services.
- d) The Services shall be provided to the whole Licensed Maintenance Area, unless otherwise stated.

1.4.1.2 Overriding obligation

- a) Project Co must comply with all of the requirements of this Services Specification, including the Contract Management and Administration Services and Specific Services Specifications.
- b) In delivering the Services in accordance with the Specific Services Specifications set out in sections 3 to 6, Project Co must also satisfy all relevant requirements of section 2 (Contract Management and Administration Service).
- c) Unless instructed otherwise, Project Co must assume that Train Operations are provided on a continuous 24-hour basis between the first timetabled service on Friday and the last timetabled service on Sunday.

1.4.1.3 Specific requirements

- a) Each Specific Services Specification sets out the:
 - (i) key objectives;
 - (ii) scope; and
 - (iii) Minimum Services Specifications,in respect of each of the relevant Services.
- b) The "Key Objectives" and "Scope" sections of each Specific Services Specification outline the key objectives which should be considered by Project Co when delivering each of the Services, and the service scope or boundaries of each of the Services respectively.
- c) The "Minimum Services Specifications" section of each of section 2 (Contract Management and Administration Services) and each Specific Services Specification sets out the State's minimum specific requirements in relation to the relevant Service, against which Project Co's actual performance is to be assessed.
- d) The requirement for Project Co to produce a plan, program or schedule to the satisfaction of, or approval of, the State under this Services Specification does not limit or derogate from Project Co's obligations to meet the Minimum Services Specifications, maintain the Maintained Assets to meet the FFP Warranty and meet all other requirements of the Project Agreement including with respect to availability of the Maintained Assets.

- e) A Minimum Services Specification may be allotted a reference number which appears in the column named "Ref". Where a reference number applies to a number of Services requirements, failure to achieve any one of those Services requirements will be a Service Failure.

1.4.1.4 Effect of the Method Statements

- a) Without limiting Section 1.4.1.3(d) the carrying out of a Service in accordance with the relevant Method Statement for that Service, including the provision of the number of personnel or full-time equivalents set out in a Method Statement:
 - (i) is not evidence that Project Co has discharged its obligations under this Services Specification; and
 - (ii) does not limit, affect or otherwise derogate from Project Co's obligations to meet:
 - (A). the Minimum Services Specification;
 - (B). the FFP Warranty under Clause 5.2 of this Project Agreement; or
 - (C). any other requirements of this Project Agreement.

1.4.2 **Contract Management and Administration Services**

- a) The Contract Management and Administration Services are divided into the following sections:
 - (i) Response;
 - (ii) Management;
 - (iii) Cooperation with Third Parties;
 - (iv) Quality Management;
 - (v) Risk Management;
 - (vi) Human Resources Management;
 - (vii) Information Management;
 - (viii) Environmental Management;
 - (ix) Occupational Health and Safety Management;
 - (x) Train Accreditation;
 - (xi) Emergency Risk Management;
 - (xii) Materials, Equipment and Consumables;
 - (xiii) Performance Monitoring and Reporting; and
 - (xiv) Repeat Failure Events.
- b) Section 2.1 (Performance monitoring methodology) describes the methodology that will be applied in measuring Project Co's performance against the Specific Services Specifications.
- c) Section 2.3 describes the Minimum Service Specifications applicable to Contract Management and Administration.

1.4.3 **Specific Services Specifications**

- a) The Specific Services Specifications are divided into the following areas:

- (i) Help Desk Services;
- (ii) Asset Management Services;
- (iii) Pest Control Services; and
- (iv) Cleaning Services.

1.4.4 Directions and requirements

- a) The State Representative may delegate any of its rights and obligations under this Services Specification in accordance with clause 11.3(e) of the Project Agreement.
- b) Without limiting any provision within the Project Agreement, Project Co must comply with all instructions, directions, requirements and requests of the Franchisee as contemplated by this Services Specification and given in accordance with the FCA or the O&M Protocol (as applicable).

2 Contract Management and Administration Services

2.1 Performance monitoring methodology

2.1.1 Performance assessment against Minimum Services Specifications

- a) Project Co's performance of the Services will be assessed on a pass or fail basis.
- b) Each Minimum Services Specification sets out for each Service:
 - (i) the Specification;
 - (ii) the type of Service Failure (described in Table 2 below);
 - (iii) in the case of:
 - (A). a Quality Failure, the number of Quality Failure Points; and
 - (B). a Failure Event, the Failure Event Level;
 - (iv) the Performance Assessment Period; and
 - (v) the Quality Failure Remedy Period.

Table 1: Abbreviations

| Abbreviation | Meaning |
|--------------|---|
| QF | Quality Failure |
| FE | Failure Event |
| PR | Per Request/Per Event |
| T | Two Hourly |
| D | Daily |
| W | Weekly (Sunday-Saturday) |
| M | Monthly (per Operating Month) |
| Q | Quarterly (per relevant period of three Operating Months commencing 1 January, 1 April, 1 July and 1 October) |
| H | Half-yearly (per relevant period) of six Operating Months commencing 1 January and 1 July) |
| A | Annually (per financial year) |
| C | Continuous (24x7 hours x 365 days) |

| Abbreviation | Meaning |
|--------------|----------------|
| N/A | Not Applicable |

2.1.2 Commencement of Service Failures

- a) A Service Failure will be deemed to have occurred upon:
- (i) notification by the State or any person so delegated by the State to the Help Desk;
 - (ii) notification by the Franchisee to the Help Desk;
 - (iii) being identified as a result of performance measurement undertaken by Project Co in accordance with the Performance Monitoring Plan;
 - (iv) first coming to the attention of the Help Desk;
 - (v) detection by the BMS or any other automatic monitoring or alarm system;
 - (vi) where it should have come to the attention of the Help Desk or should have been detected by the BMS or any other automatic monitoring or alarm system, if Project Co was complying with its obligations under this Project Agreement; or
 - (vii) Project Co otherwise becoming aware, that the Specification for the relevant Service has not been satisfied.
- b) Project Co acknowledges and agrees that the deemed occurrence of a Service Failure under section 2.1.2 will be conclusive between Project Co and State as to the time of commencement of a Service Failure.

2.1.3 Service Failure type

- a) The type of Service Failure designates the consequence of the Service Failure under this Services Specification and the Payment Schedule.

Table 2: Service Failure Types

| Service Failure type | Consequence |
|-----------------------------|---|
| Failure Events (FE) | Abatement |
| System Failure Events (SFE) | Abatement |
| Quality Failures (QF) | Quality Failure Points leading to Abatement |

2.1.4 Specification

- a) The Specification describes the minimum standard that Project Co must satisfy in providing the Service in order to avoid a Service Failure.
- b) Where a Specification comprises more than one deliverable, a failure to satisfy any one deliverable will result in a Service Failure.

2.1.5 Performance Assessment Period

- a) The Performance Assessment Period describes the interval at which the continued satisfaction of the Specification must be assessed.

- b) For Services designated as Failure Events, Project Co's satisfaction of the Specification will be assessed continuously.

2.1.6 Quality Failures: Quality Failure Points / Quality Failure Remedy Periods

- a) Upon the occurrence of a Quality Failure, Project Co will incur the number of Quality Failure Points designated to that Service at the time which is the later of:
 - (i) the expiry of the Quality Failure Remedy Period; or
 - (ii) the occurrence the Quality Failure (if the Quality Failure Remedy Period is designated as "N/A");
- b) Quality Failure Points will result in Abatement under the Payment Schedule.
- c) Following the occurrence of a Quality Failure until rectification of the Quality Failure, Project Co will incur additional Quality Failure Points for that Quality Failure no more frequently than the Quality Failure Remedy Period.
- d) Where the Quality Failure Remedy Period is designated as "N/A", no Quality Failure Remedy Period will apply.

2.1.7 Failure Events: Failure Event Levels

- a) For Services designated as Failure Events, the Failure Event Level will determine:
 - (i) the Response Time;
 - (ii) the Abatement Free Period; and
 - (iii) the Abatement to be applied under the Payment Schedule.
- b) For certain events, Appendix A (Minimum Failure Event Levels) identifies the minimum Failure Event Levels to be applied irrespective of Table 3.
- c) For each Failure Event, the Failure Event Level will be the greater of:
 - (i) the Failure Event Level determined according to Table 3; and
 - (ii) the Minimum Failure Event Level set out in Appendix A (Minimum Failure Event Levels).
- d) Where two or more Failure Event Levels could be assigned to a specific Failure Event, the Failure Event Level will be the higher Failure Event Level.
- e) If a Failure Event is not an event described in Appendix A (Minimum Failure Event Levels):
 - (i) the Failure Event Level will be the Failure Event Level determined according to Table 3 using Appendix A (Minimum Failure Event Levels) as a guide to the appropriate Minimum Failure Event Level; and
 - (ii) Project Co and the State will use reasonable endeavours to agree a minimum Failure Event Level for future events of that type based on the Minimum Failure Event Levels set out in Appendix A (Minimum Failure Event Levels).

Table 3: Service Failure Assessment Criteria

| Failure Event Level | Service Failure Assessment Criteria |
|---------------------|---|
| Level A | Any Failure Event that does not constitute a System Failure Event and which: <ul style="list-style-type: none"> a) is life threatening or if not remedied immediately, will potentially be life threatening; |

| Failure Event Level | Service Failure Assessment Criteria |
|---------------------|--|
| | b) poses an immediate risk to harm, or if not remedied immediately, has the potential to pose risk to harm; c) causes, or is serious enough to cause, significant damage to any part of the Project Assets; d) will result in, or has the potential to result in, significant damage or impairment of the environment external to the Project Assets, including damage to air, water and soil quality; or e) will result in, or has the potential to result in, Degraded Operations. |
| Level B | Any Failure Event affecting lifts or escalators that is not a Level A Failure Event. |
| Level C | Any Failure Event that is not categorised as a Level A or B Failure Event and: a) may develop into a Level A Failure Event if not remedied within the applicable Abatement Free Period; b) in the case of systems designed with a level of backup or redundancy, will result in, or has the potential to result in, Degraded Operations should there be a further Failure Event; c) will result in, or has the potential to result in, significant loss of amenity to passengers or Franchisee staff. |
| Level D | Any Failure Event which is not categorised as a Level A, B, or C Failure Event and: a) may a lead to a Level A or C Failure Event if not remedied within 24 hours; and b) causes no more than very minor disruption, inconvenience or loss of amenity to the Franchisee or Users. |
| Level E | Any Failure Event which is not categorised as a Level A, B, C or D Failure Event. |

2.1.8 Failure Events: Assignment of Failure Event Levels

- a) The Help Desk must determine the Failure Event Level at the time that the Help Desk receives notification of the occurrence of a Failure Event, and advise the Franchisee accordingly.
- b) The Franchisee (in accordance with the FCA) may give notice to Project Co and the State that it does not agree with the Failure Event Level determined by the Help Desk, and alter the Failure Event Level by instructing the Help Desk accordingly.
- c) If Project Co or the State does not agree with an assigned Failure Event Level:
 - (i) Project Co and the State may agree a different Failure Event Level; or
 - (ii) Project Co or the State may refer the Dispute to resolution in accordance with clauses 46 and 47 of the Project Agreement,
- d) after which, the State will notify the Help Desk of the determined Failure Event Level.

- e) Until the disagreement referred to in 2.1.8c) is resolved, the parties must act on the basis of the greater of the Failure Event Levels determined by the Help Desk and the Franchisee.
- f) If a Failure Event has occurred and the Help Desk does not respond as specified in this Services Specification, then the Failure Event Level will be:
 - (i) determined by the Franchisee (in accordance with the FCA); or
 - (ii) in the absence of a determination by the Franchisee, determined by the State.
- g) The occurrence of a Failure Event does not prevent the State or the Franchisee from electing, in its absolute discretion, to use that Maintained Asset or area notwithstanding the occurrence of the Failure Event. The continued use of the area does not in any way limit rights of the State to exercise its rights in respect of the Failure Event in accordance with the Project Agreement and this Services Specification.
- h) If it is not clear whether an event is the result of a Failure Event or is the result of a failure outside of Project Co's responsibility (for example, a Returned Asset), Project Co must Respond to the event and actively assist in the investigation of the event until such time that it is evident that the event is not a Failure Event.
- i) Any disagreement between the parties in respect of 2.1.8h) must be resolved in accordance with clauses 46 and 47 of the Project Agreement.
- j) Until a disagreement referred to in 2.1.8h) is resolved, the parties must act on the basis that the event is a Failure Event, and on the basis of the greater of the Failure Event Levels determined by the Help Desk, the Franchisee and the State.

2.2 Response and rectification

2.2.1 Response

- a) On the occurrence of a Failure Event, Project Co must as soon as practicable and in any event within the applicable Response Time set out in Table 4:
 - (i) establish the nature and location of the Failure Event;
 - (ii) inform the Franchisee of the Failure Event (if the Franchisee is unaware) and agree with the Franchisee all subsequent actions to mitigate the Failure Event;
 - (iii) commence to take all necessary actions to make the affected areas(s) safe and secure, fulfil all health and safety requirements in accordance with OHS Legislation and agreed Management Plans, and mitigate any further or consequential damage or impact on Train Operations or disruption to passengers;
 - (iv) confirm the appropriate Failure Event Level for the Failure Event having regard to section 2.1.7 and any more detailed directions set out in the Management Plans pursuant to CM04;
 - (v) where required and / or specified in the Management Plans:
 - (A). appoint a suitably qualified, experienced and accountable person to assess the situation who, within reasonable limits, is empowered to take or to authorise any required action on behalf of Project Co; and
 - (B). provide the State and the Franchisee with an assessment of the Failure Event, the action (if any) taken, details of any work required and estimated time to complete it and limitations that this may impose on the affected areas, Train Operations or Services; and
 - (vi) in the case of Failure Events with a Failure Event Level of A, B or C, the person referred to in 2.2.1a)(v)(A) must have arrived at the location of the Failure Event ready to commence investigation and repair.

2.2.2 Rectification

- a) After Responding to a Failure Event, Project Co must:
- (i) where Rectification may impact Train Operations and safety or amenity of Occupants, inform the Franchisee of the proposed Rectification and agree with the Franchisee (in accordance with the FCA) all subsequent actions to Rectify the Failure Event;
 - (ii) make good any Failure Event as soon as reasonably practicable in all circumstances, and in any event within the Abatement Free Period allowed for that Failure Event, so as to comply with this Project Agreement, including this Services Specification;
 - (iii) carry out any testing that may be reasonably requested by the Franchisee (in accordance with the FCA) to demonstrate that Rectification has been completed;
 - (iv) ensure that the State and the Franchisee is informed of progress and any likely delays;
 - (v) minimise the disruption to the Services and the provision of Train Operations or to passengers; and
 - (vi) notify the State and the Franchisee when Rectification is complete.

2.2.3 Response Times and Abatement Free Periods

- a) Project Co is deemed to have complied with a Specific Services Specification if it has:
- (i) Responded to the Failure Event in accordance with section 2.2.1 **within** the Response Time set out in 2.2.3d); and
 - (ii) Rectified the Failure Event in accordance with section 2.2.2 **within** the Abatement Free Period set out in in 2.2.3d) (as extended under section 2.2.4 (Extended Rectifications)).
- b) The Abatement Free Period (if applicable) and the Response Time will:
- (i) run concurrently; and
 - (ii) commence from the time that the Service Failure is deemed to have occurred in accordance with 2.1.2.
- c) The time taken for Project Co to Respond to, or Rectify a Failure Event will be the later of Project Co:
- (i) having completed the tasks required to Respond to, or Rectify the relevant Failure Event (as applicable); and
 - (ii) notifying the Help Desk of the Response or Rectification (as the case may be).
- d) Unless otherwise specified within this Services Specification, the Response Times and Abatement Free Periods for each Failure Event Level (as they relate to the period in which the Response Time and Abatement Free Period commence) are as shown in Table 4:

Table 4: Response Times and Abatement Free Periods

| Failure Event Level | Response Time | | Abatement Free Period | |
|---------------------|---------------|-----------------|---|---|
| | Peak Period | Non Peak Period | Peak Period | Non Peak Period |
| Level A | 15 minutes | 30 minutes | 1 Hour (except as discussed in 2.2.3 e)) | The greater of 1 Hour or the period until the commencement of the next Peak Period (except as discussed in 2.2.3 e)) |
| Level B | 15 minutes | 30 minutes | 3 days | 3 days |
| Level C | 30 minutes | 1 hour | 4 hours | 8 Hours |
| Level D | 30 minutes | 1 hour | 1 day | 1 day |
| Level E | 1 day | 1 day | 7 days | 7 days |

- e) If a Failure Event categorised as Level A occurs that results in Degraded Operations within a Functional Unit Category of "Tunnel", no Abatement Free Period will apply and Abatement will be incurred in respect of the Failure Event immediately upon its occurrence.

2.2.4 Extended Rectifications

- a) If Project Co considers that it is not able to Rectify a Failure Event within the Abatement Free Period, it may propose an Extended Rectification to:
- (i) the Franchisee for its agreement in accordance with the FCA, in respect of Faults reported by the Franchisee; and
 - (ii) the State in respect of all other Faults,
- together with an alternative time by which Rectification will occur ("Extended Abatement Free Period"). Such proposals must be received prior to the end of the Abatement Free Period.
- b) Except for the provisions of 2.2.4c), the State or the Franchisee (acting in accordance with the FCA) (as applicable) will not refuse to grant an Extended Rectification provided that:
- (i) if so requested by the State or the Franchisee (in accordance with the FCA) (as applicable), the Extended Rectification includes a course of action that will temporarily ameliorate the consequences of the Failure Event whilst the Failure Event is being Rectified ("**Temporary Fix**");
 - (ii) Project Co has Responded to the Event in accordance with section 2.2.1 (Response and Rectification);
 - (iii) in the opinion of the State or the Franchisee (as applicable), Project Co has been diligently pursuing a remedy or cure in respect of that Failure Event,

including completing all actions required to meet its obligations under section 2.2.2;

- (iv) in the opinion of the State or the Franchisee (as applicable), Project Co has been diligently pursuing any previously agreed Temporary Fix in accordance with the agreed timeframes (“**Temporary Fix Time**”); and
- (v) the granting of such Extended Rectification will not, in opinion of the State or the Franchisee (as applicable):
 - (A). contravene any Standards or Laws or relating to health and safety, or otherwise pose a danger to health and safety of Occupants;
 - (B). cause an unacceptable level of disruption, inconvenience or loss of amenity to the Franchisee or Users; or
 - (C). give rise to additional Franchisee operating costs in providing Train Operations.
- c) In addition to 2.2.4b), the State may refuse to grant an Extended Rectification (or may rescind approval by the Franchisee in accordance with 2.2.4b)) in the event that:
 - (i) a similar Failure Event has occurred within the Maintained Assets on more than three occasions in the preceding quarter;
 - (ii) the Failure Event was caused by an act or omission of Project Co or a Project Co’s Associate, including the provision of inadequate resources;
 - (iii) the need for the extension is due to a failure on the part of Project Co to:
 - (A). adhere to Best Maintenance Practices, including the identification, purchasing and storage of spare parts for Plant and Equipment whose failure may have a significant impact upon Train Operations or passengers, including (but not limited to) compliance with the Asset Management Plan; or
 - (B). mitigate its loss by maintaining an appropriate level of spare equipment in accordance with Best Industry Practice.
- d) For avoidance of doubt, the State or the Franchisee may rescind any previously granted Extended Rectification in the instance that Project Co fails to diligently pursue the Temporary Fix.
- e) Project Co and the Franchisee may pre-agree Extended Rectifications for specific foreseeable Failure Events in accordance with the FCA, in which case the Management Plans must be updated to record those pre-agreed Extended Rectifications. Subject to 2.2.4j), the Franchisee is under no obligation to pre-agree Extended Rectifications and may amend or cancel any pre-agreed Extended Rectification at any time in accordance with the FCA.
- f) Project Co may not proceed to perform a Temporary Fix without the State or the Franchisee’s prior approval (in accordance with the FCA) (as applicable).
- g) If the State or the Franchisee (in accordance with the FCA) (as applicable) agrees to a Temporary Fix, Project Co must diligently pursue the Temporary Fix within the time periods agreed as part of the Extended Rectification, and must ensure that the Failure Event is Rectified by the Extended Abatement Free Period.
- h) No agreement to, or failure or refusal to agree to, an Extended Rectification or Temporary Fix by the State or the Franchisee will:
 - (i) relieve Project Co of any of its obligations or liabilities under this Project Agreement other than to the extent of this section 2.1.6; or
 - (ii) entitle Project Co to make any Claim against the State.

- i) Any decision by the State or the Franchisee to agree to an Extended Rectification does not create a precedent nor prejudice the State's right to exercise its entire discretion in making future decisions.
- j) Without limiting the State's rights to reject a request by Project Co for an Extended Rectification in 2.2.4c), the State or the Franchisee (as applicable) agrees that, without limiting Project Co's obligation to carry out the activities set out in clauses **Error! Reference source not found.** to **Error! Reference source not found.** within the original Response Time, Project Co will be granted a pre-agreed Extended Rectification where:
 - (i) a Failure Event has occurred in an area that is not accessible to Project Co either in accordance with the FCA, or where otherwise prevented by the Franchisee; and
 - (ii) there is redundancy provided to the assets such that there is no impact on Train Operations or the passenger experience created by the Failure Event. Determination of the level of impact will be in accordance with the Access Category B defined in the Operations and Maintenance Protocol, namely:
 - (A). no impact upon Train Operations;
 - (B). no adverse impact upon safety;
 - (C). no material adverse impact upon customer service;
 - (D). no material adverse impact on station operations or nominal levels of service;
 - (E). fire and life safety not being compromised – system availability must be as per the Fire Engineering Report;
 - (F). the activity not compromising the ability of the operator to deliver a safe Train Operations; and
 - (G). no material impact on Passenger Flow.
- k) Pre-agreed Extended Rectifications subject to clause 2.2.4j):
 - (i) will be documented within the Operations and Maintenance Protocols;
 - (ii) are not intended to be used as a means of diluting Project Co's obligations in other circumstances (e.g. the maintenance of essential spares); and
 - (iii) will not apply to Vertical Transportation.
- l) Where a pre-agreed Extended Rectification is applied under clause 2.2.4j), the Response Time and the Abatement Free Period will be extended by the amount of time access is unavailable.

2.2.5 System Failure Events

- a) Appendix B defines Failure Events that may be classified as System Failure Events.
- b) In accordance with Appendix B, a System Failure Event may be a:
 - (i) Platform SFE;
 - (ii) Station SFE;
 - (iii) Tunnel SFE; or
 - (iv) Total SFE.
- c) For the avoidance of doubt, Abatement Free Periods will not apply in regards to System Failure Events.

2.2.6 Performance Monitoring Methods

- a) The State may monitor the delivery of the Services using any method considered reasonable by the State as applicable, including the following ("**Monitoring Methods**"):
- (i) Project Co self-monitoring (in accordance with the Performance Monitoring Plan);
 - (ii) the State / Franchisee / Project Co reports to Help Desk, and Help Desk records;
 - (iii) comparison with agreed policies, procedures, manuals and work plans;
 - (iv) comparison against agreed benchmark (applies to format of reports and the like);
 - (v) analysis of information contained in Project Co systems and other operational records;
 - (vi) State and Franchisee audits (including analysis of complaints, random visits, validation checks of Project Co data and deliberate testing);
 - (vii) written reports from the Franchisee;
 - (viii) CCTV Footage; and
 - (ix) results of customer surveys undertaken by the State or Franchisee.

2.3 Minimum Services Specifications

2.3.1 Response

| Ref. | Specification | Service Failure | Level / points | Performance Assessment Period | Quality Failure Remedy Period |
|-------------------------------------|--|-----------------|----------------|-------------------------------|-------------------------------|
| Response (Maintained Assets) | | | | | |
| CM01 | a) Project Co must Respond to all Failure Events in accordance with section 2.2.1 within the Response Time set out in section 2.2.3d). | QF | 2 points | PR | N/A |

2.3.2 Management

| CM41 | <p>a) Project Co must provide all Performance Data required under this Project Agreement, and otherwise as reasonably required by the State, to enable the measurement of Project Co's performance under this Services Specification.</p> <p>b) Project Co must ensure the availability and continuous integrity of all Performance Data, and ensure that all Performance Data is accurate, complete and correct within 24 hours of that Performance Data being collected, created or otherwise recorded.</p> <p>c) Project Co must ensure that Performance Data is not amended, deleted or destroyed unless prior written authorisation is provided by the State.</p> <p>d) If any Performance Data is amended, deleted or destroyed with the authorisation of the State, Project Co must prepare, record and retain:</p> <ul style="list-style-type: none"> i) details of the item of Performance Data amended, deleted or destroyed; ii) the reason given for the amendment, deletion or destruction; iii) the date and time of the amendment, deletion or destruction; iv) details of the person who amended, deleted or destroyed the relevant item of Performance Data; and v) details of the person who authorised the amendment, deletion or destruction of the relevant item of Performance Data. | QF | 25 points | M | N/A |
| Performance Monitoring Audits | | | | | |
| CM42 | a) Project Co must give such assistance in accordance with Clause 14.4 (Audits) of the Project Agreement and as otherwise reasonably required by the State in respect of any monitoring, review or audit under paragraph b), including by providing additional copies of documents used, prepared or produced in connection with Project Co's performance | QF | 15 points | M | W |

| Ref. | Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|------------------------------------|--|-----------------|----------------|-------------------------------|-------------------------------|
| | <p>monitoring activities or the provision of the Services and forwarding those document to the State or such other place or person notified by the State as noted below.</p> <p>b) <u>(Note: The State and any person authorised by it may monitor and review, upon giving reasonable notice to Project Co (except in the case of an Emergency when no notice is required) at any time during the Maintenance Phase, or require an audit of Project Co's performance or its performance monitoring system (including the Performance Monitoring Plan) any time up to six months after the end of the Term.)</u></p> | | | | |
| Performance Monitoring Plan | | | | | |
| CM43 | a) Project Co must provide the State with continuous read and print access to all information, reports and data used by Project Co in measuring its performance under the Performance Monitoring Plan, by means of a web-portal or similar. | QF | 2 points | PR | T |
| CM44 | <p>a) Project Co must:</p> <p>i) monitor its own performance in accordance with the Performance Monitoring Plan; and</p> <p>ii) provide the State with 24 hours' notice prior to undertaking all inspections and audits, and allow the State, or any person delegated by the State, to attend such inspections and audits.</p> <p>b) Project Co must submit as part of the Monthly Performance Report a summary of the performance monitoring conducted during the previous month. The summary must be in accordance with the Performance Monitoring Plan and detail where the performance standards have not been achieved, including how Project Co intends to address the shortfall in performance.</p> | QF | 15 points | M | W |

2.3.14 Repeat Failure Events

| Ref. | Service Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|------|---|-----------------|----------------|-------------------------------|-------------------------------|
| CM45 | <p>a) Project Co must ensure that a Failure Event of the same or substantially similar type does not occur to the same asset on more than three separate occasions in any rolling two-month period irrespective of whether or not the Failure Event is rectified within the Abatement Free Period or otherwise.</p> <p>b) Note: This CM45 will not apply in respect of lifts or escalators.</p> | QF | 5 points | PR | N/A |

2.3.15 Outstanding Final Acceptance Works

| Ref. | Service Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|------|--|-----------------|----------------|-------------------------------|-------------------------------|
| CM46 | a) Project Co must complete all Final Acceptance Works outstanding at the Date of Final Acceptance as that term is defined in the Project Agreement. | QF | 10 points | PR | W |

3 Help Desk Services

3.1 Key objectives

- a) Project Co must provide comprehensive Help Desk Services to support the delivery of Services. The Help Desk Services must be fully integrated with all Services and act as a communication hub for all matters relating to the Services. The Help Desk must:
 - (i) be effective, flexible, transparent and efficient in coping with varying demands;
 - (ii) facilitate responses to service requests and reported Service Failures in accordance with Response and Rectification requirements (as applicable);
 - (iii) ensure that effective Help Desk Services are implemented and do not conflict with the provision of Train Operations or the FCA; and
 - (iv) marshal resources to the maximum benefit of the State.

3.2 Scope

- a) In addition to the requirements of this Services Specification, Project Co must comply with all the requirements set out in section 2 (Contract Management and Administration Services) relevant to the delivery of the Help Desk Services.
- b) Project Co must provide the Help Desk Services 24 hours a day, 365(6) days per calendar year in accordance with the requirements of this Services Specification.
- c) The Help Desk must form the day-to-day notification interface between the State and Franchisee (as applicable) (on the one hand) and Project Co (on the other) in relation to the following matters:
 - (i) the reporting of all queries and requests relating to the Services;
 - (ii) the notification of faults and complaints from any of the State's Associates or Franchisee's Associates relating to the Services;
 - (iii) the notification of Services Failures by the State's Associates, Franchisee's Associates or Project Co and classification of Failure Events;
 - (iv) requests for temporary changes to the delivery and scope of Services by the State or the Franchisee;
 - (v) monitoring of alarms from the BMS and other systems as required in order to comply with the FFP Warranty (as appropriate);
 - (vi) the issue of instructions and notices by the State or the Franchisee (in accordance with the FCA) in relation to the Services;
 - (vii) requests for information relating to the operation of the Help Desk or the provision of the Services; and
 - (viii) update of progress regarding any fault notified to the Help Desk.
- d) The Help Desk must comprise a staffed facility receiving, logging and responding appropriately to direct verbal, telephone, letter, e-mail and other forms of communications, automatically notifying the applicable users when a job is logged and liaising with users on the progress of work.
- e) The Help Desk must also effectively respond to all received (non-Service) related issues/calls, ensuring that they are communicated expediently to the most appropriate representative of the State or Franchisee.
- f) It is recognised that the Help Desk may co-ordinate its response through secondary personnel specific to a Service. However, at all times the central Help Desk must be fully responsible for managing and coordinating the responses and must be the single point of contact for the State and Franchisee.

3.3 Minimum Services Specifications

| Ref. | Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|------------------------------------|--|-----------------|----------------|-------------------------------|-------------------------------|
| Installation and setting up | | | | | |
| HD01 | a) Project Co must ensure that clear operational and user instructions on the function of the Help Desk are maintained and provided to the State and the Franchisee in a form agreed by the State and updates must be provided prior to any changes being implemented. | QF | 5 points | M | W |
| HD02 | a) Project Co must prepare and maintain guidance material to assist the Help Desk in applying the Service Failure Assessment Criteria, for review in accordance with the Review Procedures. The material must include appropriate escalation processes in the event that Project Co's initial action is unlikely to be effective in meeting Project Co's Response and Rectification obligations. This material must form part of the Management Plans and must be reviewed and updated at least once a year or more frequently if considered necessary by the State. | QF | 5 points | M | W |
| HD03 | a) Help Desk staff must be sufficiently knowledgeable to assess the likely classification of Services requirements, as specified in the Management Plans, resulting from a request made through, or Service Failure reported to, the Help Desk in accordance with the agreed Service Failure Assessment Criteria and they must co-ordinate a response accordingly. b) Project Co must train Help Desk staff to respond in an informed manner to enquiries in accordance with the Maintenance Management Plans. | QF | 5 points | M | W |
| Operating the Help Desk | | | | | |
| HD04 | a) Project Co must log all requests made and Service Failures reported to the Help Desk. Project Co must record all relevant details, including the following information: i) name and location of the person logging the query or Service Failure; | QF | 2 points | PR | N/A |

| Ref. | Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|------|---|-----------------|----------------|-------------------------------|-------------------------------|
| | <ul style="list-style-type: none"> ii) date and time the request was made or Service Failure was reported; iii) location of the areas and associated Functional Unit Categories affected by the Service Failure; iv) nature of the request or Service Failure; v) any systems affected by the Service Failure; vi) the service required; vii) Failure Event Level, including any subsequent changes in Failure Event Level; viii) unique request reference; ix) details relating to any extensions of the Response or Abatement Free Periods (including authorisation of any Temporary Fix); x) date and time request passed to the relevant person responsible for rectifying the Service Failure or responding to the request; xi) Response and Rectification action taken; xii) details of any further action or monitoring required to ameliorate the risk of future or consequential Service Failures; xiii) the actual Response time; xiv) the actual Rectification time; and xv) the name(s) of the person(s) acting on behalf of Project Co who undertook both the Response, Temporary Fix (if any) and Rectification. <p>b) Project Co's obligation to capture Service Failures described in paragraph a) extends to all Service Failures to which Project Co becomes aware, including those observed by Project Co's Associates either visually, or by an alarm (BMS or similar).</p> | | | | |
| HD05 | a) The Help Desk must provide the ability for the Help Desk user to raise requests / report Events | QF | 10 points | M | W |

| Ref. | Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|------|--|-----------------|----------------|-------------------------------|-------------------------------|
| | via (as a minimum): i) telephone; ii) email; iii) intranet based work request portal (of a format agreed with the State); and iv) written communication. | | | | |
| HD06 | a) Project Co must ensure that all Help Desk staff implement an immediate call forward response in accordance with the State's instructions to all issues/calls received which do not relate to Project Co's responsibilities under this Service Specification. | QF | 5 points | M | N/A |
| HD07 | a) Where a request / Event relates to the Services: i) Project Co must inform the Help Desk user as to the proposed course of action and Response Time and anticipated time for completion; ii) the Help Desk system must send an automated confirmation immediately after each request / Event is successfully logged, for every logged job by a Help Desk user. Where required by the State, selected confirmations (identified by location, Failure Event Level or any other criteria) must also be copied to the State and /or the Franchisee. The confirmation must contain the following information, as a minimum: A) name and location of the person logging the request, query or Service Failure; B) date and time the request or query was made or Service Failure was reported; C) location of the areas and associated Functional Unit Categories affected by the Service Failure; D) nature of the request or Service Failure; E) the service required; F) the assigned Failure Event Level; and | QF | 2 points | PR | N/A |

| Ref. | Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|------|--|-----------------|----------------|-------------------------------|-------------------------------|
| | <p>G) unique request reference;</p> <p>iii) Project Co must co-ordinate the appropriate response to the request/Event reported and on completion inform the Help Desk of the achieved Response and Rectification and the action undertaken. This information is to be logged onto the Help Desk system; and</p> <p>iv) Project Co must keep the Help Desk user informed should problems occur while responding to a request or Responding to or Rectifying (as applicable) any Failure Event.</p> | | | | |
| HD08 | <p>a) Once information has been logged with the Help Desk, Project Co must ensure that entries cannot be amended unless there is a system in place to record the:</p> <p>i) exact nature and impact of the amendment;</p> <p>ii) reason for the amendment;</p> <p>iii) name of the person who made the amendment; and</p> <p>iv) name of the person who authorised the amendment.</p> | QF | 5 points | M | N/A |
| HD09 | <p>a) Project Co must ensure that the Help Desk provides an appropriate and timely acknowledgment of each communication, having regard to the nature and importance of the request for assistance. Project Co must ensure that the Help Desk:</p> <p>i) provides a personal, non-automated answer to each telephone call within 30 seconds for 75% of the calls in any month, and within a maximum of 45 seconds for all calls;</p> <p>ii) confirms receipt of electronic mail within five minutes; and</p> <p>iii) answers other written communications within two Business Days of receipt of the relevant correspondence.</p> | QF | 2 points | M | N/A |
| HD10 | <p>a) Project Co must ensure that the State and the Franchisee are given full live electronic (read and print only) access to all Help Desk records at all times and be able to track the progress of all requests/ Service Failures.</p> <p>b) Project Co must ensure the Help Desk is capable of providing read and print only access and</p> | QF | 5 points | M | N/A |

| | <p>the ability to track the progress of all requests/Service Failures, on a consolidated basis for each Station.</p> <p>c) <u>(Note: Access to all live help desk data for all Stations on a consolidated basis will need to be available to 10 concurrent users.)</u></p> | | | | |
| HD11 | a) Project Co must ensure that an appropriate back-up system is in place to ensure that Help Desk data and records cannot be lost or destroyed as a result of software or systems failure or any other occurrence. The back-up system need not be maintained on a real-time basis but must be backed up daily. | QF | 25 points | M | N/A |
| HD12 | a) At the end of each Month of the Maintenance Phase, Project Co must provide the State with a soft copy of the Help Desk data and records for that month. | QF | 5 points | M | W |

4 Asset Management Services

4.1 Key objectives

- a) Project Co must provide comprehensive Asset Management Services to the Licensed Maintenance Areas to ensure the integrity and functionality of structure, fabric and systems comprising the Maintained Assets, maintain public safety and facilitate the provision of Train Operations. Project Co must:
 - (i) provide efficient, responsive, comprehensive and effective Asset Management Services which are based on ensuring the Maintained Assets:
 - (A). meet the FFP Warranty;
 - (B). meet the relevant Handover Condition; and
 - (C). are capable of being operated as anticipated by the Project Requirements and in accordance with Best Operating Practices,for the duration of the Maintenance Phase;
 - (ii) ensure that all systems, buildings and Utilities function as required by the Project Agreement and these Services Specifications and do not cause or create any unacceptable hazard to the environment and/or any person within the Licensed Maintenance Areas;
 - (iii) maintain a safe and secure environment in accordance with the Franchisee's safety management system and the Franchisee's Train Accreditation;
 - (iv) maintain and manage systems to reduce greenhouse gas emissions, peak energy demand, energy consumption costs and water consumption; and
 - (v) ensure that Asset Management Services are delivered in a manner that minimises the impact on Train Operations and passengers.

4.2 Scope

- a) In addition to satisfying requirements of this section 4 (Asset Management Services), Project Co must comply with all the requirements set out in section 2 (Contract Management and Administration Services) relevant to the delivery of the Asset Management Services.
- b) Project Co must provide the Asset Management Services 24 hours per day, 365(6) days per calendar year in accordance with the requirements of this Services Specification.
- c) Project Co must provide the following elements under this Services Specification:
 - (i) a comprehensive Asset Management Plan in accordance with ISO 55001 that applies a reliability and predictive based approach to maintenance and replacement of all Maintained Assets, that is aligned with the Asset Management approaches adopted by the State and Franchisee;
 - (ii) a comprehensive maintenance service including Planned Preventative Maintenance and Unscheduled Repairs and Maintenance in relation to the Maintained Assets;
 - (iii) periodic refurbishment of the Maintained Assets as necessary to maintain the functionality, reliability, look and amenity of the Maintained Assets consistent with the other requirements of this Services Specification, and to meet the Asset Standards out in Appendix I (Asset Standards); and
 - (iv) additions or modifications to the Maintained Assets as necessary to ensure that the Maintained Assets are at all times in accordance with the FFP Warranty and to maintain the functionality, reliability, look and amenity of the Maintained Assets consistent with the other requirements of this Services Specification.

- d) Project Co will be responsible for the maintenance, refurbishment and replacement as necessary of all elements of the Maintained Assets in accordance with this section.
- e) Project Co must bear all costs associated with:
 - (i) inspecting and testing Maintained Assets to ensure they are compliant with all applicable Laws, Best Maintenance Practices and Standards;
 - (ii) 24 hours per day, 365(6) days per year monitoring and response to equipment failures, environmental alarms and other alarms or alert events;
 - (iii) producing such reports as required by applicable Laws and Standards, informing the State and the Franchisee which statutory tests have been carried out across the Maintained Assets and making available to the State and the Franchisee copies of such reports; and
 - (iv) providing all information relating to the provision of the Services as reasonably requested by the Franchisee in accordance with the FCA to enable the Franchisee to obtain and maintain its Train Accreditation.
- f) For the purposes of maintenance access, the period between last train and first train will generally be 12.30am to 4.30am, with practical occupation within the tunnel available between 1:30am – 3:30am, except for the following:
 - (i) access requiring electrical isolation;
 - (ii) periods of Designated Special Events;
 - (iii) Saturday and Sunday mornings;
 - (iv) the Franchisee's operational requirement to relocate trains and other Franchisee requirements for network balancing; and
 - (v) other occasional unforeseen operational requirements.

| | <p>ii) at 5 yearly intervals thereafter.</p> <p>b) All structural inspections and supervision of repairs must be undertaken in accordance with Best Maintenance Practice by an independent structural engineering consultant approved by the State.</p> <p>c) Project Co must provide the State and the Franchisee with:</p> <ul style="list-style-type: none"> i) 28 days advance notice of all inspections; ii) the opportunity to attend all inspections; iii) copies of all inspection reports within 28 days of any inspection, together with proposals for: <ul style="list-style-type: none"> A) for all identified repair works; and B) monitoring of signs of defects in accordance paragraph d). <p>d) Project Co must undertake a program of monitoring of all signs of defects, including cracking, settlement, water penetration, corrosion and the like in accordance with Best Maintenance Practice, and as reasonably requested by the State. The frequency of such monitoring must be no less than annually.</p> <p>e) <u>Note: All defects will be deemed a fault in accordance with AM07.</u></p> | | | | |

5 Pest Control Services

5.1 Key objectives

- a) Project Co must provide comprehensive Pest Control Services in order to:
 - (i) ensure that effective pest control measures are implemented and do not conflict with the provision of Train Operations and all Standards and Laws; and
 - (ii) undertake all work in a safe manner which maximises availability of the Stations and reduces, to an absolute minimum, the risk in terms of safety or damage to the environment and Project Assets and disruption to Train Operations from pest infestation.

5.2 Scope

- a) In addition to satisfying the requirements of this section 5 (Pest Control Services), Project Co must comply with all the requirements set out in section 2 (Contract Management and Administration Services) relevant to the delivery of the Pest Control Services.
- b) Project Co must provide a scheduled/programmed and unscheduled Pest Control Service across all areas of the Soft Services Areas.
- c) Project Co must provide, manage and operate a comprehensive system of pest control management in accordance with this Services Specification, including for:
 - (i) spiders;
 - (ii) insects;
 - (iii) rodents;
 - (iv) reptiles;
 - (v) birds; and
 - (vi) other animals.

5.3 Minimum Services Specifications

6 Cleaning Services

6.1 Key objectives

- a) Project Co must provide comprehensive Cleaning Services in order to:
 - (i) provide quality driven Cleaning Services which achieve an optimum standard of cleaning for all the required Cleaning Areas of each Station and relevant Above Ground Tunnel Structures;
 - (ii) provide a standard of service that enhances the positive image of the State and Franchisee and a level of cleanliness which provides a pleasant environment for all Users;
 - (iii) minimise disruption to Train Operations and be seen as a respected and important member of the Station service team;
 - (iv) providing efficient and timely waste management and disposal services; and
 - (v) maintain a safe environment and safe working practices.

6.2 Scope

- a) In addition to satisfying the requirements of this section 6 (Cleaning Services), Project Co must comply with all the requirements set out in section 2 (Contract Management and Administration Services) relevant to the delivery of the Cleaning Services.
- b) Project Co must provide the Cleaning Services 24 hours per day, 365(6) days per year on a scheduled and unscheduled basis as may be required to ensure that the Cleaning Areas (including all elements identified in Appendix L [Cleaning Service Standards] are in accordance with this Services Specification.
- c) The scheduled Cleaning Services include:
 - (i) a planned cleaning service during Peak Periods and Off-Peak Periods to support day-to-day Train Operations;
 - (ii) a planned clean during Non-Operational Periods and Non Peak Periods to bring the Cleaning Areas up to the required Cleaning Services Standards;
 - (iii) provision of hygiene services;
 - (iv) a planned program for periodic cleaning as set out in Appendix J (Planned Periodic Cleaning); and
 - (v) Graffiti removal.
- d) The unscheduled Cleaning Services will comprise ad-hoc reactive requests.
- e) Project Co must also provide waste management and disposal services for all Waste generated within the Stations. Project Co is responsible for:
 - (i) ensuring there is an adequate supply of well-maintained and clean Waste containers, bins, disposal units, receptacles and any equipment required to move Waste within the Stations; and
 - (ii) managing the compliant and timely disposal of Waste from the Stations to avoid impacting on Train Operations and surrounding stakeholders.
- f) Project Co is also responsible for the cleaning of Specialist Cleaning Items in accordance with the Cleaning Services Standards and in accordance with the warranty requirements of the item as advised to Project Co from time to time.
- g) Project Co must not undertake any activities or use any product that may disrupt the provision of Train Operations or damage Specialist Cleaning Items.
- h) Project Co is not responsible for:

- (i) cleaning within Returned Spaces;
- (ii) cleaning of:
 - (A). track side of PSDs;
 - (B). marks or staining on the station side of PSD's where specialist process/chemicals required; and
 - (C). security cameras.
- i) Cleaning staff must be suitably knowledgeable to be able to guide passengers seeking directions or requesting information about the use of the Station facilities to station staff, in accordance with the Franchisee's customer service strategy.

| Graffiti Management Process | | | | | |
| CL06 | a) Project Co must, in consultation with the Franchisee (in accordance with the FCA) implement an active Graffiti management process within the Stations and Above Ground Tunnel Structures, in accordance with the Standards and the following minimum requirements: | | | | |

| Ref. | Service Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|----------------------------------|---|-----------------|---------------------|-------------------------------|-------------------------------|
| | i) all Station and Above Ground Tunnel Structures surfaces and elements (as identified in Appendix K below) must be inspected once every 24 hours for Graffiti; | QF | 1 point per Station | D | N/A |
| | ii) all instances of Graffiti must be recorded by date, time, Station/structure, asset location, size and content (during inspection and if discovered for the first time during cleaning activities); | QF | 1 point | PR | N/A |
| | iii) all instances and evidence of Offensive Graffiti within the Stations and Above Ground Tunnel Structures must be removed from Accessible Areas within 24 hours of report (noting that Offensive Graffiti can be downgraded and removed in accordance with paragraph iv) below); | QF | 5 points | PR | N/A |
| | iv) all instances and evidence of Graffiti must be removed from Accessible Areas of the Stations and Above Ground Tunnel Structures and all Offensive Graffiti is removed from Inaccessible Areas within 7 days of report; and v) Project Co must take reasonable steps to remove such Graffiti from view and return the defaced surface, material, furniture or fitting in accordance with the Cleaning Services Standards to its original presentation. vi) <u>(Note: where cleaning does not fully remove all signed of Graffiti, further action will be undertaken as a Level E Failure Event in accordance with AM07 as from the time the Graffiti was originally reported.)</u> | QF | 2 points | PR | N/A |
| | vii) Project Co must provide evidence that it is complying with the above obligations as part of the Monthly Performance Report or as agreed with the State. | QF | 5 points | M | W |
| Cleaning Standards Audits | | | | | |
| CL07 | a) Project Co must develop, and update annually, an internal auditing program covering all Cleaning Areas within the Stations and Above Ground Tunnel Structures. The program must ensure that each of the critical areas are audited at least twice a month and all other public | QF | 10 points | A | W |

| Ref. | Service Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|--------------------------------------|---|-----------------|----------------------|-------------------------------|-------------------------------|
| | areas are audited at least once a month and all back of house areas are audited at least twice a year as a minimum. Records of these audits, including results, must be made available to the State and Franchisee one Business Day after receipt of the report and included as part of the Monthly Performance Report. | | | | |
| CL08 | a) Project Co must undertake audits in accordance with the internal audit program prepared in accordance with CL07 and report the results of such audits within the following Monthly Performance Report. | QF | 5 points per Station | M | W |
| Personal Cleaning Consumables | | | | | |
| CL09 | a) Project Co must procure and store, all Personal Cleaning Consumables and replenish all receptacles (point of use) in all applicable areas of the Stations. Project Co must ensure that there is a sufficient stock of them always available at all points of use within the Stations. | QF | 5 points per Station | M | N/A |
| Hygiene Services | | | | | |
| CL10 | a) Project Co must provide a hygiene service for the Soft Services Areas including the provision and maintenance of: <ul style="list-style-type: none"> i) sanitary disposal units in all female and unisex toilets, which must be replaced in accordance with the changeover cycle of 28 days or earlier if greater than 75% full; ii) nappy disposal units in all baby change facilities, which must be replaced weekly or more frequently if required to avoid becoming odorous; and iii) air fresheners in all toilet facilities, which must be functional at all times. b) Project Co must ensure that all replacement units are clean and sanitised. | QF | 5 points per Station | M | N/A |
| Waste Management and Disposal | | | | | |
| CL11 | a) Project Co must: | QF | 1 point | D | NA |

| Ref. | Service Specification | Service Failure | Level / Points | Performance Assessment Period | Quality Failure Remedy Period |
|------|--|-----------------|----------------|-------------------------------|-------------------------------|
| | <ul style="list-style-type: none"> i) ensure there is an adequate supply at all times of clean (sanitised) Waste collection and disposal equipment (which are compliant with the Standards), and an appropriate and adequate mix of all Waste containers, bins, disposal units, sharps containers, receptacles are available at all times to meet the waste volume generated at each Station; ii) clearly display the Waste management strategy for the segregation and handling of Waste at all waste holding points throughout the Stations. This must include the display of usage instructions on each waste receptacle; and iii) manage the collection, movement, storage and disposal of Waste from the Stations to avoid disruption to Train Operations and surrounding stakeholders and in accordance with all applicable Standards and Laws. | | per Station | | |

Appendix A Minimum Failure Event Levels

- a) The Faults identified in the following table assume:
 - (i) the Fault does not constitute a System Failure Event in accordance with Appendix B;
 - (ii) the Fault reflects a failure in one or more Maintained Assets; and
 - (iii) the Fault is a single standalone event. The occurrence of multiple concurrent Faults may necessitate the escalation of the applicable Failure Event Level.
- b) The applicable Functional Unit Category(ies) for a Fault will be the Functional Unit Category(ies) in which any impacts of the Fault are experienced. For example:
 - (i) a Fault in a UPS where mains power is unaffected will be measured against the Functional Unit Category in which the UPS is located; and
 - (ii) a Fault in a UPS during a mains power outage which results in disruption of say, lighting, will be measured against each of the Functional Unit Categories in which lighting is disrupted.

| System | Fault Description | Impact | Affected Functional Unit Category | | | | |
|----------|--------------------------|--|-----------------------------------|------------|-----------------------|------------------------|---------|
| | | | Passenger Areas | BOH (High) | Plant Room (Critical) | BOH / Plant Room (Low) | Tunnels |
| Access | Broken non-security door | Assuming security not compromised | D | D | D | D | |
| | Broken security door | Security of any space compromised | C | C | C | C | |
| | Entrance door Fault | Degraded Operations | A | A | | | |
| BMS | BMS Fault | Loss of communication between network control centre and local equipment | A | A | A | A | A |
| Drainage | Pump Failure | Degraded Operations | | | | | A |
| | | No impact on Train Operations (including as a result of the operation of redundancy) | C | C | C | C | C |

| System | Fault Description | Impact | Affected Functional Unit Category | | | | |
|---------------------------------------|---|---|-----------------------------------|------------|-----------------------|------------------------|---------|
| | | | Passenger Areas | BOH (High) | Plant Room (Critical) | BOH / Plant Room (Low) | Tunnels |
| | Sewer blockage | 1 toilet out | D | | | D | |
| | | All toilets unusable in a Station | C | | | C | |
| Emergency Lighting | Any Fault | Assuming no impact on operations | D | D | D | D | |
| | | Degraded Operations | A | A | A | A | |
| Flooring | Trip hazard | Assuming ability to isolate area without affecting operations | D | E | E | E | |
| | | Degraded Operations | A | A | A | A | |
| Fire Hydrants & Sprinklers | Fault in any system | Any Fault | C | C | C | C | C |
| Graffiti | Graffiti | Non-Offensive | D | E | E | E | |
| | | Offensive | A | A | A | A | |
| HVAC | Fault in the operation of the HVAC installations | Temperature posing a potential risk to wellbeing of Occupants or Train Operations | A | A | A | A | |
| | | Temperature outside of the levels required to comply with the FFP Warranty | C | C | C | D | |
| | | Temperature within levels required to comply with the FFP Warranty | D | D | D | D | |
| | Failure to maintain airflow or air quality standards to any area (e.g. waste odour, exhaust fumes, gas smells) in compliance with the FFP Warranty. | Degraded Operations | A | A | A | A | |
| | | No impact on Train Operations (including as a result of the operation of redundancy) | C | C | C | C | |
| Lighting | Lighting control Fault (assuming controller shared with Stations) | Tunnel lighting impacted resulting in Degraded Operations | | | | | A |
| | Lighting Fault | Lighting levels posing a potential risk to wellbeing of Occupants or Train Operations | A | A | C | C | |

| System | Fault Description | Impact | Affected Functional Unit Category | | | | |
|------------------------------------|---|--|-----------------------------------|------------|-----------------------|------------------------|---------|
| | | | Passenger Areas | BOH (High) | Plant Room (Critical) | BOH / Plant Room (Low) | Tunnels |
| | | Lighting levels above operational minimum levels but outside of the levels required to comply with the FFP Warranty. | C | C | D | D | |
| | | Lighting levels in compliance with the FFP Warranty. | D | D | D | D | |
| Painting and other finishes | Painting below level required by Project Agreement | No operational impact | E | E | E | E | |
| Power | Fault in electricity supply (unless as a result of agreed load-shedding). | Degraded Operations | A | A | A | A | A |
| | | No impact on Train Operations (including as a result of the operation of redundancy) | C | D | D | D | C |
| Station Furniture | Damage / Fault in furniture and fittings | Posing a risk to the wellbeing to Occupants | A | A | A | A | |
| | | Failures not posing a risk | D | E | E | E | |
| Station Ventilation | Fault in the operation of the Station ventilation installations | Degraded Operations | A | A | A | A | |
| | | No impact on Train Operations (including as a result of the operation of redundancy) | C | C | C | C | |
| Structural | First stage concrete | Degraded Operations | | | | | A |
| | | No impact on Train Operations (including as a result of the operation of redundancy) | | | | | E |
| | Fault in structural lining | Degraded Operations | | | | | A |
| | | No impact on Train Operations (including as a result of the operation of redundancy) | | | | | C |
| Toilets | Any Fault disrupting the ability to use any shower, toilet or toilet cubicle (e.g. blockage, continuous | Assuming sufficient and suitable other facilities are available. | D | | | D | |
| | | Assuming insufficient suitable other facilities are available. | C | | | C | |

| System | Fault Description | Impact | Affected Functional Unit Category | | | | |
|-------------------------|---|---|-----------------------------------|------------|-----------------------|------------------------|---------|
| | | | Passenger Areas | BOH (High) | Plant Room (Critical) | BOH / Plant Room (Low) | Tunnels |
| | flushing, broken toilet seat, blocked drainage) | | | | | | |
| Tunnel Ventilation | Tunnel ventilation system Fault | Degraded Operations | | | | | A |
| | | No impact on Train Operations (including as a result of the operation of redundancy) | | | | | C |
| Vertical Transportation | Escalator Fault | Asset not operational or operating at less than 0.5m/s resulting in Degraded Operations | A | | | A | |
| | | Any Failure Event affecting escalators that is not a Level A Failure Event | B | | | B | |
| | Lift Fault | Asset not operational resulting in Degraded Operations | A | | | A | |
| | | Any Failure Event affecting lifts that is not a Level A Failure Event | B | | | B | |
| Wayfinding | Any Fault | Any Fault | C | C | C | C | |
| Water | Leaking / dripping ceiling | Possible risk to persons and property. (Note: This Failure Event level will persist until investigated by a suitable tradesperson, even after cleaners have provided first response.) | A | A | A | A | |
| | | Leaking / dripping tap | Any area | D | | | D |
| | Loss or interruption of water supplies | To ALL Toilets/sinks in a Station | C | | | C | |
| | | To sprinklers | A | A | A | A | A |

Appendix B System Failure Events

| Category | SFE Definition |
|-------------------------------|--|
| PLATFORM SFE | |
| Platform - Fire & Life Safety | <p>Any Fault in Maintained Assets including, but not limited to:</p> <ul style="list-style-type: none"> • vertical transportation; • smoke ventilation; • sprinklers; • emergency lighting; and • availability and integrity of safe spaces / escape routes, <p>resulting in the availability and performance of a platform being below that which is required to support the fire safety objectives set out in the Fire Engineering Report (See Appendix C).</p> |
| Platform - Power | <p>Any Fault in Maintained Assets causing the supply of electrical power to Operationally Critical Systems (as defined in the PS&TR) resulting in the platform being unsafe or unavailable for the provision of Train Operations.</p> <div style="border: 1px solid black; background-color: #D3D3D3; padding: 5px; margin-top: 10px;"> <p>[Drafting Note: It is anticipated that Operationally Critical Systems specific to the design solution will be determined with Project Co]</p> </div> |
| Platform - Lighting | <p>Any Fault in Maintained Assets causing the average lighting level within a platform to fall below (X) lux.</p> <div style="border: 1px solid black; background-color: #D3D3D3; padding: 5px; margin-top: 10px;"> <p>[Drafting Note: It is anticipated that an operationally minimum lux level will be determined with Project Co based upon the minimum level at which Train Operations can be safely maintained]</p> </div> |
| Platform - Other | <p>Any structural or other Fault resulting in the platform being unsafe or unavailable for the provision of Train Operations due to a failure of Project Co to perform, or comply with, its obligations under this Agreement.</p> |
| Platform - Degraded | <p>Any Level A Failure affecting a Platform that remains unresolved for 24 hours or more.</p> |
| STATION SFE | |
| Station – Platform SFEs | <p>A Platform SFE existing concurrently in both platforms within a Station.</p> |
| Station – Fire & Life Safety | <p>Any Fault in Maintained Assets including, but not limited to:</p> <ul style="list-style-type: none"> • vertical transportation; • smoke ventilation; • sprinklers; • emergency lighting; and • availability and integrity of safe spaces / escape routes, |

| Category | SFE Definition |
|-----------------------------|---|
| | resulting in the availability and performance of a Station being below that which is required to support the fire safety objectives set out in the Fire Engineering Report (See Appendix C). |
| Station - Power | Any Fault in Maintained Assets causing the supply of electrical power to Operationally Critical Systems (as defined in the PS&TR) resulting in the Station being unsafe or unavailable for the provision of Train Operations. <div style="border: 1px solid black; padding: 5px; background-color: #f0f0f0;"> [Drafting Note: It is anticipated that Operationally Critical Systems specific to the design solution will be determined with Project Co] </div> |
| Station - Lighting | Any Fault in Maintained Assets causing the average lighting level within any public area of the Station to fall below (X) lux. <div style="border: 1px solid black; padding: 5px; background-color: #f0f0f0;"> [Drafting Note: It is anticipated that an operationally minimum lux level will be determined with Project Co based upon the minimum level at which Train Operations can be safely maintained] </div> |
| Station - Other | Any structural or other Fault resulting in the Station being unsafe or unavailable for the provision of Train Operations due to a failure of Project Co to perform, or comply with, its obligations under this Agreement |
| Station - Degraded | Any Level A Failure affecting a Station that remains unresolved for 24 hours or more. |
| TUNNEL SFE | |
| Tunnel – Fire & Life Safety | Any Fault in Maintained Assets including, but not limited to: <ul style="list-style-type: none"> • tunnel ventilation; • smoke ventilation; and • availability and integrity of safe spaces / escape routes, resulting in the availability and performance of Tunnels, walkways, cross passages, shafts and the like being below that which is required to support the fire safety objectives set out in the Fire Engineering Report (See Appendix C). |
| Tunnel - Drainage | Any flooding greater than (x)mm in any part of the Tunnel as a result of a Fault on any Maintained Asset. <div style="border: 1px solid black; padding: 5px; background-color: #f0f0f0;"> [Drafting Note: It is anticipated that an operationally maximum flooding level will be determined with Project Co] </div> |
| Tunnel - Power | Any Fault in Maintained Assets causing the supply electrical power to Operationally Critical Systems (as defined in the PS&TR) resulting in the Tunnel being unsafe or unavailable for the provision of Train Services. <div style="border: 1px solid black; padding: 5px; background-color: #f0f0f0;"> [Drafting Note: It is anticipated that Operationally Critical Systems specific to the design solution will be determined with Project Co] </div> |

| Category | SFE Definition |
|-------------------|---|
| | <p>or Any Fault in Maintained Assets resulting in a failure of traction power within a Tunnel.</p> |
| Tunnel - Other | Any structural or other Fault within Tunnels, walkways cross passages, shafts and the like resulting in the within Tunnel (and the like) being unsafe or unavailable for the provision of Train Operations due to a failure of Project Co to perform, or comply with, its obligations under this Agreement |
| Tunnel - Degraded | Any Level A Failure affecting a Tunnel that remains unresolved for 24 hours or more. |
| TOTAL SFE | |
| Tunnels | <p>Tunnel SFE existing concurrently in both Tunnels</p> <p>or Any Tunnel SFE remaining unresolved for 4 hours or more.</p> |
| Stations | <p>Any Station SFE existing concurrently in both CBD North and CBD South Stations.</p> <p>or Any Station SFE related to CBD North or CBD South remaining unresolved for 12 hours or more.</p> <p>or Any Station SFE related to Arden, Domain or Parkville Stations remaining unresolved for 24 hours or more.</p> |

Appendix C Fire Engineering Report related System Failure Events

[Drafting Note

- a) It is intended that:
- (i) a System Failure Event will occur when a Fault in any one or more Maintained Assets results in the ability to protect persons and property to the standard outlined in, or otherwise contemplated by, the Fire Engineering Report (FER) being compromised;
 - (ii) this Appendix C will ultimately contain a list of the anticipated Faults or scenarios of multiple Faults that will result in a System Failure Event, developed from the final design and the assumptions used in the Fire Engineering Report;
 - (iii) whilst the parties will attempt to identify anticipated System Failure Events arising in accordance with (i) above, it is understood that the final list within this Appendix C may not be exhaustive and the existence or otherwise of a SFE will ultimately be made against the definitions within Appendix B.
- b) The table below provides a number of example SFEs. The development process for this Appendix C is intended to be:
- (i) CYP will update the template contained in Appendix C and submit to MMRA and the Franchisee by the end of February, May, August and November each year between Contractual Close and Final Acceptance.
 - (ii) MMRA, CYP and the Franchisee will meet within 2 weeks of CYP issuing an update to discuss and seek to agree the applicable extended Rectifications.
- c) The parties will attempt to achieve the following milestones:
- (i) Issue of final certified design – 70% complete
 - (ii) Provisional Acceptable – 100% complete]

| Location | System (Maintained asset) | Fire & Life Safety Assumption | Failure Description of Maintained Assets (at which point Fire Engineering Report will be breached) | Consequence | Reference to trace the requirement in the Fire Engineering Documentation |
|----------|---------------------------|-------------------------------|--|-------------------|--|
| Tunnels | Tunnel Ventilation System | Exhaust Air Capacity | Standby TVF fan not available when duty TVF fan from the same bank is out of service | <i>Tunnel SFE</i> | <i>FER section [TBA]</i> |
| Tunnels | Tunnel Ventilation System | Exhaust Air Capacity | Damper module fails to activate as required | <i>Tunnel SFE</i> | <i>FER section [TBA]</i> |

| Location | System (Maintained asset) | Fire & Life Safety Assumption | Failure Description of Maintained Assets (at which point Fire Engineering Report will be breached) | Consequence | Reference to trace the requirement in the Fire Engineering Documentation |
|---|---------------------------|---|---|-------------------|--|
| Tunnels | Cross Passage Doors | Cross passage fire and smoke separated from tunnels | Cross passages are fire and smoke separated from the tunnel to the minimum level defined in the PS&TR and FER | <i>Tunnel SFE</i> | <i>FER section [TBA]</i> |
| | | | | | |
| [Drafting Note: Scenarios in this table to be modified and added to as agreed] | | | | | |

Appendix D Periodic Reporting Requirements

- a) **(Monthly Performance Reporting requirements):** The Monthly Performance Report must provide sufficient information to enable the State to calculate the Quarterly Service Payment for each Operating Month of the relevant Quarter, including the following information (or as otherwise agreed with the State):
- (i) a management overview which summarises overall performance and discusses key issues experienced during the reporting period, in respect of the Services;
 - (ii) a summary of all Failure Events and Quality Failures and other Services requests and events reported to the Help Desk within the relevant Operating Month, including:
 - (A). the number of Quality Failures;
 - (B). the number of Failure Events;
 - (C). the number of Failure Events of each Failure Event Level;
 - (D). the number of communications received by the Help Desk, broken down by service or other agreed categorisation; and
 - (E). complaints received by the Help Desk relating to any of the Services;
 - (iii) with respect to each Failure Event:
 - (A). the unique Failure Event number;
 - (B). the nature of the Failure Event;
 - (C). the date and time of the Failure Event;
 - (D). the specific location of the Failure Event and the applicable Functional Unit Categories;
 - (E). the classification by reference to the Failure Event Level of the Failure Event;
 - (F). the required date and time of Response;
 - (G). the actual date and time of Response;
 - (H). the required date and time of Rectification;
 - (I). the actual date and time of Rectification;
 - (J). details of where an Extended Rectification or Temporary Fix was applied;
 - (K). a short description of the Failure Event;
 - (L). a short description of how the Failure Event was rectified;
 - (M). any additional works required;
 - (N). Project Co's estimate of the deduction to be made from the Quarterly Service Payments; and
 - (O). any mitigating circumstances Project Co wishes the State to consider;
 - (iv) with respect to each Quality Failure:
 - (A). the unique Quality Failure number;
 - (B). the nature of the Quality Failure;
 - (C). the date and time of the Quality Failure and, if applicable;
 - (1). the required date and time of Response; and
 - (2). the actual date and time of Response;
 - (D). the Quality Failure Points attributable to the Quality Failure; and

- (E). Project Co's estimate of the deduction to be made from the Quarterly Service Payment calculated by reference to the total number of Quality Failure Points accumulated for Quality Failures in the relevant Operating Month including details of the calculation;
 - (v) a summary of all Failure Events and the areas and associated Functional Unit Categories affected;
 - (vi) a summary of the monitoring which has been conducted during the previous month in accordance with section CM44;
 - (vii) sufficient details of any Service Failures of the same or substantially similar type to enable the State to calculate applicable Quality Failure Points in respect of Repeat Failure Events for the purposes of CM45;
 - (viii) performance relative to the Performance Requirements identified in the State Project Documents;
 - (ix) progress against the Asset Management Plan including an outline of any departures and reasons for these, including actions required to ensure delivery in accordance with this Services Specification;
 - (x) summary of any failures to comply with the Help Desk minimum acknowledgment time standard specified in HD09;
 - (xi) BMS exception report by node status and all other relevant data generated by the BMS in accordance with AM16 and as required to comply with the FFP Warranty;
 - (xii) a summary of Pest control activities undertaken during the reporting period;
 - (xiii) information required to be provided under sections 3 to 6 inclusive;
 - (xiv) an occupational health and safety report summarising safety performance and initiatives;
 - (xv) the minutes of any monthly meeting of the Monthly O&M Meetings;
 - (xvi) any other information required to be provided in accordance with this Project Agreement (including this Services Specification); and
 - (xvii) other reasonable requirements of the State;
- during, for or in respect of, the relevant Operating Month.
- c) A version of the Monthly Performance Report with any abatement calculations or similar commercially confidential material redacted for issue to the Franchisee.
 - d) **(Quarterly Performance Reporting requirements):** The Quarterly Performance Report must summarise:
 - (i) the information provided in the Monthly Performance Reports submitted in respect of the Operating Months comprising that Quarter, required to substantiate the quarterly invoice; and
 - (ii) any other information required to be provided with or as part of the Quarterly Performance Report under this Services Specification or the remainder of this Project Agreement.

Appendix E Summary of Maintenance Management Plans

| Name of Plan | Reference | Update or Revision Interval |
|--|-------------------------------|-----------------------------|
| Performance Monitoring Plan | CM04 and Appendix F1.1 | Annually |
| Asset Management Manual | CM04 and Appendix F1.2 | Annually |
| Quality Management Plan | CM04, CM11 and Appendix F1.3 | Annually |
| Health and Safety Management Plan | CM04, CM30 and Appendix F1.4 | Annually |
| Risk Management Plan | CM04, CM13 and Appendix F1.5 | Annually |
| Information Management Plan | CM04 and Appendix F1.6 | Annually |
| Digital Engineering Management Plan | CM04 and Appendix F1.7 | Annually |
| Operations Environmental Management Plan | CM04, CM27 and Appendix F1.8 | Annually |
| Maintenance Phase Sustainability Plan | CM04 and Appendix F1.9 | Annually |
| Asset Management Plan | AM01 and Appendix F1.10 | Annually |
| O&M Manuals | AM17 and Appendix G | Annually |
| Pest Control Plan | PC01, CM04 and Appendix F1.11 | Annually |

Appendix F Maintenance Phase Documentation

F.1. Maintenance Management Plan

- a) The Maintenance Management Plan must identify the procedures, processes work practices and management systems that Project Co will apply in relation to the delivery of the Services.
- b) The Maintenance Management Plan must include:
 - (i) the Performance Monitoring Plan;
 - (ii) the Asset Management Manual;
 - (iii) the Quality Management Plan;
 - (iv) the Health and Safety Management Plan;
 - (v) the Risk Management Plan;
 - (vi) the Information Management Plan;
 - (vii) the Digital Engineering Management Plan;
 - (viii) the Operations Environmental Management Plan
 - (ix) the Maintenance Phase Sustainability Plan;
 - (x) the Asset Management Plan; and
 - (xi) the Pest Control Plan.
- e) In addition, the Maintenance Management Plan must:
 - (i) be consistent with the Bid Method Statements and Maintenance Management Plans;
 - (ii) align, to the extent practicable, with the Maintenance Management Plan (or equivalent) maintained by the Franchisee or the State in respect of Returned Works;
 - (iii) identify the procedures, Method Statements, processes work practices and management systems that Project Co will apply in relation to the delivery of the Services;
 - (iv) define an organisational structure within the Maintenance Subcontractor that identifies the key positions, roles and the minimum skills and experience required for each position;
 - (v) identify all Subcontractors and suppliers;
 - (vi) include allocation of responsibilities and procedures for reviewing and updating each of the Maintenance Management Plans;
 - (vii) include a protocol agreed with the State for notification of all Incidents;
 - (viii) include information relating to the collection and storage of data referred to in:
 - (A). the Services Training Program;
 - (B). Help Desk procedures described in section 3.3 (Minimum Services Specifications) including the Service Failure Assessment Criteria and any procedures relating to Response and Rectification of Failure Events;
 - (ix) include all policies, procedures, work practices, programs and schedules relating to the Services;
 - (x) include procedures for minimising disruption to passengers and Train Operations when performing all Services;
 - (xi) include procedures for the use, storage and disposal of equipment, materials and consumables;
 - (xii) include policies and procedures in relation to the BMS;

- (xiii) include the planned daily cleaning schedules and planned periodic cleaning schedules as detailed in section 6 (Cleaning Services); and
- (xiv) include all other information required to be updated or presented as detailed in this Service Specification and any other information reasonably required by the State.

F.1.1. Performance Monitoring Plan

- a) The Performance Monitoring Plan (PMP) must demonstrate all the performance monitoring activities (including frequencies, systems, methods and audit tools) that Project Co must undertake to monitor the quality of Services that Project Co and all Project Co's Associates are delivering, and to ensure that the Services are being carried out to the level and quality required by this Project Agreement and this Services Specification.
- b) The format of the Performance Monitoring Plan must accord with Best Maintenance Practice and include for each Service the following minimum details or characteristics:
 - (i) the PMP must be compatible with this Services Specification and the Monthly Performance Report;
 - (ii) Project Co's interpretation of the key objectives of each Service;
 - (iii) the appropriate reference or extract from the Method Statements included as part of the Management Plans, which describes the service inputs required to deliver each Service obligation;
 - (iv) the monitoring frequencies, systems, methods and tools that will be used to monitor the delivery of each Service obligation;
 - (v) the methods and documentary evidence to be used to assess and support Project Co's performance in relation to each Service obligation;
 - (vi) the proposed remediation process should there be a failure to meet any of the minimum performance standards specified in this Services Specification;
 - (vii) a coherent process and procedures to assess, monitor and calculate Abatements arising from a Service Failure and record them in the Monthly Performance Report; and
 - (viii) the nominated staff member responsible for the management and delivery of each Service obligation.

F.1.2. Asset Management Manual

- a) The Asset Management Manual must include:
 - (i) procedures for condition monitoring of Assets;
 - (ii) a CMMS operating manual;
 - (iii) an index of As-Built Records;
 - (iv) procedures for accessing and updating As-Built Records;
 - (v) details of the Maintenance Subcontractor;
 - (vi) maintenance procedures, including maintenance recording procedures and safe operating procedures for plant and equipment;
 - (vii) operating details for all systems and equipment; and
 - (viii) procedures for environmental monitoring.

F.1.3. Quality Management Plan

- a) The Quality Management Plan must:

- (i) comply with AS/NZS ISO 9001:2016 Quality Management Systems – Requirements;
- (ii) define Project Co's quality related objectives for the Services;
- (iii) nominate and define the responsibility and authority of the quality manager;
- (iv) define the responsibility, authority and reporting function of personnel primarily responsible for quality assurance; and
- (v) describe processes to coordinate and implement quality assurance functions across all Management Plans, including:
 - (A). audit and surveillance;
 - (B). identification, notification and control of non-conformances; and
 - (C). corrective action and process improvement.

F.1.4. Health and Safety Management Plan

- a) The Health and Safety Management Plan must describe how workplace health and safety will be managed at each distinct area of the Licensed Maintenance Areas for the duration of the Maintenance Phase.
- c) The Health and Safety Management Plan must reflect the following principles:
 - (i) safety is not a priority that can be reordered, but is a value associated with every priority;
 - (ii) development of a work environment based on employee involvement, accountability, team work, education, training and leadership;
 - (iii) building self-esteem, empowerment, pride, enthusiasm, optimism and encouraging innovation;
 - (iv) reinforcement of the need for employees to actively care about their co-workers; and
 - (v) recognition of group and individual achievement.
- d) The Health and Safety Management Plan must be consistent with the Franchisee's safety management system to the extent required to comply with the Franchisee's Train Accreditation.
- e) The Health and Safety Management Plan must be a single volume for the whole of the Services (including any Services performed by Subcontractors) and, as a minimum, comply with the following requirements:
 - (i) all applicable OHS Legislation, in particular general duty provisions applying to Project Co; and
 - (ii) AS4801:2001 or a comparative international standard.
- f) Project Co must ensure that the Health and Safety Management Plan includes, as a minimum:
 - (i) Project Co's and the State's health and safety policy and objectives;
 - (ii) a risk assessment of applicable risks arising out of delivery of the Services;
 - (iii) the details required to be included in a health and safety coordination plan under Part 5.1 of the *Occupational Health and Safety Regulations 2007* (Vic);
 - (iv) details of the organisational structure of the Maintenance Subcontractor, as relevant, including, but not limited to, identification of those roles with specific health and safety responsibilities, such as the roles and responsibilities of the health and safety professionals (including the safety manager) and description of the rationale for safety resourcing;

- (v) details of Project Co's procedures, policies and arrangements regarding the management of safety associated with the provision of the Services;
- (vi) procedures and responsibilities for:
 - (A). preparation, implementation, review and updating of the Health and Safety Management Plan;
 - (B). identifying hazards and risks associated with the Services, including preparation, review and updating of the risk assessment and establishing appropriate controls which must be in accordance with the hierarchy of controls during the Services;
 - (C). providing such information, instruction and training as is necessary to ensure risks are appropriately eliminated or controlled;
 - (D). the management of Subcontractors;
 - (E). reviewing the effectiveness of the Health and Safety Management Plan, particular controls implemented under the Health and Safety Management Plan, and where necessary revising the Health and Safety Management Plan and the controls implemented thereunder;
 - (F). preparing and implementing the following sub-plans within the Health and Safety Management Plan and reviewing and revising those sub-plans:
 - (1). Hazardous Materials Management Sub-Plan; and
 - (2). Emergency Response and Incident Management Sub-Plan;
 - (G). reporting and investigation of Health and Safety Incidents;
 - (H). arrangements for ensuring appropriate Site-specific and task-specific induction and training is undertaken by all relevant Subcontractors and other persons who attend the Site to ensure they are aware of the requirements of the Health and Safety Management Plan and safety controls identified therein;
 - (I). arrangements for ensuring that the Site-specific and task-specific induction and training programs undertaken by relevant Subcontractors and other persons who attend the Site addresses the risk profile and emergency procedures for that Site;
 - (J). monitoring and auditing arrangements to ensure that all Subcontractors comply with the requirements of the Health and Safety Management Plan and safety controls identified therein;
 - (K). arrangements for facilitating independent audits of the Health and Safety Management Plan, and for the prompt and effective rectification of any non-conformances identified during such auditing;
 - (L). arrangements for consulting with Key Subcontractors including, but not limited to, in relation to arrangements for the election of health and safety representatives and establishment of health and safety committees for the Services;
 - (M). arrangements for consulting with and providing safety information to relevant stakeholders;
 - (N). consideration of public safety for all Services, including control measures;
 - (O). consideration of overlapping safety obligations and requirements under the *Rail Safety National Law Application Act 2013 (Vic)* and the *Rail Safety National Law Regulations 2012*; and
 - (P). arrangements for health and safety performance monitoring.
- g) Project Co must retain a copy of the current Health and Safety Management Plan at each distinct area of the Site and ensure that it is available for inspection at all times.

- h) Project Co must ensure that all Subcontractors comply with Project Co's Health and Safety Management Plan at all Sites.

F.1.4.1. Hazardous Materials Sub-plan

- a) Project Co must:
 - (i) ensure the Hazardous Materials Management Sub-Plan is in accordance with the requirements of AS2601 and incorporates an asbestos removal control plan as required by applicable Laws, Approvals and Reference Documents;
 - (ii) ensure compliance with any requirements under OHS Legislation to notify any relevant Authority of any asbestos removal works and provide the State with evidence of that notification;
 - (iii) ensure that the State is notified of any Services involving asbestos removal, no less than 2 days prior to the commencement of the relevant Services, and where directed by the State, Project Co must conduct additional air monitoring;
 - (iv) ensure that at the completion of any hazardous materials removal and prior to the commencement of further Services, the State is provided with a 'clearance certificate' from a suitably qualified independent party certifying the removal of the relevant hazardous materials;
 - (v) ensure that any air monitoring required by OHS Legislation is conducted for any asbestos removal works and provide the results of such monitoring to the State through the incident reporting management database; and
 - (vi) monitor the compliance of all contractors and other responsible parties with the Hazardous Materials Management Sub-Plan and safety controls identified therein.

F.1.4.2. Emergency Response and Incident Management Sub-Plan

- a) The Emergency Response and Incident Management Sub-Plan must comply with OHS Legislation and must ensure reporting and investigation of Health and Safety Incidents by Project Co and all Project Co's Associates.
- b) The Emergency Response and Incident Management Sub-Plan must be consistent with and supportive of the Franchisee's emergency response and incident management plans.
- c) The Emergency Response and Incident Management Sub-Plan must, at a minimum, provide details of the following:
 - (i) Project Co roles and responsibilities in the event of an Emergency or crisis;
 - (ii) procedures (including interface requirements with the Franchisee) for managing and controlling Emergencies, Incidents or crises;
 - (iii) emergency and crisis contacts list (including contacts for out of hours);
 - (iv) details of first aid and emergency equipment kept on Site;
 - (v) procedures for training workers in relation to Emergencies and incidents;
 - (vi) details of possible emergency or crisis scenarios that may occur during the Services and how those emergencies are proposed to be managed;
 - (vii) details for contacting, notifying and interfacing with the Franchisee, the State and other relevant Authority, emergency services organisations, media outlets and other relevant stakeholders, such as utility service providers, utility asset owners and municipal councils;
 - (viii) procedures for the immediate notification to the Franchisee and the State of incidents which may give rise to a public interest or be communicated to Victorians through the media; and

- (ix) means for compliance with and coordination of any other emergency notification requirements under the Agreement.

F.1.5. Risk Management Plan

- a) The Risk Management Plan must:
 - (i) address how Project Co will comply with the risk management requirements of the Agreement for the duration of the Maintenance Phase;
 - (ii) define how appropriate risk management strategies are defined and implemented in accordance with AS/NZS ISO 31000: 2009;
 - (iii) describe the processes to be implemented by Project Co to:
 - (A). identify, analyse, treat and monitor all risks continuously for the duration of the Maintenance Phase, including:
 - (1). Security risks;
 - (2). Rail safety risks – during operations;
 - (3). Workplace safety, environment and quality risks; and
 - (4). Business risks such as stakeholder, approvals, commercial and schedule risks; and
 - (B). systematically address risks throughout the life cycle of the Asset from conception through to retirement.
 - (iv) describe the process, purpose and objectives of the risk management plan, the risk management standards, risk acronyms, terms and definitions;
 - (v) describe how the standard risk management processes will be implemented for the Project, including:
 - (A). communication and consultation;
 - (B). tools to be used;
 - (C). establishing the context;
 - (D). assessment of risks and opportunities (including identifying the risks and opportunities, analysing the risks and opportunities, qualitative process, quantitative process, deterministic analysis, probabilistic analysis and evaluation), as well as providing the matrices used for the assessment process;
 - (E). treating the risk;
 - (F). monitoring, reviewing and internal reporting the risks;
 - (G). roles and responsibilities for risk management;
 - (H). methods to be used to monitor effectiveness of control;
 - (I). identify and address the requirements for risk framework audits maturity review; and
 - (vi) outline the detail to be provided and process to be used for reporting, including reporting on the status of any high rated risks relevant to the State.
- b) Where applicable, the Risk Management Plan may include references to other Management Plans to avoid duplication.

F.1.6. Information Management Plan

- a) The Information Management Plan must, as a minimum, include:

- (i) details of how Project Co will implement an Electronic Operational Document Library that has the capability to manage all documentation, information, records and other types of project data;
- (ii) details as to how information is collected, retained, secured, processed, disseminated and disposed of;
- (iii) details of how Project Co will ensure that all information collected, retained and reported is accurate and up to date;
- (iv) details of the Electronic Operational Document Library induction and training program for all users;
- (v) identification of the IT requirements for information management, including the information and communications technology infrastructure network requirements (including software application, hardware and electronic communications);
- (vi) details of the disaster recovery process to be adopted in relation to information management; and
- (vii) details of how the State may be granted access to the Electronic Operational Document Library for the purpose of performing compliance audits in relation to the Information Management Plan.

F.1.7. Digital Engineering Management Plan

- a) The Digital Engineering Management Plan must:
 - (i) describe the digital engineering strategy and its implementation throughout the Maintenance Phase;
 - (ii) describe the process for the implementation of a live digital engineering environment to enable collaboration and coordination of information, data sharing and enhance communication on the project;
 - (iii) describe the process for the implementation of federated asset information models with sufficient embedded or linked data and information to satisfy operational or maintenance information requirements and support an asset management system;
 - (iv) describe the information security controls and procedures within the live digital environment to ensure compliance with security requirements of the State and or third parties;
 - (v) describe the access control procedures for permitted users, access rights restrictions, and data entry permissions;
 - (vi) describe the common data environment including the electronic data management system;
 - (vii) describe the network and web-based user interfaces to the common data environment;
 - (viii) define the suite of software platforms (including versions) and data exchange formats to be adopted and address:
 - (A). data exchange protocols (including to and from the asset information models);
 - (B). forward and backward compatibility;
 - (C). open standards compliance and non-proprietary interfaces (including to the asset management systems);
 - (D). interoperability of the software platforms to support federated models;
 - (E). handover compliance with PTV DMS and PASS Assets; and
 - (F). software viewers for federated models and their accessibility to the State and the Franchisee;

- (ix) define the common spatial coordinate system to be adopted across all software platforms or if not possible with the software platforms being adopted, the process to translate project elements or models into the common spatial coordinate system for coordination purposes;
 - (x) define the core documents and information management standards to be adopted and to what degree they are to be implemented;
 - (xi) define digital engineering specific roles and responsibility associated with the management of models, data integration, model approvals, the electronic data management system and the common data environment;
 - (xii) define the IT infrastructure requirements of Project Co, the State and the Franchisee;
 - (xiii) describe the information model production and deliverable strategy and define:
 - (A). scope of the models to be generated including anticipated model sizes;
 - (B). the expected output detail on a discipline basis and a schedule of model deliverables for each work package during the design delivery phase;
 - (C). the coordination and clash detection process addressing technical query workflows, tolerance strategy, interface reports, model review workshops and a clash resolution process;
 - (D). the process for the management of the information and modelling from commencement through to published data;
 - (E). the migration of the model between different stages of the life cycle through to completion of an as-built model and asset information models;
 - (F). the process for updating and coordinating changes during Maintenance Phase;
 - (G). methods for undertaking digital as-built verification surveys; and
 - (H). methods for ensuring the contents of the asset information models and embedded or linked data and information align with the physical assets;
 - (xiv) describe the process for the management of the information and data within the asset information models and the frequency of data transfer; and
 - (xv) describe the process for updating and coordinating changes to the asset information models as the assets change.
- b) Project Co must submit a CAD Management Plan as a sub-plan to the Digital Engineering Management Plan.
- c) The CAD Management Plan must as a minimum:
- (i) define non rail infrastructure asset owner drawing standards to be adopted; and
 - (ii) define naming conventions, cross-referencing, drawing scales, line-styles, sheet sizes, title blocks, dimensioning, typefaces, abbreviations and symbols;
- d) Project Co must submit a GIS Management Plan as a sub-plan to the Digital Engineering Management Plan.
- e) The GIS Management Plan must define the GIS data schema and the GIS layers, including:
- (i) metadata associated with the GIS layers should as a minimum include major themes, purpose, description, data limitations, data custodian and data updates; and
 - (ii) the GIS layers should as a minimum include but not be limited to infrastructure geometric layouts, construction footprints, land and property, ground movement, underground services, environmental, survey, topographic data, geotechnical data, published photograph logs and aerial photography.

F.1.8. Operations Environmental Management Plan

- a) The Operations Environmental Management Plan must be a single volume applying to the whole of the Services. As a minimum, it must:
 - (i) include the:
 - (A). Waste Water Management Plan described in AM25; and
 - (B). Air Quality Management Plan described in AM26;
 - (ii) be developed using a risk-based approach and allow the project to be operated in accordance with, as a minimum, the State's Environmental Management Framework and Environmental Performance Requirements;
 - (iii) detail appropriate operational responses that comply with, and implement, the State's Environmental Management Framework and Environmental Performance Requirements and Project Co's Environmental Management System for the Services;
 - (iv) ensure that all relevant Laws, Reference Documents or specific requirements of the State, relevant Authorities are referred to and complied with;
 - (v) include details of the organisational structure of Project Co, including, but not limited to, identification of those roles with specific environmental management responsibilities, and description of the rationale for environmental management resourcing;
 - (vi) detail how environmental integration will be achieved during the Maintenance Phase through other key disciplines using cross references to other Management Plans;
 - (vii) detail how Project Co and any Subcontractors will comply with, monitor and adopt the Operations Environmental Management Plan at all sites;
 - (viii) detail how complaints and other community or stakeholder enquiries will be dealt with relating to environmental management and compliance with approvals;
 - (ix) detail the processes and methodologies for identifying, tracking and implementing environmental opportunities into the Services and provide performance milestones for all environmental opportunities; and
 - (x) implementing an adaptive approach for the assurance, monitoring, auditing and corrective action for the continuous improvement of environmental performance.

F.1.9. Maintenance Phase Sustainability Plan

- a) The Maintenance Phase Sustainability Plan must, as a minimum and with regards to the Services, detail:
 - (i) sustainability resourcing requirements;
 - (ii) an outline of systems that will be used to support sustainability management;
 - (iii) processes and methodologies for monitoring, auditing (as a minimum energy audits), corrective action, continuous improvement on sustainability performance;
 - (iv) processes and methodologies for embedding sustainability initiatives into Project Co's maintenance processes;
 - (v) the approach to sustainable procurement including:
 - (A). the processes and procedures that will be used to provide environmental and social improvement; and
 - (B). the processes and environmental and social criteria that will be used for the selection of Project Co's Contractors;

- (vi) the details of the Building Management System and how it will report on sustainability data;
- (vii) the processes and methodologies for providing monthly reporting on sustainability data, as a minimum, energy, water and waste consumption, or data as required by Franchisee;
- (viii) processes for ensuring that the efficiencies of the utilities infrastructure (for example, the energy efficiency of Maintained Assets), maintains the same level of efficiency over the Term; and
- (ix) the interfaces with other operational procedures and processes, including the Franchisee's sustainability procedures and processes.

F.1.10. Asset Management Plan

- a) The Asset Management Plan must describe how the assets comprising the Maintained Assets will be managed and must include strategies for reliability improvement, obsolescence, optimising maintenance, meeting future service requirements, stakeholder requirements and otherwise the requirements of the Project Agreement.
- b) The Asset Management Plan must be in accordance with Project Co's ISO 55001 accreditation.
- c) The Asset Management Plan must include:
 - (i) an inventory and description of assets by asset category including all As-Built Records;
 - (ii) an assessment of asset criticality;
 - (iii) an assessment of asset performance against target performance by asset category;
 - (iv) drivers and triggers of asset interventions by asset category;
 - (v) identification of interdependency between asset categories;
 - (vi) an assessment of asset condition by asset category including information on:
 - (A). residual life;
 - (B). emerging latent defects;
 - (C). specific assets which may degrade due to exposure to the environment and the elements;
 - (D). specific assets which are subject to accelerated wear or deterioration; and
 - (E). specific assets which may or will require renewal and replacement before the end of their predicted Design Life;
 - (vii) an asset replacement and refurbishment program for all asset categories for the following (15) years defining:
 - (A). assets to be renewed with supporting justification;
 - (B). timing of works;
 - (C). locations and scope of works; and
 - (D). duration of work and potential service disruption;
 - (viii) a Forecast Maintenance and Refurbishment Program, which must adopt a whole of life asset management approach and focus on elements of the Maintained Assets impacted in the short and medium term and must include:
 - (A). an indicative plan for the Maintenance Phase plus 10 years, including the nature, scope, cost and timing of planned maintenance, refurbishment,

- replacement and augmentation works, together with an indication of any consequential impact or risk to Train Operations;
- (B). details of potential advancements in technologies that may be considered for adoption as part of asset replacement or refurbishment; and
 - (C). a report of changes in planned asset life cycle from the Forecast Maintenance and Refurbishment Program agreed at Financial Close, detailing replacements and refurbishments extended or otherwise deferred, with the supporting rationale for the change and otherwise satisfying the requirements of this Project Agreement;
- (ix) an Annual Works Plan, which must:
- (A). include a comprehensive works plan covering scheduled servicing, inspections, testing, maintenance, refurbishment, replacement and augmentation of the Maintained Assets for the following 12 months of the Maintenance Phase;
 - (B). be consistent with the work described in the asset replacement and refurbishment program and include the following details with respect to the work:
 - (1). its nature, scope and scale;
 - (2). its location;
 - (3). its projected timing and duration;
 - (4). a risk assessment of the Maintained Assets (as appropriate) with a content and in a format agreed with the State; and
 - (5). details of any risks or impacts the proposed works may have on passengers and Train Operations, including:
 - (6). possible impacts on safety systems;
 - (7). required interfaces with the Franchisee or others;
 - (8). possible impacts on passengers or Train Operations; and
 - (9). the way in which Project Co intends to work with the State to manage and minimise disruption to passengers and Train Operations;
- (x) a PPM Program which must set out how and when the PPM Services will be carried out, including how the impact on passengers and Train Operations will be minimised;
- (xi) a program for structural inspections in accordance with AM31.
- (xii) a Spares and consumables strategy for each asset category which must include:
- (A). an analysis of Maintained Assets that are critical to Train Operations, identifying:
 - (1). critical maintainable or replaceable components;
 - (2). location (country/State) of component manufacturer;
 - (3). location (country/State) of stockist;
 - (4). minimum stock of spares to be retained by Project Co within the vicinity of the Licensed Maintenance Areas; and
 - (5). anticipated location of spares storage;
 - (B). plans for maintaining a sufficient inventory of Spares such that all necessary maintenance can be performed;
 - (C). plans for replenishing Spares stocks and repair strategies;
 - (D). plans for storage of Spares including off-site storage;
 - (E). variation processes to manage the Spares pool;

- (F). processes for the modification of Spares;
 - (G). plans for the management of warranties;
 - (H). plans to ensure continuity of supply;
 - (I). obsolescence management plans;
 - (J). plans to minimise Spares deterioration whilst in storage; and
 - (K). options to minimise service disruption; and
- (xiii) a change configuration management system which must describe the processes to be adopted in respect of maintenance, upgrade and replacement of software and firmware embedded within the Maintained Assets.
- d) The Asset Management Plan must include a Graffiti and Vandalism Management Plan, as a sub-Management Plan to the Asset Management Plan, which must:
- (i) be consistent, and address Project Co's compliance, with the Asset Standards contained in Appendix I; and
 - (ii) demonstrate the process and methodology used to select exterior and interior materials in consideration of current local and international Vandalism and Graffiti practices to meet the requirements of this Services Specification.
- e) The Asset Management Plan must, as a minimum, provide a works program defining the asset management activities required in the following 2 years.

F.1.11. Pest Control Plan

- a) The Pest Control Plan must include:
- (i) a schedule of inspection and treatments for the Soft Services Areas (including Stations and Above Ground Tunnel Structures), for the forthcoming Contract Year; and
 - (ii) high level methods statements detailing the proposed processes for treating each type of pest.
- b) The Pest Control Plan must also demonstrate:
- (i) that the all areas of the Soft Services Areas (including Stations and Above Ground Tunnel Structures) are planned to remain free of infestation in accordance with Best Maintenance Practices, Standards, and applicable Laws at all times; and
 - (ii) a proactive approach to deal with high risk areas.

Appendix G O&M Manuals

- a) The O&M Manuals must include instructions for operating and maintaining all aspects of the Maintained Assets, including (as a minimum):
- (i) scope of works;
 - (ii) descriptions of services installed and their operation;
 - (iii) procedures for starting, stopping and operating Plant;
 - (iv) all Plant operation and testing requirements, including;
 - (A). conditions of use; and
 - (B). controls in use;
 - (v) controlling set points;
 - (vi) design criteria;
 - (vii) an inspection, testing and Maintenance schedule;
 - (viii) details of the manufacturer's recommended Maintenance on each item;
 - (ix) manufacturer's literature;
 - (x) a full set of as-built drawings;
 - (xi) a full set of commissioning sheets and checklists;
 - (xii) a listing of contact details for designers, contractors, sub-contractors and suppliers;
 - (xiii) pro-forma checklists for use in all future essential services testing; and
 - (xiv) other requirements as required in order to comply with the FFP Warranty.

Appendix H Handover Package

- a) Project Co must prepare and, at all times during the Maintenance Phase, maintain a 'Handover Package' in respect of the Maintained Assets.
- b) The Handover Package is to contain key information to enable the State or another party to take over operations or maintenance of the Maintained Assets.
- c) As a minimum, the Handover Package is to contain the following information:
 - (i) (contracts): a list of all agreements, permits, licences or other documents which are material to the delivery of the Services, including (as appropriate) the contact number, name, address, email address and telephone numbers of counterparties, contract price, value and subject matter;
 - (ii) (warranties and guarantees): all Subcontractor warranties and guarantees in respect of the Maintained Assets and the performance of the Services;
 - (iii) (information systems): a list of systems (including communication systems) used (computer and otherwise) for the Services, together with a description of the systems and master passwords where applicable. Software licences for any software required for continued operation and management of the systems must be transferred to the State at the end of the Maintenance Phase as part of the final Handover Package or following the State exercising its step-in rights right to step-in in accordance with the Agreement;
 - (iv) (operations): a list of any other information key to the daily operation of the Services, including:
 - (A). O&M Manuals;
 - (B). Maintenance Management Plans;
 - (C). operations and maintenance records;
 - (D). asset, maintenance and operations plans and forecasts; and
 - (E). lists of plant, consumables, rotatable items, Spares, special tools and Equipment and other assets or equipment relevant to the Services or required in respect of the Services;
 - (v) (employees): to the extent not prohibited by Law, details of each employee of Project Co or its Subcontractors undertaking the Services, including:
 - (A). names, work email addresses, work telephone numbers, roles and responsibilities;
 - (B). the date on which employment began;
 - (C). terms and conditions of employment;
 - (D). qualifications held to the extent they are relevant to the services that the employee performs as part of the Services; and
 - (E). all payments, benefits or changes to terms and conditions of employment promised to any employee;
 - (vi) (records):
 - (A). records, documentation and other information required under the Agreement (including in the form and/or manner in which they are required to be prepared, updated and stored under the Agreement) or in respect of the Services, including the As-Built Records, Construction Documentation and Construction Records;
 - (B). records relevant to compliance with the requirements of all Laws and Authorities;

- (C). a register of all System, sub-system and enabling and supporting system faults, the outcome of the fault investigation, fault root-cause and measures taken to rectify the fault;
 - (D). all property records and information specified in AM19;
 - (E). a current risk and hazard register and detail of the hazards and risks;
 - (F). a forecast of planned Services covering the five (5) year period subsequent to handover;
 - (G). a register of all compliance inspections, audits, details of any non-compliance and rectification actions taken or outstanding;
 - (H). a current resource plan covering the roles, competencies and numbers of personnel required to operate and maintain the Maintained Assets;
 - (I). a register and details of all injuries and incidents arising in respect of the Services;
 - (J). a description of the scope and conditions of all Approvals and requirements of Authorities in respect of the Maintained Assets;
 - (K). inspection and test plans to the satisfaction of the State demonstrating compliance to the State Project Documents including evidence that the inspections, test results and audits are in accordance with the Agreement;
 - (L). evidence that all tests have been passed in accordance with the Agreement;
 - (M). evidence that all incident reports have been closed out;
 - (N). O&M Manuals and any other relevant operation and maintenance manuals in accordance with the requirements of the State Project Documents;
 - (O). all manufacturers' and trade warranties required by the Agreement;
 - (P). copies of all Standards required by the Agreement including evidence of compliance with the Standards;
 - (Q). details of all non-conformances that have been resolved;
 - (R). delivery of all the receipts and documents confirming the provision of spare parts ordered in accordance with the Agreement;
 - (S). the certificates of occupancy for stations;
 - (T). evidence of compliance with all Project Co's obligations in respect of the Rail Safety National Law;
 - (U). the details of any Claims that are not finally resolved; and
 - (V). all other information which, in the opinion of the State, is necessary for the operation, use and maintenance; and
- (vii) (approvals correspondence): copies of all:
- (A). correspondence with all relevant Authorities and Key Subcontractors in relation to Approvals;
 - (B). Approvals correspondence related to subsequent building works and alterations and additions to Services; and
 - (C). records relevant to any Approvals obtained in respect of the Services.
- d) Project Co must permit representatives of the State and/or, once engaged, the Handover Reviewer (or nominee) to inspect the Handover Package upon request.

Appendix I Asset Standards

- a) This Appendix I is not intended to be exhaustive. Where an element of the Maintained Assets is not specifically identified, applicable minimum asset standards shall be derived from reference to similar assets. Nothing in this Appendix I will derogate from Project Co’s obligations under the Project Agreement, including in relation to the FFP Warranty.

I.1. Building

| Element | Standard |
|--|--|
| <p>Civil and Structural Works including:</p> <ul style="list-style-type: none"> • walls and linings • slabs • walkways • Tunnels • Portals • bridges • pits • first stage concrete • all underground structures and foundation elements, including stations, tunnels, structural linings, portal structures, decline structures, retaining structures, shafts, cross passages and sumps • all above ground building structures • earthing and bonding system • silencers, acoustic treatment and accessories • vibration treatment and accessories | <ul style="list-style-type: none"> • All elements and components must be functional, operational and comply with the FFP Warranty. • Sound, secure, bird-proof and weatherproof where appropriate. • Sealed to minimise uncontrolled infiltration and exfiltration. • Free from structural cracks and/or deflection. • Free from damp penetration or spalling except for maximum acceptable water penetration as required to comply with the FFP Warranty. • Substantially free from areas capable of harbouring vermin and/or pests. • Substantially free from debris and moss growth. • Services support fittings, fixtures must be properly housed and fastened securely to their intended point of anchorage and labelled. |

| Element | Standard |
|---|--|
| <ul style="list-style-type: none"> • cathodic protection • Combined Services Route / cable support systems. | |
| <p>Building Superstructure and External Fabric including:</p> <ul style="list-style-type: none"> • external walls • roof • flues, louvres and vents • gutters and culverts • rainwater collection systems • lightning conductors • fire escapes • walkways • safety barriers • balconies • eaves • rendering • external access cradles and gantries | <ul style="list-style-type: none"> • All elements of building superstructure, fabric, finishes and services system components must be functional, operational and satisfy the performance requirements required to comply with the FFP Warranty. • Sound, secure, bird-proof and weatherproof where appropriate. • Sealed to minimise uncontrolled infiltration and exfiltration. • Free from structural cracks and/or deflection. • Free from damp penetration or spalling. • Claddings, copings and parapets are structurally sound and secure. • Substantially free from areas capable of harbouring vermin and/or pests. • Flues and vents are structurally sound and secure, free to expand and free from blockages. • Substantially free from debris and moss growth. |
| <p>Building Fabric Internal including:</p> <ul style="list-style-type: none"> • architectural cladding • internal walls | <ul style="list-style-type: none"> • All elements of building fabric and finishes or services system components must be functional, operational and satisfy the performance requirements as required to comply with the FFP Warranty. • Free from structural cracks and/or deflection. • Substantially free from damp and vermin. |

| Element | Standard |
|---|--|
| <ul style="list-style-type: none"> • partitions • ceilings | <ul style="list-style-type: none"> • Substantially free from undue damage and of reasonable appearance for location. |
| <p>Furniture Fixtures and Fittings including:</p> <ul style="list-style-type: none"> • internal and external doors (including fire and smoke stop doors) and door furniture (locks, automatic latching and release devices, acoustic seals, and air and weather seals) • operable walls • tables, desks, chairs, other furniture • passenger seating • windows and sills (incl. window suites) • hatches • vents • sky lights • joinery, shelving • cupboards • ironmongery • railings • racking • notice boards • mirrors • balustrades • grilles and shutters | <ul style="list-style-type: none"> • All elements must be complete, functional, operational and satisfy the performance requirements as required to comply with the FFP Warranty • Operate as intended, in a safe way, without making undue noise and without observable stains on hinges, locks, catches and handles, and without binding, rubbing or catching in any way. • Must function as intended, and must be free from all but minor surface blemishes and minor wear and tear. • Luminescent strips, signs, notices, warning signs are intact, legible and illuminated where appropriate. • Substantially free from corrosion. • Maintain impervious qualities of surfaces and materials intended to remain impervious. |

| Element | Standard |
|--|---|
| Floor and Floor Coverings | <ul style="list-style-type: none"> • The floor covering is complete, and complies with the FFP Warranty and manufacturers specifications. • The floor covering is fully fixed to the floor so as not to cause a health and safety hazard. • The floor/floor covering is free from tears, scoring, cracks or any other damage that is unsightly and/or could cause a health and safety hazard. • The floor covering is free from all but minor surface blemishes and minor wear and tear. • Floor coverings/surfaces must be maintained in such a way as to provide a suitable uniform surface, with minimal resistance, for, wheel chairs and any other wheeled vehicle or equipment in use in the Licenced Maintenance Areas. • Floor coverings/surfaces allow adequate drainage where necessary. • Floor coverings/surfaces are free from pests. |
| Decorative Finishes including: <ul style="list-style-type: none"> • paintwork • fabric and special finishes applied to walls • ceilings • woodwork • metalwork • pipework and other visible elements | <ul style="list-style-type: none"> • Complete and complies with the FFP Warranty and manufacturer's specifications. • Free from all but minor surface blemishes or undue wear and tear. • Substantially free from cracks, or any other surface degradation consistent with a building maintained in accordance with Best Maintenance Practices. |
| External Lighting | <ul style="list-style-type: none"> • Sound, secure, and safe and free from damage. • Free from dead pests, excreta etc. • Operating at their design performance where applicable. • Controlled as required to comply with the FFP Warranty. |

| Element | Standard |
|----------------|--|
| Signage | <ul style="list-style-type: none"> • Compliant with the applicable signage standards, style guides and protocols of the State as advised from time to time. • Secure and sound. • Do not hinder visibility at junctions. • Must be in appropriate locations. • Must be highly visible, both day and night. • Must offer clear and concise information. • Must be free from Graffiti and/or Vandalism. |

1.2. Systems

| Element | Requirement |
|--|---|
| Emergency Power Supplies | <ul style="list-style-type: none"> • Standby power sources and UPS must be operational, secure, have adequate fuel and be tested regularly in accordance with AS3009. • Emergency lighting units must comply with AS2293, be free from dust, operational and fully charged. • Static inverters must be in working order and not overheating during normal operational loading. |
| Electrical Generators including: <ul style="list-style-type: none"> • standby supplies | <ul style="list-style-type: none"> • Operational as intended achieving designed fuel efficiencies. • Changeover between standby and mains operation to be seamless. |
| LV Distribution System including: | <ul style="list-style-type: none"> • Correctly operating in accordance with AS3000 and in compliance with the FFP Warranty. • Wiring, fittings, fixtures, controls and safety devices must be properly housed and fastened |

| Element | Requirement |
|--|---|
| <ul style="list-style-type: none"> • distribution equipment and protective devices fuse switches • isolators • distribution boards • fuses • mini circuit breakers, air circuit breaker, earth leakage circuit breakers and residual current devices, exposed distribution cables • check meters | <p>securely to their intended point of anchorage and labelled.</p> |
| <p>HV Distribution Systems including:</p> <ul style="list-style-type: none"> • substations • distribution equipment • protective devices • isolators • distribution units • oil circuit breakers, air circuit breakers and earth leakage circuit breakers | <ul style="list-style-type: none"> • Correctly operating in accordance with Victorian Distribution Rules, Building Code of Australia, AS3000, relevant high voltage (HV) standards together with permits to work and relevant occupational health and safety systems. • Wiring, fittings, fixtures, controls and safety devices must be properly housed and fastened securely to their intended point of anchorage and labelled. |
| <p>Hot and Cold Water Systems including:</p> <ul style="list-style-type: none"> • cold water supplies • rainwater recycling • domestic cold water systems | <ul style="list-style-type: none"> • Deliver water at the temperatures and flow rates required to comply with the FFP Warranty without undue noise and vibration. • Taps, valves and other related fittings and fixtures function as intended. • Pipework and fittings must be fastened securely to their intended points of anchorage. • There must be no drips or leaks of water from pipework, taps, valves and/or fittings. • Compliance with public health measures for Legionella. |

| Element | Requirement |
|--|--|
| <ul style="list-style-type: none"> • domestic hot water systems • filtration and treatment systems | <ul style="list-style-type: none"> • Water supply pressure maintained. • Tanks and storage system level controls and alarms maintained. |
| <p>Heating, Air Conditioning and Mechanical Ventilation Systems</p> <p>including:</p> <ul style="list-style-type: none"> • heating hot water system including boilers and pumps, piping and valves • steam and vacuum plant including pumps, piping and valves • air conditioning systems including fans, cooling and heating coils filters, dampers, ductwork and grilles, variable air volume boxes and automatic controls • chilled water system including chillers, pumps, piping and valves, etc. • supply and exhaust ventilation systems including fans, ductwork, dampers and grilles, filters etc. • BMS • tunnel ventilation | <ul style="list-style-type: none"> • All air conditioning and ventilation systems and associated Plant components must function as intended without undue noise or vibration. • Air changes and ventilation levels as required to comply with the FFP Warranty at all times. • Temperatures to each part of the Maintained Assets are maintained to the levels required to comply with the FFP Warranty. • Ductwork, fittings and pipework must be securely fastened to their intended points of anchorage. • There must be no leaks of water (or other heating/cooling medium) or air from ventilation systems. • Secure to authorised access only. • Substantially free from corrosion, erosion and organic growth. • Compliance with public health measures for Legionella. • All vents and similar to be clean and clear of dust, dirt, cobwebs, debris and the like which may adversely affect airflow. • All relevant interfaces to BMS/security technology correctly operating. • Air pressurisation regimes maintained. • Smoke control devices correctly operating • Ductwork to be accessible for routine inspection and cleaning internally. |
| <p>Electrical Power and other Cabled Systems</p> <p>Including:</p> <ul style="list-style-type: none"> • information technology • lightning protection | <ul style="list-style-type: none"> • All installations to comply with and operate within the requirements of the FFP Warranty. • Audio systems must be audible and comprehensible. • Weatherproof where appropriate. • Function as intended without undue noise or vibration. • Wiring, fittings, fixtures, controls and safety devices must be properly housed and fastened |

| Element | Requirement |
|--|---|
| <ul style="list-style-type: none"> • communication systems • safety systems • alarm systems • lighting systems | <p>securely to their intended point of anchorage and labelled.</p> <ul style="list-style-type: none"> • Lightning down conductor should be complete, isolated and comply with AS1768. • Electro medical installations comply with AS3003. • All relevant interfaces to BMS/security technology correctly operating. • Lighting fittings must be operable. • Lighting control systems must operate as intended. |
| <p>Public Health and other Drainage Systems including:</p> <ul style="list-style-type: none"> • trade waste system and sewer system • all sanitary ware • specialist traps and interceptors • stormwater system (including swales) • sewer mining • wastewater treatment system(s) • rainwater harvesting system(s) • sump pumps • tunnel drainage | <ul style="list-style-type: none"> • Must function as intended, without undue noise and vibration. • Provide a safe and comfortable environment. • All pipework and fittings fastened securely to their intended points of anchorage. • There must be no leakage of waste and/or foul water and/or rain water. • Filtration and treatment plants maintained and output quality tested. • All traps and the like operating as intended (including emptying and cleaning) • Pumps must be accessible without impacting Train Operations. |
| <p>Fire Fighting Equipment Including:</p> <ul style="list-style-type: none"> • Sprinklers • Pressurisation systems • Fire pumps | <ul style="list-style-type: none"> • Fire sprinklers, and other firefighting equipment shall be maintained and tested in accordance with all applicable Standards, including the Building Code of Australia and AS1851 series. • All smoke management systems be maintained and tested in accordance with all applicable Standards including the BCA and the AS1851 series. • Sound, secure and fixed to their intended point of anchorage. • Fully operational within manufacturer's recommendations. |

| Element | Requirement |
|--|---|
| | <ul style="list-style-type: none"> • Hydrants, sprinklers and hoses must be at correct operating pressure and capacity. • Pipework must be free from corrosion, leaks and drips. • Be of suitable type and quantity for the hazards present within their vicinity. |
| <p>Fire Safety Systems</p> <p>Including:</p> <ul style="list-style-type: none"> • Detection systems • Smoke management systems • Emergency and standby power systems • Automatic elevator recall systems (if applicable) • Ventilation systems • Emergency Lighting | <ul style="list-style-type: none"> • All installations must comply with and operate within relevant Standards. • Function as intended. • Interface with the relevant systems including all relevant interfaces to the BMS and security management systems. • Devices operate effectively to prevent avoidable loss of life. • Comply with the relevant building regulations and Laws. |
| <p>Vertical Transportation</p> <p>Including:</p> <ul style="list-style-type: none"> • lifts • escalators • travelators | <ul style="list-style-type: none"> • Must function as intended in compliance with the FFP Warranty, without undue noise or vibration. • Must comply with AS1735. • Must have a fully functioning control panel and phone. • No broken comb plate teeth. • Note: 2 adjacent broken teeth or 4 broken teeth across whole width of escalator or travelator will result in the escalator or travelator being removed from service. |
| <p>Clocks</p> | <ul style="list-style-type: none"> • Must, at all times, be accurate to within 1 minute of local time. |
| <p>Audio Visual Equipment</p> | <ul style="list-style-type: none"> • Must function as intended without undue noise |

| Element | Requirement |
|---|--|
| <p>Including:</p> <ul style="list-style-type: none"> • passenger information display | <ul style="list-style-type: none"> • Visual systems must be visible and readable. • Audio systems must be audible and comprehensible. • Must be free of excessive dust and dirt (particularly ceiling hung projectors). • All installations to comply with and operate within the requirements of the FFP Warranty. • Weatherproof where appropriate. • Wiring, fittings, fixtures, controls and safety devices must be properly housed and fastened securely to their intended point of anchorage and labelled. |

Appendix J Planned Periodic Cleaning

The following table lists the minimum frequencies for planned periodic cleaning activities. It does not negate the need for Project Co to meet the Cleaning Services Standards at all times, especially in high profile, high traffic and public areas of the Cleaning Areas.

| Element/Service | Applicable Area | Minimum Frequency |
|---|--|---|
| Station Deep Clean: high pressure cleaning of all surfaces, replacement of bin lids where dust and grime cannot be removed, replacement of plants where perished, removal of weeds and maintenance of vegetation within the Station Precinct. | All public areas | 2 monthly |
| Soft floors (hot water extraction) | Cleaning Areas:- all areas | 12 monthly |
| Soft furnishings (hot water extraction) | Cleaning Areas:- all areas | 12 monthly |
| Light fittings | Cleaning Areas:- all areas | 6 monthly |
| High Windows: all surfaces of glass, including ledges, fly screens and fixed mesh screens (internal and external) above 2 metres | Internal: Maintained Assets/Stations ad Above Ground Tunnel Structures:- all areas | 6 Monthly |
| | External: all external windows of the Maintained Assets including Above Ground Tunnel Structures | 12 Monthly |
| Power scrubbing of hard floors (in areas where this is not undertaken daily) | All public areas | Weekly |
| Building façade | Cleaning Areas:- all areas | 12 monthly (or in accordance with any warranty) |
| Roof areas including gutters | Cleaning Areas:- all areas (including Above Ground Tunnel Structures) | 12 monthly |
| High Dusting: remove dust, cobwebs, insects and the like from all elements above 2 metres | Cleaning Areas:- all areas | Monthly |
| External Surfaces - Supply, return and exhaust ductwork, external vents, louvres and registers and any visible plant housing coils and fans | Cleaning Areas:- all areas | 12 monthly |
| Plant rooms and the like | Cleaning Areas:- all areas | 12 monthly |

Project Co must include any elements not covered above but which are part of their design solution which requires periodic cleaning or where the manufacturers specifications/warranty details the requirement for a specialist periodic clean.

Appendix K Cleaning Areas and Cleaning Access Times – Estimated Only

K.1. Maintained Assets/Stations/Above Ground Tunnel Structures

| Cleaning Area | Cleaning Access Times* |
|------------------------------|---|
| Passenger Areas | Mon – Sun outside of Operating Hours |
| BOH (High) Areas | Mon – Fri 07:00 to 18:00 (Some key operational areas may be required to be cleaned during Off-Peak periods as instructed by the Franchisee (in accordance with the FCA)) |
| BOH / Plant Room (Low) Areas | Mon – Fri 07:00 to 18:00 |

* Areas with a Cleaning Access Time Mon-Sun are required to be cleaned on Public Holidays. All other areas do not require Cleaning Services on Public Holidays.

* Cleaning Access Times are only applicable for Overnight Cleans (cleaning activities which require the station to be free of passengers), this does not limit the requirement to undertake normal schedules daily cleaning activities (e.g. empty waste receptacles, keeping the stations free of waste and undertaking unscheduled cleaning requests).

Appendix L Cleaning Service Standards

- (a) Each element described in this appendix should be cleaned to the standard required by this appendix, irrespective of where in the Cleaning Areas the particular element is located.
- (b) In this appendix, the word "free" is a reference to reasonably free and is not always an absolute standard but is to be interpreted by taking into account the use and location of the specific element it applies to.
- (c) Project Co is responsible for determining the frequency of cleaning required to meet the following performance standards unless noted otherwise. Noting that a higher frequency of cleaning is required in toilets and high profile public areas of the Stations.

L.1. Maintained Assets (including Stations and Above Ground Tunnel Structures)

| Element | Standard |
|---|--|
| External Features, Fire exits and stair wells, Above Ground Tunnel Structures (where applicable) | <ul style="list-style-type: none"> • Landings, ramps, stairwells, fire exits, steps, entrances, porches, patios, balconies, eaves, external light fittings are free of spillage, bodily fluids, dust, grit, dirt, leaves, cobwebs, rubbish, unauthorised stickers, graffiti, gum, cigarette butts and bird excreta. • Light covers and diffusers are free of dust, grit, insects, lint and cobwebs. • Handrails are clean and free of stains. • Garden furniture (where applicable) is clean and operational. |
| Walls, signage, skirtings and ceilings | <ul style="list-style-type: none"> • Internal and external walls, signage and ceilings are free of spillage, bodily fluids, dust, grit, dirt, cobwebs, rubbish, unauthorised stickers, graffiti, gum, cigarette butts and bird excreta. • Walls and ceilings are free of marks caused by furniture, equipment or Occupants. • Light switches are free of fingerprints, scuffs and any other marks. • Light covers and diffusers are free of dust, grit, insects, lint and cobwebs. • Skylights are free of dust, grit, insects, lint and cobwebs. • Polished surfaces are of a uniform lustre. |
| Windows and glass surfaces | <ul style="list-style-type: none"> • External and internal surfaces of glass are clear of all streaks, spots and marks, including fingerprints, gum, unauthorised stickers, and smudges. • Window frames, tracks, fly screens, fixed mesh screens and ledges are clear and free of dust and grit. • Windows are free of all marks and spots. |
| Doors | <ul style="list-style-type: none"> • Internal and external doors and doorframes are free of spillage, bodily fluids, dust, grit, dirt, cobwebs, |

| Element | Standard |
|---------------------------------|---|
| | <p>unauthorised stickers, graffiti, gum, cigarette butts and bird excreta.</p> <ul style="list-style-type: none"> • Doors and doorframes are free of marks caused by furniture, equipment or Occupants. • Air vents, relief grilles and other ventilation outlets are kept unblocked and free of dust, grit, soil, film, cobwebs, scuffs and any other marks. • Door tracks and door jambs are free of grit and other debris. • Polished surfaces are of a uniform lustre. |
| Hard Floors | <ul style="list-style-type: none"> • The floor is free of spillage, bodily fluids, dust, grit, dirt, leaves, cobwebs, rubbish, unauthorised stickers, graffiti, gum, cigarette butts and bird excreta. • The floor is free of polish or other build-up at the edges and corners or in areas of high traffic. • The floor is free of spots, scuffs or scratches on traffic lanes, around furniture and at pivot points. • Inaccessible areas (edges, corners and around furniture) are free of dust, grit, lint and spots. • Polished or buffed floors are of a uniform lustre (only using non slip materials if sealing is required). • Appropriate signage and precautions are taken regarding pedestrian safety of newly cleaned or wet floors. |
| Soft Floors | <ul style="list-style-type: none"> • The floor is free of dust, grit, litter, marks and spots, gum water or other liquids. • The floor is free of stains, spots, scuffs or scratches on traffic lanes, around furniture and at pivot points. • Inaccessible areas (edges, corners and around furniture) are free of dust, grit, lint and spots. • Where carpets are vacuumed/cleaned, this is done in accordance with section 5 of Australian Standard No. 3733. |
| Ducts, grilles and vents | <ul style="list-style-type: none"> • All external surfaces of ventilation outlets are kept unblocked and free of dust, grit, soil, film, cobwebs, scuffs and any other marks. • All external surfaces of ventilation outlets are kept clear and uncluttered following cleaning. (The surrounding ceiling area is to be cleaned along with the vents where the dust sticks and “feathers” out from the vent.) |

L.2. Fixtures

| Element | Standard |
|--|--|
| Electrical fixtures and appliances | <ul style="list-style-type: none"> • Electrical fixtures and appliances are free of grease, dirt, dust, encrustations, marks, stains and cobwebs. • Electrical fixtures and appliances are kept free from signs of use or non-use. • Motor vents fans, etc. are clean and free of dust and lint. • Drinking fountains are clean and free of stains, marks, graffiti and mineral build-up. |
| Furnishings and fixtures., passenger seating/furniture, lifts, escalators and customer touch points | <ul style="list-style-type: none"> • Hard surface furniture/seating is free of spots, soil, film, dust, fingerprints, litter, bodily fluids, graffiti, unauthorised stickers and spillages. • Soft surface furniture is free from stains, soil, film and dust. • Furniture legs, wheels and castors are free from mop strings, soil, film, dust and cobwebs. • Inaccessible areas (edges, corners, folds and crevices) are free of dust, grit, lint and spots. • All high surfaces are free from dust and cobwebs. • Curtains, blinds and drapes are free from stains, dust, cobwebs, lint and signs of use or non-use. • Furniture has no odour that is distasteful or unpleasant. • Shelves, bench tops, cupboards and wardrobes/lockers are clean inside and out and free of dust and litter or stains. • Waste receptacles /rubbish bins (including ATM bins) or containers are not overflowing, not heavily soiled, not foul smelling and mechanically intact. • Fire extinguishers and fire alarms are free of dust, grit, dirt and cobwebs, graffiti, unauthorised stickers etc. • Customer touch points (e.g. customer help points, hard rails,) are wiped daily with an appropriate disinfectant. (the disinfectant is needs to be approved by the State and the Franchisee and must not damage the touch point) |
| Kitchenettes / staff rooms | <ul style="list-style-type: none"> • Fixtures, surfaces (internally & externally) and appliances are free of grease, dirt, dust, encrustations, marks, stains and cobwebs. • Hygiene standards are satisfied where the fixture or appliance is used in food preparation. • Range hoods (interior and exterior) and exhaust filters are free of grease and dirt on inner and outer surfaces. • Electrical and cooking fixtures and appliances are kept free from signs of use or non-use (inside and out). |

| Element | Standard |
|--------------------------------------|--|
| | <ul style="list-style-type: none"> • Motor vents, air grilles, etc. are clean and free of dust and lint. |
| Toilets and bathroom fixtures | <ul style="list-style-type: none"> • Porcelain and plastic surfaces are free from smudges, smears, body fats & fluids, hair, soap build-up, graffiti, unauthorised stickers and mineral deposits. • Metal surfaces, shower screens and mirrors are free from streaks, soil, hair, smudges, soap build-up, graffiti, unauthorised stickers and oxide deposits. • Wall tiles and wall fixtures (including soap and cream dispensers, hand rails and towel holders) are free of dust, grit, smudges/streaks, hair, mould, graffiti, unauthorised stickers, soap build-up and mineral deposits. • Shower curtains and bath mats are free from stains, smudges, smears, odours, hair, mould and body fats. • Plumbing fixtures are free of smudges, dust, soap build-up and mineral deposits. • Bathroom fixtures are free from odours which are distasteful or unpleasant. • Polished surfaces are of a uniform lustre. • Sanitary disposal units, sharp containers and nappy bins are clean and functional. • Personal Cleaning Consumable items are in sufficient supply. • Walls under and around electric hand dryers and paper towel dispensers are to be free of splash marks and water stains. • Floors under soap dispensers (Including all surfaces of dispensers) are to be cleared of soap drips and associated build-ups in the corners. • Paper towel dispensers and electric hand dryers are clean and functional. |

L.3. Environment

| Element | Standard |
|----------------------------------|---|
| General tidiness | <ul style="list-style-type: none"> • The area appears tidy and uncluttered. • Floor space is clear, only occupied by furniture and fittings designed to sit on the floor. • Passenger Areas, fire access and exit doors are left clear and unhindered. |
| Odour Control (all areas) | <ul style="list-style-type: none"> • There is no odour that is distasteful or unpleasant. • Room deodorisers in toilets are clean and functional. |

L.4. Other Special Cleaning Requirements

| Requirement | Standard |
|---|--|
| Back of House Areas | <ul style="list-style-type: none"> • All elements in the affected area have been cleaned, disinfected/sanitised and deodorised. |
| Specialist Equipment PSD (station side subject to section 6.2 h)) passenger information displays ticketing machines; automatic barriers; public address speakers; advertising signs; vending machines; signage; ATM machines, and the like | <ul style="list-style-type: none"> • Equipment is free from soil, smudges, dust, fingerprints, grease and spillages. • Equipment is free of tapes/plastic, etc. that may compromise cleaning. • Equipment has no odour that is distasteful or unpleasant. |

Commercial Development Agreement

Date ►

Between the parties

State **Minister for Public Transport on behalf of the Crown in right of the State of Victoria**

Developer **The unincorporated joint venture comprising**
John Holland Nth OSD Developer Pty Ltd ACN 623 274 564
of Level 5, 380 St Kilda Rd, Melbourne VIC 3004
and
Scape Little Latrobe Operator Pty Ltd ACN 607 697 183
of Tenancy 3A Swanston Square, 551 Swanston Street, Carlton VIC 3053

Guarantor **John Holland Property Developments Pty Ltd ACN 617 899 297**
of Level 5, 380 St Kilda Rd, Melbourne VIC 3004

Recitals

- 1 Associated with the 'Tunnel and Stations PPP' component of the Metro Tunnel and for the purpose of an approved project in accordance with the Major Transport Projects Facilitation Act 2009 (Vic), the State agrees for the Developer to undertake the Oversight Development.
- 2 The State and the Developer wish to enter into this Agreement and, as applicable, the other Oversight Development Agreements, to record the terms on which the Oversight Development will be developed and implemented by the Developer.
- 3 The Guarantor has agreed to guarantee the obligations of the Developer under this Agreement.

The parties agree as follows:

1 Definitions and interpretation

1.1 Definitions

The meanings of the terms used in this agreement are set out below.

| Term | Meaning |
|---|--|
| Aboriginal Cultural Heritage | has the meaning given in the <i>Aboriginal Heritage Act 2006</i> (Vic). |
| Absolute Occupation | occupation of the Freehold Land in a manner which requires suspending the movement of trains over the whole or part of any railway running line over the Station Land. |
| Access Protocols | has the meaning given to that term in the Interface Agreement. |
| Adjustment Note | has the meaning given by the GST Law. |
| Advertising Restrictions | the restrictions set out in Attachment 4. |
| Agreement | this agreement including any attachments. |
| Agreement Date | the date of this Agreement. |
| Annualised Employee Equivalent (AEE) | the number of hours that is calculated by dividing the total number of ordinary working hours that an employee worked and was paid for over the reporting period by the total number of full-time ordinary working hours paid per annum. |
| Applicable Cure Period | has the meaning given to it in clause 34.2(c)(2). |
| Approval | any licence, permit, authorisation, endorsement of plan, consent, assessment, approval, determination, certificate, accreditation, registration, clearance, permission or the like (as amended or substituted from time to time) which is issued by or obtained from or is required to be issued or obtained from any Authority or any other person or in accordance with any Law, which must be |

| Term | Meaning |
|--------------------------------------|--|
| | obtained or satisfied in connection with the Oversight Development. |
| Approved Cure Plan | has the meaning given to it in clause 34.2(c). |
| Approved Design Documentation | Design Documentation approved in accordance with clause 15. |
| Artefacts | any fossils, bones, artefacts, coins, articles of antiquity, valuable materials, structures or other remains, or things or structures of a scientific, geological, historical, cultural, heritage, archaeological or Aboriginal nature or interest or things otherwise of value, including any items of cultural heritage significance under the <i>Aboriginal Heritage Act 2006</i> (Vic). |
| Associate | <p>in relation to a person, any officer, employee, agent, consultant or adviser of that party and:</p> <p>1 in the case of the State means:</p> <ul style="list-style-type: none">• the State Representative;• MMRA;• any Authority (other than the Commonwealth of Australia or its Associates); and• any officer, employee, agent, contractor, consultant or adviser of the State, the State Representative, MMRA or Authority, <p>each acting in connection with the Oversight Development, but does not include the Developer and its Associates, Project Co and its Associates, the Independent Reviewer, the Train Franchisee, or a contractor or alliance delivering a work package for the Project (including the State in its capacity of 'participant' in the 'Rail Systems Alliance' or the 'Rail Infrastructure Alliance' for the Project);</p> <p>2 in the case of the Developer includes:</p> <ul style="list-style-type: none">• any Subcontractors; and• any Related Body Corporate, officer, employee, agent, contractor, consultant or adviser of the Developer and Subcontractors, <p>each acting in connection with the Oversight Development, but excludes:</p> <ul style="list-style-type: none">• the State and its Associates;• the Independent Reviewer; and• Project Co and the Project Co Associates (other than to the extent that such Associates are engaged by the Developer for the purposes of the design, construction, operation or |

| Term | Meaning |
|-------------------------------|---|
| | maintenance of the Oversight Development Works). |
| Authorised Person | any person authorised by the State to access the Licenced Area or the Freehold Land (as applicable) including a contractor or alliance delivering a work package for the Project. |
| Authority | any government or any governmental, semi-governmental or local government authority, local council, administrative or judicial body or tribunal, department, commission, public authority, agency, minister, statutory corporation or instrumentality and any person having jurisdiction over any part of the Oversight Development Works or the Oversight Development. |
| Bank Bill | a bill of exchange (as that term is defined in the <i>Bills of Exchange Act 1909</i> (Cth)) which has been accepted by any bank authorised under a law of the Commonwealth of any state to carry on banking business. |
| Bank Bill Rate | for a period: <ol style="list-style-type: none">1 the rate, expressed as a yield per cent per annum (rounded upwards to two decimal places) quoted as the average bid rate on the Reuters Monitor System page 'BBSY' (or any page which replaces that page) at about 10.10 am (Melbourne time) on the first day of that period, for Bank Bills having a tenor in months which is closest to that period; or2 if there is a manifest error in the calculation of that average rate or no average rate is published for Bank Bills of that tenor in accordance with paragraph 1 the rate specified by the complying party reasonably and in good faith having regard to the rates otherwise bid for Bank Bills having a tenor as described above at or around that time. |
| Best D&C Practices | design, manufacturing, construction, installation, commissioning and repair practices which are carried out: <ol style="list-style-type: none">1 with the skill, care and diligence which may reasonably be expected of a skilled professional carrying out design, manufacturing, construction, installation, commissioning and repair work similar to the Oversight Development Works;2 with due expedition and without delay;3 in a manner which is safe to all people and the Environment;4 with the intent of ensuring reliable long term and safe operation of the Oversight Development;5 by trained and experienced personnel utilising high quality and safe proper equipment, tools, procedures and industry standards; |

| Term | Meaning |
|--------------------------------|---|
| | <p>6 with an adequate number of personnel, materials, resources and supplies;</p> <p>7 using new and high quality fixtures, fittings, finishes and materials which are:</p> <ul style="list-style-type: none">• free from defects; and• appropriate for the environment in which they are intended to be used under normal conditions and reasonably anticipated abnormal conditions or which would be reasonably anticipated by a skilled professional carrying out design, manufacturing, construction, installation, commissioning and repair work similar to the D&C Activities. |
| Best Industry Practices | industry practices appropriate to the construction and development of mixed commercial, residential and retail developments, as would be reasonably expected of a skilled and experienced Australian operator engaged in similar developments to the Oversight Development under the same or similar circumstances and conditions |
| Builder | the builder appointed by the Developer to construct the Oversight Development. |
| Builder's Side Deed | the side deed between the State, the Developer and the Builder substantially in the form contained in Attachment 10. |
| Building Contract | the building contract between the Developer and the Builder in relation to the Oversight Development Works entered into as contemplated by this Agreement and approved by the State Representative. |
| Business Day | a day that is not a Saturday, Sunday or public holiday in Melbourne, Victoria pursuant to the <i>Public Holidays Act 1994</i> (Vic). |
| CBD North | the site located at: <ol style="list-style-type: none">1 377-391 Swanston Street2 200 La Trobe Street3 212-222 La Trobe4 17-27 Little La Trobe5 204-206 La Trobe6 208-210 La Trobe, Melbourne |

| Term | Meaning |
|--|---|
| CBD North OSD Acceptance | <p>occurs on the earlier of:</p> <ol style="list-style-type: none">1 the date the Developer issues a notice under clause 9.1(d)(i) of the Interface Agreement accepting Completion (PPP); or2 if a party to the Interface Agreement refers whether Completion (PPP) has been achieved for resolution under clause 17 of the Interface Agreement, the later of:<ul style="list-style-type: none">– the date that it is determined that Completion (PPP) has been or was achieved; and– the date which is 3 months after the date that a party to the Interface Agreement referred whether Completion (PPP) has been achieved for resolution under clause 17 of the Interface Agreement. |
| Certificate of Final Completion | <p>a certificate issued by the Developer in accordance with clause 25.3 certifying to the State that Final Completion has been achieved.</p> |
| Cessation Date | <p>has the meaning set out in clause 36.2.</p> |
| Change in Law | <p>any one or more of the following:</p> <ol style="list-style-type: none">1 a change in, or repeal of, an existing Law;2 the enactment or judicial determination of a new Law; or3 a change in the way a Law is applied or interpreted as a result of a decision of a court of competent jurisdiction, <p>but does not include:</p> <ol style="list-style-type: none">4 a change in the way a Law is applied or interpreted due to:<ul style="list-style-type: none">– the failure of the Developer or any of its Associates to comply with a Law or Approval; or– an illegal act or omission of the Developer or any of its Associates;5 any new Approval or change in an Approval resulting from:<ul style="list-style-type: none">– an act or omission of the Developer or any of its Associates; or– a change to the design or delivery methodology in relation to the Oversight Development Works;6 any new Law or change in existing Law relating to Taxes including the <i>Income Tax Assessment Act 1936</i> (Cth), the <i>Income Tax Assessment Act 1997</i> (Cth) and the GST Law;7 any new Law or change in any existing Law which was not in force at the date of this Agreement but which:<ul style="list-style-type: none">– had been published in the Government Gazette by way of bill, draft bill or draft statutory instrument or otherwise |

| Term | Meaning |
|-------------------------------------|---|
| | <p>specifically referred to prior to the date of this Agreement;</p> <ul style="list-style-type: none">– a party exercising Best Industry Practices would have reasonably foreseen or anticipated prior to the date of this Agreement ; or– is substantially the same as a Law in force prior to the date of this Agreement; or <p>8 any new Law or change in existing Law relating to Part IVA (Proportionate Liability) of the <i>Wrongs Act 1958</i> (Vic) or its application which limits or eliminates the impact of that Part.</p> |
| Claim | <p>includes any claim, action, demand or suit or proceeding (including by way of contribution or indemnity) made:</p> <ol style="list-style-type: none">1 in connection with the Oversight Development Agreements or the Oversight Development; or2 at Law or for specific performance, restitution, payment of money (including damages). |
| Commencement Date | <p>the date on which the last of the conditions precedent in clause 4.2 to be satisfied or waived is satisfied or waived.</p> |
| Commonwealth Building Code | <p>each of:</p> <ol style="list-style-type: none">1 the Building Code 2013 (Cth);2 the 'Supporting Guidelines' (April 2016);3 the Code for the Tendering and Performance of Building Work 2016 (Cth); and4 any other documents issued under section 34 of the Building and Construction <i>Industry (Improving Productivity) Act 2016</i> (Cth) by legislative instrument. |
| Concept Design Documentation | <p>all drawings, plans, specifications and other information required for the Oversight Development Works as contained in Attachment 8 and as subsequently amended in accordance with this Agreement.</p> |
| Confidential Information | <p>the:</p> <ol style="list-style-type: none">1 Oversight Development Agreements;2 Development Information;3 information provided by:<ul style="list-style-type: none">• the State or any of its Associates to the Developer or any of its Associates; or• the Developer or any of its Associates to the State or any of its Associates, |

| Term | Meaning |
|---|---|
| | <p>4 in accordance with this Agreement whether prior to or after the date of this Agreement;</p> <p>5 the Developer Material; and</p> <p>6 other information in connection with the D&C Activities which the Developer is required to keep confidential in complying with any Privacy Principles or any applicable Law.</p> |
| Conditions Precedent Deadline Date | the date which is 30 days after the date of the Agreement Date. |
| Consideration | has the meaning given by the GST Law. |
| Construction Commencement | has the meaning given to that term in clause 10. |
| Construction Commencement Deadline | [not disclosed] after CBD North OSD Acceptance, as extended pursuant to clause 21.3(a). |
| Construction Licence | any licence granted in accordance with clause 11.1 in connection with the Oversight Development Works, in the form set out in Attachment 2. |
| Construction Site | the area to be used for construction within the Site. |
| Contamination | a condition of land, air, soil, water (including groundwater) resulting from past or present Pollution and which shares any of the characteristics of Pollution. |
| Contamination Notice | a notice, order or direction given, or purporting to have been given, under the <i>Environment Protection Act 1970</i> (Vic) or any other Law which requires a person to Remediate any Contamination in, on or emanating from the Construction Site or any other land within the vicinity of the Construction Site used or occupied by the Developer or its Associates for the Project. |
| Contract of Sale | the contract of sale for the Freehold Land between the State (or the Secretary of Department of Economic Development, Jobs, Transport and Resources) and the Purchaser to be entered as contemplated by this Agreement, a form of which is contained in Attachment 3. |

| Term | Meaning |
|--|---|
| Contract Price | the purchase price payable under the Contract of Sale and, for the purpose of clause 35, includes the Development Fee. |
| Corporations Act | the <i>Corporations Act 2001</i> (Cth). |
| Cultural Heritage Management Plan | a cultural heritage management plan to be prepared and approved under the Aboriginal Heritage Act 2006 (Vic) for the D&C Activities. |
| D&C Activities | all things which the Developer is, or may be, required to carry out or do: <ol style="list-style-type: none">1 in connection with the Oversight Development Works; or2 to otherwise comply with its obligations under the Oversight Development Agreements prior to Final Completion. |
| Default | <ol style="list-style-type: none">1 a material breach by the Developer of, or other material failure by the Developer to comply with, an obligation of the Developer under this Agreement or any other Oversight Development Agreement;2 a representation, warranty or statement made or given by the Developer in this Agreement or any other Oversight Development Agreement being false or misleading in any material particular when made or given; or3 a default by the Developer in a persistent or repeated fashion in the due observance and performance of any of its obligations under this Agreement or any other Oversight Development Agreement. |
| Default Notice | has the meaning given in clause 34.1. |
| Default Rate | for a period, the Interest Rate for that period plus a margin of [not disclosed] per annum. |
| Defects | any omission or defect in the Oversight Development Works. |
| Defects Liability Period | the period commencing on the date the Oversight Development Works reach or are deemed to have reached Final Completion under this Agreement and ending 12 months after that date, and if during that period the Developer rectifies Defects of State Concern, the Defects Liability Period for the rectified Defects of State Concern will recommence on the date of completion of the work required to give effect to the rectification and end 12 months after that date provided that the maximum Defects Liability Period will not be longer than 24 months after the date Final Completion has |

| Term | Meaning |
|---------------------------------------|---|
| | occurred under this Agreement. |
| Defects of State Concern | any Defect in a part of the Oversight Development Works which relates to the façade treatments, public spaces or street frontages or in any way affects the Interfaces. |
| Delay Notice | has the meaning set out in clause 21.2(a). |
| Design Documentation | all drawings, plans, specifications and other information required for the Oversight Development Works including all documents submitted as part of any application for the Planning Scheme Amendment, including the Concept Design Documentation and Final Design Documentation, as the context requires. |
| Destruction Termination Notice | has the meaning given in clause 40.2(c). |
| Developer D&C Workforce | the workforce employed or otherwise engaged by the Developer or any Subcontractor undertaking all or any part of the D&C Activities in Australia or New Zealand and includes persons performing a head office, corporate or governance role to the extent such role is in connection with the Oversight Development, provided that to the extent a person undertakes multiple roles in connection with the Oversight Development, that person may not be counted more than once. |
| Developer Material | each of: <ol style="list-style-type: none">1 the Design Documentation;2 method of working and materials used in, or intended to be used in the construction and completion of the Oversight Development Works;3 all other documentation, information (including data bases and drafts), models, systems and technology in which Intellectual Property Rights are capable of subsisting which the Developer or any of its Associates prepare or use in carrying out the D&C Activities, but does not include software tools which are:<ul style="list-style-type: none">• used internally the Developer or any of its Associates to create, but which are not incorporated into, the materials described in paragraphs 1 to 3 of this definition; or• generally commercially available; and4 any other deliverables required to be delivered by the Developer or any of its Associates to the State in accordance with the Oversight Development Agreements, |

| Term | Meaning |
|---|---|
| Developer Unacceptable Condition | each of: <ol style="list-style-type: none">1 a condition of an Authority to the extent it is imposed in a Planning Permission in order to achieve the objectives and design outcomes set out in the Metro Tunnel Project Urban Context Report, CBD North Over Site Development (Jones and Whitehead)(October 2017); or2 the requirements imposed under or arising as a consequence of the difference between the Incorporated Document and the Incorporated Document as Submitted; or3 any diminution in entitlements under the Incorporated Document when compared with the Incorporated Document as Submitted. |
| Development Fee | the First Instalment Development Fee and the Second Instalment Development Fee. |
| Development Information | all documents and information provided by the State and its Associates to the Developer in connection with the Oversight Development: <ol style="list-style-type: none">1 prior to the date of this Agreement, which is not incorporated into this Agreement;2 after the date of this Agreement, which the State is not required by this Agreement to provide to the Developer; and3 without limiting paragraph 1, any report provided by the State or any of the State's Associates in relation to any site information. |
| Development Intellectual Property Rights | all Intellectual Property Rights in: <ol style="list-style-type: none">1 any Developer Material, including any such Intellectual Property Rights:<ul style="list-style-type: none">• existing at the date of this Agreement; or• which come into existence after the date of this Agreement, including those derived from Intellectual Property Rights existing at the date of this Agreement, and2 any information, ideas, documents, equipment or material of any kind and however embodied, which are supplied, brought to or used by or on behalf of the Developer in undertaking the Development (including each method of working used by or on behalf of the Developer in carrying out the D&C Activities) or which are made available to the State in accordance with this Agreement by or on behalf of the Developer, whether or not forming part of the Developer Material and whether or not owned by a third party. |
| Development Plan | a development plan required under the Incorporated Document as amended from time to time. |

| Term | Meaning |
|------------------------------|--|
| Disclosed Information | <p>all information of whatever nature which is obtained by or on behalf of the Developer or any of its Associates from the State, any of the State's Associates or any Authority relating in any way to the Oversight Development including:</p> <ol style="list-style-type: none"> 1 the RFP and all documentation issued in connection with the Oversight Development, including, without limitation, any report prepared by a third party on the instructions of the State and the contents of the data room operated by, or on behalf of, the State during the tendering process; 2 all material disclosed in presentations by or on behalf of the State or any of the State's Associates in connection with the Oversight Development; 3 all discussions and negotiations between the State and the State's Associates on the one hand and the Developer and its Associates on the other hand relating to the Oversight Development or the Oversight Development Agreements to which the State is a party; and 4 any other information disclosed to, or obtained by or on behalf of, the Developer or any of its Associates from the State or any of the State's Associates or which is otherwise acquired by or on behalf of, or comes to the knowledge of, the Developer or any of its Associates, whether the information is in oral, visual, electronic or written form or is recorded in any other medium. |
| Dispute | <p>any dispute between the State and the Developer arising in connection with this Agreement or the D&C Activities (including questions concerning this Agreement's existence, meaning or validity).</p> |
| Draft Cure Plan | <p>has the meaning given in clause 34.2(a).</p> |
| Easement Plan | <p>an easement plan to be agreed under clause 15.4.</p> |
| Entity | <p>has the meaning given in section 64A of the Corporations Act, but is also deemed to include a joint venture within the meaning of Australian Accounting Standard 131 (AASB 131).</p> |
| Environment | <p>the physical factors of the surroundings of humans and other life forms, including the land, soil, plants, habitat, waters, atmosphere, climate, sounds, odours, tastes, biodiversity and the social and aesthetic values of landscape.</p> |
| Environmental Hazard | <p>a state of danger to human beings or the Environment whether imminent or otherwise resulting from the location, storage, handling or release of any substance having toxic, corrosive, flammable,</p> |

| Term | Meaning |
|-----------------------------------|--|
| | explosive, infectious or otherwise dangerous characteristics. |
| Environmental Law | in relation to the Site any Law relating to the Environment including any law relating to land use, planning, pollution of air, water, soil or groundwater, chemicals, waste, the use of transport, the storage and handling of dangerous goods, the health or safety of any person, or any other matters relating to but not limited to the protection of the Environment, health or property. |
| Environmental Requirements | all Laws relating to the Environment and the conditions and requirements of any Approval relating to the Environment together with all environmental safeguards and measures necessary to avoid, reduce, minimise or mitigate the environmental impacts of the D&C Activities. |
| EPA | the Environment Protection Authority constituted under the <i>Environment Protection Act 1970 (Vic)</i> . |
| Extension Event | <ol style="list-style-type: none">1 an act or omission of the State in its capacity as counterparty to this Agreement or a breach by the State of the Oversight Development Agreements (but does not in any circumstances include any act or omission of the State which is otherwise authorised or permitted by this Agreement);2 a Force Majeure Event;3 a State Initiated Modification or a State Initiated OSD Variation directed by the State Representative under clause 16 except where the need for the State Initiated OSD Variation was a result of a breach of obligations by the Developer under this Agreement;4 any requirement (including under the Interface Agreement) or a direction by the State for the Developer to cease or delay the Oversight Development Works or modify the manner in which the Oversight Development Works are being carried out for the purpose of prioritising, expediting or minimising any delay to the Project Activities (including rectifying any defect in any works undertaken as part of the Project Activities); or5 a Modification under the terms of the Interface Agreement or any alteration to the Development Works required as a result of a change to the PPP Works for OSD (as defined in the Interface Agreement) required under clause 8.1(b) or 9.5 of the Interface Agreement; or6 a Change in Law which specifically discriminates against:<ul style="list-style-type: none">– the Oversight Development; or– the Station so that that discrimination has a consequential impact on the Oversight Development,or which applies to the Oversight Development but does not |

| Term | Meaning |
|-----------------------------------|---|
| | apply generally to commercial or retail premises in the Melbourne CBD; |
| | 7 a delay to the Project Activities (under the Project Agreement) in respect of which Project Co is granted an extension of time or is granted relief under clause 31 of the Project Agreement; or |
| | 8 Total Financial Market Disruption. |
| External Finance | the finance to be secured by the Developer from the External Financier to enable the Developer to comply with its obligations under this Agreement. |
| External Financier | the financial institution from whom the Developer secures the External Finance. |
| Fair Market Value | – [not disclosed]. |
| Final Completion | the completion of the Oversight Development Works in accordance with clause 25.1. |
| Final Completion Date | the date specified as the date on which Final Completion was achieved as set out in the Certificate of Final Completion. |
| Final Design Documentation | the design documentation for the Oversight Development Works based on the Concept Design Documentation and developed in accordance with the requirements in clause 15, including but not limited to the development plans required under the Incorporated Document and any subsequent design documentation. |
| Financial Close | the date on which all the Conditions Precedent are satisfied or waived in accordance with clause 4.2. |
| Financial Close Date | the date on which Financial Close is achieved. |
| Financier Direct Deed | the deed of that name to be entered into between the State, the Developer and the Developer's and the Purchaser's financier on terms consistent with the Financier Principles or such other terms as are required by the Developer's financier where the State agrees to that alternative form (and the State may not unreasonably withhold or delay consent to that alternative form). |

| Term | Meaning |
|---|---|
| Financier Principles | the principles outlined in Attachment 5. |
| FIRB Approval | <ol style="list-style-type: none">1 written advice from or on behalf of the Treasurer of the Commonwealth of Australia that the Commonwealth Government does not object to the Oversight Development;2 written approval from the Foreign Investment Review Board under the Foreign Acquisitions and Takeovers Act 1975 (Cth) or any business policy of the Commonwealth Government allowing the Developer to enter into this Agreement; or3 the failure by the Treasurer of the Commonwealth of Australia to make an order under Part 3 of the Foreign Acquisitions and Takeovers Act 1975 (Cth) (other than an interim order under section 68) in respect of entry or performance by the Developer of this Agreement within the time limits specified in section 77 of that Act. |
| First Instalment Development Fee | [not disclosed] |
| Force Majeure Event | each of the following events: <ol style="list-style-type: none">1 earthquake, tropical cyclone, natural disaster, landslide, seismic activity, tsunami or mudslide;2 a flood which might, at the Agreement Date, be expected to occur less frequently than once in every 100 years;3 war, act of a public enemy (whether war is declared or not), civil war, rebellion, revolution, military usurped power, military insurrection, military commotion or other like hostilities;4 chemical, nuclear or biological contamination;5 ionising radiation or contamination by radioactivity;6 explosion or fire caused by events referred to in paragraphs 1 or 3; or7 an act of terrorism,8 which occurs at or directly in the vicinity of the Construction Site and prevents, the Developer from carrying out all or a material part of the D&C Activities or prevents, the State from carrying out all or a material part of its obligations under this Agreement. |
| Force Majeure Report | has the meaning given in clause 36.1(b). |
| Force Majeure Termination Event | a Force Majeure Event which prevents the Developer from carrying out all or a material part of the Oversight Development Works or prevents the State from carrying out all or a material part of its obligations under Oversight Development Agreements for a |

| Term | Meaning |
|------------------------------------|--|
| | continuous period exceeding [not disclosed]. |
| Freehold Land | that part of OSD North containing the Oversight Development, as initially shown on the plans in Attachment 12. |
| Freehold Strata Plan | the strata plan of subdivision as determined under clause 26. |
| Government Party or Parties | all and any of the State and any Authority. |
| GST | has the meaning given by the GST Law and where appropriate includes Notional GST. |
| GST Act | the <i>A New Tax System (Goods and Services Tax) Act 1999</i> (Cth). |
| GST Amount | to the extent the Consideration is consideration for a Taxable Supply an amount equal to the Consideration provided for that Taxable Supply (excluding any Consideration payable pursuant to clause 32) multiplied by the prevailing rate of GST (10% as at the Commencement Date). |
| GST Group | has the meaning given by the GST Law. |
| GST Law | has the meaning given by the <i>A New Tax System (Goods and Services Tax) Act 1999</i> (Cth). |
| GST Registered | has the meaning given to the term 'registered' by the GST Law. |
| Hazardous Substance | any substance which would or might reasonably be expected to cause damage or injury to any person, any property or the Environment. |
| Health and Safety Incident | any incident that: <ol style="list-style-type: none">1 is required to be notified to an Authority under any OHS Legislation;2 results or could potentially result in injury, illness or disease requiring a person to miss more than one day of work (for the avoidance of doubt, this includes 'near misses');3 results in an injury that requires treatment by a medical |

| Term | Meaning |
|---|--|
| | practitioner; 4 results in, or could potentially result, in injury, illness or disease to a member of the public (for the avoidance of doubt, this includes 'near misses'); or 5 results, or could potentially result, in damage to Oversight Development or other property, plant or equipment, and that poses a material risk of an incident referred to in paragraphs 1 to 4 above. |
| Health and Safety Management Plan | the plan of that name prepared and updated by the Developer in accordance with the Health and Safety Requirements. |
| Health and Safety Requirements | those matters set out in Attachment 9 and any direction, instruction, request or requirement relevant or necessary for compliance by the State with any applicable Workplace Health and Safety Laws, and including any such matter of which the Developer has been informed by the State either orally or in writing. |
| Health Privacy Principles | the Health Privacy Principles set out in the Health Records Act 2001 (Vic). |
| Heritage Claim | a claim made in connection with a requirement under any Law for the protection, preservation or removal of any Artefact. |
| Incorporated Document | the Incorporated Document under the Planning Scheme Amendment following the completion of the statutory process under the Planning and Environment Act 1987 (Vic) including without limitation under section 38 Planning and Environment Act 1987 (Vic), and the masterplan as endorsed by the Minister under that incorporated document. |
| Incorporated Document as Submitted | the Incorporated Document under the Planning Scheme Amendment and the masterplan as submitted by the Developer to the State a copy of which is at Attachment 13. |
| Indemnified Persons | has the meaning given to that term in clause 29.4(f) of this Agreement. |
| Independent Reviewer | the person appointed from time to time as the independent reviewer pursuant to the Project Agreement. |

| Term | Meaning |
|---------------------------------------|--|
| Indirect or Consequential Loss | <p>any:</p> <ol style="list-style-type: none">1 loss of opportunity, profit, anticipated profit, business, business opportunities, revenue or any failure to realise anticipated savings;2 penalties payable by the State or any of its Associates under agreements other than this Agreement; or3 penalties payable by the Developer or any of its Associates under agreements other than this Agreement. |
| Industrial Action | <p>labour matters and Industrial Relations Matters affecting the Site or the Oversight Development Works, including:</p> <ol style="list-style-type: none">1 a strike, lockout, demarcation, ban, limitation on work, industrial dispute or any other action that meets the definition of industrial action in section 19 of the <i>Fair Work Act 2009</i> (Cth);2 any claim relating to labour or industrial arrangements applicable to any of the Developer D&C Workforce; and3 any besetting or obstruction of the Site. |
| Industrial Relations Laws | <p>all workplace, employment or industrial relations related:</p> <ol style="list-style-type: none">1 Law;2 principles of law or equity;3 standards, codes and guidelines, <p>relevant and applicable to any part of the Oversight Development Works, as amended from time to time.</p> |
| Industrial Relations Matter | <p>any industrial relations matter arising out of, or in connection with, the Site or the Oversight Development Works including:</p> <ol style="list-style-type: none">1 a claim for payment for or on behalf of any of the Developer D&C Workforce;2 a claim for payment in the nature of a site allowance;3 a claim arising out of, or in connection with, changes in State or Commonwealth work practices or requirements, including any changes resulting from current State or Commonwealth initiatives, negotiated contracts or agreements, conditions on payments, increases in labour costs, overtime costs, changed work practices or procedures, site allowances and any bonuses allowable or payable within the construction industry; and4 any reduction in the construction industry working hours per week. |
| IR Management Plan | <p>the industrial relations management plan to be developed by the</p> |

| Term | Meaning |
|---------------------------------------|---|
| | Developer in accordance with Attachment 6. |
| Industrial Waste | has the same meaning as in the <i>Environment Protection Act 1970</i> (Vic) and regulations thereto. |
| Information Privacy Principles | the Information Privacy Principles set out in the <i>Information Privacy Act 2000</i> (Vic) or the <i>Privacy and Data Protection Act 2014</i> (Vic) (as in force from time to time). |
| Input Tax Credit | has the meaning given by the GST Law and a reference to an Input Tax Credit to which a party is entitled includes an Input Tax Credit for an acquisition made by that party but to which another member of the same GST Group is entitled under the GST Law. |
| Insurances | the insurances required to be effected and maintained in accordance with this Agreement. |
| Intellectual Property Rights | <p>includes any and all intellectual and industrial property rights throughout the world, whether subsisting now or in the future, including rights of any kind in:</p> <ol style="list-style-type: none">1 inventions, discoveries and novel designs, whether or not registered or registrable as patents, innovation patents or designs, including developments or improvements of equipment, technology, processes, methods or techniques;2 literary works, dramatic works, musical works, artistic works, cinematograph films, television broadcasts, sound broadcasts, published editions of works and any other subject matter in which copyright (including future copyright and rights in the nature of or analogous to copyright) may, or may upon creation of the subject matter, subsist anywhere in the world;3 registered and unregistered trade marks and service marks, including goodwill in the business concerned in the relevant goods and/or services;4 trade, business or company names;5 internet domain names; and6 proprietary rights under the <i>Circuit Layouts Act 1989</i> (Cth),7 whether created or in existence before or after the date of this Agreement. |
| Interest Rate | for a period, [not disclosed] for that period, plus a margin of [not disclosed] per annum. |

| Term | Meaning |
|----------------------------|---|
| Interface Agreement | the interface agreement to be entered into on or about the date of this Agreement between, amongst any others the State, the Developer, Project Co, the Project D&C Subcontractor and the Builder. |
| Interface Works | <ol style="list-style-type: none">1 OSD Works for PPP; and2 PPP Works for OSD,3 as each of those terms are defined in the Interface Agreement. |
| Interfaces | has the meaning given to that term in clause 15.1. |
| Key Design Elements | <ol style="list-style-type: none">1 the facade treatment;2 ground plane entrance design; and3 external architectural elements, including but not limited to screening to plant and equipment (including but not limited to air-conditioning equipment, ducts, flues, and communications equipment), devices required for wind amelioration or environmentally sustainable design (ESD) measures, and architectural features (including but not limited to blades, fins, awnings, canopies or a veranda roof). |
| Labour Conditions | any labour arrangements applicable to the Developer D&C Workforce for, or in connection with, the Oversight Development Works. |
| Land Victoria | the Victorian Government agency known as 'Land Victoria' responsible for land administration and land information in Victoria, including the registration of land titles. |
| Law | all laws, including common law equity and statute any regulation, order, rule, subordinate legislation or other document enforceable under any statute, regulation, order, rule or subordinate legislation. |
| Liability | any debt, obligation, cost, expense, loss, damage, compensation, charge or liability of any kind, including those that are prospective or contingent and those the amount of which is not ascertained or ascertainable. |
| Licensed Area | the area of the Precinct marked in green on the map contained in Attachment 1, excluding any part of that area which pursuant to the Project Agreement becomes a 'Maintenance Area' (as that term is |

| Term | Meaning |
|---------------------------------|--|
| | defined in the Project Agreement).. |
| Loss | any Liability (including legal and other professional expenses) of any kind whatsoever and includes but is not limited to direct and indirect, consequential or special damage, loss of profits, loss of use, loss of revenue, anticipated revenue, interest or other such claim arising from any cause whatsoever whether or not such loss, damage or claim is based on contract, statute, warranty, tort (including negligence), indemnity or otherwise. |
| Lot | a lot on a freehold strata plan of subdivision. |
| LUAA | a land use activity agreement entered into in accordance with the TOS Act. |
| Matters of State Concern | any Key Design Element and any matter affecting: <ol style="list-style-type: none">1 works or uses which do not comply with the Planning Scheme Amendment;2 the Interfaces; and3 safety or operational requirements of the Rail Operations including building envelopes or building elevations for the Oversite Development Works or external finishes of buildings which, in each case, impact or may potentially impact, safety or operational requirements of the Rail Operations. |
| Metro Tunnel | the twin nine-kilometre rail tunnels from Kensington to South Yarra and five underground Stations, as part of the new Sunbury to Cranbourne / Pakenham line including all enabling and complementary works or services associated with them. |
| Minister for Planning | the Minister for Planning for the State of Victoria. |
| MMRA | Melbourne Metro Rail Authority. |
| Modification | a Modification (as defined in the Project Agreement) under the Project Agreement. |
| Modification Order | a Modification Order (as defined in the Project Agreement) under the Project Agreement. |

| Term | Meaning |
|---------------------------------|---|
| Modification Request | a Modification Request (as defined in the Project Agreement) under the Project Agreement. |
| Monthly IR Report | a monthly industrial relations report to be prepared by the Developer in accordance with Attachment 6 and Attachment 7. |
| Moral Rights | non-assignable moral rights as defined in the <i>Copyright Act 1968</i> (Cth) and similar non-assignable personal rights of authors and producers, directors and screenwriters anywhere in the world. |
| Native Title Claim | any claim or application under any Law or future Law relating to native title, including any application under section 61 of the <i>Native Title Act 1993</i> (Cth). |
| Notional GST | where, in relation to the Intergovernmental Agreement on the Reform of Commonwealth-State Financial Relations and the <i>National Taxation Reform (Consequential Provisions) Act 2000</i> (Vic) (NTR Act) or a direction given under section 5 of the NTR Act, the supplier is obliged to make voluntary or notional GST payments, in which case Notional GST means those voluntary or notional payments. For the avoidance of doubt, Notional GST amounts will be calculated as if the GST Act applies to the relevant supplies. |
| OHS Accreditation Scheme | the Australian Government Building and Construction Work Health and Safety Accreditation Scheme established by the <i>Building and Construction Industry (Improving Productivity) Act 2016</i> (Cth) and the <i>Fair Work (Building Industry- Accreditation Scheme) Regulations 2016</i> (as preserved by the <i>Building and Construction Industry (Consequential and Transitional Provisions) Act 2016</i> (Cth)), as amended from time to time. |
| OHS Legislation | <p>all safety-related:</p> <ol style="list-style-type: none">1 Laws;2 codes of practice;3 other compliance codes;4 directions on safety or notices issued by any relevant Government Agency; and5 standards, <p>relevant and applicable to any part of the Oversight Development Works and includes, but is not limited to, the <i>Occupational Health and Safety Act 2004</i> (Vic), the <i>Heavy Vehicle National Law Application Act 2013</i> (Vic) and the <i>Rail Safety National Law Application Act 2013</i> (Vic) and associated regulations.</p> |

| Term | Meaning |
|--|--|
| OHS Regulations | the Occupational Health and Safety Regulations 2017 (Vic). |
| Operator | any operator or operators licensed or authorised by PTV or VicTrack to operate rail services on the Station Land and includes the Train Franchisee. |
| OPR Incentive Payments | has the meaning given in the Train Franchise Agreement. |
| OSD Modification | a State Initiated Modification or State Initiated OSD Variation referred to in clause 16.2 or a Developer Unacceptable Condition. |
| OSD Modification Order | a direction by the State under clause 16.5(b). |
| OSD Modification Quote | the quote prepared by the Developer in accordance with clause 16.4. |
| Oversite Development | the development (including the potential development) on the Freehold Land of a mixed use building for retail, commercial and residential purposes by the Developer generally (but subject to this Agreement) in accordance with the Planning Scheme Amendment and to the extent that there is no inconsistency with the Planning Scheme Amendment, in accordance with the Final Design Documentation (as varied or modified from time to time in accordance with this agreement). |
| Oversite Development Access and Interface Protocols | the plan of that name which sets out the procedures and protocols for accessing the Licenced Area prior to Final Completion, being the Access Protocols. |
| Oversite Development Agreements | <ol style="list-style-type: none">1 this Agreement;2 the Construction Licence;3 the Contract of Sale;4 the Interface Agreement;5 the Financier Direct Deed; and6 the Builder's Side Deed. |
| Oversite Development Project Control Group | has the meaning set out in clause 17(a). |

| Term | Meaning |
|---|--|
| Oversite Development Sunset Date | the date falling [not disclosed] after the Construction Commencement Deadline. |
| Oversite Development Works | all works to be carried out by the Developer to complete the Oversite Development in accordance with the Design Documentation including temporary construction works and remedial works. |
| Planning Permission | any Development Plan approved by the Minister for Planning under the Incorporated Document. |
| Planning Scheme | any planning scheme made under the <i>Planning and Environment Act 1987</i> (Vic) applicable to all or any part of the Site. |
| Planning Scheme Amendment | the amendment of the Planning Scheme (amendment number C315) by incorporation of the Incorporated Document pursuant to Section 6(2)(j) of the <i>Planning and Environment Act 1987</i> (Vic) or any subsequent planning scheme amendments applicable to the Freehold Land entered into with the consent of the Developer. |
| Plant and Equipment | all plant, machinery and equipment and other items used by, or brought onto the Freehold Land by, the Developer, the Builder, any Subcontractors, consultant, or any other party other than the State for the purpose of enabling or facilitating the Oversite Development Works which is not and will not become part of the Oversite Development or is not and will not be used for operating or maintaining the Oversite Development. |
| Pollution | <p>includes any solid, liquid, gas, odour, heat, sound, vibration, radiation or substance present in any segment of the Environment (other than those naturally present in a given segment of the Environment) which alone or in combination makes or may make the Environment:</p> <ol style="list-style-type: none">1 unsafe or unfit for habitation or occupation by persons or animals;2 degraded in its capacity to support plant life;3 contaminated; or4 otherwise environmentally degraded. |
| Power | any power, right, authority, discretion or remedy, whether express or implied. |

| Term | Meaning |
|--|--|
| Precinct | the area outlined on the map set out in Attachment 1. |
| Precinct Users | the Station Users (other than Project Co) and any person occupying or using any other part of the Precinct for any purpose whatsoever. |
| Pre-Existing Contamination | any Contamination existing in, on, under or emanated or emanating from the Site at the Agreement Date. |
| Principal Contractor | has the meaning given in the OHS Legislation. |
| Priority Jobseekers | persons designated, in accordance with the Jobs Victoria Employment Network Program Guidelines dated May 2016, as falling within any of the following priority target groups: <ol style="list-style-type: none">1 long term unemployed;2 living with a disability;3 living with a mental illness;4 retrenched workers including workers retrenched from the automotive manufacturing and supply chain industry;5 Aboriginal Persons;6 refugees or asylum seekers;7 young people in out-of-home care;8 young people who are disengaged from education, training and employment;9 youth justice clients; or10 ex-offenders. |
| Priority Jobseekers' Requirements | the requirement that at least 10% of the Developer D&C Workforce will be Priority Jobseekers undertaking D&C Activities in Victoria, calculated as an Annualised Employee Equivalent against the Developer D&C Workforce. |
| Privacy Principles | each of: <ol style="list-style-type: none">1 the Health Privacy Principles; and2 the Information Privacy Principles. |
| Probity Investigations | any probity or criminal investigations to report on the character, integrity or honesty of a person or Entity, including: <ol style="list-style-type: none">1 investigations into commercial structure, business and credit |

| Term | Meaning |

| State Representative | the person appointed as the state representative in accordance with the Project Agreement. |
| Station | the buildings, equipment, plant and other infrastructure relation to the underground train station at CBD North to be procured, designed, constructed and completed by Project Co in accordance with the Project Agreement. |
| Station Final Acceptance | the Station Works are certified as having been completed under clause 24.5 (<i>Final Acceptance</i>) of the Project Agreement. |
| Station Land | all of CBD North other than the Freehold Land. |
| Station Land Management Agreement | a land management agreement between the Purchaser and the State containing the principles outlined Attachment 11, the purpose of which is to regulate the use, maintenance and costs associated with the Station Shared Services, and is otherwise in a form agreed by those parties. |
| Station Land Management Registrable Agreement | means an agreement under section 173 of the <i>Planning and Environment Act 1987</i> (Vic) in substantially similar form to the agreement in Attachment 11. |
| Station Opening Date | the date that the Station Works are complete and the Station opens for operation in accordance with the Project Agreement. |
| Station Shared Services | means specific services and structures which are shared across the Station Land and Freehold Land including structures, plant, services, infrastructure, egress and circulation. |

| Term | Meaning |
|---------------------------------|--|
| Station Users | all persons who fall within any of the categories described below: <ol style="list-style-type: none">1 patrons or event organisers attending the Station, or any part thereof;2 employees, contractors, sub-contractors and authorised officers of Project Co or Subcontractors employed or contracted in relation to the Station (or any part thereof) or delivery of the Services;3 members of the public attending the Station, or any part thereof;4 visitors to the Station (or any part thereof) for any purpose; and5 any person who has dealings with the Maintenance Subcontractor in relation to the Station, or any part thereof. |
| Station Works | the permanent and physical works required for the development and construction of the Station in accordance with the Project Agreement. |
| Subcontractor | <ol style="list-style-type: none">1 the Builder; or2 a person engaged by or on behalf of the Developer or the Builder in relation to the Oversight Development Works or a person whose contract is in connection with the Oversight Development Works and is in a chain of contracts where the ultimate contract is with the Developer or the Builder, including for the supply of material or goods for those works. |
| Supplier Code of Conduct | the document titled 'Procurement - Supplier Code of Conduct' issued by the State (as amended from time to time) and, as at the date of this Agreement, available at http://www.procurement.vic.gov.au/Suppliers/Supplier-Code-of-Conduct . |
| Tax | includes any tax, levy (including congestion levy), impost, deduction, charge, rate (other than utility and council rates), duty, compulsory loan or withholding which is levied or imposed by a Authority, including without limitation any such amount imposed on an equivalence basis and withholding, income, stamp, transaction or capital gains tax, payroll tax, fringe benefits tax, duty or charge together with any related additional tax, further additional tax, interest, penalty, fine, charge, fee or like amount. |
| Tax Invoice | has the meaning given by the GST Law. |
| Taxable Supply | has the meaning given by the GST Law excluding the reference to section 84-5 of the GST Act. |

| Term | Meaning |
|--|---|
| Termination Date | mean the date specified in clause 35.2(a), clause 35.3(a) or clause 35.4(a) (as relevant). |
| Termination Event | <ol style="list-style-type: none">1 a failure by the Developer to comply with its obligations under clause 34.2(c), 34.3(c) or 34.4 (as relevant);2 Construction Commencement has not occurred by the Construction Commencement Deadline;3 Final Completion of the Oversight Development Works has not occurred by the Oversight Development Sunset Date;4 the Oversight Development Works are damaged or destroyed and the Developer elects not to reinstate the Oversight Development Works in accordance with clause 40.2; or5 a Project Termination Event. |
| Termination Payment | the amount payable by the State to the Developer on termination of this Agreement in accordance with clause 35.6. |
| TOS Act | the <i>Traditional Owner Settlement Act 2010 (Vic)</i> . |
| Total Financial Market Disruption | sustained events, or general ongoing illiquidity or lack of credit, in and affecting Australian and international financial markets generally and having a material adverse effect on the availability of credit on commercially reasonable terms to finance construction of projects in Australia of a similar scale and nature to the Oversight Development Works. In determining whether or not a Total Financial Market Disruption exists, regard will be given to the availability of credit to construction projects in Australia of a similar scale and nature to the Oversight Development Works and to other large scale real estate projects of this nature, However, unavailability of credit due to the particular circumstances, performance or prospects of the Oversight Development or a Default will be disregarded in determining whether Total Financial Market Disruption exists. |
| Train Franchisee | has the meaning given to that term under the Project Agreement. |
| Train Franchise Agreement | has the meaning given to that term in the Project Agreement. |
| Train Infrastructure Lease | has the meaning given to that term in the Project Agreement. |

| Term | Meaning |
|----------------------------------|--|
| Transport Services | all present or future services provided from time to time by any person at or in connection with the Station Land and includes, without limitation passenger rail and tram services, or both. |
| Union Official | any officer, official, delegate, employee or representative of an employee organisation registered under Industrial Relations Laws. |
| User | any person involved from time to time in the provision or use of Transport Services including, without limitation: <ol style="list-style-type: none">1 the State;2 VicTrack;3 any Operator4 PTV. |
| Utility Infrastructure | any item of plant or equipment for delivering Utility Services. |
| Utility Service | any utility service, including water, electricity, gas, telephone, drainage, waste, sewerage and electronic communications (including fibre optic feeds). |
| Utility Services | any utility service, including water, electricity, gas, telephone, drainage, waste, sewerage and electronic communications (including fibre optic feeds). |
| Value at Final Completion | the estimated Fair Market Value of the Oversight Development as at Final Completion as determined in accordance with clause 16.7 on the basis that (but subject to any express provision of this Agreement): <ol style="list-style-type: none">1 each party has exercised all its rights under this Agreement and has complied in full with its obligations under this Agreement; and2 the Oversight Development was to be constructed in accordance with this Agreement. |
| Verifiable Costs | the verifiable costs of the improvements constructed as part of the Oversight Development Works incurred by the Developer as at the date of termination, being the design, construction, and reasonable development costs for the relevant state of construction. The costs of improvements must exclude: <ol style="list-style-type: none">1 the costs of variations to the Oversight Development Works, where the Developer has been unable to demonstrate to the State's reasonable satisfaction that such variations were |

| | <p>implemented properly and in accordance with the Oversight Development Agreements; and</p> <p>2 any costs for which the Developer owes under the Oversight Development Agreements by reason of its own default.</p> |
| VicRoads | the Roads Corporation within the meaning of section 3 of the <i>Transport Integration Act 2010 (Vic)</i> . |
| VicTrack | the Victorian Rail Track, a body corporate established under the Rail Corporations Act 1996 (Vic); |
| Works | has the meaning given to that term in the Project Agreement. |

1.2 Interpretation

In this Agreement:

- (a) **(headings)**: headings (including any heading at the beginning of any subclause) are for convenience only and do not affect interpretation;

and unless the context otherwise requires:

- (a) **(count and gender)**: a word importing the singular includes the plural and vice versa and a word indicating a gender includes every other gender
- (b) **(Agreement and Schedule references)**: a reference to:
- (1) a party, clause, Schedule or Attachment is a reference to a clause of, or a Schedule of or Attachment to, this Agreement; and
 - (2) a section is a reference to a section of a Schedule;
- (c) **(Agreement as amended)**: a reference to this Agreement or to any other deed, agreement, document or instrument includes a reference to this Agreement or such other deed, agreement, document or instrument as amended, novated, supplemented, varied or replaced from time to time;
- (d) **(party)**: a reference to a party includes that party's legal representatives, trustees, executors, administrators, successors and permitted substitutes and assigns, including any persons taking part by way of novation;
- (e) **(person)**: a reference to a person includes an individual, the estate of an individual, a corporation, an authority, an association or a joint venture (whether incorporated or unincorporated), a partnership and a trust;
- (f) **(legislation)**: a reference to legislation includes its delegated legislation and a reference to such legislation or delegated legislation or a provision of either includes consolidations, amendments, re-enactments and replacements;
- (g) **(definitions)**: if a word or phrase is given a defined meaning, any other part of speech or grammatical form of that word or phrase has a corresponding meaning;

- (h) (**'includes'**): 'includes' will be read as if followed by the phrase '(without limitation)';
- (i) (**'or'**): the meaning of 'or' will be that of the inclusive, being one, some or all of a number of possibilities;
- (j) (**information**): a reference to information includes information, representations, statements, data, samples, calculations, assumptions, deductions, determinations, drawings, design specifications, models, plans and other documents in all forms including the electronic form in which it was generated;
- (k) (**'\$'**): a reference to '\$', AUD or dollar is to Australian currency;
- (l) (**time**): a reference to time is a reference to time in Melbourne, Australia;
- (m) (**rights**): a reference to a right includes any benefit, remedy, function, discretion, authority or power;
- (n) (**obligations and liabilities**): a reference to an obligation or a liability assumed by, or a right conferred on, 2 or more persons binds or benefits them jointly and severally;
- (o) (**'may'**): the term 'may', when used in the context of a power, right or remedy exercisable by the State, means that the State can exercise that power, right or remedy in its absolute and unfettered discretion and the State has no obligation to do so;
- (p) (**Authorities**): where there is a reference to an Authority, institute or association or other body referred to in this Agreement which:
 - (1) is reconstituted, renamed or replaced or if its powers or functions are transferred to, or assumed by, another entity, this Agreement is deemed to refer to that other entity; or
 - (2) ceases to exist, this Agreement is deemed to refer to that new entity which serves substantially the same purpose or object as the former entity;
- (q) (**remedy**): the use of the words 'remedy', 'cure' or any form of such words in this Agreement means that the event to be remedied or cured must be remedied or cured or its effects overcome; and
(contra proferentem rule not to apply): each provision will be interpreted without disadvantage to the party who (or whose representative) drafted or proffered that provision.

1.3 Business Day

If the day on or by which anything is to be done in accordance with this Agreement is not a Business Day, that thing must be done no later than the next Business Day.

1.4 Approvals, directions and notices in writing

Unless otherwise expressly provided in this Agreement or agreed between the parties, all approvals, consents, directions, requirements, requests, Claims, notices, agreements and demands must be given in writing.

1.5 Prior approval or consent

Where the Developer is required by this Agreement to obtain the State's or the State Representative's consent or approval to an action, document or thing, unless otherwise

expressly stated, that consent or approval must be obtained prior to the actions, document or thing occurring or coming into effect.

1.6 Action without delay

Unless there is a provision in this Agreement which specifies a period of time in which something must be done by the parties, all things must be done without undue delay.

1.7 Provisions limiting or excluding Liability, rights or obligations

- (a) A right of the State or an obligation of the Developer under this Agreement will not limit or exclude any other right of the State or obligation of the Developer under this Agreement unless expressly stated.
- (b) Any provision of this Agreement which seeks, either expressly or by implication, to limit or exclude any Liability of a party is to be construed as doing so only to the extent permitted by Law.

1.8 Relationship of the parties

Unless otherwise expressly provided, nothing in this Agreement or any other Oversight Development Agreement:

- (a) **(no additional relationship)**: creates a partnership, joint venture, fiduciary, employment or agency relationship between the State and the Developer; or
- (b) **(no good faith)**: imposes any duty of good faith on the State.

1.9 State's executive rights and duties

- (a) **(State's own interests)**: Unless otherwise expressly provided in the Agreement, nothing in the Oversight Development Agreements to which the State is a party gives rise to any duty on the part of the State to consider interests other than its own interests when exercising any of its rights or carrying out any of its obligations in accordance with those Oversight Development Agreements.
- (b) **(State's rights)**: Notwithstanding anything expressly provided or implied in the Agreement to the contrary, the parties agree that:
 - (1) the State is not obliged to exercise any executive or statutory right or duty, or to influence, over-ride, interfere with or direct any other Government Party in the proper exercise and performance of any of its executive or statutory rights or duties; and
 - (2) nothing expressly provided or implied in the Agreement has the effect of constraining the State or placing any fetter on the State's discretion to exercise or not to exercise any of its executive or statutory rights or duties.
- (c) **(No Claim)**: Subject to clause 1.9(d), the Developer will not be entitled to make any Claim against the State for any Liability relating to any exercise or failure of the State to exercise its executive or statutory rights or duties.
- (d) **(Liability for breach)**: Clauses 1.9(a) to 1.9(c) do not limit any Liability which the State would have had to the Developer under any Agreement as a result of a breach by the State of a term of any Agreement to which it is a party but for these clauses.

1.10 Reasonable endeavours of State

Any statement in an Agreement providing that the State will use or exercise 'reasonable endeavours' or 'act reasonably' in relation to an outcome, means that the State:

- (a) **(relevant steps)**: will take steps to bring about the relevant outcome so far as it is reasonably able to do so, having regard to its resources and other responsibilities;
- (b) **(no guarantee)**: cannot guarantee the relevant outcome; and
- (c) **(no obligation)**: is not required to:
 - (1) exercise a right of any Government Party, or to influence, over-ride, interfere with or direct any other Government Party in the proper exercise and performance of its legal, statutory or executive duties and functions;
 - (2) exercise a power or discretion in a manner that the State regards as not in the public interest;
 - (3) develop or implement new policy;
 - (4) procure legislation; or
 - (5) act in any way that the State regards as not in the public interest.

1.11 State representatives

- (a) **(State representatives)**: The State may exercise any of its rights or carry out any of its obligations in accordance with this Agreement through the State Representative.
- (b) **(Agent)**: The State Representative must be a natural person and will act as the agent of its respective party.
- (c) **(State Representative)**: The State Representative will exercise the rights and carry out the obligations of the State as set out in the Oversight Development Agreements to which it is a party, including its ability to give and receive directions and notices.
- (d) **(Delegation)**: The State may vary or terminate the duties of the State Representative as it sees fit, including delegating its representative's duties to a new representative.
- (e) **(Notice)**: Where the State varies, terminates or delegates the duties of its representatives in accordance with clause 1.11(d), the State will promptly notify the other of the variation, termination or delegation, including the identity of any new representative and the new representative's duties (if applicable) and of any further variation, termination or delegation.

2 Oversight Development risk and costs

Except to the extent that this Agreement or another Oversight Development Agreement expressly provides to the contrary but without limiting any Claim for breach of contract or negligence, the Developer:

- (a) accepts all risks relating to the Oversight Development and the Developer will not be entitled to make any Claim against the State or seek to be indemnified by the

- State for or against any Liability arising from any risk relating to the Oversight Development; and
- (b) is responsible for all costs it incurs in carrying out its obligations under this Agreement and that are associated in any way with the development or delivery of the Oversight Development (excluding risks accepted by Project Co under the Project Agreement).

3 Representations and Warranties

3.1 Representations by the State

The State represents and warrants for the benefit of the Developer that:

- (a) **(power to execute)**: the State has:
- (1) the power to execute the Oversight Development Agreements to which it is a party and does so through the Minister for Public Transport on behalf of the Crown in right of the State of Victoria; and
 - (2) the power to deliver and carry out its obligations under those Oversight Development Agreements,
- and all necessary action has been taken (or will at the relevant time be taken) to authorise their execution, delivery and performance;
- (b) **(validity)**: those Oversight Development Agreements constitute a valid and legally binding obligation on it in accordance with their terms; and
- (c) **(legality)**: the execution, delivery and performance of those Oversight Development Agreements does not violate any Law to which the State is subject.

3.2 Representations by Developer

The Developer represents and warrants for the benefit of the State that:

- (a) **(power to execute)**: it has the power to execute, deliver and perform any Oversight Development Agreement to which it is a party;
- (b) **(authorisations)**: it has taken all necessary corporate actions has been taken to authorise, execute, deliver and perform its obligations under each Oversight Development Agreement to which it is a party;
- (c) **(validity)**: those Oversight Development Agreements to which it is a party constitute a valid and legally binding obligations on it in accordance with their terms;
- (d) **(legality)**: the execution, delivery and performance of those Oversight Development Agreements to which it is a party does not violate any Law, document or agreement to which it is a party or which is binding on it or any of its assets;
- (e) **(disputes)**: no litigation, arbitration, tax claim, dispute or administrative proceeding (each a **Proceeding**) is current or pending or (to its knowledge) threatened, which will or is likely to have a material adverse effect upon it (or any applicable Associate) or its ability to perform its financial and other obligations under the Oversight Development Agreements; and

- (f) **(FIRB)**: any FIRB Approval required to enter into the Oversight Development Agreements has been obtained.
- (g) **(Design and construction)**:
it has or will procure the resources, expertise and experience necessary to design, construct and complete the Oversight Development Works and nothing in this clause 3.2(g) will in any way limit or reduce any other obligation or liability of the Developer under this Agreement.

3.3 Developer's Acknowledgement, Waiver and Indemnity

- (a) The Developer acknowledges and agrees that, except as expressly set out in this Agreement, neither the State nor any of its Associates has made any representation, given any advice or given any warranty or undertaking of any kind in respect of:
 - (1) any of the Oversight Development Agreements;
 - (2) any transaction or arrangement contemplated under any of the Oversight Development Agreements; or
 - (3) any other matter relevant to the Developer's decision to enter into the Oversight Development Agreements.
- (b) Without limiting clause 3.3(a), the Developer acknowledges and agrees that:
 - (1) the Disclosed Information, and all Intellectual Property Rights in the Disclosed Information, will remain the property of the State or any of its Associates (as the case may be);
 - (2) the Disclosed Information does not constitute an invitation, offer or recommendation by or on behalf of the State or any of its Associates;
 - (3) the purpose of the Disclosed Information is to provide the Developer and its Associates with information to assist in preparing and lodging a proposal for the Oversight Development;
 - (4) the Disclosed Information does not purport to contain all of the information that the Developer and its Associates required for the purposes of preparing and lodging a proposal (including the Proposal) or making the decision to enter into the Oversight Development Agreements and did not purport to have been prepared having regard to the Developer's or its Associate's business objectives, financial situation or particular needs;
 - (5) neither the State, its Associates, nor any other person acting on behalf of or associated with any of them, has verified or has any obligation to verify the accuracy, reliability or completeness of the Disclosed Information;
 - (6) neither the State, its Associates nor any other person acting on behalf of or associated with any of them has made any representation or warranty either express or implied as to the accuracy, reliability or completeness of the Disclosed Information;
 - (7) the Developer and its Associates have not relied in any way on the skill or judgment of the State, its Associates or any person acting on behalf of or associated with any of them and the Developer and its Associates have relied absolutely on their own opinion and professional advice based upon their own independent analysis,

- assessment, investigation and appraisal in deciding to lodge the Proposal and to enter into the Oversight Development Agreements;
- (8) the Developer and its Associates will not in any way rely upon:
- (A) the Disclosed Information; or
 - (B) a failure by the State or any of its Associates to provide any information to the Developer or its Associates;
- (9) the Developer and its Associates have carried out all relevant investigations and have examined and acquainted themselves concerning:
- (A) all aspects of the Oversight Development;
 - (B) the contents, correctness and sufficiency of the Disclosed Information;
 - (C) all information which is relevant to the risks, contingencies and other circumstances related to the Oversight Development which could affect their decision to enter into the Oversight Development Agreements;
 - (D) the Site and Site Conditions; and
 - (E) all amounts payable between the parties to the Oversight Development Agreements;
- (10) on the basis that the Disclosed Information has been given in good faith and that the State has no knowledge that any part of the Disclosed Information is misleading or deceptive (but acknowledging that neither the State, its Associates nor any person acting on behalf of or associated with any of them is under any obligation to make and that none of them has made enquiries to verify that state of knowledge) any statement, representation, term, warranty, condition, promise or undertaking made, given or agreed to by the State, its Associates or any person acting on behalf of or associated with any of them in any prior negotiation, arrangement, understanding or agreement has no effect except to the extent expressly set out or incorporated in any of the Oversight Development Agreements;
- (11) neither the State nor any of its Associates is under any obligation to:
- (A) notify the Developer or any of its Associates or provide any other information to the Developer or any of its Associates if it becomes aware of any inaccuracy, incompleteness or change in the whole or any part of the Disclosed Information; or
 - (B) update the whole or any part of the Disclosed Information, although, the State or any of its Associates may do so at their sole discretion; and
- (12) the acknowledgements under this clause 3.3(b) are in addition to and do not replace the terms and conditions already agreed to or accepted by the Developer or its Associates when receiving the Disclosed Information.
- (c) To the extent permitted by Law, the Developer expressly waives any right which it or any of its Associates may have (whether at the Agreement Date or otherwise) to bring any action or make any Claim against the State, any of its Associates or any person acting on behalf of or associated with any of them

arising out of any alleged misrepresentation or misleading or deceptive conduct on the part of the State, any of its Associates or any person acting on behalf of or associated with any of them in providing the Disclosed Information or in connection with the negotiation or preparation of any Oversight Development Agreement.

- (d) The Developer indemnifies the State and its Associates or any person acting on behalf of or associated with any of them, and will hold them harmless against all Claims and Liabilities that any of them may sustain or incur as a result of or in connection with any breach of this clause 3.3 by the Developer.

3.4 Repetition of representations and warranties

The representations and warranties and acknowledgments in clauses 3.2 and 3.3 are taken to be repeated by the Developer on the Final Completion Date and the representations and warranties in clause 3.3 are taken to be repeated:

- (a) prior to the Final Completion Date, on each anniversary of the date of this Agreement; and
- (b) after the Final Completion Date, on each anniversary of the Final Completion Date,

with reference to the facts and circumstances subsisting at that date.

3.5 Reliance on Representations

- (a) Each of the State and the Developer acknowledges and agrees that the other of them has entered into the Oversight Development Agreements (to the extent that each is a party to the relevant Oversight Development Agreement) in reliance on the representations and warranties contained in this clause 3.
- (b) The Developer acknowledges and agrees that all of its representations, warranties, acknowledgements and agreements under clauses 3.2 and 3.3 survive the execution and delivery of the Oversight Development Agreements and the completion of the transactions contemplated by any of them.

3.6 Exclusion of Warranties

To the maximum extent permitted by Law (and except as otherwise expressly provided in this Agreement) all terms, conditions, promises, undertakings, representations, warranties and statements (whether express, implied, written, oral, collateral, statutory or otherwise) which would be implied or incorporated into any of the Oversight Development Agreements are excluded and the State disclaims all Liability in relation to them.

3.7 Obligations to Notify of Proceedings

The Developer must inform the State if any Proceeding referred to in clause 3.2(e) becomes current, pending or threatened where that Proceeding will or is likely to have a material adverse effect upon its or any of its Associates ability to perform any of its obligations under any of the Oversight Development Agreements.

4 Conditions Precedent

4.1 Commencement of obligations

This Agreement (other than clauses 1, 3, 29, 38, 42, 45, 46, 47, 48 and this clause 4) does not commence until each of the conditions precedent set out in clause 4.2 has been satisfied or waived in accordance with this clause 4.

4.2 Conditions Precedent

- (a) This Agreement is conditional on:
- (1) the State receiving original copies of this Agreement and the Interface Agreement; and
 - (2) the issue and delivery of a notice under clause 3.2(c) (*Satisfaction of Conditions Precedent*) of the Project Agreement.
- (b) Unless all the condition precedent in clause 4.2(a) has been satisfied or waived by 2.00pm (local time) on the Conditions Precedent Deadline Date, except to the extent that the State otherwise specifies, the parties will no longer be bound by the terms of the Oversight Development Agreements, each of the Oversight Development Agreements will be taken to have been terminated on that date, the Oversight Development Agreements will be of no further force or effect and neither party will be entitled to any Claim against the other under or in respect of the Oversight Development Agreements or in respect of the reimbursement of costs or expenses or otherwise in connection with the Oversight Development, other than any Claim in relation to a breach of clause 3.

5 Ancillary Deeds

5.1 Builder's Side Deed

On or prior to the date that the Developer enters into the Building Contract with the Builder for the Oversight Development Works then the:

- (a) Developer will and must procure that the Builder and the Purchaser's External Financier (if applicable) to enter into the Builder's Side Deed on terms acceptable to the Developer, the Builder, the State and the Purchaser's External Financier (if applicable) generally in the form of the Builder's Side Deed contained in Attachment 10; and
- (b) State will enter into the Builder's Side Deed.

5.2 Financier Direct Deed

On or before Construction Commencement, in connection with any debt financing for the Oversight Developments:

- (a) the Developer will and must procure that its and the Purchaser's External Financier will enter into a Financier Direct Deed; and
- (b) the State will enter into a Financier Direct Deed.

6 No State liability Interface Works

6.1 No liability for any Claim

The State is not liable to the Developer in any way in relation to the Interface Works including in respect of any Claim in relation to the Interface Works provided that the State complies with any obligations of the State under the Interface Agreement.

6.2 No warranty, etc

Without limiting clause 6.1, the State gives no warranty, and the Developer must make its own enquiries, in relation to the Interface Works, including:

- (a) the design, construction and commissioning of the Interface Works;
- (b) whether the Interface Works, have been, or will be, carried out:
 - (1) in accordance with all applicable Laws and Approvals;
 - (2) so that they are:
 - (A) fit for and suitable for their intended purpose;
 - (B) free from defects in design; and
 - (C) free from Contamination.

6.3 Release

The Developer releases the State to the fullest extent permitted by law from any Claims by or liabilities to the Developer whatever, arising out of or in connection with the Interface Works.

7 Health and safety

7.1 State's objectives and overarching requirements

- (a) **(State requirements):** The State requires:
 - (1) the D&C Activities to be completed with safety as the paramount consideration;
 - (2) the management of safety during the planning and carrying out of the D&C Activities to be of the highest priority;
 - (3) all health and safety risks to be either eliminated or controlled so far as reasonably practicable; and
 - (4) that all participants in the Project, including those who are a party to this Agreement or otherwise involved in the delivery of the D&C Activities, work to prevent harm and inspire exceptional health and safety performance.
- (b) **(Developer acknowledgement):** the Developer acknowledges and agrees that:
 - (1) safety is a core value for the Development and the carrying out of the D&C Activities;

- (2) it must aspire to achieve that all people will have the highest level of protection during the carrying out of the D&C Activities to ensure, so far as is reasonably practicable, that no harm to individuals arises;
- (3) effective engagement and consultation with relevant stakeholders regarding health and safety matters is necessary at all stages of the carrying out of the D&C Activities; and
- (4) in carrying out the D&C Activities, it must promote a culture where employees and contractors are encouraged to identify, address and prevent risks and unsafe behaviour.

7.2 Developer's general OHS obligations

The Developer:

- (a) **(general OHS)** accepts that it is responsible for all aspects of health and safety relating to the Oversight Development Works from CBD North OSD Acceptance, except in relation to the obligations of any Principal Contractor under the OHS Legislation appointed in accordance with clause 7.3, until the expiration of this Agreement in accordance with clause 45.1 and it cannot delegate or assign this responsibility to a third party (other than the Developer's Builder) without the prior written approval of the State;
- (b) **(access and egress)**: must ensure or procure that the Builder ensures that at all times the Construction Site is secure and that access and egress to the Construction Site is controlled, including during non-work times, and does not pose a risk to the health and safety of any person (to avoid doubt, where responsibility for access and egress is shared, the Developer is required to consult with other parties to ensure that the requirements of this clause 7 are met);
- (c) **(cooperation)** must cooperate, and ensure the cooperation of its Associates, with the State in respect of the discharge of any occupational health and safety obligations of the State, in connection with the Oversight Development under the OHS Legislation and must:
 - (1) comply with all reasonable requests of the State to assist it to discharge its obligations;
 - (2) refrain from doing anything that may impede the State in discharging its obligations;
 - (3) notify the State immediately of any non-compliance or potential non-compliance in connection with the OHS Legislation or any other significant occupational health and safety incident that occurs in connection with the Oversight Development or the Construction Site or the Serviced Area; and
 - (4) require that all sub-contracts contain clauses equivalent to clauses 7.1(b)(1) to (3);
- (d) **(Safety culture)**: must demonstrate the implementation of a positive safety culture by implementing programs to support a positive safety culture for all Oversight Development Works;
- (e) **(Subcontractors)**: must ensure that its Associates and all Subcontractors carry out the Oversight Development Works in accordance with:
 - (1) a safety management system independently certified to AS4801-2001 by a JAS-ANZ accredited certification body maintained for the duration of the Project Activities; and

- (2) the Health and Safety Management Plan;
- (f) **(Health and Safety Management Plan)**: must ensure that a Health and Safety Management Plan is:
 - (1) prepared and submitted to the State for review;
 - (2) updated to address any comments raised by the State during that review;
 - (3) maintained and resubmitted as necessary to the State until Final Completion in accordance with Health and Safety Requirements; and
 - (4) is retained at the Site and available for inspection by the State at all times;
- (g) **(Health and safety professionals)**: must ensure that an adequate number of health and safety professionals are appointed (either by it or the Builder) to ensure that the Oversight Development Works are carried out safely and without risk to health. For the purpose of this clause 7.2(f), a health and safety professional must:
 - (1) be employed by the Developer or the Builder in a full time capacity as a safety professional;
 - (2) as a minimum, have had suitable experience as a safety professional in construction safety on a full time basis for at least 3 years and possess the required technical skills and knowledge to perform the role, which may include the attainment of a recognised certificate, degree or post graduate qualification in a safety or OHS risk management discipline; and
 - (3) be able to demonstrate competence, experience and training in safety;
- (h) **(Occupational Health and Safety Manager)**: must ensure that a suitably experienced and qualified person be appointed either by it or the Builder as 'Occupational Health and Safety Manager' for the Oversight Development to, without limiting any obligation of the Developer, be responsible for compliance with this clause 7.1 and the implementation of the Health and Safety Management Plan;
- (i) **(Independent Safety Auditor)**: must:
 - (1) engage, or procure that the Builder engages, an Independent Safety Auditor to undertake audits of the Oversight Development Works to verify compliance with this Agreement and the Health and Safety Management Plan;
 - (2) allow 4 full Business Days per year for the conduct of audits in accordance with this clause 7.2(i), although these 4 days need not be consecutive. and
 - (3) provide to the State, within 30 Business Days of the end of 1 January and 1 July each calendar year during the Oversight Development Works, an audit report, prepared by the Independent Safety Auditor in respect of,

the Developer's compliance with its obligations in respect of health and safety including in respect of the Health and Safety Management Plan;

- (j) **(Health and Safety Management Plan audit)**: must, prior to submitting the Health and Safety Management Plan for review in accordance with clause 7.2(f):
 - (1) engage, or procure that the Builder engages, an Independent Safety Auditor to undertake an audit of the Health and Safety Management Plan in accordance with the Health and Safety Requirements ; and
 - (2) provide to the State an audit report, prepared by the Independent Safety Auditor, in respect of the Health and Safety Management Plan;
- (k) **(Implement audit findings)**: must, if an audit report prepared by the Independent Safety Auditor reveals any non-conformances or areas for safety improvement, promptly (and in any event, in the timeframes specified in the audit report) take such steps as are necessary to resolve those non-conformances and provide evidence of those steps to the State;
- (l) **(Monitoring)**: throughout the life of the Oversight Development Works,
 - (1) must undertake or procure such monitoring and auditing of the Oversight Development Works as is necessary to ensure that, at all times, the Oversight Development Works are being performed in compliance with all OHS Legislation the requirements of this Agreement and the Health and Safety Management Plan;
 - (2) acknowledges that the State, the State Representative, or any other contractor or agent of the State can, at any reasonable time, review, inspect, monitor or otherwise observe the Developer's health and safety systems, work practices and procedures related to the Oversight Development Works; and
- (m) **(Health and Safety Requirements)**: must comply with the Health and Safety Requirements.

7.3 Principal Contractor

- (a) **(Appointment of Principal Contractor)** The State will:
 - (1) appoint the Builder or a related entity of the Developer as Principal Contractor, upon CBD North OSD Acceptance until Final Completion, in connection with the Oversight Development Works and the Construction Site; and
 - (2) authorise the Builder or a related entity of the Developer to manage or control the Construction Site to the extent necessary to discharge the duties of a Principal Contractor under the OHS Legislation.
- (b) **(Procure consent)**: The Developer must procure that the Builder or a related entity of the Developer consents to being appointed as Principal Contractor in respect of the Construction Site from CBD North OSD Acceptance, to the extent:
 - (1) requested by the owner of that land; and
 - (2) that the Builder will be carrying out 'construction work' within the meaning of regulation 5.12 of the OHS Regulations.
- (c) **(Obligations of Principal Contractor)** The Developer must ensure that the Builder:
 - (1) accepts the appointment as Principal Contractor and complies with all obligations imposed on a Principal Contractor under the OHS Legislation at its own cost;

- (2) displays Principal Contractor signs that are clearly visible from outside the Construction Site, identifying the Principal Contractor in accordance with OHS Legislation; and
 - (3) immediately notifies the State in writing if it believes the appointment referred to in clause 7.3(a)(1) is not sufficient to enable it to discharge the duties of a Principal Contractor under OHS Legislation.
- (d) **(Developer to assist):** The Developer must do all things necessary to assist, and refrain from doing anything that may impede, the Builder in discharging its Principal Contractor obligations under OHS Legislation.

7.4 Notification

- (a) **(Occurrence of Health and Safety Incidents):** the Developer must (and must ensure that all Subcontractors) or procure that the Builder, upon the occurrence of a Health and Safety Incident:
- (1) comply with any requirements under the OHS Legislation to notify any relevant Authority of the Health and Safety Incident;
 - (2) notify the State of the Health and Safety Incident:
 - (A) in the case of a Health and Safety Incident involving:
 - (i) an incident which is actually or potentially life threatening or life altering;
 - (ii) a workplace accident which is actually or potentially of a serious nature; or
 - (iii) an actual or potential injury to a member of the public,immediately when it is safe to do so by phone and confirmed by facsimile or email within 2 hours; and
 - (B) in all other cases, within 24 hours after the occurrence of the Health and Safety Incident;
 - (3) in relation to any Health and Safety Incident promptly provide to the State:
 - (A) a copy of any incident and investigation report;
 - (B) a copy of any notification to an Authority;
 - (C) the details of the potential or actual incident or issue;
 - (D) the actions taken and proposed to be taken (including both short term and long term actions);
 - (E) where requested, the key personnel or key organisations involved in taking those actions and their contact details;
 - (F) where requested, the proposed media response and approach to managing and dealing with the media;
 - (G) any entry reports and notices received from an Authority or its representative or any other person acting pursuant to the OHS Legislation, which arise out of or in connection with the Oversight Development or the Construction Site;
 - (H) updates of any material developments and status of completion of any correction actions;

- (I) as soon as practicable after the Health and Safety Incident has occurred, provide the State with evidence that the hazards or risks giving rise to the Health and Safety Incident have been appropriately identified and controlled to prevent the recurrence of the same or a similar Health and Safety Incident; and
 - (J) all other information reasonably requested by the State.
- (b) **(Reporting)**: If requested by the State in respect of the Health and Safety Incident, the Developer must:
 - (1) provide the State with a written health and safety alert, which summarises the facts and circumstances surrounding a Health and Safety Incident and which the State can circulate (in amended or un-amended form) to other persons in order to facilitate safety learning; and
 - (2) provide a briefing to the State regarding the Health and Safety Incident and response and ensure that the briefing is attended by those senior representative of the Developer and the Subcontractor who are nominated by the State (acting reasonably).

7.5 OHS Accreditation Scheme

The Developer:

- (a) **(OHS accreditation)**: warrants that the Builder is accredited under the OHS Accreditation Scheme; and
- (b) **(Builder requirements)**: while building work (as defined in section 6 of the Building and Construction Industry (Improving Productivity) Act 2016 (Cth)) is carried out, must ensure that the Builder:
 - (1) subject to the exclusions specified in the *Fair Work (Building Industry - Accreditation Scheme) Regulations 2016 (Cth)*, maintains accreditation under the OHS Accreditation Scheme while building work (as defined in section 6 of the *Building and Construction Industry (Improving Productivity) Act 2016 (Cth)*) is carried out; and
 - (2) complies with all conditions of the OHS Accreditation Scheme accreditation.

8 Industrial relations

8.1 Industrial relations warranties

The Developer warrants that:

- (a) before Financial Close, it informed itself of all matters relevant to the engagement of labour in connection with the Oversight Development Works; and
- (b) all labour engaged by a Subcontractor in connection with the performance of the Oversight Development Works will be engaged in such a manner which allows the Developer to comply with its obligations under this Agreement.

8.2 The Developer is responsible for industrial relations management

- (a) Except to the extent expressly set out in this Agreement, the Developer accepts responsibility and risk for industrial relations relating to the Oversight Development Works, including the management of Industrial Action in connection with the Oversight Development Works at its own expense.
- (b) The Developer must:
- (1) comply with, and ensure that all Subcontractors comply with, all Industrial Relations Laws and, upon request, provide the State with evidence of such compliance as the State reasonably requires;
 - (2) comply with, and ensure that the Developer D&C Workforce comply with, to the extent relevant, the IR Management Plan and, upon request, provide the State with evidence of such compliance as the State reasonably requires;
 - (3) cooperate with, and ensure that the Developer D&C Workforce cooperate with, any Associates of the State or other persons on the Site in order to maintain, to the extent permitted by Law, a stable industrial relations environment;
 - (4) upon request by the State, attend meetings convened by the State for the purpose of discussing labour matters or Industrial Relations Matters relevant or relating to the Oversight Development Works, the Site or the Metro Tunnel;
 - (5) prepare and submit to the State a Monthly IR Report;
 - (6) immediately advise the State in writing of any act, fact or circumstance associated with the activities of the Developer or any other person relevant to the ability of the Developer to perform or procure the performance of the Oversight Development Works in a manner consistent with this clause 8; and
 - (7) immediately notify the State of the particulars concerning any actual, or proposed, change to the Labour Conditions.
- (c) Notwithstanding any other provision of this Agreement, the Developer acknowledges and agrees that:
- (1) it accepts the risk of the existence of, and any new Law, or change in, or disallowance or repeal of, any existing Law, relating to the Commonwealth Building Code;
 - (2) it may not bring any claim under this Agreement for compensation, time, costs, expenses, reimbursement, modification or otherwise as a result of the existence, disallowance, application to any person, or any obligation to comply with, directly or indirectly, the Commonwealth Building Code; and
 - (3) any industrial action directly or indirectly arising in connection with the Commonwealth Building Code, including industrial action:
 - (A) in respect of any transitional or implementation arrangements concerning the Commonwealth Building Code;
 - (B) allowance or disallowance, or terms of allowance or disallowance, of or in relation to the Commonwealth Building Code; or

- (C) as a direct or indirect consequence of interactions between any person and the State (or its Associates), or an act or omission of the State, concerning the Commonwealth Building Code (including any disallowance motions in respect of the Commonwealth Building Code),
- will not be considered to be the result of any act or omission of the State or its Associates.
- (d) Prior to accessing the Site, the Developer must ensure that an IR Management Plan is prepared and submitted to the State in accordance with Attachment 6. The IR Management Plan must be reviewed and amended (if necessary) in accordance with Attachment 6 until Final Completion, and each amended version of the IR Management Plan must be resubmitted to the State in accordance with Attachment 6.
- (e) The Developer must only engage a person as a Subcontractor where the person satisfies the Developer that it:
- (1) has the capability and resources to comply with the IR Management Plan and Industrial Relations Laws; and
 - (2) will manage labour matters and Industrial Relations Matters while performing the Oversight Development Works in a manner that will not, to the extent permitted by Law, expose the Oversight Development Works, the Site or the Metro Tunnel to Industrial Action.
- (f) Until Final Completion, the Developer must or must procure the Builder to undertake such monitoring and auditing of the Oversight Development Works as is necessary to ensure that, at all times, the Oversight Development Works are being performed in compliance with all Industrial Relations Laws, the requirements of this Agreement and the IR Management Plan.
- (g) Where the Developer identifies a non-conformance under clause 8.2(f), the Developer must immediately notify the State of:
- (1) the details of the non-conformance; and
 - (2) the steps to be taken to rectify the non-conformance and the time by which such rectification will occur.
- (h) Following notification of a non-conformance under clause 8.2(g), the Developer must provide confirmation of rectification of that non-conformance and, upon request, provide the State with evidence of such rectification.

8.3 Industrial Action

- (a) The Developer must, to the extent permitted by Law, at its expense:
- (1) take all reasonable steps to:
 - (A) prevent the occurrence of;
 - (B) minimise the continuance of; and
 - (C) resolve,any Industrial Action;
 - (2) immediately advise the State of any:
 - (A) Industrial Action; or
 - (B) potential or threatened Industrial Action of which it becomes aware; and

- (3) provide the State with regular updates on:
 - (A) the reasonable steps taken, or proposed to be taken, in accordance with clause 8.3(a)(1); and
 - (B) the status of any actual, potential or threatened Industrial Action notified under clause 8.3(a)(2).
- (b) The Developer is responsible for all Loss, delay or disruption that any party suffers arising out of, or in connection with, any Industrial Action.
- (c) The State is not liable for, or in connection with, any Claim (and the Developer may not make any Claim) arising out of, or in connection with, any Industrial Action.

8.4 Right of entry

- (a) The Developer (either itself or by procuring the Builder do so) must immediately:
 - (1) inform the State, in a manner and form required by the State, of trends regarding entry to the Site by Union Officials including, but not limited to, trends for each union with respect to reasons for entry, regularity of entry and timing of entry; and
 - (2) notify the State of any dispute or disagreement arising in relation to right of entry to the Site or the Oversight Development Works.
- (b) The Developer must ensure that:
 - (1) any entry to the Site by a Union Official complies with Industrial Relations Laws; and
 - (2) the Union Official complies with the Health and Safety Management Plan when on-Site.

8.5 Liability and Indemnity

- (a) Subject to clause 8.5(b), the Developer accepts sole responsibility for preventing, and assumes the risk of, all Loss caused by, arising out of or in connection with:
 - (1) all Industrial Action affecting the Oversight Development Works;
 - (2) all Industrial Action by the Developer D&C Workforce.
- (b) The Developer's liability under clauses 8.5(a)(1) and 8.5(a)(2) is reduced to the extent that the relevant Loss has been caused or contributed to by any failure of the State to act in accordance with the requirements of this Agreement.
- (c) The Developer indemnifies, and holds harmless, the State and its Associates against any Loss or Claim of any nature arising under, out of or in connection with any non-compliance or breach by the Developer D&C Workforce of this clause 8.
 - (1) If it is reasonably necessary for the State to commence, or become involved in, proceedings relating to threatened or actual Industrial Action in connection with the Oversight Development Works or the Site as a result of any non-compliance or breach by the Developer D&C Workforce of this clause 8,

the Developer indemnifies the State and its Associates for any reasonable legal cost and expenses incurred in relation to such proceedings.

9 Approvals and Laws

9.1 Approvals to be obtained by the State

- (a) The Developer acknowledges that on or before the Agreement Date the State obtained the Planning Scheme Amendment.
- (b) [not disclosed].
- (c) If:
 - (1) the parties agree that a State Intervention Event has occurred; and
 - (2) the parties do not agree on an appropriate course of action or any amendments to the Oversight Development necessary to enable the Oversight Development to proceed on terms acceptable to the Developer acting reasonably,

within 60 days after the State receives notice under clause **Error! Reference source not found.**, the State or the Developer may terminate this Agreement by notice to the other without prejudice to any party's rights under this Agreement or at law arising prior to termination.

9.2 Approvals to be obtained by Developer

- (a) The Developer must at its own cost and expense:
 - (1) obtain, maintain and comply with all Approvals (other than the Planning Scheme Amendment); and
 - (2) comply with the Planning Scheme Amendment,which from time to time may be necessary for the Site, the Oversight Development Works and the Oversight Development, or the use or occupation of the Site, the Oversight Development Works and the Oversight Development, regardless of whether the Approval requires the compliance by either or both of the Developer and the State or any other person.
- (b) For the avoidance of doubt, if any aspect of an Approval or the Planning Scheme Amendment requires a secondary consent, plans to be submitted and endorsed, submission, verification or other supplementary action or information (whether as a condition of the Approval taking effect or otherwise), those further matters will be the responsibility of the Developer.

9.3 Compliance with Laws

The Developer must comply with all Laws from time to time applicable to it, the Site, the Oversight Development Works and the Oversight Development or the use or occupation of the Site, the Oversight Development Works and the Oversight Development.

9.4 Assistance from State

Without limiting any obligation of the Developer, prior to Final Completion if the State reasonably is able to assist the Developer in obtaining any Approval referred to in the preceding paragraphs of this clause 9, the State will, at the reasonable request of and at the cost and expense of the Developer, use its reasonable endeavours to provide such assistance.

9.5 Approvals prior to Construction Commencement

The Developer must prior to Construction Commencement:

- (a) provide the State with evidence that all Approvals (other than the Planning Scheme Amendment) required to be obtained by the Developer have been obtained and are in full force and effect and permit the Oversight Development Works to commence on and from Construction Commencement.

10 Construction Commencement

10.1 Construction Commencement

- (a) Following CBD North OSD Acceptance, the Developer must commence substantive construction of the Oversight Development on the Licenced Area (**Construction Commencement**) prior to the Construction Commencement Deadline. For the purposes of this clause, Construction Commencement means physically commencing the construction of the Oversight Development Works and diligently pursuing progress of the Oversight Development Works.
- (b) On and from Construction Commencement, the Developer must diligently pursue the Oversight Development Works and achieve Final Completion on or by the Oversight Development Sunset Date.
- (c) Without limiting clause 10.1(b), on and from Construction Commencement, the Developer must use reasonable endeavours to achieve Final Completion on or by the Scheduled Date for Final Completion provided that at no time is the Developer under an obligation to accelerate completion of the Oversight Development Works or incur additional costs or adopt an increased risk profile. All that is required of the Developer is to take steps to bring about Final Completion by the Scheduled Date for Final Completion so far as it is reasonably able to do so within the scope and timing of the resources which it would otherwise have allocated to the Oversight Development Works during its proposed program for the Oversight Development Works.
- (d) If the Developer considers that the Developer will not have achieved Final Completion prior to the Station Opening Date, then the Developer must within one month prior to the Station Opening Date:
 - (1) notify the State of the Developer's estimate of the date on which Final Completion will occur; and
 - (2) provide to the State an activation plan to apply from the Station Opening Date (**Scheduled Date Activation Plan**). The Scheduled Date Activation Plan must include the following elements:
 - (A) a framework of the nature and types of activation to be implemented by the Developer including an interim retail activation plan prior to the proposed date of Final Completion. The interim retail activation plan must provide that:
 - (i) to the extent that a tenancy has been procured and the relevant retail works are under construction, appropriate hoardings will be provided;
 - (ii) access to the Station will be maintained through an agreed management plan; and

- (iii) retail outlets to be leased will be activated with appropriate hoardings with artwork and/or signage; and
- (B) activation of construction hoardings surrounding the Construction Site with artist imagery and community message boards.

10.2 Activation of site prior to Construction Commencement

- (a) If CBD North OSD Acceptance occurs and the Developer (acting reasonably) does not anticipate that Construction Commencement will occur until sometime after CBD North OSD Acceptance, the Developer must prepare and implement a site activation plan which has the elements described in clause 10.2(b) (**Site Activation Plan**).
- (b) The Site Activation Project Plan must include the following elements:
 - (1) a framework of the nature and types of activation to be implemented by the Developer before Construction Commencement; and
 - (2) activation of construction hoardings surrounding the Construction Site with artist imagery and community message boards.

11 Oversight Development and Environmental Issues

11.1 Grant of Construction Licence

The State will procure the grant to the Developer a non-exclusive licence:

- (a) in respect of the Construction Site;
- (b) commencing on, or prior to date of CBD North OSD Acceptance; and
- (c) substantially in the form of, and on the terms specified in, the Construction Licence.

11.2 Use of Licenced Area

- (a) The State acknowledges and agrees that on and from the date the Construction Licence is granted, the Developer will be entitled to use the Licenced Area on the terms set out in the Construction Licence and the terms of this Agreement.
- (b) The Developer must comply with the following terms in relation to the Licenced Area:
 - (1) the Developer is responsible for ensuring that at all times the Licenced Area is left in a clean, tidy and safe condition and that all construction waste, rubbish and debris are removed promptly from the Licenced Area in accordance with Best D&C Practices;
 - (2) the Developer must ensure that at all times the physical appearance and amenity of the Licenced Area is maintained in such a way that it does not detract from the amenity of the Serviced Area;
 - (3) on Final Completion of the Oversight Development the Developer must remove all Plant and Equipment, facilities, vehicles (other than those required for the operation of the Oversight Development) and any

- construction waste, machinery, rubbish and debris from the laydown areas and other parts of the Licenced Area used for the Oversight Development Works; and
- (4) the Developer acknowledges and agrees that the State and its Associates, any Authorised Person, Project Co, and the Project D&C Subcontractor may require access to the Licenced Area on a daily or other periodic basis and the Developer must co-operate with the State, the Authorised Persons, Project Co and the Project D&C Subcontractor in ensuring that they are given reasonable access at all times to the Licenced Area.
- (c) When entering the Licensed Area in accordance with clause 11.2(b)(4), the State must and must ensure its Associates and any Authorised Person:
- (1) comply with the Oversight Development Access and Interface Protocols and any generally applicable safety and security requirements of the Developer;
- (2) do not unnecessarily interfere with the carrying out of the D&C Activities; and
- (3) do not damage the Oversight Development Works or the Licenced Area.
- (d) The Developer must consult regularly and as necessary with the State regarding:
- (1) the effect (if any) of the undertaking of the Oversight Development Works on the use of the Serviced Area; and
- (2) the procedures or arrangements (if any) that can be put in place by the Developer during the undertaking of the Oversight Development Works to:
- (A) minimise as far as reasonably practicable any disruption to the use of the Serviced Area; and
- (B) ensure as far as reasonably practicable that the use of the Serviced Area can be carried out safely.
- (e) The Developer is responsible for:
- (1) gaining access to; and
- (2) negotiating with persons holding interests in,
land or airspace not forming part of the Licenced Area which the Developer requires access to, or any other right in respect of, for the purpose of the carrying out the Oversight Development Works and obtaining access to and from the Licenced Area.
- (f) The Developer is not entitled to any Claim against the State in connection with access or a failure to gain or delay in gaining access, or any other right in respect of land or airspace not forming part of the Licenced Area.
- (g) The Developer indemnifies and will keep indemnified the State and its Associates from and against all Liabilities and Claims of every kind arising from the Developer's or its officers', employees', agents', Subcontractors' or consultants':
- (1) access to; or
- (2) actions in relation to gaining access to or negotiating with persons holding interests in,

land or airspace not forming part of the Licenced Area.

11.3 Station Works

- (a) **(Priority):** This clause 11.3 has priority over and operates notwithstanding the terms of clause 11.5.
- (b) **(Interface):** Without limiting clause 11.2(c), the Developer acknowledges that the State, any of its Associates and other persons including Project Co, the Project Co Associates, the Project D&C Subcontractor, Authorised Persons, and Precinct Users (together, **the Interface Parties**), may (subject to the Interface Agreement and the Oversight Development Access and Interface Protocols) carry out work, services, activities and functions on, adjacent to or in the vicinity of the Precinct.
- (c) **(Co-operation):** Except to the extent the Developer is expressly entitled to relief as a State Extension Event, the Developer bears all risk in respect of, and will not make any Claim against the State in relation to, the Interface Parties and must:
 - (1) permit the Interface Parties to undertake their work, services, activities and functions;
 - (2) fully co-operate with the Interface Parties;
 - (3) carefully co-ordinate and interface the Oversight Development Works with the work, services, activities and functions carried out or to be carried out by the Interface Parties;
 - (4) carry out the Oversight Development Works so as to minimise interference, disruption or delay to the work, services, activities and functions of the Interface Parties; and
 - (5) notify the State of any problems which the undertaking or intended undertaking of any works, services, activities or functions of the Interface Parties may have on the carrying out of the Oversight Development Works as soon as possible after becoming aware of such problems.
- (d) Without limiting clause 11.3(b), but subject to 11.3(c), the Developer must, at all times:
 - (1) attend all meetings called by the State to plan, review and determine coordinated activities and the management of interfaces (including access) between the Oversight Development Works and the construction, installation, commissioning and site acceptance testing of Project Co;
 - (2) continuously plan, program and perform Oversight Development Works so as to:
 - (A) coordinate its plans and designs with those of Project Co; and
 - (B) minimise any interference with, or hindrance or impact of, on or by, the performance of construction, installation, commissioning and site acceptance testing of Project Co;
 - (3) where any damage, interference or hindrance referred to in clause 11.3(d)(2) is the unavoidable consequence of the Oversight Development Works, immediately notify the State in writing, with a

view to reaching an agreed procedure to prevent or minimise any such damage, interference or hindrance; and

- (4) at all times cooperate with the State so as to promote and foster a coordinated and integrated approach to the Oversight Development Works and the construction, installation, commissioning and site acceptance testing of the Station Works and the Services.
- (e) Where the Developer in carrying out the Oversight Development Works is not complying with its obligations under clause 11.3 then the State may direct the Developer to take any reasonably appropriate action to ensure that the Developer complies with its obligations under clause 11.3.
- (f) The Developer:
 - (1) must comply with any direction given by the State pursuant to clause 11.3(e); and
 - (2) has no right to make any Claim against the State in respect of a valid direction given by the State pursuant to clause 11.3(e).

11.4 Other Developments

- (a) **(No claims)** Except to the extent the Developer is expressly entitled to relief under this Agreement, the Developer and each of its Associates will not be entitled to make any claim against the State, and will not be entitled to any relief under this Agreement or any other Oversight Development Agreement, in respect of any fact, matter or thing relating to the Station Works or operation of the Station or Oversight Development.
- (b) **(Dual role)** The parties acknowledge that the Developer may engage:
 - (1) the Project D&C Subcontractor as the Builder; and
 - (2) the Project Maintenance Subcontractor to provide facility management services in respect of the Oversight Development.

11.5 Coordination Plan

- (a) Prior to Construction Commencement, the Developer must at its own cost and expense prepare a plan (**Coordination Plan**) detailing:
 - (1) the construction program for the Oversight Development Works;
 - (2) the impact of the Oversight Development Works on the Station Works;
 - (3) the measures to be implemented to ensure that there is no interference with, disruption, obstruction, delay or hindrance to the carrying out of the Station Works as a result of the Oversight Development Works; and
 - (4) the measures to be implemented to ensure that the Oversight Development Works do not disrupt, obstruct or hinder the ongoing operation of the Station.
- (b) The Developer must submit the Coordination Plan to the State for the review and approval of the State. The State will advise the Developer within 15 Business Days if it does not approve the Coordination Plan submitted. The State may only not approve the Coordination Plan if the State acting reasonably considers that an aspect of the Oversight Development Works will or has the potential to adversely affect the Station Works or the ongoing operation of the Station. The State cannot require any amendment to the Coordination Plan

which would result in the Coordination Plan being inconsistent with or otherwise derogate from the Developer's rights under the Interface Agreement or the Oversight Development Access and Interface Protocols.

- (c) The Developer must comply with any direction or requirement required by the State to be included in the Coordination Plan to:
 - (1) minimise any adverse impact on the Station Works; or
 - (2) minimise any adverse impact on the ongoing operation of the Station.
- (d) The State or the Developer may refer any dispute in relation to the non-approval of the Coordination Plan under this clause 11.5 for resolution by an independent expert in accordance with clause 42.3, in which case the Coordination Plan will be as determined by the independent expert in accordance with that clause.
- (e) The State's review and approval of the Coordination Plan, or the determination of a dispute in relation to the Coordination Plan by an independent expert in accordance with clause 42.3 does not:
 - (1) entitle the Developer to make any Claim;
 - (2) in any way limit or change the Developer's obligations under this Agreement or any other Oversight Development Agreement; or
 - (3) relieve the Developer of any liabilities,with respect to the design, construction and commissioning of the Oversight Development Works.

12 Site conditions

12.1 Developer to inform itself

The Developer:

- (a) **(Suitability and risk assessment)**: warrants that it has, and it will be deemed to have, done everything (including all assessments tests or studies of the Site and its surroundings) that would be expected of a prudent, competent and experienced contractor in the position of the Developer:
 - (1) in assessing the risks regarding the Site Conditions;
 - (2) in ensuring that this Agreement contains allowances to protect it against any risks regarding the Site Conditions eventuating; and
 - (3) in order to determine the suitability of the Site and its surroundings for the Oversight Development; and
- (b) **(Sufficient access)**: acknowledges and agrees that:
 - (1) it has had sufficient access to the Site prior to Financial Close; and
 - (2) it has had the opportunity to carry out all assessments, tests and studies necessary,to determine the suitability of the Site and its surroundings for the Oversight Development and to familiarise itself with the Site Conditions.

12.2 Environmental issues

The Developer must:

- (a) **(no industrial waste or hazardous substance)**: during any period where the Developer is entitled to use or occupy the Site, not use or allow it to be used, such that:
 - (1) any spoil, Industrial Waste or Hazardous Substance is abandoned or dumped on the Site;
 - (2) any Industrial Waste or Hazardous Substance is handled, disposed of, disturbed, discharged or released in a manner which is likely to cause or contribute to an Environmental Hazard; or
 - (3) any other substance is handled, disposed of, disturbed, discharged, released, deposited to, or emanated from, the Site such that a state of Contamination occurs other than as permitted by Law or an Approval;
- (b) **(environmental responsibility)**: at all times carry out the D&C Activities in an environmentally responsible manner and in accordance with Best D&C Practices, so as to protect the Environment and take all reasonable and practicable measures to prevent or minimise adverse impacts on the Environment;
- (c) **(reports)**: promptly provide to the State copies of all reports, surveys, audits and monitoring results in respect of the Environmental Requirements when they are obtained;
- (d) **(manage waste disposal)**: manage and be responsible for the handling and proper disposal or removal of all waste, rubbish, debris, redundant materials, spoil and Industrial Waste produced by the D&C Activities in accordance with Best Industry Practices, all relevant Approvals and this Agreement;
- (e) **(directions)**: comply with all directions by the State regarding the removal from the Site and disposal of any Industrial Waste or Hazardous Substance; and
- (f) **(Pollution and Contamination)**: not cause or contribute to any Pollution or Contamination.

12.3 Contamination

- (a) **(Contamination caused or contributed to)**: The Developer must Remediate, to the standard required by and in accordance with, the Law and the Environmental Requirements, any Contamination which is caused or contributed to in the carrying out of the D&C Activities.
- (b) **(Contamination disturbed or interfered with)**: The Developer must Remediate, to the standard required by and in accordance with, the Law and the Environmental Requirements, any Contamination which is on, in, over or which has emanated or is emanating from or to the Site and which is disturbed, exacerbated or interfered with in the carrying out of the D&C Activities.

12.4 Contamination notification requirements

- (a) **(Notification)**: If the Developer discovers any Contamination on, in, over or emanating from or to the Site (whether or not the Developer has caused or contributed to that Contamination), it must notify the State as soon as practicable, but nevertheless within 5 Business Days after the discovery of the Contamination.
- (b) **(Notification requirements)**: The Developer's notice under clause 12.4(a) must contain all relevant details in relation to the Contamination, including:
 - (1) the type of Contamination;

- (2) the location of the Contamination; and
 - (3) the nature and extent of the Contamination,to the extent such details are known at the time the notification is provided.
- (c) **(Contamination Notice):** The Developer must, at all times comply, and ensure that all of its Associates comply, with any Contamination Notice relating to Contamination on, in, over, or that emanated or is emanating from or to, the Site, regardless of whether:
 - (1) the Contamination Notice is addressed to the State, the Developer or some other person; and
 - (2) the Contamination occurred before or after the Developer or any other person was given access to the Site.
- (d) **(Disputing a Contamination Notice):** Without limiting the Developer's obligation under this clause 12.4, nothing in this clause 12.4 prevents the Developer from disputing the issue of a Contamination Notice with the EPA or taking action against a third party with respect to the Contamination.
- (e) **(Parties not to cause service of Contamination Notice):** Subject to their respective obligations at Law, and the functions and powers of the EPA, none of the State, the Developer, or any of the Developer's Associates will do anything with the intent, directly or indirectly, of causing or being likely to cause the issue or service of a Contamination Notice.
- (f) **(Indemnity):** the Developer must indemnify the State against any Claim arising out of or in connection with any:
 - (1) Contamination to the extent that the Developer has caused or contributed to it that the Developer is required to Remediate under this clause 12.4;
 - (2) Contamination that has been caused or contributed to by the Developer to the extent that it would have been prevented or minimised by a prudent, experienced and competent contractor in the circumstances; or
 - (3) failure of the Developer to comply with any obligation under this Agreement in connection with Contamination that has been caused or contributed to by the Developer.

13 Native Title and Artefacts

13.1 Native Title

As between the State and the Developer, the State is responsible for:

- (a) dealing with any Native Title Claim in respect of any part of the Site, and taking any action required in accordance with the TOS Act or any LUAA in connection with the Oversight Development;
- (b) the payment of any compensation or other moneys required to be paid to the native title holders of any part of the Site as a consequence of a successful Native Title Claim; and

- (c) the payment of any compensation or other moneys required to be paid as a result of the application of the TOS Act or any LUAA applicable to the Oversight Development.

13.2 Artefacts

- (a) As between the State and the Developer, if an Artefact is discovered on or under the surface of the Site:
 - (1) it will be the absolute property of the State; and
 - (2) the Developer must:
 - (A) immediately notify the State of the discovery;
 - (B) permit the State to watch or examine any excavation on the Site; and
 - (C) take every reasonable precaution in carrying out the D&C Activities so as to prevent Artefacts being damaged or removed until appropriate arrangements for dealing with, or removing, the Artefacts have been made.

13.3 General Provision

If there is a:

- (a) Native Title Claim or Heritage Claim in connection with; or
- (b) discovery of Artefacts in,
any part of the Site, the Developer must:
 - (c) continue to carry out its obligations in accordance with this Agreement, except to the extent otherwise:
 - (1) directed by the State or the Commonwealth;
 - (2) ordered by a court or tribunal of competent jurisdiction; or
 - (3) required by Law; and
 - (d) provide all reasonable assistance to the State in connection with dealing with the Native Title Claim, Heritage Claim or Artefact discovery.

13.4 Cultural Heritage Management Plan

- (a) The Developer must comply with all reasonable directions of the State concerning Artefacts and the protection of Aboriginal Cultural Heritage under the *Aboriginal Heritage Act 2006 (Vic)*.
- (b) If, in accordance with clause 13.4(a) or pursuant to the terms of the *Aboriginal Heritage Act 2006 (Vic)*, the Developer is required to prepare a Cultural Heritage Management Plan in respect of the D&C Activities or is required to make any application in connection with that Cultural Heritage Management Plan:
 - (1) the State may, in its absolute discretion, elect to make the application to the exclusion of the Developer; and
 - (2) the Developer:
 - (A) must prepare all necessary documentation and information for consideration by the State;

- (B) must provide all necessary assistance reasonably required by the State to make the relevant application; and
 - (C) bears all risks associated with making the application and obtaining the necessary Approval.
 - (c) If a Cultural Heritage Management Plan is approved, the Developer must:
 - (1) comply with:
 - (A) the provisions and procedures of the Cultural Heritage Management Plan; and
 - (B) all reasonable directions of the State concerning Artefacts and the protection of Aboriginal Cultural Heritage; and
 - (2) immediately notify the State of any:
 - (A) breach or alleged or potential breach of; or
 - (B) non-compliance, or alleged or potential non-compliance, with,
- the conditions or requirements of the Cultural Heritage Management Plan.

14 General Obligations

14.1 Responsibility for Construction

The Developer:

- (a) is responsible for and is not entitled to make any Claim in connection with:
 - (1) the Construction Site and Site Conditions, except as specifically provided in this Agreement; and
 - (2) construction means, methods and techniques used to undertake the Oversight Development Works;
- (b) must provide everything (including labour, materials and plant) necessary for the design and construction of the Oversight Development Works;
- (c) will carry out all investigations necessary to ensure the adequacy and suitability of the Construction Site; and
- (d) must put in place suitable procedures or arrangements to deal with site management.

14.2 Interconnection

Subject to the terms of the Interface Agreement, where any Oversight Development Works are attached to or otherwise form part of the infrastructure leased or owned by any other person, the Developer must do all things reasonably necessary to assist that person to ensure proper integration of Oversight Development Works, once they have been completed, with the infrastructure which is owned or leased by that person.

15 Oversight Development Final Design Documentation

15.1 Development of Final Design Documentation

- (a) The Developer must, at its own cost and expense procure the development and completion of the Final Design Documentation to ensure that the Oversight Development Works:
- (1) are, subject to variations and modifications permitted under this Agreement, designed generally in accordance with the Concept Design Documentation (as approved in accordance with clause 15.2);
 - (2) are consistent with, and provide for the matters contained in, the Planning Scheme Amendment;
 - (3) incorporate any Project Agreement Modification; and
 - (4) comply with Best D&C Practices.
- (b) The State Representative will have the right to:
- (1) participate in key meetings;
 - (2) review and, in relation to any matter on which the State can decline approval under clause 15.3(b), comment on Final Design Documentation; and
 - (3) otherwise participate in the development of the elements of the Final Design Documentation,
- that relate to:
- (4) the physical and functional interfaces between the Oversight Development, the Station, public spaces and street frontages (**Interfaces**); and
 - (5) the Key Design Elements.
- (c) The Developer must bear all costs and expenses of the development of the Final Design Documentation.
- (d) Without limiting the Developer's obligations under this clause 15, the State acknowledges that:
- (1) in the development of the Final Design Documentation:
 - (A) if any element of the Final Design Documentation is disclosed to the State; and
 - (B) the State does not object or require changes in relation to that element within 10 Business Days after it is disclosed,the Developer will give the State a further request for the State's approval and if the State fails to respond to that further request within 20 Business Days of that further request, the State cannot in its capacity as counterparty under this Agreement subsequently object to or require changes in relation to that element.
 - (2) once Final Design Documentation becomes Approved Design Documentation for the Oversight Development Works for the purposes of this Agreement then the State in its capacity as counterparty under this Agreement cannot object to any Approved Design Documentation.

15.2 Variations by the Developer

- (a) Subject to clause 15.2(b), the Developer may change the Oversight Development, including the Final Design Documentation, at any time prior to Final Completion without the approval of the State.
- (b) The Developer must not change the Oversight Development without the prior written consent of the State (which consent will not be unreasonably withheld or delayed) if:
 - (1) the change is in relation to a Matter of State Concern; or
 - (2) the consequence of that proposed change is that the Oversight Development would not comply with the Advertising Restrictions.
- (c) Deleted.
- (d) The Developer must bear all costs and expenses of any change to the Oversight Development.
- (e) The State or the Developer may refer any dispute in relation to this clause 15.2 for resolution by an independent expert in accordance with clause 42.
- (f) Without limiting any other clause in this Agreement, this clause 15.2 ceases to have any effect on and from the Final Completion Date.

15.3 Submission of Final Design Documentation

- (a) The Developer must upon request by the State (which request may not be made at any time before [not disclosed] after the Financial Close Date unless otherwise agreed by the Developer or if the Final Design Documentation have been prepared by the Developer) and prior to finalising the Final Design Documentation, submit that documentation to the State for the State to review any Matters of State Concern.
- (b) The State will advise the Developer within 15 Business Days if it does not approve the Final Design Documentation submitted in accordance with clause 15.3(a). The State may only not approve the Final Design Documentation if the State reasonably considers that an aspect of the design of the Oversight Development will adversely affect a Matter of State Concern or does not comply with the Planning Scheme Amendment.
- (c) The State undertakes no responsibility or duty in respect of any aspect of the design of the Oversight Development.
- (d) Unless the State does not approve the Final Design Documentation under clause 15.3(b), that Final Design Documentation will be Approved Design Documentation for the Oversight Development Works for the purposes of this Agreement.
- (e) If the State does not approve the Final Design Documentation under clause 15.3(b), then the State will, within 15 Business Days after it decides to not approve the Final Design Documentation, notify the Developer that the State requires the Developer to make amendments to the Final Design Documentation, in which case:
 - (1) the Developer must amend, in consultation with the State, the Final Design Documentation as requested by the State and resubmit the amended Final Design Documentation within 15 Business Days after receipt of the State's notice; and

- (2) this clause 15.3 will apply in respect of the resubmitted Final Design Documentation as if it were originally submitted under clause 15.3(a).
- (f) The State or the Developer may refer any dispute in relation to the non-approval of the Final Design Documentation under this clause 15.3 for resolution by an independent expert in accordance with clause 42, in which case the Approved Design Documentation for the Oversight Development Works will be as determined by the independent expert in accordance with that clause.
- (g) The State's review and approval of the Final Design Documentation, or the determination of a dispute in relation to Final Design Documentation by an independent expert in accordance with clause 42, does not:
 - (1) entitle the Developer to make any Claim;
 - (2) in any way limit or change the Developer's obligations under this Agreement or any other Oversight Development Agreement; or
 - (3) relieve the Developer of any Liabilities,with respect to the design, construction and commissioning of the Oversight Development Works.

15.4 Easements

- (a) Within 90 days after the determination of the Approved Design Documentation, the Developer must submit to the State a proposed Easement Plan for the State's approval setting out any easements, covenants, restrictions or other dealings required by the Developer for the construction, operation or use of the Oversight Development.
- (b) If, within 20 Business Days after submission of the proposed Easement Plan under clause 15.4(a) the State must notify the Developer of its approval or rejection of the proposed Easement Plan. If the State rejects the proposed Easement Plan the State must provide details of the amendments it requires to the proposed Easement Plan and set out the basis for its requirement.
- (c) If the State notifies the Developer that it approves the proposed Easement Plan submitted under clause under clause 15.4(a), then the proposed approved by the State is taken to be the Easement Plan.
- (d) If the State notifies the Developer that the State rejects the proposed Easement Plan under clause 15.4(a) and requires the Developer to make amendments to the proposed Easement Plan:
 - (1) the Developer must amend the Easement Plan as requested by the State and resubmit the amended Easement Plan within 15 Business Days after receipt of the State's notice; and
 - (2) this clause 15.4 will apply in respect of the resubmitted Easement Plan as if it were originally submitted under clause 15.4(a).
- (e) The State cannot object to any easements, covenants, restrictions or other dealings specified in a proposed Easement Plan submitted under clause 15.4(a) if that easement, covenant, restriction or other dealing is:
 - (1) consistent with the Station Land Management Principles outlined in Attachment 11; or
 - (2) reasonably necessary for the construction, operation or use of the Oversight Development having regard to the Approved Design Documentation,

provided that such easements, covenants, restrictions or other dealings specified in a proposed Easement Plan do not materially impact or prevent the use of the Station Land for its intended purposes or materially and adversely affect the Rail Operations.

16 State Initiated Modifications or Variations

16.1 Application

- (a) The whole of this clause 16 applies to OSD Modifications other than Developer Unacceptable Conditions.
- (b) Clauses 16.2, 16.6, 16.7, 16.8(a) and 16.9 apply to Developer Unacceptable Conditions, on the basis that the Developer Unacceptable Condition is an OSD Modification Order which the State has issued.
- (c) The Developer may make a Claim under this clause 16 in respect of a Developer Unacceptable Condition of a kind described in either or both of paragraph (2) and (3) of the definition of Developer Unacceptable Condition only if it does so within 3 months after the later of:
 - (1) the endorsement of the master plan comprising part of the Incorporated Document; and
 - (2) [not disclosed].

16.2 Consultation

If the State is considering a State Initiated Modification or a State Initiated OSD Variation which either:

- (a) increases, decreases or omits any part of the Oversight Development Works;
- (b) varies the Oversight Development Works; or
- (c) may cause the Developer to:
 - (1) not be able to perform any obligation under an agreement for lease entered into with a tenant in relation to any part of the Oversight Development (for example, an obligation to grant a lease to the tenant); or
 - (2) not be able to procure an agreement to lease or lease,

the State Representative must first consult with the Developer to discuss details of the proposed State Initiated Modification or State Initiated OSD Variation.

16.3 Modification Request or Variation Notice

After consultation with the Developer in respect to an OSD Modification, the State may:

- (a) issue a Modification Request under the Project Agreement; or
- (b) issue a notice to the Developer entitled "State Initiated OSD Variation" (**Variation Notice**),

requesting the Developer to submit a OSD Modification Quote for a proposed State Initiated Modification or State Initiated OSD Variation which includes details of:

- (c) the proposed OSD Modification; and

- (d) any specific information that the State requires the Developer to include in the OSD Modification Quote or that may be relevant to the preparation of the OSD Modification Quote,

(OSD Modification Request).

16.4 OSD Modification Quote

- (a) **(Submission of OSD Modification Quote):** Unless the State withdraws an OSD Modification Request, the Developer must submit a OSD Modification Quote to the State:
- (1) within 20 Business Days of receipt of the OSD Modification Request; or
 - (2) at such later time as agreed by the State (acting reasonably, taking into account the size and complexity of the proposed OSD Modification and the information included in the OSD Modification Quote).
- (b) **(Contents of OSD Modification Quote):** The OSD Modification Quote must:
- (1) include details of the lump sum cost of the OSD Modification as determined under clause 16.6;
 - (2) include the Developer's opinion as to the impact on the Value at Final Completion of the State Initiated Modification or State Initiated OSD Variation;
 - (3) include details of the basis (if applicable) on which the Developer would be prepared to fund or to procure the funding of the lump sum cost of the OSD Modification as determined under clause 16.6 if the Developer, rather than the State, were to fund the OSD Modification;
 - (4) include details of any Extension Event required as a result of the State Initiated Modification or State Initiated OSD Variation;
 - (5) include details of any variations to any existing Approval or any new Approval required for the OSD Modification;
 - (6) include details of any amendments to any relevant warranty given by the Developer under this Agreement;
 - (7) be prepared so as to avoid or minimise the effect of any Extension Event to the extent reasonably practicable;
 - (8) include any other relevant information reasonably requested by the State,
- (OSD Modification Quote).**
- (c) **(Further details):** The State must provide the Developer with further details reasonably requested by the Developer to assist the Developer in preparing its OSD Modification Quote.

16.5 State Response to OSD Modification Quote

- (a) **(Information and changes):** Once it has provided the State with the OSD Modification Quote, the Developer must:
- (1) provide the State with any additional information the State notifies that it reasonably requires to assess the OSD Modification Quote; and

- (2) make any changes to the OSD Modification Quote which the State requests and with which it agrees.
- (b) **(State response to OSD Modification Quote):** Within 20 Business Days after receiving a OSD Modification Quote or such longer period as the State reasonably requires given:
- (1) the size and complexity of the proposed OSD Modification; and
 - (2) the need for any additional information not included in the OSD Modification Quote and the time when it is subsequently provided,
- the State must:
- (3) issue a OSD Modification Order to the Developer directing the Developer to carry out the OSD Modification on the terms set out in the OSD Modification Quote or as otherwise agreed by the State and the Developer, and the Developer must implement the OSD Modification in accordance with the OSD Modification Order and clauses 16.8(a) to 16.8(b) will apply;
 - (4) notify the Developer that it does not agree with the OSD Modification Quote, including supporting documentation and reasons; or
 - (5) notify the Developer that it does not wish to proceed with the proposed OSD Modification.
- (c) **(Further information):** If the State:
- (1) requests changes to the OSD Modification Quote in accordance with clause 16.5(a); or
 - (2) notifies the Developer that it does not agree with the OSD Modification Quote in accordance with clause 16.5(b)(4),
- the Developer must provide the State with an updated OSD Modification Quote, addressing the issues raised by the State, within 10 Business Days of the receipt of the State's notice and this clause 16.5 will apply again to that OSD Modification Quote.

16.6 Pricing an OSD Modification

- (a) In determining the lump sum cost of an OSD Modification, the Developer must determine the lump sum cost of the OSD Modification on an open book basis and the Developer may have regard to any costs which may be properly and reasonably incurred by the Developer in directly considering and carrying out the OSD Modification including:
- (1) trade costs;
 - (2) re-design costs;
 - (3) reasonable contingency;
 - (4) building margin;
 - (5) incremental finance costs;
 - (6) any additional costs associated with any agreement for sublease, development agreement or other third party agreement entered into by the Developer in respect of the Oversight Development;
 - (7) the impact of OSD Modification on the Value at Final Completion of the Oversight Development;

- (8) development application costs;
 - (9) statutory fees and charges;
 - (10) the Developer's overhead and development costs (consultants, etc);
 - (11) project management and cost planning;
 - (12) development management fee based on [not disclosed] of project costs;
 - (13) development margin of [not disclosed]; and
 - (14) any other costs to be reasonably incurred by the Developer.
- (b) Consistent with the open book basis referred to in clause 16.6(a), the Developer must promptly upon request by the State's Representative make available to the State's Representative all information regarding the cost of the OSD Modification to enable the State to check and satisfy itself about the lump sum cost of the OSD Modification,
- (c) If any OSD Modification involves a net saving on the cost of construction of the Oversight Development Works to the Developer after taking into account the matters in clause 16.6(a) then the Developer must pass on [not disclosed] of the benefit of the saving to be made by the Developer on account of the OSD Modification to the State.
- (d) In the event that the State does not accept the lump sum cost of an OSD Modification, subject to clause 16.7, the State may require the cost of the OSD Modification to be determined under clause 42.

16.7 Impact on Value at Completion

In the event that the State does not accept the Developer's opinion as to the impact on the Value at Final Completion of the State Initiated Modification or State Initiated OSD Variation, the State may require the impact on the Value at Final Completion of the OSD Modification to be determined under clause 42.

16.8 OSD Modification Orders

- (a) **(Developer to implement):** If the State issues a OSD Modification Order, then:
- (1) the Developer must undertake the OSD Modification on the terms set out in the OSD Modification Order;
 - (2) the parties will account to each other in respect of the OSD Modification Order in the manner set out in clause 16.9;
 - (3) the Development Plans will be deemed to be amended in accordance with the relevant amendments set out in the OSD Modification Order;
 - (4) the State and the Developer will work cooperatively to procure any amendment to the Planning Scheme Amendment required to effect the OSD Modification; and
 - (5) the Developer must carry out its obligations under this Agreement as amended in accordance with clause 16.8(a)(3).
- (b) **(No implementation without order):** The Developer must not begin any work or incur any cost, and will not have any entitlement to make any Claim in respect of a OSD Modification unless a OSD Modification Order has been issued by the State in accordance with this clause 16.8.

16.9 Adjustment to the Development Fee or payment by the State

- (a) Subject to clause 16.4(b)(3), if the impact on the lump sum cost to the Developer of undertaking the Oversight Development Works as a result of the OSD Modification as determined in accordance with clause 16.6 (**Modification Cost Adjustment**) results in:
- (1) an increase in costs the State must pay those costs to the Developer within 20 Business Days after the amount of the Modification Cost Adjustment is agreed or determined in accordance with clause 16.6; or
 - (2) a decrease in costs the Development Fee and Contract Price shall be increased by the amount of the Modification Cost Adjustment.
- (b) If the impact of OSD Modification on the Value at Final Completion of the Oversight Development as agreed or determined under clause 42 results in:
- (1) an increase in the Value at Final Completion of the Oversight Development, the First Instalment Development Fee and the Contract Price shall be reduced by the amount of the increase; or
 - (2) a decrease in the Value at Final Completion of the Oversight Development, the First Instalment Development Fee and Contract Price shall be reduced by the amount of the decrease,
- provided that:
- (3) if the OSD Modification occurs after the First Instalment Development Fee is paid then any increase or decrease will be made to the Second Instalment Development Fee; and
 - (4) if there is a decrease in the Value at Final Completion of the Oversight Development and the decrease exceeds the relevant part of the Development Fee against which it is to be offset, the State must pay to the Developer the difference between the reduction in the Value at Final Completion of the Oversight Development and the relevant Development Fee at the same time as the relevant Development Fee would otherwise have been payable by the Developer.

16.10 Directions giving rise to OSD Modification

- (a) In this clause 16.10, the Required Responsible Time means a reasonable time but in any case not more than 20 Business Days.
- (b) (**State direction**): If a direction by the State, other than a OSD Modification Order, constitutes or involves an OSD Modification, the Developer must, as a condition precedent to making a Claim against the State in connection with the direction:
- (1) within the Required Response Time of receiving the direction, give notice to the State that it considers the direction constitutes or involves an OSD Modification; and
 - (2) within 10 Business Days after giving the notice under clause 16.10(b)(1), submit an OSD Modification Quote to the State in respect of the direction.
- (c) (**Confirmation**): Within the Required Response Time of the State receiving a OSD Modification Quote from the Developer under clause 16.10(b)(2) the State may elect to:

- (1) confirm that the direction is in fact an OSD Modification and either:
 - (A) issue an OSD Modification Order; or
 - (B) vary the direction and confirm that the varied direction is a OSD Modification by issuing a OSD Modification Order,
in which case the Developer must undertake the OSD Modification on the basis of the OSD Modification Order and clause 16.8(a) will apply.
 - (2) withdraw the direction, in which case the Developer must not comply with the direction; or
 - (3) inform the Developer that, in the State's view, the direction is not a OSD Modification in which case the Developer must comply with the direction but may refer the matter to dispute resolution in accordance with clause 42.
- (d) **(No commencement)**: the Developer must not commence any work the subject of a direction which it believes constitutes a OSD Modification until the State has acted under clause 16.10(c).
- (e) **(Conditions for the Developer Claim)**: the Developer will not be entitled to make any Claim against the State in respect of a direction that gives rise to a OSD Modification unless it has given a notice under clause 16.10(b) and otherwise complies with this clause 16.10.

16.11 Payment for Quotes

If the Developer is required to prepare a OSD Modification Quote in accordance with clause 16 and prior to preparing a OSD Modification Quote, the Developer:

- (a) notifies the State that it will incur costs (whether internally or through an Associate or Related Body Corporate of an Associate or by engaging a third party) to provide design, engineering or quantity surveying or other services reasonably required to be outsourced to assist in the preparation of the OSD Modification Quote; and
- (b) provides details of the costs that will be incurred in preparing the OSD Modification Quote,

then in respect of a OSD Modification Quote, the State will either:

- (c) agree to pay the Developer the cost to prepare the OSD Modification Quote, in which case the Developer must proceed to prepare the OSD Modification Quote; or
- (d) withdraw the OSD Modification Request.

17 Project Management

- (a) The State and the Developer must establish a committee (**Oversite Development Project Control Group**) comprising at least one representative of each of them and a representative of such other persons as are nominated by the State or the Developer for representation on the Oversight Development Project Control Group.
- (b) In the period prior to Final Completion, the Oversight Development Project Control Group must:

- (1) meet at such times as the State and the Developer agree (and at least once each Quarter or such other period as agreed by the State and the Developer) to discuss any matters relating to the Oversight Development Works; and
 - (2) conduct its meetings in such a manner and in accordance with such procedures as its members may from time to time agree provided that at least 1 representative from each of the State and the Developer must be present in order for there to be a quorum at a meeting of the Oversight Development Project Control Group.
- (c) The Oversight Development Project Control Group will not have any legal responsibility to either the State or the Developer and will not have any power to require either the State or the Developer to act or refrain from acting in any way.
- (d) The decisions of the Oversight Development Project Control Group do not affect the rights or obligations of either the State or the Developer under any of the Oversight Development Agreements.

18 Sub-Contracting

- (a) Subject to clause 18(b), the Developer must ensure that the Building Contract provides that the Builder may only subcontract part of the Oversight Development Works (and not the Oversight Development Works as a whole).
- (b) The Developer may subcontract the performance of all or any part of the Oversight Development Works provided that in so doing the Developer will not be relieved of any of its Liabilities under this Agreement or any other Oversight Development Agreement and the Developer is at all times responsible for the performance of any such Subcontractors in relation to the Oversight Development Works and acts or omissions of the relevant Subcontractor will be deemed to be acts or omissions of the Developer.
- (c) Notwithstanding any other provision of this Agreement or any other Oversight Development Agreement, the Developer may not sub-contract, delegate or otherwise part with management or administration responsibilities for delivering its obligations in respect of the Oversight Development Works.

19 State's Right to Inspect

- (a) The Developer must allow the State Representative, and any person authorised by the State Representative at any time prior to Final Completion to inspect the Final Design Documentation.
- (b) The Developer must give such assistance as is reasonably required by the State Representative in respect of any inspection under clause 19(a), including providing access to such part of the Final Design Documentation as may be required by the State Representative or the relevant authorised person.
- (c) Inspection or failure to inspect by the State or any Authorised Person under this clause 19, does not:
- (1) entitle the Developer to make any Claim;
 - (2) in any way limit or change the Developer's obligations under this Agreement or any other Oversight Development Agreement; or

- (3) relieve the Developer of any Liabilities,
with respect to the design, construction and commissioning of the Oversight
Development Works.

20 General Obligations Prior to Final Completion

20.1 Site Conditions

Subject to clause 12 and 13:

- (a) the Developer will be responsible for complying with this Agreement despite the Site and Site Conditions and will carry out all investigations necessary to ensure the adequacy and suitability of the Site; and
- (b) the Developer will not be entitled to make any Claim in connection with the Site or Site Conditions other than in relation to any negligence of, or default under a Transaction Agreement by the State.

20.2 The Developer's reporting requirements

The Developer must submit to the State Representative and each other member of the Oversight Development Project Control Group by the 10th day of each month from Construction Commencement to Final Completion a written report for the previous month signed by an authorised representative of the Developer, which:

- (a) attaches a detailed report describing the progress of construction;
- (b) attaches a copy of any certificate provided by the Developer to an External Financier during that month in relation to the cost to complete the Oversight Development Works; and
- (c) includes such other up to date information relevant to the design, construction and completion of the Oversight Development Works as the State Representative may reasonably require.

20.3 Information

The Developer must, from Construction Commencement to Final Completion, provide the State Representative with any information relating to the Project or the Oversight Development (including access to documents and copies of documents) reasonably requested by the State Representative within 10 Business Days.

21 Timing for Completion of Oversight Development Works

21.1 Notice of delays

If the Developer considers that a delay in Construction Commencement or the progress of the Oversight Development Works has occurred or will occur such that the works will not achieve Final Completion on or by the Scheduled Date for Final Completion or the Oversight Development Sunset Date, the Developer must within a reasonable time (but no later than 10 Business Days after becoming aware of an delay or potential delay to the

Construction Commencement or the progress of the Oversight Development Works) notify the State stating the nature and cause of the delay or likely delay.

21.2 Extension Events

- (a) If:
- (1) Construction Commencement is or will be delayed by the occurrence of an Extension Event which delays or will delay the Developer in carrying out the Oversight Development Works; or
 - (2) Final Completion is or will be delayed by the occurrence of an Extension Event which will delay the Developer in carrying out the Oversight Development Works,
- the Developer must (if it wishes to claim an extension of time to the Construction Commencement Deadline or the Oversight Development Sunset Date, as applicable) as soon as practicable and, in any event, not later than 10 Business Days after the Developer first becomes aware of the delay or likely delay, give notice in writing (**Delay Notice**) to the State stating the nature, cause and the extent of the Extension Event and the Developer's reasonable prediction of the resulting delay with supporting evidence and stating a fair and reasonable period by which, in the Developer's opinion, the Construction Commencement Deadline or the Oversight Development Sunset Date should be extended.
- (b) The Developer may not claim an extension of time under clause 21.2(a) for any delay other than a delay caused by an Extension Event.

21.3 Extension

- (a) Subject to clause 21.3(d) and 21.7 and the Developer having complied with the preceding provisions of this clause 21 the State Representative will, as soon as reasonably practicable after receiving notice under clause 21.2(a), determine what, if any, period by which the Construction Commencement Deadline or Oversight Development Sunset Date is to be extended and will notify the Developer accordingly. If the Construction Commencement Deadline is extended and Oversight Development Sunset Date will be extended for the same period.
- (b) Where there are several causes of a delay and at least one cause is not an Extension Event (unless that cause is immaterial), then to the extent that the delays resulting from those causes are concurrent, the Developer will not be entitled to any extension of time in accordance with this clause 21.
- (c) A delay caused by any act or omission of the State or any of its Associates, or any failure by the State to comply with this clause 21 will not cause the Construction Commencement Deadline or the Oversight Development Sunset Date to be set at large but nothing in this paragraph will prejudice any right of the Developer to damages for breach of this Agreement by the State.
- (d) Despite anything contained in this clause 21, the maximum period of extension that the Developer is entitled to for a Total Financial Market Disruption is a total of [not disclosed].

21.4 Approval of Extension

If an Extension Event occurs and the State Representative determines in accordance with clause 21.3(a) that the Construction Commencement Deadline and/or the Oversight Development Sunset Date should be extended then:

- (a) the Developer will, subject to clause 21.7, be entitled to an extension;
- (b) the Construction Commencement Deadline or the Oversight Development Sunset Date (as applicable) will be extended as determined by the State Representative pursuant to clause 21.3(a); and
- (c) the Developer must provide to the State upon request an updated Coordination Plan which details the changes to the construction program included in the Coordination Plan as a result of the Extension Event.

21.5 Mitigation

The Developer's entitlement to an extension to the Construction Commencement Deadline or the Oversight Development Sunset Date under this clause 21 is reduced to the extent that the delay is as a result of a failure by the Developer to:

- (a) take all proper and reasonable steps to prevent or minimise the risk of the occurrence of the delay;
- (b) take all proper and reasonable steps to minimise the duration and consequences of the delay; and
- (c) comply with its obligations under this Agreement relating to Construction Commencement or Final Completion, as applicable (except to the extent that the Extension Event prevents or has prevented the Developer from doing so).

21.6 No Entitlement to Costs

- (a) The Developer is not entitled to any costs of delay or disruption in Construction Commencement or Final Completion as a result of the occurrence of an Extension Event except as set out in clause 21.6(b).
- (b) Where a State Extension Event occurs the Developer may submit notice to the State Representative as soon as practicable (and, in any event, within 20 Business Days) after the occurrence of the State Extension Event stating:
 - (1) any impact of the State Extension Event on the Value at Final Completion of the Oversight Development;
 - (2) any impact on the cost to the Developer of undertaking the Oversight Development Works as a result of the State Extension Event; and
 - (3) confirming, and to the extent possible demonstrating, that the costs were unavoidable, reasonable and justifiable and have arisen despite the Developer having taken all proper and reasonable steps to minimise any such costs.
- (c) Where the delay referred to in clause 21.1 exceeds a period of [not disclosed], the Developer must provide to the State and the State Representative further notice setting out:
 - (1) the actions being taken by the Developer to rectify or mitigate the delay; and
 - (2) the Developer's progress in rectifying or mitigating the delay; and

- (3) any updates to the information provided pursuant to the Delay Notice, or a notice previously provided under this clause 21.1,
- every [not disclosed] after the commencement of the delay until the Oversight Development Works are on schedule to achieve Final Completion on or by the Scheduled Date for Final Completion or the Oversight Development Sunset Date.
- (d) Upon receipt of a notice from the Developer under clause 21.6(b) or clause 21.6(c), the State Representative may request from the Developer any further information which the State Representative requires to assess the Developer's claim. Any dispute as to the amount of the Developer's claim must be determined by an independent expert in accordance with clause 42.
- (e) If the impact on the lump sum cost to the Developer of undertaking the Oversight Development Works as a result of the State Extension Event as agreed or determined in accordance with clause 42 (**SEE Cost Adjustment**) results in:
- (1) an increase in costs, the State must pay those costs to the Developer within 20 Business Days after the amount of the SEE Cost Adjustment is agreed or determined in accordance with clause 42; or
- (2) a decrease in costs, the Development Fee and Contract Price shall be increased by the amount of the SEE Cost Adjustment.
- (f) If the impact of State Extension Event on the Value at Final Completion of the Oversight Development as agreed or determined under clause 42 results in:
- (1) an increase in the Value at Final Completion of the Oversight Development, the First Instalment Development Fee (and the Contract Price) shall be reduced by the amount of the increase; or
- (2) a decrease in the Value at Final Completion of the Oversight Development, the First Instalment Development Fee and Contract Price shall be reduced by the amount of the decrease,
- provided that:
- (3) if the State Extension Event occurs after the First Instalment Development Fee is paid then any increase or decrease will be made to the Second Instalment Development Fee; and
- (4) if there is a decrease in the Value at Final Completion of the Oversight Development and the decrease exceeds the relevant part of the Development Fee against which it is to be offset, the State must pay to the Developer the difference between the reduction in the Value at Final Completion of the Oversight Development and the relevant Development Fee at the same time as the relevant Development Fee would otherwise have been payable by the Developer.
- (g) Despite anything contained in this clause 21.6. if the State Extension Event relates to a delay to the Project Activities (under the Project Agreement) in respect of which Project Co is granted relief under the Project Agreement for an event which constitutes a Compensable Extension Event (within the meaning of the Project Agreement) then the Developer is only entitled to all the increased costs to the Developer of undertaking the Oversight Development Works as a result of the State Extension Event as agreed or determined in accordance with clause 42 and is not entitled to any adjustment to the Development Fee.
- (h) Except as provided in this clause 21.7, no other costs of delay or disruption incurred by the Developer as a result of the occurrence of an Extension Event are payable by the State.

21.7 Reduction in State's liability for Relief Events

Subject to clause 21.8, the State's Liability and the Developer's entitlements in connection with any Relief Event will be reduced:

- (a) **(caused by Developer)**: to the extent that the Relief Event is caused or contributed to by:
 - (1) any breach of this Agreement by the Developer;
 - (2) any breach of any other Oversight Development Agreement by the Developer or any of its Associates who is a counterparty to the Oversight Development Agreement; or
 - (3) any act or omission by the Developer or any of its Associates other than to the extent any such act or omission is authorised or permitted under an Oversight Development Agreement;
- (b) **(caused by Project Co)**: to the extent that the Relief Event is caused or contributed to by:
 - (1) any breach of the Project Agreement by Project Co or any Project Co Associate; or
 - (2) any act or omission by the Project Co or any Project Co Associate other than to the extent any such act or omission is authorised or permitted under the Project Agreement;
- (c) **(failure to mitigate)**: to the extent the Developer, or any of its Associates, fails to:
 - (1) use all reasonable endeavours to mitigate, minimise or avoid the effects, consequences or duration of:
 - (A) any event giving rise to a Relief Event; or
 - (B) circumstances giving rise to a Relief Event,
(including by putting in place temporary measures reasonably required by the State); or
 - (2) take all reasonable steps which a prudent, competent and experienced developer in the circumstances of the Developer or the relevant Associate of the Developer would have taken to mitigate, minimise or avoid the effects, consequences or duration of the event or circumstances giving rise to a Relief Event; and
- (d) **(insurance proceeds)**: by the aggregate of any insurance proceeds:
 - (1) payable to the Developer or any of its Associates under any Insurances in respect of the event or circumstances giving rise to a Relief Event; and
 - (2) which would have been payable to the Developer or any of its Associates under any Insurance in respect of the event or circumstances giving rise to a Relief Event but for a failure by the Developer to comply with this Agreement or a failure by the Developer or any of its Associates to comply with the terms of those Insurances.

21.8 Exceptions to clause 21.7

Clause 21.7 does not:

- (a) limit any right of the Developer to an extension to the Construction Commencement Deadline or the Oversight Development Sunset Date as a result of an Extension Event caused or contributed to by Project Co or its Associates; or
- (b) affect any obligation of the State to pay, or the right of the Developer to receive, a Termination Payment.

22 Defects

22.1 Notification of Defects of State Concern

The State may advise the Developer of all Defects of State Concern in the Oversight Development Works after the State becomes aware of them.

22.2 Obligation to rectify

Subject to the following provisions, the Developer must correct and rectify any Defects of State Concern notified in writing by the State to the Developer during the Defects Liability Period as soon as practicable after it is advised of them and where the State indicates, on reasonable grounds, that a Defect of State Concern is of a kind which may potentially have a material effect on the Station or the Freehold Land if not addressed quickly, the Developer must correct and rectify that Defect as a matter of urgency, but if the Defect of State Concern is not reasonably capable of being rectified within 5 Business Days after the State has requested rectification, the Developer must, not later than 5 Business Days after the request is made give the State a plan for rectifying that Defect (**Rectification Plan**) within a reasonable period (having regard to the nature of the Defect) and must then comply with and diligently implement the Rectification Plan.

22.3 Access to Freehold Land

The Developer will allow the State and the State Representative to have access to the Freehold Land for the purpose of inspecting any Defects of State Concern and, if the Developer fails to rectify any Defect of State Concern in accordance with clause 22.2, carrying out any necessary rectification works, subject to the following provisions:

- (a) the State must give reasonable advance notice to the Developer of its wish to have access to the Freehold Land;
- (b) access for inspection will be taken at reasonable times stipulated by the Developer; and
- (c) rectification works must be carried out at times and in such manner as to minimise disruption to or interference with the use of the Freehold Land.

22.4 Cost of Rectification of Defects of State Concern

If and to the extent that rectification works are not carried out by the Builder within the period set out in clause 22.2, the parties agree as follows:

- (a) the Developer will meet and pay any additional costs in connection with the rectification of any Defects of State Concern; and
- (b) the Developer will pay or reimburse to the State any costs incurred by the State in connection with any rectification of Defects of State Concern undertaken by

the State if the Developer does not rectify the Defect of State Concern within a reasonable time after notice by the State to do so.

23 Standards and access

23.1 Application of clause 23

This clause 23 applies where:

- (a) Station Final Acceptance has occurred; and
- (b) all or any part of the Station Land is occupied by the Train Franchisee under the Train Infrastructure Lease.

23.2 Business protection

- (a) **Disruption** means any material and substantial interference to Transport Services resulting from:
 - (1) no entry point to the Station being open and accessible by the general public during the operating hours of the Station; or
 - (2) the shutting down of the Station; or
 - (3) the Station being without electricity, gas, telecommunications, water, drainage, waste water, or sewerage services; or
 - (4) a foul or block to the rail tracks on the Station Land,as a direct result of the Developer breaching its obligations under this Agreement.
- (b) The Developer acknowledges that if this clause 23 applies:
 - (1) during the period of construction of the Oversight Development Works the Transport Services are intended to continue to operate on a continuous basis for normal hours of operation unless otherwise agreed to by PTV and the Operator; and
 - (2) any Disruption to the Transport Services may result in the State, VicTrack, PTV and Operators incurring losses.
- (c) The Developer must not at any time cause any Disruption to any of the Transport Services other than in accordance with this clause 23.
- (d) The Developer must take all reasonable steps required by the State, PTV or the Train Franchisee to minimise the risk of any Disruption to the Transport Services.
- (e) The Developer must make all reasonable allowances and take all reasonable steps and measures that may be required, or that the State reasonably requires, for working in or close to, minimising the disruption of, or diverting any services including electricity, gas, telecommunications, water, drainage, waste water, sewerage, signalling, pedestrian and bicycle access, road, water, and public transport access, human services, public spaces, and public art of any Authority, on, above, below or adjacent to the Station Land during execution of the Oversight Development Works.
- (f) If the Developer causes any Disruption to any of the Transport Services under this clause 23 or the operations under the Train Franchisee Agreement, the

State may give the Developer a notice specifying that Disruption has occurred and detail the nature of that Disruption (**Disruption Event Notice**).

- (g) Upon receipt of a Disruption Event Notice, if:
- (1) the Disruption is capable of being remedied or cured, the Developer must remedy or cure the Disruption as soon as practicable after receipt of the Disruption Event Notice; or
 - (2) the Disruption is not capable of being remedied or cured within a reasonable period after receipt of the Disruption Event Notice it must promptly prepare and submit to the State Representative, a plan describing the measures to be taken by the Developer to ensure that ongoing construction works associated with completion of the Oversight Development Works will not cause any further Disruption (**Disruption Management Plan**).
- (h) If the Developer fails to promptly comply with the Disruption Management Plan, the State may give a notice to the Developer requiring the Developer to comply with the Disruption Management Plan within 10 Business Days of the notice being issued (DMP Compliance Notice).
- (i) If the Developer fails to comply with the DMP Compliance Notice, the State may immediately suspend the Developer from carrying out any Oversight Development Works until the Developer complies with the DMP Compliance Notice.

23.3 Site Access Arrangements

- (a) The Developer acknowledges that it may only have access to that part of the Station Land that is used for Rail Operations under and in accordance with a Side Deed, Rail Corridor Access Arrangement and a Site Access Agreement.
- (b) The Developer must if the Developer requires access to the Station Land in accordance with clause 23.3(a):
- (1) enter into and, if required by the State, procure the Builder to enter into a Side Deed in respect of the Oversight Development; and
 - (2) comply and procure the Builder to comply with each Side Deed.

23.4 Access conditions

Without limiting clause 23.3:

- (a) the Developer must secure the Freehold Land and all building works being carried out on the Freehold Land in a proper and professional manner, and take all steps necessary to keep the Freehold Land safe and secure and to prevent unauthorised access;
- (b) the Developer must make its own arrangements for any power, water and other services and utilities directly with service providers and must not connect to services provided to the Train Franchisee or others except as agreed with those parties;
- (c) the Developer must ensure that the Developer and the Developers' Associates entering the Station Land lock and secure all gates (other than during working hours adopted for the relevant works) and take all steps necessary to ensure that the Station Land and improvements on the Station Land are left safe and secure at all times and that unauthorised access is prohibited; and

- (d) any access to the Station Land by the Developer or the Developer's Associates is at the sole risk of the Developer in all things and the Developer:
 - (1) except in connection with any negligence of the State or breach by the State of a Transaction Document, releases the State to the full extent permitted by law, from all responsibility and liability which the State might otherwise have had in connection with any death, injury or loss and damage sustained by the Developer or any individual authorised by the Developer in and about the Freehold Land while exercising such rights; and
 - (2) indemnifies the State and its Associates from and against all liability which the State or its Associates (as applicable) may incur, and all loss and damage which the State or its Associates (as applicable) may suffer in connection with any death, injury, loss or damage suffered or incurred by any person in and about the Freehold Land caused by the negligence of the Developer or the Developer's Associates while exercising rights of access under this clause.

24 Train Franchise Agreement

24.1 Application of clause 24

This clause 24 applies where:

- (a) Station Final Acceptance has occurred; and
- (b) all or any part of the Station Land is occupied by the Train Franchisee under the Train Infrastructure Lease.

24.2 Cooperation

- (a) The Developer agrees to promptly and fully co-operate in the planning and delivery of the Oversight Development under the Train Franchise Agreement including:
 - (1) doing all things required to assist PTV, or the State, to facilitate the planning of the Oversight Development under Part 2 of the Train Franchise Agreement and comply with the requirements of PTV, or the State, in that regard including as to the preparation of the Design Documentation;
 - (2) for any part of the Oversight Development that is nominated as a State Project, doing all things required to assist PTV, or the State or any other person, as PTV's nominated project manager to deliver the Oversight Development under Part 3 of the Train Franchise Agreement and comply with the requirements of PTV, the State or any other person as PTV's nominated project manager in that regard.
- (b) Subject to clause 24.2(c), the State agrees to use reasonable endeavours to obtain any required approvals in connection with the Train Franchise Agreement, and any PTV Agreement, Rail Corridor Access Arrangement and Site Access Agreement.
- (c) The Developer must pay or reimburses the State's reasonable third party costs in providing assistance under clause 24.2(b).

24.3 Train Franchisee

- (a) The Developer acknowledges that:
- (1) part of the Station Land is occupied by the Train Franchisee under the Train Infrastructure Lease;
 - (2) the Developer's access to the Station Land is subject to the rights of the Train Franchisee under the Train Infrastructure Lease and the Train Franchise Agreement; and
 - (3) the Developer will not make any demands, objections, claim compensation or refuse or delay payment of any money due to the State arising out of this clause 24.
- (b) The Developer assumes responsibility for and indemnifies the State and its Associates against:
- (1) all losses incurred by the State or its Associates (as applicable);
 - (2) all liabilities incurred by the State or its Associates (as applicable); and
 - (3) all costs actually payable by the State and its Associates to its own legal representatives (whether or not under a costs agreement) and other expenses incurred by the State and its Associates in connection with a demand, action, arbitration or other proceeding (including mediation, compromise, out of court settlement or appeal),
- caused by the negligence of the Developer or the Developer's Associates.

25 Final Completion

25.1 Final Completion

- (a) Final Completion will occur on the later of the date on which:
- (1) the Developer has provided to the State the Station Land Management Agreement executed by the Purchaser;
 - (2) the Purchaser has paid the Purchase Price to the State in accordance with the terms of the Contract of Sale;
 - (3) the Oversight Development Works are completed in accordance with the Final Design Documentation for the Oversight Development, other than for minor defects which would not have a material impact on a Matter of State Concern;
 - (4) all Approvals required for the occupation and use of the Oversight Development have been obtained (other than any Approvals associated with the fitout of the completed Oversight Development Works) and satisfactory evidence of compliance with the requirements of any Authority have been submitted by the Developer to the State; and
 - (5) to the extent that any retail tenancies are not to be opened by Final Completion, the Developer and the State agree an interim retail activation plan.
- (b) The Developer agrees that:

- (1) the Developer must provide the State with an interim retail activation plan no later than 90 days prior to the proposed date of Final Completion and the parties must seek to agree the contents of the retail activation plan within 45 days of receipt of the interim retail activation plan by the State; and
- (2) the interim retail activation plan must provide that:
 - (A) to the extent that a tenancy has been procured and the relevant retail works are under construction, appropriate hoardings will be provided;
 - (B) access to the station will be maintained through an agreed management plan; and
 - (C) retail outlets to be leased will be activated with appropriate hoardings with artwork and/or signage.

25.2 Notice of Final Completion

- (a) The Developer must give the State:
 - (1) a notice 60 Business Days from the date on which the Developer considers the Oversight Development Works will reach Final Completion advising the State of this date; and
 - (2) notice when the Developer considers the Oversight Development Works has reached Final Completion.
- (b) Within 5 Business Days after service of the Developer's notice under clause 25.2(a), the State and the Developer inspect the Oversight Development Works and the State may give to the Developer written notice of any defect in or omission from the Oversight Development Works which would have a material impact on a Matter of State Concern and which requires further work before Final Completion can be reached.

25.3 Certificate of Final Completion

- (a) Within 20 Business Days after the State receives a notice under clause 25.2(a)(2), the State may, by notice in writing, notify the Developer that it disputes the Developer's notice that Final Completion has been achieved and, in that notice, set out what in its opinion is required for Final Completion to be achieved.
- (b) If:
 - (1) the State issues a notice under clause 25.3(a) within 20 Business Days of receipt of the notice under 25.2(a)(1) or the State fails to issue a notice under clause 25.3(a) within 20 Business Days of receipt of the notice under 25.2(a)(1); and
 - (2) the Developer considers that Final Completion has been achieved,either party must refer the dispute to an independent expert for resolution in accordance with clause 42.3.
- (c) If:
 - (1) the State that Final Completion has been achieved in accordance with a notice given under 25.2(a)(1); or

- (2) the independent expert has made his or her determination that Final Completion has been achieved after referral of the matter in accordance with clause 25.3(b),

the Developer is taken to have achieved Final Completion in accordance with the notice given under 25.2(a)(1), or as otherwise agreed or determined.

25.4 Station Final Acceptance

- (a) If Station Final Acceptance occurs, or is reasonably likely to occur, prior to completion of the Oversight Development Works, in addition to the Developer's obligations under clause 24, the Developer must provide to the State a construction management plan demonstrating to the reasonable satisfaction of the State the measures to be taken by the Developer to ensure that ongoing construction work associated with completion of the Oversight Development Works will not cause any material interference to the operation of the Stations and the provision of the Services by Project Co.
- (b) The Developer must ensure that the construction management plan referred to in clause 25.4(a) is complied with at all times.

26 Development Fee and Contract of Sale

26.1 Development Fee

The Developer must pay the Development Fee in accordance with clause 26.2.

26.2 Payment of Development Fee

- (a) On or before the Final Completion Date, the Developer must pay the State an amount equal to the First Instalment Development Fee less any part of the Contract Price paid or payable under the Contract of Sale on settlement of the Contract of Sale by unendorsed cheque payable to the State and delivered to the State at the place notified by the State.
- (b) On or before the date which is [not disclosed] after the Final Completion Date, the Developer must pay the State an amount equal to the Second Instalment Development Fee less any part of the Contract Price paid or payable under the Contract of Sale on that date by unendorsed cheque payable to the State and delivered to the State at the place notified by the State.
- (c) The State and the Developer agree that if the Development Fee is adjusted under this Agreement, the Contract Price shall be adjusted in the same manner under the Contract of Sale.

26.3 Subdivision

Within 90 days after the determination of the Approved Design Documentation and no later than execution of the Contract of Sale, the Developer must at its own cost and expense submit to the State Representative for approval a draft freehold strata plan of subdivision which is based on, and consistent with the draft demarcation plans attached as Attachment 12 and which:

- (a) identifies the location and extent of each Lot; and

- (b) includes any easements, covenants, restrictions or other dealings in accordance with the Easement Plan approved by the State under clause 15.4;
- (c) takes into account amendments to the draft demarcation plans as a result of changes, if any, made to the Concept Design Documentation by the Final Design Documentation (and no other changes).

26.4 Purchaser

- (a) The Developer may at any time before the date which is 40 Business Days before Construction Commencement, notify the State of the Purchaser by serving written notice to that effect on the State.
- (b) Before serving a notice under clause 26.4(a), the Developer must obtain the State's consent to the proposed Purchaser which:
 - (1) the State cannot unreasonably withhold or delay if:
 - (A) in the event the State requires Probity Investigations to be carried out in respect of the proposed Purchaser, the State's probity requirements as described in clause 62 of the Project Agreement are satisfied; and
 - (B) the proposed Purchaser has obtained any required FIRB approval; and
 - (2) the State cannot unreasonably withhold if the proposed Purchaser is a party which has the financial capacity, experience and capability to perform the obligations of the purchaser under the Contract of Sale.
- (c) If the Purchaser seeks the State's consent to a Proposed Purchaser under clause 26.4(b) and the State does not give or withhold its consent within 10 Business Days after the request, the State is deemed not to have given its consent.
- (d) Following notification of a Purchaser under clause 26.4(a):
 - (1) the State must (or must procure the Secretary of Department of Economic Development, Jobs, Transport and Resources to) enter into the Contract of Sale with the Purchaser; and
 - (2) the Developer must procure that the Purchaser enters into the Contract of Sale with the State (or the Secretary of Department of Economic Development, Jobs, Transport and Resources),and the Developer acknowledges that:
 - (3) it will not be released or discharged from any obligation it owes to the State under this Agreement as a result of the notification of a Purchaser; and
 - (4) it remains at all times liable for the performance of this Agreement.

26.5 Early settlement

If, as a condition of procuring any finance required to undertake the Development Works, the Developer requires the Purchaser to have freehold title to the Freehold Land prior to Final Completion, then:

- (a) the Developer may give written notice to that effect to the State nominating a date on which freehold title is required to be transferred to the Purchaser (which must not be before CBD North OSD Acceptance);

- (b) the date for settlement under the Contract of Sale will be the later of:
 - (1) 3 months after service of the Developer's notice;
 - (2) the date nominated in the Developer's notice; and
 - (3) the date which is 10 Business Days after satisfaction of any conditions precedent under the Contract of Sale including without limitation registration of the Freehold Strata Plan,
- (c) the date for payment of the First Instalment Development Fee (less any part of the Contract Price paid or payable under the Contract of Sale on settlement of the Contract of Sale) is the date of settlement of the Contract of Sale.

26.6 No contract

Despite any other provision of this Agreement, the parties acknowledge and agree:

- (a) that this agreement is not an agreement for the transfer, conveyance or a transfer of the Freehold Land or any legal or equitable interest in the Freehold Land (including the granting such an interest) nor does it evidence or effect such transactions and cannot be construed as such
- (b) unless and until the Contract of Sale is entered into there is no agreement for the transfer, transfer or conveyance of the Freehold Land (or any legal or equitable interest in it).

26.7 Caveat

The Developer must not, and must ensure that the Purchaser does not, lodge (or permit the External Financiers to lodge) a caveat unless it relates to an interest arising directly from the Contract of Sale, however the caveat must not prohibit any subdivision applications with respect to the Freehold Land.

27 Use of Oversight Development

27.1 Station Land Management Agreement

- (a) No later than 120 Business Days prior to the date on which the Developer anticipates achieving Final Completion, the State agrees to provide the Developer with:
 - (1) a Station Land Management Plan; and
 - (2) a draft form of Station Land Management Agreement.
- (b) The parties must ensure that:
 - (1) they act reasonably, expeditiously and in good faith in finalising the Station Land Management Agreement and the Station Land Management Plan by Final Completion; and
 - (2) the Station Land Management Agreement must be substantially consistent with the principles contained in Attachment 11 and must be in a form reasonably acceptable to the parties having regard to the Oversight Development, the Station, the Section 173 Agreement and the Interfaces.

- (c) The Developer and the State must ensure the Station Land Management Plan and Station Land Management Agreement are consistent with the Easement Plan approved by the State in accordance with clause 15.4.
- (d) Within 40 Business Days after the State receives the Station Shared Services Plan outlining the information in clause 27.1(b), the State must provide the Developer with comments on the Station Land Management Plan.
- (e) If the Developer does not take into account the State's comments or requested changes to a Station Land Management Plan under clause 27.1(d), the Developer must, within 20 Business Days of receipt of the State's comments under clause 27.1(d).
- (f) If the State is not satisfied with the Developer's detailed reasons in clause 27.1(e) for not taking into account the State's comments or requested changes to the Station Land Management Plan, the parties agree that, within 10 Business Days after the State receives the Developer's detailed reasons under clause 27.1(e), the dispute will be referred for expert determination in accordance with clause 42.3.
- (g) Prior to Final Completion the Developer must:
 - (1) procure that the Purchaser sign the Station Land Management Agreement; and
 - (2) provide the Station Land Management Agreement signed by the Purchaser to the State.

The Developer acknowledges and agrees that the State will require a Station Land Management Registrable Agreement to be registered on the Freehold Land on or before completion under the Contract of Sale.

27.2 Advertising

Any advertising placed on the Oversight Development Works by or on behalf of the Developer must comply with the Advertising Restrictions.

28 Deleted

29 Intellectual Property Rights

29.1 Warranties

The Developer warrants to the State that:

- (a) **(No infringement or rights):** no Intellectual Property Rights or Moral Rights or other rights of any person will be infringed or breached:
 - (1) in delivering the Oversight Development; or
 - (2) by use or enjoyment of the Developer Materials; or
 - (3) by use or exercise of the Development Intellectual Property Rights, by the State, any of its Associates or any person nominated or authorised by the State in connection with this Agreement; and

- (b) **(ownership of rights)**: it owns, or has the authority to grant the rights granted in accordance with this clause 29 in connection with, the Development Intellectual Property Rights and neither:
- (1) the exercise of those rights by the State, any of its Associates or any person nominated or authorised by the State in connection with this Agreement; nor
 - (2) the possession or use of any materials in which those rights subsist in connection with this Agreement,
- will give rise to any Liability on the part of the State, any of its Associates or any person nominated or authorised by the State, including to pay any compensation (including any royalty) to any person, or give rise to a right entitling any person to make a Claim against the State, any of its Associates or any person nominated or authorised by the State for any attribution or acknowledgment or rectification in relation to the Development Intellectual Property Rights or any materials in which they subsist.

29.2 Grant of licence

The Developer:

- (a) **(grant)**: grants to the State;
- (b) **(procure of grant)**: without limiting the Developer's obligations under clause 29.5 of this Schedule, must procure that each of its Associates grants to the State (with effect from the date the relevant Development Intellectual Property Rights come into existence); and
- (c) **(all things necessary)**: must do all things necessary to give effect to the grant to the State of,

a world-wide, perpetual, irrevocable, non-exclusive, transferable, royalty-free licence (including the right to sub-license) to use, reproduce, modify, adapt, develop, communicate to the public, or otherwise exploit the Developer's Material, and to exercise all or any of the Development Intellectual Property Rights, for the purposes of:

- (d) **(Oversite Development)**: the Oversight Development (including where this Agreement is terminated for any reason other than for convenience under clause 35.2 of this Agreement, to complete any D&D Activities which have not been:
 - (1) carried out; or
 - (2) carried out in accordance with the Oversight Development Agreement as at the date of termination).
- (e) **(Oversite Development Agreements)**: the exercise of the rights of the State or its Associates in accordance with the Oversight Development Agreements; and
- (f) **(Developer Material)**: the procurement, design, supply, construction, installation, production, commissioning, completion, operation, maintenance, repair and alteration of the Developer Material on and from the date on which this Agreement expires pursuant to clause 45.1.

29.3 Developer Material

Without limiting the Developer's other obligations under this Agreement with respect to the delivery of any Developer Material, the Developer will provide, and procure that its Associates provide, all documentation, information and assistance and materials as the State may reasonably require for the State's:

- (a) use and enjoyment of the Developer Material; or
 - (b) use and exercise of the Development Intellectual Property Rights,
- in connection with the Oversight Development.

29.4 Indemnities

- (a) **(Intellectual Property Rights, Moral Rights or other rights):** The Developer must indemnify the Indemnified Persons against any Claim or Liability brought against, suffered or incurred by the Indemnified Persons arising in connection with any infringement, violation, alleged infringement or alleged violation by the Developer or any of its Associates or any Indemnified Person of any Intellectual Property Rights, Moral Rights or other rights of any person or any Liability which any one or more of the Indemnified Persons may have to pay compensation (including any royalty) to a third party or make any attribution or acknowledgement or rectification in relation to any Development Intellectual Property Rights or any Developer Material in connection with:
 - (1) the D&C Activities; and
 - (2) in the case of the Indemnified Persons:
 - (A) using or enjoying the Developer Material as delivered by or on behalf of the Developer to the State or as modified from time to time (but not to the extent that any Claim or Liability arises from any modification made by the State or third parties engaged by the State which is not as directed or approved by the Developer) in connection with this Agreement; or
 - (B) using or exercising the Development Intellectual Property Rights in the manner authorised by this Agreement.
- (b) **(Breach of warranties):** The Developer must indemnify the Indemnified Persons against any Liability or Claim arising from any breach of the warranties set out in clause 29.1 of this Agreement.
- (c) **(Indemnities under this clause 29.4):** In relation to any Claim or Liability for which an Indemnified Person seeks to be indemnified under clause 29.4(a) or 29.4(b) of this Agreement:
 - (1) the Developer may (subject to the Developer confirming to the State that the Claim or Liability is the subject of the indemnity in clause 29.4(a) or 29.4(b) of this Agreement) conduct any defence or settlement in any such Claim or in relation to any such Liability, provided that the Developer:
 - (A) keeps the State informed of all material steps in relation to the conduct of any defence or settlement;
 - (B) consults with, and complies with all reasonable requirements of, the State in relation to such defence or settlement including complying with the Model Litigant Guidelines; and
 - (C) ensures that no settlement is made on terms which involve any admission of liability on the part of any Indemnified Person without the prior consent of that Indemnified Person;
 - (2) the State must use reasonable endeavours to ensure Indemnified Persons provide all cooperation reasonably required by the Developer in relation to such defence; and

- (3) to the extent that the Claim or enjoyment or Liability under clause 29.4(a) or 29.4(b) of this Agreement comes to the attention of the State before it comes to the attention of the Developer, the State will notify the Developer of the Claim or enjoyment or Liability.
- (d) **(Interference with use or enjoyment of Developer Material):** If a Claim or Liability referred to in clause 29.4(a) of this Agreement substantially interferes with the Indemnified Persons' use or enjoyment of any Developer Material or the use or exercise of the Development Intellectual Property Rights, or the State reasonably believes, in consultation with the Developer, that such Claim or Liability may substantially interfere with such use or enjoyment, the Developer will (at the State's option, and without limiting any of the State's other rights under any Oversight Development Agreements):
- (1) replace the Developer Material or the subject matter of the relevant Development Intellectual Property Right, without additional charge with a non-infringing product or service of at least equivalent functionality and performance, and which otherwise meets all relevant requirements for that Developer Material in accordance with the Oversight Development Agreements;
 - (2) modify the Developer Material or the subject matter of the relevant Development Intellectual Property Right to overcome the infringement without additional charge and without materially impeding functionality or performance or rendering it non-compliant with any relevant requirements for that Developer Material in accordance with the Oversight Development Agreements; or
 - (3) obtain a licence for the Indemnified Persons to continue use and enjoyment of the Developer Material or the subject matter of the relevant Development Intellectual Property Right in accordance with the licence granted under clause 29.2 of this Agreement, and pay any additional fee required for such licence.
- (e) **(Intellectual Property Rights):** Neither the State's rights nor the Developer's liabilities or obligations, whether under this Agreement or otherwise according to Law, in connection with Intellectual Property Rights, will be limited by the terms of this clause 29.4.
- (f) **(Indemnified Persons)** For the purposes of this clause 29.4, the Indemnified Persons are each of:
- (1) the State;
 - (2) the State's Associates; and
 - (3) any person nominated or authorised by the State (including the respective sub-licensees of the State and its Associates) to use any Intellectual Property Rights.

29.5 Moral Rights

- (a) If the Developer, in the course of the Oversight Development, including in relation to the design of the Oversight Development Works, the Design Documentation, methods of working and materials used in the construction and commissioning of the Oversight Development Works and the Oversight Development itself, includes or makes use of any work or other subject matter in which copyright subsists (**Material**), the Developer must procure from every person (including any officer, employee, agent, consultant or Subcontractor of the Developer) who is an author of that Material a consent which is valid and effective under the

Copyright Act 1968 (Cth) and signed by that person by which (to the maximum extent permitted by Law) that person irrevocably and unconditionally consents to the State (including sub-licensees), the Developer and its Associates and any person authorised to do acts comprised in the copyright (**Beneficiaries**):

- (1) (**exercise of rights**): using, disclosing, reproducing, transmitting, exhibiting, communicating, adapting, publishing or otherwise exercising its rights in relation to the Material anywhere in the world in whatever form any of the Beneficiaries thinks fit (including the making of any distortions, additions or alterations to the Material or any adaptation thereof, or to any part of the Material or of any such adaptation of the Material in a manner which, but for the consent, infringes or may infringe that person's Moral Rights in the Material); and
- (2) (**no identification**): using, disclosing, reproducing, transmitting, exhibiting, communicating, adapting, publishing or otherwise exercising its rights in relation to the Material or any adaptation thereof (or any part of the Material or of any such adaptation) anywhere in the world without making any identification of that person in relation to the Material.

29.6 Third Party Materials

- (a) (**Application of Third Party Intellectual Property Rights**): Clauses 29.2 and 29.5 of this Agreement will not apply to any Intellectual Property Rights that are Third Party Intellectual Property Rights if, and only to the extent that:
 - (1) the material the subject of the relevant Intellectual Property Rights (the **Third Party Material**) is generally commercially available on reasonable commercial terms;
 - (2) the Developer and its Associates have been unable (despite their reasonable endeavours) to procure from the relevant third party the right to grant the licences in clauses 29.2 and 29.5 of this Agreement in respect of that Third Party Material;
 - (3) the Developer has notified the State that it has been unable to procure the necessary licence rights for that Third Party Material;
 - (4) the Developer has used its best endeavours to procure a licence for the State in respect of that Third Party Material (whether from the Developer or the relevant third party) on terms as close as possible to the terms of clauses 29.2 and 29.5 of this Agreement, and has notified the State of those terms; and
 - (5) the State has given its approval to the Third Party Material being excluded from the subject matter of the licenses granted in clauses 29.2 and 29.5 of this Agreement. This approval may be given at the State's sole discretion, and is subject to such conditions as the State sees fit.
- (b) (**No State approval**): The State not giving its approval in accordance with clause 29.6(a)(5) of this Agreement will not relieve the Developer from any of its obligations under this Agreement or any of the Oversight Development Agreements.
- (c) (**State withdraws approval**): If the State has reasonable grounds to withdraw, and notifies the Developer that it has withdrawn, its approval under this clause 29.6 in respect of any Third Party Material, the Developer must use its

reasonable endeavours to immediately procure for the State from the relevant third party (or parties), at the Developer's sole cost and expense, all licences necessary under the terms of this Agreement in respect of that Third Party Material.

- (d) **(Procurement of licences to Third Party Material):** If the State approves certain Third Party Material being excluded from the subject matter of the licenses granted in clauses 29.2 and 29.5 of this Schedule and instead being licensed to the State on certain terms notified under clause 29.6(a)(4) of this Agreement, the Developer must immediately grant to the State or procure from the relevant third party a licence for the State (as the case may be) on those terms.

29.7 Train Franchise Agreement: Intellectual Property

Clause 31 of the Train Franchise Agreement prevails over this clause 29 to the extent of any inconsistency and the Developer must grant rights to the State and PTV necessary to enable PTV to comply with clause 31 of the Train Franchise Agreement.

30 Taxes and Utility Services

30.1 General Liability for Taxes

- (a) Subject to clause **Error! Reference source not found.**, the Developer must pay any Liability for Taxes payable by the Developer and calculated by reference to this Agreement and any transaction evidenced or contemplated by them.
- (b) The Developer indemnifies the State and its Associates against any Liability for Taxes payable in respect of this Agreement or (following the transfer of the Freehold Land to the Purchaser) the Freehold Land, and any transaction evidenced or contemplated by them that is discharged or otherwise satisfied by the State or its Associates (as applicable). Nothing in this clause requires the Developer to be liable for or to pay any land tax (other than if the Developer becomes the Purchaser under the Contract of Sale).
- (c) The State acknowledges that the State remains responsible for any land tax, council rates or other Taxes assessed or levied in respect of the Freehold Land for the period prior to Final Completion.

30.2 Deleted

30.3 Utility Services

The Developer must:

- (a) pay all charges (including service charges) for Utility Services to or from the Site, together with any costs charged or levied by the service provider in respect of the provision or maintenance of the infrastructure which provides or supplies those Utility Services exclusively to the Site; and
- (b) if required by the State, and if no separate meter exists for recording or metering of any of the Utility Services or substances supplied to the Site, install, or arrange for the installation of, meters at the Developer's own cost and expense.

30.4 Shared Utility Services

Where the infrastructure which supplies or provides any of the Utility Services referred to in clause 30.3(a) supplies or provides those services not only to part of the Site but also to other land owned by or leased or licensed to the State or any other Authority of the State, the Developer must pay or reimburse the State (as the case may be), a proportion of any costs charged or levied by the supplier or provider in respect of the maintenance of that infrastructure, such proportion to be calculated as follows:

- (a) in respect of the infrastructure relating to the supply or provision of Utility Services except services referred to in clause 30.4(b), the proportion will be the proportion which the number of outlets for the applicable Utility Service within that part of the Site serviced by that infrastructure bears to the total number of outlets for that service within the total area of the land owned by or leased or licensed to the State which is serviced by that infrastructure; and
- (b) in respect of drainage, the proportion will be the proportion which the area of that part of the Site which is serviced by the relevant drain bears to the total area of the land owned by or leased or licensed to the State which is serviced by that drain.

31 [not disclosed]

[not disclosed]

32 Goods and Services Tax (GST)

- (a) **(GST exclusive amounts):** Unless otherwise expressly stated, all amounts referred to in this Agreement or any other Oversight Development Agreement are exclusive of GST.
- (b) **(GST payable by Supplier):** If GST becomes payable on any Taxable Supply made by a party (**Supplier**) under or in connection with this Agreement:
 - (1) any amount payable or consideration to be provided in accordance with any other provision of this Agreement for that supply (**Agreed Amount**) is exclusive of GST;
 - (2) an additional amount will be payable by the party which is the recipient of the Taxable Supply (**Recipient**), equal to the amount of GST payable on that Taxable Supply as calculated by the Supplier in accordance with the GST Law, which will be payable at the same time and in the same manner as for the Agreed Amount; and
 - (3) the Supplier will provide a Tax Invoice to the Recipient in connection with that supply, either at the time expressly set out in any other provision of this Agreement or no later than the time at which the Agreed Amount for that Taxable Supply is to be provided in accordance with this Agreement. The Recipient is not obliged to pay any amount in accordance with this clause 32(b) unless and until a Tax Invoice is received by the Recipient in connection with the Taxable Supply except where the Recipient is required to issue the Tax Invoice.

- (c) **(Variation in GST payable):** If for any reason, the GST payable by the Supplier in connection with a supply it makes under or in connection with this Agreement (incorporating any increasing adjustments or decreasing adjustments relating to that supply) varies from the additional amount it received from the Recipient under clause 32(b) in connection with that supply, the Supplier will provide a refund or credit to, or will be entitled to receive from, the Recipient (as appropriate) the amount of this variation. Where an adjustment event occurs in relation to a supply and except where the Recipient is required to issue the Adjustment Note:
- (1) the Supplier will issue an Adjustment Note to the Recipient in connection with that supply within 14 days after becoming aware of that adjustment event occurring; and
 - (2) no additional amount will be payable by the Recipient unless and until an Adjustment Note is received by the Recipient.
- (d) **(GST ceasing to be payable):** No amount is payable by a party in accordance with clause 32(b) or 32(c) to the extent that the GST to which the amount relates has ceased to be payable by or refundable to the Supplier by the Commissioner of Taxation under the GST Law.
- (e) **(Expert determination):** If the Recipient is dissatisfied with any calculation to be made by the Supplier in accordance with this clause 32 the Recipient may, at its own expense and after notifying the Supplier accordingly, refer the matter to an independent expert nominated by the President of the Institute of Chartered Accountants for expert determination, which will be final and binding on all parties (except in the case of manifest error). The expert will act as an expert and not as an arbitrator and must take into account the terms of this Agreement, the matters required to be taken into account by the Supplier in accordance with this clause 60 and any other matter considered by the expert to be relevant to the determination. The parties release the expert from any liability in acting as an expert, except in the case of fraud on the part of the expert.
- (f) **(Revenue net of GST):** Any reference in this Agreement or any Oversight Development Agreement Document to price, value, sales, revenue, profit or a similar amount (**Revenue**), is a reference to the GST exclusive component of that Revenue, unless the contrary intention is expressed.
- (g) **(Cost net of GST):** Any reference in this Agreement or any Oversight Development Agreement Document to cost, expense, liability or other similar amount (**Cost**) of a party, is a reference to that Cost reduced by the Input Tax Credits to which the party is entitled in respect of such Cost, unless the contrary intention is expressed.
- (h) **(Recipient Supply):** To the extent that the consideration provided for the Supplier's taxable supply to which clause 32(b) applies is a taxable supply made by the Recipient (**Recipient Supply**), then:
- (1) the additional amount for GST that would otherwise be payable by the Recipient to the Supplier in accordance with clause 32(b)(2) shall be reduced by the amount of GST payable by the Recipient on the Recipient Supply; and
 - (2) the Recipient must issue to the Supplier a tax invoice for any Recipient Supply at the same time that the Supplier is required to issue a tax invoice to the Recipient for the Supplier's corresponding taxable supply pursuant to clause 32(b)(3).

- (i) **(General obligation):** Each party agrees to do all things, including providing Tax Invoices and other documentation, that may be necessary or desirable to enable or assist the other party in determining its GST payable on any supply made by that other party in connection with this Agreement, or any Input Tax Credits, adjustments or refunds in relation to any amount of GST paid or payable in connection with any supply made in connection with this Agreement.
- (j) **(GST Groups):** For the purposes of this Agreement, a reference to GST payable on a Taxable Supply made by a party includes any corresponding GST payable by the representative member of any GST group of which that party is a member and a reference to an Input Tax Credit entitlement of a party includes any corresponding Input Tax Credit entitlement of the representative member of any GST group of which that party is a member, and if a party to this Agreement makes a Taxable Supply by virtue of entering into or performing this Agreement and the 'recipient' of that Taxable Supply (within the meaning of the GST Act) is an Associate of another party to this Agreement (which for this purpose includes, in relation to the State, the Secretary), that other party to this Agreement will be obliged either to pay the amount referred to in clause 32(b)(2) or procure that the actual recipient pays the relevant amount, and the payer of that amount shall be the 'Recipient' for the purposes of this clause 32 in relation to the relevant Taxable Supply.
- (k) **(Agreement to prevail):** If, but for this clause 32(k), a GST clause in another Oversight Development Agreement Document would apply in connection with a Taxable Supply to which this clause 32(k) also applies, then this clause 32(k) will apply in connection with that supply and the GST clause in the other Oversight Development Agreement Document will not apply.
- (l) **(Definitions):** In this clause 32 unless otherwise defined in this Agreement, terms used have the meanings given to them in the GST Law.

33 Payments

33.1 Interest

If any moneys due and owing to any party under this Agreement or any other Oversight Development Agreement remain unpaid after its due date, then interest will accrue daily at the Default Rate, and will be due and payable from the due date up to and including the date upon which the moneys are paid.

33.2 No Prejudice

Except to the extent expressly provided otherwise, suspension of any of the Developer's obligations under this Agreement or any other Oversight Development Agreement will not limit, prejudice or affect the State's power under this Agreement or any other Oversight Development Agreement to abate, deduct from, reduce, set-off or suspend payment of any amount payable under this Agreement or any other Oversight Development Agreement.

34 Default

34.1 Notification

If a Default occurs, the State Representative may give the Developer a notice in writing specifying that the Default has occurred and the nature of the Default (**Default Notice**).

34.2 Default capable of cure

- (a) Upon receipt of a Default Notice, if:
 - (1) the Default is capable of being remedied or cured within 20 Business Days, the Developer must remedy or cure the Default within 20 Business Days; or
 - (2) the Default is not capable of being remedied or cured within 20 Business Days, it must promptly (and within no more than 20 Business Days of receipt of the Default Notice) prepare and submit to the State Representative for its approval, a draft plan describing the actions and measures the Developer will diligently pursue for the future prevention, remedying or curing of the Default (**Draft Cure Plan**).
- (b) Within 10 Business Days after receipt of a Draft Cure Plan, the State must either (acting reasonably):
 - (1) accept the Draft Cure Plan by notifying the Developer; or
 - (2) reject the Draft Cure Plan by notifying the Developer and providing reasons to the Developer for its rejection.
- (c) If the State approves a Draft Cure Plan pursuant to clause 34.2(b)(1) (**Approved Cure Plan**):
 - (1) the Developer must comply with, and diligently pursue the remedy or cure of the Default in accordance with, the Approved Cure Plan; and
 - (2) the period of time in the Approved Cure Plan to remedy or cure the Default is the cure period (**Applicable Cure Period**).
- (d) If the Developer complies with clause 34.2(c), while the Developer is diligently pursuing an Approved Cure Plan the Default will be deemed to be remedied or cured.
- (e) If the State rejects a Draft Cure Plan pursuant to clause 34.2(b)(2), the Developer, in consultation in good faith with the State, must amend the Draft Cure Plan to meet the requirements of the State and submit the amended Draft Cure Plan to the State for its approval, in which case this clause 34.2 will apply to the amended Draft Cure Plan as if it were originally submitted under clause 34.2(a).

34.3 Extending Cure Periods

- (a) If the Developer reasonably determines that it requires an extension to an Applicable Cure Period it may (no later than the expiration of the then Applicable Cure Period) submit in writing to the State:
 - (1) evidence that the Developer has diligently pursued and is continuing to diligently pursue a remedy or cure of the applicable Default in accordance with the applicable Approved Cure Plan but that the

Default cannot, despite such diligence, be remedied or cured within the Applicable Cure Period; and

- (2) the period of time proposed by the Developer to be the extended Applicable Cure Period for the applicable Approved Cure Plan.
- (b) The State will not unreasonably refuse to grant an extension of the Applicable Cure Period for the applicable Approved Cure Plan if the Developer satisfies the requirements of clause 34.3(a).
- (c) If the State grants an extension of the Applicable Cure Period in accordance with clause 34.3(b), the Developer must comply with and diligently pursue the applicable Approved Cure Plan within that extended Applicable Cure Period.

34.4 Default not capable of cure

Upon receipt of a Default Notice, if the Default is not capable of being remedied or cured, the Developer must:

- (a) pay an amount of compensation which is reasonable having regard to the nature of the Default; and
- (b) provide a plan to the State detailing the steps the Developer will take to prevent the reoccurrence of that Default.

34.5 When a Default is capable of cure

A Default will be taken to be capable of cure if the Developer can by payment of compensation place the State in a position which is, in all material respects, the same as the position in which the State would have been had the Default not occurred.

34.6 Termination

- (a) If a Termination Event occurs, the State may terminate this Agreement in accordance with clause 35.
- (b) Nothing in clause 34.1 prejudices or limits the State:
 - (1) exercising any other right provided for or conferred on the State pursuant to this Agreement in relation to an event that is a Default; or
 - (2) suing the Developer for compensation in relation to an event that is a Default or exercising any available legal or equitable rights or remedies in relation to an event that is a Default (whether under this Agreement or not).

34.7 Meaning of 'diligent pursuit'

Any assessment or determination as to:

- (a) whether a person has diligently pursued something or is diligently pursuing something;
 - (b) whether something has been diligently pursued or is being diligently pursued; or
 - (c) what could be achieved were something to be diligently pursued,
- shall be made in the context of the actual circumstances prevailing at all relevant times but:
- (d) any lack of financial or technical resources shall be disregarded; and

- (e) the standard of pursuit shall be not less than what might reasonably be expected of a reasonable developer seeking to promptly comply with its obligations under this Agreement.

35 Termination

35.1 No other right to terminate

- (a) Despite any rule of law or equity to the contrary (and subject to clause 26), this Agreement may not be terminated other than in accordance with this clause 35.
- (b) Termination of this Agreement and the payment of the relevant Termination Payment will not in any way prejudice or limit the State's Claims against the Developer in respect of the events giving rise to the termination.

35.2 Voluntary termination

- (a) **(Voluntary termination notice):** The State may, at any time, voluntarily terminate this Agreement by giving the Developer no less than 90 days' notice.
- (b) **(Date of termination):** Voluntary termination of this Agreement will take effect upon the date specified in the notice given in accordance with clause 35.2(a).

35.3 Termination for Force Majeure

- (a) **(Force Majeure Termination Event notice):** If a Force Majeure Termination Event occurs, then either party may terminate this agreement by giving notice to the other party.
- (b) **(Date of termination):** Termination of this Agreement for a Force Majeure Termination Event will take effect upon the date specified in the notice given in accordance with clause 35.3(a).

35.4 Termination for Termination Event

- (a) **(Termination for Termination Event):** If a Termination Event occurs, the State may terminate this Agreement by giving notice to the Developer.
- (b) **(Date of termination):** Termination of this Agreement for a Termination Event will take effect upon the date specified in the notice given in accordance with clause 35.4(a).

35.5 Consequences of Termination

Upon termination of this Agreement, the rights and obligations of the parties under this Agreement will cease except for:

- (a) any rights or obligations accrued as a result of a Default under this Agreement or as a result of an antecedent breach of this Agreement by the State;
- (b) any rights or obligations which are expressed to continue after termination of this Agreement; and
- (c) as applicable, the rights and obligations of the parties under clause 35.6 and clause 45.

35.6 Termination Payment

- (a) If the State terminates this Agreement in accordance with clause 35.2, 35.3 or 35.4:
- (1) in the case of termination for an event described in paragraph 4 of the definition of Termination Event, clause 40.2(c) will apply and the State will have no obligation to make any payment to the Developer or the Purchaser with respect to termination;
 - (2) in the case of termination for an event described in paragraphs 1, 2 or 3 of the definition of Termination Event, the State must pay the Termination Payment to the Developer and the Purchaser in accordance with clause 35.6(b); and
 - (3) in the case of voluntary termination under clause 35.2 or a Project Termination Event as a result of a voluntary termination under clause 45.2 of the Project Agreement, the State:
 - (A) must pay the Termination Payment to the Developer and the Purchaser in accordance with clause 35.6(c); and
 - (B) in the case of a Project Termination Event, must use reasonable endeavours to enable the Developer to enter into negotiations with any relevant third party for the continued development of the Site,
 - (4) in the case of a Project Termination Event (other than as a result of a voluntary termination under clause 45.2 of the Project Agreement) or termination under clause 9.1(c), the State:
 - (A) must pay the Termination Payment to the Developer and the Purchaser in accordance with clause 35.6(d); and
 - (B) in the case of a Project Termination Event, must use reasonable endeavours to enable the Developer to enter into negotiations with any relevant third party for the continued development of the Site.
- (b) In the case of termination for an event specified in paragraphs 1, 2 or 3 of the definition of Termination Event, Termination Payment or TP means:
[not disclosed].
- (c) In the case of voluntary termination under clause 35.2 or a Project Termination Event as a result of a voluntary termination under clause 45.2 of the Project Agreement, Termination Payment or TP means:
[not disclosed].
- (d) In the case of a Project Termination Event (other than as a result of a voluntary termination under clause 45.2 of the Project Agreement) or termination under clause 9.1(c), Termination Payment or TP means:
[not disclosed].
- (e) The State must pay the amount of the Termination Payment within 20 Business Days following determination of the Termination Payment by the independent expert.

35.7 Waiver

If this Agreement is lawfully terminated by the State, the Developer waives any right it might otherwise have to pursue a claim of restitution of any kind including a claim of unjust enrichment or quantum meruit.

36 Force Majeure

36.1 Notification

- (a) If the Developer becomes aware of any matter likely to constitute a Force Majeure Event, the Developer must immediately give notice of that matter and all relevant particulars to the State.
- (b) Within 5 Business Days after the occurrence of a Force Majeure Event, the Developer must give to the State a notice containing full particulars of the Force Majeure Event including its nature and likely duration, the non-financial obligations affected by it and the nature, extent and likely duration of its effect on the Developer's ability to perform those obligations (**Force Majeure Report**).
- (c) Following the issue of a Force Majeure Report, the Developer must keep the State informed at reasonable intervals, and upon the request of the State, of:
 - (1) the likely duration of the applicable Force Majeure Event and of its effect on the Developer's ability to perform its non-financial obligations under this Agreement;
 - (2) the actions taken or the actions proposed to be taken by the Developer to mitigate or minimise the effects of that Force Majeure Event; and
 - (3) any other matter relevant to that Force Majeure Event or the Developer's obligations affected by that Force Majeure Event.

36.2 Suspension of Obligations

To the extent that it is prevented or delayed by a Force Majeure Event, the Developer's performance of its non-financial obligations under this Agreement will, subject to clause 36.3, be suspended to that extent from the date the Developer gives a Force Majeure Report in respect of that Force Majeure Event until the Developer ceases to be so prevented or delayed (**Cessation Date**) provided that clauses 36.1 is complied with.

36.3 Temporary Measures and Alternative Arrangements

During the suspension of any obligation under clause 36.2 the Developer must use its best endeavours (including incurring any reasonable expenditure of funds and rescheduling of manpower and resources) to remove or mitigate the preventing or delaying effect of each Force Majeure Event on the Developer's performance of the applicable non-financial obligations under this Agreement.

36.4 Notice of Cessation of Force Majeure

The Developer must give immediate notice to the State of the Cessation Date and must immediately after the Cessation Date resume performance of the applicable non-financial obligations suspended as a result of the particular Force Majeure Event.

37 Assignment

- (a) Prior to Final Completion, the Developer may not assign, transfer, dispose of, part with possession of, create or allow any interest in, or otherwise deal with, any of its rights or obligations under this Agreement (**Dealing**) without the State's consent which cannot be unreasonably withheld or delayed.
- (b) In seeking the State's consent to any Dealing, the Developer first must:
 - (1) inform the State in writing of any such proposed disposal;
 - (2) ensure that the assignee or transferee has the financial capability and the technical expertise, resources and abilities which are necessary for it to perform effectively the obligations of the Developer under this Agreement;
 - (3) ensure that the direct or indirect consequences of the assignment or transfer do not and will not materially or adversely affect the State's rights, or the State's ability or capacity to exercise its rights, under this Agreement;
 - (4) ensure that the assignee or transferee enters into such deeds or other agreements as are reasonably required by the State to ensure that the obligations of the Developer under this Agreement are assumed by the assignee or transferee which deed will include, where an assignee is reasonably able to comply with this Agreement after the date of the assignment, a release of the assignor on and from the date of the assignment; and
 - (5) ensure that the assignee or transferee obtains all necessary Approvals in order to perform its obligations under this Agreement.

38 Protection of People and Property

- (a) The Developer must in relation to its carrying out its obligations under this Agreement:
 - (1) provide all things and take all measures necessary to protect and ensure the safety of people and property;
 - (2) avoid or minimise unnecessary interference with the passage of people and vehicles and the operations or activities carried out of, on or from properties adjacent to the Site;
 - (3) prevent nuisance and unreasonable noise, dust, vibration and disturbance (including preventing such matters that would affect any property adjacent to the Site);
 - (4) unless required for purposes of public health or safety, not interfere (insofar as compliance with this Agreement permits) with the free movement of traffic (vehicular and pedestrian) into and out of, adjacent to, around, on or about the Site or block or impair access to any premises, carparks, loading bays, roads or pedestrian ways; and
 - (5) comply with all requirements of this Agreement in connection with protection of people and property,and must prove that its Associates, and its Subcontractors and their Associates do the same.

- (b) If the Developer or a Subcontractor or any of their respective officers, employees, agents or consultants, damage property, including but not limited to property on or adjacent to the Site, the Developer must promptly make good the damage and pay any compensation which the Developer is required by law to pay.

39 Developer's Indemnity

39.1 Indemnity

- (a) To the maximum extent permitted by Law, the Developer indemnifies and will keep the State and its Associates indemnified from and against all Claims (whether in tort or otherwise) or Liabilities (including legal costs, on a full indemnity basis) whatsoever which the State or its Associates (as applicable) suffers, incurs or becomes liable or may suffer, incur or become liable:
- (1) the occupation or use of the Freehold Land by the Developer, or its Associates in the undertaking of the Oversight Development Works;
 - (2) any Contamination or Pollution caused or contributed by the Developer or its Associates or any work performed by or for the Developer on that part of the Freehold Land on which the Oversight Development Works are being carried out which results in the release or disturbance of Contamination or Pollution;
 - (3) any damage to person or property arising out of the undertaking of the Oversight Development Works or other obligations under this Agreement; or
 - (4) in respect of any breach of the Developer's obligations under any of the Oversight Development Agreements,
- except to the extent that any such Claim or Liability is a consequence of a fraudulent, negligent, reckless, unlawful or malicious act or omission of the State (other than an act or omission authorised or permitted under this Agreement or any other Oversight Development Agreement) or breach by the State of any Oversight Development Agreement.
- (b) The obligations of the Developer under this clause 39 will continue after the expiration or other termination of the Oversight Development Agreements in respect of any act, deed, matter or thing happening before such expiration or termination.
- (c) The indemnity in clause 39.1 will not extend to losses, damages, liabilities, actions, suits, claims, demands, costs and expenses incurred or sustained as a result of delays or disruptions to Transport Services primarily caused by the undertaking of the Oversight Development Works. The Developer's liability in respect to these delays and disruptions is addressed in clause 24.
- (d) The Developer assumes responsibility for and indemnifies and covenants to keep the State and its Associates indemnified to the maximum extent permitted by law, against the difference (if any) between:
- (1) the amount of any loss, damage, cost and expense suffered or incurred by the State or its Associates for which, but for Part IVAA of the *Wrongs Act 1958* (Vic), the State would otherwise have been entitled to recover from the Developer; and

- (2) the liability to the State and its Associates of the Developer as determined by any court under Part IVAA of the *Wrongs Act 1958* (Vic).

39.2 Release

Except in connection with the negligence of the State or any breach by the State of a Transaction Document, the Developer releases, to the full extent permitted by Law, the State from all Claims and Liabilities of any kind which arise from the Developer's use or occupation of the Oversight Development or the Site or the performance of this Agreement (including any Claim made under Part 2A of the *Wrongs Act 1958* (Vic)).

39.3 Liability for Indirect or Consequential Loss

- (a) **(No liability of State):** Subject to clause 39.3(b):
 - (1) the State and its Associates do not have any Liability to the Developer or any of its Associates; and
 - (2) the Developer and its Associates are not entitled to make any Claim, for any Indirect or Consequential Loss incurred or sustained by the Developer or any of its Associates:
 - (3) as a consequence of any act or omission of the State, and its Associates (whether negligent or otherwise); or
 - (4) due to any breach of any Oversight Development Agreement by the State.
- (b) **(Exceptions to no State Liability):** The exclusion of Liability of the State and its Associates under clause 39.3(a) does not apply to:
 - (1) Liability arising from criminal acts or fraud on the part of the State or its Associates;
 - (2) Liability arising from wilful misconduct under any Oversight Development Agreement on the part of the State or its Associates;
 - (3) Liability arising from:
 - (A) any third party property loss or damage; or;
 - (B) any injury to, disease of, or death of a person;
 - (4) the extent that the parties cannot limit or exclude any Liability at Law; and
 - (5) the extent that the Oversight Development Agreements expressly confer an entitlement on the Developer to any amounts payable by the State to the Developer.
- (c) **(No liability of the Developer):** Subject to clause 39.3(d):
 - (1) the Developer and its Associates do not have any Liability to the State or its Associates; and
 - (2) the State or its Associates are not entitled to make any Claim, for any Indirect or Consequential Loss incurred or sustained by the State or its Associates:
 - (3) as a consequence of any act or omission of the Developer or any of its Associates (whether negligent or otherwise); or

- (4) due to any breach of a Oversight Development Agreement by the Developer or any of its Associates.
- (d) **(Exceptions to no Developer Liability):** The exclusion of Liability of the Developer and its Associates under clause 39.3(c) does not apply to:
 - (1) any such Liability of the Developer or its Associates to the extent that, in respect of the event or circumstances giving rise to the Liability:
 - (A) insurance proceeds are payable to the Developer or any of its Associates; or
 - (B) insurance proceeds would have been payable under any Insurances but for:
 - (i) the inclusion of clause 39.3(a);
 - (ii) a failure by the Developer to comply with this Agreement;
 - (iii) a failure by the Developer or any of its Associates to claim under the relevant Insurances; or
 - (iv) a failure by the Developer or any of its Associates to comply with the terms of the relevant Insurance (including the claims procedure under the relevant insurance),
up to the limits of indemnity required by this Agreement;
 - (2) Liability for which the Developer recovers pursuant to an indemnity under any of the Oversight Development Agreements;
 - (3) Liability arising from criminal acts, fraud or wilful misconduct on the part of the Developer or any of its Associates;
 - (4) Liability arising from:
 - (A) any third party property loss or damage; or
 - (B) any injury to, disease or death of a person,
caused or contributed by the Developer or any of its Associates;
 - (5) the extent that the parties cannot limit or exclude any Liability at Law;
 - (6) Liability for any deductible or any additional cost or expense payable under any Insurances with respect to, connected with, caused by or arising out of any breach of this Agreement or the relevant Insurances by the Developer or any of its Associates;
 - (7) any statutory fine or civil penalty arising from any breach of Law by the Developer or any of its Associates;
 - (8) any amounts payable or Liability incurred by the State (including to a third party) in rectifying a Defect, or otherwise in reinstating, repairing or rectifying any of the Oversight Development Works, for which the Developer is liable under this Agreement that is not a Liability described in paragraphs 1 or 3 of the definition of Indirect or Consequential Loss;
 - (9) abandonment of the whole or a substantial part of the Oversight Development Works by the Developer or its Associates;
 - (10) any amounts payable by the Developer to the State in accordance with any Oversight Development Agreement; and

- (11) Liability to the State or any of its Associates connected with, caused by or arising out of the Train Franchisee Coordination Agreement that is not a Liability described in paragraph 1 of the definition of Indirect or Consequential Loss.

40 Risk and Liability

40.1 Risk of Loss or Damage

- (a) Subject to clause 40.1(b), the Developer will:
- (1) bear the risk of; and
 - (2) not have any Claim against the State or its Associates as a result of, loss or damage to or destruction of the Oversight Development Works, the Oversight Development, or the Site.
- (b) Clause 40.1(a) does not apply to the extent that the loss or damage is caused by a fraudulent, reckless, unlawful or malicious act or omission of the State or its Associates or breach by the State or its Associates of this Agreement unless, and to the extent that, in respect of such loss or damage the Developer is entitled to and does recover under any policy of insurance required under clause 41.

40.2 Destruction

- (a) If prior to Final Completion, any part of the Oversight Development Works is wholly or partly damaged or destroyed, then the Developer must immediately take all measures necessary:
- (1) to minimise any serious danger, risk or hazard to any person or property and to avoid or minimise unnecessary interference with the passage of people and vehicles and the operations or activities carried out on, or from properties adjacent to the Site and the Oversight Development Works;
 - (2) to comply with all requirements of this Agreement in connection with the protection of people and property; and
 - (3) to make good the Oversight Development Works.
- (b) Subject to clause 40.2(c), the Developer must reinstate the Oversight Development Works as soon as practicable at the Developer's cost and expense.
- (c) The Developer may serve a notice in writing on the State (**Destruction Termination Notice**) confirming that the Developer does not wish to reinstate the Oversight Development Works in accordance with clause 40.2(b). On receipt of a Destruction Termination Notice this Agreement will terminate and be of no further force or effect. No compensation will be payable by the State to the Developer if this Agreement is terminated by the Developer in accordance with a Destruction Termination Notice, and the Developer releases the State against all Claims it may have against the State in connection with such termination.

41 Insurance

41.1 Insurance Generally

The Developer must obtain and maintain, or procure that the relevant person obtains and maintains, the insurances that a prudent developer, owner or service provider would obtain and maintain for a development of a type substantially similar to the Oversight Development (being insurances of the kind and on no less favourable terms than recorded in this clause 41) and to ensure that the State is named as a third party beneficiary under those insurance policies.

41.2 Developer's specific insurances

Without limiting clause 41.1, prior to entering onto the Freehold Land, the Developer must:

- (a) effect or procure and maintain until Final Completion of the Oversight Development Works and the Developer having otherwise complied with its obligations under the Oversight Development Agreements:
 - (1) public liability insurance for liability to all persons (including the State and the Developer) for a sum nominated by the State, being not less than [not disclosed] for any one event concerning personal injury to or death arising by accident of any person (not being a person who at the time of the accident is defined as a worker of the insured or the Developer under any Law concerning workers' compensation insurance) and concerning any injury, loss or damage to any property (real or personal) caused (directly or indirectly) by the execution of the Works (whether by the Developer, the State, a Subcontractor, the State Representative or any other person);
 - (2) insurance for an unlimited sum against any loss, cost, damage, liability or other detriment (whether arising under a Law concerning workers' compensation or employers' liability or at common law) suffered or incurred by any of its employees in or about the execution of the Oversight Development Works;
 - (3) insurance of Plant and Equipment on terms and conditions (including any exclusions or excesses) reasonably required by the State concerning loss or distribution of or damage to the property insured (whether caused by the Developer, the State or any other person) for its full reinstatement and replacement cost;
- (b) procure that the Builder:
 - (1) effects and maintains professional indemnity insurance for a sum not less than [not disclosed] in respect of any one claim and annually in aggregate (plus legal costs and expenses) for liability to all persons (including the State) concerning loss, costs, damage, liability or other detriment suffered or incurred (directly or indirectly) for any breach of duty owed in a professional capacity in connection with the Development; and
 - (2) without limiting clause 41.2(a)(1), ensures that all the Builder's sub-contractors and consultants effect and maintain adequate professional indemnity insurance as determined by the State acting reasonably; and

- (3) effects or procures and maintains until Final Completion of the Works and the Developer having otherwise complied with its obligations under the Oversight Development Agreements, insurance for an unlimited sum against any loss, cost, damage, liability or other detriment (whether arising under a Law concerning workers' compensation or employers' liability or at common law) suffered or incurred by any of the Builder's employees in or about the execution of the Works,

which policies may be on an annual renewal basis (rather than contract specific).

41.3 Developer insurance requirements

- (a) All insurances effected under clauses 41.1 and 41.2(a) must:
 - (1) be effected with an insurer approved by the State acting reasonably;
 - (2) note the interests of the State;
 - (3) include a requirement that the insurance office or company provide the State with 10 Business Days' notice of its intention to serve a cancellation notice in respect of the policy; and
 - (4) provide for payment of such amounts and cover such risks and contain such conditions, endorsements and exclusions as are acceptable to or required by the State, acting reasonably.
- (b) In relation to the insurance required under clause 41.2(b) the Developer must procure that the Builder:
 - (1) immediately advises the State of:
 - (A) any changes or amendments to the terms of the insurance; and
 - (B) claims that arise or potential claims that could arise;
 - (2) that could reduce or limit the professional indemnity insurance, in which case the Developer must procure that the Builder obtains additional professional indemnity insurance so that the professional indemnity insurance is maintained as the amount required under clause 41.2(b)(1);
 - (3) maintains such insurance until Final Completion of the Oversight Development Works and the Developer having otherwise complied with its obligations under the Oversight Development Agreements;
 - (4) renews such insurance for a further period of [not disclosed] following Final Completion of the Oversight Development Works and the Developer having otherwise complied with its obligations under the Oversight Development Agreements;
 - (5) procures that every Developer's Consultant engaged by the Builder has effected or procured and maintained until Final Completion of the Works and the Developer having otherwise complied with its obligations under the Oversight Development Agreements professional indemnity insurance for a sum not less than an amount determined by the Builder (acting reasonably) for liability to all persons (including the State) concerning loss, costs, damage, liability or other detriment suffered or incurred (directly or indirectly) in connection with the

execution of those parts of the Works carried out by that Developer's Consultant.

41.4 Proof of Insurance

- (a) The Developer must whenever reasonably requested in writing by the State, provide evidence to the State:
 - (1) of the insurances effected and maintained by the Developer and its Subcontractors under clause 41.1; and
 - (2) that the State is named as a third party beneficiary in accordance with clause 41.1.
- (b) If, after being requested in writing by the State to do so, the Developer fails to produce evidence of compliance with its insurance obligations under clause 41.1 to the satisfaction of the State, the State may effect and maintain the insurance and pay the premiums for that insurance. Any amount paid by the State will be a debt due and payable from the Developer to the State.

41.5 Notices from or to the insurer

Except to the extent prohibited by Law, the Developer must ensure that each policy of insurance required to be effected by the Developer in accordance with this Agreement contains provisions acceptable to the State that:

- (a) except in the case of professional indemnity and workers compensation insurance, provide that a notice of claim given to the insurer by any of the State, the Developer or any of the Developer 's Subcontractors or consultants will be accepted by the insurer as a notice of claim given by each of the State, the Developer, the Subcontractor and the consultant; and
- (b) except for professional indemnity, workers compensation and motor vehicle insurance, require the insurer, whenever the Developer fails to renew the policy or to pay a premium, to give 20 Business Days written notice in writing thereof forthwith to the State and the Developer prior to the insurer giving any notice of cancellation or non-renewal. If an insurer does not agree to include such a provision in any such policy, and on request from the State from time to time, without limiting clause 41.4, the Developer must provide evidence to the reasonable satisfaction of the State that all such policies have been renewed and all premiums paid.

41.6 Notices of Potential Claims

- (a) The Developer must, as soon as practicable, inform the State in writing of any occurrence or incident that may give rise to a material claim under a policy of insurance required by clause 41.1 and must keep the State informed of subsequent developments concerning that occurrence or the claim.
- (b) Clause 41.6(a) does not apply to:
 - (1) public liability insurance; and
 - (2) workers compensation insurance (including common law liability)
 - (3) to the extent that the insurance remains on an 'each and every' basis.
- (c) Clause 41.6(a) does not apply to professional indemnity insurance unless in the reasonable opinion of the Developer, the claim has the potential to reduce the limit of cover under that insurance to [not disclosed] or less.

41.7 Settlement of Claims

Upon settlement of a claim under the insurance required by clause 41, the Developer must pass through to the State the benefit of the Developer's insurance where the State has suffered Loss but only to the extent of that Loss.

41.8 Cross Liability

Wherever pursuant to this Agreement insurance is effected in more than one name, the policy of such insurance must, insofar as the policy may cover more than one insured:

- (a) provide that all insuring agreements and endorsements operate in the same manner as if there were a separate policy of insurance covering each party comprising the insured provided that the total liability of the insurers to all of the insured parties collectively shall not exceed the sums insured and limits of indemnity including any inner limits set by memorandum or endorsement stated in the policy;
- (b) provide that:
 - (1) the insurer waives all rights, remedies or relief to which it might become entitled by subrogation against any of the parties comprising the insured except where the rights of subrogation or recourse are acquired as a consequence of fraud, misrepresentation, non-disclosure or breach of any warranty or condition of the policy by the relevant insured party; and
 - (2) failure by any insured to observe and fulfil the terms of the policy does not prejudice the insurance in regard to any other insured party; and
- (c) contain a non-imputation clause providing that any non-disclosure or misrepresentation (whether fraudulent or otherwise), any breach of term or condition of the policy, or any fraud or other act, omission or default by one insured does not affect another insured provided that the said acts or omissions were not made with the connivance of that other insured.

41.9 Extent of Cover

- (a) If the State at any time reasonably requires the Developer to:
 - (1) insure against a risk not specifically provided for or contemplated under the insurances held by the Developer in accordance with clause 41.1; or
 - (2) increase the extent of or change the terms of existing insurance in relation to a risk,it may notify the Developer accordingly and request that the Developer give effect to the State's requirements as set out in the notice.
- (b) The Developer must promptly notify (and provide supporting evidence to) the State of the amount (if any) of any additional premium payable to effect a request by the State under this clause.
- (c) Within 10 Business Days after receipt of notification from the Developer of an additional premium (if any), the State must inform the Developer whether it requires the Developer to effect that insurance cover.
- (d) If the State notifies the Developer that the State requires the Developer to effect that insurance cover under clause 41.9(c), the Developer promptly must do so and the State must reimburse the amount of the additional premium to the

Developer within 20 Business Days after the Developer provides evidence satisfactory to the State that the insurance cover has been so effected.

41.10 Additional Requirements

The Developer must comply, and must ensure that any Subcontractor complies, with its obligations to take out and maintain registration and to pay all levies required to be paid, under the *Accident Compensation Act 1985* (Vic) and the *Accident Compensation (Workcover) Act 1992* (Vic) and to take out and maintain insurances required under the *Building Act 1993* (Vic).

42 Dispute Resolution

42.1 Procedure for resolving disputes

- (a) **(Disputes to be resolved):** Any Dispute arising under this Agreement must be resolved by the parties to that Dispute (**Disputing Parties**) in accordance with this clause 42.
- (b) **(Procedure):** The procedure that is to be followed to resolve a Dispute is as follows:
 - (1) firstly, the Dispute must be the subject of negotiation as required by clause 42.2;
 - (2) secondly, if the Dispute remains unresolved (in whole or in part) after the expiration of the period for negotiation referred to in clause 42.2(c)(1) the Disputing Parties may agree that the Dispute will be referred to an expert for determination in accordance with clauses 42.3 to 42.9 (inclusive) or to arbitration under clause 43; and
 - (3) thirdly, if:
 - (A) the Dispute remains unresolved (in whole or in part) after the expiration of the period for negotiation referred to in clause 42.2(c)(1) and irrespective of whether the Disputing Parties failed to meet as required by that clause or whether having so met the parties failed to agree whether the Dispute should be referred to an expert or to arbitration within 20 Business Days after the expiration of the period for negotiation referred to in clause 42.2(c)(1);
 - (B) the Dispute has been referred to expert determination and a determination is not made by the expert within 30 days after the expert's acceptance of appointment; or
 - (C) the Dispute is referred to expert determination and a notice of dissatisfaction is given in accordance with clause 42.6(a),then the Dispute must be referred to arbitration under clause 43.

42.2 Negotiation

- (a) **(Notification):** If a Dispute arises then a party may give notice to each other party requesting that the dispute be referred for resolution by negotiation between the Chief Executive Officers (or equivalent) of the Disputing Parties (**Representatives**).

- (b) **(Contents of Notice)**: A notice under clause 42.2(a) must:
 - (1) state that it is a notice under this clause 42; and
 - (2) include or be accompanied by particulars of the matters which are the subject of the Dispute.
- (c) **(Attempt to resolve Dispute)**: If a Dispute is referred for resolution by negotiation under clause 42.2(a), then:
 - (1) the Representatives must meet and attempt in good faith to resolve the Dispute (in whole or in part) within 10 Business Days of the date on which the notice under clause 42.2(a) is received (or such later date as the Disputing Parties may agree); and
 - (2) any agreement reached between the Representatives will be reduced to writing, signed by or on behalf of each Disputing Party and will be contractually binding on the Disputing Parties.

42.3 Expert determination

- (a) Where this Agreement requires a matter to be referred to or resolved by an expert or if:
 - (1) **(Dispute unresolved)**: a Dispute which has been referred to the Representatives for negotiation in accordance with clause 42.2(a) remains unresolved (in whole or in part) after the expiration of the period for negotiation referred to in clause 42.2(c)(1); and
 - (2) **(Disputing Parties agree)**: the Disputing Parties agree within 20 Business Days after the expiration of the period for negotiation referred to in clause 42.2(c)(1), that the dispute be referred to an expert for determination,then those parts of the Dispute which remain unresolved will be referred to an expert for determination under clauses 42.4 to 42.8.
- (b) For the avoidance of doubt:
 - (1) a Dispute may only be referred to an expert for determination by agreement of the Disputing Parties; and
 - (2) where this Agreement requires a matter to be referred directly to an expert, the dispute resolution procedures in clause 42.2(c)(1) will not apply.

42.4 Selection of expert

- (a) **(Exchange of lists of 3 preferred experts)**: Within 7 Business Days after the date on which the Disputing Parties agree to refer a Dispute to an expert for determination under clause 42.3, the Disputing Parties must exchange lists of 3 persons (in order of preference) who, if appointed, would satisfy the requirements of clause 42.4(d), from whom the expert is to be chosen.
- (b) **(Appointment of person who appears on both lists)**: Any person who appears on the list of all of the Disputing Parties exchanged under clause 42.4(a) will be appointed as the expert to determine a Dispute and if more than one person appears on the list of all of the Disputing Parties, the person given the highest order of priority by the party who gave the notice under clause 42.2(a) will be appointed.

- (c) **(Appointment if no person appears on both lists):** If no person appears on the list of all of the Disputing Parties and the Disputing Parties cannot otherwise agree an expert, the party which gave the notice under clause 42.2(a) must procure:
- (1) the president (or the senior non-executive officer, howsoever described) of the institute or governing body for the technical or professional discipline the subject of the relevant Dispute to nominate the expert, having regard to, but not being bound by, those persons proposed by the Disputing Parties under clause 42.4(a); or
 - (2) if there is no governing body for the technical or professional discipline the subject of the relevant Dispute or such governing body advises that it will not nominate an expert, the President of the Australian Centre for International Commercial Arbitration to nominate a person to act as the expert, having regard to, but not being bound by, those persons proposed by the Disputing Parties under clause 42.4(a),
within 7 Business Days of the exchange of notices under clause 42.4(a).
- (d) **(Appropriate skills):** It is the intention of the Disputing Parties that the expert appointed to determine a dispute will be an independent person with appropriate skills having regard to the nature of the matters in dispute.
- (e) **(No entitlement to challenge appointment):** No Disputing Party will be entitled to challenge the appointment of an expert under this clause 42.4 on the basis that the expert does not satisfy the requirements of clause 42.4(d).
- (f) **(Not an arbitration agreement):** Any agreement for expert determination under this Agreement will not constitute an arbitration agreement for the purposes of the *Commercial Arbitration Act 2011* (Vic).
- (g) **(Agreement):** Once an expert is appointed, the Disputing Parties must enter into an agreement with the expert on the terms of the Expert Determination Agreement or such other reasonable terms as the expert may require.

42.5 Rules of expert determination

The expert determination process will be administered, and the expert will be required to act, under the terms of the Expert Determination Agreement.

42.6 Expert finding

- (a) **(Notification):** The determination of the expert must be in writing and will be final and binding on the Disputing Parties unless, within 10 Business Days of receipt of the determination, a Disputing Party gives notice to each other Disputing Party of its dissatisfaction and intention to refer the matter to arbitration in accordance with clause 43.
- (b) **(Amendment to determination):** Upon submission by any Disputing Party, the expert may amend the determination to correct:
- (1) a clerical mistake;
 - (2) an error from an accidental slip or omission;
 - (3) a material miscalculation of figures or a material mistake in the description of any person, thing or matter; or
 - (4) a defect in form.

42.7 Liability of expert

- (a) **(Liability of expert):** The Disputing Parties agree:
- (1) that the expert will not be liable in connection with the expert determination, except in the case of fraud on the part of the expert; and
 - (2) to indemnify the expert against any Claim or Liability in connection with the expert determination, except in the case of fraud on the part of the expert, in which case a Claim may be made against him or her by any person who is party to the dispute.
- (b) **(Engagement):** The Disputing Parties will jointly engage the expert services in connection with the expert determination proceedings and each Disputing Party will seek a separate Tax Invoice equal to its share of the costs of the expert.

42.8 Costs

The Disputing Parties must:

- (a) bear their own costs in connection with the expert determination proceedings; and
- (b) pay an equal portion of the costs of the expert.

42.9 Proportionate Liability

To the extent permitted by Law, the expert will have no power to apply or to have regard to the provisions of any proportionate liability legislation which might in the absence of this clause 42.9, have applied to any dispute referred to the expert in accordance with this clause 42

43 Arbitration

43.1 Reference to Arbitration

- (a) **(Dispute):** If:
- (1) a dispute:
 - (A) which has been referred to the parties' Representatives for negotiation in accordance with clause 42.2(a) remains unresolved (in whole or in part) after the expiration of the period for negotiation referred to in clause 42.2(c)(1); and
 - (B) the Disputing Parties do not agree to refer the dispute to an expert for determination; or
 - (2) in the case of a dispute which the Disputing Parties agree to refer to expert determination under clause 42.3:
 - (A) a determination is not made within 30 days of the expert's acceptance of the appointment; or
 - (B) a notice of dissatisfaction is given in accordance with clause 42.6,

then any Disputing Party may notify the other Disputing Parties that it requires the dispute to be referred to arbitration.

- (b) **(Referral)**: Upon receipt by a Disputing Party of a notice under clause 43.1(a), the dispute will be referred to arbitration.

43.2 Arbitration

- (a) **(ACICA Rules)**: Arbitration in accordance with this clause 43 will be conducted in accordance with the arbitration rules of the Australian Centre for International Commercial Arbitration (known as the ACICA Rules) as current at the date the Dispute is referred to arbitration and as otherwise set out in this clause 43.
- (b) **(Seat)**: The seat of the arbitration will be Melbourne, Victoria.
- (c) **(Language)**: The language of the arbitration will be English.

43.3 Appointment of arbitrator

The Disputing Parties will endeavour to agree on the arbitrator or arbitrators (if the parties agree to appoint three arbitrators), but if no such agreement is reached within 14 Business Days of the dispute being referred to arbitration in accordance with clause 43.1(b), the arbitrator or arbitrators will be appointed by the ACICA Rules.

43.4 General Principles for conduct of arbitration

- (a) **(Conduct of arbitration)**: The Disputing Parties agree that:
- (1) they have chosen arbitration for the purposes of achieving a just, quick and cost-effective resolution of any dispute;
 - (2) any arbitration conducted in accordance with this clause 43 will not necessarily mimic court proceedings of the seat of the arbitration or the place where hearings take place (if different), and the practices of those courts will not regulate the conduct of the proceedings before the arbitrator; and
 - (3) in conducting the arbitration, the arbitrator must take into account the matters set out in clauses 43.4(a)(1) and 43.4(a)(2).
- (b) **(Evidence in writing)**: All evidence in chief must be in writing unless otherwise ordered by the arbitrator.
- (c) **(Evidence and discovery)**: The rules for evidence and discovery will be the IBA Rules on the Taking of Evidence in International Arbitration current at the date of arbitration (or if there are no current rules, the most recent version of those rules).
- (d) **(Oral hearing)**: The oral hearing must be conducted as follows:
- (1) any oral hearing must take place in Melbourne, Victoria and all outstanding issues must be addressed at the oral hearing;
 - (2) the date and duration of the oral hearing must be fixed by the arbitrator at the first preliminary conference. The arbitrator must have regard to the principles set out in clause 43.4(a) when determining the duration of the oral hearing;
 - (3) oral evidence in chief at the hearing will be permitted only with the permission of the arbitrator for good cause;

- (4) the oral hearing must be conducted on a stop clock basis with the effect that the time available to the parties must be split equally between the parties so that each party has the same time to conduct its case unless in the opinion of the arbitrator, such a split would breach the rules of natural justice or is otherwise unfair to one of the parties;
 - (5) not less than 28 days prior to the date fixed for oral hearing each of the Disputing Parties must give notice of those witnesses (both factual and expert) of each other Disputing Party that it wishes to attend the hearing for cross examination;
 - (6) in exceptional circumstances the arbitrator may amend the date of hearing and extend the time for the oral hearing set in accordance with clause 43.4(d)(2);
 - (7) a Disputing Party will not be bound to accept the written evidence of a witness submitted on behalf of the opposing party which is not challenged in cross examination; and
 - (8) each Disputing Party is expected to put its case on significant issues in cross examination of a relevant witness called by the other Disputing Party or, where it seeks to challenge the evidence of a witness not called for cross-examination by reference to other evidence, to identify that evidence in its written opening submissions so that the other Disputing Party may know the nature of and basis for the challenge to the witness' written evidence.
- (e) **(Experts):** Unless otherwise ordered each Disputing Party may only rely upon one expert witness in connection with any recognised area of specialisation.

43.5 Proportional liability

To the extent permitted by Law, the arbitrator will have no power to apply or to have regard to the provisions of any proportional liability legislation which might, in the absence of this clause 43.5, have applied to any dispute referred to arbitration in accordance with this clause 43.

43.6 Extension of ambit of arbitration proceedings

- (a) **(Extending Disputes):** Where:
- (1) a dispute between the Disputing Parties to this Agreement is referred to arbitration in accordance with this clause 43; and
 - (2) there is some other dispute also between the Disputing Parties to and in accordance with this Agreement (whenever occurring),
- the arbitrator may, upon application being made to the arbitrator by one or more of the Disputing Parties at any time before a final award is made in relation to the first-mentioned dispute, make an order directing that the arbitration be extended so as to include the other dispute.
- (b) **(Arbitrator's order):** An arbitrator may make an order in accordance with clause 43.6(a) on such terms and conditions (if any) as the arbitrator thinks fit.

43.7 Award final and binding

- (a) **(Final and binding):** Subject to clause 43.7(b), any award will be final and binding on the Disputing Parties.

- (b) **(Appeal)**: Each Disputing Party consents to any appeal to a court where that appeal is made under the Commercial Arbitration Act 2011 (Vic) on a question of law arising in connection with an arbitral award made in accordance with this clause 43.

43.8 Continue to perform

Notwithstanding the existence of a dispute, each Disputing Party must continue to carry out its obligations in accordance with this Agreement.

43.9 Governing law of arbitration agreement

The Law governing this arbitration agreement is the law of Victoria, Australia.

43.10 Consolidation

The parties agree that section 27C of the Commercial Arbitration Act 2011 (Vic) will apply.

44 Priority Jobseekers

44.1 Priority Jobseekers' Requirements

The Developer must, in performing its obligations under this Agreement, satisfy the Priority Jobseekers' Requirements.

44.2 Reporting

- (a) **(Records)**: The Developer must prepare and maintain records demonstrating its performance against the Priority Jobseekers' Requirements.
- (b) **(Reporting)**: The Developer must provide to the State:
- (1) a report detailing the percentage of the Developer D&C Workforce which was comprised of Priority Jobseekers undertaking D&C Activities in Victoria, calculated as an Annualised Employee Equivalent against the Developer D&C Phase Workforce; and
 - (2) a statutory declaration made by a director of the Developer declaring that the information contained in the report is true and accurate,
- Quarterly and on the date of Final Completion.
- (c) **(Further information)**: At the request of the State, the Developer must provide further information or explanation in respect of the Developer's performance against the Priority Jobseekers' Requirements.

44.3 Verification of the Developer's compliance with the Priority Jobseekers' Requirements

- (a) **(Review of performance)**: The Developer must:
- (1) permit the State from time to time to undertake a review of the Developer's performance against the Priority Jobseekers' Requirements; and

- (2) ensure that its Associates give all reasonable assistance to any person authorised by the State to undertake such audit or inspection.
- (b) **(Authorisations):** The Developer acknowledges and agrees that the State is authorised to obtain information from any relevant persons, firms or corporations, including third parties, regarding the Developer's performance against the Priority Jobseekers' Requirements.
- (c) **(Additional obligations):** The obligations set out in this clause 44.3 are in addition to and do not derogate from any other obligation under this Agreement.

44.4 Use of Priority Jobseeker information

The Developer acknowledges and agrees that the State and the Department of Economic Development, Jobs, Transport and Resources may:

- (a) disclose statistical information contained in the reports provided under 44.2 and information obtained under clause 44.3;
- (b) consider statistical information contained in the reports provided under 44.2 and information obtained under clause 44.3 in the assessment or review of the Developer's and its Related Bodies Corporate's eligibility to tender for future Victorian Government contracts.

44.5 Supplier Code of Conduct

The Developer acknowledges and agrees that:

- (a) the Supplier Code of Conduct is an important part of the State's approach to procurement and describes the State's minimum expectations regarding the conduct of its suppliers;
- (b) it has read and aspires to comply with the Supplier Code of Conduct; and
- (c) the expectations set out in the Supplier Code of Conduct are not intended to reduce, alter or supersede any other obligations which may be imposed on the supplier, whether under this Agreement or at Law.

45 Rights and obligations at end of Agreement

45.1 Expiration of Agreement

Unless otherwise provided for in this Agreement, this Agreement will expire upon the later of:

- (a) the expiry of the Defects Liability Period;
- (b) Final Completion in accordance with clause 25;
- (c) the transfer of the Freehold Land title to the Developer in accordance with clause 26.

45.2 Novation

If this Agreement is terminated prior to Final Completion, upon the request of the State (in its discretion), the Developer must, for no consideration, other than any Termination Payment, if then due:

- (a) novate to the State or its nominee; and
 - (b) do all things reasonably necessary to give effect to such novation,
- any agreement (including any supply, service or maintenance agreement) relating to the execution of the whole or any part of the Oversight Development Works or the whole or any part of the Oversight Development.

45.3 Consequences of expiry

Upon expiry of this Agreement, the rights and obligations of the parties under this Agreement will cease except for:

- (a) any rights or obligations accrued as a result of a default by either party under this Agreement;
- (b) any rights or obligations which are expressed to continue after expiry of this Agreement; and
- (c) as applicable, the rights and obligations of the parties under this clause 45.

46 Confidential Information and disclosure

46.1 Confidential Information and disclosure by the State

- (a) **(Public Disclosure Obligations):** The State or any Authority may disclose any information in connection with the Oversight Development (including any Confidential Information):
 - (1) in accordance with Laws;
 - (2) to satisfy the disclosure requirements of the Victorian Auditor-General;
 - (3) to satisfy the requirements of Parliamentary accountability;
 - (4) where the disclosure is in the course of the official duties of VicRoads, the Department of Economic Development, Jobs, Transport and Resources, the Secretary, the Victorian Minister for Public Transport or the Treasurer of Victoria;
 - (5) to VicTrack, any Associate of the State or any person authorised or nominated by the State to the extent necessary for the purpose of the Oversight Development, Melbourne Metro Rail or the broader transport network provided they agree to maintaining the confidentiality of any Confidential Information;
 - (6) in annual reports of the State;
 - (7) in accordance with policies of the Victorian government; or
 - (8) to satisfy any other recognised public requirement,and Project Co must use all reasonable endeavours to assist the State or an Authority in meeting its Public Disclosure Obligations.
- (b) **(Priority Jobseekers' Requirements)** The State and the Department of Economic Development, Jobs, Transport and Resources may disclose statistical information in respect of the Developer's performance against the Priority Jobseekers' Requirements.

- (c) **(State's rights)**: in meeting its Public Disclosure Obligations or as otherwise considered necessary by the State the State may publish, disclose or make generally available each Oversight Development Agreement on a Victorian Government website.
- (d) **(Exercise of Licence)**: Nothing in this Agreement prevents the State and any sublicensees using or disclosing any information (including Confidential Information) to extent necessary or desirable for, or in connection with, the exercise of any licence granted under clause 29.

46.2 Confidential Information and disclosure by the Developer

- (a) **(Confidentiality obligation)**: Subject to clause 46.2(b), the Developer must treat as secret and confidential all Confidential Information in connection with this Agreement and any other Oversight Development Agreement.
- (b) **(Disclosure of Confidential Information)**: Without limiting the Developer's obligation under clause 46.2(a) and subject to clause 46.2(c), the Developer may disclose Confidential Information to:
 - (1) its Associates to the extent necessary for the purpose of undertaking the Oversight Development; or
 - (2) any External Financier, prospective financier, purchaser or equity investor of the Oversight Development, subject to the State having been provided necessary information in respect of the proposed parties and having carried out any Probity Investigation that the State considers necessary.
- (c) **(Confidentiality deed)**: Before disclosing any Confidential Information, the Developer must ensure that the person to whom the information is disclosed enters into a confidentiality deed with the Developer on terms reasonably acceptable to the State.

46.3 Disclosure by the Developer

- (a) **(Developer's disclosure obligations)**: Subject to clause 46.3(b), the Developer must:
 - (1) not make any public disclosures, announcements or statements in relation to the Oversight Development or the State's or any of the State's Associates' involvement in the Oversight Development without the State's prior consent;
 - (2) comply with any terms and conditions the State imposes and must use all reasonable endeavours to agree with the State the wording and timing of all public disclosures, announcements or statements by it or any of its Associates relating to the Oversight Development or the State's or any of the State's Associates' involvement in the Oversight Development before the relevant disclosure, announcement or statement is made; and
 - (3) as soon as practicable, give to the State a copy of any public disclosure, announcement or statement agreed to or approved by the State in accordance with this clause 46.3(a) or for which the State's consent or approval was not required in accordance with clause 46.3(b).

- (b) **(Permitted disclosure)**: For the purposes of clause 46.3(a), the Developer will not be required to obtain the State's consent or approval to the extent that any disclosure, announcement or statement is:
- (1) required by Law, provided that it:
 - (A) notifies the State of the requirement to make that disclosure; and
 - (B) takes all reasonable steps to minimise the extent of the disclosure and to ensure the information is disclosed on a basis that the recipient agrees to maintain the confidentiality of the information;
 - (2) required to obtain legal or other advice from its advisers;
 - (3) is to any proposed purchaser or lessee of the whole or any part of the Oversight Development or any investor or potential investor in the Developer or any proposed purchaser or lessee of the whole or any part of the Oversight Development provided that any such person to whom any Confidential Information is disclosed covenants to comply with the obligations of confidentiality imposed on the Developer under this clause 46;
 - (4) required to be made to a court in the course of proceedings to which the Developer is a party; or
 - (5) required by a relevant stock exchange, subject to:
 - (A) such disclosure, announcement or statement not referring to the State's or any of its Associates' involvement in the Oversight Development; and
 - (B) the Developer having used all reasonable endeavours to obtain the State's consent within a timeframe sufficient to allow it to meet the timeframe imposed by the relevant stock exchange.

47 Notices

47.1 Method of giving notices

All communications (including approvals, consents, directions, requirements, requests, Claims, notices, agreements and demands) in connection with this Agreement:

- (a) **(in writing)**: must be in writing;
- (b) **(addressed)**: must be addressed to the address specified in clause 47.2 (or as otherwise notified by that party to each other party from time to time);
- (c) **(signed)**: must be signed by the party making the communication or by the solicitor for, or any attorney, director, secretary or authorised agent of, that party on its behalf;
- (d) **(form of delivery)**: must be delivered by hand or posted by prepaid post to the address or emailed (in the form agreed by both parties) to the email address of the addressee set out in clause 47.2; and
- (e) **(taken to be received)**: are taken to be received by the addressee at the address set out in clause 47.2:

- (1) in the case of delivery by hand, on delivery at the address of the addressee, unless that delivery is outside Business Hours, in which case that communication is taken to be received at 9.00 am on the next Business Day;
- (2) in the case of prepaid post, on the third Business Day after the date of posting to an address within Australia and on the fifth Business Day after the date of posting by airmail to an address outside Australia; and
- (3) in the case of email, the first to occur of:
 - (A) receipt by the sender of any email acknowledgement from the addressee's information system showing that the communication has been delivered to the email address of that addressee;
 - (B) the time that the communication enters an information system which is under the control of the addressee; or
 - (C) the time that the communication is first opened or read by the addressee,

unless the result is that the communication would be taken to be given or made at a time which is outside Business Hours at the local time in the place of receipt of the email, in which case that communication is taken to be received at 9.00 am on the next Business Day.

47.2 Address for notices

For the purposes of this clause, a person (**sender**) may (and must, in the case of a Notice given to the State or State Representative) take the address and facsimile number of another person (**recipient**) to be:

- (a) the address and number set out below; or
- (b) where the recipient notifies the sender of another address or number, the last address or number so notified to it.

State and State Representative (as applicable)

48 Miscellaneous

48.1 Governing Law and jurisdiction

- (a) **(Governing Law):** This Agreement is governed by, and must be construed according to, the Laws of Victoria, Australia.
- (b) **(Jurisdiction):** Without limiting clauses 42 and 43, each party irrevocably submits to the nonexclusive jurisdiction of the courts of Victoria, and the courts competent to determine appeals from those aforementioned courts, with respect to any proceedings which may be brought in connection with this Agreement.

48.2 Entire Agreement

To the extent permitted by Law and in relation to their subject matter, the Oversight Development Agreements:

- (a) **(entire understanding):** embody the entire understanding of the parties and constitute the entire terms agreed by the parties; and
- (b) **(prior agreements):** supersede any prior agreement of the parties.

48.3 Amendment

- (a) **(Agreement):** Except as otherwise expressly provided in this Agreement, this Agreement may only be varied by a deed executed by or on behalf of each party.
- (b) **(Other Oversight Development Agreements):** Except as otherwise expressly provided in the Oversight Development Agreements to which the State is a party, no amendment to any other Oversight Development Agreement to which the State is a party is valid or binding on a party unless made in writing and executed by the State and all other parties to the relevant Oversight Development Agreement.

48.4 Further acts and documents

Each party must promptly do all further acts and execute and deliver all further documents (in such form and content reasonably satisfactory to both parties) required by Law or reasonably requested by another party to give effect to this Agreement.

48.5 Costs and Stamp Duty

Each party must bear its own costs arising out of the negotiation, preparation and execution of this Agreement.

48.6 Counterparts

This Agreement may be executed in any number of counterparts. All counterparts together will be taken to constitute one instrument.

48.7 Severance

If, at any time, a provision of this Agreement or any other Oversight Development Agreement is or becomes illegal, invalid or unenforceable in any respect under the Law of any jurisdiction, that will not affect or impair the legality, validity or enforceability of:

- (a) any other provision of this Agreement or any other relevant Oversight Development Agreement; or
- (b) that provision under the Law of any other jurisdiction.

48.8 Survival of certain provisions

- (a) **(Surviving clauses):** All provisions of this Agreement which, expressly or by implication from their nature, are intended to survive rescission, termination or expiration of this Agreement will survive the rescission, termination or expiration of this Agreement, including any provision in connection with:
 - (1) the State's rights to set-off and recover money;
 - (2) confidentiality or privacy;
 - (3) Intellectual Property Rights;
 - (4) any obligation to make any records available to the State;
 - (5) any indemnity or financial security given in accordance with this Agreement; or
 - (6) any right or obligation arising on termination of this Agreement.
- (b) **(Interpretation):** No provision of this Agreement which is expressed to survive the termination of this Agreement will prevent any other provision of this Agreement, as a matter of interpretation, also surviving the termination of this Agreement.
- (c) **(Survival of rights and obligations):** No right or obligation of any party will merge on completion of any transaction in accordance with this Agreement. All rights and obligations in accordance with this Agreement survive the execution and delivery of any transfer or other document which implements any transaction in accordance with this Agreement.

48.9 Waiver

- (a) **(Writing):** A waiver given by a party in accordance with this Agreement is only effective and binding on that party if it is given or confirmed in writing by that party.
- (b) **(No waiver):** A failure to, a delay in or the partial exercise or enforcement of a right provided by Law or in accordance with this Agreement by a party does not preclude, or operate as a waiver of, the exercise or enforcement, or further exercise or enforcement, of that or any other right provided by Law or in accordance with this Agreement.
- (c) **(No waiver of another breach):** No waiver of a breach of a term of this Agreement operates as a waiver of another breach of that term or of a breach of any other term of this Agreement.

49 Guarantee and indemnity

49.1 Definitions

The following terms are defined in this clause 49:

- (a) **Guaranteed Obligations** means all of JH Developer's obligations under this Agreement; and
- (b) **Insolvency Event** means, in relation to a party or the Guarantor, the occurrence of any of the following events:
- (1) if an application is made (other than for a frivolous or vexatious reason) for the winding up or deregistration of a party and, where an application has been made for the dismissal or withdrawal of the application for winding up within 10 Business Days, the application is not dismissed or withdrawn within 30 Business Days;
 - (2) an order is made for the winding up of a party, except for the purpose of a reconstruction, amalgamation, merger or consolidation on terms approved by the State before that order is made where the reconstruction, amalgamation, merger or consolidation is implemented in accordance with the terms of the approval;
 - (3) if a party or the Guarantor passes a resolution for its winding up or deregistration, except for the purpose of a reconstruction, amalgamation, merger or consolidation on terms approved by the State before that resolution is passed where the reconstruction, amalgamation, merger or consolidation is implemented in accordance with the terms of that approval;
 - (4) if a receiver, receiver and manager, liquidator provisional liquidator, compulsory manager trustee for creditors or in bankruptcy or analogous person is appointed to, or the holder of a Security Interest takes (or appoints an agent to take) possession of, any property of a party or otherwise enforces its Security Interest;
 - (5) if a party, the Guarantor or any other person appoints an administrator to the party or the Guarantor;
 - (6) if a party or the Guarantor:
 - (A) suspends payment of its debts (other than as the result of a failure to pay a debt or claim which is the subject of a good faith dispute);
 - (B) ceases or threatens to cease to carry on all or a material part of its business;
 - (C) is or states that it is unable to pay its debts; or
 - (D) is deemed insolvent by virtue of its failure to comply with a statutory demand; or
 - (7) if a party or the Guarantor enters into a readjustment or rescheduling of its indebtedness or makes a general assignment for the benefit of or a composition with its creditors, without the prior consent of the State, except for the purposes of a solvent reconstruction or amalgamation approved in writing by the State; or
 - (8) any act is done or event occurs which has an analogous or similar effect to any of the events in paragraphs (1) to (7).
- (c) **JH Developer** means John Holland Nth OSD Developer Pty Ltd (ACN 623 274 564).
- (d) **Security Interest** means any mortgage, pledge, lien or charge or any security or preferential interest or arrangement of any kind and includes:

- (1) a "security interest" as defined in clause section 12 of the Personal Property Securities Act 2009 (Cth);
- (2) anything which gives a creditor priority to other creditors with respect to any asset; and
- (3) retention of title (other than in the ordinary course of day-to-day trading) and a deposit of money by way of security.

49.2 Consideration

The Guarantor acknowledges that the State are acting in reliance on the Guarantor incurring obligations and giving rights under this clause 49.

49.3 Guarantee

The Guarantor unconditionally and irrevocably guarantees to the State the due and punctual performance and observance by JH Developer of the Guaranteed Obligations. If JH Developer does not perform or observe the Guaranteed Obligations on time and in accordance with the provisions of this Agreement, then the Guarantor agrees to perform and observe the Guaranteed Obligations for the benefit of the State on demand from the State. A demand may be made at any time and from time to time.

49.4 Indemnity

- (a) The Guarantor unconditionally and irrevocably indemnifies the State for all Losses and Liabilities which it incurs or suffers because JH Developer fails to duly and punctually perform and observe the Guaranteed Obligations.
- (b) The remedies available to the State against the Guarantor for failing to comply for any reason with its obligations under clause 49.3 are limited to the right of the State to make a claim on the Guarantor under clause 49.4(a).

49.5 Additional indemnities

Whether or not the State exercises any rights it may have under clause 35.4, and without being affected by the exercise of any such rights, the Guarantor unconditionally and irrevocably indemnifies the State against any loss the State suffers because:

- (a) the liability to perform or observe the Guaranteed Obligations is unenforceable in whole or in part as a result of lack of capacity, power or authority or improper exercise of power or authority;
- (b) JH Developer does not observe, perform or comply with (whether full or in part) the Guaranteed Obligations;
- (c) the Guaranteed Obligations are rescinded or terminated by JH Developer, the State for any reason other than by reason of the wrongful repudiation or default by the State;
- (d) JH Developer disregards an order for specific performance of the Guaranteed Obligations;
- (e) JH Developer for any reason does not pay any consideration or sum that would have been payable under this Agreement if JH Developer had complied with all its obligations under this Agreement;
- (f) an Insolvency Event occurs with respect to JH Developer but only to the extent of obligations or monies which form part of the Guaranteed Obligations; or

- (g) the Guaranteed Obligations are not or have never been enforceable against the Guarantor or are not capable of observance, performance or compliance in full because of any other circumstance whatsoever including any transaction relating to the Guaranteed Obligations being illegal, void, voidable or unenforceable and whether or not the State knew or should have known anything about that transaction.

49.6 Guarantor as principal debtor

The Guarantor as principal debtor agrees to pay to the State (as directed and within 10 Business Days after a demand) a sum equal to the amount of any loss described in clauses 49.4 and 49.5. Any such demand must:

- (a) be in writing;
- (b) state that it is made under clause 49.4 or 49.5;
- (c) state and provide details of the amount being demanded and confirm that:
- (1) a written demand for payment of the amount has been made on JH Developer by the State (as relevant);
 - (2) at least 10 Business Days has passed since the demand on JH Developer was made; and
 - (3) the demand on JH Developer remains unsatisfied;
- (d) be signed by the State; and
- (e) be served in accordance with clause 47.

49.7 Extent of guarantee and indemnity

The guarantee provided in clause 49.3 and the indemnities provided in clauses 49.4 and 49.5 are continuing security and extend to all of the Guaranteed Obligations and other money payable under this Agreement.

49.8 Preservation of the State's rights

The Liabilities under this Agreement of the Guarantor as a guarantor or an indemnifier and the rights of the State under this Agreement are not affected by anything which might otherwise affect them at law or in equity including, without limitation, one or more of the following (whether occurring with or without the consent of a person):

- (a) the State or another person granting time or other indulgence (with or without the imposition of an additional burden) to, compounding or compromising with, or wholly or partially releasing, JH Developer, any other indemnifier or another person in any way;
- (b) laches, acquiescence, delay, acts, omissions or mistakes on the part of the State or another person or the State and another person;
- (c) any variation or novation of a right of the State or another person, or material alteration of this Agreement, in respect of JH Developer, the Guarantor or another person;
- (d) the transaction of business, expressly or impliedly, with, for or at the request of JH Developer, the Guarantor or another person;
- (e) changes which from time to time may take place in the membership, name or business of a firm, partnership, committee or association whether by death,

- retirement, admission or otherwise, whether or not the Guarantor or another person was a member;
- (f) a Security Interest being void, voidable or unenforceable;
 - (g) a person dealing in any way with a Security Interest, guarantee, judgment or negotiable instrument (including, without limitation, taking, abandoning or releasing (wholly or partially), realising, exchanging, varying, abstaining from perfecting or taking advantage of it);
 - (h) the death of any person or an Insolvency Event occurring in respect of any person;
 - (i) a change in the legal capacity, rights or obligations of a person;
 - (j) the fact that a person is a trustee, nominee, joint owner, joint venturer or a member of a partnership, firm or association;
 - (k) a judgment against JH Developer or another person;
 - (l) the receipt of a dividend after an Insolvency Event or the payment of a sum or sums into the account of JH Developer or another person at any time (whether received or paid jointly, jointly and severally or otherwise);
 - (m) any part of the Guaranteed Obligations being irrecoverable;
 - (n) an assignment of rights in connection with the Guaranteed Obligations;
 - (o) the acceptance of repudiation or other termination in connection with the Guaranteed Obligations;
 - (p) the invalidity or unenforceability of an obligation or liability of a person other than the Guarantor;
 - (q) invalidity or irregularity in the execution of this Agreement by the Guarantor or any deficiency in or irregularity in the exercise of the powers of the Guarantor to enter into or observe its obligations under this Agreement;
 - (r) any obligation of JH Developer and the Guarantor or any other guarantor being discharged by operation of law or otherwise; or
 - (s) property secured under a Security Interest being forfeited, extinguished, surrendered, resumed or determined.

49.9 Liabilities not affected

The liability of the Guarantor under this Agreement is not affected:

- (a) because any other person who was intended to enter into this Agreement, or otherwise become a co-surety or co-indemnifier for payment of the Guaranteed Obligations or other money payable under this Agreement has not done so or has not done so effectively; or
- (b) because a person who is a co-surety or co-indemnifier for payment of the Guaranteed Obligations or other money payable under this Agreement is discharged under an agreement or under statute or a principle of law or equity.

49.10 Suspension of Guarantor's rights

As long as the Guaranteed Obligations are outstanding or other money payable under this Agreement remains unpaid, the Guarantor cannot without the consent of the State:

- (a) in reduction of its Liability under this Agreement, raise a defence, set off or counterclaim available to itself, JH Developer or a co-surety or co-indemnifier against the State or claim a set off or make a counterclaim against the State;
- (b) make a Claim or enforce a right (including, without limitation, an Encumbrance) against JH Developer or the Parent Guarantor or against their estate or property;
- (c) prove in competition with the State if an Insolvency Event occurs in respect of JH Developer whether in respect of an amount paid by the Guarantor under this Agreement, in respect of another amount (including the proceeds of a Security Interest) applied by the State in reduction of the Guarantor's Liability under this Agreement, or otherwise; or
- (d) claim to be entitled by way of contribution, indemnity, subrogation, marshalling or otherwise to the benefit of a Security Interest or guarantee or a share in it now or subsequently held for the Guaranteed Obligations or other money payable under this Agreement.

49.11 Other securities and obligations of Guarantor

The State's rights under this clause 49 are additional to and do not merge with or affect and are not affected by:

- (a) any Security Interest now or subsequently held by the State from JH Developer, the Guarantor or any other person; or
 - (b) any other obligation of the Guarantor to the State,
- notwithstanding any rule of law or equity or any statutory provision to the contrary.

49.12 Reinstatement of the State's rights

If a Claim is made that all or part of a payment, obligation, settlement, transaction, conveyance or transfer in connection with the Guaranteed Obligations or other money payable under this clause 49 is void or voidable under law relating to Insolvency Events or the protection of creditors or for any other reason and the Claim is upheld, conceded or compromised, then:

- (a) the State are each entitled immediately as against the Guarantor to the rights in respect of the Guaranteed Obligations or other money payable under this Agreement to which it would have been entitled if all or that part of that payment, obligation, settlement, transaction, conveyance or transfer had not taken place; and
- (b) promptly on request from the State (as the case may be), the Guarantor agrees to do any act and sign any document required or desirable to restore to the State any Security Interest or guarantee held by it under or in connection with this Agreement from the Guarantor immediately prior to that payment, obligation, settlement, transaction, conveyance or transfer.

49.13 Application of money

The State may apply money paid by JH Developer or JH Developer's estate, or the Guarantor or otherwise towards satisfaction of the Guaranteed Obligations and other money payable under this Agreement in the manner it sees fit.

Recitals

- 1 The background to the Oversight Development is set out in the Commercial Development Agreement.
- 2 As part of the development and implementation of the Oversight Development Works, the State has agreed to grant, and the Developer has agreed to accept, a licence in respect of the Licensed Construction Areas on the terms and conditions contained in this Licence.

This agreement witnesses as follows:

1 Definitions and interpretation

1.1 Commercial Development Agreement definitions

Unless otherwise expressly defined, expressions used in this Licence have the meanings given to them in the Commercial Development Agreement.

1.2 Definitions

In this Licence, unless the context otherwise requires:

| Term | Meaning |
|--|---|
| Amended Licensed Construction Area Plan | has the meaning given in clause 4.1(b)(1). |
| Authority | means any government or governmental, semi-governmental or local government authority, local council, administrative or judicial body or tribunal, department, commission, public authority, agency, minister, statutory corporation or instrumentality or any person having jurisdiction over the Licensed Construction Areas, the Developer, the State or any of them or anything in relation to any of them. |
| Commercial Development Agreement | the document entitled "Commercial Development Agreement" between the State and Developer dated <i>[insert]</i> . |
| Hoardings | temporary barriers, fences, enclosures, barricades, booms and other like structures (including fixed signage) on or around the Licensed Construction Areas in order to prevent public access to the Licensed Construction Areas. |
| Licence | means this construction licence and includes all Schedules, Exhibits, Attachments and Annexures to it. |
| Licence Commencement Date | means the date of CBD North OSD Acceptance. |
| Licence Fee | means ██████████ |
| Licensed Construction | has the meaning given in clause 4.1 and includes any Amended |

| Term | Meaning |
|------------------------------------|--|
| Area Plan | Licensed Construction Area Plan. |
| Licensed Construction Areas | means that part of the subdivided stratum (limited in height and depth) which is identified in the Licensed Construction Area Plan. |
| Permitted Use | means: <ol style="list-style-type: none">1 the performance of the D&C Activities and the Oversight Development Works in accordance with the Commercial Development Agreement and this Licence;2 the storage and location of any equipment, vehicles and machinery necessary for the carrying out of the D&C Activities and the Oversight Development Works, unless otherwise specified by the State;3 the exercise by the Developer of its rights and the compliance by the Developer with its obligations under the Commercial Development Agreement, to the extent to which they relate to the Licensed Construction Areas; and4 any other purpose agreed by the State. |
| Requirement | includes any requirement, notice, order, demand, direction, recommendation, request, stipulation or similar notification received from or given by any Authority or pursuant to any Law whether in writing or otherwise and notwithstanding to whom such a Requirement is addressed or directed. |
| Temporary Works Areas | [those parts of the Licensed Construction Areas marked blue hatched and green hatched on the Licensed Construction Area Plan.] |
| Term | the term of this Licence as described in clause 6. |

1.3 Interpretation

In this Licence:

- (a) **(headings)**: headings (including any heading at the beginning of any subclause) are for convenience only and do not affect interpretation;

and unless the context otherwise requires:

- (b) **(count and gender)**: a word importing the singular includes the plural and vice versa and a word indicating a gender includes every other gender;
- (c) **(references)**: a reference to:

- (1) a party, clause, Schedule, Exhibit, Attachment or Annexure is a reference to a party, clause, Schedule, Exhibit, Attachment or Annexure of or to this Licence; and
- (2) a section is a reference to a section of a Schedule;
- (d) **(document as amended)**: a reference to this Licence or to any other deed, agreement, document or instrument includes a reference to this Licence or such other deed, agreement, document or instrument as amended, novated, supplemented, varied or replaced from time to time;
- (e) **(party)**: a reference to a party includes that party's legal representatives, trustees, executors, administrators, successors and permitted substitutes and assigns, including any persons taking part by way of novation;
- (f) **(person)**: a reference to a person includes an individual, the estate of an individual, a corporation, an authority, an association or a joint venture (whether incorporated or unincorporated), a partnership and a trust;
- (g) **(legislation)**: a reference to legislation includes its delegated legislation and a reference to such legislation or delegated legislation or a provision of either includes consolidations, amendments, re-enactments and replacements;
- (h) **(definitions)**: if a word or phrase is given a defined meaning, any other part of speech or grammatical form of that word or phrase has a corresponding meaning;
- (i) **(“includes”)**: “includes” will be read as if followed by the phrase “(without limitation)”;
- (j) **(“or”)**: the meaning of “or” will be that of the inclusive, being one, some or all of a number of possibilities;
- (k) **(information)**: a reference to information includes information, representations, statements, data, samples, calculations, assumptions, deductions, determinations, drawings, design specifications, models, plans and other documents in all forms including the electronic form in which it was generated;
- (l) **(“\$”)**: a reference to “\$”, “AUD” or “dollar” is to Australian currency;
- (m) **(time)**: a reference to time is a reference to time in Melbourne, Australia;
- (n) **(rights)**: a reference to a right includes any benefit, remedy, function, duty, obligation, Liability, interest, entitlement, title, discretion, authority or power;
- (o) **(obligations and liabilities)**: a reference to an obligation or a liability assumed by, or a right conferred on, two or more persons binds or benefits them jointly and severally;
- (p) **(“may”)**: the term “may”, when used in the context of a power, right or remedy exercisable by the State, means that the State can exercise that power, right or remedy in its absolute and unfettered discretion and the State has no obligation to do so;
- (q) **(construction)**: where there is a reference to an Authority, institute or association or other body referred to in this Licence which:
 - (1) is reconstituted, renamed or replaced or if its powers or functions are transferred to, or assumed by, another entity, this Licence is deemed to refer to that other entity; or

- (2) ceases to exist, this Licence is deemed to refer to that new entity which serves substantially the same purpose or object as the former entity;
- (r) (“**remedy**”): the use of the word “remedy” or any form of it in this Licence means that the event to be remedied must be remedied or its effects overcome; and
- (s) (**contra proferentem rule not to apply**): each provision will be interpreted without disadvantage to the party who (or whose representative) drafted or proffered that provision.

1.4 **Business Day**

If the day on or by which anything is to be done in accordance with this Licence is not a Business Day, that thing must be done no later than the next Business Day.

1.5 **Provisions limiting or excluding liability, rights or obligations**

- (a) A right of the State or an obligation of the Developer under this Licence will not limit or exclude any other right of the State or obligation of the Developer under this Licence unless expressly stated.
- (b) Any provision of this Licence which seeks, either expressly or by implication, to limit or exclude any Liability of a party is to be construed as doing so only to the extent permitted by Law.

1.6 **Approvals, directions and notices in writing**

Unless otherwise expressly provided in this Licence or agreed between the parties, all approvals, consents, directions, requirements, requests, claims, notices, agreements and demands given or required to be given under this Licence must be given in writing.

1.7 **Prior approval or consent**

Where the Developer is required by this Licence to obtain the State’s consent or approval to an action, document or thing, unless otherwise expressly stated, that consent or approval must be obtained prior to the actions, document or thing occurring or coming into effect.

1.8 **Action without delay**

Unless there is a provision in this Licence which specifies a period of time in which something must be done by the parties, all things must be done without undue delay.

1.9 **Relationship of the parties**

Unless otherwise expressly provided, nothing in this Licence:

- (a) (**no additional relationship**): creates a partnership, joint venture, fiduciary, employment or agency relationship between the parties; or
- (b) (**no good faith**): imposes any duty of good faith on the State.

1.10 State's rights and obligations

- (a) **(Acknowledgement):** The parties acknowledge the substance, operation and potential effect and consequences of clause 1.9 (*State's executive rights and duties*) of the Commercial Development Agreement in relation to this Licence.
- (b) **(No Claim):** Subject to clause 1.10(c), the Developer will not be entitled to make any Claim against the State for any Liability relating to any exercise or failure of the State to exercise its statutory or executive rights or duties.
- (c) **(Liability for breach):** Clauses 1.10(a) and 1.10(b) do not limit any Liability which the State would have to the Developer under this Licence as a result of a breach by the State of a term of this Licence but for these clauses.

1.11 Reasonable endeavours of the State

Any statement in this Licence providing that the State will use or exercise "reasonable endeavours" or "act reasonably" in relation to an outcome, means that the State:

- (a) **(relevant steps):** will take steps to bring about the relevant outcome so far as it is reasonably able to do so, having regard to its resources and other responsibilities;
- (b) **(no guarantee):** cannot guarantee the relevant outcome; and
- (c) **(no obligation):** is not required to:
 - (1) exercise a right of any Government Party, or to influence, over-ride, interfere with or direct any other Government Party in the proper exercise and performance of its legal, statutory or executive duties and functions;
 - (2) exercise a power or discretion in a manner that the State regards as not in the public interest;
 - (3) develop or implement new policy;
 - (4) procure legislation; or
 - (5) act in any way that the State regards as not in the public interest.

1.12 Cost of carrying out obligations

Each party must carry out its obligations under this Licence at its own cost, unless expressly provided otherwise.

1.13 Development Agreement

- (a) This Licence is subject to the terms and conditions of the Commercial Development Agreement.
- (b) If there is any inconsistency between the terms of this Licence and the terms of the Commercial Development Agreement, the Commercial Development Agreement will prevail.
- (c) The Developer agrees that nothing in this Licence will in any way operate as a bar to the exercise by the State of, or a waiver of or modification to, the State's rights under the Commercial Development Agreement.

- (d) The Developer must allow the State to exercise its rights under the Commercial Development Agreement (subject to the provisions of the Commercial Development Agreement) with respect to the Freehold Land (including the Licensed Construction Areas) despite this Licence without:
 - (1) any interference or disturbance from the Developer; or
 - (2) any restriction imposed by the Developer.
- (e) The exercise of the State's rights under the Commercial Development Agreement in no way will be a breach of this Licence.
- (f) Despite the termination, expiry or otherwise ending of the Commercial Development Agreement, the obligations of the Developer under the Commercial Development Agreement continue to apply to the Licensed Construction Areas to the same extent they relate to the Licensed Construction Areas until this Licence ends under clause 6.

2 Delegation

2.1 Right to delegate

The Developer acknowledges that the State may exercise any right, statutory or otherwise, it has to appoint a person as a delegate to perform any of its rights under this Licence.

2.2 Notice of delegation

The State will give the Developer notice of:

- (a) **(delegate)**: any delegate so appointed, setting out the delegated rights and including a copy of the relevant instrument of appointment; and
- (b) **(revocation or change)**: any revocation or change of any delegation contemplated by clause 2.3.

2.3 Revocation or amendment of delegation

Any such delegation may be revoked, changed, delegated, limited or made subject to such conditions as the State determines from time to time.

2.4 No limitation of obligations

The appointment of a delegate to perform some or all of the rights of the State under this Licence does not limit the rights or obligations of the State under this Licence.

3 Negation of representations and warranties

The State makes no representations (express or implied) and gives no warranties (express or implied):

- (a) **(suitability of purposes)**: that the Licensed Construction Areas or any other land is now or will remain suitable or adequate for all or any of the purposes contemplated by this Licence or in the Commercial Development Agreement; and
- (b) **(Commercial Development Agreement representations)**: as to the matters specified in clause 3.3 (*Developer's Acknowledgement, Waiver and Indemnity*) of the Commercial Development Agreement,

and all warranties (if any) and representations (if any) implied by Law, are to the extent permitted by Law, expressly negated.

4 Grant of Licence

4.1 Licensed Construction Areas

- (a) **(Licensed Construction Areas at the Licence Commencement Date)**: At the Licence Commencement Date, the Licensed Construction Areas will, for the purposes of this Licence, be comprised of the land identified in the plan set out in Attachment 1 (**Licensed Construction Area Plan**).
- (b) **(Amendment of the Licensed Construction Areas)**: If, at any time, the parties to this Licence wish to vary, for the purposes of this Licence, the land which comprises the Licensed Construction Areas, then:

- (1) the State must prepare and provide the Developer with an amended version of the Licensed Construction Area Plan (**Amended Licensed Construction Area Plan**), which identifies any amendments to Licensed Construction Areas; and
- (2) both parties must sign the Amended Licensed Construction Area Plan as an acknowledgement of their agreement to the variation of the Licensed Construction Areas,

and from the date on which the Amended Licensed Construction Area Plan has been signed by both parties:

- (3) the Amended Licensed Construction Area Plan will be deemed to have replaced the Licensed Construction Area Plan; and
- (4) the Licensed Construction Areas will, for the purposes of this Licence, be deemed to be the areas shown on the Amended Licensed Construction Area Plan.

4.2 Licence over the Licensed Construction Areas

- (a) **(Grant of licence)**: The State grants to the Developer and its Associates for the Term a non-exclusive licence to use the Licensed Construction Areas for the Permitted Use on the terms of this Licence and the Commercial Development Agreement.
- (b) **(Period)**: The Developer must only remain on the Licensed Construction Areas for the minimum period as is reasonably necessary for the Permitted Use.

- (c) **(Sub-licence):** The Developer may sub-licence all or part of the Licensed Construction Areas with the consent of the State, such consent not to be unreasonably withheld or delayed.

4.3 Nature of interest

- (a) **(Nature of interest):** The Developer acknowledges and agrees that:
- (1) the rights conferred on the Developer by this Licence rest in contract only and do not confer a proprietary interest on the Developer; and
 - (2) its rights and obligations arising out of or in relation to the Licensed Construction Areas are as set out in the Commercial Development Agreement and this Licence.
- (b) **(Ownership and access)** Without limiting the generality of clause 4.3(a), the Developer acknowledges and agrees that:
- (1) ownership and control of the Licensed Construction Areas remains vested in the relevant owner of the land at all times;
 - (2) this Licence does not grant the Developer ownership, control or legal entitlement to exclusive possession of the Licensed Construction Areas nor does it extend to the Developer an entitlement to rents or profits in respect of the Licensed Construction Areas;
 - (3) the Developer and any of its Associates can access the Licensed Construction Areas only for the Permitted Use; and
 - (4) the Developer may not construct any permanent works on the Temporary Works Areas.

4.4 Responsibility of the Developer

The Developer acknowledges and agrees that it has the same responsibilities to third parties in connection with persons, property and all other aspects of the Licensed Construction Areas which it would have if it held the freehold title to the Licensed Construction Areas.

4.5 Liability

The parties acknowledge and agree that the Developer is required to indemnify the State under clause 39 of the Commercial Development Agreement in connection with its use and occupation of the Licensed Construction Areas.

5 Payments

5.1 Licence Fee

The Developer must pay the Licence Fee to the State, if demanded by the State.

5.2 Utilities

The parties acknowledge and agree that the rights and obligations of the Developer in relation to Utilities are set out in the Commercial Development Agreement, including clause 30.3 (*Utility Services*) of the Commercial Development Agreement.

5.3 Payment by the State

If the Developer defaults in the payment of any of the costs or charges referred to in clause 5.2, the State may (without limiting any other rights and remedies of the State) pay the costs or charges, and any amount paid by the State will be a debt due and payable from the Developer to the State.

6 Term of Licence

This Licence takes effect on the Licence Commencement Date and continues until the earlier of:

- (a) the termination, expiry or otherwise ending of the Commercial Development Agreement; and
- (b) the Date of Final Completion.

7 Approval to demolish structures, etc

Except where specified or required under the Commercial Development Agreement, the Developer must submit to the State for approval (with such approval not to be unreasonably withheld or delayed by the State), prior to submitting to the responsible authority under any relevant planning scheme (if required), any proposal to demolish any structure or building in, on, under or over the Licensed Construction Areas.

8 Hoardings

The Developer must procure that Hoardings are constructed and maintained enclosing the Licensed Construction Areas to the State's reasonable satisfaction and ensure that the Hoardings are maintained until the earlier of completion of the Oversight Development Works and the Term.

9 Harm minimisation

The Developer must:

- (a) **(use of Licenced Construction Area)**: in using or occupying the Licenced Construction Area; and

- (b) **(performing D&C Activities and the Oversight Development Works)**: except to the extent necessary to undertake the D&C Activities and the Oversight Development Works, and otherwise to comply with its obligations under the Commercial Development Agreement,

cause as little harm and inconvenience and do as little damage as reasonably possible to the Licenced Construction Area (and any adjacent area) and any improvement or foliage on the Licenced Construction Area or any adjacent area (including any Relevant Utility Infrastructure).

10 Removal of materials and make good

Without limiting its obligations under the Commercial Development Agreement:

- (a) **(during Term)**: during the Term, as soon as practicable after completion of any Oversight Development Activities on any part of the Licensed Construction Areas; and
- (b) **(prior to Term ending)**: prior to the end of the Term, the Developer must:
- (c) **(removal of equipment)**: remove all plant, equipment, machinery, facilities and vehicles (except to the extent they form part of the Relevant Infrastructure);
- (d) **(clean and safe condition)**: ensure that the relevant part of the Licensed Construction Areas is left in a clean and safe condition;
- (e) **(removal of rubbish)**: ensure that all waste, rubbish, debris and redundant materials are removed promptly from the Licensed Construction Areas in accordance with Best D&C Practices;
- (f) **(public use and occupation)**: without limiting clause 10(d), ensure that any relevant part of the Licensed Construction Areas which will become open to the public is safe for public use and occupation; and
- (g) **(damage)**: except to the extent necessary to comply with its obligations under the Commercial Development Agreement (including where specified or required under the PS&TR), make good all damage caused by the Developer's use and occupation of the Licensed Construction Areas.

11 Maintenance and repair

11.1 Maintenance

The Developer, at its cost, during the Term and any extension or holding over must keep and maintain the Licensed Construction Areas in accordance with the Commercial Development Agreement.

11.2 State's right of access

Without limitation to any rights of access in the Commercial Development Agreement, but subject to clause 11.2(c) of the Commercial Development Agreement, the State and any

officer, agent, adviser, consultant, contractor or employee of the State may at all reasonable times enter the Licensed Construction Areas (with or without vehicles and equipment), including to:

- (a) **(investigations)**: make reasonable investigations as the State, any officer, agent, adviser, consultant, contractor or employee of the State or those authorised by the State deem necessary for the purpose of ascertaining whether or not there has been any breach of any of the terms, covenants or conditions expressed or implied in this Licence;
- (b) **(compliance)**: carry out any maintenance, repairs, alterations, additions or other work necessary to comply with the State's obligations under this Licence, at Law or in respect of the exercise by the State of any statutory functions;
- (c) **(Developer repairs)**: carry out any maintenance, repairs, alterations, additions or other work which the State elects to do but which the Developer is required or liable to do under this Licence by any Law or by any Requirement but fails to do so within the time specified or otherwise allowed for that work to be done; or
- (d) **(other powers)**: exercise any other powers and rights of the State under this Licence or the Commercial Development Agreement.

12 GST

- (a) **(Supply)**: If GST is or will be or is purported to be payable on the supply of any good, service or thing (a **Supply**) by either party under this Licence, to the extent the consideration otherwise provided for that Supply is not stated to include an amount in respect of GST on that Supply, the party receiving the Supply must pay to the party making the Supply on demand a sum equal to any GST payable by the supplier in respect of that Supply.
- (b) **(Reimbursement)**: To the extent that one party is required to reimburse the other party for costs incurred by the other party, those costs do not include any amount in respect of GST for which the other party is entitled to claim an input tax credit.
- (c) **(Valid tax invoice)**: A party's obligation to pay an amount under clause 12(a) is subject to a valid tax invoice being delivered to that party.
- (d) **(Licence Fee)**: The Licence Fee under this Licence is exclusive of GST.
- (e) **(Commercial Development Agreement to prevail)**: If clause 32 (*Goods and Services Tax (GST)*) of the Commercial Development Agreement would apply in connection with a Taxable Supply to which this clause 12 also applies then clause 32 (*Goods and Services Tax (GST)*) of the Commercial Development Agreement will apply in connection with that supply and the provisions of this clause 12 (but for this clause 12(e)) will not apply.
- (f) **(Definitions)**: In this clause 12, unless otherwise defined in this Licence, terms used have the meanings given to them in the GST Law.

13 Dispute Resolution and Arbitration

If any dispute or difference of opinion arises between the parties under this Licence, each party may refer any such matter for resolution in accordance with this clause 13 and the dispute or difference of opinion must be resolved in the same manner that disputes or differences of opinion under the Commercial Development Agreement are resolved. Accordingly, the provisions of clauses 42 (*Dispute Resolution*) and 43 (*Arbitration*) of the Commercial Development Agreement are incorporated into this Licence but as if:

- (c) the only persons party to the Commercial Development Agreement, and the only persons party to the relevant dispute or difference of opinion, are the parties to the relevant dispute; and
- (d) the only matters for expert determination under those provisions are the matters referred for expert determination under this Licence.

14 Notices

All communications (including approvals, consents, directions, requirements, requests, claims, notices, agreements and demands) under or in connection with this Licence:

- (a) **(in writing)**: must be in writing;
- (b) **(addressees)**: must be addressed as set out below (or as otherwise notified by that party to each other party from time to time);

State

Attention: **[insert]**

Address: **[insert]**

Email: **[insert]**

Developer

Attention: **[insert]**

Address: **[insert]**

Email: **[insert]**

- (c) **(signed)**: must be signed by the party making the communication or by the solicitor for, or any attorney, director, secretary or authorised agent of, that party on its behalf;
- (d) **(form of delivery)**: must be delivered by hand or posted by prepaid post to the address or emailed (in the form agreed by both parties) to the email address of the addressee set out in clause 14(b); and
- (e) **(taken to be received)**: are taken to be received by the addressee at the address set out in clause 14(b):
 - (1) in the case of delivery by hand, on delivery at the address of the addressee, unless that delivery is outside Business Hours, in which case that communication is taken to be received at 9.00 am on the next Business Day;

- (2) in the case of prepaid post, on the third Business Day after the date of posting to an address within Australia and on the fifth Business Day after the date of posting by airmail to an address outside Australia; and
- (3) in the case of email, the first to occur of:
 - (A) receipt by the sender of any email acknowledgement from the addressee's information system showing that the communication has been delivered to the email address of that addressee;
 - (B) the time that the communication enters an information system which is under the control of the addressee; or
 - (C) the time that the communication is first opened or read by the addressee,

unless the result is that the communication would be taken to be given or made at a time which is outside Business Hours at the local time in the place of receipt of the email, in which case that communication is taken to be received at 9.00 am on the next Business Day.

15 Representations and Warranties

15.1 State's representations and warranties

The State represents and warrants for the benefit of the Developer that:

- (a) **(power to execute)**: it has the power to execute, deliver and carry out its obligations under this Licence and all necessary action has been taken to authorise that execution, delivery and performance;
- (b) **(binding obligation)**: this Licence constitutes a valid and legally binding obligation on it in accordance with its terms; and
- (c) **(no violation of any Law)**: the execution, delivery and performance of this Licence does not violate any Law to which the State is subject.

15.2 Developer's representations and warranties

The Developer represents and warrants for the benefit of the State that:

- (a) **(power to execute)**: it has the power to execute, deliver and carry out its obligations under this Licence and all necessary action has been taken to authorise that execution, delivery and performance;
- (b) **(no violation of any Law)**: the execution, delivery and performance of this Licence does not violate any Law, document or agreement to which it is a party or which is binding on it or any of its assets;
- (c) **(binding obligation)**: this Licence constitutes a valid and legally binding obligation on it in accordance with its terms; and
- (d) **(duly registered)**: it is duly registered, properly constituted and remains in existence.

16 Miscellaneous

16.1 Governing Law and jurisdiction

- (a) **(Governing Law):** This Licence is governed by, and must be construed according to, the Laws of Victoria, Australia.
- (b) **(Jurisdiction):** Each party irrevocably submits to the non-exclusive jurisdiction of the courts of Victoria, and the courts competent to determine appeals from those aforementioned courts, with respect to any proceedings which may be brought in connection with this Licence.

16.2 Entire agreement

To the extent permitted by Law, in relation to its subject matter, this Licence and the Commercial Development Agreement:

- (a) embodies the entire understanding of the parties, and constitutes the entire terms agreed by the parties; and
- (b) supersedes any prior agreement of the parties.

16.3 Further acts and documents

Each party must promptly do all further acts and execute and deliver all further documents (in such form and content reasonably satisfactory to that party) required by Law or reasonably requested by another party to give effect to this Licence.

16.4 Surviving provisions

- (a) **(Survival):** All provisions of this Licence which, expressly or by implication from their nature, are intended to survive the rescission, termination or expiration of this Licence will survive the rescission, termination or expiration of this Licence.
- (b) **(Interpretation):** No provision of this Licence which is expressed to survive the termination of this Licence will prevent any other provision of this Licence, as a matter of interpretation, also surviving the termination of this Licence.

16.5 Waiver

- (a) **(Writing):** A waiver given by a party in accordance with this Licence is only effective and binding on that party if it is given or confirmed in writing by that party.
- (b) **(No waiver):** A failure to, a delay in or the partial exercise or enforcement of a right, power or remedy provided by Law or in accordance with this Licence by a party does not preclude, or operate as a waiver of, the exercise or enforcement, or further exercise or enforcement, of that or any other right, power or remedy provided by Law or in accordance with this Licence.
- (c) **(No waiver of another breach):** No waiver of a breach of a term of this Licence operates as a waiver of another breach of that term or of a breach of any other term of this Licence.

16.6 Consents, approvals and directions

- (a) **(State):** A consent or approval required in accordance with this Licence from the State may be given or withheld, or may be given subject to any conditions, as the State (in its absolute discretion) thinks fit, unless this Licence expressly provides otherwise.
- (b) **(Developer):** A consent or approval required under this Licence from the Developer may not be unreasonably withheld, unless this Licence expressly provides otherwise.

16.7 Amendments

Except as otherwise expressly provided in this Licence, this Licence may only be varied by a deed executed by or on behalf of each party.

16.8 Severance

If, at any time, a provision of this Licence is or becomes illegal, invalid or unenforceable in any respect under the Law of any jurisdiction, that will not affect or impair the legality, validity or enforceability of:

- (e) any other provision of this Licence; or
- (f) that provision under the Law of any other jurisdiction.

16.9 Counterparts

This Licence may be executed in any number of counterparts and by the parties in separate counterparts. Each counterpart constitutes the agreement of each party who has executed and delivered that counterpart. All such counterparts taken together will be deemed to constitute one and the same agreement.

16.10 Moratorium

To the extent permitted by Law, the application to this Licence or to any party of any Law or any requirement or any moratorium having the effect of extending or reducing the Term, reducing or postponing the payment of the Licence Fee or any part of it or otherwise affecting the operation of the terms of this Licence or its application to any party is excluded and negated.

16.11 Proportionate liability

- (g) **(Exclusion of Wrongs Act):** The operation of Part IVAA of the *Wrongs Act 1958* (Vic) is excluded in relation to all and any rights, obligations or liabilities of either party under this Licence whether such rights, obligations or liabilities are sought to be enforced in contract, tort or otherwise.
- (h) **(Rights, obligations and liabilities):** Without limiting clause 16.11(g), the rights, obligations and liabilities of the parties (including those relating to proportionate liability) are as specified in this Licence and not otherwise, whether such rights, obligations or liabilities are sought to be enforced in contract, tort or otherwise.

16.12 No merger

The rights and obligations of the parties will not merge on the completion of any transaction contemplated by this Licence. They will survive the execution and delivery of any assignment or other document entered into for the purpose of implementing a transaction.

16.13 No representation or reliance

- (i) **(No representation):** Each party acknowledges that no party (nor any person acting on a party's behalf) has made any representation or other inducement to it to enter into this Licence, except for representations or inducements expressly set out in this Licence.
- (j) **(No reliance):** Each party acknowledges and confirms that it does not enter into this Licence in reliance on any representation or other inducement by or on behalf of any other party, except for representations or inducements expressly set out in this Licence.

[Purchaser]

Day of Sale: _____

HERBERT
SMITH
FREEHILLS

CONTRACT OF SALE OF REAL ESTATE - PARTICULARS OF SALE

Part 1 of the standard form of contract prescribed by the Estate Agents (Contracts) Regulations 2008

Property Address: CBD North, Lot [#] on the Strata Plan, Swanston Street, Melbourne

The vendor agrees to sell and the purchaser agrees to buy the property, being the land and the goods, for the price and on the terms set out in this contract.

The terms of this contract are contained in the -

- Particulars of sale; and
- Special conditions, if any; and
- General conditions

in that order of priority.

IMPORTANT NOTICE TO PURCHASERS

Cooling-off period

Section 31

Sale of Land Act 1962

You may end this contract within 3 clear business days of the day that you sign the contract if none of the exceptions listed below applies to you.

You must either give the vendor or the vendor's agent **written** notice that you are ending the contract or leave the notice at the address of the vendor or the vendor's agent to end this contract within this time in accordance with this cooling-off provision.

You are entitled to a refund of all the money you paid EXCEPT for \$100 or 0.2% of the purchase price (whichever is more) if you end the contract in this way.

EXCEPTIONS

The 3-day cooling-off period does not apply if -

- you bought the property at or within 3 clear business days **before or after** a publicly advertised auction; or
- the property is used primarily for industrial or commercial purposes; or
- the property is more than 20 hectares in size and is used primarily for farming; or
- you and the vendor have previously signed a contract for the sale of the same land in substantially the same terms; or
- you are an estate agent or a corporate body.

SIGNING OF THIS CONTRACT

**WARNING: THIS IS A LEGALLY BINDING AGREEMENT.
YOU SHOULD READ THIS CONTRACT BEFORE SIGNING IT.**

Purchasers should ensure that prior to signing this contract, they have received –

- a copy of the section 32 statement required to be given by a vendor under section 32 of the **Sale of Land Act 1962** in accordance with Division 2 of Part II of that Act; and
- a copy of the full terms of this contract.

The authority of a person signing -

- under power of attorney; or
- as director of a corporation; or
- as an agent authorised in writing by one of the parties

must be noted beneath the signature.

Any person whose signature is secured by an estate agent acknowledges being given by the agent at the time of signing a copy of the terms of this contract.

SIGNED BY THE PURCHASER

See contract signing page _____ on ____ / ____ / 20____

print name of person signing

state nature of authority if applicable (e.g. "director", "attorney under power of attorney")

This offer will lapse unless accepted within 20 clear business days (3 clear business days if none specified).

SIGNED BY THE VENDOR

See contract signing page _____ on ____ / ____ / 20____

print name of person signing

state nature of authority if applicable (e.g. "director", "attorney under power of attorney")

The **DAY OF SALE** is the date by which both parties have signed this contract

NOTICE TO PURCHASERS OF PROPERTY "OFF-THE-PLAN"

Off-the-plan sales

Section 9AA(1A)
Sale of Land Act 1962

You may negotiate with the vendor about the amount of the deposit moneys payable under the contract of sale, up to 10 per cent of the purchase price.

A substantial period of time may elapse between the day on which you sign the contract of sale and the day on which you become the registered proprietor of the lot.

The value of the lot may change between the day on which you sign the contract of sale of that lot and the day on which you become the registered proprietor.

CONTRACT OF SALE OF REAL ESTATE - GENERAL CONDITIONS

Part 2 of the standard form of contract prescribed by the Estate Agents (Contracts) Regulations 2008

TITLE

1. Encumbrances

- 1.1 The purchaser buys the property subject to:
- (a) any encumbrance shown in the section 32 statement other than mortgages or caveats; and
 - (b) any reservations in the crown grant; and
 - (c) any lease referred to in the particulars of sale.
- 1.2 The purchaser indemnifies the vendor against all obligations under any lease that are to be performed by the landlord after settlement.
- 1.3 In this general condition 'section 32 statement' means a statement required to be given by a vendor under section 32 of the **Sale of Land Act 1962** in accordance with Division 2 of Part II of that Act.

2. Vendor warranties

- 2.1 The vendor warrants that these general conditions 1 to 28 are identical to the general conditions 1 to 28 in the standard form of contract of sale of real estate prescribed by the Estate Agents (Contracts) Regulations 2008 for the purposes of section 53A of the **Estate Agents Act 1980**.
- 2.2 The warranties in general conditions 2.3 and 2.4 replace the purchaser's right to make requisitions and inquiries.
- 2.3 The vendor warrants that the vendor:
- (a) has, or by the due date for settlement will have, the right to sell the land; and
 - (b) is under no legal disability; and
 - (c) is in possession of the land, either personally or through a tenant; and
 - (d) has not previously sold or granted any option to purchase, agreed to a lease or granted a pre-emptive right which is current over the land and which gives another party rights which have priority over the interest of the purchaser; and
 - (e) will at settlement be the holder of an unencumbered estate in fee simple in the land; and
 - (f) will at settlement be the unencumbered owner of any improvements, fixtures, fittings and goods sold with the land.
- 2.4 The vendor further warrants that the vendor has no knowledge of any of the following:
- (a) public rights of way over the land;
 - (b) easements over the land;
 - (c) lease or other possessory agreement affecting the land;
 - (d) notice or order affecting the land which will not be dealt with at settlement, other than the usual rate notices and any land tax notices;
 - (e) legal proceedings which would render the sale of the land void or voidable or capable of being set aside.
- 2.5 The warranties in general conditions 2.3 and 2.4 are subject to any contrary provisions in this contract and disclosures in the section 32 statement required to be given by the vendor under section 32 of the **Sale of Land Act 1962** in accordance with Division 2 of Part II of that Act.
- 2.6 If sections 137B and 137C of the **Building Act 1993** apply to this contract, the vendor warrants that:
- (a) all domestic building work carried out in relation to the construction by or on behalf of the vendor of the home was carried out in a proper and workmanlike manner; and
 - (b) all materials used in that domestic building work were good and suitable for the purpose for which they were used and that, unless otherwise stated in the contract, those materials were new; and
 - (c) domestic building work was carried out in accordance with all laws and legal requirements, including, without limiting the generality of this warranty, the **Building Act 1993** and regulations made under the **Building Act 1993**.
- 2.7 Words and phrases used in general condition 2.6 which are defined in the **Building Act 1993** have the same meaning in general condition 2.6.

3. Identity of the land

- 3.1 An omission or mistake in the description of the property or any deficiency in the area, description or measurements of the land does not invalidate the sale.
- 3.2 The purchaser may not:
- (a) make any objection or claim for compensation for any alleged misdescription of the property or any deficiency in its area or measurements; or
 - (b) require the vendor to amend title or pay any cost of amending title.

4. Services

- 4.1 The vendor does not represent that the services are adequate for the purchaser's proposed use of the property and the vendor advises the purchaser to make appropriate inquiries. The condition of the services may change between the day of sale and settlement and the vendor does not promise that the services will be in the same condition at settlement as they were on the day of sale.
- 4.2 The purchaser is responsible for the connection of all services to the property after settlement and the payment of any associated cost.

5. Consents

The vendor must obtain any necessary consent or licence required for the sale. The contract will be at an end and all money paid must be refunded if any necessary consent or licence is not obtained by settlement.

6. Transfer

The transfer of land document must be prepared by the purchaser and delivered to the vendor at least 10 days before settlement. The delivery of the transfer of land document is not acceptance of title. The vendor must prepare any document required for assessment of duty on this transaction relating to matters that are or should be within the knowledge of the vendor and, if requested by the purchaser,

must provide a copy of that document at least 3 days before settlement.

7. Release of security interest

- 7.1 This general condition applies if any part of the property is subject to a security interest to which the **Personal Property Securities Act 2009 (Cth)** applies.
- 7.2 For the purposes of enabling the purchaser to search the Personal Property Securities Register for any security interests affecting any personal property for which the purchaser may be entitled to a release, statement, approval or correction in accordance with general condition 7.4, the purchaser may request the vendor to provide the vendor's date of birth to the purchaser. The vendor must comply with a request made by the purchaser under this condition if the purchaser makes the request at least 21 days before the due date for settlement.
- 7.3 If the purchaser is given the details of the vendor's date of birth under condition 7.2, the purchaser must—
- (a) only use the vendor's date of birth for the purposes specified in condition 7.2; and
 - (b) keep the date of birth of the vendor secure and confidential.
- 7.4 The vendor must ensure that at or before settlement, the purchaser receives—
- (a) a release from the secured party releasing the property from the security interest; or
 - (b) a statement in writing in accordance with section 275(1)(b) of the **Personal Property Securities Act 2009 (Cth)** setting out that the amount or obligation that is secured is nil at settlement; or
 - (c) a written approval or correction in accordance with section 275(1)(c) of the **Personal Property Securities Act 2009 (Cth)** indicating that, on settlement, the personal property included in the contract is not or will not be property in which the security interest is granted.
- 7.5 Subject to general condition 7.6, the vendor is not obliged to ensure that the purchaser receives a release, statement, approval or correction in respect of personal property—
- (a) that—
 - (i) the purchaser intends to use predominantly for personal, domestic or household purposes; and
 - (ii) has a market value of not more than \$5000 or, if a greater amount has been prescribed for the purposes of section 47(1) of the **Personal Property Securities Act 2009 (Cth)**, not more than that prescribed amount; or
 - (b) that is sold in the ordinary course of the vendor's business of selling personal property of that kind.
- 7.6 The vendor is obliged to ensure that the purchaser receives a release, statement, approval or correction in respect of personal property described in general condition 7.5 if—
- (a) the personal property is of a kind that may or must be described by serial number in the Personal Property Securities Register; or
 - (b) the purchaser has actual or constructive knowledge that the sale constitutes a breach of the security agreement that provides for the security interest.
- 7.7 A release for the purposes of general condition 7.4(a) must be in writing.
- 7.8 A release for the purposes of general condition 7.4(a) must be effective in releasing the goods from the security interest and be in a form which allows the purchaser to take title to the goods free of that security interest.
- 7.9 If the purchaser receives a release under general condition 7.4(a) the purchaser must provide the vendor with a copy of the release at or as soon as practicable after settlement.
- 7.10 In addition to ensuring that a release is received under general condition 7.4(a), the vendor must ensure that at or before settlement the purchaser receives a written undertaking from a secured party to register a financing change statement to reflect that release if the property being released includes goods of a kind that are described by serial number in the Personal Property Securities Register.
- 7.11 The purchaser must advise the vendor of any security interest that is registered on or before the day of sale on the Personal Properties Securities Register, which the purchaser reasonably requires to be released, at least 21 days before the due date for settlement.
- 7.12 The vendor may delay settlement until 21 days after the purchaser advises the vendor of the security interests that the purchaser reasonably requires to be released if the purchaser does not provide an advice under general condition 7.11.
- 7.13 If settlement is delayed under general condition 7.12 the purchaser must pay the vendor—
- (a) interest from the due date for settlement until the date on which settlement occurs or 21 days after the vendor receives the advice, whichever is the earlier; and
 - (b) any reasonable costs incurred by the vendor as a result of the delay—
as though the purchaser was in default.
- 7.14 The vendor is not required to ensure that the purchaser receives a release in respect of the land. This general condition 7.14 applies despite general condition 7.1.
- 7.15 Words and phrases which are defined in the Personal Property Securities Act 2009 (Cth) have the same meaning in general condition 7 unless the context requires otherwise.

8. Builder warranty insurance

The vendor warrants that the vendor will provide at settlement details of any current builder warranty insurance in the vendor's possession relating to the property if requested in writing to do so at least 21 days before settlement.

9. General law land

- 9.1 This general condition only applies if any part of the land is not under the operation of the Transfer of Land Act 1958.
- 9.2 The vendor is taken to be the holder of an unencumbered estate in fee simple in the land if there is an unbroken chain of title starting at least 30 years before the day of sale proving on the face of the documents the ownership of the entire legal and equitable estate without the aid of other evidence.
- 9.3 The purchaser is entitled to inspect the vendor's chain of title on request at such place in Victoria as the vendor nominates.

- 9.4 The purchaser is taken to have accepted the vendor's title if:
- (a) 21 days have elapsed since the day of sale; and
 - (b) the purchaser has not reasonably objected to the title or reasonably required the vendor to remedy a defect in the title.
- 9.5 The contract will be at an end if:
- (a) the vendor gives the purchaser a notice that the vendor is unable or unwilling to satisfy the purchaser's objection or requirement and that the contract will end if the objection or requirement is not withdrawn within 14 days of the giving of the notice; and
 - (b) the objection or requirement is not withdrawn in that time.
- 9.6 If the contract ends in accordance with general condition 9.5, the deposit must be returned to the purchaser and neither party has a claim against the other in damages.
- 9.7 General condition 10.1 should be read, in respect of that part of the land which is not under the operation of the Transfer of Land Act 1958, as if the reference to 'registered proprietor' is a reference to 'owner'.

MONEY

10. Settlement

- 10.1 At settlement:
- (a) the purchaser must pay the balance; and
 - (b) the vendor must:
 - (i) do all things necessary to enable the purchaser to become the registered proprietor of the land; and
 - (ii) give either vacant possession or receipt of rents and profits in accordance with the particulars of sale.
- 10.2 The vendor's obligations under this general condition continue after settlement.
- 10.3 Settlement must be conducted between the hours of 10.00 a.m. and 4.00 p.m. unless the parties agree otherwise.

11. Payment

- 11.1 The purchaser must pay the deposit:
- (a) to the vendor's licensed estate agent; or
 - (b) if there is no estate agent, to the vendor's legal practitioner or conveyancer; or
 - (c) if the vendor directs, into a special purpose account in an authorised deposit-taking institution in Victoria specified by the vendor in the joint names of the purchaser and the vendor.
- 11.2 If the land sold is a lot on an unregistered plan of subdivision, the deposit:
- (a) must not exceed 10% of the price; and
 - (b) must be paid to the vendor's estate agent, legal practitioner or conveyancer and held by the estate agent, legal practitioner or conveyancer on trust for the purchaser until the registration of the plan of subdivision.
- 11.3 The purchaser must pay all money other than the deposit:
- (a) to the vendor, or the vendor's legal practitioner or conveyancer; or
 - (b) in accordance with a written direction of the vendor or the vendor's legal practitioner or conveyancer.
- 11.4 At settlement, payments may be made or tendered:
- (a) in cash; or
 - (b) by cheque drawn on an authorised deposit-taking institution; or
 - (c) if the parties agree, by electronically transferring the payment in the form of cleared funds.
- 11.5 For the purpose of this general condition 'authorised deposit-taking institution' means a body corporate in relation to which an authority under section 9(3) of the Banking Act 1959 (Cth) is in force.
- 11.6 At settlement, the purchaser must pay the fees on up to three cheques drawn on an authorised deposit-taking institution. If the vendor requests that any additional cheques be drawn on an authorised deposit-taking institution, the vendor must reimburse the purchaser for the fees incurred.

12. Stakeholding

- 12.1 The deposit must be released to the vendor if:
- (a) the vendor provides particulars, to the satisfaction of the purchaser, that either:
 - (i) there are no debts secured against the property; or
 - (ii) if there are any debts, the total amount of those debts does not exceed 80% of the sale price; and
 - (b) at least 28 days have elapsed since the particulars were given to the purchaser under paragraph (a); and
 - (c) all conditions of section 27 of the **Sale of Land Act 1962** have been satisfied.
- 12.2 The stakeholder must pay the deposit and any interest to the party entitled when the deposit is released, the contract is settled, or the contract is ended.
- 12.3 The stakeholder may pay the deposit and any interest into court if it is reasonable to do so.

13. GST

- 13.1 The purchaser does not have to pay the vendor any GST payable by the vendor in respect of a taxable supply made under this contract in addition to the price unless the particulars of sale specify that the price is 'plus GST'. However the purchaser must pay to the vendor any GST payable by the vendor:
- (a) solely as a result of any action taken or intended to be taken by the purchaser after the day of sale, including a change of use; or
 - (b) if the particulars of sale specify that the supply made under this contract is of land on which a farming business is carried on and the supply (or a part of it) does not satisfy the requirements of section 38-480 of the GST Act; or
 - (c) if the particulars of sale specify that the supply made under this contract is of a going concern and the supply (or a part of it) does not satisfy the requirements of section 38-325 of the GST Act.
- 13.2 The purchaser must pay to the vendor any GST payable by the vendor in respect of a taxable supply made under this contract in addition to the price if the particulars of sale specify that the price is 'plus GST'.

- 13.3 If the purchaser is liable to pay GST, the purchaser is not required to make payment until provided with a tax invoice, unless the margin scheme applies.
- 13.4 If the particulars of sale specify that the supply made under this contract is of land on which a 'farming business' is carried on:
- (a) the vendor warrants that the property is land on which a farming business has been carried on for the period of 5 years preceding the date of supply; and
 - (b) the purchaser warrants that the purchaser intends that a farming business will be carried on after settlement on the property.
- 13.5 If the particulars of sale specify that the supply made under this contract is a 'going concern':
- (a) the parties agree that this contract is for the supply of a going concern; and
 - (b) the purchaser warrants that the purchaser is, or prior to settlement will be, registered for GST; and
 - (c) the vendor warrants that the vendor will carry on the going concern until the date of supply.
- 13.6 If the particulars of sale specify that the supply made under this contract is a 'margin scheme' supply, the parties agree that the margin scheme applies to this contract.
- 13.7 This general condition will not merge on either settlement or registration.
- 13.8 In this general condition:
- (a) 'GST Act' means A New Tax System (Goods and Services Tax) Act 1999 (Cth); and
 - (b) 'GST' includes penalties and interest.

14. Loan

- 14.1 If the particulars of sale specify that this contract is subject to a loan being approved, this contract is subject to the lender approving the loan on the security of the property by the approval date or any later date allowed by the vendor.
- 14.2 The purchaser may end the contract if the loan is not approved by the approval date, but only if the purchaser:
- (a) immediately applied for the loan; and
 - (b) did everything reasonably required to obtain approval of the loan; and
 - (c) serves written notice ending the contract on the vendor within 2 clear business days after the approval date or any later date allowed by the vendor; and
 - (d) is not in default under any other condition of this contract when the notice is given.
- 14.3 All money must be immediately refunded to the purchaser if the contract is ended.

15. Adjustments

- 15.1 All periodic outgoings payable by the vendor, and any rent and other income received in respect of the property must be apportioned between the parties on the settlement date and any adjustments paid and received as appropriate.
- 15.2 The periodic outgoings and rent and other income must be apportioned on the following basis:
- (a) the vendor is liable for the periodic outgoings and entitled to the rent and other income up to and including the day of settlement; and
 - (b) the land is treated as the only land of which the vendor is owner (as defined in the Land Tax Act 2005); and
 - (c) the vendor is taken to own the land as a resident Australian beneficial owner; and
 - (d) any personal statutory benefit available to each party is disregarded in calculating apportionment.

TRANSACTIONAL

16. Time

- 16.1 Time is of the essence of this contract.
- 16.2 Time is extended until the next business day if the time for performing any action falls on a Saturday, Sunday or bank holiday.

17. Service

- 17.1 Any document sent by—
- (a) post is taken to have been served on the next business day after posting, unless proved otherwise;
 - (b) email is taken to have been served at the time of receipt within the meaning of section 13A of the **Electronic Transactions (Victoria) Act 2000**.
- 17.2 Any demand, notice or document required to be served by or on any party may be served by or on the legal practitioner or conveyancer for that party. It is sufficiently served if served on the party or on the legal practitioner or conveyancer—
- (a) personally; or
 - (b) by pre-paid post; or
 - (c) in any manner authorised by law or the Supreme Court for service of documents, including any manner authorised for service on or by a legal practitioner; or
 - (d) by email.
- 17.3 This general condition applies to the service of any demand, notice or document by or on any party, whether the expression 'give' or 'serve' or any other expression is used.

18. Nominee

The purchaser may nominate a substitute or additional transferee, but the named purchaser remains personally liable for the due performance of all the purchaser's obligations under this contract.

19. Liability of signatory

Any signatory for a proprietary limited company purchaser is personally liable for the due performance of the purchaser's obligations as if the signatory were the purchaser in the case of a default by a proprietary limited company purchaser.

20. Guarantee

The vendor may require one or more directors of the purchaser to guarantee the purchaser's performance of this contract if the purchaser is a proprietary limited company.

21. Notices

The purchaser is responsible for any notice, order, demand or levy imposing liability on the property that is issued or made on or after the day of sale that does not relate to periodic outgoings. The purchaser may enter the property to comply with that responsibility where action is required before settlement.

22. Inspection

The purchaser and/or another person authorised by the purchaser may inspect the property at any reasonable time during the 7 days preceding and including the settlement day.

23. Terms contract

23.1 If this is a 'terms contract' as defined in the **Sale of Land Act 1962**:

- (a) any mortgage affecting the land sold must be discharged as to that land before the purchaser becomes entitled to possession or to the receipt of rents and profits unless the vendor satisfies section 29M of the Sale of Land Act 1962; and
- (b) the deposit and all other money payable under the contract (other than any money payable in excess of the amount required to so discharge the mortgage) must be paid to a legal practitioner or conveyancer or a licensed estate agent to be applied in or towards discharging the mortgage.

23.2 While any money remains owing each of the following applies:

- (a) the purchaser must maintain full damage and destruction insurance of the property and public risk insurance noting all parties having an insurable interest with an insurer approved in writing by the vendor;
- (b) the purchaser must deliver copies of the signed insurance application forms, the policies and the insurance receipts to the vendor not less than 10 days before taking possession of the property or becoming entitled to receipt of the rents and profits;
- (c) the purchaser must deliver copies of any amendments to the policies and the insurance receipts on each amendment or renewal as evidence of the status of the policies from time to time;
- (d) the vendor may pay any renewal premiums or take out the insurance if the purchaser fails to meet these obligations;
- (e) insurance costs paid by the vendor under paragraph (d) must be refunded by the purchaser on demand without affecting the vendor's other rights under this contract;
- (f) the purchaser must maintain and operate the property in good repair (fair wear and tear excepted) and keep the property safe, lawful, structurally sound, weatherproof and free from contaminations and dangerous substances;
- (g) the property must not be altered in any way without the written consent of the vendor which must not be unreasonably refused or delayed;
- (h) the purchaser must observe all obligations that affect owners or occupiers of land;
- (i) the vendor and/or other person authorised by the vendor may enter the property at any reasonable time to inspect it on giving 7 days written notice, but not more than twice in a year.

24. Loss or damage before settlement

24.1 The vendor carries the risk of loss or damage to the property until settlement.

24.2 The vendor must deliver the property to the purchaser at settlement in the same condition it was in on the day of sale, except for fair wear and tear.

24.3 The purchaser must not delay settlement because one or more of the goods is not in the condition required by general condition 24.2, but may claim compensation from the vendor after settlement.

24.4 The purchaser may nominate an amount not exceeding \$5,000 to be held by a stakeholder to be appointed by the parties if the property is not in the condition required by general condition 24.2 at settlement.

24.5 The nominated amount may be deducted from the amount due to the vendor at settlement and paid to the stakeholder, but only if the purchaser also pays an amount equal to the nominated amount to the stakeholder.

24.6 The stakeholder must pay the amounts referred to in general condition 24.5 in accordance with the determination of the dispute, including any order for payment of the costs of the resolution of the dispute.

25. Breach

A party who breaches this contract must pay to the other party on demand:

- (a) compensation for any reasonably foreseeable loss to the other party resulting from the breach; and
- (b) any interest due under this contract as a result of the breach.

DEFAULT

26. Interest

Interest at a rate of 2% per annum plus the rate for the time being fixed by section 2 of the **Penalty Interest Rates Act 1983** is payable on any money owing under the contract during the period of default, without affecting any other rights of the offended party.

27. Default notice

27.1 A party is not entitled to exercise any rights arising from the other party's default, other than the right to receive interest and the right to sue for money owing, until the other party is given and fails to comply with a written default notice.

27.2 The default notice must:

- (a) specify the particulars of the default; and
- (b) state that it is the offended party's intention to exercise the rights arising from the default unless, within 14 days of the notice being given-
 - (i) the default is remedied; and
 - (ii) the reasonable costs incurred as a result of the default and any interest payable are paid.

28. Default not remedied

28.1 All unpaid money under the contract becomes immediately payable to the vendor if the default has been made by the purchaser and is not remedied and the costs and interest are not paid.

28.2 The contract immediately ends if:

- (a) the default notice also states that unless the default is remedied and the reasonable costs and interest are paid, the contract will be ended in accordance with this general condition; and
- (b) the default is not remedied and the reasonable costs and interest are not paid by the end of the period of the default notice.

28.3 If the contract ends by a default notice given by the purchaser:

- (a) the purchaser must be repaid any money paid under the contract and be paid any interest and reasonable costs payable under the contract; and
- (b) all those amounts are a charge on the land until payment; and
- (c) the purchaser may also recover any loss otherwise recoverable.

28.4 If the contract ends by a default notice given by the vendor:

- (a) the deposit up to 10% of the price is forfeited to the vendor as the vendor's absolute property, whether the deposit has been paid or not; and
- (b) the vendor is entitled to possession of the property; and
- (c) in addition to any other remedy, the vendor may within one year of the contract ending either:
 - (i) retain the property and sue for damages for breach of contract; or
 - (ii) resell the property in any manner and recover any deficiency in the price on the resale and any resulting expenses by way of liquidated damages; and
- (d) the vendor may retain any part of the price paid until the vendor's damages have been determined and may apply that money towards those damages; and
- (e) any determination of the vendor's damages must take into account the amount forfeited to the vendor.

28.5 The ending of the contract does not affect the rights of the offended party as a consequence of the default.

Special conditions

1 Definitions and interpretation

1.1 Definitions

The meanings of the terms used in this contract are set out below.

| Term | Meaning |
|--|--|
| Act | the <i>Subdivision Act 1988</i> (Vic). |

| Government Agency | any government, semi-government, administrative, fiscal or judicial body, department, commission, authority, tribunal, agency or entity. |
| Latest Date for Registration | [not disclosed] or any later date the parties agree on in writing. |
| Lot | a lot on the Strata Plan. |
| Legal Practitioner | includes a conveyancer who is a licensee within the meaning of the <i>Conveyancers Act 2006</i> (Vic). |
| Particulars | the particulars of sale forming part of this contract. |
| Registrar | the Registrar of Titles. |
| RFP | the same meaning as in the CDA (OSD North). |
| Second Instalment Contract Price | [not disclosed] |
| Settlement Date | the date on which vacant possession of the Property is given, namely, on acceptance of title and payment of the Balance. |
| Settlement Due Date | the due date for payment of the Balance specified in the Particulars. |
| Station Land | lot [#] on the Strata Plan. |
| Station Land Management | a land management agreement between the Purchaser and the Vendor prepared in accordance with the CDA (OSD North). |

| Term | Meaning |
|--|--|
| Agreement | |
| Station Land Management Registrable Agreement | means an agreement under section 173 of the <i>Planning and Environment Act 1987</i> (Vic) in substantially similar form to the agreement in Attachment 3. |
| Station Shared Services | means specific services and structures which are shared across the Station Land and the Land including structures, plant, services, infrastructure, egress and circulation. |
| Strata Plan | proposed plan of subdivision PS[#] being the proposed 2 lot subdivision of all of the land into a lower lot containing the station, and an upper lot containing the OSD Development |
| Transfer | the instrument of transfer. |
| Vendor's Statement | the statement signed by the Vendor and given to the Purchaser under section 32 of the <i>Sale of Land Act 1962</i> (Vic). |

1.2 Incorporated definitions

- (a) A word or phrase (other than one defined in special condition 1.1) specified in the Particulars has the same meaning in this contract.
- (b) A word or phrase (other than one defined in special condition 1.1) specified in the CDA (OSD North) has the same meaning in this contract.

1.3 Interpretation

In this contract:

- (a) Headings and bold type are for convenience only and do not affect the interpretation of this contract.
- (b) The singular includes the plural and the plural includes the singular.
- (c) Words of any gender include all genders.
- (d) Other parts of speech and grammatical forms of a word or phrase defined in this contract have a corresponding meaning.
- (e) An expression importing a person includes any company, partnership, joint venture, association, corporation or other body corporate and any Government Agency as well as an individual.
- (f) A reference to a special condition, party, schedule, attachment or exhibit is a reference to a special condition of, and a party, schedule, attachment or exhibit to, this contract.

- (g) A reference to any legislation includes all delegated legislation made under it and amendments, consolidations, replacements or re-enactments of any of them.
- (h) A reference to a document includes all amendments or supplements to, or replacements or novations of, that document.
- (i) A reference to a party to a document includes that party's successors and permitted assignees.
- (j) A reference to the Purchaser's Legal Practitioners includes other legal practitioners for the Purchaser of whom the Vendor's Legal Practitioners are notified in writing.
- (k) A promise on the part of 2 or more persons binds them jointly and severally.
- (l) A reference to an agreement other than this contract includes a deed and any legally enforceable undertaking, agreement, arrangement or understanding, whether or not in writing.
- (m) A reference to liquidation or insolvency includes appointment of an administrator, compromise, arrangement, merger, amalgamation, reconstruction, winding-up, dissolution, deregistration, assignment for the benefit of creditors, scheme, composition or arrangement with creditors, insolvency, bankruptcy, or any similar procedure or, where applicable, changes in the constitution of any partnership or person, or death.
- (n) No provision of this contract will be construed adversely to a party because that party was responsible for the preparation of this contract or that provision.
- (o) A reference to a body, other than a party to this contract (including an institute, association or authority), whether statutory or not:
 - (1) which ceases to exist; or
 - (2) whose powers or functions are transferred to another body,is a reference to the body which replaces it or which substantially succeeds to its powers or functions.
- (p) A reference to a time is a reference to the time in Victoria.

1.4 Interpretation of inclusive expressions

Specifying anything in this contract after the words 'include' or 'for example' or similar expressions does not limit what else is included.

1.5 Variation of General Conditions

The following General Conditions are amended as follows:

- (a) General Condition 2.4(c) (Vendor Warranties) – delete the words 'or other possessory agreement affecting the land';
- (b) General Condition 2.6 (Vendor warranties) is deleted;
- (c) General Condition 3 (Identity of the land) is deleted;
- (d) General Condition 5 (Consents) is deleted;
- (e) General Condition 6 (Transfer) is deleted;
- (f) General Condition 7 (Release of security interest) is deleted;
- (g) General Condition 8 (Builder warranty insurance) is deleted;

- (h) General Condition 11 (Payment) is deleted;
- (i) General Condition 13 (GST) is deleted;
- (j) General Condition 14 (Loan) is deleted;
- (k) General Condition 18 (Nominee) is deleted;
- (l) General Condition 19 (Liability of signatory) is deleted;
- (m) General Condition 20 (Guarantee) is deleted; and
- (n) General Condition 24 (Loss or damage before settlement) is deleted.

1.6 Inconsistency between General Conditions and special conditions

If there is any inconsistency between the General Conditions and these special conditions, the special conditions prevail.

1.7 CDA (OSD North) - Termination

- (a) If the CDA (OSD North) is terminated for any reason whatsoever prior to settlement under this contract, then either party may terminate this contract.
- (b) If the CDA (OSD North) is terminated for any reason whatsoever after settlement of this contract, then special condition 21 applies.
- (c) This special condition is an essential term.
- (d) For the purposes of special condition 1.7(a), the Vendor is not required to issue a Default Notice under General Condition 27 and General Condition 28.4 will apply as if the Vendor had issued a Default Notice under special condition 1.7(a).

2 Identity of Land

2.1 Identity

The Purchaser acknowledges that the land offered for sale and inspected by the Purchaser is identical to the Land.

2.2 No amendment of title

The Purchaser must not ask the Vendor to amend title or to pay for the cost of doing so.

2.3 No claim for compensation

The Purchaser must not make any objection or claim for compensation or set-off, or refuse or delay payment of the Price, because of:

- (a) any misdescription of the Land;
- (b) any deficiency in its area or measurements of the Land;
- (c) any encroachment upon the Land;
- (d) any improvements not being erected within the boundaries of the Land; or

- (e) any failure to comply with a law relating to the Property or a requirement of any Government Agency.

3 When risk passes

Subject to the terms of the CDA (OSD North), the Property is at the risk of the Vendor until the earlier of:

- (a) the Settlement Date; or
 - (b) the date of possession,
- and on that date risk passes to the Purchaser.

4 Planning restrictions

4.1 Restrictions

The Purchaser buys the Property subject to any restrictions on its use or development under the *Planning and Environment Act 1987* (Vic) and any planning scheme.

4.2 Registrable agreements

The Purchaser will execute and deliver to the Vendor on the Day of Sale the General Registrable Agreement, and the Purchaser acknowledges that the Vendor will arrange for registration of this agreement on the Land and may arrange registration before the Settlement Date at its option.

5 Section 32 acknowledgment

The Purchaser acknowledges that before executing this contract or any other document relating to the purchase of the Property, the Purchaser received the Vendor's Statement from the Vendor.

6 Deposit

6.1 Payment

- (a) The Purchaser must pay the Deposit to the Vendor's Legal Practitioners and the Deposit must be held by the Vendor's Legal Practitioners on trust for the Purchaser until the Strata Plan is registered by the Registrar.
- (b) Following registration of the Plan, the Deposit is to be held by the Vendor's Legal Practitioner as stakeholder under section 24 of the *Sale of Land Act 1962* (Vic).

6.2 Default

If the Purchaser does not pay the Deposit by the date specified in the Particulars, the Purchaser is in default under this contract and General Conditions 27 and 28 will apply.

7 Subdivision

7.1 Registration of Strata Plan

- (a) The Purchaser must at its own cost and expense as soon as practicable submit to the Vendor Representative for the Vendor's approval (in respect of which the Vendor must act reasonably):
- (1) an updated Strata Plan of subdivision which is based on, and consistent with the draft Strata Plan attached as Attachment 5 to the CDA (OSD North) and which:
 - (A) identifies the location and extent of each Lot;
 - (B) includes any easements, covenants, restrictions or other dealings in accordance with the Easement Plan agreed under clause 15.4 of the CDA (OSD North);
 - (C) takes into account amendments to the draft Strata Plan as a result of changes, if any, made to the Concept Design Documentation by the Final Design Documentation (and no other changes);
 - (2) a certificate which certifies that the Freehold Works have been constructed within all relevant boundaries signed by a licenced surveyor (the Strata Plan); and
 - (3) a report which identifies the amendments (if any) required to be made to the draft Strata Plan as a result of changes, if any, made to the Concept Design Documentation by the Final Design Documentation.
- (b) If required by the Vendor, the Purchaser must make available, at the cost and expense of the Purchaser, the appropriate personnel to explain the Strata Plan or provide information in relation to the Strata Plan in such form as the Vendor reasonably requests.
- (c) If the Vendor approves the Strata Plan submitted by the Purchaser in accordance with special condition 7.1(a), then the Vendor will:
- (1) cause the Strata Plan to be submitted to the relevant Authority for certification and issue of a statement of compliance; and
 - (2) once the statement of compliance is issued, cause the Strata Plan to be lodged for registration at Land Victoria.
- (d) If the Vendor submits amendments to the Strata Plan, then:
- (1) the Purchaser and the Vendor must consult in good faith with respect to, and use their reasonable endeavours to establish, the amendments required to the Strata Plan; and
 - (2) if, and to the extent that, those amendments are agreed, the Vendor will:

- (A) cause the Strata Plan agreed by the Vendor and the Purchaser to be submitted to the relevant Authority for certification and issue of a statement of compliance; and
 - (B) once a statement of compliance is issued, cause the revised Strata Plan to be lodged for registration at Land Victoria.
- (e) If the Vendor and the Purchaser do not agree on the amendments required to the Strata Plan within 10 Business Days after the commencement of the consultation pursuant to special condition 7.1(d) then:
 - (1) the Vendor and the Purchaser must refer the dispute to an independent expert for resolution in accordance with clause 42 of the CDA (OSD North); and
 - (2) when the independent expert has made his or her determination in relation to any matter referred pursuant to this special condition 7.1(e) the Vendor must:
 - (A) cause the Strata Plan as determined by the independent expert to be submitted to the relevant Authority for certification and issue of a statement of compliance; and
 - (B) once a statement of compliance is issued, cause the Strata Plan to be lodged for registration with Land Victoria.
- (f) The Purchaser must provide the Vendor with all assistance and documentation reasonably required by the Vendor to enable the Strata Plan to be registered by Land Victoria.

7.2 Time for Registration of Strata Plan and completion of Building

- (a) If the Strata Plan is not registered by the Registrar on or before the Latest Date for Registration, either party may rescind this contract at any time before the Strata Plan is registered by giving written notice to the other party, in which case the Deposit must be repaid to the Purchaser and neither party will have any further liability to the other under this contract.
- (b) The period between the Day of Sale and the Latest Date for Registration is the specified period for the purpose of section 9AE of the *Sale of Land Act 1962* (Vic).

8 Use of Oversight Development – Restrictive Covenant

8.1 Restrictive Covenant

- (a) The Purchaser must include in the Transfer of Land restrictive covenants to run with the Land at law and in equity and to appear as an encumbrance on the certificate of title as follows:

“The Transferee for itself, its heirs, executors, administrators, assigns, successors and transferees, and the registered proprietor of the lot transferred and every part thereof and as separate covenants, covenants with the Minister for [insert] on behalf of the Crown in right of the State of Victoria (**State**) and its successors, assigns and transferees and the registered proprietor or proprietors of the land comprised in Plan of Subdivision No. PS[#] and every part or parts thereof (other than the lot transferred) that the Transferee will not operate or permit the operation of any Prohibited Business on the lot transferred.

For the purposes of this covenant, **Prohibited Business** means:

- (1) a business involving:
 - (A) the sale, provision or operation of:
 - (B) sexually explicit or pornographic goods;
 - (C) brothels;
 - (D) tattoo parlours;
 - (E) guns, firearms, explosives or offensive weapons; or
- (2) any other business or activity which the State (acting reasonably) notifies the Transferee would be offensive to users of the underground train station adjoining the lot transferred (except that it is acknowledged that the sale of alcohol does not of itself constitute an offensive activity),

and it is intended that the above covenants appear as an encumbrance on the certificate of title to the lot transferred and each part or parts of the lot transferred and that the burden of the above covenants run at law and in equity with the lot transferred and each part or parts of the lot transferred.”

8.2 Purchaser to procure compliance

The Purchaser must, until such time as the restrictive covenants are registered on the title to the Property ensure that any person to whom it sells, transfers, grants, disposes or otherwise deals with any estate or interest in the Property or grants or gives any licence to use or occupy the Property or in whose favour it grants or creates any estate or interest in the Land covenants to observe the above restrictive covenants.

8.3 Non-merger

The provisions of this special condition 8 do not merge on transfer of the Land and continue to have full effect.

9 Advertising

Any advertising placed on the Property by or on behalf of the Purchaser must:

- (a) comply with all applicable Laws and Approvals;
- (b) comply with voluntary codes of conduct established by the advertising industry; and
- (c) comply with the Advertising Restrictions.

The provisions of this special condition 9 do not merge on transfer of the Land and continue to have full effect.

10 Station Land Management Agreement

- (a) No later than 120 Business Days prior to the date on which the Developer anticipates achieving Final Completion, the Vendor agrees to provide the Purchaser with a draft form of Station Land Management Agreement.

- (b) The parties must ensure that:
 - (1) they act reasonably, expeditiously and in good faith in finalising the Station Land Management Agreement by Final Completion;
 - (2) the Station Land Management Agreement must be substantially consistent with the principles contained in the CDA (OSD North) and must be in a form reasonably acceptable to the parties having regard to the Oversight Development, the Station, the Section 173 Agreement and the Interfaces; and
 - (3) the Station Land Management Agreement provides for the allocation of costs and responsibilities for the use, maintenance and costs associated with the Station Shared Services.
- (c) Prior to settlement the Purchaser must:
 - (1) sign the Station Land Management Agreement; and
 - (2) provide the Station Land Management Agreement signed by the Purchaser to the Vendor.
- (d) The Purchaser acknowledges and agrees that the Vendor will require the Station Land Management Registrable Agreement to be registered on the title to the Land on or before settlement.
- (e) The provisions of this special condition 10 do not merge on transfer of the Land and continue to have full effect.

11 Delivery of Transfer and document for assessment of duty

11.1 Time for delivery

The Purchaser must deliver the Transfer to the Vendor's Legal Practitioners at least 10 Business Days before the Settlement Due Date.

11.2 Late delivery of Transfer

If the Purchaser does not comply with special condition 11.1:

- (a) the Vendor need not settle this contract until 10 Business Days after the date the Purchaser delivers the Transfer to the Vendor's Legal Practitioners; and
- (b) if, under special condition 11.2(a), the Vendor settles this contract after the Settlement Due Date, the Purchaser acknowledges it is in default in payment of the Balance from the Settlement Due Date until the Settlement Date.

11.3 [not disclosed]

[not disclosed]

12 Settlement

12.1 Time and place

Settlement must take place on the Settlement Due Date at the offices of the Vendor's Legal Practitioners or at any other place that they nominate.

12.2 Price

The Purchaser must pay the Price in accordance with special condition 12.3.

12.3 Payment of Price

- (a) On the Settlement Due Date, the Purchaser must pay the Vendor an amount equal to the First Instalment Contract Price.
- (b) On or before the date which is 2 years after the Final Completion Date, the Purchaser must pay the Vendor an amount equal to the Second Instalment Contract Price.
- (c) At settlement the Purchaser must pay the Vendor the First Instalment Contract Price plus or minus any adjustments made in accordance with this contract, by:
 - (1) an unendorsed bank cheque issued by a trading bank carrying on business in Victoria in favour of the Vendor or as the Vendor or the Vendor's Legal Practitioners otherwise direct in writing;
 - (2) cash; or
 - (3) if the parties agree, by electronic transfer of cleared funds.

12.4 Late settlement

If settlement takes place after 3.00pm on the Settlement Due Date, the Purchaser is taken to be in default in payment of the Balance until the next Business Day.

13 Security for Payments under CDA (OSD North)

At settlement the Purchaser must provide to the Vendor:

- (a) a second ranking mortgage over the Land as security for payment of the Second Instalment Contract Price under the CDA (OSD North) by the Developer;
- (b) procure that any financier to the Vendor enters into a tripartite agreement in a form consistent with the Financier Principles set out in the CDA (OSD North) which is on terms acceptable to the Vendor.

14 Council and water rates

- (a) The Purchaser acknowledges that the Land may not be rateable by the Melbourne City Council and the relevant water authority as at the Day of Sale.

- (b) The Purchaser agrees that if, in connection with any use or action by or on behalf of the Purchaser, or the Purchaser becoming owner of the Land, the Land becomes rateable by the Melbourne City Council and the relevant water authority, the Purchaser shall be responsible for payment of all council rates, assessments, charges or fees and any water service charges assessed or payable in connection with the Land after Final Completion, regardless of any statutory provision to the contrary, and the Purchaser shall indemnify the Vendor and keep the Vendor indemnified from and against the payment of any such rates, assessments, charges or fee which become payable to either the Melbourne City Council and the relevant water authority.
- (c) The State will reimburse to the Purchaser any amount incurred by the Purchaser in respect of land tax, council rates, assessments, charges or fees assessed or payable in connection with the Land prior to Final Completion (including where settlement occurs prior to Final Completion) and will reimburse those amounts before the later of 7 days prior to the due date for payment of the relevant amount and 20 Business Days after receipt of the relevant assessment and a tax invoice.

15 Land tax

15.1 Definitions

In this special condition 15:

| Term | Meaning |
|-----------------------------------|---|
| Actual Land Tax | the actual land tax payable by the Purchaser in respect to the Property from the Final Completion Date until the date which is 2 years after the Final Completion Date. |
| Actual Site Value | the site value of the Property on the date which is 2 years after the Final Completion Date. |
| Base Land Tax Amount | [not disclosed] as adjusted under special condition 15.2. |
| Land Tax Adjustment Amount | the amount determined under special condition 15.3. |

15.2 Adjustment of Base Land Tax Amount

- (a) For the purposes of this special condition 15, the Base Land Tax Amount shall be:
- (1) if Final Completion occurs after 2024, increased by [not disclosed] on 1 January each year after 1 January 2024 (so that, for example, on 1

January 2025 the Base Land Tax Amount is [not disclosed] increased by [not disclosed]); and

- (2) if Final Completion occurs before 2024, decreased by [not disclosed] per annum (so that, for example, on 31 December 2023 the Base Land Tax Amount is [not disclosed] decreased by [not disclosed]).

15.3 Calculation of the Land Tax Adjustment Amount

On the date which is 2 years after the Final Completion Date, the parties shall determine the Land Tax Adjustment Amount which is the net present value of the following amount based on a discount rate of [not disclosed]:

Amount = [A+B] – C

A = the Actual Land Tax

B = the amount of land tax payable by the Purchaser in respect to the Property for the land tax period occurring immediately prior to the date which is 2 years after the Final Completion Date increased annually by [not disclosed] per [not disclosed] for a period of [not disclosed]

C = the Base Land Tax Amount for the 12 month period occurring immediately prior to the Final Completion increased annually by [not disclosed] per [not disclosed] for a period of [not disclosed]

15.4 Set-off

The Land Tax Adjustment Amount shall be set-off against the Second Instalment Contract Price payable by the Purchaser.

15.5 Example

The table in Attachment 8 illustrates how the Land Tax Adjustment Amount will be determined.

15.6 No Merger

This special condition shall not merge on settlement but shall enure for the benefit of the parties.

16 Security Interests

- (a) The Vendor is not obliged to ensure that the Purchaser receives a release, statement, approval or correction in respect of any personal property subject to a security interest under the Personal Property Securities Act 2009 (Cth).
- (b) If the Purchaser receives a release from a secured party releasing a security interest in respect of the Property, the Purchaser must provide the Vendor with a copy of the release at or as soon as practicable after the date settlement is effected.
- (c) Words and phrases used in this special condition 16 which are defined in the Personal Property Securities Act 2009 (Cth) have the same meaning in this special condition 16.

17 FIRB

- (a) The Purchaser warrants to the Vendor that, before the Day of Sale, the Purchaser has obtained the approval of FIRB and any other body in existence in Australia which by virtue of any law or otherwise exercises control or supervision over the acquisition of real estate, required for the purchase of the Property.
- (b) The Purchaser indemnifies the Vendor against any claim, action, damage, loss, liability, cost, charge, expense, outgoing or payment which the Vendor pays, suffers, incurs or is liable for as a result of a breach of the warranty contained in special condition 17(a).

18 Clearance Certificate

- (a) On or before settlement the Vendor will serve a valid clearance certificate issued by the Australian Taxation Office under s.14-220 of the Taxation Administration Act 1953 (Cth) on the Purchaser.
- (b) If the Vendor does not serve a valid clearance certificate, the Purchaser can withhold an amount in accordance with Subdivision 14-D of the Taxation Administration Act 1953 (Cth) on settlement. The Purchaser cannot rescind or terminate if the Vendor does not serve a clearance certificate.

19 GST

- (a) Any reference in this special condition to a term defined or used in the *A New Tax System (Goods and Services Tax) Act 1999* (Cth) is, unless the context indicates otherwise, a reference to that term as defined or used in that Act.
- (b) Unless expressly included, the consideration for any supply made under or in connection with this contract does not include an amount on account of GST in respect of the supply (**GST Exclusive Consideration**) except as provided under this special condition.
- (c) Any amount referred to in this contract (other than an amount referred to in special condition 19(h)) which is relevant in determining a payment to be made by one of the parties to the other is, unless indicated otherwise, a reference to that amount expressed on a GST exclusive basis.
- (d) To the extent that GST is payable in respect of any supply made by a party (**Supplier**) under or in connection with this contract, the consideration to be provided under this contract for that supply (unless it is expressly stated to include GST) is increased by an amount equal to the GST Exclusive Consideration (or its GST exclusive market value if applicable) multiplied by the rate at which GST is imposed in respect of the supply.
- (e) The recipient must pay the additional amount payable under special condition 19(d) to the Supplier at the same time as the GST Exclusive Consideration is otherwise required to be provided.
- (f) The Supplier must issue a tax invoice to the recipient of the taxable supply at or before the time of payment of the consideration for the supply as increased on

account of GST under special condition 19(d) or at such other time as the parties agree.

- (g) Whenever an adjustment event occurs in relation to any taxable supply made under or in connection with this contract the Supplier must determine the net GST in relation to the supply (taking into account any adjustment) and if the net GST differs from the amount previously paid under special condition 19(e), the amount of the difference must be paid by, refunded to or credited to the recipient, as applicable.
- (h) If one of the parties to this contract is entitled to be reimbursed or indemnified for a loss, cost, expense or outgoing incurred in connection with this contract, then the amount of the reimbursement or indemnity payment must first be reduced by an amount equal to any input tax credit to which the party being reimbursed or indemnified (or its representative member) is entitled in relation to that loss, cost, expense or outgoing and then, if the amount of the payment is consideration or part consideration for a taxable supply, it must be increased on account of GST in accordance with special condition 19(d).

20 General

20.1 Further action

Each party must do everything necessary or desirable to give effect to the provisions and purposes of this contract.

20.2 Unenforceable provision

Any provision in this contract that is invalid or unenforceable is to be read down, if possible, so as to be valid and enforceable, and otherwise shall be severed to the extent of the invalidity or unenforceability, without affecting the remaining provisions of this contract or affecting the validity or enforceability of that provision.

20.3 Counterparts

This contract may be executed in any number of counterparts that together will constitute one instrument. A party may execute this contract by signing any counterpart.

20.4 No merger

A provision of this contract which can take effect after the Settlement Date does not merge on settlement and continues to bind the parties.

20.5 Waiver

- (a) A party waives a right under this contract only if it does so in writing.
- (b) A party does not waive a right simply because it:
 - (1) fails to exercise the right;
 - (2) delays exercising the right; or
 - (3) only exercises part of the right.

- (c) A waiver of one breach of a term of this contract does not operate as a waiver of another breach of the same term or a breach of any other term.

20.6 Whole agreement

This contract and the CDA (OSD North) constitute the whole agreement between the parties and contains all representations, warranties, promises and agreements of the parties in respect of its subject matter.

20.7 Assignment

- (a) The Purchaser must not assign its rights or obligations under this contract without the consent of the State.
- (b) The Purchaser acknowledges that under the DMA the Purchaser is not permitted to nominate or part with any interest in this contract without the prior written consent of the Developer.

20.8 Governing law and jurisdiction

- (a) This contract is governed by the laws of Victoria and, where applicable, the Commonwealth of Australia.
- (b) The parties irrevocably submit to the exclusive jurisdiction of the courts of Victoria and, where applicable, the Commonwealth of Australia.

20.9 Variation

A variation of any term of this contract must be in writing and signed by the parties or the parties' Legal Practitioner.

21 Buy Back

[Drafting Note: Insertion of this special condition depends on timing of transfer of title to the Purchaser]

21.1 Buyback

If the CDA (OSD North) is terminated for any reason whatsoever after settlement of this contract but before Final Completion, then the Vendor may give the Purchaser a Buyback Notice.

21.2 Terms of sale

- (a) If the Vendor gives the Purchaser a Buyback Notice in accordance with special condition 21.1, the Vendor (as purchaser) and Purchaser (as vendor) must enter into a contract of sale of real estate for the Land and any improvements.
- (b) The contract referred to in special condition 21.2(a) will be on the following terms:
- (1) the day of sale shall be 5 days after the date the Buyback Notice is received by the Purchaser;
 - (2) the purchase price shall be [not disclosed]; and

- (3) the contract shall otherwise contain the conditions contained in the standard Law Institute form of contract for the sale of real estate current as at the day of sale under the buyback contract but excluding special conditions 7, 8, 9, 10, 13, 15 and this special condition 21.
- (c) The Vendor must arrange for preparation of the contract of sale and the Purchaser will if required by the Vendor execute any further documentation to formally record any contract created pursuant to special condition 21.2.
- (d) Each party must do all such acts and things and execute all documents to implement and give effect to the provisions of this special condition 21.2, including without limitation to produce all documents of title.

21.3 Vendor's Statement

For the purposes of this special condition 21 and section 32 of the Sale of Land Act 1962, the Purchaser will be deemed to have given a Vendor's Statement to the Vendor on the Day of Sale.

Attachment 4

Advertising Restrictions

No external advertising shall be placed on the Property by the Purchaser which is visible from outside the Property unless the Vendor consents in writing. The Vendor will not unreasonably withhold its consent to any proposed external advertising which is:

- (a) associated with and incidental to an approved use or development of the Property by the Purchaser; and
- (b) either:
 - (1) outlined in the Developer's response to the RFP and agreed to by the Vendor; or
 - (2) not prohibited by the Developer's response to the RFP.

Attachment 5

Land Tax Example

Attachment 4

Advertising Restrictions

No external advertising shall be placed on the Site by the Developer which is visible from outside the Site unless the State consents in writing. The State will not unreasonably withhold its consent to any proposed external advertising which is:

- (a) associated with and incidental to an approved use or development of the site by the Developer; or
- (b) outlined in the Developer's response to the RFP and agreed to by the State; or
- (c) is permitted by the Incorporated Document.

Attachment 5

Financier Principles

- (1) The parties will be the Developer's financier (or its representative), the State, the Developer and the Purchaser.
- (2) Subject to the form of security being acceptable to the State having regard to standard industry practice for development projects of this nature, the State to consent to financier's security and confirm that the creation of the security (including over this Agreement and the Contract of Sale) does not, and exercise of an enforcing party's power in connection with the security will not, of itself contravene or constitute a default or termination event under the commercial development agreement or entitle the State to exercise any right or power in connection with, or terminate, the commercial development agreement.
- (3) The State and the borrower agree not to amend or vary the commercial development agreement without financier's prior consent.
- (4) The State agrees to transfer title to the Freehold Land in accordance with terms of the Development Agreement.
- (5) The financier deed will provide that the State may terminate this Agreement if the State complies with certain requirements. These requirements will include the following:
 - (a) the State must first provide the financier with notice of the project default by the Developer and the termination right.
 - (b) the financier must have an agreed time (**State Standstill Period**) which commences from date of receipt of the notice from the State to determine whether it wishes to exercise its cure rights and/or step-in and, if so, commence that action.
 - (c) the State Standstill Period will need to allow sufficient time for the financier to consider the facts and make a decision how it wishes to act and commence to take action such period not to exceed 20 Business Days.
 - (d) the State may only terminate if the financier elects not to cure/step-in or fails to take action to do so within the State Standstill Period.
- (6) Details of the cure period will depend on the financier but the following is a typical regime:
 - (a) the State will give notice of a default event ("**CDA Default Event**") to the financier ("**CDA Default Notice**"); and
 - (b) the financier has at least 20 Business Days' from receipt of CDA Default Notice to notify the State of its intention to remedy/take steps to remedy the CDA Default Event by developing a Financier Cure Program;
 - (i) if the financier gives notice to develop a Financier Cure Program, the State and financier are to meet to agree that program and if they cannot agree it is referred to the dispute resolution provisions for the project;

- (ii) if a Financier Cure Program is in place and it becomes clear that the cure period under it is no longer appropriate to cure the CDA Default Event and the financier has been diligently pursuing the cure activities, an extension may be requested (with supporting evidence of why) at least 10 Business Days' before expiry of the existing cure period;
- (iii) the direct deed will have a maximum imposed on the length of any cure period extension.

A Financier Cure Program may involve the financier seeking an assignment of the rights of the Developer or Purchaser, or causing a change of control of those entities, in each case such to the financier complying with the obligations under clause 37 of this Agreement. If the Financier Cure Program involves assignment, the financier will have at least 120 days to effect the assignment acknowledging that it must procure compliance with this Agreement during that period.

- (c) the State cannot terminate this Agreement unless it has given a CDA Default Notice and:
 - (i) the financier does not respond within at least 20 Business Days of receipt of that notice; or
 - (ii) the financier notifies the State within at least 20 Business Days of receipt of that notice that it doesn't intend to remedy; or
 - (iii) the financier notifies the State within 15 at least 20 Business Days of receipt of that notice that it does intend to remedy (see paragraph (6)(b) above); and
 - (A) the CDA Default Event is not remedied within the cure period; or
 - (B) the financier does not diligently pursue cure activities, provided that the State has given the financier notice of this failure and such failure hasn't been remedied within at least 20 Business Days' of receipt of such notice.
- (d) Enforcing Party's rights – the financier or other enforcing party may exercise rights and perform obligations of the borrower if it is enforcing the securities.
- (e) Provided the borrower's obligations are being performed in accordance with this Agreement the State may not rely on the mere fact of an enforcement of the securities (including if an insolvency event has occurred) as a right to terminate this Agreement.
- (f) Financier step-in and cure rights – the relevant enforcing party will be given a step-in right to allow it to exercise the rights of the Developer under this agreement and to comply with the obligations of the Developer under this agreement.
- (g) Financier step-out rights – the relevant enforcing party will have a right to step-out.
- (h) Assignment rights – the financier will have the ability to sell the Oversight Development to another developer and will be able to assign this Agreement without the consent of the State if the proposed assignee satisfies the requirements in clause 37(b)(1)-(5).

Attachment 6

Industrial relations

1 Industrial Relations Objectives

- (a) The State's expectation for the Oversight Development Works is that they will be completed with no or minimal disruptions due to employment or industrial relations issues.
- (b) The State requires effective management of employment and industrial relations issues and risks to be a priority during both the planning and carrying out of the Oversight Development Works.
- (c) The State expects that the Developer's management of employment and industrial relations matters in connection with the Oversight Development Works:
 - (1) aims to achieve a stable working environment;
 - (2) promotes productive and efficient work practices to achieve the timely completion of the Oversight Development Works;
 - (3) provides flexible work practices that support minimising disruption to the transport network;
 - (4) minimises lost time and disruption;
 - (5) ensures ongoing compliance with all Industrial Relations Laws and administrative requirements; and
 - (6) does not compromise the successful completion of the Oversight Development Works on time and at an acceptable cost.

2 IR Management Plan

The Developer must:

- (a) ensure that the IR Management Plan complies with applicable Industrial Relations Laws, and this Attachment;
- (b) ensure that the IR Management Plan demonstrates how employment and industrial relations issues and risks related to the Oversight Development Works are managed;
- (c) prepare, submit and resubmit a IR Management Plan to the State for review in accordance with clause 8.2;
- (d) ensure that the IR Management Plan is a single document for the whole of the Oversight Development Works and, as a minimum, includes:
 - (1) the Developer's strategy for managing all persons in the Developer D&C Workforce who are performing the Oversight Development Works so as to meet the industrial relations objectives in accordance with clause 1 of this Attachment;

- (2) identification of the employment and industrial relations issues that are relevant to the Developer D&C Workforce or are likely to emerge in performance of the Agreement including, but not limited to, the following:
- (A) labour requirements (e.g. skills/numbers and unskilled labour required, and manner of supply, recruitment, engagement, termination and/or redundancy of labour to allow for changing demands across the life of the Oversight Development Works);
 - (B) engagement of the required labour including, but not limited to, mobilisation plans and selection procedures (e.g. reference checks and inductions);
 - (C) approach to developing and maintaining a productive workforce, ensuring the optimal use of labour requirements (e.g. flexible approach to managing inclement weather and calendar);
 - (D) sourcing, selection and training of suitably experienced construction supervisors;
 - (E) the negotiation and establishment of terms and conditions of directly-employed labour throughout the life of the Oversight Development Works (e.g. establishment of terms and conditions of employment, identification of likely employee representatives and method of engagement with representatives);
